

Cuban Matters.

WASHINGTON, June 28.

The Cubans here this morning received advices up to the 28th instant, which confirm previous reports of the prevalence of cholera and fever among the troops. The mortality is said to be very great in several portions of the island. Their line of communication is cut off, and they are suffering for want of food and medicine. The Spanish army has lost since the commencement of the revolution more than half of their force in battle, by disease and desertion.

The Spaniards have been concentrating in Cinco Villas district and collisions are of daily occurrence.

The reinforcements from Camagueyso attacked the Cubans and were defeated. They were compelled to retreat with a loss of over three hundred killed and wounded. The loss of the Cubans was less than one hundred.

The Cuban force from Sagua la Grande attacked the Spaniards near Salmedas, defeated a large force of regulars and volunteers, and captured a train with provisions and arms which were stored there.

The expedition which landed at Nuevas Grandes succeeded in joining the main body of the Cuban army with but little difficulty. It numbered six hundred men, all in good health and spirits. They were received with great rejoicings.

The Cuban army is said to be in good fighting condition, and their leaders are determined to follow up their recent victories and are confident of success. They have as yet suffered but little from disease as they occupy elevated and healthy positions some distance from the coast.
