

The New Cuban Cable—Progress of the Work.

HAVANA, July 30.—Seventy-two miles of the Panama and West India Cable have been laid. A connection with the west end of the piece laid across the reefs has been made. All the dangerous places have been passed. The steamer *Suffolk* has returned to Batabano to make some alterations in her apparatus for paying out the cable, and will soon leave for Diego-Perez Keyes and accompany the *Dacia*, which will lay the cable to Santiago de Cuba.
