

ANOTHER SPANISH CAMPAIGN IN CUBA.—A new campaign has been commenced by the Spaniards against the insurgents in the Central Department. Generals Goyeneche and Valmaseda are to play prominent parts in the new movement against the Cubans. The campaign will be a short one, as the sickly season which will soon set in will naturally tend to put a stop to operations in the field. It is the last chance, therefore, for a blow before the warm weather comes on, and the Spaniards are evidently determined to avail themselves of the opportunity.
