A plan for incorporating the society was ordered at a meeting held (as usual then) in the university, Dec. 17, 1779, Dr. Smith, Dr. Duffield, and Mr. Biddle being constituted a committee.

It was incorporated by the General Assembly of Pennsylvania, March 15, 1780. The preamble of the act declares the objects for which it is created with considerable detail, and then come the enacting clauses which gave its name and powers.

It is remarkable how fully and clearly the powers are expressed, and the only amendments or additions that have been made to them since are those which enable the society to sell and rent their real estate. It contains one remarkable clause which shows the clear and catholic views that the founders held as to the neutrality of science, for it provides that all correspondence or communications to or from the society shall have free transmission, notwithstanding the prevalence of war.

In 1785 the State granted a lot of ground to the society as a site for the erection of a hall. This lot forms a portion of Independence Square, and its dimensions are seventy by fifty feet. The building was begun in 1785, and it was occupied, but not completely finished, in 1789. With but a slight change in the basement story, the building stands to-day in the same shape as originally constructed. By several additional enactments the Legislature authorized the society to rent such parts of the hall as were not needed for its own purposes, and under these it has always had a considerable income from rents.

An important event in the history of the society was the donation, by John Hyacinth de Magellan, in 1786, of two hundred guineas for establishing premiums to be awarded to the authors of discoveries and improvements.

The following memoranda, gathered from the minutes of the society, will give at least a hint of the variety and scope of the detail work carried on. The period covered embraces the first decade and a half of the present century.

In 1801 the society appointed a committee to collect information respecting the past and present state of this country. It consisted of Thomas Jefferson, president of the society, and at that time President of the United States; Gen. James Wilkinson, commander of the United States army; Dr. Caspar Wistar, vice-president of the society; Dr. Adam Seybert, secretary; Charles Wilson Peale, and Gen. Jonathan Williams. This committee issued a circular requesting assistance from scholars and citizens, in which they stated that the following were the principal objects concerning which they desired help:

"1. To procure one or more entire skeletons of the mammoth, so called, and of such other unknown animals as either have been, or hereafter may be discovered in America.

"2. To obtain accurate plans, drawings, and descriptions of whatever is interesting (where the originals cannot be had), and especially of ancient fortifications, tumuli, and other Indian works of art,—ascertaining the material composing them, their contents, the purposes for which they were probably designed, etc.

"To invite researches into the natural history of the earth,—to the changes it has undergone as to mountains, lakes, rivers, prairies, etc."

The total eclipse of the sun of the 16th of June, 1806, attracted a great deal of attention. It was observed under the auspices of the society at various places, and the descriptive papers were inserted in the Transactions. Andrew Ellicott watched the phenomenon at Lancaster, Pa., William Dunbar at the forest near Natchez, Miss., J. J. De Ferrer and J. Garner at Kinderhook, N. Y. A member of the society made his observations at Bowdoin College, Me., and Simeon De Witt, at Albany, N. Y.

The society was divided originally into six committees or classes, as follows: first, of geography, mathematics, natural philosophy, and astronomy; second, of medicine and anatomy; third, of natural history and chemistry; fourth, of trade and commerce; fifth, of mechanics and architecture; sixth, of husbandry and American improvements. To these were added, in 1816, a committee on history (moral and general), science and literature, of which William Tilghman was chairman, Peter S. Du Ponceau corresponding secretary, and John Vaughan recording secretary. This committee sent out circulars requesting communications and assistance in collecting historical documents and knowledge of facts. It was fairly successful. President Jefferson sent manuscript documents calculated to throw light on the history of

our country, on the customs, manners, and languages of the Indian nations, and upon various other interesting national subjects. He also procured the unedited manuscript volumes of scientific notes and observations by Messrs. Lewis and Clark, made in the course of their journey to the Pacific Ocean. Dr. George Logan, of Stenton, contributed the original correspondence which was afterwards known as the "Penn and Logan Papers," consisting of letters between William Penn, Hannah Penn, James Logan, and others. These were arranged by Mrs. Deborah Logan. Rev. John Heckewelder, of Bethlehem, Pa., contributed correspondence upon the Indian languages of this country and Zeisberger's grammar of the Lenni Lenape, or Delaware, language. This grammar was translated, under authority of the committee, into English. Heckewelder also undertook to write his observations on the "manners and customs of the Indian nations who once inhabited Pennsylvania and the neighboring States."

As early as 1835 the city of Philadelphia, desiring to own the entire block of ground bounded by Chestnut, Walnut, Fifth, and Sixth Streets (having bought the remainder of the tract embracing Independence Square from the State in 1814), made overtures to the society looking toward the purchase of the hall belonging to the latter, situated on Fifth Street. A few years afterward conditional arrangements were made for such a purpose, but they were verbal and informal, although intended on both sides to be carried out in good faith.

There was at that time a large building, known as the Museum, situated on Ninth Street south of Chestnut, which contained the large and valuable collections of the Philadelphia Museum, originally founded by Charles Wilson Peale. An arrangement was made by which the society should purchase this building, and lease part of it to the Museum Company, and use the remainder for its own purposes and benefit. It was supposed that what the city would pay for the old hall would enable the society to buy and substantially pay for the Museum property. The society made the purchase, and used all its funds in making the required payments.

These funds it was expected would be replaced by the money to be paid by the city for the old hall. The price of the hall was to be fixed by referees, of which each party was to choose two, and in case they could not agree a fifth referee was to be chosen by the four referees, and his concurrence in an award by any two and himself made the award binding and conclusive on both parties. It so happened that when the four referees met three would not concur in any award. The fifth man was chosen, and he would not agree with any two of the other referees, and so the project of a sale fell through.

While these negotiations were in progress the memorable financial troubles of 1837–42 were in full operation, the city declined to carry out the conditional bargain that had been made, and the society was plunged into the depths of financial trouble, which for a long season threatened bankruptcy and even ruin. The sequel of this melancholy story was that the Museum building was sold under a paramount mortgage of comparatively small amount, against which it was supposed the society was protected by a valuable lot on Chestnut Street, adjoining the Museum property, which had to be sold first, and also by collateral security in other forms. But all these protections failed in the day of trial, and even the society's library and collections were at one time levied on by the sheriff. But the members went to work manfully, gathered their resources together, paid their debts, and, as it were, took a new and vigorous start in corporate life, and in 1884 the society had a fund of sixty thousand dollars, the income from which, in addition to its rents, enabled it to defray all proper expenses, and make liberal appropriations for its publications.

Two very important events in the later history of the society have been the centennial anniversary of its foundation, in 1843, and the centennial celebration of its incorporation, in 1880. The first-named event was in the form of a public assembly at Musical Fund Hall, May 25, 1843, at which Dr. Robert M. Patterson, one of the vice-presidents, delivered a rich and exhaustive discourse upon the history of the society, and furthermore, in the form of eight delightful scientific symposiums, May 26–30, 1843, at the hall of the society, attended by its members and a large number of distinguished correspondents from other States and from abroad.

The anniversary of the society's incorporation was in the nature of an elaborate banquet at the St. George Hotel, southwest corner of Broad and Walnut Streets, March 15, 1880, at which the following programme of toasts prevailed, Professor Gray alone being absent and unable to respond:

1. Address by the president, Frederick Fraley, Esq.

"It is not facts which perplex us, but the opinion about those facts." —*Epictetus.*

2. "The Early Botanists of the Society." Professor Asa Gray, Cambridge, Mass.

"E'en when the hoary head is hid in snow
The life is in the leaf."—*Dryden.*

3. "The Alliance of Universities and the Learned Societies." President D. C. Gilman, Johns Hopkins University, Baltimore, Md.

"Die Weltgeschichte sucht aus sprodem Stoffen,
Ein reines Bild der Menschheit zu gestalten."—*Hebbel.*

4. "Our Friends who have passed away." Dr. W. A. Hammond, New York City.

"Plena fuit vobis omni concordia vita;
Et stetit ad finim longa tenaxque fides."

5. "The Study of Languages." President William C. Cattell, Lafayette College, Easton, Pa.

"Quce philosophia fuit, facta philologia est."—*Seneca*, Ep. 108.

6. "The Society's Name." Dr. Daniel G. Brinton, Philadelphia.

"A thing which Adam had been posed to name."—*Pope.*

7. "The Need of an Elevated and Permanent Civil Service." A. Loudon Snowden, Esq., superintendent United States Mint, Philadelphia.

"Oh, reform it altogether."—*Hamlet.*

8. "The Tendencies of Scientific Culture." Dr. John L. LeConte, Philadelphia

"Reasoning at every step he takes,
Man yet mistakes his way;
While meaner things, whom instinct leads,
Are rarely known to stray."—*Cowper.*

9. "Daily and Periodical Literature." W. V. McKean, Philadelphia.
"To aim at learning without books is, with Danáides, to draw water in a sieve."—*R. Williams* (1639).

10. "The Spirit of a Philosophical Society." Professor J. P. Lesley, Philadelphia.
"Science moves but slowly, slowly creeping on."—*Tennyson.*

To attempt to outline the achievements of the American Philosophical Society—the oldest scientific institution in the United States—during its one hundred and forty years of varied history, or to seek to epitomize the results of the valuable researches of its individual members, would be tasks of incredible magnitude. Among its presidents have been Benjamin Franklin, David Rittenhouse, Thomas Jefferson, Caspar Wistar, Robert Patterson, and William Tilghman.

Nor is the list of more modern presidents less illustrious, although composed, perhaps, of men whose reputations are less world-wide. The last eight presidents have been Peter S. Du Ponceau, Dr. Nathaniel Chapman, Dr. Robert M. Patterson, Dr. Franklin Bache, Alexander Dallas Bache, Judge John K. Kane, Dr. George B. Wood, and Frederick Fraley.

The society's library is an admirable one. It contains about twenty-two thousand volumes, in various languages, many of which are rare and valuable. The books are arranged on the shelves in numerical order, each volume having its number attached. Folios, quartos, and octavos have their respective systems of numbers. The catalogue of the library is constructed upon an original plan. Eight principal classes carry from the universal to the special, from the abstract to the concrete, from the inorganic to the organic, from matter to mind. Each class begins with the theory of the subject and follows with its practice. Excepting the first, which represents the abstract conception of knowledge itself with its universal applications, each class advances the theme beyond a point at which the class preceding leaves it. The several classes are: 1. General Science; 2. The Mathematical Sciences; 3. The Inorganic Sciences; 4. The Organic Sciences; 5. The Historical Sciences; 6. The Social Sciences; 7. The Spiritual Sciences; 8. Personal Science.

The Library of the University of Pennsylvania.—The history of the University library has been parallel with that of the institution itself. Almost immediately after the beginning of the enterprise, in 1749, a library was collected. Among the earlier contributors was Rev. Richard Peters, who presented many works in old English literature, together with a considerable number of ecclesiastical books. Other volumes, which still bear Benjamin Franklin's autograph, were donated by the latter. Dr. William Smith, the provost of the College of Philadelphia in 1762, visited England with a view to the enlargement of the endowment of the college. While there he obtained by donation and by purchase many valuable works, which were added to the library of the institution.

Shortly after the Revolution the library was enriched by a very generous donation of works, chiefly of French authorship, from Louis XVI., which had been sent at the suggestion of the Marquis de La Fayette. This munificent gift comprised works on the natural sciences, history, travels, etc., together with the Paris edition of the Byzantine historians. This donation grew out of the very great interest in the University which the French general manifested when in America.

For three-fourths of a century the growth of the library was not marked. No very extensive gifts were made, and no large sums of money were expended in the purchase of books. Such additions as were made were chiefly in the form of individual donations from publishers, authors, and various friends of the college. The period in question covers the time in which the University's latent energies and forces were shut up within the limited quarters on Ninth Street, so long occupied by the faculty. When, however, the celebration of the nation's centennial anniversary found the University occupying its present magnificent quarters in West Philadelphia, many evidences of a renewed and vigorous enterprise in every channel of effort on the part of the institution were noticeable. Among other branches to take on new life and to grow with vigor was the library.

The first great addition after removing to West Philadelphia was the donation of the splendid collection of works on social science and political economy belonging to the late Stephen Colwell. This collection, which embraced some eight thousand volumes, was unique. It included almost every important book or pamphlet, or edition of either, on the subjects mentioned that appeared down to Mr. Colwell's death, in 1869, in English, French, or Italian, besides many in German and Spanish. The collection of pamphlets on the theory of money and the practice of banking was particularly full, and many of them are not to be had at any price, or to be found in any other collection in this country.

Soon after the University acquired the above-mentioned collection of valuable books it also became possessed, by the joint act of the trustees and the alumni, of the rich library of Professor Allen. This contained, primarily, a full and judiciously selected body of authors in the department of classical, especially Greek philology, among which were the great Bibliotheca of Didot, and the fine Paris edition of the Thesaurus of Stephanus. Among other features of the magnificent Allen library may be mentioned the following: the modern Latinists, including especially the Italian and Dutch poets, with some of the patriotic and mediæval writers; a collection of

bibliographical works, catalogues, and manuals, including nearly complete collections of the works of Peignot and Nodier, and fine subscription copies of Brunet and Graesse; a fine Shakespeare library, including all the best editions and annotated translations (Delius, Schlegel, and Tieck, the Malone variorum edition, etc.), with the best English and foreign commentaries (including Ulrici, Gervinus, and the "Jahrbücher der Deutschen Shakespeare Gesellschaft"), together with works on general English philology; and a collection of English, French, and German works upon military subjects.

Another valuable accession to the library occurred when a portion of the excellent law library of the late Judge Bouvier, the noted jurist and lexicographer, was presented to the University by Dr. Richardson, the son-in law of Judge Bouvier. This collection embraced many works on English, Scotch, French, and ancient Roman law, including English reports, the French jurisconsults, the French code, the Pandects, etc.

Among other valuable donations to the library was the gift by the family of the late Tobias Wagner of property yielding an income of five hundred or six hundred dollars, for the establishment of a Wagner fund for the purchase and binding of books. Among the purchases made from this fund is the magnificent series of photographs of antiquities in the British Museum.

Among other contributions, furthermore, should be mentioned Professor Alfred Stillé's gift of a number of very valuable historical works, chiefly French and Italian. They are mainly on the history of various phases of art.

Perhaps the most noteworthy of recent donations to the library has been Professor Fairman Rogers' generous gift of works upon engineering, presented as a memorial of Professor Rogers' father, Evan Rogers. It consists of some five thousand volumes upon this single topic, many of them elaborately illustrated, and nearly all of them valuable works. It can safely be said of some that there are no duplicates in America.

The library has made such rapid and such material advancements within the past quarter of a century that it has become an honor both to the University and to the city. It contained about twenty-five thousand substantial volumes in 1884.

The Library of the Pennsylvania Hospital.—The fine medical library belonging to the Pennsylvania Hospital was founded in 1763. The first medical book owned by the institution, which formed the nucleus of the present splendid collection, appears to have been a gift from Dr. John Fothergill, who was an early and generous friend of the hospital. This volume was "An Experimental History of Materia Medica," by William Lewis, F.R.S., London, 1761, and was presented, in 1762, "for the benefit," as the record says, "of the young students in physic, who may attend under the direction of the physicians." The idea of establishing a medical library in connection with the institution having been thus probably suggested to the officers of the hospital, it was carried into effect the next year. As the number of students attracted to the hospital by its fame as a practical school for clinical medicine and surgery was considerable, the board of managers resolved to exact a fee from each student for the privilege of attending the wards of the house.

The faculty, composed of Drs. Thomas Bond, Thomas Cadwalader, Phineas Bond, and Cadwalader Evans, advised that the revenue so derived be applied to the foundation of a medical library for the institution. A number of donations from friends of the hospital soon formed a substantial nucleus for the proposed collection of medical works. In January, 1767, the executors of the will of Dr. Lloyd Zachary, with the approbation of the residuary legatees, donated from Dr. Zachary's library forty-three volumes of works upon various medical subjects; and in the same year the hospital library received a valuable acquisition in the presentation by Deborah Morris of the medical books of her late brother, Dr. Benjamin Morris, consisting of fifty-five volumes, principally standard works collected by Dr. Morris during his residence in the University of Leyden. Another donation of books, to the value of one hundred pounds, was received in the year 1774, from William Strahan, of London.

The collection of books thus gained was steadily increased by judicious purchases of works out of the library fund, the only interruption occurring during the time of the Revolution, when the lowness of the means of the institution made important additions to the library impracticable.

The first catalogue was published in the year 1790, and contained twenty-one folio volumes, seventy-seven quarto, three hundred and forty-one octavo, and eighty-nine duodecimo,—total, five hundred and twenty-eight volumes. In the same year the managers opened a correspondence with the celebrated Dr. Lettsom, requesting him to make such selections of books for the library as he thought proper. This request was complied with, and Dr. Lettsom continued a firm friend of the institution during his life.

A valuable present of books was received in the year 1800 from Sarah Zane, a wealthy maiden lady, who inherited an extensive and valuable library, the medical portion of which she bestowed upon the hospital. Her donation comprised twenty-three folios, ninety-one quartos, six octavos, and twenty-two duodecimos; in all one hundred and forty-two volumes, some of them very rare, at least in this country.

The increasing number of the students who attended the practice of the hospital now afforded an ample fund for the steady increase of the library; how faithfully it was applied may be seen by a comparison of the catalogue published in 1806 with its

predecessor of 1790, and the additional part printed in 1793. The prosperity of the library fund continued uninterrupted many years, during which a surplus accumulated, and large sums were occasionally granted from it for the general purposes of the charity, or such particular objects as appeared to require a special appropriation.

The principal object of the gentlemen who have administered the concerns of the library has always been the acquisition of books strictly medical, yet as the different branches of natural history assume the rank of collateral science, treatises upon them have never been considered foreign to the design of the foundation. On the decease of Dr. Benjamin S. Barton, late professor of Materia Medica and Botany in the University of Pennsylvania, his extensive and rare collection of works on natural history was purchased of his widow at the price of $2770.

Shortly after this important accession a supplement, or second part of the catalogue, was published, comprising all the works added to the library from 1806 to 1818.

To the year 1829 the library had grown to such a degree that another edition of the catalogue was considered necessary. This was compiled by William G. Malin, then librarian of the institution, and embodied all the former catalogues. Eight years afterward, in 1837, a supplement to the same was published, the library consisting then of seven thousand three hundred volumes.

In 1857 was prepared an entirely new catalogue, and upon an enlarged basis. This *Catalogue Raisonné* was modeled after that of the library of the Medical Society of Edinburgh, the arrangement of which was followed out so far as some difference in the compass and character of the two libraries would permit. A supplement to this catalogue was issued in 1867.

At the time of the publication of the *Catalogue Raisonné*, in 1857, the library comprised ten thousand five hundred volumes, as follows: folio, three hundred and fifty-eight; quarto, eleven hundred and seventy-eight; octavo, seven thousand seven hundred and sixty-four; and duodecimo, twelve hundred.

Since the last-named date there has been a very material increase in the number of volumes added to the library. In fact, the number has been doubled; so that, in 1884, the collection comprised some fifteen thousand bound volumes. With the exception of two or three others, the library of the Pennsylvania Hospital contains the finest collection of medical books in America. In point of age it has no rival.

Books may be borrowed by subscribers (who pay three dollars a year), or those who acquire a life right, either by purchase (twenty-eight dollars) or gift from the managers, these beneficiaries being chiefly those who were formerly resident physicians, to whom it is customary, on leaving, to give the use of the hospital's collection of medical works.

The library is housed in one of the substantial buildings comprised in the hospital's valuable property, bounded by Spruce, Pine, Eighth, and Ninth Streets.

The Library of the German Society of Pennsylvania.—The "German Society of Pennsylvania" was founded in 1764 for the purpose of protecting and relieving distressed German emigrants brought to Philadelphia; and this charitable object has ever since remained its principal feature. But in 1766 the suggestion of establishing a library was thrown out and favorably received, though at that time not acted upon. The society's charter, which was granted in 1781, extended the sphere of its usefulness by including education and the establishment of a library within the scope of its powers. A by-law having reference to a library was shaped accordingly, and some feeble attempts were made toward collecting books, but it was not until 1817 that decided steps were taken to carry the long-entertained plan into effect. In the annual meeting of the society on the 26th of December, 1816, Mr. W. Lehman offered the following preamble and resolution:

"WHEREAS, Next to the relief of distress, one of the original objects of the society was the establishment of a library in order to facilitate the acquisition of knowledge, which is so essential to the enjoyment of life, and so conducive to the preservation of virtue; and

"WHEREAS, Notwithstanding the great population and wealth of Philadelphia, and the excellence and celebrity of the literature of Germany, there is not to be found within the city a judicious collection of German books, etc.; be it therefore

"*Resolved*, That a committee of five members be appointed to inquire into the expediency of purchasing and importing some of the works of the best German authors, relating to general literature, to serve as a foundation of a library to be established agreeably to the act of incorporation and the laudable intention of the founders of our society, and to report a plan at the next meeting."

The committee to which this resolution was referred, consisting of L. Krumbhaar, D. Bräutigam, S. Keehmle, W. Lehman, and H. T. Virchaux, reported favorably, and suggested, as the investments would be of a limited amount, that particular attention should be paid, in the first place, to forming a collection of works in the German language. The first library committee consisted of Rev. Ph. F. Mayer, Rev. S. Helfenstein, L. Krumbhaar, W. Lehman, and H. T. Virchaux. The same gentlemen were reappointed every year until 1825, except that in 1823 H. T. Virchaux was replaced by Rev. Christian Crouse, and the latter, in 1825, by Rev. C. R. Demme. The first librarian was Joseph Charles Sprenger, a dealer in fancy goods, whom Ritter ("History of the Moravian Church," page 274), describes as a handsome Tyrolese. He was followed in the next year by Frederick K. Nidda, who held the position of librarian until 1828.

While the first purchase of books, in accordance with the recommendation, was limited to those in the German language, the claims of the rising population soon made themselves felt, and when the first catalogue was printed, in 1826, it showed a slight excess

of English over German books. This preponderance continued to exist nearly forty years. In 1884 the library of the German Society consists of about twenty thousand volumes, of which nearly two-thirds are in the German, the rest in the English language. It is richly stocked with works of general information and research, such as history, biography, ethnology, travels, science, philosophy, and art. The standard authors in both languages, especially the German, are well represented; and the library contains also the latest works of poetry and fiction.

Until 1807 the German Society continued to hold its meetings at the place where the society had been organized in 1764,—the Lutheran school-house in Cherry Street, below Fourth, which was built in 1761, and destroyed by fire March 25, 1878.

Since April 9, 1807, however, the society occupied the quarters in which its library was placed, in the upper hall of the building No. 24 South Seventh Street, the ground floor and rear of which were leased to the Philadelphia Gas Company. This building was erected by the society in 1806, and enlarged in 1866. The persons entitled to the use of the library are the members of the German Society and such as pay an annual subscription.

A special department of the library consists of Americana that relate to the German element, such as German imprints, works and pamphlets on immigration, county histories, proceedings of German societies, etc.

The Library of the College of Physicians.—In an address delivered by Dr. Benjamin Rush, on Feb. 6, 1787, before the newly-organized College of Physicians, setting forth the purposes of the institution, the intention of establishing a library by the college is indicated. He said, "A medical library will help to diffuse knowledge among us on easy terms." At the stated meeting in April, 1788, a series of by-laws was presented, containing, among other sections, the following, "Section VII., Library," without anything further on the subject. At the meeting in June, two months later, Drs. John Jones, Samuel Powel Griffiths, and Caspar Wistar were appointed a committee to report a plan for the formation of a library for the use of the Fellows of the college, whose report was subsequently considered and reconsidered, and a resolution adopted that "the several members of the college be requested to send to the secretary such books as they mean to present to the college."

The first donation of books seems to have been made, in 1789, by Dr. John Morgan, one of the founders of the college. In July of this year Drs. Jones, Parke, and Wistar were appointed a committee to prepare a list of books to be purchased at a cost of not more than fifty pounds, Pennsylvania currency. In 1790 the library received accessions of valuable books by the death of Dr. Morgan, its first patron, who bequeathed to the college the works of Hippocrates, Galen, Morgagni, and Harvey, the whole making twelve folio volumes and one quarto. Few additional volumes were purchased, and, besides donations from Drs. Morgan, Griffiths, Rush, Benjamin Barton Smith, Shippen, and Jones, contributions of books were very meagre during a long series of years. In volume i., part i., of the Transactions of the college, published in 1793, there is a foot-note which refers to the library in the following not very enthusiastic words: "It has been established by the college, and now consists of a number of scarce and valuable books."

Nor was the progress of the library during the first half of the present century more marked. Very few books were donated, and cash expenditures in the purchase of new works were insignificant. In 1834 the first committee on the library was appointed, consisting of Drs. J. W. Moore, William S. Coxe, and Simon A. Wickes, who, in January, 1835, made a verbal report upon the state of the library, "showing that it is in a bad condition and going to decay." In the annual report of the library committee, presented in June, 1836, it was stated that "the collection of books belonging to the college includes thirty-one folio volumes, sixty-seven quartos, and one hundred and ninety-three octavos, making a total of two hundred and ninety-one, besides a number of unbound pamphlets," surely not a very flattering showing after nearly fifty years of effort.

The growth of the library, however, was necessarily slow. For many years after the date of the institution of the College of Physicians, the diffusion of medical knowledge was not extended, and technical publications were not numerous. Such additions as were made were, as has been stated, largely in the nature of donations or bequests from private medical libraries. Indeed, for three-fourths of a century the books belonging to the college were stored in three or four library-cases,—at the University, on Ninth Street; in the Philosophical Society's building, Fifth Street, below Chestnut; at the old Mercantile Library building, at the southeast corner of Fifth and Library Streets; and in the picture-room of the Pennsylvania Hospital, Spruce Street, above Eighth, at which respective places the college was housed at various times. It was not until the erection of the hall of the College of Physicians, at the northwest corner of Locust and Thirteenth Streets, and the removal of the college thereto in 1863, that separate rooms were set apart for library purposes.

At the time of the occupancy by the college of its new buildings in 1863, it is probable that the library did not number more than four thousand five hundred volumes. This state of affairs was, however, a gigantic stride over the library's condition in 1836, when, as previously stated, only two hundred and ninety-one books were comprised in the collection.

The most noteworthy addition to the library during its entire history was the donation by Dr. Samuel Lewis, in 1864, at one time, of two thousand five

hundred carefully-selected volumes. Since the date named Dr. Lewis has presented to the library many additional books, until at the present time the Lewis Library comprises nearly one-third of the whole collection of works belonging to the College of Physicians. This branch of the library occupies an entire room in the society's hall, and is wholly sustained by the generosity of Dr. Lewis.

Another valuable contribution of books came to the library in 1866, through a bequest contained in the will of George Ord. This admirable collection, appraised at a valuation of four thousand dollars, was not comprised of medical works, but consisted of "the best editions of the most eminent classical writers in the English and French languages, many volumes of interesting voyages and travels, and the best and largest collection of English and French dictionaries perhaps in this country, being the fruits of Mr. Ord's industrious collecting during more than half a century."

Among other large contributors of books within the past forty years may be mentioned the following: Dr. Henry Bond, Dr. George B. Wood, Dr. Isaac Hays, Dr. Alfred Stillé, Dr. Moreton Stillé, Dr. Thomas F. Betton, Dr. Robert M. Huston, Mrs. M. A. Mütter (the widow of Dr. Thomas D. Mütter), Dr. Francis West, and Dr. Charles D. Meigs.

In addition to the contributors named, other friends of the institution have donated many valuable medical and scientific books. Besides this, the college has been enabled, during the past twenty or twenty-five years, to acquire by purchase a large number of works devoted to medicine and kindred topics. As a result the library has reached a point where it has become the best collection of medical books in the country, and in size is exceeded only by the library of the surgeon-general's office at Washington. It contains twenty-six thousand five hundred bound volumes, besides many pamphlets and unbound books. The last annual report of the Library Committee, presented on Dec. 5, 1883, shows that there were added to the library during the preceding year two thousand one hundred and eighty-six bound volumes, two thousand one hundred and seven pamphlets, and two thousand eight hundred and sixty-two numbers of current journals.

So far as the Fellows of the College of Physicians are concerned, the library is a circulating one, books being taken out subject to certain restrictions. As a library of reference, for visitors introduced by Fellows of the college, it is also considerably utilized.

It is worthy of note, that while Philadelphia possesses two of the finest collections of medical works in America, that of the College of Physicians and that of the Pennsylvania Hospital, yet a comparison of the catalogues of the two libraries exhibits a surprising absence of duplication. In the two collections Philadelphia contains the richest material in the way of medical literature of any city in America.

The Library of the Law Association.—The Law Association was formed on the 29th of March, 1827, by the union of "The Law Library Company of the City of Philadelphia" and "The Associated Members of the Bar of Philadelphia."

The former of these two was organized and incorporated on the 13th of March, 1802, by seventy-two members of the Philadelphia bar, for the purpose of maintaining a law library for the use of its members. The first board of directors was composed of Joseph B. McKean, William Lewis, Edward Tilghman, William Rawle, Jasper Moylan, Joseph Hopkinson, and John B. Wallace.

The "Associated Members of the Bar" was formed some years later. Its membership was confined to the members of the bar of the Supreme Court of the State. Its chief objects are said to have been "to bestow especial attention upon the practice of the bar and the improvement of the rules of practice adopted by the courts, to maintain the purity of professional practice, to prevent unfair intrusion upon the ranks of the profession, and to afford pecuniary aid and relief to its members when necessary." (See Martin's "Bench and Bar of Philadelphia," 1883.)

Upon the union of the two associations in 1827, the charter of the "Law Library Company" was amended so as to include the greater part of the objects of the "Associated Members of the Bar." William Rawle was elected the first chancellor; Horace Binney, vice-chancellor; George M. Dallas, secretary; Thomas I. Wharton, treasurer. Until about 1840 the latter practically acted as librarian. The charter was again amended in 1880.

The objects of the charter as amended are,—

1. The general supervision of the conduct of members of the bar, and of all persons connected officially with the administration of the law or in charge of the public records, and, in cases of any breach of duty on their part, the institution of such proceedings as may be lawful in respect thereto.

2. The improvement of the law and of its administration; the protection of the bar and of judicial tribunals, their officers and members, from invasion of their rights; and the maintenance of their proper influence.

3. The keeping of a law library.

As early as 1836 the library was kept in the old Congress Hall, on the southeast corner of Sixth and Chestnut Streets, in a room directly over the door of entrance on Sixth Street. An entry on the north side of this room was afterward taken in as a part of the library-room, and later another room, directly opposite the library, on the east side of the building, was added. At an earlier date the library was kept in a room immediately on the east of Independence Hall, in the State-House, in what was probably the office of the clerk of the Supreme Court of Pennsylvania. In 1876 the books were removed to commodious

quarters in the Athenæum Building, No. 219 South Sixth Street.

The library, which is the oldest of its kind in the United States, is very complete in reports, and contains a fair set of the original laws of the various States. It also has a very complete and valuable set of records of cases argued in the Supreme Court of the United States since 1832, presented to it by Henry Baldwin, Jr., Esq. The library contains over sixteen thousand volumes. Much of its early growth was due to the labors of Mr. John William Wallace, who was the first regular librarian. He served for twenty years, or until 1860. Samuel Dickson was librarian from 1860 to 1865; James T. Mitchell from 1865 to 1871; George Tucker Bispham from 1871 to 1876; and Francis Rawle has been librarian from 1876 to the present time (1884).

The valuable collection of portraits of judges and members of the bar, numbering thirty-six, comprises among others the well-known portrait of Chief Justice Marshall, by Inman; also portraits of Horace Binney, by Sully; of Edward Tilghman, by R. Peale; of Chief Justice Gibson, by Street; of Chief Justice Tilghman, by Neagle, after R. Peale; and of William Rawle, by Inman.

It also possesses marble busts of Chief Justices Marshall and Gibson. The membership in December, 1883, was three hundred and forty-seven.

The chancellors of the association have been as follows:

William Rawle, from 1827 until 1836; Peter S. Du Ponceau, from 1836 to 1844; John Sergeant, from 1845 until 1852; Horace Binney, from 1852 until 1854; Joseph R. Ingersoll, from 1854 to 1857; William M. Meredith, from 1857 until 1873; Peter McCall, from 1873 until 1880; and George W. Biddle, from 1880 until 1884.

The present officers are as follows:

Chancellor, George W. Biddle; Vice-Chancellor, William Henry Rawle; Secretary, Robert Davison Coxe; Treasurer, William Brooke Rawle; Librarian, Francis Rawle.

The general affairs of the corporation are managed by a library committee, consisting of twelve members. The censorship over the bar is in the hands of a committee of censors, composed of nine members.

The Academy of Natural Sciences.—The establishment of the Academy of Natural Sciences was the result of the united efforts of several young men who had a taste for science, but who had small opportunities of increasing their stock of knowledge. John Speakman, an apothecary,—whose shop, in 1811, was at the corner of Second and Market Streets,—whose education was no greater than what he had acquired in a country school and what he had picked up by study and observation afterward, may be said to have been the founder of this institution. One of his friends, Jacob Gilliams, a dentist, had some uncultivated taste for natural history. Conversations between Speakman and Gilliams led the former to suggest that if they and their other acquaintances with the same tastes could be induced to meet together at stated times they might, by conversation and communications to each other of the observations they had made upon subjects of natural history, improve themselves and be encouraged to further study. It was accordingly agreed between them that they should meet for the purpose of forming a society on the succeeding Saturday evening, and bring with them such of their friends as were inclined to join them in their object. Accordingly, on the 25th of January, 1812, a small party of six persons met at Speakman's store. Besides Speakman and Gilliams, there were present Dr. Gerard Troost, Dr. Camillus MacMahon Mann, John Shinn, Jr., and Nicholas S. Parmentier. Speakman was chairman and Mann was secretary. Plans of the new society were talked over. The objects to be attained were discussed, and the conclusions were that "the operations of nature demand unprejudiced, attentive, and severe scrutiny; and in order that men may aid each other by comparison of observations their discussions must be free. . . . Sectarians are prone to oppose the promulgation and development of any newly-discovered fact which to them seems likely in the least to militate against their cause or dogmas; and it was from such motives that men of science in the dark ages experienced so much persecution; and they have experienced persecution even to our own time, until truth became too powerful for their opposition."

It was determined that neither politics nor religion should be allowed, nor even be permitted to be alluded to, at the meetings of the society. Several meetings for the purpose of organization were held at Speakman's store during the months of February and March, and one meeting at the confectionery-shop of Charles Mercier, at No. 104 High Street, which was between Third and Fourth Streets. The constitution was discussed and agreed upon on the 17th of March, and at the meeting on the 21st of the same month the title of Academy of Natural Sciences—which was suggested by Dr. Samuel Jackson, who was not then a member—was used for the first time. It was resolved that there should be "a museum of natural history, a library of works of science, a chemical experimental laboratory, an experimental philosophical apparatus, and every other desirable appendage for convenience of illustration and for the advancement of natural knowledge, and for the common benefit of all the individuals who may be admitted members of our institution." Thomas Say was approved of as a member at this time, and it was resolved that the anniversaries of the society in future should be dated from the 21st of March, 1812. There was a "committee and board of regulation, management, and direction," which met on Thursday evening of each week, and the general sessions were held on Saturday evening.

The six persons who founded the society met with

but little countenance for three months, although their objects were well known and were talked about among persons of reputed scientific knowledge and tastes. The founders foresaw that there was no hope of success unless they took upon themselves very considerable burdens at the beginning,—"a responsibility as to character and expenses," said they, "that may and must be considerable, and unless we make very extraordinary, zealous, determined, and persevering exertions, the institution must die in the nutshell before it can germinate and take root." In April, 1812, a small room was rented over a milliner's shop, situate at No. 121 North Second Street, near Race. Here the library was begun with a few books, presented by Messrs. Speakman and Mann. The museum was enriched by a herbarium collected in the neighborhood of Paris by Parmentier, a few mounted birds by Say, a few shells and insects by Dr. Barnes, and some artificial crystals prepared by Dr. Troost. This commencement, it has been said, "was calculated to excite merriment rather than procure respect;" but, slender as the foundations were, they were deep and strong enough upon which to erect, in the course of years, a magnificent collection of natural objects in the museum, and a rich and valuable collection of books.

The first election of officers was held on the 7th of May, 1812, and the following gentlemen were chosen: President, Dr. Gerard Troost; Vice-Presidents, N. S. Parmentier and John Shinn, Jr.; Treasurer, John Speakman; Controller, Jacob Gilliams; Conservator, Thomas Say; Secretary, Dr. C. M. Mann. This array of officers exhausted the whole membership of the society except one. There were at this time seven officers, and only one member—Dr. John Barnes—who did not hold office. The cabinet of minerals that had previously belonged to Dr. Seybert was purchased in August, by Mr. Speakman, for seven hundred and fifty dollars. He loaned the money, and the society converted the debt into shares of stock at twenty dollars each, which were divided among the members, who were promised repayment, with interest, from the treasury, and were given a potential voice in the affairs of the academy by virtue of their property therein. "The creation of this stock," says Dr. W. S. W. Ruschenberger, in "A Notice of the Origin, Progress, and Present Condition of the Academy of Natural Sciences," published in 1860, "formed a chain which bound the members together, without which they might have ceased to meet before the close of the year 1812." The acquisition of the Seybert cabinet gave the society something to work upon; and Dr. Troost took advantage of the opportunity to deliver a course of lectures on mineralogy, which was the first scientific instruction imparted to the members.

The collections having increased beyond the narrow capacity of their room, rendered more extensive accommodations necessary. The upper part of a house on the west side of Second Street, then No. 78, north of Arch Street, was rented, and to these apartments, which were called the hall of the academy, the collections were removed in September.

The efforts of the infant society were directed to increase the museum and library, and to augment the number of members and correspondents. But so unpopular was the enterprise that at the close of 1812 the Academy of Natural Sciences of Philadelphia consisted of only fourteen members and thirty-three correspondents.

The library and collections increased more rapidly than the number of members during 1813 and 1814. In the course of the former year Mr. Say delivered before the academy a series of lectures on entomology, and in the spring of the latter Drs. Waterhouse and Barnes delivered, under the auspices of the academy, a course of popular lectures on botany, the first ever delivered in this city. They were attended by more than two hundred ladies and a considerable number of gentlemen. This course was repeated in the spring of 1815 in the building at the southwest corner of Arch and Fifth Streets.

About the end of July, 1815, the academy removed from Second Street to the new building erected especially for its use by Jacob Gilliams, one of its founders. It was situated upon the rear end of a lot on the north side of Arch Street, between Front and Second, and was approached by a passage-way opening to the street. Mr. Gilliams leased this building to the society for two hundred dollars a year.

In 1816 the society adopted a constitution, and it was incorporated by act of the Legislature of Pennsylvania passed March 24, 1817.

In 1817 the academy commenced the publication of a journal, in which the society "determined to communicate to the public such facts and observations as having appeared interesting to them are likely to be interesting to other friends of natural science."

After half the first volume was printed it was found that the patronage was not equal to the expense. For the sake of economy it was determined among the members to endeavor to get out the journal by their own work. William Maclure procured an old printing-press, some type was bought, and the members of the committee on publication met at Mr. Maclure's house, where they set up the type and printed their impressions. Nearly all of the second half of the first volume was prepared in that way. Their labors ceased for a time at the completion of the volume, in 1818. In 1821 it was resumed under the management of Dr. Isaac Hays, and it was continued without interruption until 1825, the printer being Jesper Harding. The publication was continued afterward up to 1842.

A committee was appointed about 1823 to obtain better accommodations for the society. Nothing of moment was done immediately, and in January,

1825, a new committee was appointed, consisting of Isaac Hays, M.D., William Mason Walmsley, William Strickland, William S. Warder, Samuel George Morton, M.D., and Roberts Vaux. This committee entered into negotiations toward the close of the year 1825 for the purchase of the church building and lot at the southeast corner of Twelfth and George [now Sansom] Streets, which belonged to the New Jerusalem (or Swedenborgian) congregation. The negotiation was closed on Jan. 3, 1826, by the purchase of the property for four thousand three hundred dollars. To fit it for the purposes of the academy an expenditure of seventeen hundred dollars was required, making the aggregate cost of the then new hall about six thousand dollars.

To consummate this purchase more than two thousand dollars were contributed by members, and the balance was loaned by members and others. A debt of three thousand dollars was thus created, and up to August, 1837, only three hundred dollars of the amount had been paid. At that time William Maclure, with his characteristic liberality, presented to the institution five thousand dollars. The debt was forthwith liquidated, and two thousand three hundred dollars invested for the use of the society.

The academy held its first meeting in that hall on the 9th of May, 1826.

To render the museum generally useful, the academy opened it gratuitously to the public in 1828; and from that time till May, 1870, a period of forty-two years, it was visited by citizens and strangers on Tuesday and Friday afternoons throughout the year, tickets of admission being given by the members to all who applied for them. At the time last mentioned it became evident that the crowds of people who visited the museum were injurious to the preservation of the collections. To reduce the number, an admission fee of ten cents was required from every visitor. The effect of this trifling charge was to immediately reduce the number of daily visitors from thousands to hundreds, and even less.

In the year 1836 there was again a demand for increased accommodation. A building committee was appointed Feb. 7, 1837.

On the 22d of April, 1839, a lot, fifty by one hundred feet, at the northwest corner of Broad and Sansom Streets, was purchased for thirteen thousand three hundred and thirty-three dollars, and the building committee made a contract to erect a hall, consisting of a basement story, which included a lecture-room and a room above, for twenty-two thousand dollars.

On the 25th of May the corner-stone of the building was laid with the usual ceremonies. Professor Walter R. Johnson delivered an address appropriate to the occasion.

The means to purchase the lot and pay the cost of construction were derived in part from the proceeds of sale of the premises at Twelfth and Sansom Streets, ten thousand nine hundred and fifty dollars, but chiefly from Mr. William Maclure. Of his contributions, seventeen thousand dollars were added to the building fund, which was largely augmented by liberal donations from members and others.

The building, which was constructed of brick, and fire-proof throughout, had a front of forty-five feet on Broad Street and eighty-five feet on Sansom Street, and an elevation of fifty feet.

The transfer of the collections and library was made at a cost of thirty-four dollars. They were all placed in the saloon, on the second floor, and the society held its first meeting in this hall Feb. 18, 1840.

At the stated meeting of June 30, 1846, Dr. Morton announced that Dr. Thomas B. Wilson had purchased the famous collection of birds of the Duc de Rivoli, embracing ten thousand specimens mounted and named, and wished them to be arranged in the academy, and therefore moved the appointment of a committee to devise means to extend the building. The committee reported, August 4th, that Mr. Nathan Smedley had agreed with Dr. Wilson to execute the plan for nine thousand two hundred dollars. The building was extended thirty feet westward, making its area forty-five by one hundred and fifteen feet. The library was moved from the second floor into the new room at the west end of the basement, and the society held its first meeting in it May 4, 1847.

The munificent gifts of Dr. Wilson, who paid the entire cost of extending the building, rapidly increased the museum. To accommodate it the lecture-room was altered during 1847, and the collections of minerals, of reptiles, fishes, etc., were removed into it, leaving more space in the main hall for the display of the birds.

On Dec. 30, 1851, a committee was appointed to collect funds to enlarge and improve the hall. The committee reported, Jan. 25, 1853, that the estimated sum required had been subscribed. Dr. T. B. Wilson, Dr. Robert Bridges, and Mr. William S. Vaux were appointed a building committee to execute the plans of improvement. In December, 1855, Mr. Vaux, in behalf of the committee, reported that the work of raising the previously enlarged building twenty-four feet, making its entire elevation seventy-four feet, had been completed in a satisfactory manner at a cost of twelve thousand two hundred and sixty-three dollars, which had been paid.

Of this amount, twelve thousand two hundred and eighteen dollars were subscribed by ninety members. More than a fourth of the sum expended by the building committee was contributed by Dr. Thomas B. Wilson, who also paid ten thousand eight hundred and fifty dollars, the entire cost of supplying all the cases, etc., in the new saloon, and in the east basement-room, which had been arranged for the use of the library, and for the meetings of the society.

Nov. 14, 1865, on motion of Mr. George W. Tryon, Jr., a committee was appointed "to devise methods

for advancing the prosperity and efficiency of the academy by the erection of a building of a size suitable to contain the collections," to increase the number of members, improve the style of printing the Proceedings, etc.

This committee reported progress, and submitted a series of resolutions, which were adopted Dec. 26, 1865, at the annual meeting.

Those resolutions required the appointment of a committee of forty members to solicit subscriptions for the purpose of erecting a fire-proof building for the use of the academy, the subscriptions to be made payable March 31, 1867, but valid only in case their aggregate should equal or exceed one hundred thousand dollars on the 31st day of December, 1866; and also a committee of five to select a suitable site, located as near as possible to the old building, but no "lot of ground of less than three times the size" of that at Broad and Sansom Streets was to be considered.

In anticipation of the creation of the building fund, the building-fund committee submitted a resolution, which was adopted March 27, 1866, which provided that all moneys which might be given to constitute the building fund of the Academy of Natural Sciences should be confided to a board of trustees, of not less than thirteen members of the academy, to be elected by the contributors, "each of whom shall be entitled to cast one ballot for every fifty dollars he or she may have subscribed."

At the stated meeting held Jan. 8, 1867, it was announced that a board of trustees of the building fund had been elected. The board was constituted as follows: W. S. W. Ruschenberger, M.D., chairman; George W. Tryon, Jr., secretary; William S. Vaux, treasurer; Robert Bridges, M.D., John B. Budd, Frederick Graff, Joseph Jeanes, Joseph Leidy, M.D., John Rice, Thomas Sparks, John Welsh, Ed. S. Whelen, and William P. Wilstach.

About that time a joint committee, composed of representatives of the Academy of Fine Arts, the Academy of Natural Sciences, the Library Company of Philadelphia, the American Philosophical Society, and the Franklin Institute, was formed, and at its instance the Councils of the city passed a resolution, on November 4th, asking the Legislature of the State for authority to grant, on certain conditions, the use of the Penn Squares to the societies named. The board considered it expedient to wait the answer of the Legislature. The bill to authorize the City Councils to grant the use of the Penn Squares to the societies passed the Senate, but failed in the House of Representatives.

On the 10th of April, 1868, the board resolved unanimously to purchase a lot of ground, extending on Race Street westward from Nineteenth Street one hundred and ninety-eight feet, then southward one hundred and forty-four feet, and east fifty-nine feet, and again southward one hundred and forty-four feet to Cherry Street, and along the latter to Nineteenth Street one hundred and thirty-nine feet, on which the front is two hundred and eighty-eight feet. This lot was bought for sixty-five thousand two hundred and ninety-eight dollars, and conveyed to Joseph Leidy, M.D., John Welsh, William S. Vaux, E. S. Whelen, George W. Tryon, Jr., and Thomas Sparks, in trust for the academy.

Plans of a building to be erected ont his lot, with estimates for its construction, were obtained from three architects. Those submitted by Mr. James H. Windrim approximated nearest to the requirements of the institution, and he was therefore duly elected architect of the academy.

The board believed that a majority of the contributors as well as of the members of the academy desired that the site of the new building should be on Broad Street, and being of opinion that the lot purchased could be readily sold, if desirable, at an advance on its cost, again petitioned the Legislature, Jan. 18, 1869, to authorize the Councils of the city to grant one of the Penn Squares for the use of the academy. The petition failed.

April 23, 1869, a committee was appointed to prepare plans of a building, which were approved in November.

At the annual meeting of contributors, Jan. 10, 1871, it was resolved that "the trustees proceed to raise the funds for the erection of the building at as early a date as possible," and that "a more popular and public site be selected than that purchased by the trustees."

In deference to those who advocated a location on Broad Street, the trustees diligently and zealously sought a site on that street, but no suitably located lot, purchasable with the means at the command of the board, could be found.

In January, 1872, application for pecuniary aid was made to the Legislature of Pennsylvania without success. Appeals to it in behalf of the academy have been since made in vain.

On the 31st of May the building committee was authorized to commence the edifice. The work was commenced July 9th. The corner-stone of the new structure was laid at noon on Wednesday, Oct. 30, 1872, in presence of officers and members of the academy, and many citizens. Addresses were delivered by Dr. Ruschenberger, Rev. Dr. E. R. Beadle, Professor J. Aitkin Meigs, of the Jefferson Medical College, Professor Horatio C. Wood, Jr., of the University of Pennsylvania, and the Rev. Dr. George D. Boardman.

Building operations were vigorously pushed, and the structure was so nearly completed that the transfer of the collections was begun Nov. 2, 1875, and ended Jan. 11, 1876.

The building covers an area of one hundred and eighty-six feet on Race by seventy-five feet on Nineteenth Street. The ridge of the skylight is eighty feet

above the footway, and the eave fifty feet above the water-table. The walls are of brick faced on the exterior surface with green serpentine rock, except a space on the south side, where a junction with the main building will be formed at a future time. The appearance of the exterior of the building is a pleasing one. Its architectural style is known as the collegiate Gothic.

The public entrance is on Race Street. The first floor is divided into nineteen apartments, and the entresol into seven. The floor of the library is one hundred and thirty feet long and thirty feet wide between the fronts of the bookcases. The ceiling is eighteen feet high. It is estimated that the library-room will properly accommodate thirty thousand volumes, and leave space enough on the floor to seat comfortably four hundred persons.

ACADEMY OF NATURAL SCIENCES.

The second, or museum floor, is one hundred and eighty feet long by sixty feet wide. The aggregate of floor space in the museum is twenty-seven thousand two hundred and seventy-five square feet, or more than three-fifths of an acre, all of which is fully occupied by the collections.

The plan of the entire building includes a south wing, covering an area of one hundred and thirty-nine feet on Cherry and seventy-five feet on Nineteenth Streets, with a central or main building of the same area, set equidistant between the north and south wings, the three parallelograms being connected so as to show a uniform front on Nineteenth Street of two hundred and eighty-eight feet.

Between December, 1865, and April 24, 1876, the subscriptions to the building fund aggregated $239,-160.74. Among the contributors of large amounts were the following: William S. Vaux, $7000; Clement Biddle, $6100; J. G. Fell, Henry C. Gibson, H. Pratt McKean, Thomas Sparks, and A. Whitney & Sons, each $6000; John F. Weightman, John Welsh, and Mrs. S. R. B., each $5000; George W. Tryon, Jr., $3000; Isaac Lea and Miss R. A. Cope, each $2500; Phœnix Iron Company, $2337.50; John S. Haines, Joseph Jeanes, and Joshua T. Jeanes, each $2185; Charles Lennig, $2156; Henry C. Lea, $2050; Baeder & Adamson, Adolph E. Borie, Joseph S. Lovering, William Massey, Moro Phillips, and Mrs. E. V. Graham, each $2000; Alfred Cope, Joseph Wharton, and Miss J. R. Haines, each $1500; S. S. White, $1450; A. H. Franciscus, $1350; James S. Mason, $1250; Mrs. C. Pennock, $1200; Samuel Jeanes and Elias D. Kennedy, each $1185; together with forty-four contributors who gave $1000 each.

The first meeting of the society was held in the new edifice on Tuesday evening, Jan. 11, 1876, and the next day possession of the old building was given to the purchaser, it having been disposed of for sixty thousand dollars. A "Report of the Condition of the Academy of Natural Sciences of Philadelphia on Moving into its New Edifice" was prepared under direction of the trustees, and a copy sent to each contributor, with an invitation to inspect the building on Monday, May 1st, between the hours of ten o'clock A.M. and ten o'clock P.M. On Tuesday, May 2d, the museum was opened to the public.

In 1858 the organization of the society was so mod-

Digitized by Google

ified as to enable those members who were devoted to the cultivation of special branches of science to form departments of the academy, privileged to use the hall, hold separate meetings, etc., on condition that each department shall report its proceedings monthly to the academy, defray its own expenses, and admit to membership in it only members of the academy.

Under such provisions, the then recently-formed Biological Society of Philadelphia became the Biological Department of the academy. About July, 1868, the Microscopical Society of Philadelphia joined it, and was organized under the name of the Biological and Microscopical Section of the Academy of Natural Sciences of Philadelphia.

The Conchological Section was organized Dec. 26, 1866. This collection is now equal in scientific value to any other in the world. Its classification required the fixing in appropriate trays seventy-six thousand four hundred and seventy-nine specimens, and the writing of twenty-four thousand two hundred and eighty-five labels, in order to fully display fourteen thousand one hundred and sixty-one species. Several families are so complete that no known representative of them is wanting.

The Entomological Section of the academy was organized through a junction of the American Entomological Society with the academy. This society was founded in 1859, and incorporated in 1862. It agreed to join the academy in November, 1875.

The museum of the Academy of Natural Sciences is an admirable one, considering the many disadvantages of a financial character under which the institution has labored since its foundation. The collections are placed in cases on the main floor and on the galleries of the second story of the building.

The main floor is occupied chiefly by the collections of fossils, of fishes, mammals, osteology; the first, or Wilson gallery, by the birds, and the second, or Tryon gallery, by the conchological collections.

The cabinet of minerals is arranged in horizontal or table cases placed on the margins of both galleries. It contains about six thousand selected specimens.

A collection of about seven hundred specimens of rocks, in table cases on the main floor, represents the department of geology.

The palæontological cabinet includes several special collections, all of them of considerable interest. The department contains seventy thousand specimens, as follows: vegetable fossils, American and foreign, two thousand; invertebrate, thirty thousand; vertebrate, five thousand; unarranged, thirty-three thousand.

The collection of mammals consists of about one thousand specimens, representing three hundred and eighty species.

The ornithological department is not excelled anywhere. It embraces several noted collections—the Rivoli, Gould, Bourcier, Gambel, and Cassin—and contains about twenty-seven thousand specimens, nearly all of which are mounted. Of the whole collection about twenty-four thousand specimens were given by Dr. Thomas B. Wilson and Edward Wilson. Unique and type specimens are numerous.

There are more than five thousand birds' eggs, and about two thousand nests, in the academy.

In the cabinet devoted to reptiles there were recently eight hundred and thirteen species, of three hundred and seven genera, of forty-seven families.

In the ichthyological department there are about twelve hundred species represented.

The cabinet of mollusks contains four hundred and fifty species, preserved in alcohol. Of the shells of the animals there are in the collection more than one hundred thousand specimens, representing fully twenty thousand of the species described in books.

The entomological department, in the northwest rooms on the library and entresol floors, which is confided to the care of the Entomological Section of the academy, contains about seventy-five thousand species.

Of arachnidans and myriapods there are small collections of about five hundred species.

Of crustaceans (crabs) there are one thousand and fifty species.

Of annelidans (worms) there is a small number.

Of echinoderms (star-fishes, sea-eggs), sponges, and corals, there are interesting collections of about one thousand species.

In the department of osteology, the collection of completely mounted skeletons and parts of skeletons of vertebrate animals numbers eight hundred and seventy-six specimens. Prominent among them are skeletons of an ostrich, of a gorilla, a polar bear, of a narwhal, the tusk of which exceeds eight feet in length, of a whale, of a rhinoceros, of a camel, and of a giraffe eighteen feet high.

The department of ethnology embraces a collection of eleven hundred and forty-six human crania and thirty-one casts, including the Morton collection, and several Egyptian and Peruvian mummies, besides some Indian reliques, pottery, implements, etc.

The botanical cabinets are in the southwest rooms, or the library and entresol floors. They include several noted collections. The herbariums comprised in this department contain over seventy thousand species, arranged according to the system of Jussieu.

The formation of the library of the Academy of Natural Sciences began in 1812. The founders of the society presented the first books. Its growth is due to the bounty of intelligent and benevolent persons. A catalogue of the library, printed in 1836, shows that at that time it consisted of six thousand eight hundred and ninety volumes and four hundred and thirty-five separate maps and charts. Of these, five thousand two hundred and thirty-two volumes and most of the maps and charts were the gift of William Maclure. They included nineteen hundred volumes of political history, which have since been sold, and the proceeds

of sale invested in scientific books. Mr. Thomas Say bequeathed to the society his collection of books on entomology, one hundred volumes. In May, 1845, Dr. T. B. Wilson presented Owen's "History of British Fossil Mammalia and Birds." From that date till his death, March 15, 1865, Dr. Wilson presented more than ten thousand volumes, periodicals, pamphlets, and parts of serials. They included nearly all of the most elaborate and expensive works on natural history and scientific travel published within that period, as well as many valuable and rare works, for which catalogues of second-hand books were carefully examined. Between the years 1850 and 1857, Mr. Edward Wilson presented four thousand one hundred and eighty-four rare publications and pamphlets of the last century.

Among the valuable specialties of this library is an extensive series of periodical publications of scientific societies throughout the world, received generally in exchange for those of the academy. It includes a complete set of the *Transactions of the Royal Society of London*, commenced in 1655, and still continued. Also a complete set of *Curtis' Botanical Magazine*, commenced in 1790, and still published. It now consists of one hundred volumes, illustrated by more than six thousand beautifully-colored plates.

Among the admirable possessions of the library are the elephant-folio edition of Audubon's "Birds of America;" a complete series of the works of John Gould on birds and mammals, folio edition, beautifully illustrated; Elliot's "Ornithological Monographs," including his superb works on pheasants and birds of paradise; the work on pheasants is probably the most elegantly illustrated work on descriptive natural history ever published, the plates having been designed and drawn by Joseph Wolf, and colored by hand in the highest style of art; Wolf's "Zoological Sketches," illustrated by the same artist; Sonnini's edition of Buffon, one hundred and twenty-seven volumes; the "Flora of Austria," five folio volumes, illustrated by the process known as nature-printing; the "Ferns of Great Britain and Ireland," illustrated in the same manner; the "Stone Age of the Human Race," as collected and arranged by Franklin Peale, of which only twenty-five copies were printed, presented by Mr. Titian R. Peale.

At the close of 1871 the conchological department contained, with one or two exceptions, every work on conchology published up to that date. It then numbered eight hundred and seven titles. The perfection of this collection is due to the generosity of Mr. George W. Tryon, Jr., who gave to it his own valuable library on this subject.

There is also a very valuable collection of works on Roman, Greek, and French antiquities, among which are all those of Piranesi.

This special library of the natural sciences now attracts students from distant points to consult works which are not contained in any other library in the United States. It is maintained for reference only. It is opened from ten o'clock A.M. till ten o'clock P.M. daily, Sunday excepted.

Only members and correspondents of the academy have free access to the library. Other persons may obtain permission to consult it at any time through the introduction of a member, or upon application to the librarian, while such member or the librarian is present; but minors under sixteen years of age are not permitted to examine any work, except under the immediate supervision of the librarian or of a member.

While for many years after the academy's foundation the library's growth was due almost entirely to the donation of books by members and friends of the institution, yet recently the society has become possessed of quite a substantial library fund by endowment and otherwise. Dr. Thomas B. Wilson bequeathed to the academy ten thousand dollars, and directed that three hundred dollars of the annual income therefrom should be contributed towards the payment of the salary of a librarian, and that the balance should be expended in the purchase and binding of books. This bequest, after deducting tax, realized nine thousand five hundred dollars. It is called the Wilson fund.

In February, 1875, I. V. Williamson presented to the academy twenty-five thousand dollars in ground-rents, the income from which is to be expended in the purchase of scientific books, and for no other purpose. This donation is known as the Williamson fund.

The library is now in a splendid condition, containing, as it does, some thirty-two thousand bound volumes, in addition to an immense number of pamphlets.

The publications of the academy have ever been a feature of considerable interest. *The Journal of the Academy of Natural Sciences*, as has been previously stated, was established in 1817. At irregular intervals it was issued until 1842. The publications during this period are known as the "first series." The "second series" was begun December, 1847, and is still continued.

The publication of the *Proceedings of the Academy of Natural Sciences* was begun March, 1841, and is still carried on.

At the present time the affairs of the academy rest upon a very satisfactory basis. The financial condition of the institution is eminently prosperous. That such is the case is evidenced by a recent amendment to the charter of the academy, which, as originally phrased, vested in the organization, among other powers, that of "purchasing, taking, holding, and conveying any estate, real or personal, for the use of said corporation: *provided*, that the annual income of such estate shall not exceed in value eight thousand dollars, nor be applied to any other purposes than those for which this corporation is formed."

In the early part of the present year (1884) the

Court of Common Pleas of this county decreed an amendment to the charter, whereby the academy is empowered to receive an increased annual income from its estate.

As previously stated, the academy's first president was Dr. Gerard Troost, who occupied the office in question from the date of organization, in 1812, until 1817. His successors have been as follows:

William Maclure, from 1817 to 1840; William Hembel, from 1840 to 1849; Samuel George Morton, M.D., from 1849 to 1851; George Ord, from 1851 to 1858; Isaac Lea, LL.D., from 1858 to 1863; Thomas B. Wilson, M.D., from 1863 to 1864; Robert Bridges, M.D., from 1864 to 1865; Isaac Hays, M.D., from 1865 to 1869; W. S. W. Ruschenberger, M.D., from 1869 to 1881; Joseph Leidy, from 1881 to 1884.

The Athenæum.—About the close of 1813 a number of gentlemen assembled for the purpose of establishing a reading-room in Philadelphia. Their first and immediate object was the collection, in some central place, of American and foreign periodical publications of politics, literature, and science, maps, dictionaries, and other works of reference, to which access might be had at all hours of the day. Besides the purchase of all new books of merit, they contemplated the gradual acquisition of such as might lay the foundation of a large and useful public library, and of such manuscripts, medals, and coins as might be valuable for their curiosity or as tending to illustrate the history of this country. They looked forward also to the establishment of lectureships on science; and, as accessory to this desirable object, it was intended to commence the collection of mineral, botanical, and other specimens illustrative of natural history.

The proposals for an athenæum were made public, and met with greater success than there had been reason to expect. The first meeting of the subscribers was held in January, 1814, when an address, stating the nature and objects of the institution, was agreed upon. On the 9th of February articles of association were adopted, which provided that the direction of affairs should be vested in a president, a vice-president, a treasurer, and twelve managers, who were to be chosen on the first Monday of February in each year. The number of subscribers at this time amounted to about two hundred, and their annual payment in the way of dues was fixed at five dollars. At the same meeting the following officers were chosen: President, William Tilghman, LL.D.; Vice-President, Dr. James Mease; Treasurer, Roberts Vaux; Managers, James Gibson, Samuel Ewing, Robert H. Smith, Richard C. Wood, Thomas I. Wharton, Alexander S. Coxe, Benjamin Chew, Jr., Nicholas Biddle, Daniel W. Coxe, William H. Dillingham, John C. Lowber, and Jonah Thompson. Robert H. Smith was elected secretary to the board of managers.

The reading-room of this society was established in the second story of the building occupied by Mathew Carey's book-store, at the southeast corner of Fourth and Chestnut Streets. The association was incorporated "for the promotion of literature," April 5, 1815. From this place the rooms of the Athenæum were removed, on the 1st of May, 1817, to No. 118 Chestnut Street, southwest corner of Carpenter's Court, Dufief's building, second story. Subsequently the first story of the hall of the American Philosophical Society was acquired by lease, and the library, which had grown considerably, was removed to that building in April, 1818, and occupied the north room of the first story on Fifth Street. Subsequently the southern portion of the hall was obtained. There were three apartments, one of which was devoted to the literary and scientific journals issued periodically; another room was furnished with newspapers, and the third was used for conversation. In 1824 the library consisted of about three thousand three hundred volumes. All the leading magazines and reviews of the time—American, French, and English; literary, scientific, and historical—were obtained. Fifty-five newspapers were regularly received and filed. The maps and charts were considered, in the fullness of the collection, the best in the United States. The rooms were open daily, except Sundays, from eight o'clock A.M. until ten o'clock P.M. The number of stockholders was about four hundred, who, under the original charter, paid twenty-five dollars principal upon each share of stock, and three dollars per annum. There were about one hundred and twenty-five subscribers, who paid five dollars per year for the privilege of the library and reading-room. Subsequently the amounts were increased, and in 1819 the directors were empowered to raise the price of each share of stock to fifty dollars.

One of the most enterprising, liberal-minded, and liberal-hearted of the earlier members of the Athenæum was William Lehman, who became a member of the board of directors in February, 1817. Although an energetic and successful man of business, he managed to find sufficient spare time to devote to literary and philosophical studies. Mr. Lehman died March 29, 1829, having first executed his last will and testament, bearing date July 26, 1827, which contained the following provision: "I give and bequeath to the Athenæum of Philadelphia the sum of ten thousand dollars for the construction of a suitable building."

Immediate steps toward building a library hall for the use of the society were not taken; but Mr. Lehman's generous bequest was safely invested. On the 1st of January, 1847, the entire principal with accumulated interest had reached the sum of $24,845.45.

Finally, however, the society set about inaugurating measures looking toward a removal from the quarters which it had occupied nearly thirty years. On Nov. 1, 1845, was laid the corner-stone of a new building, upon a lot on South Sixth Street, below Walnut, at the southeast corner of Adelphi Street. Interesting services were held, including a brief historical sketch by the president, Samuel Breck. In less than two years the building was ready for occupancy.

On the 18th of October, 1847, exercises were held upon the occasion of the formal opening of the new hall. The chief feature of the celebration was a rich and valuable address by Thomas I. Wharton, the vice-president of the association, outlining many of the interesting phases of its history from its institution in 1814.

The structure, as erected in 1847, is fifty feet in front on Sixth Street, and one hundred and twenty-five feet in depth on Adelphi Street, and has a height of fifty-eight feet. It is an excellent specimen of the Italian style of architecture, tasteful and rather attractive in appearance, although simple in design. There is a considerable garden space at the east end of the lot, valuable for light and air, and available for building purposes hereafter.

Soon after the completion of the building the large hall on the lower floor was rented to the controllers of the public schools, while the Historical Society of Pennsylvania leased a portion of the third story. In fact, the Athenæum almost immediately established an annual rent-roll of two thousand dollars, from the rental of portions of the building for which the society had no use. At present the large hall on the first floor is used as the library-room of the Law Association of Philadelphia, while the front portion of this floor is rented for private offices. The Historical Society removed from the building in 1872.

The second story was appropriated by the Athenæum entirely to its own use. It is divided into a news-room, library, and chess-room. The news-room is on the Sixth Street front, and its dimensions are thirty-seven by forty-seven feet, with a height of twenty-four feet. It is finished in pilasters, with an enriched cornice and cove to the ceiling. The library is thirty-seven feet wide, sixty-five feet long, and twenty-four feet high. It is furnished with a columnar ordinance of the Corinthian order, advanced from the sides of the room, forming a centre cell or nave and aisles. The chess-room is eighteen feet square.

While the building was erected largely with the liberal bequest made by Mr. Lehman, yet the society had also, previous to 1847, been remembered in the wills of John L. Harris, Chief Justice William Tilghman, John Savage, Roberts Vaux, Peter S. Du Ponceau, and Nathan Dunn.

Since its foundation, in 1814, the Athenæum has had only six presidents, as follows: from 1814 to 1827, William Tilghman; from 1827 to 1844, Peter S. Du Ponceau; from 1844 to 1862, Samuel Breck; from 1863 to 1865, Samuel Norris; from 1865 to 1867,

ATHENÆUM LIBRARY BUILDING.

Joshua Francis Fisher; from 1867 to the present time, Edward E. Law; all of them being gentlemen of high standing in literary, professional, and commercial circles.

As previously indicated, it has not been so much the purpose of the managers of the Athenæum to supply its members with all current literary works as they came fresh from the press. This feature of literary material has largely been left to be supplied by other and more "popular" institutions. The main

Digitized by Google

characteristic of the Athenæum has chiefly lain in the very complete collection of periodical literature which it possesses; from the daily journal, through the various weeklies, monthlies, and quarterlies to the annual registers. Thomas I. Wharton, in 1847, at that time the vice-president, in his admirable address upon the opening of the new hall, testified to having heard Jeffrey, the famous editor of the *Edinburgh Review*, say that he found at the Athenæum literary and scientific journals of his own country that he had never seen in Europe. Within the last few years, however, a new policy has been inaugurated, and now the current literature of the day is found upon the shelves of the Athenæum; and brightly-bound works of fiction are found closely contiguous to musty volumes of magazine literature many decades old.

Among the curiosities of literature in the rooms of the society is a large collection of bound pamphlets which belonged to Dr. Franklin, some of them containing his manuscript notes and marginal remarks, and a regular series of the *Journal de Paris*, bound in volumes, and continued during the whole of the eventful period of the French Revolution. There is also a large collection of bound pamphlets, once belonging to Mathew Carey, which contain many scarce and valuable publications.

In addition to the persons previously mentioned as having made bequests to the Athenæum, prior to the date of the opening of the new hall, in 1847, the following-named gentlemen have also left legacies, of various amounts, to the institution: Richard S. Thomas, Jacob L. Sharp, John Perot Downing, Richard Bull, Isaac Barton, Edward Perot, Charles Perot, Perot Lardner, Arthur G. Coffin, and John Livezey. The bequest of the last-named gentleman, which came into the possession of the Athenæum in the latter part of 1880, like that made in the infancy of the society by William Lehman, amounted to ten thousand dollars. This sum is now safely invested, the annual interest therefrom being expended for the purchase of current books, fresh from the publishers. A brass plate on one of the book-cases in the library-room commemorates this generous patron of the institution, while upon a mural tablet on the west wall of the same room is this inscription, in honor and in memory of that other liberal donor, already mentioned, Mr. Lehman (or, more properly, Dr. Lehman, for he had taken his degree, although he did not practice), as follows:

"The Athenæum of Phila.,
Instituted 1814.
To
William Lehman, M.D.,
One of the earliest Directors,
to whose liberal bequest
is mainly due
the erection of this edifice.
Completed MDCCCXLVII."

Upon either side of this tablet is another plain ›rble tablet, each containing the names of one-half of the other gentlemen previously mentioned as having made bequests to the institution.

The Athenæum in 1884 contains about twenty-five thousand bound volumes, besides numerous manuscripts, pamphlets, maps, etc. New books are being added at the rate of five hundred a year. The annual circulation of books reaches about six thousand. The society is now entirely free from all indebtedness, whether floating or secured. Charles R. Hildeburn, well and favorably known in the literary circles of the city, is the librarian.

The Apprentices' Library.—In 1820 a few benevolent individuals, believing that it would promote "orderly and virtuous habits, diffuse knowledge and the desire for knowledge, improve the scientific skill of our mechanics and manufacturers, increase the benefits of the system of general education which is now adopted, and advance the prosperity and happiness of the community," associated themselves under the title of "The Apprentices' Library Company of Philadelphia," for the purpose of establishing a library for the use of apprentices and other young persons, without charge of any kind for the use of books.

In the following year (1821), under date of April 2d, the company was incorporated, and operations were commenced on a very limited scale, their only resources for a number of years being donations of second-hand books and an annual contribution of two dollars from several hundred worthy citizens who were convinced of the beneficial effects which would result from the establishment of such an institution.

The first officers under the charter were,—

President, Horace Binney; Vice-President, Roberts Vaux; Secretary, Daniel B. Smith; Treasurer, James Cresson; Managers, Clement C. Biddle, Thomas F. Leaming, Philip Garrett, Samuel L. Sorber, Benjamin H. Yarnall, Frederick V. Krug, William S. Warder, Robert J. Evans, Samuel B. Morris, Philip F. Mayer, Robert M. Lewis, Richard C. Wood, Benjamin Tucker, Henry Troth, Jacob Gratz, Richard Oakford, Samuel Canby, Anthony Finley, Abraham Miller, Thomas Kimber, Merrit Canby, Lloyd Mifflin, Samuel Sellers, William Price.

The library, when first opened in 1820, was in a second-story room on the south side of Chestnut Street above Third, and contained about fifteen hundred volumes, mostly old books, which had been presented to the managers. It was afterward removed to the second story of Carpenters' Hall, then to Jayne Street below Seventh Street, and from there to the old Mint building, in Seventh Street above Market, and finally to the southwest corner of Fifth and Arch Streets, where the trustees of "The Society of Free Quakers" gave the company the use of the upper and lower rooms of their meeting-house, free of rent, for many years.

The very satisfactory and beneficial result of loaning books to boys without charge induced the managers, in 1841, to commence a separate library for girls, which has also proved a valuable and decided success, there now being nearly twelve hundred orderly girls and young women reading twenty-five thousand volumes per annum.

The number of boys is also about twelve hundred, reading twenty thousand volumes a year; this, be it remembered, is from a library both branches of which combined have never numbered much over twenty thousand volumes.

In 1868 the necessity of more and better accommodations induced the managers to apply to "The Society of Free Quakers" for greater privileges. This resulted in a new lease of the entire property for twenty-five years, for three hundred dollars per annum, with liberty to make such alterations in the interior of the building as were necessary for the company's purposes, and also to build on the south side of the lot.

In granting such favorable terms, the trustees of that society were governed by the same liberal and enlightened spirit that has always marked their intercourse with the library company.

In the year 1879 the Philadelphia Library Company being about to vacate their building on South Fifth Street, a gentleman of this city, well known as a generous philanthropist, prompted by a desire to retain for a use similar to that to which it had so long been devoted that edifice to which so many historic associations are attached, as well as by the interest he felt in the Apprentices' Library, called the attention of the managers to the opportunity of obtaining by its purchase a building better adapted to the purposes of the latter library than is the one now occupied, and offered to assist in the attempt to obtain it by his personal influence and by a liberal subscription. A special meeting of the Appsentices' Company was held in October, 1879, at which resolutions were adopted authorizing the board of managers to purchase the Philadelphia Library building at a fair price, provided the means to meet the payment were first secured. Under this authority the committee of the managers renewed their effort to obtain from the community aid sufficient to purchase it, without encroaching on the general fund, the income of which is indispensable in meeting the regular expenses of the company.

Although the committee found that considerable interest was taken in the project by a number of gentlemen who offered liberal contributions to that end, after protracted effort they reluctantly came to the conclusion that they could not secure subscriptions sufficient in amount to justify them in reporting that the purchase was practicable. On receiving the report of the committee, the board concluded to abandon the attempt. The management of the library still entertain the hope, however, of being able to secure more commodious quarters for the enlargement of the scope of the enterprise. That such is the purpose of the company is evidenced by the following language from a recent annual report of the board of managers, to wit: "The establishment of the library in quarters more perfectly adapted for its uses, so as to allow of a more efficient and economic administration of its affairs, has been repeatedly discussed in the meetings of your board, and while no entirely feasible plan has as yet been presented, the desirableness of such a change, if it could be wisely accomplished, is acknowledged, and the subject will continue to have the earnest attention of the management."

THE APPRENTICES' LIBRARY.

Until recently the library was divided into two entirely distinct sections, one for boys and one for girls. This maintenance of two separate library-rooms rendered necessary the purchasing of a large number of duplicate volumes, and caused many other inconveniences. To remedy these unsatisfactory features in the conduct of the library the board of managers finally recommended that the two sections

Digitized by Google

be consolidated, and that a single room be utilized for both males and females. This recommendation was acted upon, and carried out in 1882.

The library was closed for the purpose of making these alterations June 1, 1882, and was reopened December 2d. The reading-room was also moved from the basement to the light and airy room in the second story, formerly occupied by the boys' library.

The library, as consolidated, has a convenient entrance on Fifth Street, while the reading-room is reached by a stairway from Arch Street.

Instructive lectures, accompanied by the exhibition of stereopticon views, given in the reading-room, were recently introduced by the board. These lectures are delivered regularly every Friday evening.

The library has been the fortunate recipient of quite a number of liberal bequests and donations, among which have been the following; John Grandom, $5400; Dr. Jonas Preston, $1000; Thomas W. Goldtrap, $1000; Elizabeth Greenfield, $6400; Joseph Warner, $1000; Nathan Dunn, $14,900; Joseph Harrison, Jr., $2000; Josiah Dawson, $1000; S. Morris Waln, $1000; I. V. Williamson, $10,000; Jesse George, $1000; Henry J. Stout, $1000; Lewis D. Belair, $3000; John Livezey, $5000; Walter Smith, $5000; and Henry Seybert, $2000.

The Apprentices' Library can, with a single exception, perhaps, be denominated the only strictly free library in Philadelphia; at least, of any considerable size. No charges whatever are exacted of those who are the beneficiaries of the institution, except in the way of fines for books out over time. In order to obtain a book the applicant is required to conform to the following rule: "Applicants must procure a certificate of guarantee for the use and return of the books, signed by a good surety, and witnessed by a person authorized by the board, or by the deposit of one dollar with the librarian they may become their own guarantors."

The Apprentices' Library was instituted, and still is almost entirely controlled, by those belonging to the Society of Friends, consequently the management of the institution has ever been a conservative one. Its aim has always been to supply a class of books to the young men and maidens, who are its principal beneficiaries, which would instruct, rather than afford idle amusement simply. An unfavorable eye has ever been cast upon exciting fiction and sensational literature. The board of managers having always kept steadily in view the intention of the founders in establishing the library, not a volume has found its way to the shelves without being first carefully examined by the Book Committee and then securing the approval of the whole board. At the present time there are about twenty-two thousand bound volumes upon the shelves of the library.

The Mercantile Library.—The first meeting with a view to the establishment of the Mercantile Library was held in the Masonic Hall, on the 10th of November, 1821. From this meeting emanated a public notice inviting "Merchants, merchants' clerks, and others" friendly to the formation of a "Mercantile Library Association" to meet at the mayor's court-room on the 17th of the same month. At this meeting a committee, of which Robert Waln was chairman, was appointed to prepare and report a constitution at a subsequent meeting. The constitution was adopted at an adjourned meeting held on the 1st of December, 1821, and the election for a board of directors took place at the Merchants' Coffee-House, on Second Street, near Walnut, on the 10th of January, 1812, at which upward of three hundred members voted. The first board of directors was composed of Joseph P. Norris, Robert Waln, Langdon Cheves, Bernard Dahlgren, Thomas Biddle, William Chaloner, William M. Walmsley, William L. Hodge, Caleb Newbold, Jr., William H. Jones, William E. Bowen, John M. Atwood, Nicholas Thouron, and Joseph H. Dulles, treasurer.

Of these, four were bankers; Mr. Norris being the president of the Bank of Pennsylvania; Mr. Cheves, a South Carolinian, president of the Bank of the United States; Mr. Biddle a private banker and broker of large fortune, and Mr. Walmsley of the same profession. Mr. Bowen was afterward connected with, and became the resident Philadelphia partner of, the house of Brown Bros., which, through its connections in Liverpool, New York, Baltimore, and New Orleans, has acquired a celebrity both European and American. Mr. Chaloner was the senior partner of Chaloner & Henry; Mr. J. S. Henry being the father of Alexander Henry, afterward mayor of the city. He and Mr. Thouron were both engaged in the wholesale dry-goods business; Mr. Thouron being a French importer. William H. Jones was a famous auction-crier, and Bernard Dahlgren was an accountant and book-keeper in a large commercial establishment; both are remembered as men of mental power and cultivation. Mr. Dahlgren was a Swede, and father of Admiral John A. Dahlgren. Mr. Newbold, a man of ardent temperament, was at one period of his life engaged in mercantile pursuits. For many years he had charge of the Delaware and Chesapeake Canal; first as superintendent, and afterward as president.

Mr. Waln was chosen president of the board. His great-grandfather was one of the "Friends" who came over with William Penn. He inherited a handsome estate, and became one of the most prominent merchants of the city, being engaged in the West India and English shipping business, and for many years in the East India and China trade. He was also one of the earliest manufacturers of the country, having erected a cotton-factory at Trenton in 1812, and engaged in iron-works at Phœnixville. He became a leading advocate of the doctrine of protection. Mr. Waln for some years served in the State Legislature, and was elected to Congress in 1798.

The board of directors was organized on the 14th of January, and on the 19th the rooms of the second story of Robert Winebrenner's store, No. 100 Chestnut Street, were engaged at a rent of one hundred and fifty dollars yearly, and Daniel Culver was appointed librarian, at a salary of one hundred dollars, "the library to be kept open every evening except Sunday." The library was opened to its members on the 5th of March.

The Mercantile Library, as its name implies, was not originally a company, but an "Association." It was not composed of shareholders, having certificates of stock, but of members paying initiation fees and semi-annual contributions; the former being three dollars each; the latter, one dollar. It elected a treasurer, but no president or other general officer.

The committee charged with the selection and purchase of books had in the course of a year succeeded so as to publish quite a respectable catalogue, to which a supplement was not long after added. This committee (Messrs. Atwood, Dulles, and Walmsley) continued to serve acceptably for sixteen years. In 1824 the library contained fifteen hundred volumes, there being about three hundred and eighty members.

The library grew rather slowly in books. In its third year, as just stated, fifteen hundred were upon its shelves. Three hundred and forty of these were deposited with it by its friends. Nor was its increase in membership more successful. It had begun with over three hundred members, and up to its third year its rolls had contained but few over three hundred and eighty. From these various resignations occurred, and even "among those punctual in the payment of their dues a general apathy existed," so that "of all the dues for 1824 but about one hundred dollars were collected." Two remedies were proposed for this disheartening condition: that the library should be rendered more attractive by taking newspapers, and that members of the board should assist the treasurer in urging upon subscribers the payment of dues. The first recommendation resulted, during the next year, in taking three Philadelphia and two New York dailies,—the nucleus of the great newspaper and periodical department of the library as it now exists. The necessity of the second was superseded by a very important change in the constitution of the library, which was effected in 1826, by turning it from an association of subscribers into an incorporated company of stockholders. A charter was obtained; the property of the association valued, and divided into three hundred shares of ten dollars each, subject to an annual "due" of one dollar. In 1831 this payment was raised to two dollars, and in 1863 to three dollars, as was required to supply more completely the wants of the members. This change to a stock basis had very important advantages. It conferred upon the company control of its revenues, by enabling it to forfeit the stock of delinquents in payment of dues, and to the stockholder it gave augmented interest in the library, arising from a sense of the personal attachment of his ownership in it, as well as a dislike to be delinquent in the discharge of his annual pecuniary obligation.

This change, however desirable, was not very rapidly effected. There are records of seventy-seven stockholders having been acquired in 1826, one hundred and thirty in the next year, and it is stated in the report of 1828 that there were two hundred and eighty-seven stockholders and sixty subscribers, in all three hundred and forty-seven members, and this is the first exact statement that can be found of the numbers belonging to the library. But from the first the resolution to form a stock company seems to have inspired new vigor, and complaints of languishment were afterward seldom heard.

In 1826 the library was removed to the second story of the house at the northwest corner of Fifth and Chestnut Streets. Here, in January of the next year, the board congratulates itself upon the "highly prosperous condition," which so continues that in October, for the sake of additional conveniences, it is forced to a removal to the second-story rooms of the Sunday-School Union building, on the south side of Chestnut, above Sixth, west of the present *Ledger* building.

Between the years 1828 and 1835 several courses of lectures were delivered under the auspices of this institution. Their titles (so far as known) show that they were intended to impart information and solid instruction on subjects of importance to business men. The well-known names of their authors guarantee their excellence. In 1837–38 began a series of brilliant discourses, which for several years were delivered by eminent public men brought from all parts of the country by the joint care of the Mercantile Library and the Athenian Institute. These, delivered to crowded audiences in the Musical Fund Hall, were marked events in city life.

In 1832 it was proposed to purchase the Adelphi building, on Fifth Street below Walnut, for fifteen thousand dollars, but it was found that the charter of the company did not empower it to hold real estate. In 1835 the library was removed to 135 Chestnut Street, below Fifth, in a portion of the building afterward occupied by the United States post-office. This latter property changed owners in 1843, and new quarters were necessary.

In this emergency it was determined to carry out a design that had long been entertained: the library should be no longer an outcast and an emigrant; it should possess a handsome hall, a local habitation of its own. The lot, one hundred by thirty-six feet, on the southeast corner of Fifth and Library Streets, was bought on condition that funds could be procured to complete the project.

The annual meeting of Jan. 9, 1844, approved the purchase, provided the funds could be raised by the first day of February following. Thirty gentlemen

were appointed to aid the directors in procuring subscriptions. "In a few days" upwards of fourteen thousand dollars were subscribed "by the members and the public." A building fund of three thousand four hundred dollars had been already laid by, chiefly from the profits of lectures. Feeling that these sums would sustain the enterprise the directors closed the contract for the lot (the heirs of Dr. James Gallagher being the owners), and subsequently added to it a strip fourteen feet wide, purchased of the Philadelphia Dispensary. Fifty feet by one hundred thus became the graceful proportions of the parallelogram on which the simple and chaste Grecian edifice was erected.

Its entire cost was forty-four thousand one hundred and ninety-nine dollars. In its erection a debt was incurred of twenty-two thousand nine hundred and sixty-nine dollars.

The library was moved into the new building in July, 1845. The rooms, which were heretofore open in the evenings only, were now opened at 3 o'clock P.M. In 1855, the debt having been reduced to ten thousand dollars, it was resolved not to reduce it faster than one thousand dollars a year, in order that a greater number of books might be purchased. Three years later it was reported that the rents from the building were all that could be spared from the revenue for the purchase of reading matter. In 1860 the third story of the building, which had hitherto been rented, was devoted to literary uses, being fitted up as a newspaper reading-room and chess-room.

THE MERCANTILE LIBRARY.

In 1867 the Library Company purchased from the Pennsylvania Railroad Company the building and lot, ninety-six feet by three hundred and one feet in dimensions, which had been built by the Franklin Market Company, on Tenth Street, between Market and Chestnut, and fitted it up for library purposes, at a cost of about one hundred thousand dollars. The old library building, on Fifth Street, was sold for ninety-five thousand dollars. In July, 1869, the new building was occupied by the library.

Towards liquidating the debt incurred, over and above the sum received from the sale of the old building, there were received from subscriptions, donations, and loans about fifty thousand dollars. All moneys received from sale of stock, and those subsequently saved from ordinary expenses, were appropriated to the sinking fund, and by these means the debt has been gradually reduced, and there exists only a small floating indebtedness against the company. The annual tax on shares of stock, which was at first one dollar semi-annually, was in 1863 raised to three dollars a year, and in 1864 to four dollars, and at the same time the annual charge to subscribers was made six dollars.

The library and reading-room is an apartment one hundred and eighty-seven feet by seventy-four feet, with a high arched ceiling, with ventilating windows and skylight. In the west wall there is a stained-glass window, not heavy with color, as such windows usually are, but light and brilliant. The reading-room, which is in the west end of the building, is sixty-seven by seventy-four feet, is divided by a low partition into two rooms, one for the female and the other for the male visitors. There are tables and chairs in each room, the latter numbering six hundred, and at times all the seats in the gentlemen's apartment are occupied. In these rooms the periodicals are kept. The newspaper room is on the second floor over the main entrance. The papers are arranged on low racks, so that a subscriber desiring to read may seat himself comfortably in an ordinary arm-chair and peruse the contents of the various journals with ease. The departments devoted to newspapers and periodicals are believed to be better supplied than those of any other library or reading-room in the country. In an adjoining room are the chess-tables, twenty-four in all. The greater number of these tables are almost constantly occupied during the day. On the first floor there are a waiting-room, conversation-room, ladies' parlor, directors' room, and lecture-room. In 1875 a gallery was added, which furnished space for seventy thousand more volumes. Here the books less called for are placed, such as classical, legal, medical, and such books as were heretofore kept in locked cases.

In 1870, in compliance with a popular demand, the board of directors concluded to open the library to

Digitized by Google

subscribers on Sunday. For a time the reading-rooms were largely attended on these days, but of late years the Sunday visitors have gradually decreased, until, during the year 1881, the average number of visitors on Sundays was five hundred and thirty-eight, against one thousand and twenty-seven on other days.[1]

Since the establishment of the library, in 1821, there have been but four presidents of the company, as follows: Robert Waln, 1822 and 1823; Thomas P. Cope, 1823 to 1855 (thirty-two years); William E. Bowen, from 1855 to the end of 1860; T. Morris Perot, from 1861 to the present time. Richard Wood is the oldest consecutive director, he having served in the board since 1857.

Hiram Ayres, the librarian chosen in 1826, was succeeded by James Cox in 1830, who discharged the duties of the position until 1850, when A. McElroy succeeded him. The latter served until 1855, when he was followed by Seth C. Brace, who resigned the following year. In 1856, John Edmands, the present efficient librarian, entered upon the duties of the office.

The duties of a librarian are, as is well known, onerous and responsible, and Mr. Edmands' long connection with the library, and his familiarity with its proper conduct, added to his intelligence on all subjects connected with the purchase, selection, and classification of the books, make him a valuable adjunct of the library.

Since the library has occupied its present location, for the purpose of affording a ready means of finding the books desired, and to show at once what the library contains on particular subjects, the librarian has reclassified it on a new plan largely devised by him. The books on the different subjects are carefully divided into several groups, which form definite and easily recognized sub-classes; and the books in each sub-class are arranged in alphabetical order by the names of the authors. The department of biography has been treated in a special manner, as it does not admit of any satisfactory sub-classification. The books containing several lives are placed in alphabetical order by their authors and marked with the letter L. Those containing single lives are arranged under the names of the subject of the biography and marked La, Lb, Lc, etc. Thus all the lives of Washington and Napoleon are placed together. In order to find any book under this plan one need not seek to ascertain its number, but merely to consider in which of the groups or subjects of biography it should be placed, and then the name of the author will be a certain guide to its position on the shelves.

At the foundation of the library its benefits, open to all, were intended mainly for merchants and their clerks. Consequently its literary scope at the outstart by no means partook of its present universal character. As an evidence of its early comparative illiberality, it may be stated that in 1827 a society newly established in this city for the defense of a powerful religious organization against "calumny and abuse," having delivered at the library, free of expense, a miscellany published in its support, it "was resolved that no newspaper or periodical publication professingly designed to advance the interests of any particular religious sect be admitted into the library."

For many years this rule was strictly adhered to. It was not, however, that exclusion was sought for against religious doctrinal views, but that non-intervention in current polemics was the position desired. No hostile attitude was ever assumed against any form of earnest thought. The standard books of every religion or denomination; the works of the expounders of each great system of faith and feeling of which the human mind has been moulded; of the early Christian fathers, Luther, Cranmer, Calvin, Milton, Barclay, Bolingbroke, Hume, Paine, Voltaire, the Talmud, the Koran, Moehler, Balmés, Spaulding, or Kendrick, and many others have been for years upon the shelves of the library. About 1864 the application of the rule restricting religious periodicals was relaxed, and now can be found at the library all the leading ecclesiastical journals of the nation, non-sectarian as well as sectarian.

Although, as stated above, the library was designed at first, as its name signifies, for the especial benefit of merchants and merchants' clerks, yet it has outgrown its original scope, and has become the library for the city, ministering to the wants of all classes in the community, and furnishing a larger amount of reading matter than any other institution. It has thus taken an advance position toward meeting the need of our city and of our time,—a great free public library. Indeed, the Mercantile Library is probably the most popular institution pertaining to literature in this city, owing, in a great measure, to the large percentage of volumes of light literature to be found on its shelves, for, while one here finds abundant opportunity for literary, bibliographic, and scientific research, yet a very large per cent. of the works owned by the library belong to the domain of romance. This state of affairs exists simply because the management of the library deem it their duty to gratify popular tastes, taking care, however, not to furnish material for abnormal or morbid appetites. That the novel is the chief attraction to the greater number of those who use such a library as the Mercantile, is proven by statistics. Even in 1858 it was found, by a record of the emission of books by classes, that sixty per cent. of the whole number of volumes taken out were novels, and the proportion has since increased, a larger stock of them having been bought. Oversight is exercised in their selection, so as to insure that any which could be properly classed among "immoral or pernicious works" shall be rejected. And it is believed that few or none of such obtain

[1] The reason of this is undoubtedly the opening of the Philadelphia Library on Sundays.

admittance. If any such are discovered, they are removed. Further than this the right of censorship is not exercised, excepting that in selecting those upon which the money appropriated to novels shall be spent, those of the highest grade and most nearly classic may be chosen.

The following figures will give something of a hint as to the notable advance which the Mercantile Library has made since its institution, in 1822:

Years.	Number of Members.	Number of Volumes.	Number of Books Given Out.	Gross Receipts.
1822	300	....	....	....
1824	391	1,500	....	....
1830	490	3,320	8,430	$1,123
1840	761	6,494	14,690	3,527
1850	1474	13,149	28,000	6,186
1860	2450	21,500	87,500	11,351
1870	6577	56,438	148,961	40,751
1880	6115	140,211	140,261	26,824

The Southwark Library Company was established Jan. 18, 1822, upon the stock plan, the shareholders to be owners. In 1830 the company was incorporated by act of Assembly. At first, the number of books being small, the price of shares was placed at a low rate (five dollars), with an annual contribution of two dollars. With the funds thus received was furnished a reading-room, which contained magazines, newspapers, etc. A small library was collected together, which increased but slowly. The quarters of the company were established in Second Street, below Almond.

Clergymen were granted the gratuitous use of the library. A catalogue was published in 1847, a duodecimo of eighty-two pages, of which five hundred copies were printed. As already stated, the library did not grow rapidly, not even thirty years after its foundation, for it is officially stated that for five years preceding 1857 only four hundred and fifty dollars were spent for the purchase of books. While, however, accretions were slow, yet the work of extension went on. At the present time the library contains about twelve thousand volumes, comprising works of fiction, travel, history, and biography. As indicated by its name, the Southwark Library is situated in the old District of Southwark, and is the only library of any considerable size for many squares. It is, of course, chiefly used by the residents of the section of the city in which it is situated, who otherwise would be deprived of library facilities. The company owns a substantial brick building with a "rough-cast" front, located on the original site, on South Second Street, the present number being 765. Attached to the library is a reading-room, frequented by studious mechanics and young men and women of the neighborhood. The institution is, however, chiefly utilized as a circulating library. The officers of the company are William M. Maull, president, and Joseph W. Flickwir, secretary and treasurer.

The Franklin Institute of the State of Pennsylvania for the Promotion of the Mechanic Arts was formally organized on the 5th of February, 1824. Previous to this date certain initiatory steps had been taken, which resulted in the official organization. The subject of setting on foot such an enterprise had been entertained for some time by Samuel V. Merrick, and a number of unsuccessful essays looking toward that end had been made by him. Mr. Merrick's first practical move was in the nature of a call for a meeting to be held at the hall of the American Philosophical Society, but no one attended. Another meeting was called, with the same result. About this time Mr. Merrick met Professor William H. Keating, of the University of Pennsylvania, whom he found to be in hearty sympathy with the project which he had sought to carry out. Indeed, Professor Keating himself had made a number of ineffectual attempts to organize a scientific institution similar to the one which Mr. Merrick had planned. These two kindred spirits, having met, found themselves characterized by common tastes and animated by mutual ambitions, and they went earnestly to work in concert.

They compared notes, and finally agreed to make another effort to get a meeting, under the shadow of whose authority they might make an appeal to the public.

Such a meeting was accordingly convened, and tradition and some memoranda indicate that the following gentlemen attended: Samuel V. Merrick, Thomas Fletcher, Matthias W. Baldwin, David H. Mason, and Oran Colton.

A committee was appointed, consisting of some of those present and of others selected outside who were supposed to be willing to unite, and James Ronaldson, Samuel R. Wood, Samuel V. Merrick, M. T. Wickham, W. H. Keating, Thomas Fletcher, and James Rush were appointed to draught a plan of organization, constitution, etc.

Subsequently the small meeting was again convened, and the committee's plan approved, and Messrs. Merrick and Keating prepared to carry it into execution.

They called to their aid Dr. Robert E. Griffith and George Washington Smith, and, assisted by them, selected from the "Philadelphia Directory" the names of some twelve hundred to sixteen hundred citizens whom they thought might possibly take an interest in such a work, and invited them, by circular letters, to attend a meeting to be held at the county court-house, at Sixth and Chestnut Streets, on the evening of the 5th of February, 1824, when and where the long-cherished project was to be submitted for final approval.

The meeting was large and enthusiastic, the court-house being filled to overflowing. It was presided over by James Ronaldson, a Scotchman by birth, who was extensively engaged in business as a type-founder.

Col. Peter A. Browne, then an eloquent and distinguished member of the Philadelphia bar, made an earnest and effective speech, in which he sketched the plan and purposes of the new institution, and his speech was warmly applauded. He was followed by others in earnest and eloquent remarks.

The constitution was submitted, considered, amended, and then unanimously adopted. Lists were then circulated, on which those present enrolled themselves for membership. A committee was appointed to nominate candidates for officers and managers, and to take the needed order for holding an election on the 16th of the same month. By the time the election was held the roll contained between four hundred and five hundred members.

Mr. Ronaldson was elected president, and held the office until the year 1842.

The board of managers then chosen, of whom Messrs. Merrick and Keating were members, went energetically to work, and soon had the institute thoroughly organized.

Standing committees on instruction, on inventions, on premiums and exhibitions, on the library, and on models and minerals were appointed, and took hold of their duties with zeal and earnestness.

Professorships of chemistry, of natural philosophy and mechanics, and of architecture were forthwith established, and respectively filled by the election of Professor Keating to the first, Professor Robert M. Patterson to the second, and William Strickland to the third.

The first course of lectures was delivered in the old academy building, on Fourth near Arch Street, belonging to the University of Pensylvania, the use of the building being granted by the trustees. In addition to the lectures on the subjects above named, there were a number of volunteer lectures, delivered by members of the institute, on various subjects connected with science and the arts.

The foundations thus laid for instruction were rapidly enlarged, and their proportions and usefulness have been wonderfully augmented.

Soon a school in which were to be taught architectural and mechanical drawing was established, and it was rapidly filled with pupils.

But, not content with this special school, the managers determined to establish another, in which all the useful branches of English literature and mathematics, and the ancient and modern languages should be taught, in short, a high school. This was placed under the charge of Walter R. Johnson, with able assistants, and was soon filled with pupils. The drawing-school has been very successfully continued down to the present day, and is now more flourishing than ever before; but the high school was discontinued after a few years' time, upon the resignation of Mr. Johnson. By this time the public schools of the city had been much improved by the introduction of new methods of instruction, and the establishment of the Central High School of Philadelphia supplied all the needs that the high school of the institute was intended to provide for. The department of instruction, with various changes and enlargement of the features, has continued in successful operation down to the present time.

The committee on inventions soon became a centre from which radiated the most useful and interesting results. The late Isaiah Lukens, a distinguished mechanician, was for many years its chairman, and, with the professors in the institute, and such associates as Alexander Dallas Bache, Benjamin Reeves, Samuel V. Merrick, Rufus Tyler, Matthias W. Baldwin, John Agnew, George Washington Smith, John Wiegand, and others, gave wise counsel to inventors, put them in the way of knowing what had previously been accomplished, saved them from the loss of money and of reputation by showing them when their inventions were not new, and when any matter of real novelty or value was presented, indorsing it most heartily with their approval, and giving that potential aid which would almost certainly secure public recognition and reward.

This committee continued its labors as originally constituted for many years, and upon its suggestions committees were raised for investigating the various forms of water-wheels, for giving economical value to water-power.

On this subject experiments of great number, and on almost every form of water-motor then known, were made, and the results tabulated and commented on in such an exhaustive manner that the report continues to this day to be a most valuable text-book on water-power.

Following this, and in the same lead of practical usefulness, a committee was raised to investigate the causes of explosion of steam-boilers, and in this investigation the institute succeeded in getting the co-operation of the government of the United States, an appropriation for defraying the cost of the experiments being made by Congress. But no part of the money so appropriated was paid as compensation to the experimenters. These were all volunteers, devoting many months of valuable time to the investigation and ascertaining most valuable facts, which have since been utilized for the benefit and safety of the public.

Connected with these experiments on explosions caused by steam came almost naturally an investigation of the strength of materials. For this purpose the committee devised testing apparatus of various forms, and applied them in the most extensive and crucial way to the metals and materials of all kinds used in machines, steam-boilers, buildings, and other branches of the useful arts. The reports on explosions and on the strength of materials were published also, and are of equal reputation and use as those on water-power.

The committee on inventions was subsequently

abolished, and in its place was established the committee on science and arts. This committee was intended to cover not only the ground originally occupied by the committee on inventions, but to embrace a wider field, and to interest in its operation a larger number of members. Every one, therefore, who felt an interest in developing the domains of invention or science was invited to enroll himself as a member, and thereby to pledge himself to devote his time and knowledge to the service of the committee, and through it to the public. This voluntary association still exists, and its long course of labors and usefulness is attested by its memoirs, and by the vast number of reports made on inventions and other matters submitted to its scrutiny.

One of the methods adopted by the institute for the promotion of the mechanic arts was to reward inventors, manufacturers, and mechanics by the distribution of medals and premiums. To this end, the committee on premiums and exhibitions was appointed. It soon announced that an exhibition of American manufactures would be held in the city, and published a long list of premiums that would then be awarded. A very extensive circulation of this intention was given by letters addressed to those whose interest would be promoted by the exhibition, and also by advertisements to direct public attention to the undertaking. It was held in the Carpenters' Hall in the autumn of 1824, and was crowned with complete success. These exhibitions were continued at short intervals for a long while, and grew in public favor and usefulness, but were suspended for a number of years in consequence of an inability to get a hall of sufficient size for a proper display.

In 1874, however, an exposition was held under the auspices of the institute, in commemoration of its semi-centennial, which exceeded in scope and interest any previous exhibition.

The first movement toward this exhibition was at the stated meeting of the institute held Feb. 18, 1874, when, on motion of G. Morgan Eldridge, the subject was referred to the committee on exhibitions.

The committee addressed a letter to J. Edgar Thomson, late president of the Pennsylvania Railroad Company, making an application for the use of their depot on Market Street, between Thirteenth and Juniper Streets, for the purpose of an exhibition. This application having been laid before the board of directors, the depot was placed at the disposal of the institute during the months of September and October, 1874.

At the stated meeting of the institute, held the 18th of March, resolutions were adopted, requesting the board of managers to hold an exhibition, and to secure a guarantee fund to indemnify the institute against loss. This condition having been fulfilled, public announcement was made upon the 14th of April that the exhibition would be held from the 6th to the 31st of October.

The prospectus of the proposed exposition announced that the exhibition would "embrace all materials used in the arts, in every stage of manufacture, from their natural condition to the finished products, and all tools, implements, and machines, by which the gifts of nature are changed and adapted to the use, the comfort, or the enjoyment of mankind."

The exhibition was opened by the Governor of Pennsylvania, upon the day appointed, and attracted the sustained attention of the public to such an extent that it was deemed advisable to continue it open for twelve days longer than was originally designed.

The whole number of paying visitors was two hundred and sixty-seven thousand six hundred and thirty-eight, besides members of the institute, their ladies, and minors, and persons admitted on complimentary tickets issued to the press and to others whose liberality it was desired to recognize. Making due allowance for these, it may be said that the exhibition was visited by one-third of the population of Philadelphia. The number of applications for space was fifteen hundred and twenty-eight. The number of entries for exposition, many of them covering numerous items and large displays, was twelve hundred and fifty-one.

Since 1874 the institute has held no comprehensive public exposition. Active measures, however, are now being prosecuted looking toward a complete electrical exhibition in the fall of 1884.

Ground fronting on the north side of Lancaster Avenue, and extending from Thirty-second to Thirty-third Street, the property of the Pennsylvania Railroad Company, has been leased by that company to the institute from Dec. 1, 1883, to Dec. 31, 1884, at a nominal figure. It is estimated that the lot of ground will give net exhibition space of seventy-five thousand square feet.

A guarantee fund of fifty thousand dollars has been subscribed by the members and friends of the institute, and every indication points to the most successful exhibition of electrical appliances ever held in America.

Relative to the mode and scope of operations of the institute, and to its terms and privileges of membership, the following points of information are valuable:

Meetings are held on the third Wednesday evening of each month, except in July and August, at which new inventions are presented, papers on technical subjects are read and discussed, and an abstract of current progress in science and the arts is presented by the secretary.

Courses of lectures are delivered during the winter months, under the direction of the committee on instruction, and the professors of those branches in the institute as an advisory board.

At the drawing-school, which has been carried on since the foundation of the institute, nearly five

hundred pupils annually receive instruction in mechanical drawing, free-hand sketching for industrial purposes, and architectural drawing.

Chemical, electrical, and phonetic sections have been formed, composed of members interested in those branches, at which original papers are presented and discussed.

The committee on science and the arts conducts investigations of inventions brought before it, through sub-committees of experts,—selected for their special knowledge of the subjects,—and makes detailed reports upon the same, sustaining by its labors the scientific character of the institute.

Each member and adult holder of second-class stock, when not in arrears for dues, is entitled to attend the meetings of the institute, to use the library and reading-room, and to receive tickets for himself and a lady to the lectures.

Contributing members pay five dollars each year. The payment of fifty dollars in any one year secures life membership, without annual dues.

Shares of stock are ten dollars.

Second-class stock has an annual tax of three dollars per share, entitling the holder of one share to the privileges of membership.

Minor children, wards, and apprentices of members not in arrears, by payment of two dollars, have the use of library and reading-room, and admission to lectures, or lectures alone for one dollar.

Minors holding a share of second-class stock, by paying one dollar and fifty cents per year, have the use of library and reading-room and admission to lectures.

As has been previously stated, the first course of lectures was delivered in the old academy building on Fourth Street. The institute very soon rented the lower story of the old Carpenters' Hall, in the rear of Chestnut Street, east of Fourth Street. It was early determined, however, to build a hall for the purposes of the institute; and to carry out this intention a purchase was made of a lot on Seventh Street, between Market and Chestnut Streets.

The corner-stone was laid with appropriate Masonic and other ceremonies, on the 8th day of June, 1825, at noon, and the edifice was erected by contract, from plans and estimates furnished by John Haviland, Esq., the architect. Being obliged to have an eye to revenue from the building, an agreement was made with the United States that the second story would be finished so that it might be occupied as a court-room and offices for the Circuit and District Courts. When the building was completed, a lease was accordingly made for a term of years at fifteen hundred dollars per annum. But after a short occupancy this lease was cancelled, as it was found to be inconvenient for members of the bar to be so *far* from the county court-house at Sixth and Chestnut Streets. The United States then agreed to give up the premises, and to pay nine hundred dollars per annum for the remainder of the term, and the city rented for the use of the court the second story of Independence Hall.

The Franklin Institute building was completed, and all except the second story occupied, in 1826. On the cancellation of the lease to the United States, full possession of the whole building was obtained. Several times the question of removal from this hall, wherein so much efficient work has been wrought out, has been seriously considered. It very nearly culminated in the year 1836, when the Masonic Hall property on Chestnut Street west of Seventh was purchased by the institute for the sum of one hundred and ten thousand five hundred dollars.

Plans for a new and enlarged edifice were prepared by William Strickland, architect, aided by a committee of the institute. A plan for a building loan was adopted, and a part of it subscribed for, which enabled the institute to pay the first installment of the purchase money. But the great financial crash of May, 1837, struck the project down, and after vainly struggling for several years to carry it out its abandonment became necessary, and at a loss of many thousands of dollars. At different times since projects of removal have been started, but have never been consummated.

At the stated meeting of the institute held in December, 1873, it was decided to celebrate in February, 1874, the fiftieth anniversary of the foundation of the organization.

The meeting which had been held on Feb. 5, 1824, having been decided on as the one which most surely marked the permanent foundation of the institute as a society, it was deemed advisable, if possible, to hold the commemorative meeting on that day; but inasmuch as no suitable hall could be obtained for the evening of the 5th of February, the following day, namely, the 6th, was fixed upon; and at the meeting of the institute in January it was resolved that "when we adjourn we adjourn to meet at the Musical Fund Hall on the evening of February 6th." The meeting was public and largely attended.

The programme for the evening was as follows:

Music.
Assembly called to order by Coleman Sellers, President of Franklin Institute.
Music.
Address by Hon. Frederick Fraley, Treasurer of Franklin Institute.
Music.
Address by Robert E. Rogers, M.D., Professor of Chemistry in University of Pennsylvania, and Vice-President of Franklin Institute.
Music.
Address by Henry Morton, Ph.D., President of Stevens Institute of Technology, Hoboken, N. J., and late Secretary of Franklin Institute.
Music.
Closing Address by Coleman Sellers, President of Franklin Institute.

It was determined early in the history of the institute to gather material for a library, and under the auspices of the committee charged with attention to that feature of the institution books began to take their places on its shelves, to accumulate, to be used, and gradually to assume the numbers and variety

which now characterize the society's large and valuable collection.

The library at present comprises twenty thousand bound volumes and as many pamphlets. The yearly increase of bound volumes averages about one thousand or twelve hundred, by purchase and by donation. It contains many valuable works on mechanical and other subjects relating to the applied sciences, including all the leading American and European journals, and complete sets of American, English, and French patents, and which are placed at the command of members of the institute and of others properly introduced. Indeed, this collection of patent reports is unexcelled in America. Besides these valuable books the institute possesses a complete set of all publications of the United States government upon every phase of applied science.

The library is divided into two classes, the first comprising such works as from their rarity or value should not be lent out, all unbound periodicals, and such text-books as ought to be found in a library of reference except when required by committees of the institute, or by members or holders of second-class stock who have obtained the sanction of the library committee. The second class includes those books intended for circulation.

In natural connection with the library comes the *Journal*. At the outset the pecuniary means of the institute were too limited to permit it to venture alone on such a publication. But an arrangement was made with Thomas P. Jones, then professor of Natural Philosophy and Mechanics, to edit and publish a periodical devoted to science and the arts, under the title of the *Franklin Journal*. In this form, and with limited aid from the treasury of the organization, the publication was continued until 1828, when the institute assumed the responsibility of continuing it, under the title of *The Journal of the Franklin Institute;* and so it has continued to this time.

The editors of the *Journal* have been Thomas P. Jones, A. D. Bache, Charles B. Trego, John F. Frazer, Henry Morton, William H. Wahl, and Professor George F. Barker.

The *Journal* is published monthly, the subscription price being five dollars per year. Members and stockholders not in arrears have the privilege of subscribing at three dollars per year. It is the only technological journal published in the United States without private pecuniary interests, and has always been considered as a standard work of reference.

The Franklin Institute is the custodian of a number of trusts, whose main and common object is the advancement of the cause of science.

John Scott, a chemist of Edinburgh, gave by his will to the corporation of the city of Philadelphia, a legacy for the establishment of a premium, to be given by a medal and money to the inventors of anything new or useful. In the year 1834 the City Councils placed the awarding of the Scott's legacy medal and premium in the hands of the institute, and it has so faithfully and carefully discharged that duty that its stewardship still continues.

In 1848 Elliott Cresson placed in the charge of trustees a sufficient sum of money to provide a gold medal, which was to be awarded by the institute to the inventor of any new or useful discovery. As this premium is to be given only for matters of real novelty and merit, it is, of course, rarely issued. The first recipient of it was Gen. Benjamin C. Tilghman, of Philadelphia, the discoverer of the application of the sand-blast for a variety of useful and ornamental purposes.

And in 1859, Uriah A. Boyden, of Boston, Mass., placed in charge of the institute the sum of one thousand dollars, to be awarded to "any resident of North America who shall determine by experiment whether all rays of light, and other physical rays, are or are not transmitted with the same velocity. The claim to be made in the form of an essay, announcing the result and its manner of ascertainment, to be presented before the first day of January, 1873." The awarding of this premium was placed in the hands of a committee. Several essays were received, but no one of them was considered of sufficient merit to entitle it to the prize. Mr. Boyden has allowed the premium to remain with the institute, however, in the hope that it may be earned by some worthy mathematician.

The Franklin Institute has been fortunate in that it has been officered, from the very beginning, by energetic, public-spirited men. Its presidents, especially, have always been men of high character and reputation. James Ronaldson served as president until January, 1852, when he resigned; but he maintained his interest in the institution until he died, and gave it by his will a legacy of five hundred dollars.

He was succeeded by Samuel V. Merrick, the acknowledged founder of the institute, and the man above all others who impressed on it at the beginning nearly all of its practical features.

Mr. Merrick held the office of president until January, 1855, when he resigned. He was succeeded in the presidency by John C. Cresson, who had been elected a member in 1834. His able administration was universally recognized, and he occupies a high and honorable place in the records and history of the institute. He declined a re-election in 1864, and William Sellers was chosen his successor.

Under the administration of this distinguished mechanical engineer a new impulse was given to the career of the institute. The plan of organization was modified, and a large sum was raised by Mr. Sellers and his friends to reduce the debt, to repair and alter the hall, and to bring the institution into more effectual contact with manufacturers and mechanics.

Mr. Sellers declined a re-election in 1868, and was succeeded by John Vaughan Merrick, the eldest son of the distinguished founder. He inherited all the

interest so long held by his father, and energetically carried out the new and enlarged policy.

He declined a re-election in January, 1870, and was succeeded by Coleman Sellers, who occupied the office until 1875, serving the institute with marked ability.

In January, 1875, Professor Robert E. Rogers was chosen president. The office was held by Professor Rogers until January, 1879, the period of four years covered by his incumbency being fraught with importance to the institute.

At the annual meeting in 1879, William P. Tatham became president.

The Historical Society of Pennsylvania.—The origin of this association was as follows: In 1824, George Washington Smith, of Philadelphia, happened, while visiting New York, to be placed in relations of intimacy with De Witt Clinton, then Governor of that State. The New York Historical Society was at the time a subject of public interest in New York City. Mr. Clinton's regard for the institution was always warm and active. He spoke much of it to his visitor, unfolded its plans and objects, expatiated eloquently on its prospects and usefulness. Mr. Smith, upon returning to Philadelphia, suggested to certain citizens the formation of a similar society in this city. The suggestion was well received. A preliminary meeting was held, with the following result, as learned from the original minutes, still extant:

"At a meeting of gentlemen, native citizens of Pennsylvania, favorable to the formation of a society for the purpose of elucidating the history of the State, held on the 2d day of December, 1824, at the house of Thomas I. Wharton,

"Roberts Vaux was called to the chair, and George Washington Smith appointed secretary. There were present Roberts Vaux, Stephen Duncan, Thomas I. Wharton, William Rawle, Jr., Dr. Benjamin H. Coates, Dr. Caspar Wistar, George Washington Smith.

"After an interchange of the views of those present it was, on motion of T. I. Wharton,

"*Resolved*, That it is expedient to form a society for the purpose of elucidating the history of Pennsylvania.

"*Resolved*, That a committee be appointed to prepare a constitution and by-laws for the government of the said society.

"Whereupon, Thomas I. Wharton, Dr. Coates, and G. W. Smith were appointed a committee.

"Adjourned to meet on the 27th day of December, 1824."

At a meeting held pursuant to the adjournment, "present fifteen persons," the committee reported a draught of a constitution and by-laws, which was approved. The meeting then adjourned till the 29th of January, 1825.

On that day the society met again, when "a list of the names of gentlemen desirous of joining the society was read, and, on motion, the persons applying for membership were elected and placed on the secretary's roll."

This honored roll preserves for grateful recollection the following names, well known, every one of them, in the city's history: William Rawle, George Washington Smith, Roberts Vaux, Gerard Ralston, Joseph Hopkinson, William Mason Walmsley, Joseph Reed, William M. Meredith, Thomas C. James, Daniel B. Smith, John Sergeant, William Rawle, Jr., Thomas I. Wharton, Charles J. Ingersoll, Thomas H. White, Edward Bettle, Caspar Wistar (2d), Thomas McKean Pettit, Benjamin H. Coates.

It was then resolved that the constitution and by-laws be in force from and after the 28th of February, 1825, and that an election for officers for that year should be held on the day named.

On that day the society met again, and proceeded to an election, when the following gentlemen were chosen: President, William Rawle; Vice-Presidents, Roberts Vaux, Thomas Duncan; Corresponding Secretary, Daniel B. Smith; Recording Secretary, G. W. Smith.

The first meeting of the council was held on the 18th of May, 1825, and in the succeeding month the president, Mr. Rawle, read a paper defining the intentions of the founders, as follows:

"The objects of the society are to trace all the circumstances of early settlements; to collect all documents and written and printed evidence, and all traditionary information that may still be obtainable; and, after having thus acquired possession of such materials, to publish such portions as may be deemed most interesting and instructive.

"The purpose of the society also is to form an ample library and cabinet, the collection of books, pamphlets, and manuscripts on any subject or of any date, medals, coins, or any article drawing value from historical or biographical affinities, Indian idols, ornaments, arms, utensils, etc.

"The property of the society is to consist of original letters, books, journals, or narrations of the early settlers of Pennsylvania, or any distinguished persons among us in later years; narratives relative to the Indians, vocabularies of Indian language, accounts of missionaries, facts relating to the origin of the North American Indians; copies of record and proceedings of public bodies, political, religious, literary, or otherwise, that have existed; accounts of universities, colleges, academies, schools; topographical descriptions of cities, towns, boroughs, counties, or townships; accounts of population, births, longevity, deaths, epidemical and local diseases; facts relating to climatology, meteorology, and general employment and customs of districts; biographical notices of eminent and remarkable persons, etc."

The first place of regular meeting of the new association was in the rooms of the American Philosophical Society, on the west side of Fifth Street below Chestnut, and looking out upon the State-House grounds. Everything contemplated appears to have been upon the most modest scale, and in a quiet way of usefulness the society proceeded for nearly twenty years. But if it was small in numbers, unimposing in possession, without a habitation of its own, it was not less confident in hope, less zealous in endeavor, less fruitful in good works. Books were brought together. Manuscripts were sought for and rescued from destruction. A scheme of large usefulness was planned and marked out by its accomplished president, and standing committees to give every part of it effect were named.

The first volume of "Memoirs" of this society was published in December, 1825. It contained the constitution of the society and the list of officers; an inaugural discourse, delivered Nov. 25, 1825, before the society by William Rawle; "A Memoir of the Great Treaty of William Penn in 1682," by Roberts Vaux; "Notes on the Provincial Literature of Pennsylvania," by Thomas I. Wharton; "A Memoir on

the Controversy between William Penn and Lord Baltimore concerning the Boundaries of Pennsylvania and Maryland;" and "Original Letters and Documents relating to the History of Pennsylvania," hitherto unpublished. All these represented the historical work of the year. And when it is considered that the gentlemen who prepared those papers were men of business, whose minds were constantly engaged with weighty affairs, it must be admitted that their enthusiasm was shown to be warm by the care they had taken and the time which they had spent in the preparation of those papers.

In 1844 the society removed to new quarters, a room having been secured in the second story of a house on South Sixth Street, below Walnut, which was afterward numbered 211. The resources of the society were still meagre, and in consequence the appointments of the organization and the material collected were upon a modest scale. In about three years the society again made a change of quarters, this time removing to the upper rooms of the then newly-erected building belonging to the Athenæum, about half a square to the south, on Sixth Street. Here the society was established about a quarter of a century, during which period great advancements, of a numerical, financial, and historical character, were made. A commendable zeal in research was fostered, much valuable material was collected, and, in general, the fundamental objects of the organization were sensibly promoted. Finally it became obvious that the collections of the society were increasing so fast that they could not be well accommodated in the rooms of the Athenæum, and the managers of the Pennsylvania Hospital having placed at the command of the society, in a very handsome manner, and for a long term of years, their building on Spruce Street, known as the "Picture House,"[1] overlooking their spacious and well-kept gardens on the south, it was gratefully accepted by the society. A sum of ten thousand dollars being cheerfully subscribed, preparations were immediately made, on an extensive scale, to adapt the building to the uses of the new occupants; very large and securely-built fire-proof closets being a matter which engaged especially the attention of the society. The whole house, which it required nearly a year to complete, having been finished in February, 1872, the valuable collections of the society were transferred to it. This responsible and laborious work being accomplished a committee, composed of John Jordan, Jr., William Duane, and John T. Lewis, was appointed to inform the members of the transfer. To signalize more impressively a step which seemed to be a great one in the progress of the society, it was resolved to inaugurate the hall in form, and the president was requested to deliver an address of inauguration.

OLD HISTORICAL SOCIETY BUILDING ON SPRUCE STREET.

Accordingly, on Monday evening, the 11th of March, 1872, that being one of the evenings of the stated meetings of the society, a large company assembled in the new hall, and John William Wallace, at that time the president of the society, proceeded to address it in an admirable discourse, outlining the history of the organization from its inception in 1824.

Although it had been the purpose of the society to remain many years in its new hall on Spruce Street, yet a decade had scarcely elapsed before its quarters were found to be too circumscribed to meet the demands superinduced by the advanced strides of the association; so that in the latter part of 1882 initiatory steps were taken looking toward what eventually resulted in a radically new departure. The commodious family mansion of the late Gen. Robert Patterson, which had been erected in 1832, standing at the southwest corner of Locust and Thirteenth Streets, was placed in the market, and a vigorous effort was made by a number of the more active members of the society to secure sufficient funds for the purchase of this admirable property. The movement was eminently successful, and the mansion was bought, together with an adjoining lot of ground, upon which an auditorium was subsequently erected. The property itself, together with the additions, alterations, and renovations which were made, cost about ninety-five thousand dollars; which sum was entirely raised by voluntary subscriptions, chiefly from the members of the society. Not a dollar has ever been asked for or

[1] It was originally constructed for the exhibition of Benjamin West's great painting "Christ Healing the Sick," presented by him to the hospital.

Digitized by Google

received from the city or State authorities. The sum of five thousand dollars was also expended in furnishing the society's new quarters.

Since the institution of the Historical Society its deliberations have been presided over at various times by six presidents. As already stated, the first incumbent of this office was William Rawle. His tenure of the presidency covered the period between 1825 and 1836. Mr. Rawle was succeeded by Peter S. Du Ponceau. His term of service lasted from 1837 to 1845. He was succeeded by Judge Thomas Sergeant, of the State Supreme Court, who occupied the office until 1858. The next president was Dr. George W. Norris, an eminent physician, who served only two years, or until 1860. In the latter year, Joseph R. Ingersoll, at one time minister to England, was chosen. He performed the duties of the office until 1868. From that time until his death, Jan. 12, 1884, John William Wallace was president of the society. The next president was Brinton Coxe, who was chosen Jan. 21, 1884.

PENNSYLVANIA HISTORICAL SOCIETY.

John William Wallace, who has long been known to the bar and the community as a distinguished lawyer, scholar, and citizen, was born in this city Feb. 17, 1815. His father was John Bradford Wallace, who belonged to that distinguished circle of lawyers—Binney, Sergeant, and Chauncey—who conferred so much honor upon the Philadelphia bar, and his mother was a sister of the first named of this circle, the elder Horace Binney. His early training in literature, in religion, and the law was under the constant guidance and supervision of his father; but he owed much to his mother, who, to intellectual culture, joined qualities of heart that endeared her to her son, and united them in the closest bonds of affection.

Mr. Wallace graduated at the University of Pennsylvania in 1833. Selecting the law as his future profession, he pursued his studies in this city and in London. He was called to the bar Oct. 27, 1836. His legal acquirements were extensive and varied. Few of his contemporaries at the Philadelphia bar cultivated so assiduously what may be termed the literature of the law. His first volume, called "The Reporters," the first edition of which was published in 1843, illustrates Mr. Wallace's learning and abilities as a legal writer.

Early in his professional career he was appointed a master in chancery by the Supreme Court of Pennsylvania, and subsequently published three volumes of reports of "Cases in the United States Circuit Court," and edited six volumes of "British Crown Cases Reserved." In 1864 he was appointed by the Supreme Court of the United States the reporter of its decisions, and twenty-two volumes of reports attest the ability and the fitness which he brought to

Digitized by Google

the duties of this important position. "Wallace's Reports" are a monument to his faithfulness and his learning. Mr. Wallace was not only a lawyer and a legal writer, but he was an accomplished belles-lettres scholar, and during his several visits abroad devoted himself to literature and art. He was greatly interested in historical and biographical studies, and while still the reporter of the Supreme Court was elected, in 1868, the president of the Historical Society of Pennsylvania, which position he continued to hold to the time of his death. In politics, Mr. Wallace was a devoted adherent to the traditions of the old Federal party. In religion he was a stanch churchman, and a constant attendant on church services. Mr. Wallace's family consisted of his wife, who survives him, and one daughter, the wife of John Thompson Spencer, of the Philadelphia bar.

During the society's sixty years of effort and investigation much material of value has been gathered. Of primary importance, of course, is its very excellent library. It contains at the present time about twenty thousand bound volumes. Among the valuable books belonging to the society may be mentioned the following: "Kalendarium Pennsilvaniense . . . Being an Almanack for the Year of Grace 1686," printed by William Bradford, at Philadelphia, in 1685; "Good Order established in Pennsilvania and New Jersey. By Thomas Budd," printed in 1685; "An Epistle from John Burnyeat to Friends in Pennsilvania," printed by William Bradford in 1686; an Elliott Bible, printed at Cambridge in 1685; the first and second volumes of the *Pennsylvania Gazette*, the first being printed by Samuel Keimer, and the second by Franklin & Meredith; and Sanderson's "Lives of the Signers of the Declaration of Independence," illustrated with original autograph letters.

The society's manuscript collection is a voluminous one, and of rare value. Among its chief features are the following: The "Penn Papers," being miscellaneous correspondence of members of the Penn family, from a period prior to the settlement of Pennsylvania in 1682 until the war of the Revolution; the "Franklin Papers," embracing much of the correspondence of the famous scholar and diplomat; the "Shippen Papers," containing letters and documents written by various members of this distinguished family, and a vast amount of miscellaneous matter of much historical, biographical, and antiquarian value.

The society is, moreover, possessed of portraits, chiefly in oil, of many distinguished persons. Among them are portraits of Amerigo Vespucci, Hernando Cortez, John Hampden, William Penn, Benjamin West, Washington, Lafayette, Anthony Wayne, William Moultrie, Henry Knox, John Cadwalader, Sir William Keith, Patrick Gordon, James Logan, James Hamilton, Richard Penn, Benjamin Franklin, Thomas Wharton, Jr., Joseph Reed, William Moore, John Dickinson, Thomas Mifflin, Thomas McKean, Simon Snyder, George Wolf, and Joseph Ritner.

Besides its valuable collection of books, manuscripts, and portraits, the society possesses many historical relics of great interest. Indeed, this feature of the society may be said to constitute it a veritable museum of curiosities.

The Library Association of Friends.—Although the question of establishing a library had been previously discussed, it was not until 1834 that the liberal branch of Friends, known as "Hicksite Quakers," began active measures looking toward the establishment of a library. At a Monthly Meeting held Dec. 17, 1834, at the Cherry Street meeting-house, below Fifth Street, a committee was appointed to report upon the feasibility and desirability of founding a library under the care of the Cherry Street Meeting, and for the use of its members. This committee comprised William Wayne, James Mott, Caleb Clothier, Richard Pice, Joseph Parrish, M.D., Thomas Parker, Samuel Hutchinson, J. Elwood Chapman, Dillwyn Parrish, William Eyre, Edward Hopper, Benjamin J. Leedom, James Willis, George Truman, Charles Longstreth, and Jacob T. Williams.

On the 25th of February, 1835, the committee reported in favor of the establishment of a library, provided a suitable room could be made available. They had made some effort toward ascertaining whether sufficient funds could be secured with which to erect a library building, and also quarters for school purposes. They had succeeded in raising fourteen hundred dollars, which was considered nearly sufficient, only fifteen hundred to two thousand dollars being deemed necessary. The committee asked for authority to go on with the work, and requested permission to erect the proposed building on the property belonging to the meeting, forty-six by seventeen feet, north of the meeting-house. The authority asked for was granted.

At the Monthly Meeting held Nov. 18, 1835, the committee reported that the building for library and school purposes had been erected, and that the schools were already in operation. The committee also reported in favor of the appointment of a committee from the meeting to have general charge of the library, to supervise the selection of books, etc., and to see that the institution should be conducted in a proper manner. The committee further recommended the organization of a library association of Friends, to comprise not only members of the Cherry Street Meeting, but of the other Monthly Meetings as well, which should be responsible for the financial operations of the library, subject, however, to the general supervision of the Monthly Meeting.

The recommendations of the building committee were adopted. On the same evening there was organized "The Library Association of Friends of Philadelphia." At an adjourned meeting of the association held six days later, on November 24th, a committee reported a set of rules and regulations for the gov-

ernment of the society, which were adopted. Among them was the following: "The association shall consist of such persons, members of the Society of Friends, as shall pay in advance one dollar or upward per annum, or who shall contribute at one time twenty dollars; or donations may be received for the use of the association, and the donors not be considered as members of the association if they so request."

At this meeting of the association a committee of management was appointed. From that time the affairs of the library have been under the direction of a similar committee.

The library building, erected in 1835, was of modest dimensions and construction. Its whole cost, exclusive of furniture, was $2317.81. It was deemed adequate for the purposes of the association, however, until the Monthly Meeting in the spring of 1857, having disposed of its real estate on Cherry Street, removed to the very commodious property, then newly prepared for it, on Race Street above Fifteenth. Here convenient buildings had been erected, including a meeting-house and school- and library-rooms.

Since the institution of the library its growth has been excellent, considering the conservative methods which naturally prevail in a society wholly managed by Friends. In November, 1836, the library contained 1100 volumes, received by donation, purchase, and loan. This number had increased in November, 1852, to 3800 volumes, while at the same period in 1883 the library contained 8929 volumes. These were classified as follows: Abridged and juvenile, 1326; scientific, 1090; religious, 1815; voyages and travels, 885; history and biography, 1589; miscellaneous, 2224.

Any adult member of the three Monthly Meetings of this city can obtain books upon application to the librarian, and having recorded his or her place of residence, accompanied with the signature of the applicant.

Minors, who are members, can be accommodated in the same way, upon their parents, or any Friend of responsibility, signing a printed form of guarantee.

For all others who may desire the use of the library, application must be made to the committee of management, accompanied with a guarantee (which can be procured of the librarian), signed by some responsible individual, and approved by a member of the Library Association of Friends. No fees or dues are exacted for the use of the library, but all books borrowed must be returned or renewed within two weeks, or a fine is incurred.

No book can be renewed or taken out a second time by the same individual until six months shall have elapsed from the time of its introduction into the library, neither can it be transferred to another member of the same family while other applicants are waiting for it.

In making selections for the library care is taken to meet the wants of judicious readers, at the same time studiously avoiding the introduction of any book antagonistic to the principles and testimonies of the Society of Friends, or in any way unfriendly to true religion or high morality.

The library is open on Wednesday and Saturday afternoons and evenings, and on Friday afternoons. The hours are from two to five in the afternoons, and from seven to nine in the evenings.

The Spring Garden Institute building is situated at the northeast corner of Broad and Spring Garden Streets. It is one of a number of associations organized through the efforts of the Young Man's Institute, which, about the year 1850, collected funds with which to aid such work. Richard Wistar presented the corner lot, while an adjoining piece of ground was purchased with funds donated. The commissioners and a number of liberal citizens of Spring Garden contributed to the undertaking, and the sum of five thousand dollars was obtained from the Young Man's Institute. A charter was granted April 12, 1851, and the work of building was begun shortly afterward, the corner-stone having been laid July 8, 1851. On Nov. 12, 1852, the building was dedicated. It occupies a lot one hundred feet front on Broad Street by fifty-seven feet on Spring Garden Street. As originally constructed the first floor was occupied by stores. The second floor formed one large lecture-room, used at times by the institute, but also rented out to other organizations. The third floor was suspended by iron rods from the roof-trusses to avoid obstructing the lecture-room below with pillars, and was divided into three apartments. One of these was fitted up for school purposes, one for the library, and the third as a board-room. The library, by gifts, purchases, and consolidation with other libraries, soon became one of interest and value, but it was open only in the evening, and being on the third floor was not easily accessible. For a time a drawing-school was maintained, but this was afterward abandoned, and in its place a night-school for English branches was established. Lectures were also maintained with varying degrees of success.

The war of the Rebellion greatly crippled the usefulness of the institute, and it had not recovered from the effects thereof when, in 1878, a new board of managers was chosen, largely composed of young men who had heretofore had no part in the direction of its affairs. The institute, reinvigorated, dates from that time. The structure was remodeled, new schools were established, and gradually the whole of the building was recovered from tenants, and every room in it used for institute work. The library was removed to the first floor and opened day and night. The whole of the third floor was fitted up for drawing-schools, skylights being put in to fit them for use by day-classes; the basements were fitted up as machine-shops and stocked with tools, and the remaining apartments on the first floor were fitted up as drawing-rooms and offices. Extensions were also built in the

yard area, kilns for firing china and stained glass erected, and a clay modeling-room equipped in the loft. At present every available part of the building from the cellar floor to the roof is used for institute work.

The library of the institute has been greatly enlarged and improved within a few years, and now comprises about fifteen thousand volumes, some of them out of print, but a large proportion newly purchased and selected with care. The reading-room is entirely free, and is open from 10 A.M. to 10 P.M. The use of the library is without cost to pupils, and subscribers can obtain the use of it by paying, if adults, three dollars; or if minors, two dollars per annum.

John M. Ogden was president of the institute from its organization until his death, in 1882, when he was succeeded by John Baird, the acting president since 1878, and one of the original board of managers.

The Presbyterian Historical Society was organized in May, 1852. Its foundation was chiefly due to the efforts of Samuel Agnew, of Philadelphia. Five years later, or in 1857, the Legislature of Pennsylvania granted the society a charter. The organization is not, however, confined in its scope to church interests in this State. It represents the denomination in the whole country.

Since the institution of the society, in 1852, various efforts have been made looking toward its extension, and toward the enlargement of its library. For over a quarter of a century the society possessed no building of its own for a place of meeting and for the storage of its library. Indeed, it was not until 1881, nearly thirty years after the society was founded, that the building No. 1229 Race Street, since owned by the society, was fully taken possession of. While this structure is a plain, modest one, yet it is substantially constructed, and is completely adapted to the present wants of the society.

During the years preceding the erection of the society's hall a great mass of material had been collected, chiefly the result of gifts of individuals and various ecclesiastical, semi-ecclesiastical, and secular organizations. This matter, however, had never been arranged in systematic order, nor catalogued, until the society's removal to its own building.

At the present time the library comprises about twenty thousand bound volumes, fifty thousand pamphlets, and a great mass of manuscript material. In the fire-proof building adjoining the main building on the east is placed the more valuable part of the library, including all books classed as collected works, Bible text and study, apologetics, doctrinal theology, ecclesiastical theology, ethics, secular history, church history, and biography.

In addition to works of the character indicated, it is the aim of the society, being in the line of its fundamental objects and purposes, to gather a variety of matter bearing upon Presbyterian history and effort, such, for instance, as pamphlets, magazines, periodicals, reviews, sermons, single and collected; histories and discourses concerning churches, persons, and localities; minutes and proceedings of Presbyteries, Synods, and General Assemblies; manuals and charters of churches; letters, autographs, and manuscript sermons of deceased ministers; annual reports of religious and benevolent societies; catalogues of colleges, seminaries, and schools; biographies, portraits, and photographs of ministers and prominent laymen; views of churches; pictures and engravings, and whatever else can illustrate or add interest to the facts concerning Presbyterianism.

Any person connected with any branch of the Presbyterian Church may become a member of the society by the payment of five dollars annually, one-half of which is applied to the current expense fund, and the other half to the library fund. The payment of fifty dollars constitutes a member for life, the whole of which is placed in the endowment fund, and the income only used for the library fund. There are four funds kept separate on the books of the treasurer, viz., current expense fund, library fund, endowment fund, and publication fund. The yearly meeting of the society is held on the first Tuesday in May.

The American Baptist Historical Society was first organized as a department of the American Baptist Publication Society at its annual meeting in 1853. The subject was brought before the society in the following suggestion of the board:

"The board would also suggest the importance of organizing a Historical Department for the special purpose of collecting and preserving all documents elucidating our denominational history, and for publishing such papers and volumes as may shed light upon the rise and growth of Baptist churches, and the progress of Baptist principles throughout the Union."

After the reading of the suggestion, Dr. J. M. Peck moved the following resolutions:

"*Resolved*, That the interests of the Baptist denomination require the organization of a Historical Department in connection with the American Baptist Publication Society.

"*Resolved*, That this society hold a meeting to-morrow evening for the purpose of organizing such a department."

On the following evening the meeting was held and the Historical Department organized. The first officers were: President, William R. Williams, D.D.; Vice-Presidents, John M. Peck, D.D., William Hague, D.D., Baron Stow, DD., and R. B. C. Howell, D.D.; Secretary, Horatio G. Jones; Treasurer, Rev. B. R. Loxley; and Curators, Joseph Belchior, D.D., John Dowling, D.D., J. Lansing Burrows, D.D., and John Hanna.

In 1860, Howard Malcom, D.D., LL.D., was elected president, and from that time the society entered upon a new life, and was favored with remarkable prosperity. In 1861 a charter was secured, and the department became the American Baptist Historical Society, with all the powers of an independent body. The second article of the constitution of the newly-chartered institution says, "The sole object of this society shall be to establish and maintain in the

city of Philadelphia a library or depository of books, pamphlets, periodicals, manuscripts, portraits, views, etc., pertaining to the history and present condition of Christianity, and of the Baptist denomination in particular, to cause to be prepared and published from time to time works which elucidate such history; and to collect and preserve all books written by Baptists, or against Baptist faith and practice."

The society is located at 1420 Chestnut Street, Philadelphia. It has in its library over seven thousand volumes, many of which are rare and of great value. It has about one thousand volumes on church history alone, embracing the ecclesiastical records of all lands, ages, and communities; some of these are in the original Greek, Latin, and French. Many of the works of the Fathers and of the writers of the Middle Ages are on the shelves of the library. Its collection of minutes of Associations and Conventions, of denominational periodicals, and of pamphlets is preserved in twelve hundred bound volumes, and in one immense list of assorted and labeled packages. It has hundreds of manuscripts written by Baptists, chiefly upon historical subjects.

In the library, in pamphlets and volumes, there are the writings of about three thousand Baptist authors. The works of Catholics, Episcopalians, Presbyterians, Methodists, Lutherans, German and Dutch Reformed, Mennonites, Seventh-Day Baptists, Free-Will Baptists, Friends, Dunkards, Disciples, Adventists, New Church (Swedenborgian), Unitarians, Universalists, and Shakers belong to the society. It has nearly seven hundred autograph letters of distinguished Baptists, including one written by the illustrious founder of Rhode Island, Roger Williams. It has also some eight hundred portraits of Baptist worthies.

In its library the society has the Isaac Davis alcove, supplied with works by the income of an endowment gift made by the Hon. Isaac Davis, of Worcester, Mass., and the Francis Jennings alcove, containing six hundred volumes, the gift of Mr. Jennings. This alcove is chiefly filled with works containing the hymns, poems, and other productions of the authors of sacred songs. The hymnologist finds in it an unusual and invaluable treasure.

The use of the library is without charge. The right to borrow books belongs to members only. The privilege of consulting its works is fully accorded to proper persons by the officers.

The collection of the society is constantly increasing by purchases in Europe and America, and by the gifts of friends, and it is hoped that at no distant day a fire-proof building will protect its sacred riches from the ever-threatening calamity of a city conflagration.

The Rev. William Cathcart, D.D., is president of the society; Rev. I. Newton Ritner, secretary; and H. E. Lincoln, librarian.

The Wagner Free Institute of Science was founded in 1855, by Professor William Wagner. Professor Wagner, during his many tours, which extended over the four great continents, made large collections of minerals, shells, plants, etc., aggregating millions of specimens. The cabinets containing these various specimens, carefully classified, had been placed in a building erected for that purpose on his own premises, near the site of the present buildings belonging to the institute. Having thrown open to the public the hall containing this collection, Professor Wagner delivered for a number of years a course of lectures upon various phases of natural history, using his specimens as illustrations. The enterprise having met with gratifying success, he determined to enlarge its scope by establishing a free school for the study of practical scientific subjects. Acting upon this idea, application was made to the Legislature for a charter, which was granted March 9, 1855, whereby was incorporated "The Wagner Free Institute of Science." To this institution Professor Wagner donated his admirable cabinet collection, together with a large scientific library. Added to these liberal donations was a munificent monetary endowment from the founder.

In the infancy of this institution the Councils of Philadelphia, foreseeing the advantages that must accrue to the cause of public education from the enterprise, granted the use of a hall and anterooms in the building at the corner of Thirteenth and Spring Garden Streets, known as Spring Garden Hall. Here the public inauguration of the Wagner Free Institute of Science took place on the 21st of May, 1855.

On this occasion addresses were delivered by James Pollock, then Governor of Pennsylvania; by Robert T. Conrad, then mayor of Philadelphia; by the Right Rev. Alonzo Potter, D.D., bishop of the diocese of Pennsylvania; by William H. Allen, LL.D., president of Girard College, and others.

A faculty, consisting of well-known scientific gentlemen, was organized, and the first regular term of the institute began on the first Monday of October, 1855, and continued, with a vacation of two weeks, until the 18th of June, 1856. The first anniversary was commemorated on the 21st of May in the latter year.

During the succeeding sessions of 1856–58, and up to March 26, 1859, the lectures were continued, with only brief intervals of vacation, at the Spring Garden Hall. The building was usually filled to overflowing, and the lectures were highly appreciated. They embraced in their scope mineralogy, geology, anatomy, physiology, palæontology, ethnology, agricultural chemistry, civil engineering, natural philosophy, botany, etc. During most of this time twelve lectures were delivered each week, "without money and without price," to the multitudes that assembled to avail themselves of their enlightening influences. Large additions were also made to the cabinets and library of the institution.

The use of Spring Garden Hall was recalled, how-

ever, by the City Councils in March, 1859, the building being desired for municipal offices. The closing exercises in that building were held March 26, 1859, at which time a vote of thanks was presented to the City Councils for the use of the hall for so long a period. On the 28th of March, Professor Wagner, with his assistants, commenced removing the collections of the Wagner Free Institute of Science to a room previously rented by him for their reception.

During the autumn of 1859, Professor Wagner, not succeeding in an effort to purchase the Spring Garden Hall as a permanent location for the institute, concluded to erect a suitable building on a part of his own premises, selecting the present site, on the southwest corner of Seventeenth Street and Montgomery Avenue, as the most suitable. The lot appropriated is two hundred and sixty-six by one hundred and seventy-seven feet ten inches, and being his own architect, he adopted the plan of the present edifice, it being one hundred and fifty feet long and sixty feet wide, and of a height admirably proportioned.

The ceremony of laying the corner-stone took place June 2d, and was conducted by Professor Wagner, assisted by Professors Henry T. Child, M.D., J. W. Burns, Charles A. Leech, M.D., H. R. Warriner, William Ashman, and Judge William D. Kelley. It consisted in the laying on of their hands, and dedicating the institution to the pursuits and advancement of science for the benefit of citizens of Philadelphia forever; this college to be called the Wagner Free Institute of Science.

The work of constructing the new building progressed steadily, although somewhat retarded by the civil war, until its completion in 1864, when the museum and library collections of every variety and description, then or subsequently properly labeled, were tastefully arranged in the capacious apartments that had been prepared for them with so much perseverance and care.

The building as completed is a handsome, as well as a substantial, one. The lecture-room, which enjoys excellent acoustic properties, accommodates about thirteen hundred people. Adjoining the latter is the laboratory, amply supplied with all modern appliances suitable for scientific investigation. The eight professors' apartments and recitation-rooms are large and convenient. The museum is capacious and admirably fitted for displaying the cabinets which it contains. The building cost about forty-one thousand dollars, the lot sixty thousand dollars, the cabinets, collections of natural history, and philosophical instruments are estimated at two hundred and fifty thousand dollars, making the aggregate value of the college building and contents three hundred and fifty-one thousand dollars.

From July, 1864, at which time the building had assumed a sufficient degree of forwardness to admit of its being used, as it was not deemed best to commence its operations as a comprehensive technological college at that time on account of the great number of young men then absent in the army, Professor Wagner, desirous of rendering the building as serviceable as possible, threw open its lecture-room for the use of the various religious denominations of the city, on Sundays, up to May, 1865.

Prior to the date of the formal opening of the new building, application was made to the Legislature for an amendment to the act of incorporation passed in 1855. Under date of March 30, 1864, a supplementary act was passed by the Legislature making certain changes in the charter of the institute, whereby its scope was greatly enlarged. Indeed, the last-named enactment may be said to have constituted an entirely new charter for the institution. Under this new charter the institute is empowered to assume and exercise the powers of a university.

The inauguration or opening of the Wagner Free Institute of Science, in the new building, took place May 11, 1865, at 3.30 P.M. Col. W. B. Thomas was chairman, and Dr. Charles Gaunt secretary of the meeting. After prayer by the Rev. Dr. Adams, Col. Thomas explained the object of the meeting. Professor Wagner then made a few appropriate remarks, tendering the deed of the institute and lot to the board of trustees, then acting under the supplementary act of incorporation, approved March 4, 1864. The trustees consisted of Robert Cornelius, D. Rodney King, J. Vaughan Merrick, Charles J. Stillé, Samuel Wagner, Jr., Henry Coppée, and William Wagner. The deed conveyed the lot in trust to these gentlemen, together with the buildings, cabinets of natural history, philosophical instruments, specimens of geology, mineralogy, botany, and anatomy, chemical apparatus, the palæontological specimens, drawings, paintings, engravings, maps, diagrams, library, and statuary, on condition that they should be forever used for the instruction and improvement of the citizens of the United States in practical science.

The following is a schedule of the property donated to the institute by Professor Wagner:

The hall of the institute and lot of ground on which it is situated, one hundred and seventy-seven feet ten inches front by two hundred and sixty-six feet deep, at the southwest corner of Seventeenth Street and Montgomery Avenue, now worth one hundred and fifty thousand dollars.

A lot of ground on the northeast corner of Seventeenth Street and Montgomery Avenue, one hundred and seventy-seven feet ten inches by two hundred and one feet, worth thirty-five thousand dollars.

Five hundred and fifty thousand specimens of minerals, collected from all parts of the inhabitable earth. This collection covers the whole field of mineralogy, and is one of the most valuable in the United States.

Five hundred and fifty thousand specimens of geologic and organic remains, of rare value to the student, illustrating as they do the various races

which are known to have flourished in the earlier geological periods.

Four hundred thousand specimens of recent shells, for the purpose of comparison with their extinct genera, found in the various strata of the earth's crust.

Two hundred and twenty-five thousand specimens of dried plants, constituting an extensive and valuable herbarium for botanical illustration.

A large and well-arranged series of diagrams, illustrative of various topics in natural history, and of geological phenomena.

Professor Wagner's library, philosophical apparatus, maps, and cabinet cases.

Four houses and lots of ground in Eleventh Street below Chestnut, worth thirty-five thousand dollars.

The cabinets, collection of natural history, philosophical apparatus, etc., worth two hundred and fifty thousand dollars.

On May 15, 1865, at five P.M., the first course of free lectures commenced in the new building, and embraced chemistry, anatomy, geology, natural philosophy, physiology, mineralogy, and mining. In the following September an effort was made to commence a regular collegiate course, embracing geology, mineralogy, mining, civil engineering, mathematics, drawing, chemistry, and natural philosophy. Owing, however, to the unsettled state of the country because of the Rebellion, the enterprise was abandoned for the time, and will only be renewed when the plans, now fast approaching completion, are fully matured.

The course of free lectures commenced again Oct. 2, 1865, and continued until late in December.

Since Jan. 1, 1866, two courses of free lectures have been delivered each year, embracing most or all of the branches of natural science. The spring courses have commenced about the 1st of March, and have usually terminated the latter part of June; the autumn courses about the 1st of October, closing the last of December. The hour has been changed from five to eight P.M. Six lectures have generally been given each week.

The institute owns an excellent library, largely composed of scientific works. At the present time the number of volumes comprising this collection approximates eighteen thousand.

The Numismatic and Antiquarian Society was organized on the 27th of December, 1857, by seven gentlemen, who saw that there existed no society in America distinctively devoted to numismatic investigation. With this object in view these men resolved to fill the void by the establishment of an association. A committee was appointed to frame a constitution and by-laws, which reported at a special meeting, held Jan. 1, 1858, and the Numismatic Society came into being. On February 19th of the same year the General Assembly granted a charter to the society, not, however, without considerable opposition. On March 23, 1865, the name was changed to that which it at present bears.

The society has had but two presidents from the date of its foundation, Joseph J. Mickley, until 1867, and since that time Eli K. Price. To the enlightened zeal of the latter is due largely much of the present high standing of the association. Its ranks have been filled with the most illustrious men of America and Europe, and its contributions to antiquarian research have been frequent and worthy of note. The most important of its actions was the adoption, in September, 1858, of a new scale of measurement for coins and medals in place of that of Mionnet, which is the one in general use throughout Europe. This scale, proposed by Alfred B. Taylor, has been, after its reception by the society, generally adopted throughout the United States, and is known as the "American scale."

In April, 1866, the society petitioned Congress to render the national coinage of more interest and permanent value than a mere succession of insignificant pieces of metal. The petition was presented by Senator Reverdy Johnson, honorary vice-president for the State of Maryland, but as yet no step in the desired direction has resulted from the society's action.

On New Year's day, 1879, the society celebrated its twenty-first anniversary. Certain members of the society desired to mark this epoch, and accordingly caused to be struck a commemorative medal, which, while it should chronicle this event, should also be made to testify the respect and regard entertained for the society's president, Eli K. Price. When the medal was prepared, a special meeting of the society was held on the 20th of March, 1879, and an impression in silver, the only one struck in that metal, was formally presented to him. A number of the medals were sent, in the name of the society, to kindred associations in this country and in Europe.

The twenty-fifth anniversary of the founding of the society occurred on Jan. 1, 1883, but as that day was a legal holiday it was deemed advisable to defer the formal celebration of the event, which had been previously agreed upon, until the next regular meeting on the first Thursday in January. Accordingly, on Thursday, January 4th, the society assembled at its hall, at the southwest corner of Eighteenth and Chestnut Streets, for the purpose of commemorating its institution. Two very admirable papers were read, one by Daniel G. Brinton, M.D., and the other by Rev. John P. Lundy.

The meeting was largely attended by the members of the society and by a number of visitors.

The society has done much good work in its quarter of a century of effort and investigation. Subjects previously shrouded in darkness have been illumined with the light shed upon them by the careful investigators belonging to the association, while much useful and instructive information has been imparted.

The purposes of the association are fully set forth ...ar recently addressed to kindred societies,

United States consuls, Indian agents, missionaries, and scientific men in fields favorable for archæological researches, soliciting their aid in gathering information concerning the latest discoveries of coins, antiquities, ancient manuscripts, and aboriginal remains of scientific interest, in which it is said,—

"The society desires to collect data relative to aboriginal peoples in any locality, concerning their habits, customs, and ceremonies; their myths, traditions, and religions; their dances, music, and musical instruments; and the society would be glad to receive for its museum contributions of antiquities or objects of ethnological interest, which, when received, will be fully credited to the donor and conspicuously exhibited."

The coins of the society are on exhibition at Memorial Hall, Fairmount Park, in the Pennsylvania Museum and School of Industrial Art. The transfer took place in 1878. The collection here constitutes the only public exhibition of coins in the United States, outside of the United States Mint in this city.

Among the deposits which have been placed in Memorial Hall is the entire cabinet of coins and medals belonging to the American Philosophical Society. For nearly a century this collection had been in process of formation, and many interesting and valuable coins had been donated to it by prominent persons from time to time, until, in 1878, it became so cumbersome that the society transferred it to the custodianship of the Numismatic and Antiquarian Society.

The society's library contains something over three thousand books and pamphlets, chiefly devoted to numismatic and antiquarian subjects. Access to it is denied to all save members, the number being limited to one hundred and fifty. Its cabinet of coins and medals, including many very ancient ones, numbers about eight thousand, while its cabinet of antiquities contains over five hundred relics. It has also collections of engravings, autographs, maps, and miscellaneous objects of value and interest.

The Friends' Free Library and Reading-Room (Germantown) was thrown open to the public in 1869. The nucleus of this library came from the venerable meeting of Friends, which has so long been established at Germantown. Since the date of organization, partly through purchase and partly from donations, the library has been enlarged from about two thousand seven hundred volumes until, at the present time, it contains about ten thousand volumes. The library has been the recipient of many generous money contributions during its brief history. Among its chief patrons has been Alfred Cope. It was mainly owing to his liberality that the managers of the library were enabled, in 1874, to erect on the meeting-house property a fine hall, at a cost of about seventeen thousand dollars.

In accordance with the usual custom prevailing in libraries under the direction of Friends, this one contains no works of fiction. Moreover, great care is exercised to prevent the introduction of any books whose moral tone is not of the most unexceptionable character. About six hundred persons use the library, there being a weekly average of about three hundred visitors.

In addition to many valuable books of travel, the library chiefly consists of historical and biographical works.

As intimated in the title of the library, the institution is entirely free, being one of the very few of this class within the corporate limits of Philadelphia. It is solely maintained by voluntary contributions.

Wilson's Circulating Library was established Dec. 1, 1875. At the opening there was a collection of only three hundred books. At present there are over twenty-two thousand volumes in the library. The main library is located at No. 111 South Eleventh Street. There are branches, however, at No. 2039 Ridge Avenue, and at No. 3902 Market Street, and also at Long Branch, Asbury Park, Atlantic City, and Cape May, N. J. These latter stations are, of course, chiefly utilized in the summer season, a transfer system being in vogue, whereby any subscriber at the main library can obtain books at the branch at any one of the summer resorts mentioned. In addition to these sub-stations, the library has a system whereby subscribers temporarily sojourning at Media, Chestnut Hill, Bryn Mawr, Germantown, Fernwood, and other places are supplied with books by means of weekly deliveries and by messenger service.

Books are taken out upon the following terms: By subscription, three dollars per annum, one dollar and seventy-five cents for six months, one dollar for three months; for two books at a time, the additional charge is fifty cents per quarter or two dollars per annum. To non-subscribers, on receipt of deposit, the charge is two cents per day, or ten cents per week. No fines are levied for keeping books longer than a specified time.

Although the quarters of Wilson's Library are unassuming in architectural appearance, yet it carries on a very heavy business, considering the time it has been established. As an evidence of this it is stated that seven thousand dollars' worth of books were purchased in 1883, and that over three thousand volumes were in constant circulation, representing about two thousand subscribers.

The Mutual Library was founded in 1879, as a circulating library. Since its institution it has made substantial progress. It now possesses about twelve thousand volumes, besides a considerable number of duplicates.

The following system prevails relative to the use of books by subscribers and others: Quarterly and annual subscriptions are received on the following terms: three books at a time, three months, one dollar; twelve months, three dollars; six books at a

time, three months, one dollar and fifty cents; twelve months, five dollars.

There are no fines, penalties, or liabilities imposed on subscribers, except for the value of a lost book, on failure to return it after ten days' notice.

In addition to this subscription plan is the check-register system, on the basis of one hundred books for one dollar. Each subscriber, on payment of one dollar, is furnished with a check-register, good for one hundred books, from Class A, being composed of bound copies of standard works and popular novels, or a proportionate number of books from the other classes. The check-register is good for two books at a time from any class until exhausted.

One of the main distinctions of the Mutual Library lies in the fact that it has upon its tables and shelves many copies of all the current magazines, temporarily bound in cloth, which are lent out, as are any other volumes.

When instituted, the Mutual Library was located in the massive granite building of the Mutual Life Insurance Company, at the northwest corner of Tenth and Chestnut Streets. For over a year, however, the library has been located at No. 1104 Walnut Street.

With two or three exceptions, these libraries, of which an historical sketch has been given, contain over ten thousand bound volumes each. In addition to these, there are in the city of Philadelphia a large number of libraries of fair size, some of which have a distinct corporate existence, while others are simply bibliographical collections, owned by various religious, educational, literary, charitable, and penal institutions. These libraries are as follows, each one containing from one thousand to ten thousand volumes:

Name.	Formed.	Class.
Academy of Notre Dame	1858	Academic.
American Sunday-School Union	1824	Theological.
Broad Street Academy	1863	Academic.
Burd Orphan Asylum	1862	Miscellaneous.
Byberry Library	1793	Miscellaneous.
Carpenters' Company of Philadelphia	1736	Miscellaneous.
Catholic Philopatrian Literary Institute	1850	Miscellaneous.
Central High School	1838	Academic.
Christ Church Hospital	......	Miscellaneous.
Christ Church Library	1695	Theological.
Christian Hall Library (Chestnut Hill)	1870	Miscellaneous.
Fifth Ward Grammar-School	1831	Academic.
George Institute	1872	Miscellaneous.
Germantown Library Company	......	Miscellaneous.
Girard College	1848	Academic.
Grand Lodge of Pennsylvania, F. and A. M.	1787	Miscellaneous.
Hahnemann Medical College	1867	Medical.
Hospital of the Protestant Episcopal Church	1865	Miscellaneous.
House of Refuge (Colored)	1850	Miscellaneous.
House of Refuge (White)	1826	Miscellaneous.
Institute for Colored Youth	1837	Academic.
Institution for the Blind	1833	Academic.
Institution for the Deaf and Dumb	1833	Academic.
James Page Library Company of Kensington	......	Miscellaneous.
Kensington Institute	1853	Miscellaneous.
Keystone Public Grammar-School	1831	Academic.
La Salle College	1868	Collegiate.
Library and Reading-Room Association (Twenty-third Ward)	1857	Miscellaneous.
Lincoln Institute	1866	Miscellaneous.
Locust Street Grammar-School	1831	Academic.
Mechanics' Institute of Southwark	1852	Miscellaneous.
Moyamensing Literary Institute	1853	Miscellaneous.
Northern Home and Associated Soldiers' Orphans' Institute	1868	Miscellaneous.
Northwestern Grammar-School	1831	Academic.
Odd Fellows' Library Company	......	Miscellaneous.
Penitentiary, Eastern District of Pennsylvania	1829	Miscellaneous.
Pennsylvania Hospital for the Insane	1841	Miscellaneous.
Philadelphia Almshouse	1808	Medical.
Philadelphia City Institute	1851	Miscellaneous.
Philadelphia College of Pharmacy	1821	Medical.
Philadelphia County Prison	1844	Miscellaneous.
Philadelphia Divinity School (Protestant Episcopal)	1865	Theological.
Presbyterian Board of Publication	1838	Miscellaneous.
Roxborough Lyceum	1857	Miscellaneous.
St. Joseph's College	1851	Collegiate.
St. Vincent's Seminary	1868	Academic.
Shakespeare Society	1851	Miscellaneous.
Sixth Ward Public School	1831	Academic.
Soldiers' Orphans' School	1866	Miscellaneous.
Southwestern Grammar-School	1831	Academic.
Tabor Mutual Library	1860	Miscellaneous.
Teachers' Institute	1867	Miscellaneous.
Theological Seminary (Evangelical Lutheran)	1864	Theological.
United States Mint	1793	Miscellaneous.
University of Pennsylvania, Medical Department	1765	Medical.
University of Pennsylvania, Philomathean Society	1813	Miscellaneous.
University of Pennsylvania, Zelosophic Society	1829	Miscellaneous.
West Philadelphia Institute	1853	Miscellaneous.
Women's Hospital	1863	Medical.
Young Ladies' Institute	1855	Academic.
Young Men's Christian Association	1854	Miscellaneous.

CHAPTER XXXVII.

RELIGIOUS DENOMINATIONS.

THE SWEDISH CHURCH.

CHRISTIANITY in Sweden and Norway dates back to the days of the viking, King Olaf, and Bishop Sigfrid, who, in the year 1000, planted the "Cross of the White Christ" in the domains of Odin and Thor. Early in the sixteenth century the church was reformed by the hero-king, Gustavus Vasa, at the famous Diet of Westeräs, adopting the Lutheran faith in spirit, but retaining still the traditional Episcopal form. This was the beginning of the modern Swedish Church, and therefore it is that, as to the form of church government, they stand in a certain affinity to the Protestant Episcopal Church, while in doctrine they are unequivocally Lutherans. From the middle of the last century up to the war of independence the Swedish pastors and congregations were in nearer intercourse with the Lutherans and participated in their Synodical Conventions. Swedish immigration and language more and more disappearing, the influence of the Episcopal Church increased under the assumption that there was between Episcopalians and Lutherans no difference as to doctrine.

The early establishment of the Swedish Church in America is due to the far-sighted policy of King Gustavus Adolphus, the great Protestant soldier and statesman, whose death at Lutzen probably changed the political and religious history of Northern Europe. King Gustavus gave a charter in 1626 to the first

West India Company, and arranged for a colony in America where religious and political freedom should be enjoyed. Efforts were to be made to Christianize the savages. In 1638, after the king's death, the first party of immigrants were sent out by Chancellor Oxenstiern in the "Griffin" and the "Key of Calmar." They settled on the Delaware River, built Fort Christina (Wilmington), and a church within its inclosure. Rev. Reorus Torkillus was the clergyman. He seems to have gone to Virginia soon after, and was absent four years, was married and then returned, preaching at Fort Christina till his death, in 1643. Governor John Printz built the "hemlock log fort" on Tinicum Island, and brought as chaplain Rev. John Campanius (February, 1643). The latter's instructions read,—

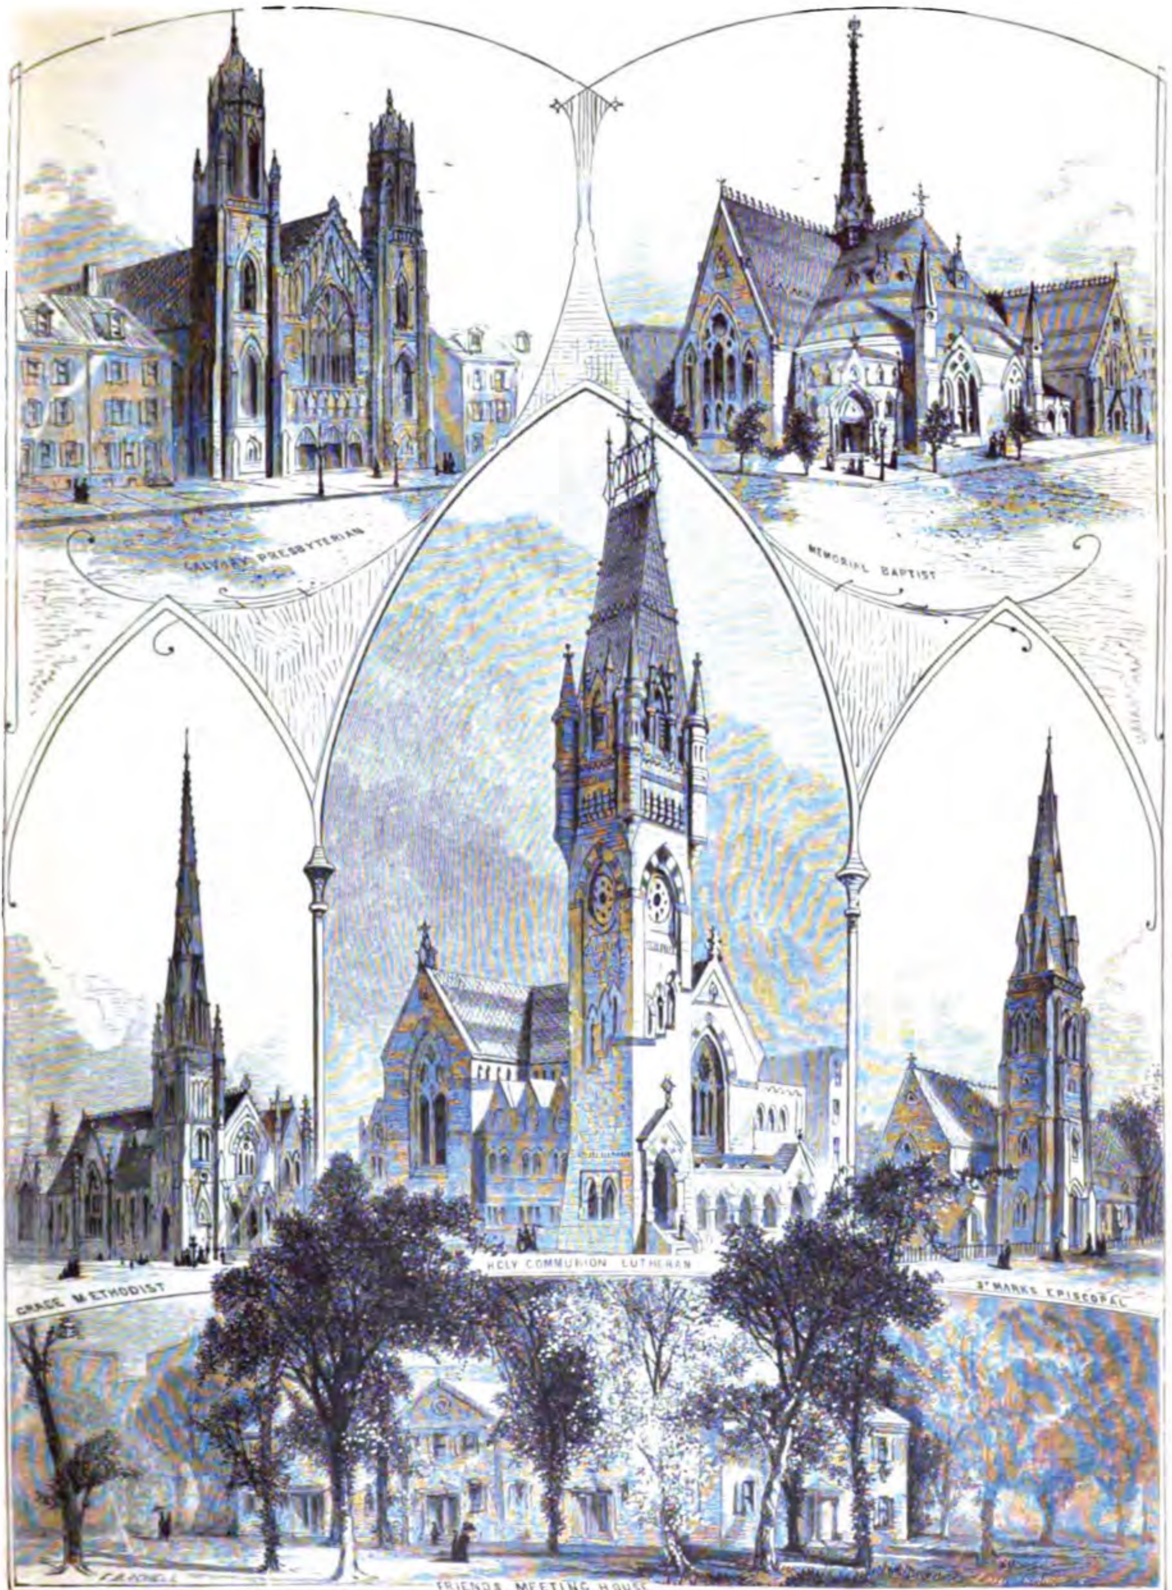
"He must labor and watch that he renders in all things to Almighty God the true worship which is his due, the glory, the praise, and the homage that belong to him, and take good measures that the divine service is performed according to the true confession of Augsburg, the council of Upsal, and the ceremonies of the Swedish Church, having care that all men, and especially youth, be well instructed in all the parts of Christianity, and that a good ecclesiastical discipline be observed and maintained. With respect to the Dutch colony which resides and is established in the country of her majesty and the crown, the government must not disturb what has been obtained in the aforesaid Court of her majesty, with regard to the exercises of the reformed religion."

Especial care was also to be shown toward the Indians to instruct and civilize them. Campanius preached in the fort, and also in a room of the Governor's mansion. In 1646 the first Lutheran Church on this continent was built on Tinicum Island, below Philadelphia, of wood, and was consecrated September 4th. The first cemetery of the colonists was laid out adjacent. Meanwhile, Campanius, zealous and capable, had studied the native language and begun the translation of Luther's catechism, the first translation of any sort into any Indian dialect. This he finished after his return to Europe. His capacity for this work is shown by the fact that he adapted his phrases to the Indian customs, requirements, and understanding. For instance, in the Lord's Prayer, instead of writing "give us our daily bread," he paraphrased it, "give us a plentiful supply of venison and corn." The Rev. Reorus Torkillus had made no effort to instruct the Indians, but the first sermon of Campanius had a curious effect upon those children of the forest. The story is told by his grandson, Thomas Campanius Holm:

"When for the first time he performed divine service in the Swedish congregation, the Indians came to hear him, and greatly wondered that he had so much to say, and that he stood alone and talked so long, while all the rest were listening in silence. This excited in them strange suspicions. They thought everything was not right, and that some conspiracy was going forward amongst us, in consequence of which my grandfather's life and that of the other priests were for some time in considerable danger from the Indians, who came daily to him and asked many questions."

The other priests alluded to were Rev. Lars (Lawrence) Carolus Lokenius (Lock) and Rev. Israel Holgh. The latter took the place of Campanius, who left New Sweden May 16, 1648. Holgh only remained a short time. Lokenius made a bad record. In 1660 he was fined by Director Beekman fifty guilders for marrying a couple without the usual proclamations, and against the will of their parents. In 1661 his wife eloped with one Jacob Jongh, carrying off some of the goods of her husband. Precisely one month afterward he applied to Director Beekman to marry again, his intended bride being a blooming Swedish girl of seventeen. Beekman refused, but three weeks afterward Lars appeared again for approbation of his marriage, "as the situation of his family imperiously required it." Two months later permission for a divorce was granted by Governor Stuyvesant at New York. No sooner did Lokenius learn this than, anticipating the official action of the Court of Magistrates, which had not yet allowed the divorce, he put an end to his doubts and uncertainties by "marrying himself!" Upon this the court at Altona declared the marriage "null, void, and illegal," he was fined, and an appeal was disregarded. Lokenius appears again in 1663, in violent and successful opposition to the preaching of Rev. Abelius Zetscoven, who had been called from New York. About this time two Swedish clergymen, whose surnames are unknown, visited the colony. Lokenius retired about 1668. His successor was Rev. Jacobus Fabritius, a turbulent character, of uncertain nationality, who had arrived in New York in 1669, and was suspended from preaching in Albany. About 1670 he went to the Delaware.

In 1674 he made himself amenable to the law for marrying a couple without previous proclamation, and by committing an assault and battery upon a woman in her own house. He begged Governor Colve and the Council for mercy. The marriage was declared void, and for the assault he was fined "two beavers and expenses" and suspended for one year. He begged liberty to baptize during his suspension, and the Albany Record says he was "excused." In 1675 a warrant was issued against him as one of the ringleaders in a riot at Delawaretown, and he was again suspended. This disqualification was afterward taken off, and we find that in 1677 the Rev. Jacobus Fabritius became the first clergyman who exercised sacred functions in Philadelphia. He was called to Wicaco Church, where he first preached in Dutch on Trinity Sunday, 1677. In the "Conspiracy of the Long Finne," 1679, it is said that "the little dominie," supposed to be Fabritius, was concerned. Until 1675 there had been no church within the present boundaries of Philadelphia. Crainehook, New Castle, and Tinicum were the only churches west of the Delaware. Governor Andros promulgated an order from New Castle in 1675, directing that a church, or place of meeting, be built at Wicaco, by authority of the court, to be paid for by general tax. This order does not seem to have been complied with by the erection of a new building, nor is there anything to show that a tax was levied for the purpose. The congregation was therefore compelled to



CHURCHES.

Digitized by Google

make other arrangements, so, in 1677, they took an old log block-house, built in 1669, and fitted it up. It had "loop-holes for defense," and was a very plain structure, so neglected and weather-worn that in 1679 it was necessary "for Upland Court to order that the members of the congregation at Wicaco should be required to contribute their share to the expenses of repairs." The congregation brought fire-arms with them to church, ostensibly to shoot wild game that they might meet on the road. Even after the congregation took possession, the old house was sometimes used as a refuge. Tradition preserves the story that an attack upon the settlement was begun by some Indians while the men were away, but the women, then soap-making, fled to the block-house, and kept them at bay, chiefly with boiling soap, till the men returned from the fields, and the Indians fled.

Rev. Jacob Fabritius, by this time old and feeble, preached here for fourteen years, during the last nine of which he was totally blind. He preached in Dutch, which most of the Swedes understood. Penn's government superseded that of New York in 1682, the year that Fabritius became blind, after which Andrew Bengtson acted as reader. Charles Christopher Springer was reader at Christina.[1] From all available sources, we must suppose that the religious ceremonials among our early Swedish population resembled, in many respects, those of the Catholic Church. Robinson's account of Sweden, published in 1694, speaks of the ecclesiastical peculiarities of the worship, and says that the churches were decorated with sculptures, paintings, and gilding, and with rich altar-cloths, and that the clergy appeared in copes and other vestments. Consett, who traveled in Sweden in 1789, speaks of St. Nicholas' Church, at Stockholm, as being decorated with costly ornaments of silver and gold, and says, "As the Lutheran profession is very different from that of the Church of Rome, I was much surprised to find the Popish mode of worship, with respect to external splendor, so much adopted in these churches." Even in the old block-house at Wicaco there probably appeared rich vestments that had first seen the light in some of these old Swedish churches.

The Wicaco congregation was very poor, and illy supported Fabritius. In the colonial records, 19th of Fourth month (June), 1685, is a note of an application by Jacobus Fabritius to keep an ordinary (tavern). The Council, however, refused to grant the request. The dominie was probably reduced to the necessity of trying some other means of obtaining a livelihood. William Penn, in a letter to his steward, James Harrison, tells him that he may procure "fine smoked shads of the old priest in Philadelphia." There is still in existence a certificate of marriage performed by Fabritius in July, 1687, "according to the canon of the Church of England," the parties being John Rambo, of Haxburgh, now Hamburg, in High Germany, and Hathawdnah Hadowirk, of Saldazda, in High Germany. His death probably occurred in 1691 or 1692. Before this, however, the congregation wrote two letters to Sweden for another clergyman, and receiving no answers, wrote in 1691 to the Dutch Lutherans as follows:

"Very revered, very learned, very honorable consistorial senators of the unaltered Augsburgian confession at Amsterdam:

"With a cordial and respectful salutation, we, of the Swedish nation in Pennsylvania, notify that the revered and learned magister, Jacob Fabritius, who, in 1677, in our vocation commenced the clerical service, did, during five years, while having his eyesight, and for nine years succeeding his loss of sight, diligently and faithfully attend us by preaching and administering the sacraments according to the Orthodox confession of Augsburg, and by an exemplary life, but must now resign his trust on account of his blindness and the infirmities of age. You will easily judge, venerable sirs, how forlorn will then be our situation. Like sheep without a shepherd, sick without a physician, we shall be exposed to many dangers.

"We therefore supplicate you, in consideration of this and our happy fellowship in the Lutheran communion, to provide us with a proper Swedish character, as we know that many students of various nations are at Amsterdam waiting for promotion. And as a laborer is worthy of his reward, we stipulate for the coming minister a yearly salary of one hundred rix dollars, with a house and glebe for his maintenance. If a qualified person is not found in Amsterdam, we humbly request your kind aid to procure a clergyman from Sweden by letters to the proper authorities."

Receiving no reply to this, Andrew Bengsten and Charles Springer, the readers, were their only dependence. About this time Andrew Printz, a nephew of old Governor Johan Printz, of Tinicum, visited the Delaware. On his return to Sweden, he informed John Thelin, postmaster at Gottenburg, of the fact of there being a colony of Swedes settled on the Delaware, and also their need of clergymen. Thelin told a nobleman, who laid the matter before the king, and he was soon able to write a long letter to the Swedish colonists, in which he said,—

"His Majesty took therein a special and particular interest, and resolved that he would send unto you, not only ministers, but also all sorts of godly books, and would willingly have used for an agent in accomplishing these purposes the same man who had related these things. But the Lord knoweth what became of that man, for he could not be seen or heard of afterward. Therefore I do now take the boldness on myself, being acquainted with an elderly woman here, who says that she has a brother living among you, Peter Gunnarson Rambo [settled near Shakamaxon, where a stream was named after him, "Gunnar's Run"], through whom this letter may be received, that I may know from you the truth of what has been related, and in what way such ministers may be sent to you, desiring that you would let it be distinctly known of what you are in need.

"We desire to know the number of ministers and books which you desire to have, and also how many you are in number, and how many churches you have. About eight or ten years ago the Governor, William Penn, petitioned the Swedish Ambassador at London for ministers and books for you, but for some cause or other the request was not carried into effect. Be not negligent in the things which pertain to your everlasting happiness, for you may certainly see that the Great God doth as soon help through friends that are humble as those that are great and powerful. I commend you to the holy protection of Almighty God, both in soul and body. I shall expect to hear from you by the first opportunity that may offer, and remain your most loving friend and servant,

"JEAN THELIN.

"GOTTENBURG, 16th November, 1692."

[1] Clay's "Annals of the Swedes."

This letter gave the Swedes great pleasure, but they decided to lay the whole matter before Lieutenant-Governor Markham, who approved of the plan, and offered to write to Penn in London to talk the subject over with Lejoncrona, the Swedish ambassador. Charles Christopher Springer then prepared a reply to Mr. Thelin, which was dated "Pennsylvania, 31st of May, 1693," and signed by thirty persons, heads of families. It throws much light upon Swedish life and manners at that time in Pennsylvania, and reads as follows:

"Honored, loving, and much respected friend, John Thelin, his Majesty's loyal subject, and Postmaster at Gottenburg.

"Your unexpected and welcome letter, dated Gottenburg, 16th November, 1692, came to hand the 23d of May, 1693, and made us heartily rejoice that it had pleased Almighty God, through that young man, Andrew Prints, to make known our condition to our friends in Sweden. We rejoice that his Majesty doth still bear unto us a tender and a Christian care. Therefore we do heartily desire, since it has pleased his Majesty graciously to regard our wants, that there may be sent to us two Swedish ministers who are well learned in the Holy Scriptures, and who may be able to defend them and us against all false opposers; so that we may preserve our own true Lutheran faith, which, if called to suffer for our faith, we are ready to seal with our blood. We also request that these ministers may be men of good moral lives and characters, so that they may instruct our youth by their example, and lead them into a pious and virtuous way of life.

"Further, it is our humble desire that you would be pleased to send us three books of sermons, twelve Bibles, forty-two Psalm-books, one hundred tracts, with two hundred catechisms, and as many primers, for which, when received, we promise punctual payment at such prices as you may think fit to order. We do promise, also, a proper maintenance to the ministers that may be sent us; and when this letter is gone, it is our intention to buy a piece of land that shall belong to the church, and upon which the minister may live.

"As to what concerns our situation in this country, we are for the most part husbandmen; we plow and sow and till the ground, and, as to our meat and drink, we live according to the old Swedish custom. The country is very rich and fruitful, and here grows all sorts of grain in great plenty. So that we are richly supplied with meat and drink, and we send out yearly to our neighbors on this continent and the neighboring islands, bread, grain, flour, and oil. We have here also all sorts of beasts, fowls, and fishes. Our wives and daughters employ themselves in spinning wool and flax, and many of them in weaving, so that we have great reason to thank the Almighty for his manifold mercies and benefits. God grant that we may also have good shepherds to feed us with His holy word and sacraments.

"Further, since this country has ceased to be under the government of Sweden, we are bound to acknowledge and declare, for the sake of the truth, that we have been well and kindly treated, as well by the Dutch as by his Majesty the King of England, our gracious sovereign. On the other hand, we of the Swedes have been and still are true and faithful to him in words and deeds. We have always had over us good and gracious magistrates, and we live with one another in peace and quietness."[1]

[1] This letter also contained a list of the old Swedish immigrants and of the later arrivals, numbering in all one hundred and eighty-eight families and nine hundred and seven individuals. The names of the old Swedish immigrants are marked with a star.

A list of the Swedish families residing in New Sweden in the year 1693, with the number of individuals in each family.

King Charles XI. received this letter and wrote the following to Dr. Olaus Suebilius, archbishop of Upsal:

"Charles, by the Grace of God, King of Sweden, etc., etc.

"Our faithful and well-beloved Archbishop: We send you herewith a letter from the Swedish colony on the river Delaware to John Thelin, the Postmaster at Gottenburg, and by him delivered to the Council of State. From which we have seen, with great pleasure, that this people have a pious zeal for the preservation to themselves and their children of the pure evangelical religion. We are by this moved to grant them aid, and to favor their petition for obtaining two clergymen. It is therefore our pleasure that you will carefully select for them such good and learned pastors as they desire to have, and it is our will that as soon as they shall be ready for their voyage they be provided with a passage

and the necessary funds to defray their expenses. You will also procure the Bibles, homilies, common prayer and hymn books, catechisms, primers, and spiritual treatises that are desired, so that the ministers may take these books along with them, which we will present free of expense. We are persuaded that you will be solicitous to procure faithful laborers in the vineyard of the Lord. In so doing you will promote the glory of God, and also give us great satisfaction. We commend you kindly to Almighty God. Given at Stockholm the 18th of February, 1696.

"CHARLES."

The archbishop chose Rev. Andrew Rudman, Rev. Eric Biork, and Rev. Jonas Auren, the latter being ordered to return in a few months with a careful report of the country. Rudman and Biork were expected to return after a number of years' service and receive church preferment.

The missionaries took with them, as the king's gift, "thirty Bibles,—ten printed by Vankis, and twenty by Keiser,—six books of homilies, two cabinets of treasures, two of Mœller's, two of Lutheman's, one hundred and fifty manuals, one hundred religious treatises of different kinds, viz., twelve by Kellingius, Garden of Paradise, Atlice, etc., one hundred books of common prayer and hymns, two ecclesiastical acts, two church regulations, one hundred catechisms of Archbishop Suebilius, three hundred compends of Archbishop Suebilius, four hundred primers, five hundred catechisms in the Indian language." In addition to this the king appropriated three thousand dollars for the expenses of the missionaries, and the director of the custom-house was appointed to provide a good ship for their passage. The ship "Palamboom," Capt. Hegen, was selected for the purpose. The three clergymen then waited on the king with the most respectful and affectionate thanks for his favors. He gave them his hand and bid them God speed. They also received a long commendatory letter from the venerable Upsala archbishop.

Sailing from Stockholm Aug. 4, 1696, they reached the Virginia coast in June, 1697, having been delayed some months in London. Governor Nicholson received them cordially in Annapolis, and a few days later they started for Philadelphia, landing first at Trantown (near the present Frenchtown). Dr. Biork wrote home, saying,—

"On the 29th [of June] we went up to Philadelphia, a clever little town, and waited on the Lieutenant-Governor, William Markham, who received us with great kindness. On the 30th of June we visited the upper congregation, at a place called Wicaco, within two miles of Philadelphia, where the Swedes have a church, in which we gave them an account of our voyage and objects; and, clad in my surplice for the first time in this new country, I delivered a discourse in Jesus' name, on the subject of the righteousness of the Pharisees. In comparing the religious situation of these good people with the congregations of Sweden, it cannot be a wonder that they should be far behind; yet, if God grants us life to mend these matters, so that there will be divine service performed, ordinances administered, and the youth taught the catechism, we hope to find the road plain and easy, which is now rough and difficult. The country here is delightful, as it has been always described, and overflows with every blessing, so that the people live very well without being compelled to too much or too severe labor. The taxes are very light. The farmers, after their work is over, live as they do in Sweden, but are clothed as well as the respectable inhabitants of the towns. They have fresh meat and fish in abundance, and want nothing of what other countries produce. They have plenty of grain wherewith to make bread and plenty of drink. May God continue them in the enjoyment of these blessings. There are no poor in this country, but they all provide for themselves, for the land is rich and fruitful, and no man who will labor can suffer want. The Indians and we are as one people; we live in great friendship with them. They are very fond of learning the catechism, which has been printed in their language; they like to have it read to them, and they engaged Mr. Charles Springer to teach their children to read it. In order to forward our designs, I hope our spiritual fathers will assist us with some of the newly-printed books, particularly two church Bibles, as those we have are not fit to be used in divine service. There are always opportunities between England and this country.

"I cannot mention, without astonishment, but to the honor of these people, that we hardly found here three Swedish books; but they were so anxious for the improvement of their children, that they lent them to one another, so that they can all read tolerably well. None of the books that his Majesty graciously gave us are out of use. They are distributed among the families, who bless the King for that valuable present, for which they are truly glad and thankful. May Almighty God preserve his Majesty, the royal family, and our dear country in peace and gladness. Though distant from it, we shall never cease while we breathe to offer up our prayers for its prosperity."

Rev. Andrew Rudman also wrote home, and his letter also explains many things. He says that, on their arrival at Elk River, the Swedes came more than thirty miles to meetings. He took charge of the Wicaco congregation, and Rev. Mr. Biork of that at Christina. His letter continues:

"The churches are old and in bad condition, wherefore, with God's help, we are endeavoring to build new ones. The lower one is at Christina, the upper at Wicaco or Passyunk. The minister's garden and mansion-house are at the distance of four English miles from Philadelphia, a clever town built by Quakers. The population is very thin and scattered all along the river-shore, so that some have sixteen miles to walk or ride to go to church. Nevertheless, they very regularly attend divine service on Sunday. The houses are built after the Swedish manner. The women brew excellent drink, as in Sweden, and they have also a liquor made of apples or peaches, which they call cider. It is very pleasant to the taste and very wholesome. In order to build our church we are about to raise the sum of four hundred pounds sterling, but that will not be difficult, they are so very glad to have us among them. They look upon us as if we were angels from heaven. Of this they have assured us with many tears, and we may truly say that there is no place in the world where a clergyman may be so happy and so well beloved as in this country. As to the government, it is very mild, and the people live quietly under Governor William Markham, who is exceedingly well disposed toward us. He has reproached us with not going often enough to see him, and has left us quite at liberty as to our church discipline. There are many Swedes employed in the administration of this government. Some of them are counselors, whom they call judges. Many of them are officers,—captains, constables, ensigns, etc. There is plenty of work for us. We are alone. Our congregations are scattered, our youth numerous, and but few that do not require instruction."

The congregation at Christina was stimulated greatly, and by Trinity Sunday, 1697, the dedication sermon of what is now the "Old Swedes' Church of Wilmington"[1] was preached there. It was after-

[1] In regard to this church, begun May 28, 1698, Rev. Mr. Biork gave the following description: "It was inside the walls sixty feet in length, thirty in breadth, and twenty in height. The walls of hard graystone up to the windows three and a half feet thick, above that only two feet. There were four doors, large ones at the west and south ends and two smaller ones on the north. The roof was arched with logs and plastered with lime, with a shingle covering. The pews were of fir, with doors. The choir was circular, and the inner banisters, as well as the pulpit, of walnut. Near the vestry door was a pew for the priest's wife." The church at Wicaco was built by the same mechanics who built the church at Christina. Mr. Ferris says ("Original Settlements on the Delaware") that the building at Christina was finished for the following prices: Joseph Yard, mason and bricklayer, of Philadelphia, for the stone-work a[illegible] [illegible]ilver money. He received altogether £91 4s. 8d.,

wards for a time abandoned. Meanwhile Rev. Mr. Rudman's congregation were undecided whether to build at Passyunk or at Wicaco. The congregation had bought a tract at the former place, really at what is now "Point Breeze," exactly where the lower road to Penrose Ferry strikes the Schuylkill. It was purchased from Andrew Bankson about 1696, cost sixty pounds, and contained eighty acres of land, ten of which were in Punchon's Hook. The money was raised by the sale of the parsonage at Tinicum Island, which brought one hundred pounds, and was divided between the congregations of Wicaco and Christina. The balance was raised by subscription. Afterward sixteen acres were attached to the farm by purchase from Lawrence Cock, for ten pounds, and the tract was occupied by the Rev. Andrew Rudman and his successors, Andrew Sandal, Jonas Lidman, and J. Eneberg. The dwelling (glebe-house) was burned down in 1717 and immediately rebuilt.

OLD SWEDES' CHURCH (GLORIA DEI), PRESENT APPEARANCE.

This building was lately standing, but was abandoned as a parsonage about 1727. It was then rented to different parties for five pounds a year. But after this glebe-land was bought the Swedes near the Schuylkill and at Kingsessing desired that the church should be at Passyunk, while the Swansons and others, living at Shakamaxon and above, wanted it rebuilt on the site of the old block-house church at Wicaco. A meeting was called on the 16th of May, 1698, at which a tedious discussion took place. At length it was proposed to have it settled by lot. "Having by prayer and singing invoked the blessing of God on the undertaking two pieces of paper were prepared, on one of which was written *Wicaco*, and on the other *Passyunk*. These were shaken in a hat and thrown upon the ground, when, upon taking one up and opening it, the name of *Wicaco* appeared. Dissension at once ceased, and all joined in a cheerful hymn of praise. At the same time the agreement was ratified by the following persons signing their names to a suitable instrument of writing, viz.: Andrew Rudman, Capt. Lawrence Cox [Lassy Cock], Andrew Bancson, Caspar Fisk, Peter Rambo, Gustavus Justus, Elias Toy, Michael Lycon, Charles Springer, Andrew Rambo, Matthias Morton, Gabriel Cox [Cock], John Cox, Jr., Hans Boon, Nicholas Lycon, Richard Rhodes, Gunner Swanson, Christian Claeson, Lawrence Holstein, Jonas Biurstrom, witness." But when they tried to procure an addition to the Wicaco tract, so as to own the river front, they failed and new dissatisfaction was shown, so that Mr. Rudman thought of leaving them. At last these difficulties were all conquered, the church was begun, and was dedicated on the first Sunday after Trinity (July 2), 1700, by Rev. Eric Biork, who preached from 2 Samuel vii. 29: "Therefore now let it please Thee to bless the house of Thy servant, that it may continue forever before Thee: for Thou, O Lord God, hast spoken it: and with Thy blessing let the house of Thy servant be blessed forever." A great number of English and others from Philadelphia were present at the ceremony, to whom Mr. Biork also spoke in the English language. A letter sent to Sweden shortly after by the Wicaco pastor said,—

"This church is of the same size as the other, only that one of the corners is shortened in order to make room for a belfry or steeple, which has been begun at the west end, but must remain for some time unfinished, in order to see whether God will bless us so far that we may have a bell and in what manner we can procure it. This church is built of stone to the foundation, but not so good as that of which the lower church is built. The buildings will cost us, according to our reckoning, about twenty thousand dollars Swedish money, and something more, of which I am yet indebted in five thousand dollars, and my colleague is in about the same situation. We have nothing to rely on but the efforts of the congregations to raise that money as well as they can.

"Thus, through God's great blessing, we have completed the great

including £5 for his "morter laborer, the neger." Joseph Yard, for the gable ends above the square of the walls, plastering the inside walls and arched ceiling, and paving the floor, £45. John Smart and John Britt, carpenters, of Philadelphia, for the woodwork, windows, doors, frames, pulpits, pews, roof, eaves, etc., the timber, boards, and iron-work, for £130. They employed John Harrison, joiner and carpenter, of Philadelphia, to make the pews, pulpit, banisters, and other inside work, for £36 10s.

Digitized by Google

work, and built two fine churches, superior to any built in this country, particularly that at Christina, so that the English themselves, who now govern this province and are richer than we, wonder at what we have done. It is but lately that two governors, with their suites, have come to this place and visited our churches. The one is Francis Nicholson, Governor of Maryland, and our great patron; the other is named Blackstone, and is Governor of Virginia. With all this we want some ornamentations for our church, which are not to be procured here, such as a couple of bells, handsome chalices and patterns, and chandeliers or lustres. We have also room for a small organ.

"We hope also that in time we shall have obtained the things that we most want, particularly books. I have at last established a school here, with an able teacher at the head of it, who also serves as parish clerk, an office which I was before obliged to perform."

The building thus erected was looked on as a master-piece. Watson says that it was "a great edifice," and nothing was then equal to it as a public building in the city.

This church was dedicated as the "Gloria Dei Church," and is still standing on Swanson Street, near the former locality of the navy-yard. The cutting down of the street in front has brought part of its cellar wall above the pavement. At first there was no steeple, and the porches on the north and south sides were not a portion of the original church, but were built in 1703, as supports to the walls, and cost one hundred and nine pounds and four shillings. The cupola was erected on the low tower after the bell was procured.[1] The antique font, still in possession of the church, is thought to have been either used in the Tinicum Church or the block-house church at Wicaco. Mr. Clay (1834) says, "There is still preserved in this church, on the front of the west gallery, an antique representation of two cherubs, with their wings spread over what is intended to represent the Holy Bible, on one of the open pages of which is the following passage from Isaiah in Swedish characters: 'The people who walked in darkness have seen a great light,' etc., and on the other page, also in Swedish characters, that passage in which the angels at the birth of our Saviour are spoken of as celebrating the event."

The ground on which the church stands, one acre and a half and five perches, was given to the church by Catharine Swanson, widow of Swan Swanson, and by the daughters of Swan Swanson and their husbands, viz.: Swan Boon and Brigita, his wife, Hans Boon and Barbara, his wife, and Peter Bankson and Catharine, his wife. An acre of ground north of the church, on which the old parsonage stood until 1832, when the present one was built, was given by Hans Boon and Margaret, his wife. June 19, 1719, twenty-five acres, lying at Wicaco, near the church, were bought for ninety pounds of Martha Cock, "to be a parsonage for the pastor and his heirs forever." It is said that this ground extended from the church as far west as Hudson's Lane (now vacated), beyond Tenth Street, being bounded north by Christian Street. The anniversary sermon of the rector in 1870 sums up the landed property of the church at this time, and says that only the grossest carelessness has kept the church from being one of the richest religious organizations in the United States. Besides the twenty-seven and one-half acres above spoken of, the church owned ninety-six acres on the Schuylkill, in the farm tract already mentioned. Papers and documents of almost priceless importance were allowed to disappear. Of the "parson's twenty-five acres" hardly anything remains, and the Schuylkill farm has nearly all been lost.

Rev. Andrew Rudman was, March 18, 1702, superseded by Rev. Andrew Sandel, who was sent from Sweden so as to let Rudman return, but the latter liked the country, and after (on the 19th) preaching his farewell sermon, he accepted a call from the Dutch Church in Albany. In 1705 he was again in Philadelphia, pastor of the Trinity Church, Oxford township, also for a while of Christ Church, in the city. He died Sept. 17, 1708, after eleven years' constant and successful service, and was buried in the Wicaco Cemetery. Rev. Andrew Sandel was a man of violent temper, and his controversy with and assault upon Benjamin Chambers caused the Provincial Council to administer an official rebuke; but the church grew and flourished under his administration. The church repair committee in 1708 consisted of Messrs. Keen, Lycon, Cox, and Bankson, also Peter Deal, a builder. The pews were all rented, and it was ordered in 1705 that members of the congregation who with their families might remove, or who should neglect to attend divine worship, should lose their rights altogether. In the same year the Swedish king sent over a quantity of Bibles, prayer-books, and other religious books.

In 1710, at a meeting of the congregation for the election of vestrymen, the following declaration was made of the duties of these church officers:

"To take care of the church, see to its repairs, and, if necessary, to put up additional buildings.

"To maintain the parochial ordinances and regulations enacted at the general meetings, and to preserve order in time of divine worship.

"To inspect the behavior of the people in their respective districts, admonish those that misbehave, and proceed with them further, if necessary.

"To attend divine worship often, partake of the Lord's Supper, and be edifying examples of all Christian virtues."

The following resolution was adopted in 1710:

"WHEREAS, some when reproved for their sins and are not permitted to break our church rules, hate both the minister and the congregation, and abandon divine worship, therefore resolved, that such shall be several times admonished and warned against the dreadful hazard of their souls; and if they persevere in their malice, shall have no right to the privileges of the church, and if they die without repentance shall not be buried in our cemetery."

In 1711 the congregation of Christ Church worshiped during three Sundays at Wicaco while th

[1] The present bell bears the following inscription:

"Cast for the Swedish church in Philadelphia,
styled 'Gloria Dei,'
Partly from the old bell dated 1643.
G. HEDDERLY, FECIT 1806.
I to the church the living call
And to the grave do summon all."

own church, on Second Street above Market, was being enlarged. They had been offered accommodations in the Presbyterian Church, but preferred the Swedish Church, "and for confirming the unity that existed between the two congregations a Swedish hymn was sung at the English service." The Swedish and English Churches seem to have been on good terms. "On solemn occasions," said Mr. Sandel, "as at the laying of corner-stones of churches, they have always invited us, and conducted themselves as friends to our church."

In 1717 the house at Passyunk being burned down, was at once rebuilt. That autumn the king of Sweden recalled Rev. Mr. Sandel, appointing him to a rectory in Dalecarlia, but the recall was not received till May, 1718, and further delays prevented the farewell sermon and departure of Mr. Sandel until May 7, 1719. Rev. Andrew Hesselius, of Christina Church, and Rev. Abraham Lidenius, of Raccoon Church, were present, and each agreed to preach once a month, Arvid Hernborn, the Sabbath-school teacher, acting as reader on the alternate Sabbaths. This arrangement lasted till November, when Rev. Joseph Lidman, a highly educated man, appointed by the queen of Sweden in May of that year, arrived at Wicaco. With him came Rev. Samuel Hesselius. In 1722 the subject of providing Swedish schools for the children was considered,—one of the last efforts made to maintain the ancient language against the preponderance of the English tongue then in use in the province thirty years. It was resolved the next year to divide the church land lying between the Moyamensing and Passyunk roads into two parts, and to let them as pasture-grounds, the rental to be for the use of the pastor. "Seventy trees, however, were to be reserved for the use of the congregation," whether for shade purposes or for firewood does not appear. In 1725 the pasture-ground next the church was ordered to be leased "to some honest person for the relief of the pastor."

Meanwhile other churches were established. The germ of the Second Swedish Church began in 1705, when the "upper inhabitants made application for occasional services in the winter, because of their distance from the Wicaco Church. Rev. Andrew Sandel officiated there twice that winter. The arragements were little better till 1720. On the 27th of March, in that year, there was a consultation at Gloria Dei between Revs. Andrew Hesselius, Lidenius, Lidman, and Samuel Hesselius. It was proposed to erect congregations at Calcoon's Hook and Neshaminy for the accommodation of the Swedish inhabitants there, and that Rev. Samuel Hesselius should be pastor. Objections being made to this, the proposal was made that Mr. Hesselius should settle at Manating (Manatawny), and the people in that region should support him, to which they cheerfully agreed.

Among the Swedes who settled in this part of Philadelphia County, now a portion of Montgomery, previous to 1726, were Marcus Hulings, Justus Justason, Martin Martinson, Nils Matson, Peter Rambo, Jr., Gunner Rambo, Mounce Rambo, Mathias Holstein, Peter Yocum, Jonas Jonasson, Mr. Kerlin, Mr. Anderson, Mr. Kerst. The church thus established was called St. Gabriel's, or Upper Merion Church. The services for several years were held in private residences. William J. Buck says ("History of Montgomery County") that when the church was finally built it was at Morlatton. "We know the graveyard was used here as early as 1719. The church building was first commenced in 1735, and finished in 1737. Rev. Samuel Hesselius left Morlatton in 1723, going to the church at Christina, which his brother had relinquished, returning to Sweden that year."

The Swedish settlers took little note of public affairs, but early in the eighteenth century accused Penn's agents of a failure to recognize their land claims (held under grants from the Duke of York), and of requiring resurveys, and demanding in many cases a quit-rent. In 1709 a petition to the Assembly upon this subject by the Swedes was signed by the following persons: Zacharias Cock, Eric Keen, John Tanck, Otto Earnest Cock, Peter Peterson, John Aretson, Matthias Nezelius, Anders Bonde, Anders Mortenson, Valentine Kock, Andrew Longacre, John Mortenson, Gabriel Cock, John Stille, Hans George, Morten Mortenson, Gosta Gostason, Hans Bonde, Lors Mortenson, Olle Bonde, Gabriel Friend, John Ellet, John Hindrickson, Matthias Keen.

A petition upon the same subject, sent to the Assembly, in 1722, by several ancient settlers and owners of land, called "the Swedes' petition," contained the following names, which we recognize as Swedish: Andrew Longacre, Andrew Rambo, John Cock, Jonathan Jones, Andrew Jones, John Ellett, Andrew Justa, Christopher Swanson, John Keen, Swan Rambo, Laurence Boore, Charles Cox, Andrew Yocum, Swan Yocum, Andrew Boone, Andrew Hingreson, Hans Boone, David Morton, Peter Longacre, Peter Rambo, Sr., Zachariah Cock, Mathias Niclins, Swans Boone, Hans Toston, Valentine Cock, Swan Justa, Justa Justis, John Swanson, Peter Rambo, Jr., John Orcher.

Rev. Joseph Lidman, at Wicaco, was recalled by Bishop Swedburg, of Upsala, in 1730, preached his farewell sermon on the 24th Sunday in Trinity, set sail shortly after, carrying with him a collection of furs as a gift to the king and the bishop, and retired to a Swedish parish. Rev. J. Eusberg (or Eneberg), then pastor at Christina, preached at Wicaco also. King Frederick, in August, 1732, appointed Rev. Gabriel Falck, who arrived in time to preach Jan. 7, 1733, but left the pastorate that year and went to St. Gabriel's Church. Two successive letters were written to Sweden for a successor, and at last Rev. John Dylander arrived, preaching his first sermon Nov. 6, 1737. Mr. Dylander worked with great zeal,

and increased the efficiency of every church department, but died suddenly in 1741, and another interregnum, this time of two years, followed in the church of Gloria Dei. Revs. John Eusberg and Petrus Tranberg did what they could to supply the vacancy. Rev. Gabriel Nesman was the next pastor from Sweden, and brought over a large supply of books. He began his work Oct. 20, 1743. The gain of the English language over Swedish was more and more manifest.

In the year 1743 the following were wardens and vestrymen of the Church of Gloria Dei: Benjamin Bengtson (Bankson), Martin Garretts, Lars Bure; in 1744, Jacob Bengtson, Peter Jones, Andrew Toy, in place of the above; also Peter Cock and John Henderson, of Philadelphia; Hans Tate and Jacob Archer, of Amasland; Andrew Georgen; in 1745, Andrew Bonde, John Garrett, Jacob Bengtson, Elias Rambo, wardens; Jacob Rambo, Andrew Justis, Morton Morton, vestrymen. The old church building was not kept in a good state of repair during this period. The roof was reported to be out of order in 1725; the doors and pews required speedy repairs in 1727; the windows and shutters were in the same condition in 1728. Part of the church roof was blown off in 1732. In 1748 the church roof was re-shingled on the north side.

The glebe in Passyunk (at Point Breeze) was leased to Peter Cock and Morris Cock in 1731 for four pounds per annum. In 1733 the parsonage house at Wicaco was built, and it was the residence of the Swedish pastors for many years. In 1737 the glebe at Passyunk was leased to Andrew Rambo for five pounds per annum, and the two lots at Wicaco to Jacob Bengtson for £7 10*s*. per annum.

It was resolved during the term of Mr. Nesman that, in case of a vacancy in the pastorship of the Church of Gloria Dei, gratitude to the kings of Sweden required that the arrival of a successor duly commissioned in Sweden should be waited for. On the 22d of February, 1750, word came from Bishop Benzelius, recalling Rev. Mr. Nesman, and appointing Rev. Olaf Parvin, who arrived on the 7th of July on the ship "Speedwell," and preached on the 22d, from Jeremiah i. 7. The provost, Rev. Israel Acrelius, of Christina, Rev. Eric Unander, of Raccoon and Penn's Neck, and Rev. Mr. Nesman officiated at this installation. The former pastor did not return to Sweden until late in 1752.[1]

Rev. Mr. Parlin preached at Gloria Dei, much respected and loved, till the spring of 1757, when Rev. Eric Norderlind became his assistant. In December, after a sudden illness of only four days, Mr. Parlin died. Rev. Mr. Unander, of Christina, preached in English, and a few days later Rev. Mr. Lidenius in Swedish, both from Timothy ii. 4, 6, 7, and 8. Mr. Parlin was buried in the chancel in Wicaco Church, beside Rudman and Dylander.[2] Rev. Mr. Norderlind supplied the church. In 1758, January 22d, the congregation wrote to Upsala, to bishop and Consistory, hoping that the widow and children of Mr. Parlin might be helped. They also asked, as a privilege, that they might be allowed occasionally to have their services in English, the Swedes and English being so intermixed as to make religious instruction in both languages necessary.

The church grew under Mr. Norderlind's ministrations, and large crowds attended. In 1759, Rev. Charles Magnus Wrangel arrived to take charge, and his being provost of the Swedish Lutheran Church, and his intimate friendship with the Rev. H. M. Muhlenberg, the patriarch of the German Lutheran Church in this country, brought him into close relations with the German Lutherans. In 1763 he applied to the Assembly for naturalization, and his petition was granted. During his term a quarrel arose in the congregation. There were many new members, and they found that Swedes and "sons of pioneers" held all the offices. A new charter taking

[1] In 1749 the following advertisement appeared in one of the Philadelphia newspapers:

"GABRIEL NESMAN, minister at Wicaco, advertises that he soon designs to sail for Swedeland, and owes some debts here, and to pay them, as well as support his family and lay up something for his passage home, he intends to open a school for the learned languages, or such philosophical or theological sciences as required, and humbly hopes those who wish to encourage him will meet him at the Indian King, Market Street, on the 9th of December, when they will be waited on by their humble servant, G. N."

In the same paper Mr. Nesman advertised a stray horse; also two pipes of wine for sale at the store of Messrs. Stedman.

In June, 1752, he again advertised as follows:

"I intend, God willing, to leave for Swedeland as soon as possible. I do therefore desire such gentlemen as have any demands on me to bring in their accounts in order to be paid, and those indebted to make speedy payment.

"GABRIEL NESMAN, M.A.,
"Swedish minister.

"N.B.—I have some very good High Dutch in divinity, such as sermons, to dispose of, and other spirit meditations; likewise a horse to dispose of."

[2] The inscription reads,—

"Siste viator, quisque et mortalis funde lachrymas in hoc corruptionis domicilio. Jacet in pace et quiete beate mortuus, vir eruditione conspicuus, a Deo doctus, plur reverendus dus magister Olavus Parlin, ecclesiarum Sueco Lutherarum quæ Deo Colliguntur in Boreali America præpositus et pastor in Wicaco meritissimus. Natus Suecæ A.D. MDCCXVI. Ordinatus verbi divini minister A.D. MDCCXLV. Adiit American 1750. Inivit societatem conjugalem 1751. Obiit die 22 Decem. A.D. 1757.

"He was an affectionate husband, a tender father, a true friend, and during his Christian warfare a faithful and valiant soldier of Jesus Christ, and in the last combat, strengthened by heavenly succors, he quitted the field, not captive, but conqueror, and is numbered among the children of God."

That over Rev. Mr. Dylander is as follows:

"In memory of REV. JOHN DYLANDER, missionary from Sweden, and four years minister of this church, who died Nov. 2, 1742. *Ætatis suæ*, 32.

"While here he sang his Maker's praise;
The listening angels heard his song,
And called their consort soul away,
Pleased with a strain so like their own.

"His soul, attentive to the call,
And quickly listening to obey,
Soared to ethereal scenes of bliss,
Too pure to dwell in grosser clay."

Mr. Dylander was a fine singer, which explains this inscription.

effect about this time enabled the radicals, in the election of 1765, to defeat Andrew Bankson, who had been treasurer for many years. Instead of submitting to the decree he resorted to the newspapers, and attacked the Rev. C. M. Wrangel and the new vestry, declaring that there had been insinuations against his honesty and an imputation that he had used the church money in his private affairs. Mr. Wrangel and the new vestry both responded, the latter declaring it was not averred that there were any insinuations against Mr. Bankson's honesty, but that it was said he would not make a statement of his accounts. The vestry also said that special thanks were due to Mr. Wrangel for his generous, disinterested, and spirited conduct in restoring to the congregation their rights and liberties, "to which they were entitled as free subjects of a happy English government," a thing which was necessary, because previously "the management of the estate of the church was in the hands of a few men of one or two families." Mr. Wrangel had assisted in procuring and approved of the charter making the vestry a body politic.

Rev. Mr. Wrangel returned to Sweden in 1768, and was made a bishop. He died eighteen years later. The new rector, Rev. Andreas Goeranson, had arrived from Sweden in 1766, but had been preaching elsewhere. He served till the autumn of 1779.

During these years but little is known of the St. Gabriel or Morlatton Church. When Rev. Samuel Hesselius left it (in 1731) there was a long intermission. But the Rev. Gabriel Falck, who left Gloria Dei in the same year, became the pastor of St. Gabriel's in 1735, and remained there until 1745. In 1735 the church building was commenced, and finished in 1737. The church books containing records of marriages and baptisms begin in that year. After 1745, Rev. Henry M. Muhlenberg, of the German Lutheran Church at the Trappe, served the Morlatton (also Molatton, a name of uncertain derivation) congregation until 1752, as much as his other engagements would permit. Mr. Buck says ("History of Montgomery County") that the present church was erected in 1801. The graveyard attached to it comprises nearly two acres of ground, and is inclosed by a wall. The most common names on the tombstones are Yocum, Hulings, Jones, Kerst, Harrison, Koons, Lott, Dehaven, Eisenberg, Brower, Lear, Leaf, Douglas, Rahn, Ingles, Schunk, Bunn, Koop, Bird, Kerlin, Tea, Henton, Krouse, Rutter, Bell, Lake, Stanley, Robeson, and Turner. In 1762 the Rev. Alexander Murray, who was sent from Europe by the Society for the Propagation of the Gospel, which was an organization attached to the Church of England, took charge of St. Gabriel's and preached there until 1768. The Rev. Henry M. Muhlenberg, in his journal, speaks of his having been visited at the Trappe by the Swedish missionary, Hageblatt, who preached in many different churches.

Up to 1760 there were not more than two Swedish churches in Pennsylvania, one in Delaware, and two in New Jersey. But Wicaco was now too large and populous a parish, so steps were taken to form new congregations, both at Merion and Kingsessing.

The church in Upper Merion township was given the name of Christ Church. It is situated in Swedesburg, about a mile below Norristown, and is believed to have been erected about 1760. The land on which it was built belonged to Morris Rambo. There are tombstones in the graveyard of this church which go back to 1744, '45, '48. The following are some of the most common names: Broades, Brooke, Halstin, Gartley, Supplee, Novioch, Custer, Ramsey, Thomas, Amies, Jones, Clay, Hughes, Munson, Learnard, Pastorius, De Haven, Rambo, Engle, Coats, Roberts, Famous, and Henderson.

The church in Kingsessing was called St. James, and was upon the southeastern side of the road leading to Darby, not far from the Blue Bell Tavern. The church was plain, built of stone, and was solid and substantial. The original building forms the southwestern wing of the present Church of St. James at the same place. On March 29, 1762, Andrew Justus conveyed to Henry M. Muhlenberg, James Coultas, William Boon, Zachariah Cocks, Ephrath Ellis, Matthias Nitcillis, George Morton, Andrew Urian, Swan Culin, and John Faler, for George Grantham and Seth Thomas, three acres of land for "a Lutheran Church, thereafter to be erected and to be officiated *and served in the English tongue* by the Swedish Episcopal Lutheran ministers at Wicaco, near the city of Philadelphia, forever." This transfer to the Rev. Mr. Muhlenberg and others shows how closely the Swedish and German Lutheran Churches were united. Mr. Muhlenberg, with his associates, held the property until Oct. 17, 1765, when those trustees conveyed the ground to the united vestry, etc., of the Swedish Churches of Gloria Dei, Christ Church, and St. James'.[1]

---

[1] This graveyard contains some quaint inscriptions, such as the following:

"In memory of
JACOB STIDHAM,
who departed this life September 18th, 1768, aged 26 years, 4 months.
Watch and pray, do not delay,
For time doth quickly pass;
For you may see, that pass by me,
Man's days are like the grass."

"Here lieth the body of
THOMAS PHILLIPS,
who departed this life 27th November, 1768, aged 25 years."

"In memory of
ZACHARIAS COX,
who departed this life April 7th, 1773, aged 33 years.
Censure not him that here doth lay,
For every one that debt must pay;
Though cold his bed and dark his doom,
Yet angels watch above his tomb,
Till the loud music of the skies,
Relieves the guard, and bids him rise."

On Sept. 25, 1765, Lieutenant-Governor John Penn, by charter, incorporated the united Swedish Lutheran Churches of Gloria Dei, at Wicaco, St. James, at Kingsessing, and Christ Church, at Upper Merion. These churches were all under the same jurisdiction as Gloria Dei. Rev. Mr. Wrangel officiated at all of them by turns.

Rev. Andreas Goeranson found his duties too much without help, and Rev. Matthias Hultgren became assistant about 1780, and was recalled to Sweden in 1786. Goeranson had returned the previous year, and died in 1800. After Hultgren was recalled Rev. Dr. Nicholas Collin took charge of Gloria Dei, St. James', Christ Church, and perhaps St. Gabriel's also. He had been sent from Sweden in May, 1770, having no particular charge assigned to him. His mission seems to have been general to the churches in New Jersey. May 12, 1770, he took charge of the missions at Raccoon and Penn's Neck, and remained in that position until 1778, when, under date of July 8th, he solicited his recall. Affairs were gloomy in New Jersey, in consequence of the war, which, he said, had produced demoralization among the people, and brought religion to a low condition. Congregations had been weakened. The troubles in regard to Continental and Provincial money had reduced the rents of the Swedes' church-lands, and many articles of necessity had increased in value, judged by the paper-money standard, while according to specie standard they had shrunk immensely in value, and "there was no prospect of peace or civil order for several years, and, consequently, no hopes of relief." War interrupted communications, and when, in May, 1783, a favorable reply was received by him, peace was established and prospects in every way better. He therefore wrote that if the charge of the churches of Wicaco, Kingsessing, and Upper Merion, which were to become vacant by the recall of Rev. Mr. Hultgren, were given him he would remain, and assist his successor at the churches of Raccoon and Penn's Neck by his influence and experience. Upon this request he was appointed rector of the churches in Pennsylvania by a resolve of Aug. 10, 1785. He commenced his service in July, 1786, and was still in charge of Gloria Dei, St. James', and Christ Churches in 1801, and indeed until nearly 1825. During half a century of faithful service, he took charge of the Swedish churches, and he was the last of a long line of self-sacrificing missionary clergymen, who proved themselves willing to forego life among their friends and kindred to build up the little pioneer churches, so hungry for the gospel in their native language. But long before Dr. Collin's death, in 1831, there was no longer any necessity for missionaries to preach in Swedish, nor for kings and bishops to write letters and send books to the Gloria Dei Church. The English language had grown to be that of business and religion; the children of the Swedes were no longer Swedes, but Americans. His pastorate deserves a longer account than we have space for, but a few points must be mentioned.

ISRAEL ACRELIUS.

The three churches which were under the control of Dr. Collin were joined in one corporation under their old titles by Act of Assembly passed Sept. 10, 1787. During the Revolution Wicaco escaped annoyance, except during the short period when the contest

"Here lieth the remains of
MRS. LYDIA ANN WALLACE,
who departed this life 11th September, A.D. 1781, in
the 36th year of her age."

"In memory of
SUSAN,
wife of Israel Longacre, who died April 4th, 1784,
aged 57 years."

"In memory of
ISRAEL LONGACRE,
who departed this life September 23d, 1784, aged 59 years."

"In memory of
ELEANOR CULIN,
who departed this life July 15th, 1785, aged 55 years.
Farewell, fond world, I have done with thee,
And I am careless what thou sayeth of me;
Thy love I court not, nor thy *frons* [*sic*] I fear;
I hope, through charity, my head will lie easy here."

"In memory of
PETER JONES,
who departed this life September 10th, 1795, aged 48
years and 2 months.

"He was among the first, in 1776, who took up arms in his country's service, and steadily adhered to her in all her vicissitudes, whose heart constantly vibrated in unison with her happiness, and glowed with the warmest sympathy for the distress of his fellow-mortals."

[The rest of the inscription illegible.]

The names most common upon the tombstones in this ground are the following, of Swedish origin: Urian, Yocum, Boon, Longacre, Holstein Culin, Trites, Likens, Morton, Justus, and Cox. Other names are Gray, Thomas, Brandt, Roe, Laxenbry, Kenny, De Gorgue, Burgoine, Shillingsford, Harmar, Kochersperger, and Wallace.

Digitized by Google

was carried on upon the Delaware River between the American vessels and the British fleet. The building was within the British lines, and protected. The church of St. James, Kingsessing, must have been disturbed greatly, as it was sometimes within British control and sometimes within the power of the Americans. Christ Church, at Swedesburg, in Upper Merion, and St. Gabriel's, at Morlatton, escaped disturbance, except while the Americans were at Valley Forge, when the intervening country was ravaged by Simcoe and his loyalists, but preaching was much interrupted. Rev. Slater Clay officiated at Christ Church once a month from 1792 to his death, in 1821. Matthias Holstein, of Norristown, related that "about 1790 nearly all who attended this church came on horseback." He further says, "It is believed that no preaching was ever done there in Swedish."

After the Revolution Dr. Collin undertook a translation into English of Acrelius' "History of New Sweden," a work commenced in 1799, at the request of the Historical Society of New York, which still has possession of the manuscript. He was also a member of the American Philosophical Society, and at one time its vice-president. He died at Wicaco on the 7th of October, 1831, in his eighty-seventh year.

Rev. Snyder B. Simes, rector of the Gloria Dei Church, in his memorial sermon for 1870, says that in forty-five years of Dr. Collin's ministry he married no less than three thousand three hundred and seventy-five couples. In 1795 he married one hundred and ninety-nine, and the next year one hundred and seventy-nine. In his old age he was a very eccentric individual, and many odd stories are told about him.

REV. JEHU CURTIS CLAY.

The successor of Dr. Collin was a gentleman who had been his assistant for about a year, Rev. Jehu Curtis Clay, then recently ordained. When he assumed this important position, Dec. 5, 1831, the three churches were united, but in 1843 they were separated into three distinct parishes, each with its own rector. For thirty-two years, or until 1862, this good and faithful minister led his congregation. The church was soon too small for the assembly, but all talk of building a new one was fortunately overruled, though many alterations and improvements were made, none of them, however, in any way changing the general appearance of the exterior. In 1846 the church assumed nearly its present aspect. Dr. Clay's assistant during his later years, Rev. Mr. Leadenham, succeeded him as rector of the old church. Next came Rev. Mr. Reed, who remained three years, and during his ministrations the Sunday-school chapel was built.

The orders and succession of the Swedish Church have always been recognized as valid by the Church of England. The Swedish clergymen and the Church of England ministers in the churches in or near Philadelphia, always labored harmoniously together. They exchanged pulpits and supplied each other's churches in case of vacancies. In the English services held in the Swedish Churches, the English Prayer-Book was used, and when, after the independence of the colonies was fully established, all further aid from Sweden was discontinued, these Swedish churches were commended to the care of the Protestant Episcopal Church, as that which in its episcopal government most nearly resembled the Episcopal Church of Sweden. All of them have been united with the Protestant Episcopal Church since Dr. Collin's death. The three churches of Wicaco, Kingsessing, and Upper Merion, which had been united, became in 1843, by almost unanimous consent, distinct parishes. Gloria Dei Church was admitted into union with the Episcopal Convention in 1845. The present rector, the Rev. Snyder B. Simes, entered upon the charge in 1868.

The ministries of Dr. Clay, Mr. Leadenham, Mr. Reed, and of the present pastor in Gloria Dei Church, all were successful. The parish is an active and vigorous one, its work and influence extensive, and its appointments good. It has its churchyard and burial-ground, a rectory, two Sunday-school buildings, and a sexton's house. It derives an annual income from some old ground-rents, and in 1879 an endowment fund to accumulate until 1900 was begun, and already amounts to some thousands of dollars.

Among the interesting old graves in the churchyard is that of Alexander Wilson, the celebrated ornithologist, who, in his desire to be buried here, speaks of it as "that spot sacred to peace and solitude, whither the charms of nature might invite the steps of the votary of the muses, and where the birds might sing over his grave."

The old Gloria Dei Church is a sacred relic of

Digitized by Google

colonial days, and of the earliest Philadelphia, when it was "a neat little village." It is a place of historical as well as ecclesiastical interest, and belongs to the whole commonwealth. It is a hundred and eighty-four years now since the classic building was dedicated. Here for over two hundred years the quiet and moss-grown cemetery has been receiving for their last quiet rest the pioneers who had landed with Printz, listened to the preaching of Campanius, helped to consecrate the Tinicum Island Church in 1643, or the Wicaco block-house a quarter of a century later, the block-house near which William Penn landed, on the tree-shaded knoll sloping down to the broad and gleaming river, and to a pleasant inlet on the north, looking across to another knoll crowned by the rough log cabin of the Swansons, who then owned what is now Southwark, Moyamensing, and Passyunk. If those homely toilers could return for a glimpse of the Philadelphia of 1884, with what surprise would they behold its vast development.

THE SOCIETY OF FRIENDS.

The Quakers under George Fox—he was born in the year 1624—originally called themselves "Professors" or "Children of the Light." It was Gervase Bennet, the magistrate signing the mittimus when Fox was first arrested at Derby, who gave to the sect in derision the name of "Quakers," because Fox bade him and those present to "tremble at the word of the Lord."[1] Bennet, a sturdy Puritan and Roundhead, was not in the habit of trembling at anything, and the extravagant bodily tremors of the new sect might easily be denominated quakings. The name stuck,—it is usually the case with sects and parties that they get their most enduring titles from the lips of opponents,—and the Friends have no aversion to hear themselves so called. The authentic title of Friends was not adopted until the sect embraced a considerable society. In their earlier periods the Friends encountered bitter persecution, and endured it with steadfast hearts even to death under torture. In these periods they were intensely imbued with a missionary and proselyting spirit, and went abroad through all lands to invite others to participate in the awful gifts of the Divine Spirit, with which they believed themselves endowed. They believed the grace of God to be upon them, making them intuitively conscious of the right interpretation of the Word, and that this infallibility of perception of the truth carried with it a sacred duty of teaching and preaching to the unenlightened.

Originally they came to America to seek savages to convert, but soon learned to flee hither for refuge from persecution. In Maryland, in Delaware, in New Jersey, and in Pennsylvania they found a security for rest and worship denied them everywhere else, and speedily they began to form towns in those colonies,—towns which still exist.

The first Quakers on the Delaware landed at the place afterward known as Salem, where a town grew up. In 1667 others of the same persuasion followed, and settled at the localities afterward called Gloucester and Beverly, the latter subsequently known as Burlington, in New Jersey. The first prominent member of the society who visited any part of the country attached to Pennsylvania was the famous George Fox, who, in 1672, arrived in Maryland, and, crossing to the eastern shore, proceeded to New Castle, on the Delaware. From this point he continued his journey northward to Middletown, in East New Jersey, where there was already a Quaker meeting-house. After visiting New England he returned to Middletown, and, having crossed the Delaware with the help of Indians and their canoes, he and his fellow-travelers proceeded to New Castle. On reaching the latter town he met with a handsome reception from the Governor (Carre), and had a large meeting there, it being the first ever held at that place. From New Castle, Fox went to Maryland, and thence back to England.

Three years later William Edmondson, an English Friend, while making a second visit to North America, came to Middletown, N. J., from New England, and attempted to reach the falls of the Delaware, at what is now the city of Trenton, but lost his way. He finally discovered the falls, and after visiting settlements on the west side of the Delaware, proceeded to New Castle, and from that point to Maryland. Shortly afterward, in 1679, Jasper Dankers and Peter Sluyter, members of the religious sect called Labadists, also visited the settlements on the Delaware, and finally established a community at Bohemia Manor in Cecil County, Md. In their "Journal," published by the Long Island Historical Society, they mention having met some of the Quakers on the Delaware, whom they describe as being "the most worldly of men in all their deportment and conversation." The two Labadists appear to have formed a very unfavorable opinion of the Quakers, but their impressions were evidently colored by prejudice and bigotry.

As the settlements on the Delaware grew, Weekly, Monthly, and Quarterly Meetings of Friends were established at Burlington and Rancocas. At Shakamaxon the first meetings were held in 1681. In the year 1682 it was established by the consent of the meeting at Burlington that Monthly Meetings between Friends at Arwames (Gloucester) and Shakamaxon should be held on the second First day of each month. The first, for Arwames, was to be held at William Cooper's, at Pine Point (Gloucester Point), at Arwames, on the second First day of the Third month (May) of this year (1682), and the next at Thomas Fairman's at Shakamaxon, and so on alternately. This meeting at Fairman's was the first known to have been held

[1] Sewell, "History of the People called Quakers."

within the present limits of Philadelphia. A six weeks' meeting for business was also appointed to be held between the Friends of these two places. These meetings did not long continue. The settlement of Philadelphia rendered it more convenient to make the place of assembling in the city, and the meeting held at Shakamaxon ceased. Richard Townsend, in his "Testimony," says, "Our first concern was to keep up and maintain our religious worship, and, in order thereto, we had several meetings in the houses of the inhabitants; and one boarded meeting-house was set up where the city was to be, near the Delaware; and, as we had nothing but love and good-will in our hearts one to another, we had very comfortable meetings from time to time, and after our meeting was over we assisted one another in building little houses for our shelter." As Townsend came with William Penn in the "Welcome," it seems certain from this that the meeting-house was put up even before the dwellings, and while the caves were yet in use.

On the 9th of January, 1683, a meeting of Friends was held at Philadelphia, at which it was agreed that the Monthly Meetings should be held on the first Third day of every month for men's and women's meeting, and that every third meeting should be the Quarterly Meeting. Thomas Holme, John Songhurst, Thomas Wynne, and Griffith Owen were selected to make the necessary arrangements for the choice of a site for a meeting-house and for building the same, the charge to be borne by Friends belonging to the city. At the same time John Hart and Henry Waddy for the upper part of the county, and Thomas Brown and Henry Lewis for the town and lower part of the county, were appointed to visit the poor and sick and supply them with what they deemed necessary, at the expense of the Monthly Meeting.

In August, 1684, the Quarterly Meeting at Philadelphia decided that a meeting-house should be built in the Centre Square, to be of brick, its dimensions sixty by forty feet. For some reason the size was altered in the next year, and it was ordered that the house should be fifty feet long and forty-six wide. It was also ordered that the erection of the building be finished with all possible expedition. The Quarterly Meeting was now composed of the meetings of Philadelphia, Tacony, Poquessing, the Welsh Friends of the Welsh tract in Chester County, and those near the city, on the other side of the Schuylkill.

About the same time that the meeting-house was in course of construction at Centre Square another was projected upon the river-bank, being situated on Front above Sassafras Street. Robert Turner, in his letter to William Penn, of Aug. 3, 1685, published by the latter in his second account of Pennsylvania, chapter xxxi., says, "We are now laying the foundation of a new brick meeting-house in the Centre (sixty feet long and about forty feet broad), and hope to soon have it up, there being many hearts and hands at work that will do it. A large meeting-house, fifty feet long and thirty-eight broad, also going on in the front of the river for an evening meeting."

This meeting-house was situated on the square at Broad and Market Streets, and not at Twelfth and Market Streets, as has been supposed by some.

The Bank meeting-house was probably of frame, and was but a temporary affair, being replaced by another of brick, built in 1703, which stood on the west side of Front Street above Race, and was torn down many years ago.

The Haverford Monthly Meeting was formed in 1684, of three meetings, one called the Schuylkill, another Merion, and the other Haverford. The first Monthly Meeting was held at the house of Thomas Duckett, located on the west side of the Schuylkill, a short distance above the present site of Market Street bridge.[1]

The first burying-ground used by the inhabitants of Philadelphia was located on the west side of the Schuylkill, near the river, between Market and Spring Garden Streets. It probably belonged to the Centre Meeting, but the ownership and the date at which it was first used are now matters of conjecture.

The Friends had external difficulties to contend with, which troubled them quite as much as their internal wrestlings with conscience and the flesh and spirit; but this pressure from without probably tended to maintain the homogeneousness of the society and strengthen the unity of its members. The "hot church party" was embarked in a perpetual conspiracy against their character and their political predominance, as a sect, in the affairs of the province. The churchmen had the establishment, and desired to annex to it the practical control of the State. In this movement they had, more or less, the sympathy and co-operation of the lieutenant-governors, who were all orthodox churchmen, and the state of war which generally existed with France or Spain, or both, and the anomalous attitude of the Quakers to every measure of military resistance and defense, contributed materially to foster the prejudices of the minority against them.

It may be said in a general way of the Quakers of Philadelphia and Pennsylvania, between the time of Penn's last visit and the conclusion of the Revolutionary war, when the Governor, the Council, and sometimes the Assembly and the body of the people were not only at variance with, but actually hostile to them, that they were steadfast in adhering to their doctrine and discipline, quick in obeying their consciences, tenacious in their opinions even in indifferent matters; but cautious in their demonstrations, prudent in their resistance, patient in waiting, watchful in action. Their enemies were active and enterprising, but divided in counsel and not united; the Quakers, on the other hand, were a unit always in counsel and in action. They had, moreover, the

[1] Smith's History of Delaware County.

advantage in the great controversy in respect to taxation and revenue, to take common ground with every other colony in America; and in their difference with the established church, the latter could inaugurate few positive measures against them which did not strike with equal severity the dissenters in other colonies, who, collectively, were much more numerous than the church people.

The Quakers insisted that they should not be outnumbered in the Governor's Council by the church people, and they carried their point, and they were equally successful in regard to the composition of the Supreme Court.

George Keith, the leader of the first schism among the Quakers, was the instructor of the public school, who, becoming dissatisfied with the proceedings of the leading men in the society, resorted to criticism and abuse. Having given up the school he visited New England, where he held disputations with theologians, and on his return to Philadelphia urged upon the meeting certain reforms in discipline, which were not adopted. He now became involved in a controversy with William Stockdale and Thomas Fitzwater, whom he charged with preaching false doctrine. All the parties to the discussion were censured by the Monthly Meeting; but Stockdale and Fitzwater having preferred against Keith the charge of denying the great fundamental principle of the Society of Friends,—the universality of the light of Christ, or divine grace and its sufficiency, if obeyed, to effect the salvation of mankind,—the subject was reopened. An excited discussion was the result, and before any conclusion was reached the clerk and others withdrew, but Keith and his adherents remained, and adjourned to meet the next morning at the school-house. Here they adopted a minute in which they condemned Fitzwater and Stockdale for holding false doctrines, and with charging Keith with the same fault. An attempt was made to have this minute inserted in the book of the Monthly Meeting, which was resisted. On appeal the Quarterly Meeting decided that the meeting at the school-house was irregular and unauthorized.

In consequence of these proceedings and his abuse of Governor Lloyd, Keith made himself obnoxious to many of his fellow-members of the society, and an account of the troubles in the province having reached England, a long epistle was sent from the meeting in London, in which Friends in Pennsylvania were adjured to avoid "all heats, disputations, and occasions for display of passion." On the 28th of June, 1692, the meeting of Friends in Philadelphia sent a communication to the several Monthly and Quarterly Meetings in Pennsylvania, East and West Jersey, setting forth their sorrow at the defection of Keith, and asserting that he "had gone into a spirit of enmity, wrath, self-exaltation, contention, and jangling;" that he had disregarded the advice of the meeting, and said he "had trampled it under his feet as dirt." He had also set up a separate meeting, "where, like an open opposer, he not only reviled several Friends, by exposing their religious reputations in mixed auditories of some hundreds, endeavoring to render them and Friends here, by the press and otherwise, a scorn to the profane and the song of the drunkards." He was accused of traducing and vilifying James Dickinson and Thomas Wilson, traveling Friends, and of putting on his hat when James Dickinson was at prayer, and going out of meeting, drawing some scores with him by his evil example. It was therefore declared to be the duty of the meeting to disown him and those who had gone out with him.

This epistle was signed by Thomas Lloyd, John Wilsford, Nicholas Waln, William Watson, George Morris, Thomas Duckett, Joshua Fearne, Evan Morris, Richard Walter, John Symcock, Griffith Owen, John Boun, Henry Willis, Paul Saunders, John Blunston, William Cooper, Thomas Thackery, William Byles, Samuel Jennings, John Delaval, William Yeardley, Joseph Kirkbride, Walter Fawcett, Hugh Roberts, Robert Owen, William Walker, John Lyman, George Gray.

Keith and his followers, who called themselves "Christian Quakers," or "Christian Friends," established a separate meeting, and having obtained a lot of ground on the west side of Second Street, below Mulberry, built a small log meeting-house.[1]

To the accusations of the Philadelphia meeting the Christian Quakers, or Keithites, replied by publishing a "counter testimony," signed by twenty-eight members, in which they disowned the twenty-eight who had disowned George Keith. An "Expostulation" and several other papers were published, one of which caused the indictment of Keith and Thomas Budd, who were tried, convicted, and fined five pounds each. The meetings of ministers of Philadelphia and Burlington on the 6th of September, 1692, sent an epistle to London, setting forth the ill-behavior of Keith, and announcing that he had been disowned. Keith published an "appeal," in contradiction of this epistle, which was posted over the city.

At the time of the Yearly Meeting, Keith and his adherents met in the court-house,[2] and sent the regular Friends a paper demanding that his "appeal" be

[1] Bowden, in his "History of the Quakers," says that Keith had seventy or eighty followers, but Keith, in his journal, says there were five hundred, and that they had fifteen meeting-places in Pennsylvania and New Jersey. The names of the following Keithians in Philadelphia have been preserved: Thomas Budd (author of "Good Order Established in Pennsylvania and New Jersey"), Thomas Peart, Ralph Ward, James Poulter (these four purchased the ground for the meeting-house in trust for the society), John Budd, William Bettridge, William Lee and his wife Joan, Nicholas Pierce, Thomas Tress, Robert Turner, Griffith Jones, Caleb Wheatley, George Hutchinson, John Hart, John Rush, Nathaniel Walton, Richard Collet, —— Johnson, —— Jackson, —— Foster.

[2] Where the court-house was at this time is not known. It was probably some building hired for the occasion. Whether the Yearly Meeting was held at the Centre meeting-house or at the "evening meeting" on the bank, or elsewhere, is also open to conjecture.

heard. The paper was presented to the meeting by one of Keith's followers, "who, instead of entering the door to deliver it, climbed up in the meeting-house window, and stood in the window and read his paper with his hat on, while Thomas Janney was at prayer." On the third day of the meeting, Keith, by his own appointment, came to the Yearly Meeting. Friends apprised him that they had fixed the next day to hear his case. Keith and his party insisted upon being heard at once, which being refused, they withdrew in confusion to the court-house, from which they sent forth a paper, as from their Yearly Meeting, signed by Robert Turner, Griffith Jones, and others.[1]

In 1693, Keith went to London, and ultimately became a member of the Church of England.

As soon as their leader left the country, the "Christian Quakers" began to languish, although they had meeting-houses at Philadelphia, Burlington, Neshaminy, and elsewhere. The Keithian Quakers were finally transformed into Keithian Baptists, being also known as Quaker Baptists, from the fact that they retained the language, dress, and manners of Quakers. Some of them also became Seventh-Day Baptists and members of other societies.[2] In after-years a dispute arose between Christ Church and the Baptist Church as to which had the better right to the lot on Second Street below Mulberry, on which stood the meeting-house of the "Christian Quakers," the controversy being decided in favor of the Baptists.

In 1683 a First-day meeting of Friends was established at Tacony, or Frankford, and one at Poquessing, or Byberry. A Monthly Meeting for discipline was formed, and held alternately at the houses of John Seary, at Oxford, and John Hart, Poquessing. The weekly meeting of Poquessing was held at Giles Knight's until some time in 1685. Soon after the Poquessing meeting was commenced, a lot of about one acre was set apart as a burial-ground, which, after the defection of Keith, was used only by the Christian Quakers. In 1685 ten acres were given for the same purpose to the Monthly Meeting by Walter Forrest. The land was situated near Poquessing Creek, and was to be conveyed to Joseph Fisher, John Hart, Samuel Ellis, and Giles Knight, in trust; but whether it was ever used as a place of interment is doubtful. In 1696, John Hart having joined the Keithians, Monthly Meetings of Friends residing in the northern part of Byberry were held in the house of Henry English, who two years before had given an acre of land on his farm in Byberry, on which a log meeting-house was erected. It stood in the northern corner of the present site of the old graveyard,[3] and was built of logs chinked with mud and covered with bark. Monthly Meetings were held for Byberry, Oxford, and Cheltenham, and in 1687 one was established at the house of Richard Worrel, Jr.

German Friends are supposed to have established the meeting at Germantown soon after the settlement of the German township. The first meetings were held at Tennis Kundert's (Dennis Conrad's) as early as 1683. The Merion meeting-house, built in 1695, in Merion township, at the head of the Philadelphia plank-road, about five miles from the city, is the oldest meeting-house of the Society of Friends now standing in Pennsylvania.[4]

In the township of Plymouth a meeting is known to have been in existence as early as March, 1699. In the following year a meeting-house was established at North Wales, and meetings held by consent of Haverford Monthly Meeting, to which the members attached themselves. A meeting-house was built in 1700, and the number of members increased so rapidly that in 1712 it was found necessary to erect another and larger meeting-house.

FRIENDS' MEETING-HOUSE NEAR MERION.

The first meeting-house, at the corner of Second and High [the present Market] Streets, was built in the year 1695. "It was surmounted, in the centre of its four-angled roof, by a raised frame of glass-work so constructed as to let light down into the meeting below, after the manner of the former Burlington meeting-house."[5]

The lot on which it stood was given to George Fox, the land being due to him under a promise from William Penn. The latter, however, was very loth to

[1] Keith continued to frequent the meetings of Friends, calling them "hypocrites, snakes, vipers, bloodthirsty hounds, impudent rascals, and such like, bidding them cut him in collops, fry him, and eat him, and saying that his back had long itched to be whipped."

[4] "It is," says W. J. Buck, in his "History of Montgomery County," "in its ground plan in the form of a T. It is a substantial stone edifice of one story, or about fourteen feet to the roof, with walls over two feet in thickness. Its greatest length is about thirty-six feet, and the facing southwest is twenty by twenty-four feet. Originally it was stone-pointed, but in repairing it, in 1829, it was plastered over in imitation of large cut stone. It was surrounded by several large, venerable-looking buttonwood-trees."

give up the land,[1] which was really composed of reserved lots for the use of William Penn, Jr., and his sister Letitia, but which Governor Markham had granted to Friends without consultation with the proprietary.

The building was taken down in 1755, and another erected in its stead. In 1804 the property was sold, and the large meeting-house on Arch Street built.

The first grant of ground at Fourth and Mulberry [Arch] Streets was made, in 1690, to Thomas Fitzwater and Alexander Beardsley for "a piece of ground for a burial-place adjoining another laid out for the same use, bounded by the back of High Street lots and Mulberry Street." This lot and another were confirmed, Oct. 18, 1701, by William Penn to Edward Shippen and Samuel Carpenter, in trust "for the use and behoof of the people called Quakers in Philadelphia, with whom I am now in communion, and who are and shall be in fellowship with the Yearly Meeting of the said Friends at London, for a burying-place," etc. It had a frontage of three hundred and two feet on Arch Street, below which it was of irregular width on the eastern end, being three hundred and fifty-two feet in length on Fourth Street.

In 1703, by direction of the Monthly Meeting in Philadelphia, Nicholas Waln and John Goodson purchased four acres of ground for eight pounds current money of Pennsylvania, situated upon the liberty lands, near and upon the road leading from Philadelphia to Germantown, and afterward known as Fairhill. On the present city plan the lot is situated between Indiana and Cambria Streets and Ninth and Tenth Streets. It was to be held "for the benefit, use, and behoof of the poor people of the said Quakers belonging to the said meeting forever, and for a place to erect a meeting-house and school-house on for ye use and service of the said people, and for a place to bury their dead." A few years later a piece of ground adjoining came into possession of the society under the following circumstances:

George Fox, founder of the society, had nominally purchased one thousand acres of land in Pennsylvania, and under the concessions and changes subsequently made, was entitled to sixteen acres of liberty land and two town lots. But Fox really was not a purchaser. William Penn made a gift of the right to take up the land to him. Fox did not receive a patent for his property during his lifetime. He died in 1690, and by his will he gave his lands in Pennsylvania to his sons-in-law, Thomas Lower, John Rouse, and Daniel Abraham, and their children, to be equally divided between them; but sixteen acres of it "he gave to Friends there, ten of it for a close to put Friends' horses in when they came afar to the meeting, that they may not be lost in the woods, and the other six for a meeting-house and school-house and a burying-place, and for a play-ground for the children in the town to play on, and for a garden to plant with physical plants, for lads and lasses to know simples and learn to make oils and ointments." The heirs of George Fox seemed to have imbibed the idea that there was a promise made to him in his lifetime that his town lots should be in the centre of the city. After his death his devisees and the Yearly Meeting of Friends pressed for the gift under the same circumstances.[2]

Finally, however, on the 5th of October, 1702, Samuel Carpenter, Isaac Norris, Anthony Morris, David Lloyd, and others wrote to Thomas Lower, of London, proposing that the proprietary, in lieu of the liberty land and town lots, should grant to Friends "twenty acres of land between the Delaware and the Schuylkill, as near the centre as conveniently may be." On the 30th of May, 1703, Penn replied to this proposition that he was willing to have "settled as desired" any part "the very nearest to the town out of the Liberty lands, though it be twenty-five acres," but "no part of the city ground lots, because it would make a perfect overthrow of the city."

As Penn persisted in his refusal, the Friends finally accepted a grant of land in the Northern Liberties, and on the 28th of August, 1705, Penn's commissioners granted by patent to Samuel Carpenter, Anthony Morris, and Richard Hill, in trust for the meeting of Friends, at a quit-rent of two and one-half pence, twenty acres of land in the Northern Liberties, which adjoins the land formerly bought in 1703 for the use of the Monthly Meeting. The whole twenty-four acres at Fairhill were therefore thrown into one tract. At the same time were conveyed, as part of the George Fox gift, a lot on the south side of High Street, between Third and Fourth Streets, thirty-three feet

---

[1] In October, 1703, Penn wrote to James Logan,—

"Look into the first, if not only map of Philadelphia, and there thou wilt find N. N. where our meeting-house stands, and Thomas Lloyd had a lot, and how it was disposed of, being my son's and daughters High Street lot, reserved by me for their shares, every front lot having a High Street lot belonging to it."

In a letter, Sept. 7, 1705, Penn wrote to Logan,—

"As to T. L.'s request to me from Friends with you for land in or near the centre, gratify good friends, but none of the leaven, and what and where it is, and in what proportions tell me. I would have it within bounds, and rather to the line, by Schuylkill on the south bounds, or the north, than in the middle. Let it be 'the gift of William Penn to his dear friend and George Fox, and George Fox's gift to truth's and Friends' service.'"

On the 14th of September, Penn wrote to Logan,—

"To thy twelfth paragraph about the meeting-house and school lot, I could wish that some people had exercised some more tenderness toward my poor, suffering, and necessitous circumstances, than in invading lotts and lands in *nomine domine*. . . . However, since I will hope the better sort of Friends that seek it, I consent as my gift both that the meeting-house and school-house be granted and confirmed to the meeting-house and school-house and confirmed to the meeting."

On the 21st of September, 1705, he again wrote to Logan,—

"George Fox's lot is a mystery. Would Friends have it in the centre? What then shall we do with the city? I will not allow that which time may accomplish to be prevented. Take it on the right side or on the left, which yet is irregular. I rather it were out of my strife. Springettsbury, that runs up by the side of the city, and wherever it is, I will have a quit-rent, and recorded my gift to George Fox and his friends."

[2] Thompson Westcott.

front by three hundred and six feet deep, at a rent of fifteen pence,[1] and a lot on the west side of Front Street, between Sassafras and Vine Streets, twenty-five feet front by four hundred and twenty-six feet deep to Second Street, at a rent of fifteen pence. Also the bank lot on the river Delaware, in front of the same.

A small meeting-house was built at Fairhill, being located on the present Germantown road, above Cambria Street, which was standing in 1876 as the kitchen of a stone house adjoining. It was about twenty-five by fifteen feet, and the front and sides were of alternate red and black bricks. On the rear side the black bricks were arranged in lozenge or diamond shapes, a style in vogue between 1700 and 1720.[2]

Near the meeting-house a graveyard was established, a portion of which now belongs to Fairhill Cemetery. The meeting-house at Fairhill must have been built between 1706 and 1709.[3]

Plymouth meeting-house, in Plymouth township, was built some time after the Haverford Monthly Meeting, in 1703, gave its consent to Friends to hold meetings at the house of Hugh Jones, from which in a few years they were removed to that of John Cartledge. In 1858 the building, which is of stone, one story high, was repaired, and a gallery placed in the east end.

In 1715 the Friends of Plymouth and Gwynedd Meetings were constituted a Monthly Meeting for business, by consent of Haverford Monthly Meeting and Philadelphia Quarterly Meeting.

The meeting at Horsham was settled on the 24th of September, 1716, and after some time a meeting-house was built. In 1701 it was agreed in the Monthly Meeting at Byberry "that a Preparative Meeting be established at Byberry, to be held on the weekly meeting day that happened next before the Monthly Meeting, and that those Friends that are appointed as overseers do attend to that service." This meeting continued for many years. In 1714, the old meeting-house at Byberry being no longer tenable, a new house was erected on the land (one acre) given by Henry English. It was of stone, thirty-five by fifty feet, two stories high, and situated a few feet to the east of the old structure. In 1720 a school-house of logs and about eighteen feet square was erected near the meeting-house. The principal minister at Byberry Meeting between 1700 and 1725 is believed to have been William Walton, who died in 1736.

A Seventh-day (Saturday) Morning Meeting was established by the Yearly Meeting at Philadelphia in 1701. ". . . These meetings, after the official appointment of elders, became meetings of ministers and elders, and after being held in Philadelphia on Seventh days for about fifty years were changed to Second days. It is said that after this change it became customary to review some of the public discourses that had been delivered the preceding day."[4]

The Meeting for Sufferings had its origin in a resolution of the Yearly Meeting of Friends at Philadelphia, in 1705, appointing Thomas Story, Samuel Jennings, Griffith Owen, Edward Shippen, and Thomas Gardner correspondents with other Yearly Meetings, with the view of collecting accounts of the sufferings and trials of Friends in maintenance of the faith. In 1709 it was decided that a committee of eight Friends should have power "to peruse writings and manuscripts, with power to correct what may not be for the service of truth, otherwise to not suffer anything to be printed." This power of supervision, which at this day seems strangely arbitrary, was exercised by the Friends' committee from 1718 to 1722.[5]

The following ministering Friends from abroad visited the meetings in Philadelphia and Pennsylvania during the years from 1701 to 1726: John Richardson, 1701; John Estaugh, 1701; John Salkeld, 1701; Thomas Chalkley, 1701, who settled in Philadelphia and became a noted man in the province; Samuel Bownas, 1702; Thomas Wilson and James Dickerson, 1713–14; Thomas Thompson, Josiah Landale, and Benjamin Holme, 1715; John Appleton, 1720; John Fothergill and William Armistead, 1721.

George Keith, who had caused so much trouble among the Philadelphia Friends some years before, again came to the surface in 1702–3. He was now a minister of the Church of England, and, in company with the Rev. Mr. Talbot, returned to Philadelphia on missionary service. He preached at Christ Church, but occasionally attempted to interfere with the Friends by appearing at their meetings in order to read "remarks," and engage them in discussion. On one occasion, according to the Logan papers, he had "a public dispute with himself" in Whitepain's great house.[6] During his stay in Philadelphia several

[1] This lot on High Street was where "Franklin Place" afterward went through, and was at one time the property of Benjamin Franklin. The meeting of Friends subsequently had some trouble about all of these properties. The heirs of George Fox in 1767 claimed all the property under the patent to Carpenter, Morris, and Hill, alleging that George Fox's right was never duly conveyed to them. The matter was compromised by the payment at that time of five hundred pounds, and the property confirmed to the then owners.

[2] Thompson Westcott, in making this assertion, adds: "The diamond-shape lozenge of black-headed brick is to be found upon Trinity Church, Oxford, built in 1709; Plain Pleasant House, Passyunk road, near Broad Street, built in 1701; upon a building in Mickles' Court, running from south side of Arch Street west of Second; on Fairhill meeting-house, and the farm-house of the Norris Fairhill mansion, to which the date of erection is assigned 1717. There may be other instances of the use of this ornament in Philadelphia unknown to the writer."

[3] In a deed from Arnold Cassel to Isaac Norris, Jan. 19, 1709, the ground is described as "lying contiguous and adjoining *the Fairhill meeting-house land*."

[4] Janney's History of the Religious Society of Friends.

[5] Thompson Westcott.

[6] "Whitepain's great house," says Thompson Westcott, "was built by Richard Whitepain, on the east side of Front Street, below Walnut, as early as 1685. It was a very large house, and it was recommended by Penn, in 1687, that it should be taken for public service. It is probable that the Assembly sat in it in 1695 and in 1701. This house was built with oyster-shell lime, and the walls fell down gradually in 1707, 1708, and 1709."

pamphlets were published by the friends and enemies of Keith, and a spirited controversy was carried on.

From 1701 to 1726 the Society of Friends suffered considerably from the efforts of those who desired the supremacy of the Church of England in Pennsylvania to dispossess Penn of his proprietary rights and bring the province under royal authority and control. The Lieutenant-Governors were all churchmen and sympathized with the movement, which was strengthened by the opposition of the Provincial Assembly, then under the control of the Quakers, to the establishment of a militia or the voting of supplies for military purposes to the government. Among the measures aimed at the Quakers the most serious was the extension, in 1715, to the colonies, for five years, of the statute of 7 and 8 William III., which provided that no Quaker "could be qualified or permitted to give evidence in any criminal case or serve on juries, or hold any place or office of profit in the government." At this time almost all the offices in the province were filled by Quakers, and as the Governor (Gookin) held the opinion that the act repealed the provincial law permitting affirmations instead of oaths, and disqualified Quakers from giving testimony in criminal cases, sitting on juries, or holding office, the judges of the Supreme Court hesitated to proceed in the discharge of their official duties. The troubles and uncertainty on this point continued throughout the administration of Gookin, and were not settled finally until 1725, when an act of Assembly, passed May 9, 1721, embodying the principles as to affirmations which had always been prevalent in Pennsylvania, was ratified by the Privy Council. The act was strongly antagonized by the Church of England party, and in 1723 Christ Church sent a memorial to the Assembly protesting "against the omission of the sacred name in affirmations." But, as we have seen, the act was sustained by the Privy Council, and the Yearly Meeting was so grateful for the concession that it prepared and transmitted to England an address of thanks to the king.

In 1706 an effort was made to obtain the passage of a law confirming Friends in their titles, which rested upon an unsafe tenure, to meeting-houses and other places of burial and worship, and in January of that year the Assembly passed a bill "for the confirmation of gifts, grants, and conveyances to religious meetings, schools, towns, villages, and counties in this province, and their sales and grants." Objection to this bill was made in the Council by Governor Evans, who finally refused to approve it at that session. The matter remained in abeyance for many years, during which period "the religious meeting-houses of Protestant dissenting subjects," as the Assembly in a remonstrance to Governor Gookin, in 1709, expressed it, were "left exposed to the danger of the statute of mortmain."

The question of the right of Quakers to wear hats in courts of justice was another subject of controversy about this time. In Governor Keith's Court of Chancery, in 1720, John Kinsey, a Quaker lawyer, appeared "with his hat on his head, according to the usual manner of that people." He was ordered to take it off but refused, and the hat was removed by an officer of the court. The Quakers remonstrated with the Governor, who was informed, in an address signed by Richard Hill, Richard Hayes, Morris Morris, Anthony Morris, Evan Evans, John Goodson, Rowland Ellis, Reese Thomas, Samuel Preston, and William Hudson, that the removal of Kinsey's hat was "altogether new and unprecedented in this province," and a transaction which had "a tendency to the subversion of our religious liberties." In compliance with the request of the memorialists, the Governor promulgated a rule for the Court of Chancery, permitting Quakers to appear in court "without being obliged to observe the usual ceremony of uncovering their heads by having their hats taken off."

This was a small thing, but as in small things, so in great. They insisted uniformly that loyalty and conformity were two different things. Their duty compelled them to loyal obedience and respect for the powers of the realm, but their conscience forbade them to conform to and to do anything that bore the character of resistance. In a despotism their passive resistance would have amounted itself to rebellion and an attitude of war against the State. But the Quakers have not always been logical,—no sectaries ever were, perhaps; consistent with themselves, however, they ever were, and the record of their relations to church and State and their submission to conscience during the period under review, is highly honorable. We have already seen, in a previous chapter, how they dealt with Governor Fletcher when he attempted to force them to contribute to war revenue. In 1706, Governor Evans tried to rouse them to make provision for the defense of the province, by fair means and foul. The Quaker majority in Council and Assembly baffled him at every point. They refused to discuss the questions propounded by him, assuming that there could be but one answer, and, therefore, discussion would but injure them by seeming to set them wrong. This was most ingenious, since it prevented Evans from getting hold of a single declaration as a point upon which to attack them. In the time of Governor Gookin, they resisted as much, but in a different way. They were very sensible, they said, that the queen, their gracious sovereign, had been at a great expense in carrying out her war policy, "and were it not that the raising of money to hire men to fight or kill one another is matter of conscience to us, and against our religious principles, we should not be wanting, according to our small abilities, to contribute to these designs." As it was, they did not look upon the province as being in any danger, they could not give money for war, but they could vote the queen five hundred pounds to show their gratitude to her for

her great and many favors. They would like to give more, but they were poor, taxes had been misapplied, their losses had been great, trade was depressed, prices for products low, etc.

In 1727, Samuel Bownas, a distinguished member of the society, made his second visit to America, and during his stay in Philadelphia noticed what he thought to be a falling off in the spirit of the Friends since his visit twenty years before. The meetings, however, were large, and he observed that "there was a fine living people amongst them, and they were in a thriving, good way." In Pennsylvania at that time (1727-28), he said, there were thirteen meeting-houses. Among other prominent members of the society from abroad who visited Pennsylvania about this time were Mungo Bewley, Paul Johnson, and Samuel Stephens, of Ireland; Alice Anderson and Hannah Dent, of Yorkshire; and Margaret Copeland, of Westmoreland, all in 1732; John Burton, of Yorkshire, William Backhouse, of Lancashire, and Joseph Gill, of Dublin, in 1734; and John Fothergill, who made his third and last visit to the colonies in 1736, remaining until 1738.[1]

During the period under consideration (1725-51) occurred the death of the following members of the society who attained to prominence as ministers or elders in or near Philadelphia:

Robert Fletcher, of Abington, August, 1726; Elizabeth Webb, Nov. 6, 1726; Caleb Pusey (Feb. 25, 1727, in his seventy-sixth year). He was one of the first settlers in 1682, and partner with William Penn in the mill at Chester, author of tracts against George Keith, and a member of the Council and Assembly; Hannah Hill (Feb. 25, 1727), daughter of Thomas Lloyd, a native of Montgomeryshire, in Wales; she came to Philadelphia with her parents, married John Delaval, a minister of the society, and ten years after his death, in 1693, married Richard Hill, a leading merchant; Richard Hill (died in 1729) was for twenty-five years a member of the Governor's Council, several times a member and Speaker of the General Assembly, and for ten years judge of the Provincial Court; Dennis Conrad, of Germantown, died in 1729. At his house the first meeting of Germantown Friends was held; Isaac Norris, 1735, a merchant, who emigrated from Jamaica, many times a member of the Assembly, and at the time of his death chief justice of Pennsylvania; Edward Jones, of Merion, February, 1737, in his seventy-sixth year; Robert Evans, of North Wales, in March, 1738, aged over eighty; Benjamin Humphreys, of Merion (Nov. 4, 1738), who came over in 1683; John Salkeld, at Chester, Nov. 29, 1739, aged nearly sixty-eight,—he was a prominent minister among the early Friends, and had traveled in England, Scotland, and Ireland, preaching the doctrines of his sect; Thomas Chalkley, while "itinerating" at the island of Tortola, Nov. 4, 1741, in his sixty-seventh year; originally a mariner, Chalkley was a man of great importance and influence in the society, and an indefatigable preacher, making long voyages in his vessel, and thus discharging both religious and business duties, he settled near Frankford, where his memory is preserved by his house, Chalkley Hall; Thomas Story, at Carlisle, England, in 1742, he had held various civil offices, and was greatly trusted by Penn; John Cadwalader, of Abington Monthly Meeting, at Tortola, in October, 1742; John Estaugh, of Haddonfield, N. J., a frequent visitor and preacher at the Philadelphia meetings, Dec. 6, 1742, in the sixty-seventh year of his age; Robert Jordan, died October, 1742, in his forty-ninth year. He was a native of Nansemond County, Va., born in 1693, a traveling preacher, came to Philadelphia in 1730, and married Mary, the widow of Richard Hill.

John Oxley, of Barbadoes, died while on a visit to Philadelphia in 1743. He was born at Chester, Pa., but had resided most of his time in the West Indies; Samuel Preston, Sept. 7, 1743, in his seventy-ninth year, born in Maryland, came to Pennsylvania after 1701, was a member of the Governor's Council, and for many years treasurer of the province, married,

[1] In the manuscript journal of John Smith, a minister of the society, the following list is given of persons who preached or prayed at the meetings in Philadelphia and vicinity in 1746, with the number of times each did so:

first, Rachel Lloyd, daughter of Thomas Lloyd, and second, Margaret, widow of Josiah Langdale; Ann Roberts, June 4, 1750, in her seventy-third year, having been a minister fifty years. She was a native of Wales, who, after her arrival in Pennsylvania, settled at Gwynedd. She traveled, preaching, not only through the American provinces, but in England and Wales.

The wars in which Great Britain was engaged about this time necessitated frequent demands upon the Assembly for pecuniary aid; but the majority being Quakers, could not conscientiously vote appropriations for military purposes. Eventually a way out of the difficulty was found by nominally denying military aid, but voting presents of money for the king, which it was well known would be applied to the support of the army. The opposition of Friends to the military establishment would appear, indeed, to have been more formal than real, and qualified, to a great extent, by prudential considerations; for, when necessary, they exhibited no hesitation in accepting the protection of the army or navy. The formal testimonies of the society, however, continued to be given against war.

The attitude of the society toward the institution of slavery began to be defined at an early day. At first, however, the progress was gradual. The protest of the German Friends of Germantown against slavery, in 1688, failed to produce more than a declaration in 1696, after eight years of delay, that Friends should "be careful not to encourage the bringing in of any more negroes," but the holding in slavery of such as were already in the province was not discouraged. In 1711 the Friends of Chester Quarterly Meeting declared their dissatisfaction with Friends buying and encouraging the bringing in of negroes, and "desire the care of this meeting concerning it." After a due consideration of the matter, the meeting, "considering that other Friends in many other places are concerned in it as much as we are, advises that Friends may be careful, according to a former minute of the Yearly Meeting (1696), not to encourage the bringing in of any more, and that all merchants and factors write to their correspondents to discourage them from sending any more." In 1715 the Philadelphia Yearly Meeting advised that Friends concerned in the importation of slaves "should be dealt with;" but in 1716, after confirming the minute of 1715, the meeting recommended that Friends "avoid buying such negroes as shall hereafter be brought in rather than offend any Friends that are against it," adding "*this is only caution, and not censure.*" In 1719 the advice against importing slaves was repeated, and ten years later, in 1729, appeared the first treatise against slavery known to have been published in any part of the world. It was entitled "A Brief Examination of the Practice of the Times," and was written by Ralph Sandiford, and printed against the consent of the society, the overseers of the press having refused to allow its publication.[1] Sandiford's essay appears to have made some impression, for in 1730 the Yearly Meeting went so far as to advise against the purchase of negroes "hereafter to be imported." In 1737 another essay against slavery entitled "All Slave-Keepers that Keep the Innocent in Bondage, Apostates," etc., by Benjamin Lay,[2] was published in Philadelphia, but seems to have met with scant sympathy or approval. The Yearly Meeting of Burlington even went so far as to publish, in Franklin's *Gazette*, Nov. 2, 1738, a statement denying that Lay's book was published with its approbation. On the other hand, the Philadelphia Yearly Meeting of 1738 expressed its satisfaction because of the fact that former rules on the subject of slavery had been somewhat closely obeyed.

In 1739, 1741, and 1742 the Yearly Meeting repeated its advice against the importation of negroes, or buying them after they were imported.

The general discipline of the Friends about this time was very strict. From the list of queries adopted in 1743 it appears that Friends were required to state at least once in each quarter of the year to "overseers or other weighty Friends," who propounded the interrogatories, whether they were regular and punctual in attendance at meetings; whether they refrained from sleeping in meetings; whether they accustomed themselves to "snuffing" or chewing tobacco in meetings; whether they kept clear of excess in drinking drams or other strong drink; whether they kept "company in order for marriage with those that are not of us, or with any others, without consent of parents or guardians;" whether Friends kept clear from tattling, talebearing, whispering, backbiting, and meddling with matters in which they were not

[1] Ralph Sandiford, born in Liverpool in 1693, removed in youth to Philadelphia, and at manhood was engaged in business as a merchant. In the course of his affairs he visited the West Indies, where he witnessed the cruelties practiced against slaves, which excited his sympathy, and caused him to adopt the opinion that the system was entirely wrong.

[2] Benjamin Lay was born in Colchester, England, in 1681, his parents being members of the Society of Friends. He was in early life a sailor, and followed the sea until 1810, when he returned to Colchester. At home he distinguished himself by opposition to the imposition of tithes, and with his own hands presented Milton's tract in relation to removing hirelings out of the church to George I., George II., and the royal family. He was of an erratic disposition, and for this cause, it is supposed, he lost the confidence of the Society of Friends, which disowned him in 1717. In 1718 he settled in Barbadoes as a merchant, where the cruelties practiced against slaves shocked his feelings and caused him to denounce the system of bondage. In 1730 he came to Philadelphia. Here he was noted for his eccentricity. It is said that he once came into the Yearly Meeting with a bladder filled with blood in one hand and a sword in the other. He ran the sword through the bladder and sprinkled the blood on several Friends, saying, "Thus shall God shed the blood of those persons who enslave their fellow-creatures." Lay was a peculiar man in appearance. "His size, which was not above four feet; his dress, which was always the same, consisting of light-colored, plain clothes, a white hat, and half-boots; his milk-white beard, which hung upon his breast, and, above all, his peculiar principles and conduct, rendered him to many an object of admiration, and to all the subject of conversation." He was in his time familiar to every man, woman, and to nearly every child in Pennsylvania. He died in his house in Abington, 1760, aged seventy-nine years.

concerned; whether they frequented music-houses, or went to dancing or gaming; whether the poor were taken care of, and their children put to school and apprenticed out to Friends, and whether Friends put their own children out to Friends as much as might be; whether they were careful in training their children in Quaker principles; whether there were any who launched into business beyond what they were able to manage, and "so break their promises in not paying their just debts in due time;" whether there were any belonging to the meeting that were removed without a certificate, or any coming as Friends from other parts who had not produced certificates; whether Friends observed the former advice of the Yearly Meeting not to encourage the importation of negroes, nor to buy them after being imported; whether Friends were careful to settle their affairs and make their wills in time of health.[1]

The Yearly Meeting for Friends in Pennsylvania and New Jersey adopted, on Sept. 18, 1751 (O. S.), a minute concurring with a minute of the London Yearly Meeting, to the effect that Friends should thereafter reckon January the first month in the year, and should style it "First month," etc., and that they should omit the eleven days next after September 3d (O. S.), in conformity with the act of Parliament. The next Yearly Meeting was appointed to be held on Sept. 24, 1752 (N. S.).

Between the years 1750 and 1776 but one congregation was added to those of the society already in existence in Philadelphia. In 1747, Samuel Powel, the younger, by his will devised to such persons as the Monthly Meeting of the people called Quakers in Philadelphia should nominate, in trust forever, a lot of ground sixty feet in width, situated on the south side of Pine Street, between Front and Second, "there to build a meeting-house on, if the members of that meeting shall agree to build a meeting, and not else." By the will of Samuel Powel, the elder, two side-lots were recommended to be given by his grandchildren, to give light and air to the meeting. They obeyed this direction, and the meeting-house lot was consequently enlarged. In 1753 the meeting-house on Pine Street was erected, and it was called in early times the Hill Meeting, in consequence of its being situated upon Society Hill.[2]

During this period (1750–76) the colonies were visited by many leading ministers from abroad. Among them were Jonah Thompson, in 1751; Mary Peisley (who afterward married Samuel Neale) and Catharine Peyton, in 1753; Samuel Fothergill and Joshua Dixon, in 1754; Jane Crosfield, in 1761;[3] John Griffith, Thomas Gawthorp, Abigail Pike, and Rachel Wilson, in 1765; Joseph Loxley and Samuel Neale, in 1770; Elizabeth Robinson, Mary Leaver, and Robert Walker, in 1773. Most, if not all, of these spent some time in Philadelphia.

Among the American Friends of prominence who visited Philadelphia during the same period were John Woolman, of New Jersey; Abraham Farrington, of Bucks; William Hunt, of North Carolina; Mary Griffin, of Nine Partners, N. Y.; Susanna Morris, wife of Morris Morris, of Richland Monthly Meeting, Pennsylvania; Peter Andrews, Burlington, N. J.; David Ferris, of Wilmington; Joshua Evans, of New Jersey; William Matthews, of Virginia; Mary Brook, of Maryland, sister of William Matthews; Margaret Elger, of Maryland, another sister of William Matthews; William Amos, of Maryland;

[1] "These queries," says Thompson Westcott, "seem to have been modifications and amendments of queries formerly in use, which were much more minute and particular, and which, according to a minute of Concord Quarterly Meeting, in 1711, embraced, in addition to the above matters, the following prohibitions, advices, and inquiries,—against proposing marriages without Friends' consent; that burials shall be kept solid and grave; that parents and masters care to keep children and servants from hurtful principles and practices, and that they marry with none but Friends; against unreasonable keeping company with women, or at all, in order for marriage with such as don't profess truth; against inviting servants to marriage, except to near relations; against going to the marriages of any that profess truth, but marry not among Friends; against keeping company, in order for marriage, with any one's servant without leave of master or mistress; that every person shall be "clear of one before being concerned with another" in an engagement of marriage; against being too hasty in marriage after the death of husband or wife; against marriages by priests (*i.e.*, clergymen of other denominations); against Friends putting their children apprentices, or otherwise, to be brought up by those who are not Friends; that parents should often cause their children to read the Holy Scriptures, and should have them taught writing, and that they be brought up in some useful employment; against drinking to excess, swearing, cursing, lying, etc.; against superfluity of apparel and furniture in all its branches; against calling the days and months contrary to Scripture, and against calling them by the names of the idol gods of the heathen; that Friends should always speak the plain Scripture language of *thee* and *thou*; against smoking tobacco in streets, roads, and public-houses, except privately; against giving any just occasion of trouble to the government, and against refusing to pay its tributes or assessments; against selling rum to the Indians; against buying Indian slaves; against brother going to law with brother; against challenging to fight, etc.; against keeping vain or loose company in fairs, markets, drinking-houses, or other places; against vain and frothy discourses; against drinking to excess; and against a vain custom of drinking healths, as it is called; and against drinking to one another.

[2] Thompson Westcott.

[3] During the visit of Jane Crosfield the Monthly Meeting at Philadelphia, Oct. 30, 1761, adopted a paper certifying to her exemplary conduct, etc., while among them, which was signed by the following: Anthony Morris, Mordecai Yarnall, Daniel Stanton, William Brown, Benjamin Trotter, Jeremiah Elfreth, Zachariah Ferris, John Armitt, Joshua Emlen, Hugh Evans, Samuel Mickle, John Reynell, Joseph Lownes, John Burr, Paul Kripner, Anthony Benezet, James Pemberton, Isaac Zane, Samuel Sansom, Thomas Hallowell, Israel Pemberton, Owen Jones, John Smith, Hugh Roberts, David Bacon, William Lightfoot, Jonathan Mifflin, Thomas Mattieman, Samuel Wetherill, Jr., William Calvert, John Lynn, John Pemberton, John Drinker, Isaac Greenleaf, Benjamin Hooton, Samuel Emlen, Jr., Charles West, Abel James, Anthony Woodcock, Israel Morris, Isaac Howell, William Savory, Edward Thomas, Benajah Andrews, Benjamin Kendal, Thomas Clifford, Job Bacon, John Armitt, Jr., Edward Jones, Samuel Morton, Edward Elam, Robert Lewis, Richard Jones, Thompson Parker, Thomas Say, Robert Parrish, Alice Hall, Rebecca Coleman, Mary Emlen, Catharine Callender, Mary Evans, Hannah Carpenter, Lowry Evans, Martha Roberts, Rachel Pemberton, Mary Pemberton, Mary Armitt, Hannah Lloyd, Hannah Allen, Margaret Haines, Hannah Logan, Magdalen Brown Sarah Yarnall, Rebecca Jones, Mary Elfreth, Sarah Jenkins, Mary Wiley, Sarah Zane, Susanna Jones, Elizabeth Shoemaker, Catharine Lightfoot, Elizabeth Emlen, Elinor Moode, Sarah Mifflin, Ann Thornton, Phebe Morris, Jr., Sarah Morris, Susanna Mason, Mary Pemberton, Jr.

John Simpson, of Bucks County, Pa.; James Simpson, of Bucks County, Pa.; Evan Thomas, of Maryland; Job Scott, of Rhode Island; and David Sands, of Long Island.

A number of American Friends, many of them from Philadelphia, went to Great Britain and ministered to the meetings there, and elsewhere in Europe. Daniel Stanton, of Philadelphia, visited the Friends in Great Britain and Ireland in 1749–51. John Churchman, of Pennsylvania, with William Brown, a minister, sailed from Chester in April, 1750, and were engaged for some months in a mission in Great Britain, Ireland, and Holland. John Pemberton went with them. He was not a minister, but during his stay in England he felt it was his duty to undertake the gospel service. He first spoke at Penzance, in Cornwall, and afterward traveled with Churchman and Brown in various parts of England, where they remained over three years, and afterward went to Holland. Pemberton came back to Philadelphia in the early part of 1754. Churchman returned in the latter part of the same year. Samuel Emlen, Jr., visited England in 1756, and traveled with Abraham Farrington, of New Jersey. He first spoke as a public minister at a meeting in Carlow, Ireland, in 1756–57. Sarah and Deborah Morris, of Philadelphia, were in England on a religious visit in 1772. John Woolman went to England in 1772, and Samuel Emlen went with him on another mission. During this visit Woolman died at York, Tenth month 7, 1772, aged nearly fifty-two years, having been a minister more than thirty years.

Of the ministers of the Philadelphia meeting the more notable were George Dillwyn, born in Philadelphia in 1738, who, after being engaged some years in mercantile pursuits, entered the ministry about 1766; Rebecca Jones, born in Philadelphia in 1739, and brought up in the Church of England, but having been affected by the preaching of Catharine Peyton and Mary Peisley, became a member of the Society of Friends, was recognized as a minister, and taught a girls' school in Philadelphia for many years; James Thornton, born in Buckinghamshire, England, about 1727, and came to America in 1750; Nicholas Waln, born at Fairhill, in 1742, was educated at the Friends' school, Philadelphia, was admitted while a minor to the Philadelphia courts with a view to his education as a lawyer, but desiring to perfect his studies went to London, where he was entered at the Temple; and returning home practiced law for seven years; but some of the cases in which he was engaged being of such a character as to raise a doubt in his mind whether he was acting as a Christian should, he decided to relinquish his profession, and having dismissed his students, and returned to his clients the papers belonging to them, and sent back the fees for cases which he had not finished, he became a constant attendant at religious meetings, and finally a minister.

A number of ministers of prominence in the society died during the period from 1750 to 1776. Among them were Michael Lightfoot, a member of the Philadelphia Monthly Meeting since 1725, who died Dec. 3, 1754; James Logan, secretary of William Penn, chief justice of the province, etc., who died Oct. 31, 1751, in his seventy-seventh year; Israel Pemberton,[1] first son of Phineas, of Bucks County, born in that county in 1684, and died at Philadelphia, Jan. 19, 1754.

Daniel Stanton died at Germantown June 28, 1770, after having served as a minister more than forty years; Thomas Brown, died June 21, 1757, was a native of Barking, Essex, England, born September, 1696, came to Philadelphia when young, and was an active minister for a number of years; Jane Jones, of Gwynedd Monthly Meeting, wife of John Jones, of Montgomery township, Philadelphia County, died May 11, 1758; Benjamin Trotter, born in Philadelphia in September, 1699, died in March, 1768; Mary Knight, wife of Isaac Knight, of Byberry, and daughter of John and Mary Carver, who came from England in 1682, died March 4, 1769;[2] Thomas Wood, a member of Abington meeting for sixty-four years, and a minister upwards of forty-five years, died March 7, 1769; Isaac Child, of Abington, died April 5, 1769; Mary Evans, of Gwynedd, wife of Owen Evans, died May 20, 1769; William Foulk, elder and overseer at Gwynedd for many years, died Aug. 30, 1775; Sarah Morris died at Philadelphia Oct. 24, 1775, in the seventy-second year of her age, and the thirty-first year of her ministry.[3]

The discipline of the society was carefully maintained, and testimonies regarding children and youth and marriages were kept up faithfully. In 1755 it was unanimously agreed by the Yearly Meeting that in such places where Monthly Meetings of ministers and elders had not already been settled, they should be established without delay, and that "solid women

[1] Israel Pemberton was taught mercantile affairs in the establishment of Samuel Carpenter, and became one of the leading merchants of the city and a man of influence in the affairs of the province. He was a member of the General Assembly for nineteen years. His widow, Rachel Pemberton, was an elder, and survived him eleven years. She was a daughter of Charles Read, and was born at Burlington, in 1691. Out of a family of ten children, Israel left three sons living,—Israel, James, and John,—all of whom were eminent and useful in the Society of Friends, and were recognized as ministers. Israel succeeded his father in political affairs, and was a man of great influence in directing the course of the Quakers during the difficulties which they had to encounter in consequence of political contingencies and events between the years 1750 and 1775.

[2] Mary Knight was "born in or near Philadelphia," says Thompson Westcott, "being one of the first children born in the province of English parents."

[3] She was born in Philadelphia, and was the daughter of Anthony and Elizabeth Morris. She devoted herself to traveling. She visited meetings in Pennsylvania, New Jersey, New York, and Maryland, with Margaret Ellis. In 1764 she visited Rhode Island with Joyce Benezet and Elizabeth Smith. In 1772 she went with Deborah Morris, her niece, to England, and traveled through the greater portion of Great Britain preaching, she being at that time in the seventieth year of her age. After her return she visited meetings in New Jersey, New York, and Long Island.

elders should be appointed to sit therein." With regard to the care of youth, the Yearly Meeting, in 1760, declared that "one prevailing danger" was "the frequenting of public companies, such as are too often met with in taverns, at fairs, and at all places of public diversion." The society was careful to protect its members from improper marriages, and the Yearly Meeting, in 1766, advised that "when persons having some right of membership are under immediate dealing by the overseers or by the meeting for conduct, and are publicly reproached, and in that situation are likely to propose intentions of marriage, they should be advised against making such proposals until they have offered such condemnation of their misconduct as the Monthly Meeting shall think sufficient; and if, notwithstanding such advice, any person so situated shall offer such proposals, we think the meeting should demand such an acknowledgment before they show so much of unity as to admit such proposals." When declaration was made before the society of an intention to marry, which was not followed by the consummation of the ceremony, it was usual to inquire the reasons, and if the latter were not satisfactory to deny "full unity" with the person thus offending. Marriages were occasionally celebrated with great feasting, a practice which, on account of the extravagance resulting, was condemned by some of the meetings.[1]

The testimony of the society against oaths was now extended to the administration of oaths by Friends as civil magistrates, and Friends were exhorted by the Yearly Meeting of 1771, "in all places carefully to avoid electing or promoting their brethren to such stations in civil government as may subject them to the temptation of violating them, and where any members show an inclination or desire of soliciting or accepting such offices, faithful Friends should take timely care to discourage and caution them against it."[2]

With reference to the question of slavery more radical action was also taken. In 1750 the society disapproved the practice of importing negroes from Africa or buying such as were imported, but made no formal declaration concerning the buying, holding, or selling of slaves born in the country. During the same year Anthony Benezet opened an evening school in which negroes were taught gratuitously, and began the publication of writings on the subject of slavery. In 1754 Yearly Meeting issued an epistle concerning slavery which declared that "where slave keeping prevails pure religion and sobriety decline," and discountenanced the purchase of negroes either born in the country or imported as contributing "to a further importation, and consequently to the upholding of all the evils above mentioned."[3]

In 1758 it was declared by the Yearly Meeting that "there was a unanimous concern prevailing to put a stop to the increase of the practice of importing, buying, selling, or keeping slaves for a term of life." In order to enforce these sentiments, John Woolman, John Churchman, John Scarborough, John Sykes, and Daniel Stanton were appointed to visit "and treat with all such Friends who have any slaves;" and it was declared further that "if, after the sense and judgment of this meeting now given against every branch of this practice, any professing with us should persist to vindicate it and be concerned in importing, selling, or purchasing slaves, the respective Monthly Meetings to which they belong should manifest their disunion with such persons by refusing to permit them to sit in meeting for discipline, or to be employed in the affairs of truth, or to receive from them any contributions toward the relief of the poor, or other services of the meeting."[4]

In 1774 the Yearly Meeting resolved that "such professors among us who are or who shall be concerned in importing, selling, or purchasing, or who shall give away or transfer any negro or other slave, with or without any other consideration than to clear their estate of any future encumbrance, or in such manner as that their bondage shall be continued beyond the time limited by law or custom for white persons, and such members who accept of such gifts or assignments, ought to be speedily treated with in the spirit of true

---

[1] "The early marriages of Friends," says a writer in the *Christian Observer*, published in Philadelphia in 1853, "took place in private dwellings, prior to the erection of the first meeting-house, and are now to be found on record in the hands of Caleb Canby, a well-known citizen, who resides at the southeast corner of Branch and Fourth Streets, above Race. I have examined the first volume, commencing with the year 1672 and ending with 1758, and found, on page 62, the registry of my great-grandfather's marriage in 1709. The volume is in excellent preservation, and contains some of the finest specimens of good writing I have ever seen." These records are now in the possession of the Monthly Meeting at their meeting-house on Arch Street, where they are carefully preserved in a fire-proof vault. A custodian is regularly appointed by the meeting—one of the overseers—whose duty it is to read the certificate at the time of the wedding, and see that it is properly signed—the witnesses to the "solemnization and subscription" also signing their names. The certificate, with the signatures of the husband and wife, and also the names of the witnesses (sometimes in great numbers) are afterward duly recorded by him in the books designed for that purpose. Caleb H. Canby performed this duty very acceptably for many years,—up to the time of his death, in 1852. The "Arch Street Meeting" being the "old original," kept possession of the old records, so that Mr. Canby had control of them for the time being, and could have properly shown them to any one wishing to examine them.

[2] Thompson Westcott.

[3] During the same year, John Woolman, of Burlington Monthly Meeting, published a work entitled "Consideration on the Keeping of Negroes." It was recommended to the professors of Christianity of every denomination. A second part was added in 1762. Woolman seems to have been concerned in regard to this practice of slave-keeping from an early age, and his convictions were strengthened by his observations during his travels. In 1746 or 1747 he wrote his treatise on slavery, which he showed to his father, Samuel Woolman, and which was approved by him. It was offered to the society in 1753, was approved by the overseers of the press, and was ordered to be published and paid for out of the Yearly Meeting stock.

[4] In 1767, Anthony Benezet published "A caution to Great Britain and her Colonies Relative to Enslaved Negroes in the British Dominions." In 1772 he published "Some Historical Account of Guinea, with an Inquiry into the Rise and Progress of the Slave Trade, its Nature and Lamentable Effects."

love and wisdom, and the iniquity of their conduct laid before them." In regard to those who had not yet complied with former admonitions, and who still held slaves in bondage with views of temporal gain, and could not be prevailed with to release from captivity such slaves as were found suitable for liberty, Quarterly and Monthly Meetings were advised to unite "in a speedy and close labor with such members."[1]

We come now to the period of the Revolutionary war, during which the supremacy of the Society of Friends in Pennsylvania was overthrown. Up to this time their principles and practices had possessed the weight of authority, and while they accorded toleration to all sects, the administration and the Legislature during the rule of the first proprietary were governed by Quaker influences. Penn favored them with valuable grants of land, distinguishing them in this respect from the Church of England, the Presbyterians, and the Baptists, who acquired property slowly and through the personal efforts of their members until the proprietary interest was transferred to the control of churchmen. This change was largely brought about by the humiliation which William Penn, Jr., the eldest son of the founder, received at the hands of the Quaker magistrates. In 1704 he was arrested in Philadelphia for riotous conduct, and treated by the authorities without due regard to his dignity. After this occurrence, it was reported that he had "fallen quite away from Friends," and his defection carried the descendants of the founder, after the latter's death, back to the Church of England, to which Admiral Penn, the father of William, had belonged. The result was "continual controversies and sometimes bitter quarrels between the Assemblies, Lieutenant-Governors, and proprietaries."[2] The proprietary's representatives in the government were churchmen, antagonistic to the Society of Friends, who, compelled to be tolerant, were yet determined to grant no concessions or privileges beyond what the Constitution and frame of government allowed. The offices under their control were filled either with churchmen or with persons who were not Quakers; and toward the latter part of the eighteenth century there were few members of the Society of Friends in the Governor's Council. The Assembly, however, continued under the control of the Quakers, and there was naturally an irreconcilable divergence upon almost every important public question, as well as most minor matters between that body and the anti-Quaker executive. In 1756 the Assembly undertook to establish a representation at the British Court, in order, if possible, to counteract the influence of the proprietary and his deputies, and with that end in view appointed Isaac Norris and Benjamin Franklin its agents at London. But little was accomplished by this step, as the passage of the Stamp Act created intense excitement throughout the colonies, and paralyzed the efforts of the Pennsylvania agents in London, rendering futile in advance any efforts that might have been made by the Quaker interest to array the crown against the proprietaries. In the struggle for American liberty which followed, a great majority of the Pennsylvania Quakers adhered to the royalist cause, "so much so as to persecute such of their members as inclined to the patriot side."[3]

In consequence of this state of feeling among them, and repeated acts on their part exhibiting a settled hostility to the patriot cause, extreme measures were resorted to by the Revolutionary authorities, and the sect suffered heavily in character and influence by the result of the contest. Their meetings for worship were less interfered with, however, than were those of any other denomination. During the period of Whig ascendency in Philadelphia, they were not disturbed, and when the British occupied the city they were treated with special consideration and respect on account of their well-known loyalist tendencies.

During the Revolution there was no change in the situation of the meeting-houses. The Bank meeting-house, on Front Street, the great meeting-house, at Second and High Streets, the Hill Meeting, or the Pine Street Meeting, and those at Germantown, Gwynedd, and other places in Philadelphia County, remained in use by members of the society. After the Revolution it was concluded to abandon the Bank meeting-house on Front Street,[4] and to build a new meeting-house in Keys Alley (now called New Street), between Front and Second, which was called "the North Meeting,—more commonly "the Keys Alley Meeting." The latter was finished and occupied, Watson says, in 1789. Probably it was later. To the North Meeting, in Keys Alley, were attached many worthies, among whom were Samuel Smith, John Parrish, Samuel Emlen, Thomas Scattergood, William Savery, Henry Drinker, Jacob Tompkins, Leonard Snowden, Nathan A. Smith, Joseph Justice, Thomas Morris, Joseph Yerkes, John de Marsellac, Stephen Grellet, John Webb, and on the women's side of the meeting-house, Rebecca Jones, Hannah Catherill, and others.

[4] The late William McKoy, in his "Reminiscences," gives the following statement of the reasons which led to the removal of the Bank meeting-house:

"Friends were long accustomed to hold night meetings on the Sabbath. Their house on the Bank Hill, on Front Street, was at first called Evening Meeting because chiefly made for such a convenience when that at the Centre Square was too far off. They continued the evening meetings till after the Revolution, when they were constrained by their sense of 'not letting their good being evil spoken of,' to disuse them, because their young women (as at some other meetings almost ever since) were mobbed by rude young men, who assembled in long lines of idlers, generating and cherishing more evil without the walls than the good people could counterbalance within. The change met the approbation of the discreet,—of those who virtually aim by every means 'to suppress vice and imr

The meeting-house at Byberry, built in 1714 and reconstructed in 1753, was so dilapidated about 1800 that it was evident a new structure would soon have to be built. In 1786 the select members of Byberry Meeting were Joseph Thornton (minister), Thomas Townsend, John Townsend, Susanna Walmsley, Grace Townsend, Agnes Walmsley, and Mary Knight.

The excitement of the times had not produced any perceptible effect upon the discipline of the society, which continued its warnings to youth against vain and unprofitable fashions, idle amusements, follies, games, and recreations, and its recommendations in favor of plainness of dress and truth and soberness in conversation. In 1792 the Yearly Meeting admonished those who departed "from that simplicity which truth requires, and who run into and copy the vain fashions of the world," that in case they could not be reclaimed, Monthly Meetings might "give forth testimony of disownment against them."[1]

In 1792 Yearly Meeting appointed a committee to visit Quarterly, Monthly, and Preparative Meetings, which, it was said, "as truth may open the way, may conduce to the promotion of our several religious testimonies, and the benefit of individuals." Upon this committee the most influential Friends belonging to Yearly Meeting were appointed, viz., Nicholas Waln, Caleb Cresson, James Thornton, William Blakeley, Oliver Paxson, Joshua Sharpless, Samuel Canby, Abraham Gibbons, Isaac Coates, Warner Mifflin, Daniel Cowgill, George Dillwyn, Benjamin Clarke, John Collins, William Rogers, Benjamin Reeve, Isaac Martin, Abraham Hibbard, John Simpson, John Hoskins, James Pemberton, Huson Longstreth, and Mark Miller. In 1800 it was agreed that "the publishing of testifications and papers of acknowledgment at our meetings for public worship should be in future discontinued." This had reference to a practice at meetings in which erring Friends publicly confessed their shortcomings and aberrations. The practice had given much food for gossip and scandal, while scarcely securing the advantages which were hoped for from the humiliations.

Among the Friends who visited Philadelphia about this time were Joseph Nichols, founder of the sect known as "Nicholites" or "New Friends." Nichols was a farmer of Kent County, Md., who, in 1760, having led a gay life and become very popular on account of his social qualities, turned his attention to religious matters, and soon after began to exhort. He insisted on self-denial, plainness of living, and bore testimony against war, slavery, oaths, and a hireling ministry. The principles of his followers were much like those of the Society of Friends. The Nicholites effected a regular order of discipline and church organization about 1780. About 1800 and afterward some of them united with Friends, and in time all the Nicholites went over to the latter and transferred their meeting-house property to the Friends.

Another prominent visitor to the Philadelphia meetings was Elias Hicks, who afterward became noted as the disseminator of principles which led to a division in the society. He was the son of John and Martha Hicks, of Hempstead, L. I., where he was born on the 19th of May, 1748. In his youth he was apprenticed to a house-carpenter, and learned that trade. He began to speak in Friends' meetings in 1775, when he was twenty-seven years old, and soon became very active in the ministry. He was well known throughout the country for his fervid oratory, as well as for his purity of life and devotion to good objects.[2]

Having expressed opinions which seemed to be in conflict with those generally held by the society, he received, in 1818, a letter from Phœbe Willis, who wrote to him "under a profession of concern for his religious welfare." Thomas Willis, of Jericho, L. I., and Samuel Parsons, of Flushing, clerk of New York Yearly Meeting, had in the mean time taken down various utterances of Hicks, and the accusation was now brought against him of entertaining heretical views. Hicks replied to a second letter from Phœbe Willis in 1820, and to one from Thomas Willis in 1821. Some time after these letters were written, Willis proposed a friendly interview with Hicks, who requested that his letters should be brought to him. On that occasion the letters were exchanged. Hicks gave up his letters from Phœbe and Thomas Willis, and in return received those which he had sent to them. But a copy of one of his letters was, without the knowledge of Hicks, kept back. It was circulated among Friends who were opposed to Hicks' doctrines, and was printed.

In 1819, Hicks attended a Monthly Meeting at the Pine Street meeting-house. He spoke in the men's meeting, and "expressed a concern that he felt to visit the women Friends in their meeting for disci-

[1] In regard to this subject William McKoy says,—

"The dress of Friends, at first, was not intended to differ greatly from the common mode of the time, save that it was to exclude all show, and to appear simple and neat. I mean that they have since *seemed* more peculiar in their dress from the fact that fashion changed since from what was their starting-point, and to which they have adhered with more steadiness and sobriety than others. When they started as a sect, broad-brimmed felt hats, with loops at the side, were common. So of their coats and the straight collars. The *drab* was their prevalent color, because least removed from the uncolored state of cloth or *drap*. They excluded the use of metal buttons because of their former extreme tinsel finery, and they wore cloth-covered or stained horn ones. They used *ties* to shoes when buckles were worn with much display."

[2] A writer in *The Christian Examiner and General Review* thus speaks of Hicks as he appeared about 1828: "His figure was tall, his proportions muscular and athletic, his face of the Roman cast, intellectual and commanding, his voice deep, his gesture dignified and graceful. He had perhaps as much of what is called 'presence' as any man who could be named. The knowledge that he was to speak had drawn together a large assembly, which was sitting, when we entered, in the most profound silence. Statuary could not have been more still. Not a limb moved, not a garment rustled, not a breath was heard. At length this venerable figure arose like an apparition from another world, and poured forth a strain of natural eloquence which is not often surpassed."

pline." Some objection was made, particularly by Jonathan Evans, an elder. But a large number of Friends having "expressed their full unity at his being at liberty," he went to the women's meeting, Isaac Lloyd, an elder, being appointed to go with him. While he was engaged at the women's meeting, Evans insisted on adjourning the men's meeting, which was considered "an unusual, if not an unprecedented, proceeding." Some members concurred with Evans, and the meeting was adjourned. This transaction was construed to be an affront to Hicks, and produced great excitement, showing, as it did, the existence of a feeling unfavorable toward him in Philadelphia.

In 1822 measures were concerted at an unofficial meeting of a portion of the Meeting for Sufferings. Jonathan Evans was the principal actor. After the regular meeting was closed, this particular meeting was held by the few who remained. The subject of Hicks' unsoundness was discussed. As it was understood that he was about to visit Philadelphia again, and as it was asserted that he preached doctrines contrary to the doctrines of the society, it was declared necessary to stop him. Two or three elders were thereupon appointed to wait on Elias Hicks when he should arrive in the city, and although the object of their visit was not stated, it may be presumed that it was to remonstrate with him for his alleged heresies. Hicks was not deterred in his object. He went to Baltimore, and upon his return to the city was waited upon by the elders. He seems to have satisfied them, but their report was not acceptable to those who sent them. He was then summoned to appear before the male elders of the five Monthly Meetings of Philadelphia, and after protesting that they had no authority over him, that the utterances complained of were made outside of the Philadelphia Meeting, and that no sentiment delivered by him in Philadelphia had ever been objected to, he finally agreed to meet the elders from the Monthly Meetings at the Green Street meeting-house. He proposed to bring John Comly, Robert Moore, John Moore, John Hunt, and others, some of whom had been at the Southern Quarterly Meeting, and who, having heard his most recent expressions, could give evidence in the case. The ten elders refused to allow these Friends to appear. One of them said that they desired to have a "private opportunity" with Elias Hicks, and added that "unless it was private they would have none." Abraham Lower, a minister of the Green Street Meeting, protested, particularly on account of unfairness; also because Hicks was then performing "family visits" to the members of that meeting, some of whom thought themselves concerned in the case, and insisted on being present at the conference between Hicks and the elders. The latter would not accede to this, and they withdrew. Two of them then endeavored to dissuade the elders of the Green Street Meeting from allowing Hicks to prosecute his visits. Subsequently the ten elders—Caleb Pierce, Leonard Snowden, Joseph Scattergood, S. P. Griffiths, T. Stewardson, Edward Randolph, Israel Maule, Ellis Yarnall, Richard Humphries, and Thomas Wister—sent a letter, dated Dec. 19, 1822, to Hicks, embodying the charges made against him. These were that he held and promulgated doctrines repugnant to those professed by the society, *i.e.*, according to the statement of Joseph Whitall, he argued "that Jesus Christ was not the son of God until after the baptism of John, and the descent of the Holy Ghost, and that he was no more than a man; that the same power that made Christ a Christian must make us Christians; and that the same power that saved Him must save us." Some time after Whitall had brought these alleged declarations to the notice of the society, several Friends being together in the city, received an account from Ezra Comfort of alleged expressions by Hicks at a public meeting in Delaware, which was confirmed by Comfort's companion, Isaiah Bell. Comfort and Bell represented that Hicks had declared "that Jesus Christ was the first man who introduced the gospel dispensation, the Jews being under the outward or ceremonial law or dispensation, it was necessary that there should be some outward miracle, as the healing of the outward infirmities of the flesh, and raising the outward dead bodies, in order to introduce the gospel dispensation; He had no more power given Him than man, for He was no more than man; He had nothing to do with the healing of the soul, for that belongs to God only. Elisha had the same power to raise the dead; that man, being obedient to the spirit of God in him, could arrive at as great or a greater degree of righteousness than Jesus Christ; that 'Jesus Christ thought it not robbery to be equal with God; neither do I think it robbery for man to be equal with God;' then endeavored to show that by attending to that stone cut out of the mountain without hands, or the seed in man, it would make man equal with God, saying, for that stone in man was the entire God." On hearing the statement of Comfort and Bell, the meeting decided the subject to be one of such importance as to "require an extension of care in order that if any incorrect statement had been made it should as soon as possible be rectified, or, if true," that Hicks might be "possessed of the painful concerns of Friends and their sense and judgment thereon." Accordingly, two elders waited on Hicks, who denied the statement of Comfort and Bell, but declined to meet his accusers in company with the two elders, thereby leaving "the minds of Friends without relief." After a reiteration of Hicks' refusal, the elders from the different Monthly Meetings of the city were convened and requested "a private opportunity" with him, which he also refused. On the following day, however, he consented to meet them at a time and place of his own fixing, but when assembled (according to the statement of the

proceedings in the letter of December 19th, from the elders to Hicks), "a mixed company being collected, the elders could not in this manner enter into business which they considered of a nature not to be investigated in any other way than in a select, private opportunity. They therefore considered that meeting a clear indication of thy continuing to decline to meet the elders as by them proposed." Under these circumstances the elders declared that, as it appeared that Hicks was not willing to hear and disprove the charges brought against him, they felt it their duty to declare that they could not have religious unity with his conduct or with the doctrines he was charged with promulgating.

To this letter Hicks replied two days later, asserting that the charges against him by Whitall were not "literally true," but were founded on a forced and improper construction of his words. He added that he did not consider himself amenable to Whitall or to any other for crimes laid to his charge as being committed in the course of the sittings of the last Yearly Meeting, as "not any of my fellow-members of that meeting discovered or noticed any such things, which I presume to be the case, as not an individual has mentioned any such things to me but contrary thereto." Many of the "most valued Friends," he added, "acknowledged the great satisfaction they had with my services and exercise in the course of that meeting, and were fully convinced that all those reports were false; and this view is fully confirmed by a certificate granted me by the Monthly and Quarterly Meetings of which I am a member, in which they expressed their full unity with me, and which meetings were held a considerable time after our Yearly Meeting, in the course of which Joseph Whitall has presumed to charge me with unsoundness of doctrine, contrary to the sense of the Monthly, Quarterly, and Yearly Meetings of which I am a member, and to whom only do I hold myself amenable for all conduct transacted within their limits." With reference to the charges preferred by Ezra Comfort, he asserted that they were "in general incorrect," and assigned as his reason for refusing to confront his accuser, that Ezra Comfort had departed from gospel order in not mentioning his uneasiness when present with him, and when he (Hicks) could have appealed to Friends of the meeting to justify him; that therefore he considered that Comfort had acted in a disorderly manner, contrary to discipline, and he (Hicks) had consequently refused compliance with the requisitions of the elders, considering them arbitrary and contrary to the established order of the society. Hicks' letter was accompanied by a certificate from Robert Moore, Joseph Turner, and Joseph G. Rowland, in which they asserted that the statements of Comfort and Bell—of expressions made by Hicks at "a meeting succeeding the late Southern Quarterly Meeting"—were incorrectly quoted. That portion of the charge of Bell, commencing with the words that "Jesus Christ was the first man who introduced the gospel, and that it was necessary there should be some outward miracles in order to introduce the gospel dispensation," was substantially correct; but the succeeding phrases, "Christ had no more power given Him than man, for He was no more than man," and "that He had nothing to do with healing the soul, for that belonged to God only," were incorrect. Various other statements in the charges of Bell were declared to be incorrectly quoted. Twenty-two members of the Southern Quarterly Meeting subsequently sent a letter corroborating the certificate of Moore, Turner, and Rowland. Comfort and Bell were brought before the Monthly Meeting to which they belonged, but were unwilling to acknowledge error, and were disowned; but were reinstated by the Yearly Meeting.

On the 1st of January, 1823, nine elders wrote another letter to Hicks, in which they expressed disapprobation of his doctrines. Hicks' real or alleged opinions had now begun to attract general attention in the society, and many sermons and pamphlets were published on the subject.[1]

In the latter part of 1822 the Meeting for Sufferings of Philadelphia was called upon to consider a doctrinal controversy over the signatures of "Paul" and "Amicus," published in a periodical at Wilmington, Del. "Paul" attacked the doctrines of Friends, and "Amicus" defended them. The Meeting for Sufferings was called upon with the expectation that it would sustain the position of "Amicus," as being correct statements of Friends' doctrines. But objections were made, and the author of "Amicus" promptly avowed his intention of taking the responsibility. This was not satisfactory. A committee of the Meeting for Sufferings in January, 1823, proposed the adoption of a minute disavowing the statements of "Amicus." By way of counteracting it they brought forward a project to publish a book entitled, "Extracts from the Writings of Primitive Friends Concerning the Divinity of our Lord Jesus Christ." The proposed minute was to be inserted in the preface, but the publisher refused to print it. There was also objection to the extracts. They were printed but not distributed. At the Yearly Meeting in the spring of 1823 the proceedings of the Committee of Sufferings were read in relation to these matters; but to the great surprise of many, instead of merely

[1] Among these were a report of a conversation with Hicks by Anna Braithwaite, of England, which was discredited by Hicks' friends in a pamphlet, "Letters and Observations," by Edward Parker, published in Philadelphia in November, 1824; "Calumny Refuted," said to be from the pen of an Episcopal clergyman; "Sermons delivered by Elias Hicks and Edward Hicks in Friends' Meetings, New York, in Fifth month, 1825, taken in Short-Hand;" "Sermons by Thomas Wetherald," also taken in short-hand, a sermon delivered in Baltimore by Gerard T. Hopkins, and many others. A portrait of Elias Hicks in silhouette, from a cutting by Master Hubbard, celebrated as a profile cutter by sight, was published in April. It was the only method by which a portrait of Hicks could be obtained, as he was strongly opposed to sitting for a portrait.

stating the proposition in regard to the "Extracts," Jonathan Evans, the clerk of the Meeting for Sufferings, had copied on his minutes all the "Extracts," which were thus read as part of the minutes to the Yearly Meeting. The design, it was supposed, was to obtain for the "Extracts" the sanction of the Yearly Meeting without further examination, and thus have them recognized as established doctrines. Efforts were made to have them taken from the minutes, which was objected to by Evans, because such action would deface them. Finally the Yearly Meeting decided not to publish the pamphlet. It was called in derision "The Creed."

The party opposed to Hicks held the places of influence in the meeting. Under the discipline and practices of the society, the clerk of the meeting possesses power almost autocratic. It is his privilege to decide how questions are determined by his understanding of the opinion of the majority of the members, which opinion is usually called the "weight of the meeting." The clerk ascertains the "weight of the meeting" sometimes by what is said, and sometimes by what is not said.[1]

To have the clerk of the meeting on the side of either party was therefore an important matter, and the party opposed to Elias Hicks—which about this time began to be called "Orthodox"—addressed itself particularly to obtain, not only in Yearly Meeting, but in Quarterly, Monthly, and Weekly Meetings, the clerks, overseers, trustees, and a majority of the important committees. In Philadelphia they carried nearly everything their own way. Of the five Monthly Meetings, the Green Street Meeting alone withstood the powerful combination. In the latter a new trouble arose in consequence of the method of dealing with Leonard Snowden, one of the members. Green Street Quarterly, in December, 1822, had acted on the religious engagement of Elias Hicks in visiting the families of members with an indorsement of unity and approbation, which was placed upon its certificate. Snowden, it was alleged, assented to the certificate and the language used in it, but afterward joined with the opponents of Hicks in a paper impeaching his gospel ministry. As Green Street Meeting sustained Hicks, the conduct of Snowden was looked upon as irregular and disorderly. The meeting resolved that he should be "taken under its care through the medium of the overseers." They made earnest efforts to "effect a reconciliation," which being impossible, Snowden was "released from the station of elder," his other rights as a member being unimpaired. Before this action was perfected, a new element of difficulty was interjected into the case. In April, 1823, the Preparative Meeting of ministers and elders belonging to Green Street Monthly Meeting took up the subject, and requested the aid of the Quarterly Meeting of ministers and elders. This interference was alleged to be expressly prohibited by the rules of discipline. Nevertheless the Quarterly Meeting of ministers and elders acted, in October, on the application of the select Preparative Meeting of Green Street, and, after holding it over for a year, the committee reported against the action of Green Street Meeting. The Quarterly Meeting of ministers and elders, on receiving the report, referred the subject to the Quarterly Meeting for discipline, wherein it was discussed in November, 1824, and postponed,—Green Street Meeting, in January, 1825, having presented a remonstrance against the action of Snowden, and against the jurisdiction of the Quarterly Meeting for discipline. The case was postponed until May, 1826, when it was decided to ask the advice of the Yearly Meeting in regard to a case of difficulty. It does not appear that Snowden's case was ever decided, its consideration being superseded by more important events in the course of the controversy, in which increased bitterness was apparent as time went on, showing elements of discord which were increasing until the society was rent by dissension.

After the close of the Revolution many Friends visited England, and at the Yearly Meeting in London in 1784, Thomas Ross, George Dillwyn, Samuel Emlen, Rebecca Jones, Nicholas Waln, and Rebecca Wright were present from Philadelphia. About this time several of the more conspicuous ministers of that period were active in the society. Among these was Warner Mifflin, a native of the eastern shore of Virginia, who came to Philadelphia during the Revolution and soon became a leading member of his sect.[2]

On the day when the battle of Germantown was fought (Oct. 4, 1777) the Yearly Meeting of Friends was in session in Philadelphia, and had under consideration matters concerning the principles of members of the society. This paper was read by the clerk, interrupted by the sound of cannon. Amid the excitement a committee was appointed to deliver the testimony of the society to the commanders of the contending armies. It consisted of Warner Mifflin, Samuel Emlen, William Brown, Joshua Morris, James Thornton, and Nicholas Waln. They sought Howe's headquarters, and gave a copy of the testimony to him. Going to the American lines they passed them, and the next day were presented to Washington, the commander-in-chief, to whom they also delivered the testimony.

---

[1] In 1823, Samuel Bettle was clerk of the Yearly Meeting, and he was a strong opponent of Elias Hicks. Janney, in his "History of Friends," says that Bettle "regarded all those who gave their voices against the adoption of the Declaration of Faith presented by the Meeting for Sufferings as having no weight at all, thus virtually disfranchising them without the shadow of authority." Being examined on this matter, Samuel Bettle testified as follows: "I never considered them entitled to any weight or influence at all. I mean the same persons who had expressed themselves in relation to those extracts, and in opposition to them, in the Yearly Meeting of 1823, and whose objections I have quoted."

[2] Mifflin died Oct. 10, 1798, aged about fifty-three years.

About 1790 the Friends of Philadelphia Meeting determined upon opening a boarding-school upon a plan similar to that founded by Friends at Ackworth, in England. Owen Biddle wrote a pamphlet, with a plan for such a school, which met with so much approval that a school was opened by the society at Westtown, in Chester County,—an establishment which is in operation at the present time.

Among the members of the society who died during the period from 1775 to 1800 were John Pemberton, Jan. 31, 1795, a man of benevolent instincts, who early became a minister, and visited Europe in 1750, 1782, and 1794, preaching the doctrines of the society; Peter Yarnall, Feb. 20, 1798, in his forty-fifth year, a native of Philadelphia, admitted as a minister in 1782, and a resident of Byberry from 1791 until his death; Sarah Gray, killed, in 1796, by being accidentally thrown out of a "chair" (in Front Street, near Callowhill) while riding with John De Marsellac, a preacher of Friends. Mary Armitt, of Philadelphia, died Feb. 18, 1791, at the age of eighty-three; Daniel Offley, a noted minister of the Southern Monthly Meeting in Pine Street, a native of Philadelphia, born Nov. 29, 1756, by trade a blacksmith, his shop being located in Front Street, near Walnut; in the fever epidemic of 1793 he devoted himself to the care of the sick, and was finally carried off by the disease; Isaac Zane, a native of Gloucester, N. J., attached to the meeting at Second and Market Streets, died March 3, 1794, aged eighty-four years; Mary Emlen, died June 1, 1777;[1] John Hallowell, of the Southern Monthly Meeting, appointed an elder in 1772, died July 26, 1778; Mary Pemberton, daughter of Nathan and Mary Stansbury, of Philadelphia, and wife of Israel Pemberton, to whom she was married in 1747, after having been the wife of Richard Hill, and, after the latter's death, of Robert Jordan, died Oct. 25, 1778; Anthony Benezet,[2] an elder of the Monthly Meeting in Philadelphia, who died in 1784; John Reynell, a serviceable member of the Southern Meeting, died Sept. 3, 1784, aged seventy-six; Samuel Emlen (the second), born in Philadelphia, an extensive traveler and preacher, well known in foreign lands, died Dec. 30, 1799, aged seventy-seven years; William Savery, a conspicuous minister of the society, born in 1750, commenced to preach in Virginia in 1779, acknowledged as a minister by the Philadelphia Meeting in 1781, traveled extensively in America, and went, in 1793, with other Friends to visit the Indians, in 1796 went to England in company with Deborah Daily, Rebecca Young, Samuel Emlen, Sarah Talbot, and Phœbe Speakman, returned to Philadelphia in October, 1798; Samuel Smith, a member of the Northern Meeting, son of Robert and Phœbe Smith, born in Bucks County June 4, 1737, came to Philadelphia in 1763, and began to preach in 1770; Isaac T. Hopper, a noted minister of Friends, born near Woodbury, N. J., in 1771, came to Philadelphia in 1787, was apprenticed to his uncle, a tailor, and admitted a minister of the society after 1793; Stephen Grellet, a minister attached to the meeting in Keys Alley, a native of Limoges, in France, compelled to emigrate during the French revolution, he came to America, settled in Philadelphia, in 1795, as a teacher of French, admitted as a minister in 1797, and acknowledged as one in 1798; Rebecca Jones, a prominent minister, born in Philadelphia, Aug. 8, 1739, chosen for the ministry in 1760, engaged part of the time in keeping school, in 1784 she went to England in company with Mehitabel Jenkins, Samuel Emlen, Thomas Ross, and George Dillwyn; she traveled through England, returned to Philadelphia, and was a useful minister until her death, which occurred on the 15th of April, 1818.

The society of Free Quakers had its origin in the difference of opinion among the Friends concerning the merits of the Revolutionary struggle. Those members of the society who took part with the Whigs, either by service in the field or by sustaining the cause in other ways, fell into disrepute among their associates of the sect. The Society of Friends in many cases appointed overseers to deal with the offending members.[3] The society, however, found the

[1] She was the daughter of Robert and Susanna Heath, natives of England, who arrived in America in 1701, when Mary was in the ninth year of her age. She was married in 1716 (then being in her twenty-fifth year) to George Emlen, of Philadelphia. She entered the ministry in 1728, visited the meetings in Pennsylvania and New Jersey, and went to New England, in 1744, with Mary Evans.

[2] Anthony Benezet, the anti-slavery pamphleteer, of whom mention has heretofore been made, was born at St. Quentin, Picardy, France, Jan. 31, 1713 (old style), of French Protestant parents. They removed to Holland in 1715, and afterward went to London, where they remained until 1731, when they came to Philadelphia, bringing their son with them, then a lad seventeen years of age. He was educated to mercantile business, and followed it for some time in Philadelphia, but eventually abandoned it for the profession of a teacher of youth. This occurred in 1742, when he obtained a situation in the Friends' English school, which he retained during the remainder of his life, with the exception of two years, which he spent in Burlington. During the last two years of his life he was teacher in the school for the instruction of black people and their children, established by the Society of Friends, and held in a building in Willing's Alley. He died May 5, 1784, his funeral being attended by persons of all denominations, among whom were several hundred negroes. By his will, after the death of his widow, he bequeathed the whole of his estate to a school for the instruction of negro children. In 1736 he married Joyce Marriott, of Philadelphia, who survived him. Benezet wrote several works, principally in relation to philanthropic subjects. Among them are "A Caution to Great Britain and her Colonies relative to Enslaved Negroes in the British Dominions," published in 1767; "Some Historical Account of Guinea, with an Inquiry into the Rise and Progress of the Slave Trade, its Nature and Lamentable Effects," published in London in 1772. He published, in 1780, "A Short Account of the Religious Society of Friends." He wrote personally letters to Queen Charlotte of Great Britain, and to the queen of Portugal, protesting against the continuance of the African slave trade. He wrote to Frederick the Great of Prussia, when the latter was engaged in war, protesting against the lawfulness of warfare. The writings of Benezet first attracted the attention of Wilberforce and Clarkson to the enormity of the slave trade.

[3] Timothy Matlack stated that in going to his home one day, he found a member of the society attempting to "deal" with his son on account of his approval of the war. The old gentleman was so much irritated by this interference with his paternal authority that he, although a

majority of members who took up the Whig cause incorrigible, and proceeded to disown them. During the war this made little difference, but after its close the Friends who espoused the popular side were excluded from their accustomed privileges in the society meetings. Finding it impossible to obtain their rights, these persons took measures to form themselves into a society. They met for that purpose, Feb. 20, 1781, at Samuel Wetherill's house. There were present Isaac Howell, Robert Parrish, James Sloane, White Matlack, Samuel Wetherill, Moses Bartram, Benjamin Say, and Owen Biddle. Here the preliminary measures were taken, and so proceeded with afterward that they formed themselves into a society entitled "The Monthly Meeting of Friends, called by some Free Quakers, distinguishing us from those of our brethren who have disowned us." In a circular addressed "To our Friends in New Jersey, Pennsylvania, and Elsewhere," the final meeting which formed this society was stated to have been held on the 4th of June, 1781, at the house of Timothy Matlack.

There was a strong feeling in favor of these disowned members of Friends among the Whigs, and by subscription the Free Quakers raised money enough to enable them to purchase a lot of ground at the southwest corner of Fifth and Mulberry [or Arch] Streets, where they erected a plain two-story building for worship, which still remains, and is now used by the Apprentices' Library Company. The tablet on the north end of the house bears the following inscription:

"By general subscription,
FOR THE FREE QUAKERS.
Erected A.D. 1783,
Of the empire 8."[1]

On the 26th of December, 1783, "the Free Quakers," as they called themselves,—"the Fighting Quakers," as many called them,—petitioned the Legislature for a lot of ground on Spruce Street, between Seventh and Eighth, north side, for a burial-ground. On the 26th of August, 1786, an act was passed vesting in the Free Quakers a lot for burial purposes, not on Spruce Street, as asked for, but a lot on the west side of Fifth Street, between Prune and Spruce, which has since been owned by the society.[2]

After the grant of the graveyard property, the following overseers were elected to manage the affairs of the yard: Joseph Styles, Peter Thomson, Moses Bartram, John Eldridge, Benjamin Say, and John Claypoole. Jacob Karcher was the first grave-digger.

It is said the number of members of the Society of Free Quakers, when established, was about one hundred. The names of the majority of them are not now known. Timothy Matlack was a prominent elder. Samuel Wetherill and Christopher Marshall—whose diary of the events of the Revolution is a valuable record of local affairs—were leading members. A memorial against theatres, presented to the Assembly Dec. 12, 1785, on behalf of the Society of Free Quakers, by a committee appointed by them, was signed by the following persons: Christopher Marshall, Isaac Howell, Peter Thomson, Moses Bartram, Richard Somers, Jacob Ceracher, Jonathan Scholfield, Joseph Styles, Samuel Wetherill, Jr., Joseph Warner, Jr., Hugh Eldridge, John Piles, Samuel Crispin, Jacob Lawn, John Claypoole, Samuel Crispin, Jr., and Edward Piffets.

In 1804 the Second Street meeting-house was transferred from the corner of Market Street to the burial-ground lot, on Arch Street, between Third and Fourth. In order to accommodate the great number of members, particularly those who attended the Monthly and Yearly Meetings, the building was made very large. It is probably one hundred and fifty by fifty feet, and consists of a central portion and wings. The interior is divided into apartments, one for the use of men Friends, the other for women Friends. The burial-ground had been in use since 1690, the grant then made by Penn being confirmed in October, 1701. In building the meeting-house it was necessary to invade the dominion of the dead; but it is said that care was taken to avoid that necessity wherever it could be done. Two tiers of bodies, and in some places three tiers, had been buried in the ground, and naturally there was some disturbance. Wherever it was possible the bodies were not moved, and portions of the building were placed over them.[3]

Under authority of the Monthly Meeting for the northern district of Philadelphia a lot was purchased

member of the society before the war, and acquainted with the usual course of action toward erring members, took the vindication of his honor into his own hands, and beat the Friend out of the house!

[1] "The use of the word 'empire' in this inscription," remarks Thompson Westcott, "has often been spoken of in modern times as curious and extraordinary. It was not so in 1783. The word 'empire' was a common one at that time, when used in reference to the country. The United States were under the confederation of independent governments, united under a limited central authority. They constituted an empire in the most correct sense of the word."

[2] This society may be said to be almost extinct. No burials of its members have been made in the Fifth Street ground for many years. But during the Rebellion use was made of it fully accordant with the principles of the Free Quakers of the Revolutionary era. In this ground were buried many of the soldiers of the Union who died in army hospitals in the city. The place was appropriate for sepulture of these brave men, and if the spirits of the "Fighting Quakers" interred there could have risen at that time they would have welcomed the strangers.

[3] The late Dr. Thomas D. Mitchell, in his "Remembrances of Religious Affairs in Philadelphia," says, with reference to the Arch Street meeting-house, "There was then no regulated Arch Street there, so that the lot reached out into the middle of what is now the legal highway, and the remains of the dead have been disinterred more than once north of the present brick wall of inclosure, in the various street improvements that were found to be necessary. . . . Preparatory to the removal of the Market Street meeting-house, the brick inclosure was made around the Arch Street lot, and the piles of brick and mortar now seen within were then erected with a view to the accommodation of very large assemblages of the society. Nor did the projectors err in their calculations in this respect, for in the palmy days of Quakerism in the city those extensive buildings were densely crowded year after year, [illegible] convocations, which met an almost universal response, [illegible] remotest corners of the State."

at the southeast corner of Fourth and Green Streets, extending from Fourth to Dillwyn Street, on which was erected a meeting-house, completed in the spring of 1814. The dimensions of the building were forty-seven by seventy-three feet. A committee of the Monthly Meeting consisting of Daniel Thomas, Leonard Snowden, Mary Taylor, and Sarah Smith, appointed to consider what should be done in relation to the new meeting-house, reported on the 27th of September, recommending "that meetings for worship be established there on First-days morning and afternoon, and on Sixth-day mornings, all to begin at the usual hour; and that Friends composing that meeting be allowed to hold a preparative meeting at the close of their meeting for worship on Sixth-day, in the week preceding the Monthly Meetings, to be known by the name of 'the Preparative Meeting held at Green Street.'" This arrangement was sanctioned by the Monthly Meeting, which decided that the meetings for worship should commence with the first First-day in the Twelfth month, and the Preparative Meeting on the 23d of that month. Nathan A. Smith, Philip S. Bunting, William Sansom, James Vaux, Thomas Stewardson, Joseph Bacon, and Edward Randolph were appointed to attend the opening of them. The project was approved by the Philadelphia Quarterly Meeting on the 6th of May, 1816, upon report from the Monthly Meetings of Friends for the Northern District; which report, according to the minutes, "obtaining deliberate attention, is united with; and Jonathan Evans, Ellis Yarnall, Samuel Bettle, Thomas Stewardson, and Thomas Wistar, are appointed to attend the opening thereof." The Green Street Monthly Meeting for the Northern District, on the 23d of April, 1816, was ordered to be known by the name of "the Monthly Meetings of Friends, held at Green Street, Philadelphia."

Another meeting-house was built in 1812, under the auspices of Arch Street Meeting, on the west side of Twelfth Street, below Market, northwest corner of Clover Street, and opened for worship on the first First-day in April, 1813. By consent of the Philadelphia Quarterly Meeting, a Monthly Meeting was established there. It was known as "the Monthly Meeting of Friends of Philadelphia for the Western District," and the first Monthly Meeting was opened in the Twelfth Street house on the 16th of March, 1814. During this period (1800–25) the Pine Street and Keys Alley meeting-houses remained without material change.

The success of the institution for the insane near York, England, known as "the Retreat," which had been founded about 1792, under the auspices of Friends, attracted the attention of the society in Philadelphia, and in 1811 two of the Quarterly Meetings proposed to the Yearly Meeting that provision should be made for "such of our members as may be deprived of their reason." The matter was referred to a committee, the report of which was adopted by Yearly Meeting in April, 1812. In December of that year a number of Friends met at Philadelphia to deliberate upon the most suitable means of carrying the plan into effect. Thomas Scattergood, Jonathan Evans, Ellis Yarnall, Isaac Bonsall, Emmor Kimber, Thomas Wistar, and Samuel Powell Griffiths were appointed a committee to raise subscriptions for the purchase of a lot and building to accommodate at least fifty persons. The annual subscriptions were ten dollars. All sums contributed under that amount, or beyond it and under fifty dollars, were to be considered as donations. Life-membership could be had for fifty dollars. Any Monthly Meeting of the Yearly Meeting might contribute two hundred dollars, and be considered a member. Every life-member and every Monthly Meeting had a right to recommend one poor person at one time as a patient on the lowest terms of admission. The contributors met and organized on the 14th of April, 1813, and adopted the constitution in June. At that time thirty-one Monthly Meetings had each contributed two hundred dollars. There were one hundred and eighty-eight members. In contributions there were received that year $24,170.75. In the spring of 1814 a farm was purchased near Frankford. A plan for a building was prepared by William Strickland. The centre building was sixty feet square and three stories high. There were two wings, each one hundred by twenty-four feet, and two stories high, roofed with slate. In each wing there were twenty chambers, each ten feet square, with a gallery or passage ten feet wide. The centre building contained rooms for cooking, washing, etc. The upper part was fitted up for the use of the family in charge of the institution. The asylum was finished and opened for patients on the 15th of May, 1817, the superintendent and matron being Isaac and Ann Bonsall. Before the end of the year eighteen patients were received, of whom three were discharged before the end of 1818. Five others were much improved, and seven were somewhat improved. Dr. Charles Lukens became the resident physician. George Vaux was treasurer. In 1820 the lowest price of boarding was reduced to two dollars and fifty cents a week. The next year it was reduced to two dollars. Charles F. Matlack became the resident physician in 1820–21. Edward and Sarah Taylor succeeded the Bonsalls in the superintendency in 1822. In 1825 the attending physician was Dr. Samuel W. Pickering, and the consulting physicians were Drs. Joseph Parrish, Nathan Shoemaker, Edwin A. Atlee, and Samuel Emlen. James Wills, who died in 1825, left a legacy to the institution of five thousand dollars. This establishment has been generally known as "Friends' Asylum for the treatment of persons deprived of their reason." In the modern topography of Frankford, it stands on Adams Street, west of the village.

In 1806 a rule was adopted by the society providing a method by which indiscriminate and loquacious

preaching might be prevented. According to this rule no Friend was to be received as a minister, or permitted to sit in the meetings of ministers and elders, or to "travel abroad as a minister," until he had obtained the approbation of the Quarterly Meeting of ministers and elders. About the year 1801 much suffering was caused in Great Britain by the wars on the continent and the failure of crops in England and Ireland. A subscription was taken up within the limits of the Philadelphia Yearly Meeting to aid in relieving the distress to the amount of fifteen thousand one hundred and seventy-six dollars, and forwarded to the Meeting for Sufferings in London. With reference to education, the Friends continued to maintain the principles which had led to the establishment of a public school in Philadelphia as early as 1683, and which were afterward more vigorously carried out in the Friends' school on South Fourth Street. In 1808 the Philadelphia Yearly Meeting, apprehending a falling away from Quaker principles, owing to the growth of the practice among members of placing their children "at colleges and other seminaries out of our religious society, in order to give them what is called a 'polished education,'" expressed the desire that "tender caution and counsel be extended to such parents and others as may be in danger of erring in this way." The opposition of Friends to wars and fighting had been sensibly modified since their declaration on that subject during the Revolution, for although in 1805 the Yearly Meeting pronounced against the payment by Friends of any tax on account of their refusal to serve in the militia, when war broke out between Great Britain and the United States, in 1812, the society evinced no opposition to the war. If any "testimony" was adopted in relation to the struggle at any time during its continuance, "it was quietly kept from the public eye in the minutes of the meetings."[1] From the "Book of Discipline" of 1806 it appears that the society still kept up its testimony against the unnecessary distillation and use of spirituous liquors.[2]

With regard to burial customs strenuous efforts were made to enforce the rules of the society in all their strictness. In 1808 the Yearly Meeting advised "that Friends be careful themselves, and discourage their children from attending the worship of those not in communion with us, and particularly at burials," and pronounced "against imitating the vain custom of wearing or giving mourning habits, and against affixing any monuments of wood or stone to graves, and all extravagant expenses about the interment of the dead." Other regulations were also provided in order that "everything tending to lessen the solemnity of such occasions" might be avoided. The same Yearly Meeting renewed the advice of former meetings in relation to marriage, and laid particular stress on the inadvisability of marriages between Friends and those professing a different religion. A resolution was also adopted, urging that "Friends take heed that they use plainness of speech without regard to persons in all their converse among men, and not balk their testimony by a cowardly compliance, varying their language according to their company."

The relations of the society in Philadelphia with Friends in England continued close and cordial, and visits were frequently exchanged. About the year 1800, Deborah Darby, wife of Samuel Darby, of London, visited Philadelphia, in company with Rebecca Young, afterward Rebecca Byrd. Mary Prior, wife of John Prior, of Hereford, England, and Mary Naftel, wife of Nicholas Naftel, of Germany, also came to Philadelphia about this time. Joseph Lancaster, an eminent teacher and originator of the Lancasterian system of education, was a minister of the society, and during his stay in Philadelphia, where he had charge of the public schools for some years, attended meetings and spoke on different occasions. William Foster, of London, visited the United States in 1820, remaining five years, engaged in religious labor. He was specially earnest in his denunciation of slavery. George Dillwyn[3] visited England in 1800, and Jesse Kersey[4] in the summer of 1804. In 1807, Stephen Grellet, a Frenchman by birth, left Philadelphia for Europe, with a view of spreading the doctrines of the society. He traveled extensively (part of the time in company with William Allen) in France, Great Britain, Ireland, Switzerland, Germany, Norway, Russia, Turkey, Greece, and Italy. He was admitted to interviews with the king of Prussia, the emperor of Russia, and the Pope.[5]

Among the eminent ministers from other parts of the Union who visited Philadelphia from 1800 to 1825 were Richard Jordan, of Norfolk, Va.; Edward

---

[1] Thompson Westcott.

[2] Ezra Michener, in his "Retrospect of Early Quakerism," says, "While I am willing to allow full credit to all co-laborers in the cause of temperance, and rejoice in their success, it is proper to say that Friends were the pioneers in this reformation. It is only to be regretted that they have not been more unitedly concerned in carrying out the work."

[3] Dillwyn died June 23, 1820, from the effects of a fall on the ice. He was then in his eighty-third year.

[4] Jesse Kersey was born at York, Pa., on the 5th of August, 1768. He was sent to Philadelphia when sixteen years of age, to learn the trade of a potter. He was regular at Friends' meetings during his apprenticeship, and entered the ministry in 1785, being then in his seventeenth year. He was still an apprentice, and remained under his indentures for four years afterward. His addresses were considered surprising for one so young, and the eloquent young potter began to attract much attention on account of the impressiveness and perspicuity of his discourses. After his apprenticeship was over he went to East Caln, Chester Co., and kept a school. Having married in 1790, he went to York with his wife, and commenced business as a potter. After four years he returned to East Caln, and continued the business. Subsequently he became a farmer, near Downingtown. He was in unity with the society for many years, and died near Kennett, Chester Co., in 1845.

[5] He was courteously received by the Pope, and "found his way open to address some words of religious counsel to the pontiff, and was heard without offense. He was well satisfied with the interview, and, having preached the gospel in Rome, he left the city with a thankful heart."

Stabler, of Petersburg, Va.; Thomas Wetherald, of Washington, D. C.; Nathan Hunt, of Guilford, N. C.; Richard Mott, of New York; Gerard T. Hopkins, of Baltimore; and Joseph Foulke, of Gwynedd. Jacob Lindley, of Chester County, Pa., came frequently. He was a strong advocate of temperance, and of efforts for the civilization of the Indians, and a determined opponent of slavery. After a ministry covering a period of forty years, he was killed by being thrown from a chaise on the 12th of June, 1814, in the seventieth year of his age. Thomas Scattergood, born in Burlington, N. J., in 1748, was another active minister in Philadelphia and vicinity. He went to England in 1794, and after his return was engaged in religious labor, "having the near unity and fellowship of Friends." He died on the 24th of April, 1814. Hugh Judge, of Little Falls, Md., to which place he removed in 1804, having previously resided in Philadelphia, was a frequent visitor at Yearly Meeting, and sometimes at Quarterly Meeting. In the course of his career as a minister, Judge traveled extensively in different States of the Union. He died Dec. 21, 1834, in his eighty-fifth year, having been a minister upwards of sixty-two years. Among the elders in Philadelphia who were most prominent and active during the period from 1800 to 1825 were Dr. Joseph Parrish,[1] John Comly, of Byberry;[2] Nathaniel Yarnall, died Oct. 7, 1821; Hannah Yarnall, widow of Peter Yarnall, who was a physician and also a minister, and died in 1798;[3] Hannah Fisher, wife of Samuel R. Fisher, of Philadelphia, and daughter of Thomas and Mary Rodman, who died Sept. 9, 1819, in her fifty-sixth year; Isaac Potts, a minister of Germantown Meeting, who died in June, 1803; and Arthur Howell.[4]

Among the ministers connected with Pine Street Meeting during the years from 1800 to 1825 were Jonathan Kimber, Jonathan Evans, and Isaac T. Hopper. Among the leading members of the congregation were Charles Wharton, William Wharton (his son), Samuel R. Fisher, John Hutchinson, Samuel Shinn, John Morton (once president of the Bank of North America), John Townsend, Isaac N. Morris, Henry Cope, Isaac Lloyd, Alexander Elmslie, and many others.

The old Arch Street meeting-house, between Third and Fourth Streets, still retains a quiet serenity amid the surrounding bustle of the neighborhood. It stands in a lot three hundred and sixty by three hundred and sixty-six feet, and is surrounded by a high brick wall. The edifice is divided into meeting-houses for men and for women, and is probably two hundred feet front. The members of the society, resident in the neighborhood, are so few that services are seldom held there on Sunday.

The Society of Friends (Orthodox) have in 1884 ten meeting-houses, all of them exceedingly plain both in exterior appearance and furnishing. They are situated as follows: Fourth and Arch Streets, Orange above Seventh Street, and Forty-second Street and Powelton Avenue, West Philadelphia. The ministers of the above meetings are Joseph S. Elkinton, Abigail Hutchinson, Rachel E. Patterson, Rebecca A. Cooper, and Hannah Arnett. The Northern District meeting-house, at Sixth and Noble Streets, has for its ministers Samuel F. Balterston, John S. Stokes, and Phœbe A. Elkinton. The Germantown meeting-house, at Main and Coulter Streets, is ministered by William Kite, Samuel Morris, Samuel Emlen, and Elizabeth Allen. The Western District, Twelfth below Market Street, also includes Merion, on Lancaster Avenue west of Hestonville. Haverford is supplied by Edward Marshall, and the Frankford Monthly Meeting, at Frankford, by David Heston.

The Friends' (Hicksite) meeting-house, at Byberry, has for its ministers Watson Tomlinson, Ellen F. Croasdale, and Nathaniel Richardson. They have meeting-houses at Fair Hill, Germantown Avenue and Cambria Street; Frankford, at Unity and Wain Streets; Friends' Mission No. 1, Beach Street and Fairmount Avenue; Germantown school, Girard Avenue and Seventeenth Street; Green and Fourth Streets (Jane Johnson, minister); Race above Fifteenth Street (Anne S. Clothier and Samuel S. Ash, ministers); Spruce corner of Ninth Street (Deborah F. Wharton, minister); West Philadelphia, Thirty-fifth Street and Lancaster Avenue (Samuel J. Levick, minister).

The Friends "possessing original principles" have a meeting-house at Olive above Eleventh Street, ministered by Joseph E. Maule.

THE PRESBYTERIANS.

The persecutions suffered by the Presbyterians in Ireland and Scotland during the seventeenth century caused many of them to seek refuge in the

---

[1] Dr. Parrish was born Sept. 2, 1779, and was the son of Isaac and Sarah Parrish, members of the Society of Friends. His father was a hatter, and Joseph learned the trade. At the age of twenty-two years he undertook the study of medicine, toward which he had an inclination from childhood. He graduated in due time, and became a very successful practitioner, enjoying celebrity in his profession, and great confidence and reliance on his skill and learning. For several years before his decease he was an elder of the society, and was diligent in religious meetings. His interest and labors were given very faithfully during his life in watchfulness of the Indians and in advocacy of the abolition of slavery. He died March 13, 1840, in the sixty-first year of his age.

[2] The son of Isaac and Asenath Comly, born Nov. 19, 1773, a teacher in Westtown school in 1801, married Rebecca Budd, a teacher in the girls' department, and with her conducted a school at Byberry. Comly became well known as the author of "Comly's Grammar" and "Comly's Spelling-Book," which attained a large circulation, and for many years were accepted as standard school-books. The Byberry school was discontinued in 1813. In 1813, Comly was acknowledged as a minister of the society. He died Aug. 17, 1850.

[3] Hannah Yarnall, whose maiden name was Thornton, died July 2, 1822.

[4] Arthur Howell was for many years a leading member of the Philadelphia Meeting, and exercised much influence. He was the son of Joseph and Hannah Howell, and was born in Philadelphia Aug. 20, 1748. He was acknowledged as a minister by his Monthly Meeting in 1779. Howell is said to have possessed the gift of foresight, and to have made some remarkable prophecies. He died Jan. 21, 1816.

American colonies. Immediately after the battle of Dunbar, the victorious general sent the Scots prisoners by ship-loads to the British plantations, where they were sold. After the restoration the same course was adopted by the king; and many of those concerned in the risings at Pentland and Bothwell were consigned to servitude in Maryland, Virginia, New York, Pennsylvania, and the West Indies. In Maryland, under the care of the Calverts, the Presbyterians found that liberty of conscience which had been denied them in their native land. By the famous "act of toleration," passed by the Assembly of that province in 1649, the word "Presbyterian" was included among the terms of reproach which were forbidden to be used. From this circumstance it would seem that persons of this faith were already in the province. In a letter of Lord Baltimore to the Privy Council, dated July 19, 1677, giving an account of the state of religion in the province, he speaks of dissenting ministers being "maintained by a voluntary contribution of those of their own persuasion, as others of the Presbyterians, Independents, Anabaptists, Quakers, and Romish Church are."[1]

A large number of the members of this religious faith settled in Somerset, now Wicomico County, on the eastern shore of Maryland, and, having established a church at Rehoboth in December, 1780, made application, through Col. William Stevens, to the Laggan Presbytery, in Ireland, to send them a minister. This was the first regularly constituted Presbyterian Church in the United States, and this is the first application known to have been made to the British churches for a minister. In response to the application of the Presbyterians of Maryland, Francis Makemie, a native of Donegal County, Ireland,—who had been licensed by the Laggan Presbytery near the close of 1681, and who had received ordination, *sine titulo*, with a view of coming to America,—was sent on his mission to the church at Rehoboth, where he arrived shortly after. Mr. Makemie must have faithfully discharged his duties, for we find, in a report made by Governor Nicholson in 1697 to the Bishop of London, that Somerset County had no "Popish priest, lay brothers, or any of their chapels, and no Quakers;" but it had "three Presbyterian places of worship."

The Presbyterians began to know one another in Philadelphia between 1690 and 1700. Francis Makemie came to the city in August, 1692, just at the time of the outbreak of George Keith's heresy. He met a number of English, Welsh, Scotch, and French Presbyterians, and organized a church, which assembled for religious worship, in connection with a few Baptists, in a storehouse then situated on the northwest corner of Second and Chestnut Streets, belonging to the Barbadoes Company. Neither sect had a settled pastor, but the Rev. John Watts, a Baptist minister of Pennepeck, agreed to preach for them every other Sunday. Mr. Watts, in his narrative, says, "that divers of the persons who came to that assembly were Presbyterians in judgment; they having no minister of their own, and we have hitherto made no scruple of holding communion with them in the public worship of God."[2]

Whenever there were Presbyterian ministers in town they officiated, and for three years the members of the two sects got along amicably. The Presbyterians, probably finding themselves unpleasantly situated, determined upon calling a minister, and invited the Rev. Jedediah Andrews, from Boston, who accepted their invitation, and arrived in Philadelphia in 1698.[3]

Of the members of this first congregation, the names survive of John Green, Samuel Richardson, David Griffing, Herbert Corry, John Vanlear, and Daniel Green. Shortly after the arrival of Rev. Mr. Andrews dissensions arose between the Baptists and Presbyterians, which resulted in their separation. The former withdrew, leaving the latter in possession of the storehouse, where they continued to worship until 1704. It was a small, one-story building, with a high hip-roof. In 1820, and up to about 1832, when it was pulled down, this store on the Barbadoes lot was known as "Jones' Stocking Store." The house adjoining on Chestnut Street was Myers & Jones' paint-shop; adjoining on Second Street was Adams' grocery store, afterward Adams & Reath.

In 1704-5—Mr. Andrews still minister—the Presbyterians built a church on the south side of High [now Market] Street between Second and Third Streets, White Horse Alley [or Bank Street]. This meeting-house, surrounded originally by some fine sycamore-trees, was styled "Buttonwood Church." It is not known of what material the building was constructed. Its first elders were John Snowden, tanner; William Gray, baker; and Joseph Yard.

The Presbytery of Philadelphia, first formed in 1705, comprised seven ministers, and included Philadelphia, Maryland, Delaware, and the eastern shore of Virginia. The names of these ministers were Francis Makemie, John Hampton, George McNish, and Samuel Davis, of the eastern shore of Maryland, all Irishmen; Nathaniel Taylor, Scotchman, Upper Marlborough; John Wilson, Scotchman, New Castle,

[1] See Scharf's History of Maryland, vol. i. p. 363.

[2] Edwards' "Materials for a History of the Baptists," vol. i. p. 104, quoted by Hodge in his "Constitutional History of the Presbyterian Church," vol. i. p. 81.

[3] Rev. Jedediah Andrews, son of Capt. Thomas Andrews, was born at Hingham, Mass., July 7, 1674, and was baptized by the Rev. Peter Hobart five days after. He was the youngest but one of ten children. He graduated at Harvard College in 1695, was licensed in New England, and was ordained in Philadelphia probably in the autumn of 1701. While stationed in Philadelphia he must have performed considerable missionary labor, as we find him ministering at different times at Hopewell, Gloucester, Burlington, Amboy, and Staten Island. He was also the recording clerk of the Presbytery and of the Synod as long as he lived.

and Andrews, in Philadelphia. In 1706 John Boyd was ordained at the first meeting of the Presbytery of which there is any record. In 1716 four Presbyteries were formed out of the original one,—New Castle, Snow Hill, Long Island, and Philadelphia,—constituting altogether the Synod of Philadelphia. The Presbytery of Philadelphia was composed of the following ministers: Andrews, Jones, Powell, Orr, Bradner, and Morgan. The names show a preponderance of Welsh members. Only one of these ministers, Mr. Andrews, was settled in Philadelphia, and the First Church, of which he was pastor, was the only one in this city under its care. In 1718 Rev. William Tennent joined the Synod, a seceder from the Established Church in Ireland. This was the beginning of a powerful influence in the Presbyterian Church of Philadelphia, and the history of that church from this time is picturesque.

The old Buttonwood Church is described by Kalm, the Swedish traveler, in 1748, as being near the market, of middling size, the roof nearly hemispherical,—hexagonal at least. It stood north and south. The Presbyterians do not mind the points of the compass, so that they have the points of the catechism all right. In 1735 came Rev. Samuel Hemphill, licensed by the Presbytery of Strabane, Ireland, and preached in Philadelphia. Smooth language, good elocution, said the crowds which he attracted; as to his doctrine,—rank heresy, said Rev. Mr. Andrews, and denounced Hemphill from the pulpit. The Synod pronounced the young man's views unsound; Franklin, who was a pew-holder in the church at the time, liked his flowing style, defended him in pamphlets and in the *Pennsylvania Gazette*. Presently it was found out that Hemphill's sermons were his only *memoriter*, got by heart from James Foster, Dr. Ibbots, and Dr. Clarke.

In the growth and extension of the church differences had arisen in the Presbyteries and Synod which disturbed their harmony. The points of difference were, the examination of candidates for the ministry on experimental religion, the strict adherence to Presbyterial order, and the amount of learning to be required of those who sought the ministerial office. The Synod, on motion of the Presbytery of Lewes, adopted a rule that no candidate for the ministry who had received a private education should be admitted to trials in order to be licensed to preach the gospel by any Presbytery within its bounds, until such candidate's learning was previously examined by a committee of the Synod appointed for that purpose. But the Presbyteries quarreled on this point, and the New Brunswick Presbytery, supported by the Tennents (Gilbert, William, Charles, and William, Jr.), with many elders, protested, and licensed, in 1738, John Rowland, in disregard of this rule of the Synod; but the Synod refused to consider him a member of their body. Mr. Rowland was deprived of his charges,—Maidenhead and Hopewell, N. J.,—and took to field-preaching and the barns,—the forerunner of the Methodists. Gilbert Tennent joined him, and administered the sacraments also. It was at this time that the great preacher and orator, George Whitefield, came from England to Philadelphia early in November, 1739, and gave intensity to the impending schism.

Whitefield was an itinerant, a field preacher himself, bold, fiery, denunciatory, intense, most eloquent, and most capable of producing strong religious excitement. He appealed only to the feelings, but he stirred these to their very depths. He was perhaps the greatest revivalist who ever preached, and he created a strange fever of enthusiasm in the quiet town, having sometimes as many as six thousand hearers, whom no church could contain. He began preaching the first Sunday after he árrived, in Christ Church; he ended in the public squares and the field.[1] He denounced; he was assailed; he rejoined; he became the subject of fierce and violent controversy. The Episcopal Churches were closed against him. He did not yet venture to apply to the Presbyterians, but kept to the field. When he preached his farewell ten thousand people attended him to Society Hill, and one hundred and fifty horsemen escorted him as far as Chester. He was soon back again to Philadelphia, and indeed paid several visits, but none, perhaps, which caused so much excitement as his first. It seems as if his followers could not help mixing a little charlatanry with their zeal. They claimed that his preaching had caused the dancing-school and concert-room to close. The managers of the Assembly, after declaring that Whitefield had engaged all the printers not to print anything against him, proceeded to show that one of the preacher's zealots (Seward) had invaded their property without leave and nailed up the door without notice. Nevertheless, the Assembly was held, and the intruder compelled to apologise. Still there can be no doubt that Whitefield's oratory resulted in a genuine revival. The Presbyterians and the Baptists were kindled by the flame; the Tennents, Rowland, Blair, Davenport took to open-air preaching, and, as the contemporary accounts aver, "Religion is become the subject of most conversation. No books are in request but those of piety and devotion, and instead of idle songs and ballads the people are everywhere entertaining themselves with psalms, hymns, and spiritual songs." The people put up a new and large building for Whitefield to preach in on Fourth Street below Arch Street, and this, one hundred feet long and seventy broad, became an academy later, and then the College of Philadelphia and University of

[1] He held forth from the balcony of the court-house to a great assemblage of people, computed to number six thousand. From this place he preached every night during his first visit. Gillies says, "When he preached at the court-house every word could be distinctly heard on a shallop at Market Street wharf, a distance of four hundred feet. All the intermediate space was crowded with hearers."

Pennsylvania. He founded an orphan home in Georgia, which was unsuccessful, and he continued to exercise great influence in Philadelphia.

The Presbyterian preachers who liked his style often preached in his "new building" after his departure, and became more and more divided from the controlling Synod. Many members withdrew from Mr. Andrews' congregation and flocked to the "new building" to hear the "New Lights" preach. In June, 1741, the Synod determined to deal with the "New Lights." A paper was presented, setting forth the reasons why they should be excluded from the Synod on account of "their heterodox and anarchical principles," their fostering dissensions, wholesale denunciations, and sensational preaching. The Synod adopted the indictment, and the "New Lights" were required to acknowledge their faults or withdraw from the connection. They withdrew, protesting they had been forced out. The seceders comprised William Tennent, Gilbert Tennent, Samuel Blair, Richard Treat, Eleazer Wales, William Tennent, Jr., Charles Tennent, Alexander Craighead, and David Alexander.

This secession, which rent the Presbyterian Church all through the country, had one good result. It was the immediate cause of the founding of the College of New Jersey. The controversy was hard to heal.

In 1743, when Whitefield paid his last visit to Philadelphia, the one hundred and forty members of the "new building" congregation offered him eight hundred pounds to preach for them six months. They used the building until 1749, when the trustees of the academy demanded possession of it. A lot was procured northwest corner of Third and Mulberry [now Arch] Streets, from Samuel Preston Moore and Richard Hill. It was ninety-eight and one-half feet on Arch Street and eighty feet on Third Street, and it was subject to an annual ground-rent of £24 12*s*. 6*d*. The foundations of the new church, eighty by sixty feet, were begun to be laid in May, 1750. On its eastern pediment, in gilt letters, was the inscription, "*Templum Presbyterianum anciente numine erectum, Anno Dom.* M.D.C.C.L." Gilbert Tennent was the first minister, and his immediate successors were John Murray, James Sproat, and Ashbel Green. Ebenezer Hazard was chairman of the building committee.

The Rev. Jedediah Andrews, who had been in charge of the First Presbyterian Church from the time of its establishment, continued as pastor of that body until his death, in May, 1747. In September, 1733, the Synod allowed him an assistant, and Rev. Robert Cross, who was born near Ballykelly, Ireland, in 1689, and who had been pastor of a Presbyterian congregation at Jamaica, L. I., since 1723, was requested to come to Philadelphia. He became a member of the Philadelphia Presbytery May 29, 1737, and on November 10th was installed assistant to Mr. Andrews. When Mr. Andrews died the Rev. Mr. Cross became the principal pastor of the First congregation. He was assisted by the Rev. Francis Allison, who came to Philadelphia in 1752, and became principal of the grammar-school connected with the academy. He was made vice-provost of the college in 1755, master of arts by Nassau Hall, Princeton, in 1756, and created doctor of divinity by the University of Glasgow in 1757. Mr. Allison assisted Cross during the greater portion of the time of the latter, who resigned June 22, 1758. Dr. Allison remained in charge of the First Church for some time after Mr. Cross' resignation.

After his resignation some difficulty was experienced in obtaining a successor. In 1759 a call was authorized to be made by the First congregation upon the Rev. Harry Munro. Some objections, however, were made against him, and in 1759, Rev. John Ewing, a native of Nottingham, Cecil Co., Md., and at that time professor of philosophy in the College of Philadelphia, was elected pastor of the First Church.

The difficulties which had arisen between the Presbyterians throughout North America, and separated them into independent jurisdictions, continued to keep them apart after the withdrawal of the New Lights, or Brunswick party, in 1741, for some years. In 1746 the Philadelphia Synod, to which the First Church was attached, had proposed a reconciliation. The New York Synod, to which the Second Church adhered, took no action upon this proposal for three years. In 1749 proposals were made in the New York Synod which were submitted to the Philadelphia Synod, and referred to the commission formed by that body and to the Presbyteries. In 1750 both Synods met in New York and Philadelphia in the month of May. Each considered the subject of union, and plans were offered on both sides. Correspondence was followed by inaction until 1757, when both Synods agreed to meet in Philadelphia at the Second Presbyterian Church. In the month of May a plan of union was agreed upon, consisting of eight articles, by which differences on both sides were sought to be accommodated. This important paper concluded as follows:

"The Synod agree that all former differences and disputes are laid aside and buried, and that no future inquiry or vote shall be proposed in this Synod concerning these things; but, if any member seek a synodical inquiry or declaration about any of the matters of our past differences, it shall be deemed a censurable breach of this agreement, and be refused and be rebuked accordingly."

From that time forward, and until the change of the system of government, in 1788, by the institution of the General Assembly, when the new discipline and government of the Presbyterian Church was adopted, the supreme control of the interests of that persuasion was reposed in the Synod of New York and Philadelphia, which usually met alternately in those cities, and sometimes at Elizabethtown, N. J.

The Synod of New York and Philadelphia at its first meeting agreed that the Presbytery of Phila-

delphia should consist of the Rev. Messrs. Cross, Gilbert Tennent, Francis Allison, Treat, Chesnut, Martin, Beatty, Greenman, Hunter, Ramsey, Lawrence, and Kinkead. Notwithstanding this union, some of the old spirit remained, and it occasionally manifested itself in the disputes which were constantly arising between the Presbyteries and Synod. In 1762 a portion of the Presbytery of Philadelphia, becoming dissatisfied with the action of the Synod, sustained by certain members of the Presbytery, asked that there should be a separation, and required and demanded that a Second Presbytery should be erected. It was resolved that the Second Philadelphia Presbytery should be erected for one year at least. It was composed of Messrs. Robert Cross, Francis Allison, and John Ewing, all of the First Church, with John Symonton and James Latta. The Second Presbytery was composed principally of the New Light party, Gilbert Tennent, of the Second Church, and others. In 1766 a motion was made to unite the two Philadelphia Presbyteries, but it was lost; upon which William Tennent, with some of the First Presbytery, entered a protest.

In 1754 Rev. Dr. Allison introduced a proposal into the Synod of New York and Philadelphia for laying some plan for the support of ministers' widows. A committee was appointed for that purpose, who made a favorable report, and in 1755 a plan was adopted. A charter was obtained for "The Fund for the Relief of Poor Presbyterian Ministers and Ministers' Widows and Children," which corporation still exists.

On May 31, 1752, the New Light congregation, belonging to what was afterward called the Second Presbyterian Church, occupied their new church at the northwest corner of Third and Arch Streets. The opening exercises were under the charge of Gilbert Tennent.[1]

Samuel Hazard says,—

"In this building the pulpit was on the north side, with the pews facing it. The main door entered from Third Street, with an aisle across to the steeple-door at the west end. After some years the pews in the centre were built, filling up that portion of the east and west aisle. The pews were one hundred and four in number, of which thirty-nine were square pews, chiefly around the walls of the church. Opposite the pulpit, on the south side, was a large square pew with columns, designed for the use of the Governor and other public men who attended service. . . . It is not recollected whether stoves were in use at this early day in this church, but it is believed that two small ones were used, which, not making the church very comfortable, the ladies were in the habit of having foot-stoves brought to church to keep their feet warm. These were small square boxes made of wood and tin, perforated with holes, in which was placed a small vessel containing hot coals.

* * * * * * * * * *

"On the Saturday evening preceding the sacramental occasions the ministers and elders distributed, from the circle around the pulpit, to communicants small pieces of metal, called 'tokens,' the object of which was to prevent persons from improperly communing. On one side of these tokens was impressed a heart; the reverse side was plain or impressed with the name of the congregation. The use of these tokens was, however, in a few years dispensed with."

In 1762 the Second congregation determined to procure an assistant for Mr. Tennent, and a call was extended to the Rev. George Duffield, of the Donegal Presbytery, but he did not respond. Mr. Tennent died Jan. 23, 1764, aged sixty-one years, and his remains were buried in the aisle of the Second Church under a monumental stone. On July 30, 1764, the Rev. John Murray, a native of Ireland, was called to the pastorship, and he took charge probably about the beginning of 1765, but he remained only a portion of the year, when he returned to Europe, reports having been received derogatory to his moral character. For more than three years the Second Church remained without a pastor. On Aug. 30, 1768, by a unanimous vote, the Rev. James Sproat, minister of the Congregational Church at Guilford, Conn., was called by the Second congregation. After some consideration he accepted the charge, and was installed in March, 1769. In John Adams' diary for 1775 he thus describes the result of a visit to the Second Presbyterian Church to hear Sproat preach:

"There is a great deal of simplicity and innocence in this worthy man, but very little elegance or ingenuity. In prayer he hangs his head at an angle of forty-five degrees over his right shoulder. In his sermon, which is delivered without notes, he throws himself into a variety of indecent postures, bends his body, points his fingers, and throws his arms about without any rule or meaning at all."

"About three years after the settlement of the Rev. Mr. Sproat," says Rev. Mr. Cuyler, "the enterprise at Campington was commenced." This means that efforts were made to establish regular religious services in the Northern Liberties. The Second Church obtained possession of a small house at the northeast corner of St. John and Coates Streets, which was fitted up for religious services. Here the pastors of the Second Church preached, and some small religious gain was obtained. They were necessarily stopped at the time of the Revolution, and the house became a storehouse for military munitions. From this small beginning originated what was afterward called the First Presbyterian Church of the Northern Liberties.

The lot of ground at the corner of Third and Arch Streets originally extended to Cherry Street, and it is supposed that a portion of it was at one time used as a burying-ground. The principal burying-ground of the congregation was on the north side of Arch Street, above Fifth. It was fifty feet front and three hundred and six feet in depth, running across what is now Cherry Street, which was not then opened. It was bought, in 1750, from Thomas Leech and others. This ground, which contained the ashes of so many Presbyterian fathers, has since been sold, and the mouldering relics of the earnest worshipers in the Second Church have been dug up and scattered by their successors.

[1] The steeple yet remained unfinished, and in 1753 a lottery was projected to raise eight hundred and fifty-five pounds for the purpose of finishing it. This structure went on slowly, and in 1761 another lottery was projected to finish the steeple. It was said that a considerable amount of money was spent on that part of the church, and it remained unfinished a long time for want of funds. A new scheme was proposed to raise three thousand pieces of eight. The steeple was probably not finished until 1763 or 1764.

After the secession of the New Lights from the First Presbyterian Church, the latter gradually recovered its strength, principally by immigration from Scotland and Ireland. On Aug. 10, 1761, the Rev. Dr. Allison, Capt. Arthur, William Rush, John Wallace, John Coney, John Bleakley, Alexander Huston, William Bradford, John Fullerton, George Bryan, George Sharswood, and John Johnson, a committee of the First Church, resolved that John Chevalier, William Rush, and George Bryan should be appointed "to procure as much ground on Society Hill as will suffice for a church, only deferring till hereafter the procuring of a graveyard." It was also directed that the committee should treat with the Messrs. Shippen for some of their lots; and it was also determined to procure a house in the southern part of the town for temporary worship. Accordingly a small house was procured, at the corner of Second and South Streets, where worship was conducted by the pastor. In June, 1762, the committee agreed that an address should be drawn up by Dr. Allison and the Rev. Mr. Ewing to the proprietaries of the province, "requesting a lot of ground to build a meeting-house on within the bounds of the city, in the southern part." On Oct. 19, 1764, Thomas and Richard Penn granted the lot, one hundred and seventy-four feet on Fourth Street by one hundred and two feet on Pine, "to the congregation belonging to the old Presbyterian meeting-house on the south side of High Street, near the court-house, in the city of Philadelphia, to the intent that a church or meeting-house should be erected thereon, and a burial-yard laid out for the use of the said society of Presbyterians forever." This lot was afterward increased by purchases made by the society.

In 1765, in the month of June, it was resolved that it would be expedient to build the church. Consultation was attempted to be had with the Second Presbyterian Church, but that congregation refused to take any part in the matter. On July 4, 1765, it was agreed to open subscriptions for the purpose of building a church. William Rush and George Bryan were appointed collectors for the upper part of the city; John Mease, Alexander Huston, and Samuel Purviance, for the central part; and James Craig, Robert Knox, Samuel Moore, and John Jones, for the lower part.

In January, 1766, the committee reported that about six hundred pounds had been promised by different persons. It was determined to erect the church, which was not to exceed the dimensions of eighty feet long by sixty feet wide. John Moore, William Rush, James Craig, George Bryan, and Samuel Purviance, Jr., of the First Church, were appointed a building committee, and Robert Smith the architect. Although the church was occupied for the first time on May 30, 1768, it was not finished. On November 14th, of that year, a committee of the First and Third Churches voted to sell "the temporary house which had been a vendue-house, on South by Second Street, to help pay for the new house, because it was not in repair to defend the congregation against the storms and cold weather in winter." About that time it was ascertained that the congregation was composed of about eighty families, of whom twenty came from the First Church and sixty from the temporary church. By the aid of lottery, granted by the Assembly in 1769, to raise two thousand five hundred pounds, the First, Second, and Third Churches were enabled to pay off the greater portion of their

THIRD PRESBYTERIAN (OLD PINE STREET) CHURCH.

debts. This also enabled the Third Church to complete its building. "The cost of the church," says Rev. R. H. Allen, in his centennial anniversary address of the "Old Pine Street Church," has been estimated at sixteen thousand dollars. The building was of brick. The front on Pine Street had a large central door, surmounted by a pediment. On each side of the door in the first story was an arched window. In the second story was a large central window, two arched windows on each side, and a circular window in the pediment. On the east side there was a door in the centre and two windows on each side of it. This doorway was immediately opposite the pulpit. It was approached by a broad walk leading from Fourth Street, where there was a gate. In the second story were five arched windows. The south front was exactly the same as the north. The west side of the church was a blank wall, except that immediately back of the pulpit, which was on that side, was a

window. There was a neat brick floor, high ceiling, rich and elaborate carving on the woodwork, square, high-back pews, in which short men and children entering, they were lost sight of; brass candlesticks burnished to golden brightness, and filled with honest tallow candles, which were snuffed three times in an evening, and a high box pulpit, covered with red velvet, the whole producing an effect which was then magnificent."[1]

The first pastor elected by the Third Church was the Rev. Samuel Aitken, who was chosen Nov. 14, 1768, and who officiated alternately with the pastors of the First Church. Mr. Aitken served for some months with satisfaction, but eventually a controversy arose between the Third and First congregations, and also between the ministers. Charges of gross immorality having been laid against Mr. Aitken, he was suspended from the ministry, but was restored by the Synod in 1772. He was joined to the first Philadelphia Presbytery. The congregation of the Third Church was thus left without a pastor. The time that had elapsed after the suspension of Mr. Aitken had been supplied by the pastors of the First Church and by others. On Aug. 5, 1771, at a meeting of the congregation, at which the Rev. Dr. Francis Allison was moderator, a majority of the members extended a call to the Rev. George Duffield, of the Presbytery of Donegal, and promised him a salary of two hundred pounds per annum. Mr. Duffield was pastor of the churches at Big Spring, Carlisle, and Monegan. He was what was called in the politics of the Presbyterian Church of that day "a new-side man." The choice was, therefore, very unpalatable to the members of the First Church, who belonged to the old-side, and from whom the Rev. Gilbert Tennent, with the New Lights, had gone out. They claimed that the congregation of the Third Church had no right to elect a pastor "without their approbation," and they did not approve of Mr. Duffield. There was nothing against him as a fervent and humble minister of God, nor as regarded his piety, activity, or learning; but there was a great spirit of combativeness in Presbyterianism from its earliest introduction into Pennsylvania, and this case gave an opportunity for a display of the heat and controversy which seem to be necessary to a healthy and lively condition of ecclesiastical affairs. After the call was made it was necessary that permission should be obtained to prosecute the call before the Presbytery of Donegal. This permission was granted by Synod May 26, 1772, by a large majority. The Second Presbytery having refused to grant such permission, and an appeal being made by the Third Church to the Synod, the action of the latter created great dissatisfaction. A long protest against the action of the Synod was presented by Messrs. Alexander McDowell, Matthew Wilson, and James Latta, who dissented from the vote of the Synod reversing the judgment of the Second Presbytery of Philadelphia, and "giving the liberty to the people who call themselves the congregation of Pine Street" to prosecute a call to the Rev. Mr. Duffield. In May, 1773, the Presbytery of Donegal reported to the Synod that they had accepted Mr. Duffield's resignation, who had been called to the Third Church. After that acceptance Mr. Duffield came to Philadelphia and proceeded to discharge his duties, or, rather, he attempted to discharge them. When he was ready to assume the charge of the congregation it was found that the First Church, having been unsuccessful before the Synod, was determined to prevent the Rev. Mr. Duffield from preaching in the Third Church. The First Church people, exercising the rights of owners, locked the doors on Sunday to prevent the use of the building. This may have been done several times, but on Sunday, Sept. 27, 1772, the controversy came to the test of force. Mr. Duffield, with a large number of the congregation, repaired to the church. The scene is thus described by the Rev. George Duffield, grandson of the first pastor of Pine Street Church:[2]

"A multitude assembled in the street below the old edifice, pressing and impatient to enter. The throng increasing, the rival and contesting authorities of the Pine Street congregation, having secured an entrance through the window, the doors were unlocked from within and thrown open. Immediately the crowd rushed in, and others arriving so filled the house and the doors of entrance that on the arrival of the preacher he found it impossible to enter. To meet the exigency, he was carried and lifted up so as to enter by one of the large windows that on either side of the pulpit opened to the west on the graveyard. The religious services commenced, and had not proceeded further than about the close of the second Psalm, when the crowded assemblage began to surge by some movement from the door on the northeast corner. The minister had arisen and announced his text, when the king's magistrate was seen struggling and pressing his way up the middle aisle till he took his stand near the spot where afterward was, and undisturbed remains, interred the body of my grandfather. The royal officer ordered the congregation to disperse; and, pulling from his pocket the riot act, he began to read it authoritatively for the purpose of carrying its provisions into effect. The preaching thus being interrupted for the moment, Mr. Robert Knox, one of the trustees of the congregation, rose, and, with a loud, commanding voice, addressing the magistrate, exclaimed, in full Scotch-Irish brogue, 'Quet that, Jimmy Bryant.' The magistrate proceeded a second time, when he repeated his command, adding, 'Don't come here to disturb the people in their worship of God.' The king's officer still proceeding with his reading. Mr. Knox, a man of tall, athletic form and stout muscle, with heroic resolution and nerve, left his pew, and, taking the magistrate with one hand by the nape of the neck and the other by the breeches, lifted him above the heads of the crowd, and carrying him to the door, cast him forth unceremoniously, saying, 'There, take that! Begone! and disturb no more the worship of God!' Then, turning to the preacher, he added, 'Go on, Mr. Duffield,' which he did without further molestation. The next day my grandfather was arrested, brought before the mayor, the venerable and excellent Thomas Willing, whom I well remember often to have seen, as on my way to church I passed his residence, on the corner of Third Street and Willing's Alley, just opposite St. Paul's Church. He was charged with having instigated and aided in riotous proceedings at the Pine Street Church. The court demanded of him what was his answer to the charge. He responded courteously to the worthy mayor that he 'had no plea to offer,' and claimed to have done nothing but exercise his right as a

[1] This is the description of Rev. R. H. Allen, in his "Historical Address." There must have been subsequent alterations, by which on the side towards Fourth Street the centre doorway was filled up, and a doorway substituted near the north and one near the south end. The engraving is a perfect representation of the old building as it stood in the memory of persons now living.

[2] Address at the centennial celebration, 1868.

minister of Christ to preach his gospel. The mayor remarked that this stand taken by him would greatly embarrass the court. He might plead not guilty, and enter his brother, Dr. Samuel Duffield, as bail, which he would at once accept. This was respectfully declined. The mayor, after further conversation and remonstrance, stated that he would willingly go his bail himself, desiring to avoid the necessity of committing him to prison. My grandfather courteously thanked the mayor for his kindness, but respectfully remarked that if his honor felt it his duty to remand him to prison, he would much prefer to go there than, by putting in a plea on his unlawful arrest, directly or indirectly admit the tyrannical exercise of power in interfering with and trying him for the exercise of what he claimed to be his right, derived not from king or magistrate, or any established church, but from God, to preach his gospel wherever people willingly and peacefully assembled to hear him. On further conversation and consideration by the court, he was dismissed to his home, with information that at another time the matter would be investigated. He never afterward was summoned to appear in court in relation to the charge."

After this time Mr. Duffield was undisturbed by any attempt to exercise force to prevent his ministrations, but the First Church went to law to recover possession of the property, and the Third Church obtained the familiar title of "the fighting church."

At the meeting of the Synod in May, 1773, the First Church made complaint of the conduct of Mr. Duffield and the congregation. The Third Church made a reply. The Second Presbytery, to which the Pine Street Church had formerly belonged, and which was strongly under the influence of the First Church, refused to receive Mr. Duffield as a member. He also made his appeal to the Synod. Before the matter could be settled by the Synod, however, the First Church withdrew the consideration of the matter from the Synod, alleging in effect that they could not obtain a fair decision from that body. Mr. Duffield was eventually received into the Second Presbytery, but having carried his point in this matter, that his presence might not molest men who did not sympathize with him in ecclesiastical matters, he voluntarily applied for, and received, a dismission to the other Presbytery, with whose members he had more especial affinity. As far as the ecclesiastical tribunals were concerned, the case was thus ended; but the courts succeeded to the controversy, which had not been settled when the American Revolution fairly commenced. Although verdicts were obtained by the First Church, they were not settled, and law was compelled to be silent amid the clash of arms.

The Associated Presbyterian Church of Scotland, more frequently known as the Seceders, or Secession Church, arose in November, 1733, but it had no organization in Philadelphia perhaps until 1751. In that year the Associate (Burgher) Synod received an application for a minister from persons residing in Philadelphia. In 1752 another request was forwarded with a promise to defray all the expenses of the mission. It was not, however, until 1766, that the Rev. David Telfair, who was the first known minister of the Burgher congregation, arrived in this city. A church was erected upon a lot on the south side of Shippen Street, between Third and Fourth, where a frame building was erected twenty-seven feet in width by forty feet in depth. He remained pastor of this

congregation until his death, April 11, 1789, in the sixty-ninth year of his age. In 1762, the Rev. William Marshall was appointed by the Associate (anti-Burgher) Synod missionary to America. He first settled at Deep Run, in Bucks County. He was born about 1740, in Fifeshire, Scotland, and was licensed to preach in 1762. In February, 1764, he preached at a hall in Videll's Alley, used by the Ancient York Masons as a lodge-room, and subsequently continued in the service of the persons who formed the small congregation which worshiped in that place. They are said to have afterward used a vendue-store and frame house on Shippen Street; but whether the latter was the building in which Mr. Telfair preached is not now known. In 1768 the persons belonging to this small congregation gave Mr. Marshall a call to be their pastor, which he accepted with the limitation that his installation should be delayed until the Lord would give him further light about it. He entered on his duties at once at a salary of eighty pounds, Pennsylvania currency. He became pastor formally in 1771. In 1770 they purchased a lot of ground on the south side of Spruce Street, between Third and Fourth, upon which a building was erected in 1771-72. It is probable that the congregation of the church on Shippen Street were at that time or previously united with them, since the title to the ground on Shippen Street—still occupied as a burying-ground—is in the congregation of the church on Spruce Street, which received the name of the Scots' Presbyterian Church. The building and lot cost about three thousand nine hundred to four thousand dollars. Eight hundred dollars was advanced by members of the congregation, two thousand seven hundred dollars were obtained in Philadelphia by subscription, and about six hundred dollars in Baltimore and New York. The building was secured by a deed of trust to the use of persons holding the principles of the Associate Presbyterian Church. Mr. Marshall was in charge of that congregation, and remained in such service at the breaking out of the Revolution. A newspaper of May 25, 1772, says, "The Scots' Presbyterian Church is to be opened next Sunday," which was the 31st of May. This probably was the day of dedication.

In 1772 the Presbyterians, in consequence of remonstrances to the Assembly against the form of taking an oath in law proceedings, by "kissing the book," succeeded in inducing the General Assembly to pass a special law for their relief, allowing them to take oaths by the uplifted hand, etc.

At the beginning of the Revolutionary war the First Presbyterian Church, in Market Street between Second and Third, was in charge of Rev. John Ewing, and he remained there as pastor until the time of his death, in 1802. Rev. Francis Allison was associated with Mr. Ewing until his death, which occurred Nov. 28, 1779, Dr. Allison then being aged seventy-four years. Ewing and Allison were both

connected with the College of Philadelphia. Mr. Ewing was instructor in philosophy in the college until its rights were taken away by act of Assembly, and the University of Pennsylvania created. In the new institution Dr. Ewing was elected provost, and when the charter was restored, and the college and university were united, he was kept at the head of the institution. His lectures were upon natural and moral philosophy. He was one of the prominent members of the American Philosophical Society, and was its vice-president for some years. Dr. Francis Allison, although assistant to Dr. Ewing, was, until the college franchises were attacked, his superior in that institution, he being vice-provost while Ewing was tutor. He had the reputation of being the best Latin scholar in America.[1]

In 1793 the ancient meeting-house of the First Church, commonly called the "Old Buttonwood," situate at the southeast corner of Market Street and White Horse Alley (now called Bank Street), was found to be too small for the accommodation of the congregation. It was resolved that "Old Buttonwood" should be torn down, and a larger and handsomer building erected in its place. The new church was one of the first in Philadelphia constructed upon the Greek model of architecture. The front was on Market Street, with four plain pillars, with Corinthian capitals, resting on a platform and supporting a pediment, upon the architrave of which was the inscription, "Founded MDCCIV. Rebuilt MDCCXCIV." The house was eighty-eight feet long, fifty-six feet broad, and forty feet high, having galleries. There were ninety-six pews upon the floor, holding six persons each, and altogether one hundred and sixty-three pews, having a seating capacity for nine hundred persons. The ascent to the main floor of the building was by eight marble steps.

During the early period of the history of the First Church burials were made in the ground attached to the "Old Buttonwood" meeting-house, in the lot which ran southward, extending along White Horse Alley toward Chestnut Street.

In 1768, John Mease, merchant, by his will bequeathed five hundred pounds to be put out at interest by his executors, "to be by them applied toward purchasing a lot of ground, or part thereof, which is now inclosed around the new Presbyterian Church on Pine and Fourth Streets, for a burying-place to accommodate the First Presbyterian Church in this city, or such of its members as may assemble for public worship at the said new church. But if the majority of my executors, or of the survivors of them, together with the pastors of the First Presbyterian Church in this city, judge that it would not be for the benefit of religion in general, or of the said First Presbyterian Church, to purchase the said lot of ground, in that case the said five hundred pounds shall be deemed to revert to the residue of my estate, to be hereafter disposed of and devised." This sum of five hundred pounds was loaned to Samuel Powel, on interest, and was paid to William Allison, executor of Mr. Mease, in 1776. The currency difficulties and obstacles to safe investments operated during the Revolutionary war against any use being made of this fund; but finally, in January, 1786, Rev. John Ewing, pastor of the First Church, and Rev. William Allison, surviving executor of John Mease, by a formal paper, declared that "it would be for the benefit of religion in general, and of the First Church in particular, that the lot mentioned in the will should be purchased as directed by Mr. Mease." This was done, and the whole of the lot on Pine Street and upon Fourth Street was apportioned by agreement and understanding between the congregations, a record of which has not been preserved. The Third Church took the ground east of the church to Fourth Street, while the First Church retained the title in the burying-ground west of the building. Burials in the First Church lot on Pine Street must have commenced soon afterward. The Market Street ground was abandoned, and the remains of many of those interred were removed. Little was found beyond bones and skulls, most of which were removed to the ground of the First Church. Many tombstones were taken to Pine Street and placed against the southern wall, where they yet remain. These stones do not always certify that the remains of the persons commemorated are in the ground.[2]

At the Second Presbyterian Church, Rev. James Sproat was nominally in charge during the Revolution, but he was absent during much of the time. He was born in Scituate, Mass., April 11, 1721 (O. S.). His father was a captain and soldier under Queen Anne, and left some estate in land. James graduated at Yale, in the class of 1741. While he was a student, the Rev. Mr. Tennent came to New Haven and preached. Sproat and other students attended out of curiosity, and some in contempt. Sproat was affected by the sermon to such a degree that he afterward visited Tennent, and determined to study divinity.

[1] Among the pupils of Dr. Allison were Charles Thomson, secretary of the Continental Congress; Governor Thomas McKean, George Ross, and James Smith, signers of the Declaration of Independence; Hugh Williamson, historian of North Carolina; David Ramsey, historian of South Carolina; Dr. John Ewing, his superior in the church; Dr. Latta, Bishop William White, and many more. Bishop White said that Dr. Allison was a man of unquestionable ability in his department, of real and rational piety, with a proneness to anger, which was forgotten in his plainness and affability.

[2] Among the tombstones on the ground of the First Church of persons who died between 1775 and 1801 is that of David Rittenhouse, astronomer, who died June 26, 1796, and his wife, who died 1799. Mr. Rittenhouse was originally buried in a vault in the garden of his house at the northwest corner of Seventh and Arch Streets. At the time of his interment it was supposed that his burial there was to be permanent. At what time his remains were removed to Pine Street is not known. A tablet to Henry Reigel, who died Feb. 2, 1798, in his sixty-eighth year, states that he was born at Stuttgart, Suabia, empire of Germany, and served the Elector in various public offices, particularly as commissioner of finance.

He commenced under Rev. Jonathan Edwards. After being licensed to preach he was arrested in Connecticut and carried to Massachusetts, where he belonged. Rev. Samuel Finley, afterward a Presbyterian minister, was sent from Connecticut to New York about the same time. At twenty-two years of age Rev. Mr. Sproat was a minister at Guilford, Conn., where he was for about twenty-five years. He came to the Second Presbyterian Church of Philadelphia March 30, 1769. At the breaking out of the Revolution he went into the Continental service as chaplain of army hospitals. During this period he was often absent from the city, and the Second Church was indifferently supplied. After his duties in the army were relinquished he returned to the Second Presbyterian Church. In May, 1787, Dr. Sproat's health not being good, Rev. Ashbel Green was called to the Second Church as associate minister. He was a native of Hanover, N. J., and was born July 6, 1762. He was educated at the College of New Jersey, served during the Revolution for a time in the American army, and from 1783 to 1785 was a tutor in the New Jersey college. He became professor of Mathematics and Natural Philosophy in 1785, and served until 1787, when he accepted the call to the Second Presbyterian Church. On his ordination to the Second Church, an attempt was made to harmonize differences which had long existed between the First and Second Churches upon doctrinal points, so that the old and new side should be reconciled. The churches belonged to the same jurisdiction, but the First Presbytery, to which the Second and Third Churches belonged, and the Second Presbytery, to which the First Church was attached, were not cordial in their intercourse. With this purpose, Dr. Sproat, of the Second Church, presided; Dr. Ewing, of the First Church, preached the sermon; and Dr. Duffield, of the Third Church, gave the charge to pastor and people. Ewing and Duffield were personally estranged,—a feeling arising out of the controversies between the First and Third Churches before the Revolution. During the yellow fever of 1793, Mr. Green and his wife were attacked with the prevailing malady, and upon their convalescence they were removed to Princeton, N. J. Rev. Dr. Sproat remained in the city, he believing it to be his duty to his congregation. In the course of his labors he was infected, and his wife, eldest son, and youngest daughter all perished from the epidemic. Mr. Sproat himself died Oct. 18, 1793. So dreadful was the condition of affairs that it was difficult to obtain the usual observances at funerals, and in many cases the dead-cart was the only vehicle and the driver the only attendant. In the case of Dr. Sproat, some colored men of religious inclinations offered to carry his bier. Some persons met for the purpose of prayer at the Second Church, and a procession was formed of about fifty persons, which followed the remains of the preacher to the cemetery in Arch Street, above Fifth. Dr. Green was absent at this time. He returned November 10th, and on Sunday, the 16th, preached a funeral sermon, which was published. Speaking of the scene afterward, he said that "it was the most solemn and effective I ever witnessed. The pulpit was hung in black, and the greater part of the audience were in mourning for their relatives or friends. I was absent for about three months. All the circumstances taken together almost overcame me and the audience. I wept through the exercises, as did the people."

By the death of Mr. Sproat the burden of the Second Church fell on Mr. Green. In order to assist him, measures were taken by the Second and Third Churches to get the services of the Rev. John Nelson Abeel. The plan to be adopted was that Mr. Abeel was to give two-thirds of his time to the Second Church and one-third to the Third Church. "It was an ill-contrived arrangement," said Dr. Green, "and did not last long." Mr. Abeel was called to Philadelphia from the Dutch Church in New York, where he had been exceedingly popular. Afterward Mr. Abeel left the Second Church, and Dr. Green continued in it. When the yellow fever came, in 1797, he removed his family to Princeton, but remained himself in the city. The greater part of his congregation had gone away. "In general," he said, "it was the poorer part which remained; but the churches in the city, except of one Methodist, were closed, and the larger part of my audience were not of my pastoral charge. The people to whom I preached were about the one-third part of my congregation in time of health."

In 1799, Rev. Jacob J. Janeway became associate pastor of the Second Church. He was born in New York City in 1776, and was educated at Columbia College, where he graduated in 1794. He was ordained in 1799, and came to Philadelphia, where he remained, assisting Dr. Green in 1800. During Dr. Green's pastorship he was elected chaplain to Congress with Bishop White. He was elected in 1792, and held that office until Congress' removal to Washington, in 1800. Dr. Green attracted attention by his preaching, and his church became attended by crowds of persons, drawn by his eloquence.

During the British occupation of the city, in 1778, the Second Church was occupied as a hospital. Mr. Hazard says that the pews and wood-work were destroyed, as well as the fence which inclosed the church. A chandelier, imported from England, which was suspended from the centre of the ceiling, was taken down by them, sent to New York, and was afterward repurchased by the congregation. The church was lighted entirely with candles placed in the branches and in ten sconces around the wall, holding one or two candles each.

About the year 1795, owing to improvements in the neighborhood of the church, and the situation becoming so noisy as to require some remedy, resort was had to a petition for relief, first to the city authorities and afterward to the Legislature. The

former having refused, the latter was petitioned to grant permission to the church to extend chains in front of the church at Third and Arch, to prevent the passage of carriages and horsemen in time of divine service, which privilege was granted, and existed for some years. But finally the grant was removed, on application of citizens, who considered themselves aggrieved. Horsemen frequently attempted to evade the regulation, going around the chains on the pavement, until arrested by the sexton or constable in charge.

The church not occupying the whole space inclosed on Third Street, left a vacancy there, upon a part of which, and a lot adjoining, purchased by the congregation, was erected John Ely's frame school-house, to which the boys of the church were sent. This school-house, about the year 1794, gave place to a three-story brick building, erected by the congregation for a lecture-room and charity school of the church, which was afterward sold with the rest of the church property. The weekly lectures being always so well attended, it became necessary to erect a room of greater capacity, which was done on Cherry Street, in the rear of the burying-ground, immediately adjoining the church. The Delaware Fire-Engine Company was allowed to erect its house there, upon condition that they should place a door in the rear, so that, in case of need, the engine might be used for the church, and that the company would remove the house at the request of the trustees, which was accordingly done some years afterward.

SECOND PRESBYTERIAN CHURCH.

The quarrel between the First and Third Presbyterian Churches, which was pending at the outbreak of the Revolution, continued during that contest. The matter came to a trial in February, 1776, suit being brought for forcible entry and detainer in the name of Robert Taggart, lessee of First and Third Presbyterian Churches, *vs.* Robert Knox, Alexander Alexander, and others, to recover possession of the church at Pine and Fourth Streets, which the defendants and their associates forcibly entered in 1772, in order to introduce George Duffield to the pulpit. The court gave judgment in favor of the plaintiffs, the First Church. The Third Church gave notice of an appeal to the king in Council. In less than five months that mode of settlement was closed by the Declaration of Independence. After that event new proceedings might have been necessary, but the congregations agreed on compromise. The First Church agreed to take five thousand dollars in full satisfaction of all claims. When the money came to be paid, that congregation generously made a deduction of seven hundred and fifty dollars, so that the controversy was ended, and the title of the Third Church was confirmed on the payment of four thousand two hundred and fifty dollars.

In 1795 the charters of the First and Third Presbyterian Churches—which were united, and which union had been the cause of much controversy and dissension—were annulled by act of Assembly. A new and separate charter was granted to the First Church on the 21st of September, 1796.

The religious services in the Third Church were interrupted in some degree by the events of the war. Rev. George Duffield was upon the patriot side, and his sermons upon proper occasions were not uncertain in teaching. On the 6th of July, 1776, he was appointed chaplain of all military forces in the service of Pennsylvania, and he held the office during the war. While the British were in Philadelphia, and while Congress was in session at York, he was elected chaplain of Congress. His services were divided. When the army was quiet he returned to the church and ministered. When the campaigns were opened and the troops in danger, he was generally in camp. He left Philadelphia when Washington retreated through New Jersey to the river Delaware, in the latter part of 1776. He reached the army at Elizabethtown, and remained with it until after the battles of Princeton and Trenton, and was among the last who crossed the bridge over the Asanpink Creek, near Trenton, before it was destroyed under orders of the commander-in-chief. Mr. Duffield was in charge of this congregation until the time of his death, which occurred Feb. 2, 1790.

During the remainder of that year the church was without a pastor; but in 1791 Rev. John Blair Smith, D.D., president of Hampden Sidney College, Virginia, was called as pastor, at a salary of three hundred pounds. He accepted the position, and discharged its duties until the year 1795, when he resigned to become president of Union College, New York. For four years after this the church was without a pastor. In 1799 Mr. Smith was recalled and came back to the church; but, unfortunately, for a short time only. He was seized with yellow fever in 1799, and died August 22d of that year, at the age of forty-four years. He was a native of Pequea, Lancaster Co., Pa., where he was born June 12, 1756. He was a son of Rev. Dr. Robert Smith and brother of Rev. Samuel Stanhope Smith, who was president of Hampden Sidney College. John Blair Smith was educated at Princeton, but graduated at the College of New York in 1778. In 1775 that institution gave

Digitized by Google

him the degree of D.D. He succeeded his brother as president of Hampden and Sidney in 1779. He was celebrated as a preacher in the valley of Virginia, and, after twelve years' service in that country, he came to Philadelphia upon invitation of the Third Church.

During the Revolution, when the British were in Philadelphia, they used this church as a hospital. The pews were burned for fuel. They stripped the pulpit and windows, and after the abandonment of the church for hospital uses, they used it as a stable for the dragoons.

The sextons of the Third Church during this period were as follows: 1777, William Carr; 1788, Thomas Mitchell, clerk and sexton; 1793, William Allison; 1799, Alexander Urquhart. Sexton Allison was presented in 1798, by the congregation, with "a neat, snug, comfortable wig." Sexton Mitchell lost his office in 1792 in consequence of his refusal to open the pew-doors for the congregation. He was willing to perform his duty in all other respects; but upon this the congregation resolved that his "answer was not satisfactory."

In 1792 a large pew opposite the pulpit, at the end of the middle aisle, was reserved "for the accommodation of respectable strangers." In the same year a large pew in the centre was ordered to be rented for six pounds yearly. In 1793 a proposition that the members disapprove of the practice of informing the congregation from the desk, on Sundays, when pew-rents were payable, was negatived by a large majority. This church took advantage of the act of Assembly authorizing the putting up of chains across the streets in the vicinity of churches. In fact, the law was passed principally through the efforts of the Second and Third Presbyterian Churches. The committee on behalf of the Third Church to consult upon the subject was composed of Paul Cox, F. MacIlvaine, and J. McCulloch. In 1792 it was unanimously agreed that "no hooks, nails, nor other things be put up in front of gallery and columns for the purpose of hanging hats or anything."

The sacrament at the Second Church, at the time of which we are speaking, was celebrated according to the ancient usages and forms observed in Scotland and the north of Ireland. The preparatory service was held on Friday evening, and the names of any admitted by the session to communion were read at this preparatory service. Each communicant received from the pastor or one of the elders a "token," which was to be an evidence that the person presenting it was entitled to the ordinance. The celebration of the Lord's Supper was always on the Sabbath morning, after the sermon. The elements were not distributed to those seated, but tables covered with linen were arranged along the middle aisle and along the aisles on either side of the pulpit. As the communicants could not be seated all at once, it was necessary that there should be several tables, often as many as five being used, those who had communed retiring, and others taking their places. While this was being done part of a hymn was sung.

In June, 1799, a small number of persons were organized by the Presbytery of Philadelphia as the Fourth Presbyterian Church. The members of this little congregation had formerly been connected with the Third Church, and had gone out from the congregation in consequence of disagreement with the majority as to the propriety of choosing George C. Potts to the pastorship. During the vacation in the pulpit of the Third Church, after the death of John Blair Smith, in 1790, Mr. Potts, who was a native of Ireland, was called upon to supply the pulpit, and he became quite popular among those members of the church who were of Irish birth. The Scotch and Americans were not so strongly impressed with his merits, and his adherents, who withdrew, formed the Fourth Church. The indigent circumstances of many of the members of the new organization rendered it impracticable to erect a place of worship, and induced them to rent a very diminutive frame house that had been put up as an appendage to Mr. Peale's residence, on the southwest corner of Lombard and Third Streets, where first began the Philadelphia Museum. This small frame building, of not more than twelve by thirty-five feet, adjoined the corner house on the west side, having its narrow front on Lombard Street. They had no regular pastor at that time, services being conducted by supplies furnished by the Presbytery. In 1800 this small congregation extended a call to George Potts, who was then a licentiate under charge of the Presbytery of New Castle. He accepted the call, and was ordained and installed May 22, 1800. Rev. John Blair Linn, of the First Presbyterian Church, preached the ordination sermon, from John xxi. 15. Rev. John Davenport, of Deerfield, N. J., offered the ordaining prayer, and Rev. Thomas Boyd delivered the charges to the pastor and people. This was the organization of a congregation which afterward became eminent among the Presbyterian Churches of Philadelphia. Mr. Potts was a native of Ireland, born in the county of Monaghan. He came to the United States in the year 1797. He was educated at the University of Glasgow, and was licensed by the Presbytery of Monaghan. His only permanent service was with this church, with which he remained until near the time of his death.

After two years' stay in the building at Third and Lombard Streets, the means of the members were sufficient to justify them in making an effort to obtain a lot for the erection of a building for church purposes. On the 30th of March, 1802, Israel Israel, sheriff, for the consideration of eight hundred dollars, conveyed to Edward Hanna, Robert Jackson, and Robert Gordon, trustees, a lot of ground upon which a one-story carpenter-shop was erected, on the east side of Fifth Street h side of Gaskill

Street, forty-one feet nine inches on Fifth Street, and one hundred and twenty feet on Gaskill Street, subject to a ground-rent of $41.75 per annum. Subsequently the adjoining lot on the north, with a three-story brick house thereon erected, was purchased, making the whole width on Fifth Street sixty-one feet nine inches.

Upon this lot a church-building was commenced shortly afterward. The corner-stone was laid on the 4th of July, 1802, by Rev. George C. Potts and the elders and trustees of the congregation. The work upon it proceeded very slowly, and it was not completed for several years, although the congregation occupied it while it was in an unfinished condition. When completed the house showed a plain exterior, which was rough-cast, and, after the lapse of years, whitewashed. A central doorway on Fifth Street, with wooden frame and pillars, and square windows, presented themselves to the eye. The interior was sufficiently finished to allow the congregation to use it by the end of 1803, and the church was opened for worship on the 14th of December of that year, the services being under the direction of Rev. Nathaniel Irwin, of Neshaminy Church, and Rev. George C. Potts, the pastor.

In 1800 the church applied to the Legislature for the grant of a city lot, for the purpose of a burying-ground. On the 15th of March of that year the Legislature passed a law, vesting in the Fourth Presbyterian Church a city lot, bounded on the east by Twelfth Street, on the north by Lombard Street, on the west by Thirteenth Street, extending south seventy-eight feet, of a width on Lombard Street of three hundred and ninety-six feet. This grant was made for a "church and burying-ground;" but the situation at that time was so remote from the centre of population, and particularly from the residences of members of the church—most of whom lived in the neighborhood of Spruce, Pine, Lombard, and South Streets, between the Delaware River and Fourth Street—that the idea of erecting a church there was not then entertained. The ground was appropriated for the purposes of a church burying-ground, and went into use as soon as the grant was made.

The Scots' Presbyterian Church was under the pastorship of the Rev. William Marshall at the outbreak of the Revolution, and he continued in that charge during the contest. He preached until the British army entered Philadelphia, when, in consequence of his political sentiments, which were never concealed, he prudently left the city. During the time when the church was vacant it was taken possession of by the British, and was used as a hospital. The pews were destroyed, and other damage was done. After the evacuation of the city the damages were assessed at £5500 18*s*. Continental currency. Of course the actual injury at specie value was far below this estimate, as may be judged by the fact that in the bill of damages thirty pounds of nails and iron were set down as worth £142, while forty-nine hinges were valued at £472.

Mr. Marshall lived near Third and Spruce Streets. His house was broken into during his absence, and his furniture taken away. He advertised his loss after his return in 1778, and added that his property was taken "as rebel property out of his house by an understrapper." From 1778 to 1788 this congregation was ministered to by Mr. Marshall, but not without difficulty, distrust, and discontent.

In the latter year a cause of dissension, which had been creating unpleasant feelings in the congregation for some time, produced a rupture. The circumstances were these: In 1776 the Associate Presbyterian Church in the United States was formed into two Presbyteries. The Presbytery of Philadelphia consisted of Messrs. James Proudfit, Matthew Henderson, William Marshall, John Roger, John Smith, James Clarkson, William Logan, John Murray, James Martin, and Andrew Patton. The Presbytery of New York was composed of John Mason, Thomas Clark, and Robert Annan. These Presbyteries were co-ordinate, and were not subject to any common court in this country, being subordinate to the Synod of Edinburgh. Under this organization the Scots' Presbyterian Church of Philadelphia belonged to the Associate Presbytery of Pennsylvania. At this time the Reformed Presbyterians, or Covenanters, had in the United States three ministers,—John Cuthbertson, William Lynd, and Alexander Dobbin. In 1777 an effort was commenced with a view to unite the Associate Presbyterian Church and the Reformed Presbyterian Church, or Covenanters. These negotiations continued for six years, but in 1782 it was agreed that the union should be made, and the body thus constituted was entitled the Associate Reformed Church. The influence of Mr. Marshall was against this measure, and the Scots' Presbyterian Church was divided. Five of the elders of the Scots' Presbyterian Church and part of the congregation were anxious to unite with the new organization. Mr. Marshall and about one-half of the members were not favorable to the measure. The controversy at length broke out with violence. On a Sunday in June, 1786, the five elders took possession of the church and forbade Mr. Marshall to occupy the pulpit. At this time a dwelling-house on the west side of the church—which is still standing—was being built for the residence of Mr. Marshall. It was not finished, but was in a condition to be used. Therefore, without resorting to violent means to reinstate themselves, Mr. Marshall and his adherents withdrew to the house, where they held service for the day. It is probable that services were held there for some weeks.

In sympathy with Rev. Mr. Marshall were Rev. James Clarkson, Robert Hunter, James Thompson, and Alexander Moore, ruling elders. They sent a

protest against the action of the Scots' Presbyterian Church in Philadelphia, and against the union made by the Associate Presbyterian Church with the Reformed Presbyterian Church, or Covenanters, but the Synod refused to sustain the appeal. No other course was left for Messrs. Marshall and Clarkson and their adherents but obedience or secession. They chose the latter course.

The Scots' Presbyterian Church was for a time without a pastor, but negotiations were opened without delay with the Rev. Robert Annan, of the Scots' Presbyterian Church, Boston. This clergyman came to the United States from Scotland, about 1758, with Rev. John Mason, who was sent from the Associate (anti-Burgher) Presbytery of Scotland. Mr. Annan was a probationer. He was a fellow-student with Dr. John Mason, in Scotland. He settled after his arrival at Neeleytown, Orange Co., N. Y. During the Revolution he was a promoter of the Whig cause. About the close of hostilities he took charge of Scots' Presbyterian Church in Boston, then newly formed. His service there was unsuccessful, in consequence of difficulties with the congregation in regard to discipline. After Mr. Marshall's secession from the Philadelphia Scots' Church Mr. Annan became pastor of the latter, and remained there until 1802, when he became pastor of an Associate Reformed Church in Baltimore. He died Dec. 6, 1819, aged seventy-seven years. Rev. James Gray, D.D., succeeded Mr. Annan, and held the pulpit from 1804 to 1815.

In 1816 this congregation called Rev. Robert McCartee. He held the pastorship for five years, leaving the church in 1821, and being succeeded by Rev. James Arbuckle, who was installed in 1822. It was during Mr. Arbuckle's pastorate that the Scots' Associate Reformed Church suddenly ceased to be connected with that organization, and was transferred bodily, with other churches of the denomination, to the Presbyterians.

By this act the Scots' Church became the Eighth Presbyterian Church, and was attached to the Presbytery of Philadelphia. Rev. James Arbuckle remained pastor until 1824, when he was succeeded by Rev. William L. McCalla. Mr. McCalla was born in Jessamine County, Ky., Nov. 25, 1788. He was licensed by the Presbytery of West Lexington. In 1815 he was appointed an army chaplain by Gen. Jackson. In 1819 he was settled as pastor of a Presbyterian Church at Augusta, Ky., from which he came to the Scots' Church.

We have already stated the fact that there was a Scots' Presbyterian Church in Shippen Street, between Third and Fourth, about 1753. It belonged to a Burgher congregation. The Scots' Presbyterian Church of Spruce Street was anti-Burgher. During the intervening time the Burgher congregation in Shippen Street was worshiping in the frame church, under the charge of Rev. David Telfair, who had been in that charge for many years. He remained there until his death, April 11, 1789, in his sixty-ninth year. After that event the congregation fell away. It was natural that they should incline toward the Scots' Presbyterian (anti-Burgher) Church, in Spruce Street. The causes of the differences which had divided the Associate Presbyterian Church in Scotland were of no importance in Pennsylvania, and much less so after the Revolution had made the American churches independent. A union was therefore formed between the two churches. This occurred in 1782, while Mr. Telfair was yet living.[1]

The Rev. William Marshall, with his associates, who had seceded from the Scots' Presbyterian Church, obtained from the trustees of the University of Pennsylvania the use of the room in the academy which, by the original agreement in Whitefield's time, was always to be ready for use by any religious sect on its subscription to a prescribed creed, when not engaged by some other congregation. Here Mr. Marshall and his congregation worshiped until 1791. A lawsuit, in the mean while, was instituted to recover possession of the Scots' Presbyterian Church building in Spruce Street. The trial took place in July, 1790. The two judges who were upon the bench disagreed in their instructions to the jury. Judge McKean was favorable to the elders; Judge Rush inclined toward Mr. Marshall's party. The verdict was in favor of the elders, and Mr. Marshall determined not to continue the contest.

The congregation which withdrew with Mr. Marshall organized under the name of the Associate Presbyterian Church. After the failure in the suit with the Scots' Presbyterian Church, they resolved to erect a meeting-house for their own use. Donations were received from citizens. Many who did not belong to the congregation contributed, among whom were some members of the jury who gave the verdict against Mr. Marshall's party.

In August, 1790, David Clark and William Young purchased a lot on the north side of Walnut Street, between Fourth and Fifth, having a front of thirty-six feet ten and a half inches on Walnut Street, and

---

[1] By this transfer the lot on Shippen Street, between Third and Fourth Streets, became the property of the Scots' Presbyterian Church. The property is still held by that corporation. The lot used as a burying-ground is surrounded by houses on all sides except upon the Shippen Street front. In the neighborhood this ground, now much neglected and in wretched condition, is known as "Margaret Duncan's burying-ground." The origin of this name is perhaps attributable to the fact that Mrs. Margaret Duncan, widow of Isaac Duncan, who died in 1802, aged seventy-nine years, is buried in the ground by the side of her husband, Isaac Duncan, who died March 20, 1770, aged fifty-two years. The tomb of Rev. David Telfair, for a long time minister of the Associate Reformed (Burgher) congregation, is in the same ground. He was a son-in-law of Mrs. Duncan. Mrs. Duncan might have presented this ground to the church in 1753, but whether this is so has not been ascertained. At her death she devised a lot of ground on Thirteenth Street, above Market, for the erection of a church; and on that lot was erected a building subsequently known as "Margaret Duncan's Church." The same congregation now worship in Race Street, east of Sixteenth, under the pastorship of Rev. J. B. Dales, D.D., and is known as the "Second United Presbyterian Church."

being one hundred and twenty-four feet in depth, bounded eastward by an alley. (The site is now occupied by the building of the Schuylkill Navigation Company.) Here they erected a brick church of one story in height, although the ceiling was lofty. The church stood back from the street a distance of fifty or sixty feet. It had an arched doorway, with an arched window on each side, and two windows upon the alley on the east side of the building. In front was a graveyard where tombs were placed. This church was opened for divine service July 31, 1791, by Mr. Marshall, who preached his sermon from the following text: "And I will shake all nations, and the desire of all nations shall come, and I will fill this house with glory, saith the Lord of hosts. The silver is mine, and the gold is mine, saith the Lord of hosts.

ASSOCIATE PRESBYTERIAN CHURCH.
[From an old drawing in the Philadelphia Library.]

The glory of this latter house shall be greater than of the former, saith the Lord of hosts; and in this place will I give peace, saith the Lord of hosts." (Haggai, chap. ii., verses 7, 8, 9.)

The title of the property was assured by a perpetual deed of trust, which declared "that the said church and lot of ground are held in trust for the Associate congregation in the city of Philadelphia who adhere to the religious principles expressed in a declaration and testimony of the doctrine and order of the church of Christ, agreed to at Pequea, Aug. 25, 1784, by the Associate Presbytery of Pennsylvania, that said congregation may assemble in said church for worship forever, and use the said burying-ground for interring the dead."

Among the members of the congregation who went with Mr. Marshall were William Young, bookseller, of Rockland, in Brandywine; Robert Aitken, who printed the first English Bible in this country; John Purdon, merchant, father of John, author of "Purdon's Digest;" Frazier Kinley; John McCulloch, printer; John McAllister, whip, cane, and spectacle-maker; and James McConchy, storekeeper. Mr. Marshall's salary was small, and not sufficient for his support. While in Philadelphia he married Mrs. Marshall, widow of a Capt. Marshall. She had been keeping a boarding-house, and after her marriage with Rev. Mr. Marshall she continued in the same occupation, by means of which herself and husband were made comfortable. Among her boarders were members of the Convention to frame the Federal Constitution of the United States of 1787. In 1792 the Count de Noailles, brother-in-law of Lafayette, boarded in that house, and remained there for several years. He was an officer in Rochambeau's army during the Revolution. After leaving Philadelphia and returning to his native country he entered the French army, and was killed in the West Indies. Louis Philippe, Duke de Orleans, afterward king of France, and his brothers, Dukes de Montpensier and Beaujolais, came to this country during the French Revolution. They arrived in Philadelphia in February, 1797, and, after remaining with Mr. Conyngham, of Conyngham, Nesbett & Co., they took up their residence with Mr. Marshall, where they stayed for some time, until they rented the house northwest corner of Prune and Fourth Streets, still standing. Their names are in the Directory of 1798, "De Orleans, Messrs., merchants, near No. 100 South Fourth Street."

In a book entitled "A Display of the Religious Principles of the Associate Presbytery of Pennsylvania," compiled by Rev. William Marshall, and published in June, 1794, there was given out "A Narrative Concerning the Maintenance of the Reformation Testimony," which was adopted by the Associate Presbytery of Pennsylvania Oct. 25, 1784. In that statement it is said that the Associate Presbytery of Pennsylvania was, by agreement, divided into two in 1776, and constituted the Presbyteries of Pennsylvania and of New York. The union with the Reformed Presbytery (Covenanters), it was said, was set on foot between the Associate Presbyteries of Philadelphia and New York, "and a party who called themselves the Reformed Presbytery, and who were of the same principles with those who take that designation in Scotland."

Mr. Marshall continued in charge of the Associate Reformed Church until his death, which occurred Nov. 17, 1802. His remains were buried in front of the church on Walnut Street. For three years this church was without a pastor. The Rev. Joseph Shaw, LL.D., succeeded Mr. Marshall in 1805, and remained in service until 1810. After his withdrawal from the church Mr. Shaw continued in religious service. He removed to Albany, N. Y., where he died, Aug. 21, 1824. In 1812, Rev. H. C. Brownlee, D.D., was elected pastor, and remained for two years. The Rev. John Banks, D.D., succeeded Mr. Brownlee.

In December, 1801, the Associate Presbyterian Church applied to the Legislature for the grant of a city lot for the purposes of a burying-ground, but the request was not granted.

In the latter part of 1797, Samuel B. Wylie and Thomas McAdam, both Irishmen, who left their native country in consequence of their connection with United Irishmen, removed to Philadelphia from New Castle, Del., where they had previously landed. At this time there was no distinctive Reformed Presbyterian Church holding the principles of the Covenanters in Philadelphia. The union of the Scots' Presbyterian Church with the Covenanters in the same Presbytery, in 1782, by which the united churches took the name of the Associate Reformed Presbyterian Church, though it carried to the union some of the congregations of the Covenanters, did not entirely annihilate that sect in this country. In this emergency the steadfast Covenanters turned to Scotland, and several missionaries were sent to the United States. Rev. James Reid came over before 1790, and preached from North Carolina to New York. William MacGarragh arrived in South Carolina in 1791, Rev. William King in 1792, Rev. James McKinney in 1793, and Rev. William Gibson in 1797. Messrs. Black and Wylie were educated for the ministry, and were soon licensed. The Reformed Presbyterian Church of the United States was again set up in Philadelphia, the first Presbytery being established in 1798. In 1799, Messrs. Donnelly, Black, Wylie, and McLeod were licensed to preach, and were all ordained in the course of two years. Mr. Wylie and his companion, Mr. McAdam, sought the means of worship in such manner as suited their principles, after their arrival. At the house of Thomas Thompson, laborer, at the southwest corner of Penn and South Streets, in an apartment in the second story, twelve feet square, a prayer-meeting was held for some time. With this small gathering Messrs. Wylie and McAdam became connected. The preaching of Wylie attracted new visitors, until a church was formed upon Jan. 28, 1798, by a commission consisting of Rev. William Gibson and Messrs. Andrew Gifford and David Clark, ruling elders of the Reformed Presbyterian Church of New York. William Henry was a ruling elder of the Philadelphia congregation, also Stephen Young and Thomas Young. Shortly after a lot of ground was bought on St. Mary Street, between Sixth and Seventh, upon which a small frame house was built and furnished before 1800. Rev. Samuel B. Wylie took charge, at which time he was ordained and installed as pastor of this humble congregation. His labors in its behalf were assiduous, and were rewarded with abundant success. Rev. Mr. Wylie remained in the pastorate for many years. The church building was situate on the north side of St. Mary Street, between Sixth and Seventh Streets. The situation was chosen originally at a time when the members of the church were poor and humble. The portion of the city in which their church was situated was most unpleasant, on account of the degraded character of the inhabitants. In 1817 or 1818 the members of the church purchased a lot at the southeast corner of Eleventh and Marble Streets, between Market and Chestnut Streets, where a fine brick edifice (since given to other uses) was erected. It was opened for service on the 21st of June of that year, the services being conducted by Rev. Mr. Wylie, the pastor, and Rev. Mr. McLeod, of New York. To the old church in St. Mary Street was attached a burying-ground, in which many members of the church had been interred. This circumstance induced the congregation to retain the ground. An attempt was made to set up a Sunday-school for black children there, which was partly successful. The building on Eleventh Street was larger than the purposes of the congregation required, and Mr. Wylie used a portion of it for a school.

Dr. Thomas D. Mitchell, in 1859, records his remembrance of the first congregation as follows:

"The Covenanters have long been known in the city as a religious body marked by very distinctive peculiarities. These continue to the present day, and are likely to be permanent. The first preacher of this congregation I ever knew was Mr. Wylie (more recently known as Dr. Wylie), who ministered to a small flock in a school-house between Lombard and Cedar Streets, east of Fourth, for several years. His hearers were poor, and consisted almost wholly of persons lately arrived in the country. These persons had imbibed the notion at home that Christians should not take part in civil government, and on going into other countries should never take an oath of allegiance. Hence they were unwilling to become citizens of the United States, and of course did not vote at our elections. Indeed, it was made a disciplinable offense, as certainly as Sabbath breaking, to take legal steps to acquire the right of citizenship. In respect to doctrinal views in general, I am not aware that these people differed from the Irish and Scotch Presbyterians essentially, if at all, nor was their mode of worship different.

"The first congregation in the school-house referred to did not exceed twenty, but gradually, as the new-comers arrived from the old country the members increased till it became necessary to find a place specially suited to their wants. Being a very plain and rather obscure people, they sought a retired spot for the location of their first house of worship. This was a small avenue called Mary Street, running from Sixth to Seventh, between Cedar and Lombard. The building erected by them was very small and exceedingly plain, yet withal commodious enough. There the Covenanters continued for several years, until they found the place too small, and the neighborhood becoming each day more repulsive by the bad quality of the occupants. It is probable, too, that the society contained some persons who had become literally well off in point of worldly goods, and could not brook the idea of worshiping longer in an undesirable place. The property was therefore abandoned, and fell into the hands of a colored Presbyterian Church."

In the year 1800 the First Presbyterian Church, built upon the site of the "old Buttonwood," on the south side of Market Street, between Second and Third, and at the southeast corner of White Horse Alley, afterward called Bank Street, was under the charge of Dr. John Ewing, who at this period was well stricken in years, he having attained nearly the allotted period of threescore and ten. He died on the 8th of September, 1802, in his seventy-first year. Rev. John Blair Linn had become assistant to Dr. Ewing on the 13th of June, 1799, so that the decease of the pastor did not embarrass the service of the church. Mr. Linn was a native of Shippensburg, Pa., where he was

born on the 13th of March, 1777. He studied at Columbia College, New York, where he graduated in 1795. He was destined for the profession of the law, and was a student in the office of the celebrated Alexander Hamilton, during which time, having poetic aspirations, he wrote a play called "Bourville Castle; or, The Gallic Orphan," acted in New York City in 1797, which was not successful. Subsequently he turned his attention to theology, and, after a due course of study, was ordained in 1798. During his occupancy of the pulpit of the First Presbyterian Church he published his poem on the "Death of Washington," which was written in the style of Ossian, and was published in 1800. In the same year he published, anonymously, two volumes of "Miscellanies," in prose and verse. The "Powers of Genius" was published in 1801, and was republished in England. "Valerian," a narrative poem, intended to describe the early persecutions of the Christians, and to illustrate the influence of Christianity, was written while Dr. Linn was at the First Church, but was not published until after his death. His funeral sermon on Dr. Ewing was also published after his death. While engaged in the ministry, he undertook a controversy with the celebrated Dr. Priestley, and wrote two tracts, which were published in 1802. In the year last named Dr. Linn was seized with a fever, which undermined his constitution and led to mental depression. In 1804, after having returned from a journey through the Eastern States for the benefit of his health, he died of a hemorrhage, on the 30th of August. Dr. Linn was the last Presbyterian minister who wore a pulpit-gown in the First Church.

For two years the First Church was without a settled pastor. In 1806, Rev. James Patriot Wilson was elected pastor. He was a native of Lewes, Del., where he was born on the 21st of February, 1769, and was the son of Dr. Matthew Wilson of the Presbyterian Church. He was educated at the University of Pennsylvania, where he graduated in 1788. After he left college he was for some time surveyor-general of the State of Delaware. He turned his attention to the study of the law, and was admitted to the bar in the year 1790. He became a successful and distinguished lawyer, and practiced for about twelve years, when he directed his mind to theology, studied for the ministry, and was ordained. The reasons for his doing so were the unexpected death of his wife and the assassination of his brother before his eyes. In 1804 he was chosen pastor of the united congregation of Lewes, Cool Spring, and Indian River, Del., which he served for two years. In 1806 the First Church elected him pastor, and he was installed on the 19th of June of that year. He continued in the service of the church until the spring of 1830, having maintained the ministry with acceptation. "He was of tall and lank figure, and pallid from the habit of bloodletting. . . . For some years before his death his infirmities compelled him to preach sitting on a high chair in the pulpit."

During this period Dr. Wilson wrote and published "Lectures upon some of the Parables and Passages of the New Testament," in 1810. He edited the sermons of Dr. John Ewing, and wrote a biography of that clergyman, which was published in 1812. He annotated "Ridgley's Body of Divinity" in 1814. He published an "Easy Introduction to Hebrew," 1812, and an "Essay on Grammar" in 1817.

The First Presbyterian Church building, in Market Street, at the time it was finished was considered the handsomest religious edifice in the city. It was also eligibly situated. But the movement westward increased greatly in the early part of the century, and the Market Street Church became entirely surrounded with stores and places of business. In addition there was imposed on the congregation, after some years, the necessity of expensive repairs. The showy portico on Market Street was supported by wooden pillars and exposed to decay, and fifteen thousand dollars was thought necessary to place the building in a tenable condition. A large number of the congregation thought it would be a waste to expend this amount upon the church edifice, and recommended that the lot be sold and a new church be erected at some other place. This point was not carried without controversy. A pamphlet, published in 1819, stated that all the pews were occupied, except a few parts of those which were most distant in the gallery. It was said that there were seventy applications for pews standing on the church-books, the parties waiting to obtain the pews they desired. The last letting of a pew before the pamphlet was issued was to an applicant of fourteen years' standing, and there were others remaining from eight to twelve years' standing. These statements were adduced in argument to show that there was no necessity for removing the church, and that it was in a state of prosperity.

The arguments in favor of a change were at length successful. On the 1st of May, 1820, the congregation held a meeting, and by a vote of seventy-five to thirty-four ordered the trustees to purchase the lot at Seventh and Locust Streets. It was conveyed by Elizabeth D. Pritchett and James Paul (executor of Thomas Pritchett), by deed of May 15, 1820, subject to a consideration of twenty thousand dollars, secured by mortgage, the lot being ninety-nine feet on Locust Street and one hundred and fifty feet eight inches on Seventh to a four-feet wide alley.[1]

The house was so far finished in July, 1821, that the congregation was enabled to assemble in the "prayer-room." The old congregation took the ma-

[1] The lot was a yard for the sale of cattle, etc., and at that time had a large stream of water running through it and over the street into Washington Square. The columns of the new church were sanded in the lot on which was afterward built by Langdon Cheves, of Charleston, S. C., the house subsequently occupied by Evans Rogers, southwest corner of Seventh [Washington Square] and Locust Streets.

jority of the pews, and the vacant pews were disposed of on the 12th of November of that year. The new church building was the largest and finest yet erected in the city. The architecture was of the Grecian order, and the model was an Ionic temple on the river Ilyssus, in Greece. The portico, supported by pillars, was seventy-five feet in width, and was very lofty. The extreme length of the church, including the portico, was one hundred and forty feet. A basement intended for the use of the Sunday-schools, and for many years employed in that service, was in the first story, and the pastor's study was upon the same floor. The main body of the church was in the second story, the approach to which was by steps at the sides leading up to the floor of the porticoes. Here large doors opened into a vestibule, which was seventy-one feet long and thirty-two feet deep, extending along the front of the building, apartments being taken off at each side. Over this was the prayer- or session-room, seventy-one by thirty-two feet, which contained a fine organ. The main audience-room of the church was eighty-five feet long and seventy-one feet wide, and would seat thirteen hundred persons. Wide staircases, with heavy carved balustrades, led to the galleries, which extended around the north, east, and west sides of the church. The pulpit was large and roomy, and stood at the south end of the church. A large organ was placed in the second story for the use of the congregation, and the acoustic qualities of the church were always considered most excellent.

In 1800 the Second Presbyterian Church, northwest corner of Third and Arch Streets, was under the pastoral charge of Rev. Ashbel Green and Rev. Jacob J. Janeway. In 1802, on account of the yellow fever, Mr. Green left the city on the 4th of August. There was some intermission of the services of the church. During the interval he preached at Princeton, Hanover, and Hackettstown, N. J. Finally Mr. Green and family went to Mr. Ralston's place, near Princeton. Mr. Green returned in November, and thenceforth preached regularly at the Second Church. Mrs. Green died on the 15th of January, 1807. After this Mr. Green suffered very much from impaired health and from depression of spirits, but continued his labors without interruption. In 1812 he was made president of the College of New Jersey. He removed to Princeton, where he remained until 1822, when he returned to Philadelphia. After Mr. Green's removal, Dr. Janeway remained as principal pastor of the church. As a preacher he was "didactic and methodical, avoiding the flowery paths of rhetoric. On all public occasions he acquitted himself creditably. His figure was portly and his countenance benevolent. He was singularly self-poised and unimpassioned." [Davidson]. Rev. Thomas H. Skinner, then a young man, was appointed assistant to Dr. Janeway. He was born in North Carolina in 1791, graduated at Princeton College, and was licensed to preach in 1812. His first charge was at the Second Church, where he remained until 1816. His withdrawal was caused by differences between himself and Dr. Janeway on controversial points. Mr. Skinner espoused the views which became known as those of the "New School" side, and Dr. Janeway was decidedly in favor of the "Old School." The preaching of pastors holding dissimilar views divided the congregation, and caused the creation of parties. The dissensions led to such bitterness that, in 1816, Mr. Skinner, with some fifty followers, withdrew from the Second Church, and formed the Fifth Church.

In 1809, the congregation requiring more room for worship than the dimensions of the old church afforded, considerable alterations were made. The upper part of the steeple had previously been torn down, leaving the tower. This was now demolished, and the extra space thus gained was thrown into the body of the church, additional walls being built on Arch Street. The length of the building was ninety feet. The pulpit, which had been on the north side of the church, was removed to the western end, and the pews were changed so as to face the pulpit. The old brass chandelier was removed, and an imported glass one was put in its stead. The sides of the church were still lighted by candles placed in sconces, which hung around the walls. During the alterations the congregation worshiped at the Tabernacle Church, in Ranstead's Court, running west from Fourth Street, above Chestnut. Mr. D. L. Peck conducted the singing portion of the services in this church in 1814.

On the 22d of October, 1812, Elias Boudinot presented to the congregation four brick houses and lots, at the northeast corner of Ninth and Cherry Streets, in trust, to allow Mr. Boudinot and his daughter, Susan V. Bradford, to use, improve, and enjoy the said premises during their lives; after their death, for the use and benefit of "poor widows and children who may be unable to provide for themselves, in such way and manner as shall be most beneficial, in the opinion of the said trustees, to the charitable design intended," with power to sell and convey the property as to them may deem meet. Mrs. Susan V. Bradford did not die until 1854; but long before that time the property was used for the purposes intended, being called "The Widows' Asylum," and being managed by trustees.

A correspondent in the *Philadelphia Sunday Dispatch*, speaking of the old church, says,—

"In its day it was one of the most important parishes of our city. Some of the most distinguished men of our city and country worshiped within its walls. The immortal Washington, when he resided here, and when our city was the seat of government, had a pew appropriated to him by the trustees of the church, and it was named the 'President's pew.' Dr. Ashbel Green was then the pastor, and Washington was a great admirer of his preaching. I have often heard my father say, for he was a member of the church at that time, that the pew was in the north aisle of the church. When the benediction was pronounced, and the congregation was about leaving on that side of the building, all would remain standing until the President passed out. When he walked down the aisle he would acknowledge the compliment by gracefully

looking from one side to another with a pleasant smile of the countenance. The old glass chandelier that he admired, and which is called 'the Washington chandelier,' is still in possession of the church at Walnut and Twenty-first Streets. The church at that time was lighted by heavy glass chandeliers and spermaceti candles. The venerable George Washington Musgrave . . . received his first religious impressions in that church, as well as many other gentlemen. The late Rev. John L. Grant was also a member, and afterward studied for the ministry under Dr. Janeway. The venerable Abraham Martin, at one time cashier in the custom-house, was superintendent of the Sunday-school. . . . After Dr. Janeway left the congregation became dissatisfied and quarreled among themselves, which led to a separation. Finally the building was sold, and in 1837–38 was demolished. The congregation —what was left of it—built a church on Seventh Street, and that also proved a failure."

Dr. Janeway remained in charge of the congregation, having no assistant. He was a good man, and a plain, practical preacher. There was a large congregation, and there always was a good attendance. His audience embraced some of the most respectable and influential gentlemen of our city. In 1828 he was elected to a professorship in the college at Pittsburgh, which he accepted. He was succeeded in the pastorate of the church by the Rev. Joseph Sanford, who came from Brooklyn. He entered on his duties in February, 1829; but the pastorship was not very pleasant to him. With some of his congregation fault-finding was constant, so much so that his constitution could not stand it, and he died at his residence in Arch Street, below Sixth, on Christmas night, Dec. 25, 1831, aged thirty-four years. His friends left the church and built the "Central," at Eighth and Cherry Streets. His opponents remained at the church, and in the fall of 1833, called the Rev. Cornelius C. Cuyler, D.D., of Poughkeepsie, N. Y., to become their pastor; but the church not improving under his ministry, and being far down town, the old congregation decided to build a new church on Seventh Street, below Arch. Many preferred the lot that was then vacant at the northeast corner of Thirteenth and Arch Streets, but there was a "hue and cry" raised on account of its being too far west. After much difficulty the congregation purchased the old house and ground on Seventh Street from the heirs of the late John Wagner, and commenced the building of the church. Ground had hardly been broken before the mistake was discovered that they had made a bad selection; but it was too late to be remedied. The church and ground in 1836 and 1837 cost about sixty thousand dollars. In its day the old church was considered one of our most influential churches, embracing among its members such men as Peter S. Du Ponceau, Charles Chauncy, Josiah Randall, Alexander Henry, Robert Ralston, Matthew L. Bevan, Samuel Hazard, John Stille, Andrew Bayard, Isaac Snowden, Charles Holland, Thomas Latimer, John Maybin, Samuel Richards, Charles Macalester, Sr., John W. Perit, John V. Cowell, Robert Taylor, Judge Ferguson, James Moore, Thomas Hart, John V. Hart, Elisha Kane, William Bell, John Harnard, Robert Murphy, Matthew Newkirk, and Thomas Leiper, whose names are well known in the history of the city.

The corner-stone of the new Second Presbyterian Church, on Seventh Street below Arch, was laid in September, 1836, and the church was opened for service in July, 1837. Dr. Cuyler, the pastor, preached in the morning, Dr. Ashbel Green in the afternoon, and Dr. Janeway in the evening. Dr. Cuyler continued pastor of the church until the spring of 1850, when he tendered his resignation, which was accepted. Dr. Cuyler was brought up and educated for mercantile pursuits, but left that profession and studied for the ministry of the Dutch Reformed Church, and afterward joined the Presbyterian Church, when he received a call to the Second Presbyterian Church of Philadelphia, in 1833. Few men stood higher in the church than he, and it was much to be regretted that his declining years were rendered so unhappy. He died of a carbuncle, in great agony, August 31, 1850, and the funeral services were held in the church. He was succeeded by the Rev. Charles W. Shields, who resigned in the summer of 1865. He was succeeded by the Rev. E. R. Beadle, D.D. Not being successful, the church was soon vacated, and altered to a place for dramatic and Ethiopian performances. Negro minstrelsy did not flourish on Seventh Street, and the building in July, 1881, gave way to business purposes. The old Second Presbyterian Church then erected a new building at the southeast corner of Twenty-first and Walnut Streets.

In the diary of Rev. Ashbel Green, pastor of the Second Church, he refers to the establishment of what was called the New Church at Campington, in the Northern Liberties. The congregation had been instituted before the Revolution. It was dispersed during the war, but was revived afterward, through the exertions of Ashbel Green and Dr. Sproat, they agreeing between themselves that Dr. Sproat should preach in the Northern Liberties on Sunday morning and in the city in the afternoon, while Mr. Green would preach in the city on Sunday morning and evening, and in the Northern Liberties on Wednesdays. Success not attending the effort, it was relinquished after six months' trial. About 1804 another attempt was made to revive this church, and Sunday, April 7, 1805, the church was opened for public worship.[1]

[1] Mr. Isaac Snowden, in a manuscript journal quoted by Rev. T. J. Shepherd, in "The Days that are Past," describes the opening of this house for worship. He says, "The service of the consecration or solemn dedication of the new church in Campington began with a short introductory prayer for a blessing by Dr. Green. Then Mr. Bradford read 2 Chronicles vi., and gave out a hymn. Mr. Janeway prayed and gave out the one hundred and twenty-second Psalm. Dr. Green preached from 2 Chronicles vi. 40–41: 'Now, my God, let, I beseech Thee, Thine eyes be open, and let Thine ears be attentive unto the prayer that is made in this place. Now, therefore, arise, O Lord God, into Thy resting place, Thou, and the ark of Thy strength; let Thy priests, O Lord God, be clothed with salvation, and let Thy saints rejoice in goodness.' In the evening Mr. Janeway preached from 1 Kings viii. 27: 'But will God indeed dwell on the earth? Behold, the heaven and the heaven of heavens cannot contain Thee; how much less this house that I have builded!' The church was exceedingly crowded both morning and evening."

For the encouragement of the congregation, and for the accommodation of this church, William Coates, of the Northern Liberties, made a gift of a lot of ground at the northwest corner of Second and Coates Streets, with a front on Second Street of seventy-three feet six inches, and two hundred and nine feet on Coates Street, extending to St. John Street. The church building was of brick, of plain but substantial character, and "of comely proportions and modest ornament," says Dr. Green. The house was sixty feet front by eight feet in depth. The building was a great improvement to the neighborhood, and had considerable influence in advancing the value of property in the district, and in increasing the number of buildings. For years the religious wants of the church at Campington were attended to by Rev. Dr. Green, by his colleague, Rev. J. J. Janeway, and after Dr. Green left the Second Church, by Rev. Thomas H. Skinner, while he was connected with that church, and sometimes by Joseph Eastburn, familiarly known as "Father Eastburn." This arrangement was uncertain and not always satisfactory, and the congregation was ambitious for some more permanent arrangement. As long as the Campington Church was a portion of the Second Church, the members were obliged to defer to the wishes of the older congregation. But the idea of separation gradually strengthened, and at length an amicable conclusion was reached.

On the 20th of April, 1813, the Presbytery of Philadelphia authorized the church at Campington to separate from the Second Church, and constituted the persons who withdrew the First Presbyterian Church in the Northern Liberties.[1] In the succeeding month Samuel Macferran, Joseph Abbott, John Gourley, and Thomas White, with two others who declined to serve, were elected elders, and were ordained on the 23d of the same month by Dr. Janeway, of the Second Church. During the summer Messrs. Richard Crake, Horace Galpin, and James Patterson preached for the congregation; and on the 27th of September, of the same year, the Rev. James Patterson was called to the pastorate, and was installed on the 11th of January, 1814. Fifty communicants of the Second Church, but worshiping at Second and Coates Streets, formed the new congregation. A charter under the laws of the commonwealth for the First Presbyterian Church in the Northern Liberties was obtained Jan. 6, 1814. On the 12th of January—the day after Mr. Patterson's installation—the church was formally organized. Mr. Patterson was born at Ervina, Bucks Co., Pa., on the 17th of March, 1779, and was removed by his parents to Upper Strasburg, Franklin Co. He was brought up on a farm, and intended to lead the life of a husbandman. But a violent cold, which he contracted when sixteen years of age, disqualified him for laborious pursuits, and drove him to the necessity of obtaining a classical education, in order to earn means of future support. He entered an academy at Shippensburg, and afterward completed his course at Jefferson College. He then went to Princeton, N. J., to pursue his theological studies under the direction of the Rev. Drs. Smith and Kollock, of Princeton College. In 1806 he was appointed tutor in that institution, and held the office two years. In 1808 he was licensed to preach by the Presbytery of New Brunswick, and became pastor of the church at Bound Brook, N. J. At the First Church, in the Northern Liberties, Mr. Patterson remained until the time of his death, Nov. 17, 1837.

A society was organized in the spring of 1815, under the title of the "Union Sabbath-School Association of the Northern Liberties." It was one of the first organizations of the kind in Philadelphia, and it led to the establishment of others in various parts of the city. It opened with one hundred pupils, and in a few weeks many more were added. Beside the school in Coates Street, adjoining the church, the Union Sabbath Association opened the Spring Garden school, at the corner of Eighth and Buttonwood Streets, in 1817; Cohocksink school, "a mile and a half out of town," about the same time; Kensington school, Frankford road above Otter Street, also about 1817. A school for colored pupils, on Coates Street above Fourth, was also opened about the same time. Mr. Patterson established prayer-meetings shortly after he assumed the pastorship. On these occasions the members of the church would take part, and were led to exhortation and speaking. This method of "lay preaching," as it was called, caused considerable feeling among Presbyterians of other churches, and was denounced as "a trespass upon the rights of the clergy, and an unwarrantable liberty with functions appertaining to the ministry, or at most to the eldership." Mr. Patterson was sustained in this innovation by Rev. James P. Wilson and Rev. Thomas H. Skinner, and perhaps by one or two others, but the body of the clergy and some of the laity were against him. In 1816 a revival took place at Mr. Patterson's church, the result of which was the admission of seventy persons to the congregation. These were mostly young persons, between the ages of thirteen and twenty years. Only four of them were above the age of thirty years. Adjoining the church upon Coates Street, a building for the pur-

[1] The following were the members of the Second Church who were dismissed to form the First Presbyterian Church in the Northern Liberties: Samuel Macferran, Joseph Abbott, John Gourley, Thomas White, Peter Benner, Sarah Henderson, Susannah Lutz, William White, Sarah Crawford, Margaret Patterson, Margaret Wallace, Elizabeth Forsyth, Elizabeth Wallheimer, Joseph Grice, Mary Grice, Margaret Nagle, Ann Ford, Mary Rice, Susannah Ziegler, Elizabeth Ziegler, Catharine Dempsey, Catharine Hartman, Susannah Pollock, Lucretia Fry, Martha Craige, Sarah Fenton, Mary Green, Mary Macferran, Nancy White, Susannah McClurg, Rebecca Wilson, Jane White, Jane Campbell, Sr., Jane Campbell, Jr., Joshua Burley, Rebecca Burley, Mary Smith, Amy Free, Elizabeth Jones, Margaret Crawford, Mary Phile, John M. Hood, Francis Grice, Benjamin Wells, Elizabeth Sager, Mary Wells, William Wallace, Andrew Manderson, Elizabeth Manderson, Elizabeth Abbott, and Elizabeth Gourley.

poses of a lecture-room, and for accommodating the Sunday-schools, was erected in 1816. It was thirty-two feet front by fifty-two feet deep, and was three stories high. It was built upon a joint-stock capital, and cost over six thousand dollars. In after-years it was sold, and was altered into a theatre, being known as the Coates Street Theatre. The congregation undertook this expensive work in the hope that means would be found to discharge the debt and supply a revenue meanwhile to the stockholders, but the result was embarrassing, and for many years the church struggled under the load of this debt. Some of the stockholders were dissatisfied, and to quiet them the church assumed their claims, and borrowed money on mortgage to meet the obligations. It was a source of anxiety and mortification for a long time. The elders of this church between 1800 and 1825 were as follows: Samuel Macferran, Joseph Abbott, John Gourley, Thomas White, Francis Markoe, Charles Anderson, William A. Stokes, Samuel S. Barry, Robert Wallace, Isaac Will, and Robert Sawyer.

When the Rev. Mr. Patterson was installed, in 1814, the only means of warming the church was by ten-plate wood-burning stoves. In 1816 pyramid stoves were introduced, but wood was the only fuel used. In 1819 the first experiment of the burning of coal was made, but the use of the material was confined to the session-room. The church was dependent on the use of wood for heating purposes for several years afterward. Under the pastorship of the clergymen of the Second Church there was no necessity for finding means to light the church, as services were not held in the evenings. But after Mr. Patterson came to the pulpit there was a change in this matter. In 1816, during the revival, the necessity of holding meetings in the evenings was apparent, and to provide for it the trustees bought ten brass branch candlesticks and a box of mould candles. The latter required frequent snuffing, and it was the duty of the sexton to go around on tiptoe and attend to that duty frequently during the course of an evening's sermon. An attempt to introduce oil in lamps was made in 1818, but candles partially held their own against the intruders for some years afterward. The board of trustees of this church were fifteen in number, and were divided into three classes to serve for one, two, and three years respectively. Between the years 1813 and 1825 the following gentlemen were presidents of the boards of trustees: Joseph Grice, John M. Hood, John Shaw, Robert Brooke, Francis Markoe, Charles Elliott, William Porter, and Adam H. Hinkel. The following were members of the board of trustees during the same time: John Gourley, Robert Wallace, Joseph Abbott, Andrew Manderson, Joseph Weatherby, Branch Green, William White, John Baker, Samuel Macferran, George Benner, Benjamin Naglee, Samuel Grice, John Naglee, John Brown, Rees Morris, Thomas White, Andrew Wray, Charles Dingey, William A. Stokes, Samuel S. Barry, Joseph Pond, Isaac Will, Charles Anderson, William Simons, John Doughty, Cyrus Danforth, William Bruner, Leonard Jewell, William Heiss, J. George Flegel, George Shade, John Dickerson, Henry Close, John Hocker, George Cragg, Jacob W. Smith, Hugh S. Magee, John Keim, E. N. Bridges, Joseph Ketler, and George Wilson.

The death of Rev. John Blair Smith, by yellow fever, in 1799, left the Third Presbyterian Church, at Fourth and Pine Streets, for some months without a pastor. He was succeeded in the following year by Rev. Philip Milledoler. He was a native of Farmington, Conn., where he was born on the 22d of September, 1775. His parents were Swiss, and were possessed of sufficient means to secure him a good education. He studied at Edinburgh, won reputation as a scholar, and was noted for his proficiency in the science of chemistry, particularly in its application to the pursuits of life. While in Scotland he won a prize of fifty sovereigns offered by the Highland Agricultural Society for the best essay on oats. On his return to America he was licensed to preach in the German Reformed Church, and from 1795 to 1800 was pastor of the Reformed Church in the city of New York. Called by the Third Church, he came to the pulpit with a reputation already established, and to a congregation disposed to regard him with favor. The members were now growing richer. They had given Mr. Smith three hundred pounds a year. Mr. Milledoler's salary was fixed at five hundred and fifty pounds.

In 1805, Mr. Milledoler was called to New York, where he became pastor of the Presbyterian Church in Rutgers Street. He afterward became president of Rutgers College. He died at Staten Island Sept. 22, 1852.

Rev. Archibald Alexander was called to the Third Church in 1806. He was a native of Virginia, born near Lexington on the 17th of April, 1772. He studied theology, under Rev. Mr. Graham, at Liberty Hall, afterward Washington College. He was licensed to preach when nineteen years old, and was ordained, becoming pastor of Briery Church, Va., in November, 1794. He received a call from the Third Church of Philadelphia in the same year, but declined it, assigning as a reason that he did not possess the necessary ability to discharge the duties in such a place. Mr. Alexander was installed May 20, 1807, and remained in the service of the Third Church until 1812, having been elected professor in the theological seminary at Princeton in the previous year. His services thenceforth were devoted to that institution. He died Oct. 22, 1851. The call to Rev. Archibald Alexander was dated Oct. 20, 1806; salary, sixteen hundred dollars per annum. The church session and trustees which united in this call were composed of Samuel Duffield, George Latimer, Ferguson McIlwain, William Linnard, Robert McMullin, Jacob Mitchell, Conrad Hance, John McMullin, William

Smiley, James Stuart, Paul Cox, William Hazlitt, and James McGlathery, trustees, six of whom were members of the session. The pulpit supplies after Mr. Alexander's resignation were Rev. James K. Burch, Rev. Ezra Stiles Ely, and others.

Rev. Ezra Stiles Ely succeeded Mr. Alexander after the pulpit had been vacant two years. He was born at Lebanon, Conn., June 13, 1786, and was the son of Zebulon Ely, a minister. He studied at Yale College, graduated in 1804, and became pastor of the Presbyterian Church at Colchester, Conn., in October, 1806. He afterward went to New York, where he was city missionary. He published his diary of experiences in that work under the title of "Ely's First Journal," which, in 1813, was printed in London under the title of "Visits of Mercy." His second journal was published in 1815. He continued in missionary duties at New York until the 1st of July, 1813, principally in the almshouse and hospital, when he resigned to meet the call made by the Third Church. This call created a great disturbance in the congregation, which delayed Mr. Ely's assumption of the duties of pastor for some months. In favor of the call of Ely were three of the seven elders, and a large majority of the members of the congregation. Opposed to him were four of the elders.

The controversy continued for about a year, and was finally settled by a compromise. The four elders who were opposed to Ely, with a small number of the members, were allowed to withdraw and form a new congregation, which subsequently was known as the Sixth Church. The Third Church transferred to them a lot on Lombard Street, worth about ten thousand dollars, twelve thousand dollars in cash, and two hundred and fifty dollars in communion-plate. These difficulties prevented Mr. Ely's installation until Sept. 7, 1814. After the malcontents withdrew, the ministry of Dr. Ely was peaceful, and no event had occurred up to 1825 to mar the good feeling between the congregation and the pastor.

In 1810 the number of pews was one hundred and sixty-two, and the annual income was estimated at $1781.44.

Prayer-meetings were held in the session-room on Green's Court, opposite the church. The meetings were conducted almost entirely by the elders, who read and explained the Scriptures. Sabbath-schools were held in the session-room, the teachers being members of the congregation.

Rev. Lebrecht Frederic Herman was pastor of the German Reformed Church at Germantown and of the German Reformed Church at Frankford in the year 1800, continuing in that relation until 1802. He was succeeded at Germantown and also at Frankford by Rev. John William Runkle, who commenced his ministrations on the 1st of March, 1802. He preached in the Frankford German Reformed Church until 1809, when the congregation ceased to be connected with that denomination. The Frankford German Reformed Church was very weak at the period alluded to, and was struggling for existence. In 1802 assistance was called for from the Presbyterians, and on the 2d of October of that year it was represented to the Presbytery of Philadelphia that "there are many people in the town of Frankford who are destitute of the privilege of the gospel, and who are desirous of receiving it from the ministers of this Presbytery." Messrs. Boyd, Milledoler, Linn, Potts, and Janeway were appointed, "each to preach two Sabbaths before the next meeting of the Presbytery." They did so, but under the expectation of forming a separate Presbyterian congregation. The German Reformed congregation kept possession of the old building, struggling to preserve its organization; but, not being able to maintain worship regularly, it rented the church-building to an association called the Church Company, reserving the right of the Reformed congregation to meet there once a month. The Church Company rented the house to Baptists as well as to Presbyterians. Benches were used until 1807, when pews were introduced. On the 18th of April, of the same year, the congregation resolved to secede from the German Reformed Church. George Castor was deputed to solicit a supply of ministers. On the 8th of December, 1807, the Presbytery met in the Frankford Church, Messrs. Tennent, Green, Alexander, Janeway, Latta, and Potts being present. A petition was received from the German Reformed congregation of Frankford, composed of about thirty families, asking that it be taken under the care of the Presbytery. This request was complied with, and the German Reformed Church of Frankford became the Presbyterian Church of Frankford. In 1808 it was chartered.

Notwithstanding the fact that the church became Presbyterian, John William Runkle was the principal supply of the church for two or three years afterward,—visits being occasionally made by ministers from Philadelphia. Rev. Thomas Murphy, in "One Hundred Years of the Presbyterian Church of Frankford," says that between 1807 and 1809, in addition to Mr. Runkle, preaching was performed at the Frankford church by Revs. William M. Tennent, Jones, Nathaniel Snowden, William Latta, Jacob L. Janeway, Clarkson, George C. Potts, Ervin, Archibald Alexander, James P. Wilson, Blair, Finley, Helfenstein, Edwards, Larzalier, Boyd, and Father Eastburn.

On the 18th of June, 1809, John W. Doak was installed as the regular pastor of the Frankford Church, and closed his connection with the church on the 1st of September, 1816. Rev. John Whitefield Doak was a son of Rev. Samuel Doak, of East Tennessee. He was born in 1788, and was educated by his father. He was licensed to preach by Abington Presbytery in 1807, and was ordained pastor of New Dublin and Wytheville Churches in Virginia, and subsequently of Mount Bethel and Providence Churches in Ten-

nessee. His health failing to such an extent that he could not safely perform the clerical office, he studied medicine after leaving the pulpit, and returned to Tennessee, where he practiced as a physician, sometimes preaching at Salem and Leesburg Churches. He died in 1820.

For two years after 1816 there was no regular pastor, and during that time the pulpit was supplied by Revs. Nathaniel Snowden, Rogers, Jacob L. Janeway, Thomas H. Skinner, William Neill, Bellville, Janvier, Latta, Dunlap, Lambert, Foot, and others. On the 10th of November, 1818, Rev. Thomas Biggs was installed pastor. Mr. Biggs was born in Philadelphia, Nov. 29, 1787, became a member of the Third (old Pine Street) Church in 1807, studied theology, and graduated at Princeton College in 1815. He was tutor there, and after having studied in the Theological Seminary at Princeton, he was ordained to the pastorship of the Frankford Church, where he remained until 1831. He was subsequently a professor in Lane Theological Seminary, Cincinnati, president of Cincinnati College for six years, president of Woodward College three years, and pastor of the Fifth Presbyterian Church of the same city for four years. He retired from active service in 1856, and died in 1864.

In 1809 the enlargement of the church edifice was determined upon, and contributions were solicited. The subscriptions were many. Although the individual amounts were small, they were sufficient to justify an addition of forty feet in 1810. The building committee was composed of George Castor, Joseph Dearman, and John H. Worrell. The carpenter was Henry Retzer; mason, Jacob Deal. The first Sunday-school was commenced in the spring of 1815, by Mrs. Martha Dungan and Mrs. Patterson, with a class of seven girls. Strange to say, according to the account of Rev. Thomas Murphy, there was opposition to this Sunday-school because it was free,—parents objecting to it because they could afford to *pay* for their children's education! The boys' Sunday-school was begun in 1818, the first teachers being William Gibson, William Nassau, and John Deal. The opposition to the Sunday-school might have been founded on the fact that the church had a pay-school, having bought the old Frankford Academy.

The elders during the period of the German Reformed Church were Jacob Grandsback, Rudolph Neff, Conrad Axe, George Castor, Philip Buckius, and Caleb Earl. The Presbyterian elders were: 1810, Robert Smith, Samuel W. Doak, and Jacob Myers; 1812, Edward Gilfillen, M.D., William Nassau, and Capt. Jacob Peterson; 1820, Roderick Adams. The trustees of the German Reformed Church before 1809 were George Castor, Philip Buckius, Stephen Decatur, Benjamin Fisher, Jacob Myers, Jacob Mower, John H. Worrell, Thomas Horton, Frederick Teese, John Buckius, George C. Troutman, Henry Retzer, Jacob Harper, and Ezra Bowen. The trustees of the Presbyterian Church of 1809 and after were George Wilson, Edward McVaugh, Adam Baker, Jacob Peterson, Edward Gilfillen, M.D., Jacob Deal, Dr. William Hurst, Lewis Wernwag, Peter Brous, George Haines, Henry Rohrer, Conrad Baker, Robert Worrell, Hugh McKinley, Henry Castor, Danfrith Woolworth, Daniel Thomas, Jacob Myers, Abraham Tenbrook, John R. Neff, Benjamin A. Prentiss, Joseph Pierson, Capt. William Hess, Joseph Wigfall, Jacob Coats, Peter Buckius, Gardner Fulton, James Tatham, John G. Teese, and some others. Joseph R. Dickinson was leader of the music in 1809; Samuel White, 1810; John G. Teese, 1811–18; Jesse G. Castor, who founded the Harmonic Society in the church, 1818–21; James Seddins, 1821–27.

The origin of the First African Presbyterian Church is attributed to the efforts of the Evangelical Society of Philadelphia, an institution founded through the efforts of Rev. Archibald Alexander, in 1806, "to be comprised of all persons desirous of advancing the interests of Christianity." It was composed principally of members of the Presbyterian Churches. Dr. Alexander, who was active in the proceedings of this society, called the attention of the members to the necessity of assisting in the religious training of colored people shortly after the association went into active operation. He was aided by Rev. Ashbel Green, Dr. J. J. Janeway, Rev. George C. Potts, and others. The means which were necessary to be taken in forming a colored Presbyterian congregation in the city were discussed, and while views were entertained upon the matter, and before anything was done toward the choice of a pastor, an accidental circumstance opened the way for a successful issue.

In 1807 the Presbytery of the Union Synod of Tennessee recommended to the General Assembly, then sitting at Lexington, Ky., that John Gloucester, a slave, should be licensed to preach among colored people. In order to secure the services of this man, and to prevent the danger of his being sold by his master to some unsympathetic person, who might be disposed to interfere with his preaching, Rev. Gideon Blackburne, then of Marysville, Tenn., purchased Gloucester, and devoted his time to improving his education. Dr. Alexander and the members of the Evangelical Society, noticing the application by the Union Synod in behalf of Gloucester, opened communication with Blackburne, and induced him to come to Philadelphia, bringing Gloucester with him. A proposition was made that Mr. Gloucester should be employed in missionary work, and it was very evident that he was well fitted for such a trust. Dr. Blackburne released Mr. Gloucester from all claims which he might have upon him for service or labor, and Gloucester entered at once upon his mission by holding meetings in private houses. It was soon found that such numbers came to hear him that no place they could obtain was large enough. He therefore resolved to commence street preaching, and he

gave notice that in clear weather he would preach every Sunday morning at Seventh and Shippen Streets, and when the weather was unfavorable he would hold forth in the school-house near by. His method of operation was such that he found no difficulty in attracting a sufficient number of persons to listen to him whenever he appeared in public. While he labored faithfully, he was for some time without license. In 1810 he went to Tennessee to obtain his license, which was granted in April, and on the 30th of the same month was ordained at Baker's Creek and ordered "as soon as possible to repair to the city of Philadelphia, and directed to join the Presbytery of that city, whereby he is represented as of fair morals and upright conduct as a man, a Christian, and a minister, and is recommended to the faithful care and Christian attention of the Presbytery of Philadelphia." These testimonials were received April 16, 1811, when Rev. John Gloucester was admitted as a member. Meanwhile the movements toward the creation of the First African Church were not suspended. The street meetings held by Mr. Gloucester were so successful that in the latter part of May or the beginning of June, 1807, twenty-two persons —nine men and thirteen women—were organized as the African Presbyterian Church of Philadelphia. For some time afterward Mr. Gloucester, not being regularly licensed, was absent at certain periods, when necessary for the improvement of his education. During those times the services of the church were attended to by Drs. Alexander, Green, and Janeway, and the Rev. George C. Potts. The meetings were held for a time in Gaskill Street, and at another time in the school-house in Seventh Street, near the church. The want of a permanent place of worship became apparent, and in the summer of 1809 the congregation sent a committee to the Evangelical Society, to confer with that body upon some plan whereby a house of worship could be secured for the congregation. That association on the 31st of July adopted an address to the pious and benevolent, setting forth the necessity of the erection of this church, and the need of contributions for the purpose.

The appeal was so successful that in a short time a lot near the corner of Shippen and Seventh Streets, in front of which Mr. Gloucester had preached so often, was secured. On the 28th of June, 1810, David Shoemaker and wife conveyed to John Gloucester, on ground-rent, a lot on the east side of Seventh Street, in Moyamensing, twenty-two feet five inches on Seventh Street, and one hundred feet deep, upon which there was a school-house. In this building the services of the African Presbyterian Church were held for some time. On the 30th of August, 1810, Thomas Dixey and wife conveyed to the African Presbyterian Church three lots of ground on east side of Seventh Street, Moyamensing, twenty-four feet south of Shippen, subject to ground-rent. Together they were of the width of seventy-five feet nine inches, and seventy-eight feet deep. The corner-stone was laid by Rev. George C. Potts, and on May 31, 1811, the new and substantial brick church, erected on a portion of the lot on Shippen Street, below Seventh, was dedicated. The house was sixty feet long and thirty feet wide, very plain inside and outside, but comfortable. There were four rows of pews, numbering sixty-eight, on the floor of the house, with a gallery on three sides. Altogether there were seating accommodations for six hundred and fifty persons. The ceiling was high, and the audience-room was light and airy. Mr. Gloucester and wife conveyed to the church the school-house and lot adjoining on the 28th of February, 1816. On the 16th of October, 1811, the Presbytery of Philadelphia took the African Church under its care. Mr. Gloucester was never installed pastor, although he was in charge of the church from its foundation until his death. He remained a missionary of the Evangelical Society, and the reason may be found in the fact that, from the poverty of the members of the congregation, they were not able to support a pastor from their own means. There were about one hundred and twenty-three members about the time of the dedication of the church. The elders, during the time when Mr. Gloucester was in charge, were James Prosser, Cato Freeman, Quamany Clarkson, Jacob Craig, Peter McNeal, and Francis Webb.

Although Mr. Gloucester had received his freedom from the hands of Dr. Blackburne, it was his misfortune, during the greater portion of his services in Philadelphia, that his wife and four children were still held in slavery. Before the church-building was completed he was compelled, in order to secure their freedom, to perform a melancholy service, not infrequent in the days of bondage: He set out on a tour to collect money, in order to enable him to purchase the freedom of his family, and was successful. He traveled extensively throughout the United States for this purpose, but not being able to raise money enough, went to England, where he met with success in finishing out his task. During his absence the Presbytery appointed regular supplies for the pulpit, and they were Rev. Messrs. Neil, Ely, Patterson, Skinner, Engles, Chandler, Steel, and Wilson. After a faithful service in the ministry of Philadelphia for fifteen years, Mr. Gloucester died May 2, 1822. After he obtained the freedom of his family one of his sons, Jeremiah Gloucester, was educated for the ministry, and was duly licensed. Under the insidious progress of consumption, Mr. Gloucester found his health failing so that he could not attend to his duties. He revealed this condition of affairs to the Presbytery June 27, 1820, and brought forward, as persons capable of the ministry, Samuel Cornish and Benjamin Hughes. His son Jeremiah was recommended as a candidate April 18, 1821.

After the death of Mr. Gloucester, the church was

for some time without a stated supply. The pulpit was filled by ministers of the various Presbyterian Churches in the city. On the 1st of May, 1822, the session of the church resolved that a meeting should be held at a stated time for the purpose of electing a pastor. Dr. Janeway was moderator on the occasion of this election, which took place on the 1st of May. Upon a nomination being requested, Rev. Samuel E. Cornish was nominated, which caused some dissatisfaction. Before the difficulty was settled a second African Church was organized on March 9, 1824, by seventy-five persons, who went out from the First Church.

The disturbing element now got rid of, the call to Mr. Cornish was renewed; but he, upon being informed of the fact, replied that, "on viewing the whole train of circumstances together," he thought it to be most prudent for him to decline the acceptance of the call. A meeting of the congregation was consequently held, shortly afterward, and on the 14th of April, 1824, Benjamin Hughes, a licentiate of the Philadelphia Presbytery, was called and accepted. On the 4th of May, 1824, the entire Presbytery met in the African Church, Dr. Ashbel Green presiding, and twelve clergymen being present. Rev. Dr. Chandler preached the sermon from Jeremiah, xxvi. 15: "For of a truth the Lord hath sent me unto you to speak all these words in your ears." Dr. Green propounded the constitutional questions. Rev. Mr. Biggs gave the charge to the pastor and people. The right hand of fellowship was given to Mr. Hughes, and he took his seat as a member of the Presbytery. Mr. Hughes' services in this church were short. After six months' occupancy of the pulpit, he found that the support given him by the congregation was insufficient, and he withdrew to enter into business. His request of withdrawal was granted by the Presbytery Nov. 18, 1824. He left Philadelphia soon afterward, and went to Africa, where he died. The church was vacant for some time after Mr. Hughes' withdrawal.

The Second African congregation upon its organization was somewhat troubled by want of a place in which to hold its services. It was driven to a considerable distance beyond the habitations of the population which was to furnish it with members. In 1824 services were held in a building on the north side of Norris Alley, between Front and Second Streets, and that place was occupied by the congregation for some years. Rev. Jeremiah Gloucester being licensed, took charge of the church as soon as he was able to do so, and the name given to it by the Presbytery was the Second African Presbyterian Church of Philadelphia.

The Presbyterian Church of Germantown was usually called the English Presbyterian Church, and owed its establishment to the discontent which existed among the young members of the German Reformed and Lutheran churches of that village at the use of German in the church services. They were Americans by birth, though Germans by descent, and they were more familiar with the language of their fellow-citizens than with that of their forefathers, which, with the exception of the senior members of old German families, had fallen into disuse. It was natural that they should desire that the services of the church should be conducted in the English language. But their representations and efforts in that direction met with little sympathy from the older members. They stubbornly refused to change, and even rejected the compromise that the services should be held each Sunday alternately in German and English. The result was that the English members withdrew and formed a new congregation, which they connected with the Presbyterian Church. A lot of ground was procured on the northeast side of the Germantown main street, and the corner-stone was laid on the 10th of September, 1811, an address being delivered by the Rev. Thomas Dunn. The stone church was finished in the ensuing year, and the first regular pastor was Rev. Dr. Blair. On the 8th of June, 1819, Rev. Mr. Rooker was installed pastor of the English Presbyterian Church of Germantown. The ground on which the church was built was conveyed to the congregation by Susan Blair and Joseph Miller, Jan. 8, 1821.

The establishment of what was called the First Presbyterian Church of Kensington is to be attributed somewhat to the efforts of the Evangelical Society of Philadelphia, with a view to the planting of churches in a portion of the city which had been almost entirely neglected by all other sects. This association purchased in February, 1813, two lots of ground on the northwest side of Queen Street, between Palmer and Hanover Streets. Together they were sixty feet front and one hundred feet deep, and were bought from Joseph Norris. It is probable that this was intended to be the site of the First Presbyterian Church of Kensington; but for some reason, not now known, another lot near by was preferred. It was on the northeast side of Palmer Street, between Queen and Bedford Streets. The property on Queen Street, above specified, was held by the society until June 22, 1835, when it was transferred to the First Church of Kensington. Upon the Palmer Street lot a small building, forty by sixty feet, was erected in 1813. The church was organized under the title of the First Presbyterian Church in Kensington on the 8th of April, 1814, and a charter was obtained. To the work of this infant church the congregation chose Rev. George Chandler, then quite a young man, who was active, earnest, and useful in his ministry, and who had a large field of labor and hope. During the earlier years of his mission, with the exception of the minister of the Methodist Church, he was the only clergyman in Kensington. He officiated at nearly all the funerals, marriages, and baptisms in that district, and he was known to people of all classes and denominations.

The Cohocksink Presbyterian Church was established as a mission about 1824, in a frame building situate on Germantown road, above Camac Street. Services were performed by missionaries, and occasionally by the pastors of other churches. This first organization did not succeed, and was soon given up.

The first religious meetings held under Presbyterian auspices in Southwark, except those under the control of the Covenanters, were stimulated and assisted by the Evangelical Society of Philadelphia. Paul Beck granted to that society, for free use, a small one-story frame house of which he was the owner, situate on Passyunk road, near its junction with Sixth Street. Services were maintained regularly here for some years. Jacob Mitchell, a ruling elder of the old Pine Street Church, had a prominent agency in keeping up the worship there by procuring such preachers and exhorters as could be obtained.

The First Presbyterian Church of Southwark was established about 1824. Worship was held for a time in the Southwark Commissioners' Hall, and subsequently in the church building belonging to the Ebenezer Methodist congregation, on the east side of Second Street, between Catharine and Queen, which had been vacated by that congregation after their removal to the new Ebenezer Church, on Christian Street, between Third and Fourth. On the 10th of September, 1825, the First Church bought, at sheriff's sale, a lot of ground on the south side of German Street, between Second and Third, formerly a part of Richard Brockden's estate. It was eighteen feet front and one hundred and thirty-six feet deep, subject to an annual ground-rent of twenty-two dollars. On the same day the Catholic Church of St. Mary's conveyed to the trustees of the First Presbyterian Church of Southwark another lot on German Street, adjoining that before mentioned, and of the same size, subject to a ground-rent of twenty-two dollars, thus giving a front of thirty-six feet. The lot was subsequently increased in size by other purchases. The first pastor was Rev. Truman Osborne.

In 1816 the General Assembly of the Presbyterian Church by vote authorized the opening of a seminary in Philadelphia to educate African youth to the gospel ministry by giving them a classical and scientific education preparatory to theology. Before that time the Africans of the city had established such an institution themselves. It was called Augustine Hall, and the Rev. Nathaniel Snowden was the principal. In that school Richard Allen, son of the Rev. Richard Allen, of the African Methodist Episcopal Church, Jeremiah Gloucester, afterward pastor of the Second African Presbyterian Church, and son of the Rev. John Gloucester, William Gordon, William Thomas, and Philip Perkins were educated. It does not appear that this plan of the Presbytery was ever carried out.

After the resignation by the Rev. Archibald Alexander of the pastorship of the Third Church, the congregation for two years was without a permanent minister. Rev. James K. Burch filled the pulpit for some time, and by several members was preferred as successor to Dr. Alexander. But there were others who did not favor the selection; and, after remaining for some time, Mr. Burch withdrew from the service of the church, and a number of the congregation went with him. They met for a time in the county court-house, corner of Sixth and Chestnut Streets, and at this place, in June, 1814, Rev. Archibald Alexander preached to them. The meetings there were not frequent. Mr. Burch and his friends withdrew to the old academy on Fourth Street, below Arch, where he preached with acceptance, succeeding in forming a congregation. For the accommodation of the members a lot was purchased on the south side of Locust Street, west of Eighth, and upon that ground was erected "a queer, circular building," according to one writer; "an odd, horseshoe-shaped house," according to another, which was intended for a church edifice. The front portion of the lot was appropriated for the graveyard, and on the west side, at the southeast corner of Blackberry Alley, was erected a two-story brick house, intended for the parsonage. The corner-stone was laid in May, 1814, and the building was finished in the next year. For some time Mr. Burch's congregation was successful; but he became unpopular through various causes, so that his usefulness was gone, and he removed to some other locality. This congregation was recognized as the Fifth Presbyterian Church.

After Mr. Burch's departure the congregation might have been dissolved had it not been for the controversy between Rev. J. J. Janeway and Thomas H. Skinner, of the Second Church, on doctrinal points, the discussion of which resulted in the withdrawal of the latter and his friends. The Fifth Church already had a building and property; Skinner's party was without such accommodations. Mr. Burch being about to retire, or having already retired, negotiations were easy. A meeting was called through the newspapers, July 15, 1816, for those members of the Presbytery and Second Presbyterian Church "who are of opinion that a separation under existing circumstances is expedient." The next day an advertisement was published, stating that the notice of the previous day was unauthorized. It was a manifestation of what was about to take place. Mr. Skinner with about fifty members of the Second Church withdrew, and, it is believed, found themselves ready to go at once into the building of the Fifth Church, on Locust Street. During the controversies between Skinner and Janeway, Mr. Burch took sides with Skinner, and, according to understanding at the time, he made an offer to vacate the pulpit of the Fifth Church, and transfer the organization and property to Skinner's party. The transfer was effected, and Skinner's party, united with Burch's congregatic [illegible] Fifth Church. They re-

mained in Locust Street for four or five years; but the situation was not considered a pleasant one, the surroundings being objectionable, and a large number of members of the congregation who had belonged to the church at Third and Arch Streets lived in the upper part of the city, and they complained of a location which at that time was so far down town. A desire to gratify appearances also had something to do with the determination to seek another location. The church burying-ground and parsonage on Locust Street was sold to the Musical Fund Society, which took down the circular church building, removed the bodies from the graveyard, and erected thereon the elegant Musical Fund Hall, which, so far as adaptability to the purposes intended is concerned, has never been exceeded.

On the 23d of March, 1822, Elizabeth M. Schell granted to William Montgomery, Thomas Fitch, and Thomas B. Fitch, a lot of ground on the south side of Arch Street, eighty-four feet three inches westward of Tenth Street, which was fifty feet front and one hundred and fifty feet deep, subject to ground-rent. A lot adjoining, of the same dimensions, was bought of William Stolland and wife on April 6th of the same year. The whole lot was one hundred feet front, and Montgomery, Fitch, and Darrach executed a declaration of trust, reciting that they held ninety feet of the breadth of the lot, "for the purpose of erecting thereon a Presbyterian Church for the use of subscribers to articles of association, dated Jan. 22, 1822." Ten feet adjoining were reserved for the purposes of a burial-place. A church-building was commenced on this lot without delay. The corner-stone was laid on the 18th of May, 1822. Prayer was offered by Rev. Dr. Romeyn, and an address was made by Rev. Mr. Lansing. The house was of brick, the style was rather more showy than was usual in church-building at that time, and the edifice was made very conspicuous by the construction of a wooden steeple, handsomely proportioned and ornamented, which was one hundred and sixty-five feet high. Before the building was finished the congregation was compelled to remove from Locust and Eighth Streets, in order to allow the Musical Fund Society to improve the property. The place chosen for service, in the meanwhile, was in Wagner's Alley, below Race Street, in a large building suitable for meetings. The church in Arch Street was first opened for worship in June, 1823.

In 1817 a small choir of singers was started in Dr. Skinner's church, then in Locust Street above Eighth. There was some difficulty in establishing it, because the custom of choirs was unknown in Presbyterian Churches.

"In all the Presbyterian Churches in Philadelphia the singing-leader stood in front of the pulpit, at a table or desk placed on a little elevation from the church floor. The congregational singing consisted generally of a simple melody, and a bass or octave or solo in the same strain. Here and there might be heard parts of the harmony, sung by those venturesome enough to make themselves conspicuous. When the leader had sung his first note, and was about to begin his second, down at the farther end of the church they were about commencing to sing the first note, pretty much in the style of a falling row of bricks set on end."

David H. Mason and Charles Deal for a time stood up in front of the pulpit, and led off the singing in the Fifth Church, although there was a choir in the gallery. This was done in order to meet the existing prejudices against choir-singing. In order to give the cue to the choir as to the tune and the page in the music-book where it was to be found, these gentlemen used a blackened card, upon which, with chalk, the tune and number of the page were written. The card could be read by persons in the gallery having sharp eyes, and upon that information the choir was ready to go on as soon as the leader at the other end of the church was ready. After a time a four-stop organ was placed in the gallery, of which Mr. Deal was the organist. To prevent opposition, this movement was quietly resolved upon, and when the organ was first played it excited some feeling in the congregation. "One woman, on the first day it was played, was so much shocked at the profanation, that a rapid exit on her part from the church took place, accompanied by sundry bodily gesticulations, in order, as was supposed, that the reasons for her leaving might be comprehended by those who remained." In 1824, when the congregation removed to Arch Street, a larger organ was placed there, and a larger congregation was formed. E. E. Ives, Jr., was the leader of the choir, and Mr. Deal was organist.

The Sixth Presbyterian Church owed its origin to discontent in the Third Church, during the period after the resignation of Rev. Archibald Alexander. A party went out in 1814 because the Rev. James K. Burch was not elected pastor, and another party withdrew because Rev. Ezra Stiles Ely was elected pastor. Sixty-five pew-holders of the Third Church withdrew rather than sit under the preaching of Mr. Ely. They were led by four dissenting elders, Benjamin Wickes, William Haslett, John McMullin, and Robert McMullin. The Third Church transferred to them twelve thousand dollars in cash, two hundred and fifty dollars for communion-plate, and ground on Lombard Street worth about ten thousand dollars. For a time they worshiped in the court-house at Sixth and Chestnut Streets, where Joseph Eastburn did lay service for their benefit. On the 28th of July, 1814, an agreement was entered into by William Leonard, Benjamin Wickes, John McMullin, William Haslett, Conrad Hance, John H. Brown, Thomas M. Hall, Malcolm McDonald, Lewden Sawyer, William Hart, John Dickson, George Thomson, and John Kelsey, who were trustees of the Sixth Presbyterian Church, to the effect that they would obtain a charter of incorporation, and became legally entitled to hold property.

George Latimer, as one of the trustees, purchased for the purposes of the church a lot of ground on the north side of Spruce Street, between Fifth and Sixth, which was forty-five feet six inches front, and one hundred and fifty-five feet deep, irregular in shape on the sides. Another property adjoining was conveyed to the trustees in the same year by Robert Davis and wife. The two lots gave the church a front of about ninety-three feet on Spruce Street. Upon this ground was erected without delay a substantial brick church. As soon as the building was ready, Rev. William Neill, who was at that time pastor of a Presbyterian Church at Albany, N. Y., was called to take charge of the Sixth congregation. He was a native of Pennsylvania, born near Pittsburgh in the year 1779. He was educated at Princeton College, where he graduated in 1803, and was tutor there until October, 1805, when he became minister of the church at Cooperstown, N. J. He was in charge of that pulpit nearly five years, when he went to Albany, where he remained from 1809 until 1816, when he came to Philadelphia. Although the congregation of the Sixth Church was rich at starting in comparison to the means usually within control of new congregations, there was still some debt when Dr. Neill took charge. His salary was fixed at two thousand dollars a year, and he relinquished two hundred dollars annually during the lattter part of his term for the purpose of releasing the incumbrance. There was some ugly feeling between the members of the Third and the Sixth Churches at the beginning, and exertions were made by each party to fill up its congregation. The withdrawal of Burch's party and the anti-Elyites made a heavy inroad on the strength of the Third Church. In addition, a matter of disturbance was found in the coming of the First Church to Locust and Seventh Streets, in the vicinity of the Sixth Church.

Dr. Neill instituted a Bible-class of young girls and lads, which was large, comprising the youthful strength of the congregation. While engaged in this service, quietly discharging his duties, he received an invitation to become president of Dickinson College, at Carlisle. He left the church in 1824. The position at Dickinson College was highly honorable, but the place was not agreeable on account of the divided authorities of the institution, and also on account of its dependence on the Legislature of the State. After four years' service Dr. Neill withdrew, and became secretary of the Board of Education, which position he held for two years. He took charge of the church at Germantown in 1831, and was there eleven years. He withdrew from active pursuits in 1842, and died in 1860, aged eighty-two years.

After the withdrawal of Dr. Neill the congregation was for some months without a pastor. In 1825 they called Rev. John H. Kennedy, and he was in the service of the church for some time.

In the year 1804, Rev. John Hey, a clerical adventurer, visited Philadelphia. He was an Englishman, a Baptist clergyman in his native country, which, it may be presumed, he left for reasons satisfactory to his congregations. In the city he found no difficulty in gaining admission to the pulpits of Baptist and Presbyterian Churches, preaching during the summer with acceptation and increasing popularity. He had a good presence, a fine voice, a showy, oratorical style, and apparently great earnestness of purpose, and his preaching was so different from the grave and formal mannerisms of the pulpit of the time that he secured sufficient followers to justify an attempt in forming a congregation. Not having authority from Presbyteries or Baptist Associations, Mr. Hey and his followers set up as independents. His congregation was made up of persons belonging to various denominations, and some who previously had not belonged to any congregation. The Second Presbyterian Church granted letters of dismissal, Oct. 4, 1804, to nine members of that congregation,—William Shufflebottom, William Sheepshanks, Charles Woodward, Robert Murphey, John Lorain, Jr., Gilbert Gaw, Susanna Gaw, John Firth, and Elizabeth Firth. The congregation was organized at the old academy, Fourth Street, and Mr. Hey preached there with great success. Englishmen, most of whom had been connected with regular Baptist congregations, took great interest in Mr. Hey, and aided in his plans. Dr. Mitchell says of his meetings at the academy,—

"Collections were taken up on every Sabbath day to aid in the erection of an edifice of novel construction, which finally became the regular place of worship for the society, which as yet had no fixed designation. I well remember the disgust excited by a device of Hey for the purpose of augmenting the funds somewhat more rapidly than the people were disposed to encourage and tolerate. Bags fastened to long handles had been usually passed through the house to catch the mites; but many found it convenient to escape the carrier's hint by a timely retreat, to prevent which calamity Hey directed certain persons to take their stands at the doors, with open plates in their hands, and in such numbers that every passer-out was sure to find a plate thrust at him. The modest parson very plainly certified to the flock that silver was much more acceptable than pennies, and withal vastly more respectable."

As early as October, 1804, an address was published in the newspapers in favor of building a church for Rev. John Hey. The collections were made from that time, so that in six months enough had been gathered to justify the commencement of the church building. On the 24th of January, 1805, Joseph Shotwell and others conveyed to William Sheepshanks, William Taylor, William Shufflebottom, James Cummins, and Gilbert Gaw, a lot of ground "for the purpose of building thereon a house of worship situate on the south side of Petty's Alley [afterward Greenleaf Court, now Merchant Street] one hundred and thirty-three feet two inches west of Fourth Street, and running south to Ranstead Court." The lot was of irregular shape, and widened on the southern side. It was only nineteen feet in width on Petty's Alley, while upon Ranstead Court [formerly known as Patton's Alley] it was eighty-eight feet one inch [illegible] 'ance from Petty's Alley to

Ranstead Court was one hundred and sixty-three feet four inches. The foundation or corner-stone was laid on the 28th of April, 1805, and the church was finished and opened on Sunday, Jan. 5, 1806. The building was of brick, and was very spacious in comparison with churches then in use in Philadelphia. It was sixty feet in breadth by ninety feet in depth, and occupied the southern and eastern portion of the lot. From the north, on Ranstead Court, there was a passage-way, and west of the church there was a graveyard, which adjoined the property of the Black Bear Tavern. The principal entrance was from Ranstead Court by a door at the southeast corner of the building. There were two doors also on the east side in the way or passage which extended from Greenleaf Court. West of the Ranstead Court door a semicircular recess or bay rose to the roof. In this space the pulpit, which was roomy, stood. The choir was ranged on both sides of the pulpit. The galleries were shallow, and those upon the sides were supported from the wall. The northern gallery was supported by columns. The church was lighted by semicircular windows, which were built in such a manner that the lower sills were a considerable distance from the level of the ground. Above these were large windows with arched tops, which rose nearly to the roof. There were one hundred and sixty-two pews, conveniently arranged, with spacious aisles. The congregation gave to this building the name of the Tabernacle, and adopted for itself the title of the First Independent Church. Mr. Hey preached for them during 1806 and 1807, and until the close of 1808. During that period his true character became apparent by discoveries of moral delinquencies, and he fled to the West with a female who had formerly stood high in public estimation, leaving his wife in the city.

In November, 1808, charges were preferred against him by members of the church and he was dismissed. He died on Aug. 30, 1809, at Chambersburg, Pa. The dismissal of Mr. Hey led to bitter disputes as to who was entitled to the property, which were compromised in 1808. On the 1st of June, of that year, the trustees of the First Independent Church conveyed to the Independent Tabernacle Church the property on Ranstead's Court, and also four lots of ground on the south side of Cherry Street, between Schuylkill Fifth [Eighteenth] and Schuylkill Sixth [Seventeenth], having a front of one hundred and thirty-two feet, and a depth of one hundred and forty-four feet. It had originally been purchased by the Independent Church for the purposes of a burying-ground. Rev. Thomas Dunn, who was an Englishman, preached for some time after Mr. Hey was dismissed. He was a Presbyterian clergyman, and was succeeded by Rev. John Joyce, a Presbyterian clergyman. Mr. Joyce served the congregation for more than five years, when he resigned on account of ill health. The congregation, after Mr. Joyce had left, was obliged to depend for services in the pulpit upon whatever supplies could be obtained. Not being attached to any sect which had strength and popularity, they could not command the services of acceptable preachers for supply. They were an independent congregation, and could gain little sympathy from other sects. This led the members to seek affiliation with the Dutch Reformed Church.

On the 17th of October, 1816, the Tabernacle congregation was organized as the Consistory of the Second Reformed Dutch Church in the city of Philadelphia. At that time the number of communicants belonging to the church was fifty-one. Rev. David Parker was invited to preach to the congregation as soon as the organization was effected, and he held forth every Sabbath evening. He was a native of New England. He went to Europe in 1808, and studied divinity for several years in the seminary of Rev. Dr. Baque, in Gosport, England. He was ordained in May, 1816, and was sent to preach in the United States. After trial at the Tabernacle, Mr. Parker was regularly elected pastor, and was installed in April, 1817. Rev. Dr. Broadhead, of the First Reformed Dutch Church, preached the sermon. Father Eastburn took part in the services, assisted by Rev. Robert McCartee of the Associate Church. After the installation of Mr. Parker, some repairs and alterations were made to the building which prevented the use of the church. In August of that year it was announced that, the building being "so far completed as to admit a congregation," worship would be resumed. Rev. Mr. Joyce preached in the morning, and Rev. Mr. Parker in the evening.

The congregation did not long continue with the Dutch Reformed Church. For some time a majority of the members were dissatisfied. On the 18th of October, 1819, the pew-holders and communicants requested the Consistory to apply to the Classis of the Dutch Reformed Church for the dismissal of the Second Church to the Presbytery of Philadelphia. The Classis was not favorably impressed with this desire. The loss of a congregation from the fold was not to be submitted to with calmness, and there was some opposition to the request. Finally the Presbytery received this church and congregation by vote passed Nov. 9, 1819. Rev. Drs. Neill and Janeway, with Elders John McMullin and Robert Ralston, were appointed a committee to organize the church under its new relation. This was done on the 18th of November, 1819, and the congregation received the title of the Seventh Presbyterian Church of Philadelphia. Under the new organization, the elders elected were William Sheepshanks, Robert Hamill, and William Shufflebottom; deacons, John P. Shott, Thomas Whitaker, and William Taylor, Jr. Jacob Engles was also elected, but declined to serve. The officers were set apart for their duties on the 28th of November, when Dr. Neill preached the sermon. After some delay, Rev. William M. Engles was elected pastor, who was installed on July 6, 1820. He was

then in the twenty-third year of his age. He was born in Philadelphia Oct. 12, 1797, graduated at the University of Pennsylvania in 1815, studied theology with Dr. S. B. Wylie, and was licensed by the Presbytery of Philadelphia Oct. 18, 1818. He was in charge of the Seventh (or Tabernacle) Church in 1825, and continued in that pulpit until 1834, when he was obliged to resign on account of disease of the throat. He became editor of *The Presbyterian*, succeeding Dr. James W. Alexander, and he held the position until his death, in 1867. This paper was made the organ of the Old-School party, and under the control of Mr. Engles it achieved high reputation. He was also appointed editor of the board of publication in 1838, and held that position until his death. He wrote many books, which were published by the board. Among these were "Sick-Room Devotions" and the "Soldier's Pocket-Book," of which three hundred thousand copies were sold. He was moderator of the General Assembly in 1840, and stated clerk for six years.

The history of the establishment of the Mariners' Church in Philadelphia is a record of the earnestness of purpose and the untiring efforts of one man. Although the congregation, when established, was not, by formal proceeding, a Presbyterian Church, yet the circumstances attendant upon its foundation were such that Presbyterians were most active in the cause, and the congregation eventually went under the control of that sect. Joseph Eastburn, a member of the Second Presbyterian Church, was the founder of the Mariners' Church, and his life was one of simplicity, thorough work, and devotion. He was the son of Robert Eastburn, an Englishman, who came to America in 1714, when he was but four years old. He married Agnes Jones, of Germantown, in 1733, and Joseph, his sixth child, was born in Philadelphia, Aug. 11, 1748. He was put apprentice to a cabinet-maker at the age of fourteen, and became thoroughly accomplished in his trade. He was impressed with religious feeling in his youth, and after he had attained the adult age he commenced a weekly prayer-meeting in his father's house, reading sermons to the people who attended. He was finally induced to go to Pequea, where he entered the grammar-school of Rev. Robert Smith, with a view of accomplishing himself for religious service. His education had been limited, and, feeling his disadvantages, he addressed himself earnestly to study. Indeed, he devoted night and day to the acquisition of learning with such persevering and absorbing attention that his health broke down, and his physician ordered him to give it up. Returning to Philadelphia, he resumed working at his trade as a cabinet-maker. He was married to Ann Owen, June 12, 1771. During the Revolution Mr. Eastburn served two or three times in the army, and was in the battle of Princeton. One son was born to Joseph Eastburn and his wife, who, when a boy, took to the sea, and became mate and then commander of a merchant vessel. He was killed by a cannon-shot when returning from the West Indies as a passenger, being twenty-five years old. The circumstances connected with the history of this boy and his death no doubt aroused in Mr. Eastburn an interest in the welfare of seamen, a class of men who had been neglected by all denominations. After some years' connection with religious service as an exhorter, Mr. Eastburn's ambition to be an ordained minister increased. There was no doubt of his sincerity and piety, but the difficulty which at all times stood in his path was the want of a liberal education.

In the year 1801, Joseph Eastburn entered into partnership with Peter Lesley in the business of cabinet-making, and they established their shop on the north side of Arch Street, above Third, next door to the Second Presbyterian Church. Lesley was sexton of that church, and Eastburn was a member of it, and as it was part of the cabinet-makers' duties at that time to make coffins, Mr. Lesley's position in the church and the large acquaintanceship of both partners served to bring in a great deal of work. They were diligent about the shop, and although persons came in to converse on religion, they did not neglect the claims of industry. While they talked they worked. Mr. Eastburn's desire to get into the pulpit was finally gratified by his introduction as a lay reader to the Northern Liberties Presbyterian Church, which was under the charge of the Second Church. Necessity compelled the adoption of this course on the part of Dr. Green, who was pastor of the Second Church, and who could not devote as much time to the Campington Church as he desired. Mr. Eastburn, he considered, would be of valuable assistance at the weekly meetings, and they were generally conducted under his charge. There were hymns, examinations in the catechism, and addresses. Dr. Green had no expectation at the time that Mr. Eastburn would be anything more than a teacher and assistant. But the satisfactory manner in which he performed his duties gradually led to an enlargement of his sphere of service.

In 1805, the Presbytery of Philadelphia authorized him to "fulfill the duties of missionary in the jail, almshouse, and hospital of the city of Philadelphia, and also, as occasional opportunities might offer, to speak to collections of people in other places on the concerns of their souls." This was the only license Mr. Eastburn ever received. It did not make him an ordained clergyman, but it gave him much more freedom of action than he ever had before, and in time the people conferred upon him the title of "Reverend." As "Rev." Joseph Eastburn he was generally known in later life, although he had no claim to the title. For several years succeeding, Mr. Eastburn carefully attended to his business, which was managed with thrift and a steady increase in his means. Beside his labors in the hospital, jail, and almshouse, he was a ready and welcome assistant to religious

congregations, which temporarily or otherwise needed supplies for their pulpits. Beside week-day services, he generally, on Sunday, had some engagement. He preached in Presbyterian, Baptist, German Reformed, and Dutch Reformed Churches, and was called upon at meetings of societies connected with all religous denominations. His services were not confined to Philadelphia, but extended through various parts of Pennsylvania, New Jersey, and Delaware.

The foundation of the Mariners' Church in the port of Philadelphia was effected by the publication of the following notice in the *United States Gazette*, Oct. 23, 1819:

"The mariners of the port of Philadelphia, and all others who shall be transiently in port, are affectionately invited to attend on the public worship of God, at the large room used by Mr. Jacob Dunton as a sail loft, No. 6, fronting the water, and second wharf north of Market Street, where a flag will be suspended. This is to be the place for worship until a permanent mariners' church can be erected."

The first service was performed on the third Sunday of October, 1819, by Mr. Eastburn, who took for his text the 31st and 32d verses of Psalms cvii.: "Oh that men would praise the Lord for His goodness and for His wonderful works to the children of men! Let them exalt Him also in the congregation of the people, and praise Him in the assembly of the elders." Rev. Mr. Joyce assisted with an address. There were from five hundred to six hundred persons present, fully one-half of whom were mariners and masters of vessels. On the next Sunday a Sunday-school was opened. On the 21st of January, 1822, a new Bethel flag was hoisted at the Mariners' Church, at Dunton's sail-loft. It was procured through the exertions of Miss Elizabeth White, a sister of the Rev. William White, of the Northern Liberties. It was painted by Mr. Woodside, and was thirteen by eight feet, having an azure field and a white border. The symbols were, the morning and evening stars at the top, a dove in the centre, an anchor below, and the inscription, "Mariners' Church." Mr. Eastburn preached from the four last verses of Hebrews, and a hymn written for the occasion was sung. The congregation continued in Dunton's sail-loft until July, 1822, when the place of meeting was removed to the lecture-room of the Second Presbyterian Church, in Cherry Street near Fifth. This change, while it may have interfered with attracting those who had not previously attended the meetings, still held control over those who had been gathered in. Mr. Eastburn continued to preach here until a suitable church building was erected.

In June, 1823, an agreement for the purchase of a suitable lot was made with the directors of the Bank of North America. It was situate on the east side of Water Street, between Chestnut and Walnut Street, seventy-five feet front on Water Street, and sixty-one and a half feet deep, to a passage or court. The price was eight thousand dollars. Subscriptions were at once solicited, and with so much success that in a few weeks ten thousand dollars had been collected, sufficient to pay the cost of the lot, and to compensate the tenants for vacating the premises, leaving twelve hundred dollars in hand. The deed was made to Richard Dale, Samuel Archer, and Robert Ralston, in trust for the mariners of the port of Philadelphia. In April, 1824, William Strickland, architect, undertook to erect a brick building for the use of the church, for the sum of ten thousand five hundred dollars, and which was to occupy the full dimensions of the lot. The first story was divided into warehouses, with cellars. The church-room occupied the whole of the second story, being lighted by large windows. In the centre of the front was a tablet bearing an anchor in relief. The entrance was by a stairway at the south end of the building. The ceiling was eighteen feet high. The pulpit was in the north end, and the gallery in the south end. The building was covered with slate, and there was an observatory which rose twenty feet above the roof. The funds for building the church were partially raised by subscription, the revenue from the stores being devoted to a sinking-fund for the purpose of paying off the balance. The corner-stone was laid April 19, 1824. On the 17th of October, 1824, the New Mariners' Church was opened. Mr. Eastburn and Rev Mr. Patterson, of the Northern Liberties Church, preached in the morning, and Rev. Dr. Broadhead in the afternoon. Mr. Patterson read Solomon's dedication of the temple, and made some remarks upon it. Mr. Eastburn took for his text, "This is none other but the house of God; this is the gate of heaven" (Genesis xxviii. 17). Mr. Ralston read an account of the commencement of the meetings, and of the formation of the congregation and church. Rev. Dr. Broadhead preached from 2 Chronicles, vii. 16. In 1825, Mr. Eastburn was still in charge of this congregation.

One of the most important movements of the Presbyterian Church toward the dissemination of its principles and doctrines which took place in the period between 1800 and 1825, was the formation of a board of education. The first movement in that direction was made at the session of the Synod of Philadelphia held at Baltimore, in November, 1818, at which it was resolved to recommend the formation of a society "for educating poor and pious youths inclined to devote themselves to the work of the holy ministry." Rev. Jacob J. Janeway, D.D., Rev. William Neill, D.D., and Rev. James Patterson, were appointed a committee to mature a plan for the organization of such society. They called a meeting of the friends of the project in the Third Presbyterian Church, Philadelphia, on Dec. 9, 1818. On that occasion, Revs. Dr. Janeway, Neill, Wilson, Green, Alexander, and Miller, with Rev. James Patterson, were appointed a committee to draft a constitution for the proposed society. At the next meeting, held December 17th, in the Sixth Presbyterian

Church, the constitution was adopted. Robert Ralston was elected president; Rev. William Neill, D.D., corresponding secretary; and Alexander Henry, treasurer. Ashbel Green, D.D., was elected president in 1824, and held the office until 1829. Rev. Ezra Stiles Ely was corresponding secretary from 1824 to 1829, and John S. Stille was treasurer from 1823 to 1831. Between the years 1819 and 1824 the board had one hundred and eight candidates for the ministry under its care.

The Second Associate Reformed Church, in Thirteenth Street above Market, was opened for worship on the 26th of November, 1815, the sermon being preached by Rev. John Mason Duncan, of Baltimore, grandson of the founder of the church. The house was of plain brick, without the least trace of ornament, and for many years was one of the gloomiest-looking churches in the city. The dimensions were fifty by sixty feet.

After the Second Associate Reformed Church was built, there was much difficulty in procuring pulpit service. The Associate Reformed connection in the United States was weak and poor, and the number of ministers within the communion was scarcely sufficient for the work to be done. Add to this the fact that "Margaret Duncan's church" was in a part of the city poor and thinly inhabited, and also that, although Mrs. Duncan provided for the building, she left no fund for its support, and it may be understood why the congregation struggled on against adverse influences. Indeed, had it not been for the assistance of the Presbyterians, who frequently gave supplies to its pulpit, it would probably have been closed for considerable periods of time. Among the supplies most frequent was John Welwood Scott, an elder of the Third Presbyterian Church, who at a subsequent period was ordained as a minister. The first regular pastor of this church was Rev. Thomas Gilfillan McInnes, who was called to the service early in 1822. He was received as a member of the Philadelphia Presbytery, but was soon after transferred to the Associate Reformed Presbytery. He died on the 26th of August, 1824.

This church, by the action of the Associate Reformed Synod and of the General Assembly of the Presbyterian Church in 1822, like the Scots' Church, suddenly found itself outside of the Associate Reformed persuasion, and a member in full authority of the Presbyterian Church. By the process which effected this unexpected change, the Second Associate Reformed Church became the Ninth Presbyterian Church.

After the death of Mr. McInnes, the congregation of the Ninth Church, in March, 1825, called to the pulpit Mr. John Chambers, of Baltimore, to preach as a candidate. He accepted the invitation, and preached two Sundays in April. When he presented his papers for admission to the Presbytery of Philadelphia he was objected to on account of soundness in reference to certain doctrines of the Presbyterian Church. He was refused admission, and in October, 1825, the pulpit of the Ninth Church was declared vacant. The members of the Ninth Church took up Mr. Chambers' cause with great energy. By a vote of four to one they declared themselves independent of church courts, and by an equally heavy vote resolved to retain Mr. Chambers as their pastor. The minority, headed by Moses Reed, went away, and meeting in a room in Race Street, declared themselves to be the Ninth Presbyterian Church. By advice of Revs. J. P. Wilson, Thomas H. Skinner, and John Mason Duncan, Mr. Chambers went to New Haven in December, 1825, made application to the Association of Congregational ministers of the Western District of New Haven County, and was ordained in Middle Church, Professor Fitch, of Yale College, preaching the ordination sermon. Mr. Chambers then came back to Philadelphia, and again began his services in "Margaret Duncan's Church," not in the Second Associate Reformed Church, nor in the Ninth Presbyterian Church, which succeeded it, but in what was called the Independent Church, a congregation which had no connection with any regular sect.

On the 7th of October, 1824, Robert A. Caldcleugh and wife conveyed to Robert Fleming and the heirs and representatives of Thomas G. McInnes, Moses Reed, and fifty-two others, a lot of ground on the south side of Race Street, between Schuylkill Third [Twentieth] and Schuylkill Fourth [Nineteenth] Streets, for the purpose of a burying-ground. The lot was eighteen feet by six inches wide, and one hundred and twenty-nine feet deep, to a thirty-feet wide street. The burial-lots were conveyed to each member of the church in separate and distinct divisions. The width of fourteen feet six inches from the west line of the lot was devoted for graves, and a passage four feet wide on the east side was laid out for the use of owners of lots, and of those attending burials.

In 1831, Mr. Chambers' congregation removed to their new church edifice at the corner of Broad and Sansom Streets. It was known as the First Independent Church until 1873, when Dr. Chambers and his congregation sought to be and were admitted into the Presbyterian body. By order of the Presbytery of Philadelphia, the name of the church was changed, in honor of its pastor, to the "Chambers Presbyterian Church."

In May, 1875, the fiftieth anniversary of Dr. Chambers' pastorate was celebrated, and he delivered a historical sermon on that occasion, in which, among other items of interest, he stated that he had received three thousand five hundred and eighty-six members into the church, of whom twelve hundred were then in actual membership; that between thirty and forty young men had entered the gospel ministry; that he had married two thousand three hundred and twenty-nine couples; attended between four thousand and

five thousand funerals; and preached more than seven thousand sermons.

Dr. Chambers was a man of commanding influence over the masses. Bold and frank in the expression of his opinions, even those who differed with him could not but respect and admire his courage. He fearlessly attacked the crying abuses, vices, and errors of the day. He died Sept. 22, 1875, four months after his fiftieth anniversary. His successors in the pastorate have been Rev. Henry C. Westwood, D.D., 1876–78; Rev. J. M. P. Otts, D.D., 1879–83; Rev. Thomas A. Hoyt, D.D., 1884.

The Tenth Church, at Walnut and Twelfth Streets, was projected by the late Furman Leaming, at that time in the hardware business on Market Street. The corner-stone was laid on the 13th day of July, 1828, and the church was opened for service in December, 1829. The contributors were John Stille, Furman Leaming, Solomon Allen, George Ralston, James Kerr, and William Brown, all of whom are now dead. The Rev. Dr. Thomas McAuley, of New York, was the first pastor, but he resigned in January, 1833.

Henry Augustus Boardman, his successor, was born at Troy, N. Y., Jan. 9, 1808. He was graduated from Yale College in September, 1829, with the first honors of his class. On leaving college he spent one year in legal studies preparatory to the bar. But in the spring of 1830 he devoted himself to the work of the ministry, entered Princeton Seminary in September of that year, and studied there three years. He was ordained and installed pastor of the Tenth Church by the Third Presbytery of Philadelphia, Nov. 8, 1833. This was not only his first but his only charge, in which he continued to labor until released, May 5, 1876, after which he continued, by vote of the church and of the Presbytery, to hold the relation of "pastor emeritus" until his death, which occurred in Philadelphia, June 15, 1880, in the seventy-third year of his age. Called to the Tenth Church while yet in the seminary, in this position he performed his great life-work of forty-six years with distinguished ability, learning, and fidelity. From this eminent position he could not be drawn away. In 1853 he was elected by the General Assembly to be a professor of Pastoral Theology in Princeton Seminary, but he declined. In 1854 he was moderator of the General Assembly. In 1835 he was elected a director of Princeton Seminary, in which office he continued until his death. As an author he was able and prolific; as a preacher he was evangelical and elevated in his thoughts, and pure, simple, and direct in his style. He charmed while he instructed his people, and bound them to himself by the cords of a reverential love. He was pre-eminently wise in counsel, and to the very end grew in influence among his brethren.

Dr. Boardman's successor was the Rev. John De Witte, D.D. He was born in Harrisburg, Pa., Oct. 10, 1842, and graduated at the College of New Jersey in 1861. Like his predecessor, he spent some time in the study of law. Having concluded to enter the ministry, he pursued his theological studies for two years in Princeton Seminary, and concluded them in the Union Theological Seminary of New York. The first eleven years of his ministerial life were spent in Irvington, N. Y., and in Boston, Mass. He was installed pastor of the Tenth Church Oct. 12, 1876, and was released from his charge June 5, 1882, to accept the professorship of Church History in Lane Theological Seminary, Cincinnati, Ohio. The present pastor is the Rev. William Brenton Green, Jr., who entered upon the duties of this office May 14, 1883. The changes of population have, in a measure, weakened the congregation, but it still holds a prominent and influential place among the churches of the city.

In 1842 several members of the Tenth Church, influenced by a desire to do something for the spiritual good of the poor and neglected, established a Sabbath-school in Christian Street below Tenth Street. Of this school the Rev. Andrew Happer, D.D., then a student of medicine, and now an honored missionary in China, was the first superintendent. At a subsequent date the school was removed to Carpenter Street. From the first it was a cherished plan of those interested in the enterprise to establish a church, when the way should be open to do so. This was accordingly done Oct. 11, 1858. The Rev. Willard M. Rice was installed pastor of the infant church Oct. 18, 1858. The church and Sabbath-school continued to hold the same missionary relation to the Tenth Church as before, the principal support of the enterprise being contributed thereby. In 1863, Dr. Rice was transferred to the pastorate of the Fourth Church. Subsequently the church organization was dissolved, but the Sabbath-school continued its good work. By the will of the late Harriet Holland, a pious and benevolent lady of the Tenth Church, a legacy was left to the school, with which a beautiful chapel was erected on Federal Street above Thirteenth, to which the school was transferred in 1874. Here the Holland Memorial Church was organized March 24, 1882, with two hundred and thirty members, and the Rev. James R. Miller, D.D., was installed its pastor April 23, 1882. Dr. Miller's editorial duties in connection with the Presbyterian Board of Publication compelled his resignation, September, 1883. His successor, the Rev. William M. Paden, was ordained and installed, Nov. 20, 1883.

In 1852, the Tenth Church had become so large and prosperous that a plan was formed for the establishment of another church. It originated in the mind and heart of Dr. Boardman, and its success was owing in large measure to his lead and co-operation. A lot was secured on the corner of Seventeenth and Spruce Streets. The congregation was incorporated as the West Spruce Street Presbyterian Church March 29, 1854. A commodious church edifice was erected.

The lecture-room was opened for worship May 18, 1856, and the church was dedicated Jan. 4, 1857.

The church was organized by a committee of the Presbytery of Philadelphia, of which Dr. Boardman was chairman, April 3, 1856, with thirty-four members, all of whom were members of the Tenth Church. Messrs. James Imbrie, Jr., John S. Hart, and Morris Patterson were elected ruling elders, and John McArthur, Jr., deacon. The Rev. William P. Breed was unanimously called to the pastorate.

The Rev. William P. Breed, D.D., was born at Greenbush, N. Y., Aug. 23, 1816. At an early age he removed with his parents to the city of New York. He was graduated from the University of the City of New York in 1843, and from the Princeton Theological Seminary in 1847. He was ordained and installed pastor of the Second Presbyterian Church of Steubenville, Ohio, Dec. 15, 1857. After a pastorate of eight years he was released from this charge, May 7, 1856, and installed pastor of the West Spruce Street Church June 4, 1856. The installation services were held in the Tenth Church. The quarter-century anniversary of the organization of the church and pastorate of Dr. Breed was celebrated April 3 and 4, 1881. The church has steadily grown and prospered. Dr. Breed has given himself faithfully and industriously to pastoral and pulpit work. But his labors have not been confined to these. He has frequently represented his presbytery in the General Assembly of the Church. For many years he has been a member of the Presbyterian Board of Publication, and zealously devoted to its interests. Twice he was elected moderator of the Synod of Philadelphia, and at the meeting of the Synod of Pennsylvania, in 1883, was elected to the same office. To him belongs the honor of placing the statue of John Witherspoon in Fairmount Park, the funds for which were mainly raised by his persevering efforts.

Dr. Wilson's successor in the First Church was Albert Barnes, who was born in Rome, N. Y., Dec. 1, 1798, and graduated from Hamilton College in 1820. When he entered college he was decidedly skeptical, but during his college course his religious views underwent a change. He gave up his previous intention of studying law, and entered Princeton Theological Seminary immediately after his graduation. He pursued the full three years' course, and remained several months after its termination as a resident graduate. He was ordained and installed pastor of the First Presbyterian Church of Morristown, N. J., Feb. 8, 1825. His ministry there continued five years, and was very successful. June 10, 1830, he accepted the call of the First Church of Philadelphia, and was installed in the face of violent opposition from some members of the presbytery. Party feeling between the Old and New School became very bitter, until 1835, when charges were begun against Mr. Barnes, and he was tried for heresy by the Presbytery of Philadelphia. The presbytery refusing charges, the case was carried by appeal to the Synod of Philadelphia, which censured Mr. Barnes and suspended him from the ministry. To this sentence he quietly submitted, but in 1836 appealed to the General Assembly. This body reversed the sentence, and Mr. Barnes resumed the ministry. The violence of party feeling continued to increase, until in 1838 the Presbyterian Church became divided. Mr. Barnes was the acknowledged leader of the New School branch in the doctrinal controversies which preceded and followed the division. Throughout all these trying scenes his church gave him its hearty and undivided support. As a pastor and preacher he was eminently successful, and during his pastorate of forty years his church maintained its position among the Presbyterian Churches of Philadelphia as "first" in *fact* as well as *First* in name. In time the bitterness of controversy subsided, and at his death his loss was as sincerely lamented by his brethren of the Old School division as by his own.

In 1849, Mr. Barnes was elected to a professorship in Lane Seminary, which he declined. In 1851 he was moderator of the General Assembly. About this time his eyesight began to fail, and, notwithstanding a trip to Europe and the employment of assistants in the pulpit, this infirmity increased to such a degree that in 1868, at the age of seventy, he resigned his charge, much against the wishes of his congregation. He continued, however, as pastor emeritus. To the last he preached occasionally in the churches, and regularly in the House of Refuge, of which he was a manager. He died very suddenly Dec. 24, 1870.

His fame rests chiefly on his "Commentaries," of which a million copies have been circulated in America and Great Britain, and translations have been made into several foreign languages. His name appears without any honorary title, because he was conscientiously opposed to academic degrees.

Mr. Barnes' successor in the First Church was Rev. Herrick Johnson, D.D., who resigned in 1873 to accept a professorship in the Auburn Theological Seminary. Rev. Lawrence M. Colfelt, on March 29, 1874, was installed pastor. Failure of health compelled him to relinquish the active work of the ministry on March 3, 1884. During his ten years' service in this church, he worthily and ably sustained his charge. The church has during all its history numbered among its officers and members many men of mark and influence, and though the changes in population and the encroachments of business have had a weakening influence upon the congregation, it is still a power for good in the community.

The First Church has in common with others contributed, by its members and wealth, to the formation of other churches and congregations. Toward the close of 1850 steps were taken for the establishment of Calvary Presbyterian Church. The association was chartered April 2, 1851. A lot was purchased on Locust Street above Fifteenth, and a church edifice

erected and dedicated Nov. 5, 1853. On the 10th of November, 1853, the Fourth Presbytery of Philadelphia, upon the petition of the following persons, John A. Brown, Thomas Fleming, Matthias W. Baldwin, E. S. Whelen, John Gulliver, Henry White, Joseph H. Dulles, James C. Donnell, and Samuel McClellan, M.D., organized them into a church under the name of Calvary Presbyterian Church. On the same occasion, Thomas Fleming and Matthias W. Baldwin were elected ruling elders. The Rev. John Jenkins was installed its first pastor, Nov. 27, 1853. Under his charge the congregation steadily grew in numbers, wealth, and influence.

The following is a list of the pastors to 1884: John Jenkins, D.D., 1853; Zephaniah M. Humphrey, D.D.; and Charles A. Dickey, D.D., 1875.

During the pastorate of Dr. Humphrey a large and commodious chapel and Sabbath-school building was erected opposite the church. Important additions and improvements, rendered necessary by the growth of the congregation, have been made in the church edifice during the incumbency of Dr. Dickey. The church also has under its charge Hope Mission Chapel, at Thirty-second and Wharton Streets, to which the Rev. J. Gray Bolton has ministered since 1874.

Wharton Street Church, at the corner of Ninth and Wharton Streets, is also a daughter of the First Church. It was organized in 1863. The Rev. Augustus W. Williams has been its pastor since 1875.

Mr. Potts resigned the pastorate of the Fourth Church, Sept. 9, 1835, and died Sept. 23, 1838. His successor was the Rev. William McCalla, who was installed April 20, 1836. Difficulties arose in the congregation which ended in its division. Mr. McCalla and his friends were recognized as the Assembly Church, and the Fourth Church was declared vacant by the presbytery, by the casting vote of the moderator, after protracted discussion, Jan. 10, 1839.

Rev. William Loughridge was the third pastor. He began his labors in 1839, and was installed Nov. 17, 1840. The church at his accession was reduced to twenty-nine members; but such was the success that attended his labors that the congregation soon found itself straitened for the want of room. A larger and more commodious church edifice was erected at the corner of Lombard and Twelfth Streets. In a short time every sitting in the new church was occupied, and the congregation became one of the largest in the city. His pastorate may be considered the most prosperous and successful in the history of the church. He died Nov. 11, 1846. The fourth pastor, the Rev. Lewis Cheeseman, D.D., was installed Oct. 3, 1848. Failing health compelled him to relinquish his charge Oct. 10, 1860. The following is a list of his successors: Rev. Philip H. Mowry, D.D., 1862–63; Rev. Willard M. Rice, D.D., 1863–74; Rev. George H. Poole, 1875–77; Rev. George Benagh, 1877–80; Rev. James Robinson, 1881–.

The formation of the Central Presbyterian Church from the Second Church has already been mentioned (see p. 1280, note). The congregation worshiped for some time in the Whitefield Chapel, on Fourth Street, below Arch, the place where the Second Church was organized. In this chapel the first pastor, the Rev. John McDowell, D.D., was installed June 6, 1833. Dr. McDowell was born in Bedminster, Sept. 10, 1780, and graduated from Princeton College Sept. 1801; thoroughly instructed in theology by the Rev. John Woodhull, D.D., of Freehold, N. J.; ordained and installed pastor of the First Presbyterian Church of Elizabethtown, N. J., Dec. 26, 1804; and after a singularly successful pastorate of nearly twenty-nine years was released, May, 1833, to take charge of the Central Church. The corner-stone of the church edifice, at the corner of Eighth and Cherry Streets, was laid April 22, 1833, and the building was opened for public worship Feb. 23, 1834. It was built in the most substantial manner, of ample dimensions, with chapel and Sabbath-school rooms adjoining. Among the founders of the congregation were Alexander Henry, Matthew Newkirk, Samuel Richards, Matthew L. Bevan, John V. Cowell, and many others who were well known as among the most prominent and influential citizens of Philadelphia. The church soon became large and efficient.

Among other acts of benevolence during Dr. McDowell's ministry was planting a missionary in Cohocksink, in what was then the northern suburb of the city, and supporting him for a time, which resulted in the organization of the Cohocksink Church, to the building of which the Central Church largely contributed. After a pastorate of twelve years, Dr. McDowell was released, Nov. 20, 1845, but he did not long remain unemployed. Many of the members of his last charge were unwilling to be deprived of his pastoral care and instruction. A new congregation was formed at the Whitefield Chapel, Fourth Street, below Arch, Dec. 14, 1845, where it continued to worship until its church edifice was ready for occupation. The Spring Garden Presbyterian Church was regularly organized with eighty-seven members, Jan. 18, 1846, and Dr. McDowell was installed its pastor Feb. 8, 1846. A lot was purchased on Eleventh Street, above Spring Garden, and the corner-stone of the church edifice was laid June 16, 1846. On May 16, 1847, the church was dedicated. Only the audience-room was then finished. The labor of collecting money for the building of the church fell entirely upon Dr. McDowell, in addition to his pastoral work. The entire sum expended was about twenty-eight thousand five hundred dollars. There was also a funded debt of nine thousand four hundred dollars. The congregation continued to increase and prosper until a heavy calamity, attended with great mercy, befell it. On the 18th of March, 1851, about five o'clock in the morning, after a storm of very wet and heavy snow, which commenced the previous afternoon and continued through

the night, the building fell. The roof came down, crushing the pews; the timbers broke through the floor into the basement below, the side walls fell out each way nearly to the floor, and the whole was a frightful scene of destruction.

The congregation, under the lead of Dr. McDowell, immediately began the work of rebuilding. The building was improved in strength and beauty, and reopened and dedicated Oct. 5, 1851. The restoration cost ten thousand dollars. This expense was met by the collections made for the purpose, and the permanent debt reduced to eight thousand seven hundred dollars. In 1857, Robert S. Clark, one of the ruling elders, offered to give for the extinguishment of the debt four thousand dollars, provided the congregation would pay the remainder. The money was raised, and the church began the year (1858) free from debt. The increasing infirmities of age led Dr. McDowell, soon after, to propose to resign his charge, to which proposition the church refused to listen. In 1859 measures were taken to secure a collegiate pastor, which resulted in the settlement of the Rev. Morris C. Sutphen, who was ordained and installed May 1, 1860. The arrangement was highly satisfactory, and the joint pastorate, which continued until the death of Dr. McDowell, Feb. 13, 1863, was a period of harmony and prosperity. Dr. McDowell, besides the active duties of three important and successful pastorates, extending over a period of fifty-nine years, was intimately connected with many of the important religious movements of his day. He was one of the founders of the Princeton Theological Seminary, in 1812, of which he continued a director until his death. For forty-eight years he was secretary of the board, and a member of the convention which formed the American Bible Society, in 1816. He was also moderator of the General Assembly of the Presbyterian Church in 1820, a member of the Board of Domestic Missions, and chairman of its executive committee for thirty years,—from its organization until his death,—besides holding other important and honorable positions. He was the author of several works, among which may be mentioned a "System of Theology," in two octavo volumes, a "Bible Class Manual," and a "System of Bible Questions" for the use of Bible-classes and Sabbath-schools, the first published in this country, of which several hundred thousand copies were issued. Few ministers of the Presbyterian Church were more extensively known or more universally honored and respected than Rev. Dr. McDowell. Mr. Sutphen remained pastor of the church until April 6, 1866, when he removed to the city of New York. His successors in the pastoral office have been Rev. David A. Cunningham, D.D., 1866–76; Rev. Joshua L. Russell, 1877–82; Rev. M. M. Mangasarian, 1882. The Columbia Avenue Presbyterian Church, of which the Rev. William H. Hodge is pastor, grew out of a Sabbath-school organized in 1868, under the auspices of the church, and called the McDowell Memorial Sabbath-school of the Spring Garden Presbyterian Church. Under the charge of Mr. Mangasarian the Spring Garden Congregation is now one of the largest in the city.

Dr. McDowell's successors in the Central Church have been Rev. William Henry Green, D.D., Rev. Henry Steele Clark, D.D., Rev. Alfred H. Kellogg, D.D., Rev. John H. Munro, D.D. The encroachments of business and the change of population led to the sale of the church property, at the corner of Eighth and Cherry Streets, and the erection of a new and costly church edifice on Broad Street, above Fairmount Avenue.

What is now known as the West Arch Street Church was an offshoot from the Second Church. A school-room at the corner of Race and Juniper Streets was procured and fitted up for the services of the church and Sabbath-school. It was regularly organized, as the Eleventh Presbyterian Church, Nov. 26, 1828, by Rev. Drs. Ashbel Green, Thomas H. Skinner, and George C. Potts,—a committee appointed by the Presbytery of Philadelphia,—with twenty-two members, all of whom came from the Second Church. The Rev. John L. Grant, the first pastor, was installed Nov. 18, 1829. During his pastorate a church edifice was erected on Vine Street, above Eleventh. He resigned Feb. 11, 1850, and was succeeded by Rev. John Miller, D.D., May 13, 1851. The present edifice, on the corner of Arch and Eighteenth Streets, was dedicated Oct. 15, 1855. It contains eleven hundred sittings, and cost one hundred and three thousand five hundred and seventy dollars. Dr. Miller resigned Dec. 5, 1855, and his successors have been Rev. Jonathan Edwards, D.D., June 26, 1857, resigned March 12, 1866; Rev. A. A. Willetts, D.D., April 29, 1867; and Rev. John Hemphill, D.D., in 1882.

Dr. Ely remained in the pastorate of the Third Church twenty-one years. He resigned in 1835 to aid in the establishment of a college and theological seminary in Missouri. Among the ministers of his denomination Dr. Ely had, when at his prime, few superiors in talent, eloquence, position, influence, and power. He was stated clerk of the General Assembly for eleven years, and moderator of the Assembly in 1828. His activity in all schemes of charity and benevolence was boundless. It is said Jefferson Medical College owes its existence to him, as one of its trustees, for in its pecuniary straits he bought the lot and erected the building where it now stands. There is good reason for believing that his benefactions during his life amounted to nearly fifty thousand dollars. His entire fortune was sunk in the Missouri scheme. He returned to Philadelphia in 1844, and took charge of the First Church of the Northern Liberties. Dr. Ely's successor in the Third Church was the Rev. Thomas Brainerd, D.D. He was installed in March, 1837, and remained in its

charge for nearly thirty years, until his death. He was moderator of the General Assembly (New School) in 1864. During his pastorate he admitted some twelve hundred communicants to the Third Church. He died of apoplexy, at the residence of his daughter, in Scranton, Pa., Aug. 22, 1866. He was succeeded by Rev. Richard H. Allen, D.D., who remained in charge until Oct. 4, 1880, when he resigned, on his election to the office of secretary of the Presbyterian Board of Missions for Freedmen. He was succeeded by Rev. Hughs O. Gibbons, Oct. 4, 1881.

In 1832 the trustees of the First Church of the Northern Liberties purchased a lot of ground on the south side of Buttonwood between Fifth and Sixth Streets, ninety-two feet four inches front with a depth of one hundred and fifty feet, and proceeded to erect a new house of worship. The audience-room was opened May 12, 1833. The service of dedication was performed by Rev. Mr. Patterson. Mr. Patterson continued his ministry until his death, Nov. 17, 1837, in the fifty-ninth year of his age, the twenty-ninth of his ministry, and the twenty-fourth of his pastorate in this congregation.

The vacant pastorate was filled by the installation of the Rev. Daniel Lynn Carroll, D.D., Nov. 1, 1838. During his pastorate of five years and four months, the congregation was relieved from serious pecuniary embarrassment, and two hundred and fifty-nine new communicants were added to the church. Feeble health compelled him to resign Feb. 9, 1844. He was succeeded by the Rev. Ezra Stiles Ely, D.D., on Oct. 7, 1845, and who labored with great industry and fidelity until Aug. 23, 1851, when his ministry was brought to an abrupt end by paralysis. He lived nearly ten years longer, but never regained the power of intelligible speech. On April 15, 1852, he was released from the responsibilities of the office, and died June 16, 1861. The whole number of additions to the church during his ministry was two hundred and thirty-two. He was succeeded by Rev. Thomas James Shepherd, D.D., Oct. 3, 1852. In 1866, extensive alterations and improvements were made in the church building at a cost of $15,485.08. Dr. Shepherd continued in the discharge of the active duties of the pastorate for twenty-nine years. The following is an exhibit of some of the work performed by him: Funerals attended, 592; members received, 742; baptisms administered, 508; marriages solemnized, 322; prayer and inquiry meetings held, 3582; sermons, lectures, and addresses, 5139; visits made, 12,481; collections reported to Presbytery, $163,912.

Owing to failing health he was compelled to resign his charge July 3, 1881, but the congregation in recognition of his long and faithful pastorate honored him with the *Pastor Emeritus*.

Rev. Dr. Skinner was released from the Fifth Church, Dec. 13, 1832, to take the chair of Sacred Rhetoric in the theological seminary at Andover, Mass. His successors were Rev. George Duffield, D.D., 1835–36; Rev. Thomas T. Waterman, 1837–43; Rev. M. L. R. P. Thompson, 1844–48. The church, under the pressure of pecuniary embarrassment, was disbanded. The property was then purchased at sheriff's sale by a new congregation, and the Arch Street Church was organized on Feb. 6, 1850, by the Presbytery of Philadelphia, with twenty members, most of them from the Central Church. Rev. Charles Wadsworth, D.D., the first pastor, was installed March 20, 1850.

Dr. Wadsworth resigned April 3, 1862, to take charge of Calvary Presbyterian Church in San Francisco, Cal. He died in Philadelphia, April 1, 1882.

Dr. Wadsworth's successors were Rev. Nathaniel W. Conkling, D.D., 1863–68; Rev. John L. Withrow, D.D., 1868–73; Rev. Walter Q. Scott, D.D., 1874–78; Rev. John Scott Sands, D.D., 1880.

The following is a list of Presbyterian Church organizations in the city, with their date of formation as far as ascertained:

The Trustees of the General Assembly of the Presbyterian Church in the United States of America. George Junkin, president; Rev. William E. Schenck, D.D., vice-president; E. G. Woodward, treasurer.

Presbyterian Board of Publication. President, Rev. William P. Breed, D.D.; Vice-Presidents, Hon. Joseph Allison, LL.D., Rev. T. J. Shepherd, Rev. J. Addison Henry, D.D.; Corresponding Secretary, Rev. William E. Schenck, D.D.; Editorial Secretary, Rev. John W. Dulles, D.D.; Secretary of Sunday-school Work, Rev. James A. Worden, D.D.; Business Superintendent, John A. Black; Recording Clerk, Rev. W. M. Rice, D.D.; Treasurer, S. D. Powel.

Presbyterian Historical Society, 1229 Race Street. Rev. John Hall, D.D., New York, president; Rev. J. B. Dales, D.D., recording secretary; Rev. Douglass K. Turner, corresponding secretary and librarian; Rev. Mr. Ludwig, treasurer.

Presbyterian Board of Relief for Disabled Ministers and the Widows and Orphans of Deceased Ministers. Rev. V. D. Reed, D.D., president; A. C. Barclay, vice-president; Rev. George Hale, D.D., secretary; Rev. Charles Brown, treasurer.

Board of Education. Rev. F. J. Dripps, D.D., president; Rev. Robert M. Patterson, D.D., vice-president; Rev. Daniel W. Poor, D.D., corresponding secretary; E. G. Woodward, treasurer.

Chaplin Public Institutions. Rev. Alexander Heberton.

Trustees Presbyterian House. President, Samuel C. Perkins; Secretary, Rev. Thomas J. Shepherd, D.D.; Treasurer, Charles M. Lukens.

Churches.—Alexander, corner Nineteenth and Green Streets. Rev. John W. Bain.

Ann Carmichael (Memorial), Fifth Street and Erie Avenue.

Arch Street, Arch Street, above Tenth. Rev. John S. Sands. 1815.

Atonement, Wharton Street, above Broad. Rev. Edward E. Bruen. 1838.

Berean, South College Avenue, above Ridge Avenue. Rev. Matt. Anderson.

Bethany, Twenty-second and Bainbridge Streets. Rev. Arthur D. Pierson, D.D. 1860.

Betheada, southeast corner Frankford road and Vienna Street. Rev. W. T. Eva, D.D.

Bethlehem, northeast corner Broad and Diamond Streets. Rev. B. L. Agnew, pastor elect.

Ninth, Susquehanna Avenue and Hancock Street. Rev. James Crowe, D.D.
North, Master Street, above Fifteenth. Rev. J. Q. A. McDowell.

THE BAPTISTS.

The Baptist denomination forms one of the most numerous and prosperous bodies of believers in the United States. The persecutions that they often suffered in colonial times knit them closely together, and doubly intensified their zeal. The rapidity of their growth during the past fifty years has been the surprise of all unprejudiced observers. Dr. Cathcart, in his "Baptist Encyclopædia" (Philadelphia, 1883), states that there were then 24,794 churches, 15,401 ministers, 2,200,000 members, and probably 5,000,000 adherents of the Baptist denomination in the United States. "This," Dr. Cathcart proceeds, "does not include denominations that hold believers' immersion, but are not regular Baptists, such as Old School Baptists, Winebrennarians, or Church of God, Seventh-Day Baptists, Six-Principle Baptists, Tunkers, Disciples, Adventists, and Free-Will Baptists. These communities have 6951 churches and 615,541 members." They have organized, on the most extensive scale, various Bible, missionary, and publication societies, and have been among the foremost to occupy the frontiers. Dr. Baird, in his scholarly and impartial work on "Religions in America," concludes his chapter on the Baptists by describing their ministry as comprehending a body of men who, in point of talent, learning, and eloquence, as well as devoted piety, have no superiors in the country." This was written in 1844, and since then the educational facilities offered to Baptists have been very greatly improved.

Baptism by immersion, the distinctive rite of the Baptist Churches, has had its believers in every age of the Christian world. The Paulicians of Armenia, whose missionaries wandered from house to house, over Southeastern and Central Europe, and from whose teachings the Albigenses sprung, were Baptists, as also were the no less heroic Henricians and Petrobusians. The Anabaptists of the sixteenth century brought disrepute on the cause by their excesses; but Anabaptists were not always such desperate fanatics as Münzer, Storck, and Melchior Hoffman. Zwingli and the leaders of the Swiss Baptists showed in their "Confession" of 1527 the wisest and most statesmanlike views. Besides these there were mystical and speculative Anabaptists, such as Schwenkfeldt, Sebastian, Denk, Haetzer, men of widely-differing views, from the extreme mysticism of the last named to the materialism and rationalism of Socinus and Michael Servetus, the martyr to ultra-Calvinism. Baptists of every shade and degree of orthodoxy have contributed a glorious list to the martyrology of the church militant since the days when armies were sent against the Thracian and Bosnian Christians, and other armies hunted defenseless Albigenses through Swiss defiles and valleys of France. The denomination numbers many adherents in Europe in modern times. In England, founded in the days of Luther's Reformation, and growing in spite of persecution, it now has two great divisions,—the "general" and the "particular,"—the latter being most numerous. They have 2620 churches, and a membership of 269,836.

Orthodox Baptists are Calvinistic in theology. The Philadelphia Association, the oldest in America, organized in 1707, based its famous "Confession of Faith" upon that of the London Association of 1689, and both agree, in the main, with the Westminster on doctrinal points, representing one of the strictest forms of Calvinism, approaching the views of Dr. Gill, and now maintained by the primitive Old-School or strict Baptists. The Philadelphia Confession of Faith, which was adopted by the Baptist Association of this city on September 25, 1742, was printed by Benjamin Franklin in 1743. A fac-simile of the title-page appears above. About forty-five years ago the New Hampshire Baptist Convention

A
CONFESSION
OF
FAITH,
Put forth by the
Elders and *Brethren*
Of many
CONGREGATIONS
OF
CHRISTIANS
(Baptized upon Profeſſion of their Faith)
In *London* and the *Country*.

Adopted by the Baptiſt ASSOCIATION
met at Philadelphia, Sept. 25. 1742.

The SIXTH EDITION.

PHILADELPHIA: Printed by B. FRANKLIN.
M,DCC,XLIII.

adopted a "Declaration" that since has been generally approved of by the churches, being a more moderate form of Calvinism, much like the doctrine preached by Dr. Andrew Fuller. Baptists usually hold to the doctrine of close communion as regards the sacramental feast. They do not believe in the baptism of infants, but lay stress upon the importance of believers' baptism. They believe that the command to baptize is a command to immerse, and nothing less. In their church government they are independents, each separate church having the right to elect and license ministers, and to choose elders. They have district and general Associations and State Conventions, but these ecclesiastical assemblies never interfere with the affairs of individual churches.

Pennsylvania occupies so important a place in the Baptist record that it might well be called the keystone State of their polity. Here the Baptists throve unmolested, and amply did they repay the debt when the dark days of the Revolution came, by the unflinching support they gave to the patriot cause. Roger Williams' church, at Providence, organized in 1639, was the first Baptist Church in America. Massachusetts had one in 1663, New York one about 1669, Maine one in 1682, and South Carolina one in 1683, but the first one that Pennsylvania possessed was organized about 1684, by Rev. Thomas Dungan, of Rhode Island, at Cold Spring, near Bristol, in Bucks County. This church did not prove permanent; but about three years later the second and permanent church was established at Pennepek, or Lower Dublin, in Philadelphia County. Rev. Mr. Henson, in his historical sermon to the Philadelphia Association of 1876, says that in 1682 there was in all Pennsylvania only one Baptist, and that one was "a little girl just come from Wales, and her name was Mary Davies." She was "the standard-bearer of the host," for now there are twenty-three Associations, five hundred and sixty-eight churches, and sixty-four thousand five hundred and two members within the State.

After his death, and perhaps for a short time before, William Kinnersley, father of the noted Rev. Ebenezer Kinnersley, acted as pastor. In 1725, Rev. Jenkin Jones became minister, and so continued for twenty-one years.[1] The church-building at Pennepek, erected in 1707, on an acre lot, gift of Rev. Samuel Jones, was twenty-five feet square. Some years later three acres more were added to the tract. In 1746, Mr. Jones was called to the Philadelphia charge, and Rev. Peter Peterson Van Horn, born in Bucks County, and bred a Lutheran, became the Pennepek pastor, remaining fifteen years there. Part of the time George Eaton, an exhorter, was assistant.

In April, 1824, the representatives of the Baptist denomination met in the Sansom Street Church, and organized a Foreign Mission Society. The Association had sent money to Burmah and India many years before, and had sent evangelists toward the South and West. In 1827 the Baptist Missionary Association of Pennsylvania was organized, and its annual income is now over fifteen thousand dollars. In 1826 the Baptist Tract Society of Washington was moved to Philadelphia, and in 1845 became the American Baptist Publication Society. The work of this society has grown to be something enormous. Their total number of publications in 1881 was 1326. The printed material issued between 1824 and 1881, is 5,311,320,610, 18mo size. The total receipts were $373.80 in 1824, but in 1880 were $349,564.46. In 1876 the society occupied its marble building at 1420 Chestnut Street, erected at a cost of $258,000. The missionary work and colportage agencies have grown wonderfully. Since 1840 nearly fifteen hundred such laborers have been used, and they are now to be found in all the States and Territories. The Sunday-school work began in 1867, and twenty-one such missionaries were in the field in 1881. They have already organized over four thousand Sabbath-schools, and distributed a vast quantity of Bibles, tracts, books, and periodicals.

"The Baptist Year Book" for 1883 gives to this denomination in this country 26,931 churches, 17,090 ministers, and 2,894,742 members. This membership indicates a Baptist population, old and young, of probably eight millions. The Regular Baptists of the United States had in 1883 forty-one colleges and theological seminaries, and over a hundred first-class academies. They had also seventy-five religious periodicals, whose influence is immense.

The Rev. Joseph Hughes, a Baptist, was instrumental in founding the first Bible Society that ever existed,—the British and Foreign; through the Rev. Dr. William Carey, a Baptist, the first great Protestant society for missions among the heathen was established, and he became its pioneer. Baptists have been among the foremost to occupy the extended frontiers of our own country.

In common with the Greek Church in Russia, Greece, and elsewhere, at the present time, and all the churches of the East, and in common with all the churches of the West, for centuries after they were instituted, Baptists practice immersion. They retain this form solely because it was required and observed, as they believe, by Christ and his Apostles. They deny that salvation reaches the soul by any ceremony however sacred.

They hold that faith alone saves men, and that all candidates for baptism should be true believers, and not unconscious babes or unconverted adults. After

[1] Samuel Jones was born July 9, 1657, in Radnor County, Wales, and came to America in 1686. Rev. Abel Morgan was born in 1637, at Alltgoch, County Cardigan, Wales, and began preaching at the age of nineteen. He compiled a folio concordance in Welsh, and translated the "Century Confession" into that language. He took a prominent part in the meetings of the Philadelphia Association, and was one of the earliest advocates for more thorough ministerial education. He was buried in Philadelphia. Rev. Jenkin Jones was born in 1686, in Llandydoch, Wales, reached America in 1710, and preached at the Welsh Tract, Del., in 1724.

the ages of comparative purity in the Christian churches had passed away, communities sprang up in various quarters which held the leading doctrines, doubtless with some errors, of the Baptists. Many noble men during the progress of the Reformation adopted the sentiments of Baptists, about faith as a prerequisite to baptism and church membership, the exclusion of unworthy members from the church, and the sinfulness of supporting ministers of any denomination by public taxation. The fanatics of Münster, with no more relationship to the true Baptists of that day than the Mormons sustain to American Baptists, inflicted infamy upon hosts of men all over Europe, who held, with some defects, the great doctrines of the Baptist Churches of this land.

Baptists have contributed a glorious host of martyrs to the church militant from the death of Stephen, the first martyr. In the times of the "ten great persecutions," in succeeding centuries, partially stained with saintly blood, in the days when hordes equipped for slaughter hunted the Thracian and Bosnian Christians, and other armies pursued defenseless Albigenses, until the flames or the sword gave them a heavenly throne, men holding our chief doctrines were terrible sufferers.

The English Baptists are divided into two bodies, known as General and Particular Baptists. The names were originally intended to describe the views of the atonement held by these communities. The Particular Baptists are much more numerous than the General. In 1881 the English Baptists had two thousand six hundred and twenty churches, with a membership of two hundred and sixty-nine thousand eight hundred and thirty-six.

Regular Baptists are Calvinists. The Philadelphia Baptist Association, organized in 1707, the oldest in America, adopted as its "Confession of Faith," in 1742, the London Confession of 1689, with two additional articles. This creed agrees in all purely doctrinal articles with the Westminster Confession of Faith, the venerable confession of all British Presbyterians and of all American Presbyterians of British origin. The Philadelphia Confession was commonly adopted by the early Baptist Churches in America, and it is still recognized by many of their successors. As printed in full the Philadelphia Confession occupies eleven pages, and the New Hampshire Confession one page and a quarter. The latter creed was adopted about forty-five years since by the New Hampshire Baptist Convention, and because of its brevity and its accessibility, it is now commonly accepted by churches just formed. In it, Dr. J. Newton Brown, its author, gives up no doctrine in the older confession, but he presents Calvinism in mild terms. In doctrines Baptists stand upon the platform of the Apostle Paul with their Presbyterian brethren, a platform upon which the XVII. Article of the Thirty-nine Articles places the Church of England.

All denominations observing the holy communion, except a small body of English Baptists, require baptism before participation in the sacred Supper. The Episcopalians and older communities make confirmation and baptism prerequisites to the Lord's table. Baptists hold the common doctrine of Christendom about baptism preceding the Eucharist, and as they believe that immersion alone is Scripture baptism, they only invite immersed believers to the precious emblems of the Saviour's body and blood. They love their own unbaptized converts tenderly, because they regard them as already saved by faith, but they never bring them to the communion. They love all the children of God from Fénelon, the Catholic, to Penn, the Quaker; but while cultivating a glowing charity for believers of all names, they cherish a conscience void of offense before God by holding tenaciously the teachings of his blessed Book.

In their church government they are Congregationalists. Each church is independent of every other. It receives and excludes members. It grants a license to preach to one of them, and when his ordination is mutually desired, it calls a council composed of the pastor and one or two laymen from each of several neighboring churches, who unite with a committee representing the church, and ordain, if they are satisfied, the candidate for the ministry called to the sacred office by the church.

They have District and General Associations and State Conventions, but these assemblies can only recommend measures to the churches. They can exercise neither the functions of a court nor of a legislature.

Baptists have ever gloried in proclaiming absolute religious liberty. They have always held that no man should be persecuted, even in the mildest form, for his religious opinions, and that his property should never be taken by due process of law for the support of any State church; that no civil disability should punish any citizen for the unhappy defectiveness or the unwise expansiveness of his creed, even for his absolute disbelief of everything sacred. With them Jehovah alone is the Lord of conscience. Leonard Busbee, of London, preceded and followed by many kindred spirits, published a tract in 1614 on liberty of conscience, in which he says, "And the king and Parliament may please to permit [liberty to] all sorts of Christians; yea to Jews, Turks, and Pagans, so long as they are peaceable and no malefactors." Rhode Island government was the first on earth, under the promptings of its Baptist founders, to establish absolute liberty of conscience. This doctrine has marked the Baptists throughout their entire history.

Pennsylvania furnished a peaceful home for Baptists from its first settlement as a Quaker colony. In it they flourished largely, considering the Presbyterian, Lutheran, and Quaker principles of nine-tenths of all its European settlers. The First Church of Providence, founded in 1639, is commonly supposed to have been the first Baptist Church in this

country. Massachusetts had one in 1663, Maine one in 1682, and South Carolina one in 1683.

The Pennepek (or Lower Dublin) Baptist Church is the sacred spot from which an influence radiated, and pioneer ministers went forth throughout New Jersey and Pennsylvania. Its present edifice, the third built upon the same piece of ground, stands in the Twenty-third Ward of Philadelphia, near the softly-flowing and tree-bordered Pennepek [or Pennypack] Creek. The story of its organization is a remarkable one. Elias Keach, son of the celebrated Benjamin Keach, of London, a Baptist minister and author, arrived in Philadelphia in 1686. He was "a very wild young spark," plucky, talented, audacious, and well posted on Biblical quotations and theological phrases. For the purpose of obtaining amusement he dressed in black, wore a band, and pretended to be a minister. As clergymen of all denominations were scarce, he soon had an invitation to preach "in the house of a Baptist at Lower Dublin." A large congregation assembled, and he began to preach, and, says Rev. Morgan Edwards, "he performed well enough until he had advanced pretty far into the sermon; then, stopping short, he looked like a man astonished. The audience concluded that he had been seized with a sudden disorder, but, on asking what the matter was, received from him a confession of the imposture, with tears in his eyes and much trembling. Great was his distress, though it ended happily, for from this time he dated his conversion. He heard there was a Baptist minister at Cold Spring, in Bucks County, between Bristol and Trenton. To him did he repair to seek counsel and comfort, and by him was he baptized." In January, 1688, he formed a church of twelve persons at Pennepek, and became their minister. These twelve were Elias Keach, John Eaton, George Eaton and his wife, Jane, Sarah Eaton, Samuel Jones, John Baker, Samuel Vaus, Joseph Ashton and Jane, his wife, William Fisher, and John Watts. The last four were baptized in the Pennepek. Samuel Vaus was chosen deacon, and Mr. Keach began to establish "missions," or preaching stations.

He preached and baptized at the Falls (Trenton), Cold Spring, Cohansey, near Bridgeton, N. J., Salem, Penn's Neck, Middleton, Burlington, and Philadelphia. "They were all one church, and Pennepek the point of union," says Morgan Edwards, and he explains that as many of the communicants as possible met there, but for the sake of distant members there were quarterly administrations of the Lord's Supper at Burlington, Cohansey, Chester, and Philadelphia. Cohansey, Middletown, and Piscataway, N. J., became separate churches within three years. Baptist emigrants from abroad and from other colonies increased the strength of these and other churches. In 1692, Rev. Elias Keach[1] returned to London, and there organized a church, baptizing one hundred and thirty persons in nine months. Rev. John Watts, who became his successor at Pennepek, had been baptized there by Elias Keach, Nov. 21, 1687, and called to the ministry the following year. He continued in the Pennepek pastorate until his death (from smallpox), Aug. 27, 1702. His wife was Sarah Eaton, also one of the original twelve members, and they had six children.

Religious controversies began in 1697 at the Pennepek Church. When William Davis, who had left the Friends at the same time with the noted George Keith, joined the Baptist communion, and soon commenced to air his own doctrinal views, finally publishing, in 1700, a book entitled "Jesus, the Crucified Man, the Eternal Son of God," the blending of the divine and the human natures, the God-Man, in short, without being properly God or man was the theme. Davis was expelled for heresy in 1698, and joined the Seventh-Day Baptists. Rev. John Watts wrote a reply to his book, "Davis Disabled," and it was, in 1705, ordered printed, though for some reason this was never done. This controversy may have helped to decide Rev. Elias Keach's departure.

The congregation in the city of Philadelphia was small at first, and so arranged harmoniously with the few Presbyterians, about April, 1695, to use the same building together. Rev. John Watts agreed to preach every other Sabbath, and Presbyterian ministers could usually be procured for the alternate Sabbaths, and so, for three years, the two congregations managed, doubtless often hearing each other's sermons. John Holme, author of "A True Relation of the Flourishing State of Pennsylvania," was the first Baptist in Philadelphia of whom we have record, having arrived in 1686. He became a judge of the Provincial Court in 1691, and a few years later removed to Salem, N. J. In 1696, John Farmer and wife arrived from London, and the next year Joseph Todd and Rebecca Woosencroft, of Limmington, Hampshire, William Elton and wife, Mary Shepherd, and William Silverstone, making, with those before named, nine church-members, completed the little group who met on the second Sunday in December, 1698, in the store-house on the lot of the Barbadoes Company, northwest corner of Chestnut and Second Streets, to organize a Baptist Church. They were few and weak, and for forty-eight years the feeble church was supplied by Rev. Elias Keach, Rev. John Watts, Rev. Thomas Killingworth, then at Cohansey, and others, there being no settled pastor. But when they first organized, in 1698, trouble arose with the Presbyterians, who had just secured Rev. Jedediah Andrews as pastor, and showed some desire to occupy the store-house entirely by themselves. The following letter was then sent:

[1] Elias Keach was born in London in 1667; married a daughter of Chief Justice Nicholas Moore, of Pennsylvania; died, in 1701, aged thirty-four years. He often preached to a congregation of fifteen hundred persons and the church he founded in Pennepek was long the nucleus of the Baptists in several colonies.

"To our dear and well-beloved friends and brethren, Mr. Jedediah Andrews, John Green, Joshua Story, and Samuel Richardson, and the rest of the Presbyterian judgment belonging to the meeting in Philadelphia: The Church of Christ, baptized on confession of faith, over which Rev. John Watts is pastor, send salutation of grace, mercy, and peace, from God our Father and from our Lord Jesus Christ. Dearly beloved: Having seriously, and in the fear of God, considered our duties of love to and bearing with one another, and receiving the weak in faith, and knowing that love, peace, and unity tend much to the honor of Christ and Christianity, and to the conviction and conversion of sinners, and the comfort and establishment of believers, and being desirous of your company heavenward as far as may be, and as much as we can to heal the breach betwixt us, occasioned by our difference in judgment (none being yet perfect in knowledge), we have thought it necessary to make you this proposition following for peace (as being the necessary term upon which we may safely, comfortably, and peaceably hold Christian communion together in the things wherein we agree in the public worship of God and common duties of religion, as in prayer, preaching, praising God, reading and hearing the Word), viz.: we do freely confess and premise for ourselves that we can and do own and allow of your approved ministers, who are fitly qualified and sound in the faith, and of holy lives, to pray and preach in our assemblies. If you can also freely confess and promise for yourselves that you can and will own and allow of our approved ministers, who are fitly qualified and sound in the faith, and of holy lives, to preach in your assemblies; that so each side may own, embrace, and accept of each other as fellow-brethren and ministers of Christ, and hold and maintain Christian communion and fellowship. Unto which proposition for peace (that further disputes and vain janglings may be prevented) we shall desire, if you please, your plain and direct answer, that it may be left for us at Widow Elton's house, in Philadelphia. Subscribed in behalf of the rest of the congregation the 30th of 8th month [October], 1698.

"JOHN WATTS, "THOMAS BIBB,
"SAMUEL JONES, "THOMES POTTS."
"GEORGE EATON,

The Presbyterians sent, on November 3d, a reply signed by Rev. Andrews, John Green, Samuel Richardson, David Giffing, Herbert Corry, John Vanlear, and Daniel Green, requesting a conference, which was afterward appointed for Saturday, November 19th, at the common meeting-house in the store on the Barbadoes lot. Messrs. Watts, Jones, and Morgan went there at the proper time, but found none of the Presbyterians, and none came, though sent for. Late in the afternoon, before leaving the house, the three Baptists wrote a letter, saying that they were disappointed, and added, "Considering what the desires of divers people are, and how they stand affected, and that we are not likely to receive answer to our reasonable proposition, necessity constrains us to meet apart from you until such time as we receive an answer, and we are assured that you can own us so as we can do you, though we still remain the same as before, and stand by what we have written."

The next day they met at Anthony Morris' brew-house, under the bank and near the dock. Rev. Morgan Edwards writes,—

"This was what the Presbyterians wanted in reality, as more plainly appeared soon after, particularly in a letter directed to one Thomas Revell, of Burlington, and signed 'Jedediah Andrews,' wherein are these words: 'Though we have got the Anabaptists out of the house, yet our continuance there is uncertain, and therefore must think of building, notwithstanding our poverty.'"

This little congregation met contentedly in the brew-house for several years, and while there penned a lengthy reply to a letter from Rev. Thomas Clayton, the minister of the Church of England, asking them to return to the Episcopalian fold. It runs as follows:

"*Sir*,—Whereas we received a letter invitatory from you to return to your Church of England (dated Sept. 26, 1698), wherein you desire us to send you in humility and without prejudice the objections why we may not be united in one community, and withal that you doubt not but by the blessing and assistance of God you will be able to show them to be stumbling blocks made by our wills and not by our reason; and some of us, in behalf of the rest, having, on the reception thereof, given you a visit and had discourse with you concerning some of the ceremonies of your church (about which you gave no satisfaction), we knew not that you expected any other answer from us; but in your late letter to John Watts you signify that you have received no answer to your former letter. We, therefore, taking this into consideration, do signify in answer to your foresaid invitation and proposal that to rend from a rightly constituted church of Christ is that which our souls abhor, and that love, peace, and unity with all Christians, and concord and agreement in the true faith and worship of God are that which we greatly desire, and we should be glad if yourself or others would inform us whenever we err from the truth and ways of Christ. Nor are we averse to a reconciliation with the Church of England, provided it can be proved by the Holy Scriptures that her constitution, orders, officers, worship, and service are of divine appointment, and not of human invention. And since you, yourself, are the person that has given us the invitation, and hath promised to show us that our objections are stumbling blocks made by our wills and not by our reason; and we, understanding that our Lord Jesus Christ is the only Head, King, Lord, and lawgiver of his Church, whom all are bound to hear and obey under the severe penalty of an utter extermination from among the people of God; and that his laws and will are only to be found in and known by sacred Scriptures, which are the only supreme, sufficient, and standing rule of all faith and worship; and not understanding the constitution of your church (with all the orders, officers, worship, and service at this day in use and maintained therein) to be agreeable to and warranted thereby, hath been the cause of our separation from her, and is the objection we have to make, or the stumbling block which lies in our way to such a union and communion as you desire. We therefore hope and expect, according to your promise, that you will endeavor its removal by showing us from Holy Scripture these two things, as absolutely necessary in order thereunto:

"I. That the formation of your church, with all the orders, officers, rites, and ceremonies now in use and practice therein are of divine institution

"Particularly that the Church of Christ under the New Testament may consist or may be made up of a mixed multitude and their seed, even all that are members of a nation who are willing to go under the denomination of Christians, whether they are godly or ungodly, holy or profane.

"That lords archbishops and diocesan lords bishops, such as are now in England, are of divine institution and appointment.

"That the government of the Church of Christ, under the gospel, is to be prelatical, according as it is practiced this day in your church, and that your ecclesiastical courts are of divine appointment.

"That particular churches or congregations, whether ministers or elders, who have power and authority to receive persons with memberships have not likewise authority (by Matthew xviii. 15–18; 1 Corinthians v.) to execute church censures and excommunication upon miscreants, swearers, liars, drunkards, adulterers, Jews, Atheists, etc.; but that it is by divine appointment that they must be presented to their ordinaries, and only proceeded against in your ecclesiastical courts.

"That the several offices of deans, subdeans, chapters, archdeacons, prebendaries, chancellors, commissaries, officials, registers, canons, petty canons, vicars, chorals, apparitors, organists, vergers, singing men and boys, septins, epistlers, gospelors, and such like offices and officers of your church and ecclesiastical courts, are of divine institution or have any Scripture warrant to justify them and to bear them harmless on the last day.

"That unpreaching ministers may celebrate the sacraments by Scripture warrant.

"That their different apparel, in time of divine service, such as hoods, tippets, surplices, etc., are of divine institution or have any Scripture warrant in the New Testament.

"That the manner of the public service and liturgy of the Church of England, with the visitation of the sick, burial of the dead, churching of women, matrimony, etc., as now in use, are of divine appointment.

"That the people ought by the rule of God's Word, and only with the minister, to say the confession, Lord's prayer, and the creed, and make

such answers to the public prayers as are appointed in the book of common prayer.

"That it is God's holy will and pleasure that saints' days or holy days should be kept and observed by Christians, according to the use of the Church of England.

"That instruments of music are to be used in God's worship by the New Testament.

"That infant baptism is a duty.

"That pouring or sprinkling water is the proper way of baptizing.

"That your manner of administering the sacraments and signing with the sign of the cross in baptism are of divine appointment.

"These are some of the things we desire you to prove and make plain to us by the Holy Scriptures. But if the case is such that some or all of them cannot be, then the

"II. Thing necessary to our reconciliation with your church is that you will give us clear and infallible proof from God's holy Word, such as will bear us harmless in the last day, that our Lord Jesus Christ has given power and authority to any man, men, Convocation, or Synod, to make, constitute, and set up any other laws, orders, officers, rites, and ceremonies in his church, besides those which he hath appointed in his holy Word, or to alter or change those which he hath therein appointed, according as may from time to time to them seem convenient, and that we are bound in conscience toward God by the authority of His Word to yield obedience thereunto, or whether it will not rather be a sure reflection upon the sufficiency of the Holy Scriptures and a high defamation of the kingly and prophetical offices of Jesus Christ to suppose such a thing.

"Thus we have in humility and without prejudice sent you our objections, and if you can, according to your letter, show them to be stumbling blocks, made by our wills and not by our reason, we shall be very thankful, and you shall not find us obstinate, but ready to accept your invitation. But until you do so, and prove the constitution, orders, rites and ceremonies of your church to be of God, it is but reason, that you should suspend all charge of schism against us, and desist from blaming us for our peaceable separation. Which is all at present from your loving friends, who desire information and unity among saints, and the churches' peace, that God may be glorified through our Lord Jesus Christ. Amen.

"Subscribed by us, members of the general meeting, in behalf of the rest, March 11, 1699.

"JOHN WATTS,
"JOSEPH WOOD,
"GEORGE EAGLESFIELD,
"SAMUEL JONES.
"GEORGE EATON,
"THOMAS BIBB."

George Keith, an impetuous Scotchman, left the Orthodox Quakers in 1691, with his friends, and after holding together for a few years as Keithian Quakers, and publishing a "Confession of Faith," some were reconciled. Keith himself turned Episcopalian, and many became Baptists, and were called Quaker Baptists, because they retained the garb and language of their earlier associations. At Upper Providence, in Chester County, in 1697, several Keithians were baptized, and the same year Rev. Thomas Killingworth baptized two men, formerly Quaker preachers, one of whom, Thomas Rutter, soon preached in Philadelphia, and baptized Henry Koster, Thomas Peart, and seven others. These nine organized a church of Keithian Baptists, June 12, 1698, choosing Thomas Rutter as their minister, and held services in the meeting-house on Second Street below Mulberry. Another society of Keithians met in Lower Dublin township, at the house of Abraham Pratt. John Wells left them Sept. 27, 1697, joining the Baptists. William Davis, expelled from Pennepek, joined them in 1698. Abraham Pratt and wife, David Price and wife, Richard Wansell, Margaret Davis, Martha Deal, Peter Deal, Richard Wells, Richard Sparks, Nicholas Ashmead, Alexander Babcock, and others also joined this society. In 1701 the changeable Keithians became exercised over the proper day for observance as the Sabbath. The dispute shattered the congregations, and most of the members became Seventh-Day Baptists forthwith, though many joined the regular Baptists. They had three Seventh-Day Churches in Chester County, but only one in Philadelphia County, that at Pennepek, established in 1701. The next year this last built a church, but in 1711 their pastor, Rev. William Davis, deserted them, but the Wells, Wansells, Pratts, and Ashmeads clung to the cause, and in 1770 they still had nine members. In 1716, Richard Sparks, a carpenter, left a plot of ground as a cemetery for Seventh-Day Baptists, the piece being "one hundred feet of the back end of a lot on the south side of High Street, Philadelphia." There yet remains a small portion of this lot, walled in, on Fifth Street, and there may be seen a marble tablet inscribed to the memory of Sparks.

The Regular Baptist Church at Pennepek, on the death of Mr. Watts, in 1702, elected Rev. Evan Morgan as their pastor. Mr. Morgan left the Quakers with the Keithians in 1691, was baptized in 1697, and ordained in 1706. He died Feb. 16, 1709. Rev. Samuel Jones was ordained with Mr. Morgan, with whom he was co-pastor in 1706. He was born in Wales in 1657, and baptized in his native country in 1683, and died Feb. 3, 1722. Rev. Joseph Wood was born in England in 1659, and baptized in Burlington, N. J., in June, 1691, and was ordained at Pennepek, in September, 1708, where "he took part of the ministry with Mr. Evan Morgan and Mr. Samuel Jones." He died in September, 1747. Abel Morgan was born at Altgoch, Cardiganshire, Wales, in 1673, began preaching at nineteen, arrived in this country in February, 1711, and took charge of the Pennepek Church, officiating regularly in Philadelphia and in the mother community. He compiled a folio concordance in Welsh, into which he translated the "Century Confession." He took a prominent part in the meetings of the Philadelphia Association, and earnestly advocated a thorough education for the ministry. Mr. Morgan was distinguished for his ability and piety. He died in December, 1722. The gravestone originally marking the resting-place of his remains in Philadelphia now occupies a place in the vestibule of the First Baptist Church, Philadelphia, with other monuments of venerated pastors of that honored mother of churches. Rev. Jenkin Jones was born about 1686, in Llandydoch, Wales, arrived in America in 1710, and became pastor of the Pennepek Church in June, 1726. He had William Kinnersley as one of his assistants, the father of Professor Ebenezer Kinnersley. He held this position until May, 1746, preaching in Philadelphia, where he resided, as well as in Pennepek. The church building at Pennepek, erected in 1707, on an acre lot, the

ift of Rev. Samuel Jones, was twenty-five feet square. Some years after the house was completed three acres were added to the church lot.

The Philadelphia Church during this period, and indeed until 1746, was considered as a part of Pennepek, and the same pastors supplied both. After March 15, 1707, meetings were held with the Keithians on Second Street, below Mulberry. In 1711, Rev. Thomas Selby and Rev. John Burrows quarreling, the former caused a disturbance in the congregation, and a number left, but the labors of Rev. Abel Morgan checked the disorder, and Selby two years later left the city. The wooden building was too small, and in 1731 it was taken down, and a brick house, forty-two feet by thirty feet, erected. The long controversy with Christ Church as to the ownership of the lot had been settled by a compromise, which left the Baptists in possession. Rev. Ebenezer Kinnersley was a licentiate of this church before being ordained, and on July 6, 1740, he denounced the sensationalism of some of Whitefield's imitators, as shown by a sermon that day in the Baptist pulpit preached by Rev. John Rowland, a Presbyterian, and he "entered a solemn protest" against Whitefield's methods. The excitement which followed was so intense that Kinnersley, according to Sprague's "Annals of the Baptist Pulpit," was "actually forbidden the communion." In 1743, however, he was ordained, and preached at times in Philadelphia until 1746, when Rev. Jenkin Jones took permanent charge of that church.[1] The question was raised in 1746 as to whether legacies conferred on the Philadelphia Church did not partly belong to Pennepek, the parent and superior. There was no claim made, but it was thought best for the Philadelphia Church to incorporate, which they did, May 15th, with the following members: Jenkin Jones, Ebenezer Kinnersley, William Branson, Andrew Edge, Thomas Pearse, Stephen Anthony, Augustin Stillman, Samuel Ashmead, Matthew Ingles, John Perkins, John Standeland, Robert Shewell, John Biddle, Joseph Crean, Henry Hartley, John Lewis, Joseph Ingles, Samuel Burkilo, John Catla, Thomas Byles, John Bazeley, Samuel Morgan, Lewis Rees, Mary Sandeland, Hannah Farmer, Mary Catla, Ann Yerkes, Mary Burkilo, Mary Prig, Hannah Crean, Ann Davis, Hannah Bazeley, Jane Giffin, Edith Bazeley, Alice Clark, Lavinia Greenman, Mary Ball, Uslaw Lewis, Jane Loxley, Esther Ashmead, Hannah Jones, Sarah Branson, Catherine Anthony, Jane Pearse, Mary Edge, Mary Valecot, Elizabeth Shewell, Mary Middleton, Francis Holwell, Elizabeth Sallows, Mary Morgan, Ann Hall, Phebe Hartley, Ann White.

One of the great steps forward made during this period was the formation of the Philadelphia Association in 1707, composed of the churches at Pennepek, Middletown, Piscataway, Cohansey, and Welsh Tract. In 1712 the difficulty between Rev. Thomas Selby and the Philadelphia Church was referred to the Association, and both sides were censured. The members were required to pay Selby what they had agreed, and he was discharged "as an unfit person." In 1724 the Association answered in the negative the question, "Whether a believer may marry an unbeliever without coming under church censure for it?"

Rev. Peter Peterson Vanhorne, the eighth pastor of the Pennepek Church, was born in August, 1719, at Middletown, Bucks Co. He was baptized in September, 1741, and ordained in June, 1747, as pastor of Pennepek, where he labored successfully until February, 1762, when he resigned.

Rev. Samuel Jones became the ninth pastor of that church in 1763, preaching also at Southampton until 1770, when he devoted himself entirely to the former until his death, Feb. 7, 1814. He established a theological school near Pennepek, and published some sermons and other religious works. The deacons during this period were Crispin Collet, 1747–58; Thomas Webster, 1758–75; James Dungan and Joseph Ingles were chosen in March, 1775. John Vansandt was made ruling elder June 18, 1747. In 1763, William Marshall held the office (not used after 1770). In 1770 a new church of stone was built, thirty-three feet long and thirty feet wide, with pulpit in one corner, and galleries in the other corners. The church members in 1761 numbered fifty, the congregation and members three hundred; in 1763 the members were fifty-eight; in 1770, fifty; and in 1774, sixty-three. George Eaton in 1764 bequeathed five pounds and an acre of land to the Pennepek Church.

The church in Philadelphia lost its pastor, Rev. Jenkin Jones, by death, July 16, 1760. He served long and faithfully, and did much to build up the church. No regular pastor was secured till Rev. Morgan Edwards arrived from England, May 23, 1761, and immediately was called to the First Church, remaining there until 1771, when he resigned, and was elected "evangelist" by the Baptist Association. Morgan Edwards was one of the remarkable men of that time, highly educated, original, and earnest in all he did or said. He was born in May, 1772, in Wales, began to preach at the age of sixteen, and studied at the Baptist Seminary, Bristol. He published a number of sermons and treatises, but his great work was his "Materials toward a History of the American Baptists," of which two volumes referring to Pennsylvania and New Jersey were published, one in 1770, another in 1792. He also left many manuscripts, some of them of much historical value. Jan. 1, 1770, he preached the sermon that will always be quoted against him. It was from the text, "This

[1] Ebenezer Kinnersley became one of the most eminent scientific men of his time, a friend and a co-worker with Franklin, a member of the American Philosophical Society, and professor in the University of Pennsylvania, where a memorial window commemorates his worth. Born in Gloucester, England, he spent his childhood and youth at Pennepek. He died July 4, 1778.

year thou shalt die," and he applied it to himself, having had a "presentiment," but he did not die, living for twenty-five years afterward. A little later he sided with England in the great struggle, having a son in the British service, and was, it is said, the only Tory Baptist minister in America. He lived quietly in Delaware, supplying vacancies and gathering materials for his history. His death occurred Jan. 28, 1795. Dr. Cathcart has called attention to Morgan Edwards' services to the cause of Baptist education. He was the prime mover in establishing Brown University (then Rhode Island College). It was singular that the first student of this college, William Rogers, born in Newport in 1751, ordained in 1771, should be Morgan Edwards' successor in the Philadelphia Church, taking charge in 1772. He preached the funeral sermon of his predecessor, in which, speaking of the famous Tory principles, he said, "For any person to have been so marked out in those days was enough to bring on political opposition and destruction of property, all of which took place with respect to Mr. Edwards, though he never harbored the thought of doing the least injury to the United States or of abetting the cause of our enemies."

The First Baptist Church in 1762 tore down their building and erected a larger one, also of brick, sixty-one feet long and forty-two feet wide, with pews and galleries. It cost two thousand two hundred pounds, and was on Ledger Place, Second Street south of Arch, on a lot forty-four by three hundred and three feet. In 1770 the families in the congregation numbered one hundred and twenty, and the members were the following persons: Morgan Edwards, minister; Isaac Jones, Esq., George Westcott, and Samuel Davis, elders; Joshua Moore, Samuel Miles, and Joseph Moulder, deacons; Samuel Ashmead, Esq., Rev. Ebenezer Kinnersley, John Perkins, John Standeland, Joseph Ingles, Samuel Burkilo, Thomas Byles, John Bazeley, Catherine Standeland, Mary Burkilo, Edith Priestly, Esther Ashmead, Elizabeth Byles, Sarah Bazeley, Elizabeth Shewell, Mary Morgan, Isaac Bellangee, Rebecca Williams, Mary Morris, Jennett Church, Esther Tommins, John Linnington, Sarah North, Mary Harris, William Powell, Mary Rush, Susanna Woodrow, Eleanor Kesler, Abraham Levering, Ann Levering, Catherine Morgan, Edward Middleton, Martha Coffin, Mary Thomas, Rachel Davis, Septimus Levering, Mary Levering, Elizabeth Church, Catharine Coughlin, Ann Barns, Joseph Watkins, Joanna Anthony, Frances Jones, Elizabeth Byles, Mary Bartholomew, Catherine Bartholomew, Benjamin Davis, Barnaby Barns, Jemima Timmerman, Susanna Morris, John Dickson, Samuel Jones, Mary Powell, Sarah Hellings, William Perkins, Esther Davis, Hannah Stakes, Andrew Edge, Joseph Williams, Mary Iden, Sarah Shewell, Sarah Gardner, Mary Wood, Sarah Edge, Francis Maglone, Susanna McLaneghan, Hannah Swanson, Samuel Miles, John Mason, Nehemiah Davis, John Morgan, Grace Lloyd, William Jenkins, Joseph Moulder, Sarah Moulder, Sarah Neaves, Elizabeth Holton, Thomas Shields, Ann Ruxby, Margaret Emmet, Rebecca Wilson, Charles Wilson, Abel Gibbon, Sarah Thomas, Martha Mason, James Hunter, Sarah Harper, Lydia Shields, Jonah Thomas, Mary Robison, Mary Jones, Joan Thomas, Susanna Rose, John Rose, Hannah Drinker, Pollydore and Nelly, Jacob Levering, William Harper, Sarah Powell, Elizabeth Shewell, Ann Bray, Thomas Fleeson, Samuel Olden, Elizabeth Morgan, Sarah Briding, George Ingles, Joseph Gilbert, John Stow, Rebecca Barger, Mary Richey, Judith Fulton, Evan Jenkins, Thomas Dungan, John Flintham, Samuel Woodbridge, Isaac Powell, Elizabeth Morris, Sarah Megetegan, Matthias Mairis, Margaret Levering, Susannah De Nyce, John Drinker, Enoch Morgan, Erasmus Kelly, Sarah Marsh, Mary Fox, Mary Rush, Mary Evans, Mary Powell, and Charles McDonald.

In 1760, or before, the First Church bought land at the foot of Spruce Street, on the Schuylkill, for use in summer as a "Baptisterion." Ten years later Rev. Morgan Edwards describes it,—

"Round said spot are large oaks, affording fine shade. Under foot is a green, variegated with wild flowers and aromatic herbs." . . . "In the midst of this spot is a large stone, rising about three feet above ground, around which I have often seen the people kneel to pray after baptism had been administered. The top is made level by art, and steps are hewn to ascend. On the top stands the minister to preach to the people, who resort thither to see baptism performed, and a multitude of hearers he commonly has. I have once reckoned here thirty-two carriages, and often seen present from one hundred to one thousand people, all behaving much better than in some other places."

Dr. Mitchell, writing in the *Christian Observer*, in 1854, says,—

"I remember when it was a most delightful country-spot, with fine large shade-trees around it. A small house served the purpose of changing dress, and the whole seemed to be in far better keeping with the Apostolical style than the practice of ancient times. There were no wharves there, and the din of business had not found its way to the consecrated place, and hundreds went thither to witness a scene that could not have attracted them under different circumstances."

The building referred to was afterwards changed to two small dwelling-houses.

The Seventh-Day Baptists at Pennepek kept up their organization, though there is little on record about their pastors. In 1770, as Morgan Edwards tells us, they met on alternate Sabbaths at the house of Benjamin Tomlinson. There were eleven families in the society, including Samuel Wells, Richard Tomlinson and wife, Job Noble and wife, Elizabeth West, Mary Keen, Rebecca Dungan, and Enoch David. The last-named, their principal exhorter, was born in Kent County, Del., in 1718, and was ordained in 1769. Besides preaching at Pennepek, he supplied the congregations at Nottingham, Newtown, and French Creek, all in Chester County.

The Baptist Church in the Northern Liberties was formed in 1769. In 1770 appointments to supply the ...ade by the Association. There were ... members in the church. In 1773,

Joseph Bull was elder, and represented it in the Association.

The Baptist Association, in 1756, decided to "raise a sum of money toward the support of a Latin Grammar School for the promotion of learning amongst us, under the care of brother Isaac Eaton, and the inspection of our brethren, Abel Morgan, Isaac Stelle, Abel Griffith, and Peter Peterson Vanhorn." Next year it was resolved to request the churches to contribute their mite toward the support of the grammar school, and in 1758 the resolution was repeated, it being resolved "that what has been done hitherto in that way appears to have been well laid out." In 1762 the Association met in the Lutheran Church, Fifth Street below Race, "where the sound of the organ was heard in Baptist worship."

At the outbreak of the Revolutionary war, Philadelphia had three congregations, numbering two hundred and sixty members, and owning two small buildings. The territory of the Association reached from Stamford, Conn., to Virginia, and west to the unbroken forest. Within these bounds were only forty-two churches and three thousand Baptists. Rev. William Marsh, of New Jersey, had been the pioneer along the Susquehanna, and was slain in the Wyoming massacre. Pittston organized a church in 1776, and Southwestern Pennsylvania founded several that year. The difficulties and dangers that the pioneer preachers underwent in establishing new societies were enormous. And the financial weakness of these churches is worth a moment's thought. Their scanty resources made the smallest gift a boon. We read of a formal vote of thanks over the gift of a wooden settee, and elders debate whether to buy tallow-dips by the box or the pound. A legacy of twenty-five dollars is spoken of as a great benefaction. To-day, instead of three weakly churches, with a membership of two hundred and sixty, there are sixty-one churches and sixteen missions, with a membership of nineteen thousand, connected with which there are Sunday-schools with twenty-one thousand six hundred teachers and scholars. These communities own church property worth between two and three million dollars, nearly entirely paid for. Many of their church edifices are among the finest ecclesiastical structures in the State. Their benevolent contributions amount to about four hundred thousand dollars yearly. The seed planted by the early ministers has proved fruitful beyond measure.

During the Revolution, Rev. Samuel Jones was in charge of the Pennepek Church, and remained there until his death, in 1814. While the British army was in Philadelphia services were probably suspended. Between 1774 and 1800 there were thirty-seven persons baptized, and the number of members varied from fifty-eight to seventy-four. Deacons were as follows: James Dungan and Joseph Ingles, elected March 30, 1775; John Wright, elected Feb. 3, 1776; Benjamin Dungan, elected March 30, 1782.

The First Baptist Church in the city had for its pastor Rev. William Rogers, D.D., who was a strong patriot, became chaplain in the American army, and served from 1776 to 1781. Rev. Samuel Stillman supplied the church during a part of this time. Rev. Dr. Rogers returned to Philadelphia after the war, became professor of belles-lettres at the University of Pennsylvania, and occupied the chair until 1812. His death took place March 31, 1824. In 1782 the First Church, having no pastor, elected Rev. Thomas Ustick, a native of New York, and a graduate of Rhode Island College. He took charge in July, that year, and remained there in active duties till his death, in April, 1803. Rev. William Rogers and Rev. Morgan Edwards preached occasionally. Rev. John Stancliffe was assistant after 1789, and Isaac Carlisle was also a licensed preacher. In 1775 the church had one hundred and seventy-four members, but in 1781 there were only eighty-six; these increased by 1800 to one hundred and forty-five.

The Philadelphia Association was required, in 1781, to consider the case of Rev. Elhanan Winchester, who preached to the First Church the year before, and proclaimed Universalist doctrine in his sermons. Dr. Abel Thomas says that Winchester had only "accepted an invitation to preach" temporarily, attracted great crowds, and preached eighteen sermons at St. Paul's Church, the Baptist building proving too small. Winchester then formed his "Universal Baptists" (see article on Universalist Church), and all his adherents were expelled. In 1781 the Association made a formal excommunication, and solemnly warned all the churches against Winchester and his doctrines.

During the war the Association was thoroughly patriotic. In 1775 they recommended "to continue the four quarterly days of fasting and prayer, as the distresses of the nation continue;" also in 1776 and 1778 a similar request was made. British occupation of Philadelphia prevented the Association's session in 1777. George Westcott resigned the treasurership in 1788, and Samuel Jones was appointed. In 1780, "letters from twenty-one churches complained of great declension in religion," and of "such tokens of Divine displeasure as do loudly call for deep humiliation of spirit." Quarterly fasts were again ordered. In 1782 thanks were voted to printer Aitken, of Philadelphia, for his edition of the Bible. In 1788 the Association left each church to decide whether fasting and prayer were proper on account of the Hessian fly. The Association was chartered in 1797, with Rev. Samuel Jones, president; Rev. William Rogers, secretary; and George Ingolls, treasurer.

The following messengers represented the Philadelphia Church in the Baptist Association between 1775 and 1801: Joshua Moore, George Bright, Benjamin Shaw, Thomas Fleeson, George Ingles, David Bowen, Thomas Shields, John McKim, Thomas White, Joseph Watkins, Samuel Davis, Sr., Samuel Davis,

Jr., Elisha Gordon, Richard Reily, Samuel Miles, John McLeod, Hugh Gorley, Aaron Vanhorn, Joseph Keen, Nathaniel Davis, Heath Norbury, George Allen, Samuel Oakford, and John Peckworth.

The messengers for Roxborough were Abraham Levering, Charles Nice, Michael Conrad, Cornelius Holgate, Anthony Levering, Wickard Jacoby, Nathan Levering, John Levering, John Walraven, and Titus Yerkes.

The messengers and representatives from Pennepek were Rev. Samuel Jones, Alexander Edwards, Peter Smith, John Pitman, John Stancliffe, Jesse Dungan, John Holmes, Benjamin Dungan, Isaac Hough, George Guthrie, John Wright, George Edwards, Thomas Webster, William Rooper, Joseph Green, Joseph Evans, Joseph Miles, Joseph Wright.

The Association added to its long list of memorable deeds in October, 1781, when this ancient and honorable body was in session. The news of the Yorktown surrender was cried through the streets of Philadelphia at midnight, and at *sunrise*, October 24th, the Association met and passed patriotic and rejoicing resolutions.

The Roxborough or Ridge Baptist Church was organized Aug. 23, 1789, with thirty-two members dismissed from the First Church. Their names were Abraham Levering, Anna Levering, John Levering, Hannah Levering, Anthony Levering, Mary Levering, Nathan Levering, Sarah Levering, Samuel Levering, Rebecca Levering, Sarah Levering, Catharine Standeland, John Righter, Cornelius Holgate, Mary Holgate, Hannah Coulston, Sarah Mathias, John Howell, Elizabeth Howell, George Sinn, Margaret Sinn, Dorothea Sinn, William Holgate, Mary Holgate, Wigard Jacoby, Michael Conrad, Jane Conrad, Charles Nice, Elizabeth Yerkes, Sarah Gorgas, Sarah Lobb, Mary Stout. Nathan Levering gave a lot on a lane leading from the Ridge road for a church building. The structure was of stone, two stories in height, and was dedicated, free of debt, Oct. 24, 1790. It cost six hundred pounds. The collection the first Sabbath was £7 15*s*. Rev. Thomas Angier, Dr. Rogers, Rev. Thomas Ustick, and others, supplied the pulpit. In January, 1791, Rev. Curtis Gilbert was ordained pastor, but he died in April, 1792, aged but twenty-three. Rev. Thomas Fleeson and William White were "supplies" till 1800, when the former became permanent pastor. During this period the church averaged from forty-six to fifty-two members. Rev. Thomas Fleeson was white-haired and blind long before his death, in 1828, and became widely known as the "eloquent old blind preacher."

The church at the Northern Liberties in 1775 had fifteen members, but decreased so by removals that it was dropped from the Association after 1776.

In the year 1800, the First Church proposed a Domestic Mission Society, which the Association organized, and ten years later it had seven men in the field. That church, after Mr. Ustick's death, was supplied by Rev. John Peckworth and Thomas Billings, but in 1805, Rev. William Staughton was called. Dr. Staughton was then one of the leading ministers of the denomination, and became one of its greatest educators. From the first his eloquence attracted large assemblages. Professor Thomas D. Mitchell wrote of him,—

"No pastor of any denomination in Philadelphia retained so large a popularity in so long a period of years. Many a time have I seen the enlarged house most uncomfortably packed, and many more compelled to go away for lack of room. The people came from every quarter of the city, and this laid the foundation for numerous places distant from the church edifice, where prayer-meetings were held statedly for many years. The Tuesday-night meeting was at Mrs. Bright's, on Lombard Street, between Second and Third Streets, and that in Carson's school-house, on Gaskill Street, near Fourth. The sunrise Sabbath meetings at Beasley's, near the navy-yard, under the wide-spreading willow, and favored by the breezes from the Delaware, attracted hundreds to the preaching of the gospel, who, but for that device, had perhaps never listened to the herald of salvation. Often have I seen a great gathering at the latter place, which the benches could not accommodate, and yet the most perfect order prevailed while the eloquent Staughton preached Christ and Him crucified. The affectionate manner of Dr. Staughton had the effect of securing the attention and respect of the young, and from that class vast numbers were added to the First Church. . . . It may be added as a thing of history that before he was settled in Philadelphia very little attention was given to the religious instruction of the young. He began a good work in this respect that is felt to this day. He was among the most ardent advocates of the Sunday-school cause at a time when it needed powerful and influential friends."

But Dr. Staughton and some of the congregation were English, and though he had been naturalized the heated condition of politics affected his influence. A story is told that shows the absurd side of this prejudice. It was at a meeting of the congregation, when one of the stoves began to smoke so voluminously that there was no enduring it. "The sexton, . . . who was of the American party, could give no relief, and after several ineffectual attempts, solemnly announced to the assembly that he could account for it in no other way than by supposing there was an Englishman in the stove-pipe." The natural result was a separation, and in January, 1811, Dr. Staughton withdrew with ninety members, organizing the Sansom Street Church. Rev. Henry Holcombe was his successor in the First Church, when he preached till his death, May 22, 1824.[1] The church during this period built a brick baptistery on the Schuylkill at Spruce Street.

Dr. Staughton's Sansom Street Church was strong and united. John Mills, architect, educated under

[1] Rev. Henry Holcombe, born in Virginia, became a captain in the patriot army, and before the age of twenty-two preached his first Baptist sermon on horseback to his command. He was a member of the South Carolina Convention that ratified the United States Constitution. He founded the Savannah Female Orphan Asylum, organized the First Baptist Church in that city, published the first religious periodical in the South, founded Mount Enon Academy, the first under Baptist auspices in the South, and helped to organize the germ of the "Georgia Baptist Convention." Dr. Cathcart speaks with admiration of his "herculean physique" and "immense intellectual and moral momentum." During Dr. Holcombe's brilliant pastorate four ladies—Mrs. Ann Rhees, Mrs. Sarah Ogden, Miss Mary Halman, and Miss Emily Ramage—established the first Sabbath-school in Philadelphia, beginning with twenty pupils, a beginning that has grown to a Baptist Sunday-school army over a thousandfold greater.

William Cathcart

Digitized by Google

1, 1857, until 1884. His was the longest unbroken pastorate among the Baptist clergymen of Philadelphia. In 1807 the Second Church founded a branch at Frankford, and supplied it until 1812, when Rev. David Jones became pastor.

Dr. William Cathcart was born in the county of Londonderry, in the north of Ireland, Nov. 8, 1826. His parents, James Cathcart and Elizabeth Cously, were of Scotch origin, the stock known as Scotch-Irish in the United States. Rev. William Cathcart, D.D., was brought up in the Presbyterian Church, of which, for some years, he was a member. He was baptized by Rev. R. H. Carson, of Tubbermore, in January, 1846. He studied Latin and Greek in a classical school near the residence of his father, but received his literary and theological education in the University of Glasgow, Scotland, and in Horton (now Rawdon) College, Yorkshire, England. He was ordained pastor of the Baptist Church of Barnsley, near Sheffield, England, early in 1850. From political and anti-state church considerations he determined to come to the United States in 1853, and on the 18th of November in that year arrived in New York. In the latter part of the following month he became pastor of the Third Baptist Church of Groton, on Mystic River, Conn. In April, 1857, he took charge of the Second Baptist Church of this city, where he has since labored. In 1873 the University of Lewisburg conferred on Mr. Cathcart the degree of Doctor of Divinity. In 1876, on the retirement of Dr. Malcom from the presidency of the American Baptist Historical Society, Dr. Cathcart was elected president, and been re-elected at each annual meeting since. In 1875, in view of the centennial year of our national independence, the Baptist Ministerial Union of Pennsylvania appointed him to prepare a paper, to be read at their meeting in Meadville in 1876, on "The Baptists in the Revolution." This paper, by enlargement, became a duodecimo volume, entitled "The Baptists and the American Revolution." Dr. Cathcart has also published a large octavo, called "The Papal System," and "The Baptism of the Ages and of the Nations," a 16mo. Dr. Cathcart's greatest work is his "Baptist Encyclopædia," a large imperial octavo volume, published by L. H. Everts, of Philadelphia. This handsome volume is worthy of the subject; it is a monument to the Baptist faith, and illustrative of the spirit, the enterprise, the industry and zeal, and the book-making genius of the author and publisher. Dr. Cathcart has given his best energies and tried experience to the production of this book, and the Baptist Church is fortunate in finding a historian of his qualifications to undertake her annals. The work is so complete and so encyclopædic upon "the doctrines, ordinances, usages, confessions of faith, sufferings, labors, and successes, and of the general history of the Baptist denomination in all lands," that it has superseded all similar publications, and will become henceforth the standard and universal *vade mecum* of a religious denomination that has probably about five million adherents in the United States.

The African Baptist Church was organized by twelve persons in June, 1809. They rented a lot on Tenth Street, above Vine, and built a house twenty-six by thirty-seven feet. Henry Cunningham, of Savannah, preached here until 1812, when John King, of Virginia, a white man, was ordained pastor. In 1825 this congregation moved to what is now Haviland Place, running west from Eighth Street, below Vine, and built a new church.

In 1817 the Second Church again sent out a colony of seventy-six members, which, on September 10th, organized themselves into a church; they chose Rev. John Grigg as pastor, and secured a lot on New Market Street above Noble. Their plain brick building was dedicated Jan. 1, 1818. Rev. Mr. Grigg resigned in 1819, and was succeeded by Rev. Thomas Griffin. The latter in 1825 resigned, and was followed by Rev. Elisha Cushman. March 20, 1820, the church was incorporated as the New Market Street Baptist Church. The original incorporators were Adam Corfield, George Hacker, Reuben Jarman, Abednego T. Whitton, Enoch Cummings, Peter Street, and others.

On the 18th of May, 1814, thirty-three delegates assembled at the First Baptist Church of Philadelphia, and organized the General Missionary Convention of the Baptist Denomination, etc. This body passed through several changes, and gave rise, in 1845, to the American Baptist Missionary Union, which, in 1883, had in foreign fields, 190 American missionaries, 1366 ordained and unordained native preachers, 1090 churches, and 102,261 church members, of whom 10,667 were converts baptized the preceding year.

On July 4, 1827, the General Association was founded in the Blockley Philadelphia Baptist Church to spread the gospel in Pennsylvania. During the first half-century of its existence it commissioned 1430 missionaries, and formed or fostered 133 churches. During 1883 the Baptist City Mission of Philadelphia, about four years in existence, working for the same object as the General Association, and in a portion of its field, with it raised about $22,000, and employed fifty-eight missionaries.

The society for assisting in their education students for the Baptist ministry in this State has its headquarters and its ablest supporters in Philadelphia. In the last twenty of the forty-four years of its existence it has expended an average of $11,000 per year, and it has an invested fund of $33,500. It has aided over 500 students for the ministry, 350 of whom are recorded to be living and at work at the present time. This year (1884) seventy students are under its fostering care.

Pennsylvania has led in the Baptist ranks in education as well as in works of benevolence. Isaac Eaton's Hopewell Academy (1756) was the first in

the country. Dr. Samuel Jones' Pennepek Academy lasted from 1766 to 1794. Dr. William Staughton had a school of theology early in the century,—removed to Washington in 1821, as Columbian College. Haddington College (1832) led finally to the University of Lewisburg, established in 1846. The Crozer Theological Seminary became a noble monument of the liberality of the Crozers. The Jaynes, Creswells, Watsons, Bells, and a host more are worthily remembered among educational benefactors. The Baptists directly control five academies in the State, with about seven hundred pupils; the University at Lewisburg, and Crozer Theological Seminary; the buildings and endowments of these institutions are valued at $968,000. The Baptist Home and Infirmary of Philadelphia, located upon spacious grounds, with partial endowments already secured, are valued at $175,000. The Baptist Orphanage, yet in its infancy, is a credit to the denomination, and a cause for gratitude to those who need its shelter, and to their helpless friends, and to the benevolent who compassionate the dependent young.

The Baptists, in February, 1818, began their first religious periodical in the city, *The Latter-Day Luminary*. It was published quarterly, and was edited with marked ability. *The National Baptist*, a weekly journal, under the control of Dr. H. L. Wayland, editor and proprietor, is the organ of the Baptists of the State and of a large part of New Jersey. It is widely circulated and deservedly influential.

The American Baptist Historical Society is located in this city and chiefly sustained by its Baptist people. It has seven thousand volumes of religious literature, containing many that are invaluable, and its growth is steady. The works which Baptists have written and those which have been published against them lie lovingly together, and calmly invite the examination of those who bow the spirit to the sceptre of truth.

In 1826 the Baptist Tract Society, located at Washington, was removed to Philadelphia, and in 1845 became the American Baptist Publication Society. The work of this society is something enormous. Its total number of publications in 1883 was 1326. The printed matter issued between 1824 and 1883 would make 184,953,592 copies of books, tracts, and periodicals, equal to 7,080,323,003 18mo pages, or 4,720,215,336 16mo pages. Its income, in 1883, from the business and missionary departments was $521,919.16, an increase of $72,502.45 over any preceding year. In 1883 it had 159 colporteurs and Sunday-school missionaries laboring all over our broad land. It has employed 1949 Bible colporteurs, Sunday-school, and publication missionaries and secretaries from its beginning. During this period these men have sold 306,182 books, and given away 105,963, and they have distributed 7,990,688 pages of tracts, held 63,038 prayer-meetings, baptized 15,221 converts, constituted 569 churches, and organized 5334 Sunday-schools, and the society in the same time has given donations of various amounts to 9992 schools.

In 1876 the Publication Society occupied its new marble building at 1420 Chestnut Street, erected at a cost of $258,000, and free from debt. Its capital, permanent and other funds, and house are valued at not less than $700,000.

The Baptists have in Philadelphia the following institutions and church organizations in 1884:

American Baptist Publication Society, 1420 Chestnut Street. Rev. Benjamin Griffiths, D.D., secretary; Rev. G. J. Johnson, D.D., missionary secretary; Rev. G. W. Anderson, D.D., book editor; Rev. Sydney Dyer, Ph.D., Sunday-school sales department; Rev. C. W. Ray, D.D., Sunday-school missionary.

American Baptist Historical Society, 1420 Chestnut Street. William Cathcart, D.D., president; H. E. Lincoln, treasurer and librarian.

Baptist City Mission, 1420 Chestnut Street. Charles H. Banes, president; Rev. James French, superintendent.

Baptist Home, Seventeenth and Norris Streets. Mrs. Levi Knowles, president; Mrs. Charles H. Banes, treasurer.

Baptist Orphanage, Forty-fifth Street and Silverton Avenue. Hon. William B. Hanna, president; Mrs. J. J. Stadiger, treasurer.

Rev. H. L. Wayland, D.D., editor and proprietor *National Baptist*.

Rev. W. H. Conard, corresponding secretary Pennsylvania Baptist General Association.

Rev. R. M. Luther, district secretary American Baptist Missionary Union.

Rev. G. M. Spratt, D.D., corresponding secretary Pennsylvania Baptist Education Society.

Rev. Thomas Swaim, D.D., district secretary American Baptist Home Mission Society.

Churches.—Abbottsford, Baltimore Avenue, near Fifty-second Street. Rev. H. L. Wayland, D.D.

Alleghany Avenue Mission, Alleghany and Frankford Avenues. Rev. William Lawrence.

Angora, Baltimore Avenue, near Gray's Lane. Rev. J. E. Craig.

Berean, Chestnut Street, above Fortieth. Rev. Edgar M. Levy, D.D.

Bethany, Fox Chase.

Beth-Eden, corner of Broad and Spruce Streets. Rev. John T. Beckley.

Bethesda, Fifth and Venango Streets.

Blockley, Fifty-third Street, above Haverford Avenue. Rev. E. H. Bronson.

Bridesburg Mission of Frankford Church.

Broad Street, corner of Broad and Brown Streets. E. L. Magoon, D.D.

Bustleton Chapel, Bustleton. Rev. Charles Warwick.

Byberry. Rev. T. C. Trotter.

Calvary, Fifth Street below Carpenter. Rev. F. C. Colby.

Centennial, Twenty-third and Oxford Streets. Rev. I. D. King.

Chapel of Hebron Baptist Church, Fifty-sixth and Vine Streets. Rev. T. G. Deachfield.

Chapel of Second Church (colored), Frankford.

Chestnut Hill, Main and Summit Streets. Rev. B. F. Robb.

East, Hanover Street above Girard Avenue. Rev. S. S. Woodward.

Eleventh (Chapel), Twenty-first and Diamond Streets. Rev. I. Newton Ritner.

Enon (Germantown), Coulter Street, near Wayne. Rev. James D. Brooks.

Falls of Schuylkill, Queen Street, above Ridge Avenue. Rev. H. W. Jones.

Fifth, Eighteenth and Spring Garden Streets. Rev. John Peddie, D.D.

Fiftieth, corner Seventh Street and Susquehanna Avenue. Rev. J. T. Craig.

First, corner Broad and Arch Streets. Rev. George D. Boardman, D.D.

First (West Philadelphia), corner Chestnut and Thirty-sixth Streets. Rev. W. H. Robinson.

First African, Cherry Street, east of Eleventh. Rev. T. Doughty Miller.

First German, Sixth Street, above Poplar. Rev. J. S. Gubelmann.

Fourth, corner Fifth and Buttonwood Streets. Rev. J. B. G. Pidge.

Frankford (First), corner Paul and Unity Streets. Rev. T. P. Coulston.

Frankford (Second), Colored. Rev. E. G. Cooper.

Frankford Avenue, corner Frankford Avenue and Aramingo Street. Rev. O. T. Morgan.

German Mission, Bastein Hall, Seventh and Dickinson Streets. Rev. John C. Schmidt.
Germantown (First), Price Street. Rev. J. S. James.
Germantown (Second), corner of Main and Upsal Streets. Rev. John Love.
Germantown (Third), corner Wister and Wakefield Streets. Rev. J. L. Ray.
Gethsemane, corner Eighteenth Street and Columbia Avenue. Rev. Lewis P. Hornberger, D.D.
Grace, Berks Street, above Eleventh. Rev. R. H. Conwell.
Haverford Avenue, Haverford and Westminster Avenues and Fifty-sixth Street. Rev. T. G. Deuchfield.
Holmesburg, Main Street. Rev. S. V. Marsh.
Hope Mission of the Second Church, Richmond and Neff Streets. Rev. W. G. Russell.
Immanuel Chapel, Twenty-third Street, above Race.
Lehigh Avenue, Lehigh Avenue and Twelfth Street. Rev. Walter Calley.
Lower Dublin, near Bustleton. Rev. Charles Warwick.
Manatawna, Upper Roxborough. Rev. W. B. Tolan.
Manayunk, Green Lane, below Wood Street.
Mantua, Fortieth Street and Silverton Avenue. Rev. J. G. Walker, D.D.
Memorial, corner Broad and Master Streets. Rev. Wayland Hoyt, D.D.
Messiah, Dauphin Street, near Amber (west of Frankford Avenue). Rev. W. W. Dalbey.
Milestown, Oak Lane. Rev. C. C. Earle, Branchtown.
Monumental, Forty-first and Ludlow Streets. Rev. Robert A. Pinn.
Moore Street Mission. Rev. James French.
Mount Olive, Hall, Seventeenth and Poplar Streets.
Mount Vernon Mission, Washington Street, above Hipple's Lane, Manayunk.
Nicetown, Germantown Avenue, above Broad Street. Rev. Henry Bray.
North, Eighth Street, above Master. Rev. J. J. Muir.
Olivet, corner Sixth and Federal Streets. Rev. B. F. Leipsner.
Passyunk, Passyunk Avenue, west of Broad Street.
Pilgrim, corner Twenty-third and Christian Streets. Rev. George A. Peltz, D.D.
Pine Grove Chapel, Bristol turnpike, near Tacony.
Poplar Street Chapel of Fifth Church, Poplar Street, near Twenty-seventh.
Powelton Avenue, Powelton Avenue, above Thirty-sixth Street. Rev. F. B. Greul.
Roxborough, Ridge Avenue, opposite Lyceum Avenue. Rev. J. W. Willmarth.
Sandy Ford Chapel, Bustleton turnpike.
Scandinavian Mission, Hazel Street, below Second.
Second, Seventh Street, below Girard Avenue. Rev. William Cathcart, D.D.
Second German, Second Street, above Norris. Rev. John Linker.
Shiloh (colored), South Street, between Tenth and Eleventh. Rev. W. C. Dennis.
South Broad Street, corner Broad and Reed Streets. Rev. P. L. Jones.
South Seventh Street Mission. South Seventh and Emily Streets.
Spring Garden, Thirteenth Street, above Wallace. Rev. J. W. T. Boothe, D.D.
Spruce Street, Spruce Street, below Fifth. Rev. C. H. Thomas.
Tabernacle, Chestnut Street, above Eighteenth. Rev. G. E. Rees.
Tacony. Rev. W. W. Ferris.
Tenth, Eighth Street, above Green. Rev. A. J. Rowland, D.D.
Third, Second Street, above Catharine. Rev. W. H. Shermer.
Trinity Mission, northwest corner Markoe and Seneca Streets.
Union, Minster Street, above Sixth. Rev. W. Wallace.
Wheatsheaf Mission of Frankford Church, Bridesburg.
White Hall, Twenty-third Ward. Rev. K. Walling.
Wissahickon Chapel, Ridge Avenue, above Dawson Street.
York Street Mission, York and Fourth Streets. William Edis, lay missionary.
Zion (colored), Hall, Thirteenth and Poplar. Rev. Horace Wayland.
Free Baptists (Macedonian Missions).—First, Twelfth and McKean Streets. Rev. Ernest G. Wesley.
First Colored, Rodman Street, above Tenth. Rev. Alfred Brown.

THE TUNKERS.

Hardly any sect now in existence has a greater number of names than the Tunkers, who have also been known as the Dunkers, Dunkards, Tumblers, Dumplers, Brethren, and German Baptists. They now have two churches in Philadelphia, and their early history centres about "Bebber's township" and Germantown. They are in belief Seventh-Day Baptists, with a Universalist tendency, and with certain tenets that are strongly Roman Catholic. They first became well organized near Schwartzenau, Germany, early in the eighteenth century, and appeared in Pennsylvania in 1717, when twenty families arrived, settling at Germantown, Oley, Skippack, Conestoga, and Falkner's, and lacking religious organization till 1722, when their clergymen, Messrs. Becker, Gantz, Gomery, and the Trautz brothers, visited them, succeeding in forming a church December 25th the next year, in "Bebber's township."[1] Rev. Peter Becker (or Baker), one of the most enterprising of their evangelists, held the first meeting at his own house, in the morning of that day, and then baptized Martin Urner and wife, Heinrich Landes and wife, and Friederich Long, in the Wissahickon. The love-feast and holy communion were observed the same evening, at the house of John Gomery. This was the first love-feast celebrated in America by the Tunkers.

The original members of the Tunker Church were Peter Backer, Henrick Traut, Henry Holzapfel, Johannes Gomery, Jeremiah Traut, Balser Traut, Stephen Koch, John Freis, John Kempser, Johannes Hildebrand, Daniel Ritter, George Balser Gans, Magdalina Traut, Anna Gomery, Maria Hildebrand, Joanna Gans, Jacob Koch, Johannes Priesz, and Johannes Kaempfer. Rev. Peter Baker, their first minister, was born at Delsheim, in Germany, in 1687; was educated a Presbyterian; embraced the principles of the Baptists in 1714; came to America in 1719; settled with the church at Bebberstown in 1723; ceased to preach in 1746, and died in the year 1748.

A good idea of their present customs and beliefs may be gathered from Dr. Cathcart's "Baptist Cyclopædia" and from Dr. Baird's "Religion in America," but the earlier Tunkers, such as organized in "Bebber's township," were more ascetic and communal, and attracted much attention. Their dress consisted of a long tunic, reaching to the heels, confined by a sash about the waist, and also a hood similar to that of the Dominican friars. This dress was adopted by both males and females, with the addition, by the latter, of a veil, which was not withdrawn in public.

[1] This tract, bought by Matthias van Bebber, was above Germantown proper, and its name was soon corrupted to "Beggar's town," a name still in use. The township was settled in 1684. So thoroughly was the origin of the name forgotten that Morgan Edwards, writing in 1770, describing the meeting-house of the Tunkers, says, "The meeting-house is of stone, thirty feet square, erected this year (1770), on a lot of eighty rods. On the same lot stands their old building, erected by John Pettikoffer, for his dwelling-house, in 1731, and because it was the first house in the place, and erected by a beggar, the village assumed the name of 'Beggarstown.'"

The beard was never cut, though it was customary to clip the hair. The sexes were kept entirely separate, even at seasons of religious worship. The only exception was at the occurrence of their love-feasts, one of their sacraments, when men and women dined at the same table. They prohibited marriage, and if any insisted on abandoning celibacy they must also abandon the geographic limits of the society, though they could settle in the vicinity, worship as formerly, receive their portion of the public funds, and send their children to be educated by their brethren and sisters. Their diet was of the most simple sort, and flesh of all kind was proscribed by their rules, except at the love-feasts, when mutton and no other kind of meat was eaten. Their furniture was very plain; a bare bench served for a bed, and a small block of wood for a pillow. Their religious exercises consisted, to a great extent, in private meditation. Beside this they had seasons of public worship, when the men met in their appointed place, and the women in theirs. They were required to worship four times each day.

In baptism they are immersionists, not by one act, but by three, making a triple immersion, and they dip the candidates head forward under water, while kneeling. Their name "Tunker" is said to come from "Tunken," "sops," "to dip a morsel." Some of their doctrinal beliefs were as follows:

That future happiness was to be procured by penance and mortification of the flesh in this world; evidently being tainted with the Gnostic opinion that evil was inherent in matter.

That Jesus Christ died for the salvation of all men, but that it could and ought to be secured by good works, each individual thus working out his own salvation independent of the atonement.

That men might perform more good works than required by God, and that these would be credited to the account of those who were remiss in duty, so that they might not only work out their own but others' salvation by deeds of supererogation.

That the final punishment of the wicked was not to be eternal. They insisted that Christ preached His gospel to the dead, and that the souls of just men made perfect were employed as missionaries to the spirits of such as enjoyed no means of grace in this world.

That sundry Jewish divisions of time were typical of certain periods after the general judgment, when repentant spirits would be admitted to bliss from the scene of their punishment. And that at the very last those who persisted in impenitence would be converted by a special act of divine interposition and received into glory. This was supposed to have been indicated by the Jewish jubilee.

That deeds of violence were not justifiable, even in cases of self-defense.

That the members of Christ's church should on no account engage in litigation.

Their church government and discipline were much the same as that of the Baptists in general.

The Bebberstown (or Upper Germantown) Church grew but slowly. In September, 1729, Rev. Alexander Mack came from Germany with his three sons, Johannes Mack, Valentine Mack, and Alexander Mack, Jr., also Hans Gunde, Andreas Bony, Johann Naas, Anthony Deerdorf, Jacob More, Rudolph Harley, Johann Peter von Lausche, Jacob Kalckgluesser, Johannes Kipping, Jacob Bossert, Heinrich Kalckgluesser, Christopher Kalckgluesser, Wilhelm Knepper, Jacob Schneider, Matthias Schneider, Johannes Pettenkoffer, Hans Koch, George Koch, Reinhard Hammer, and others, who greatly strengthened the church.

Rev. Mr. Alexander Mack was born in 1679 or 1680. He died at Germantown (being an assistant to Rev. Peter Becker), on the 19th of January, 1735. His son, Rev. Alexander Mack, Jr., who succeeded him at Germantown, was called to the ministry June 1, 1748, and on the 10th of June, 1753, he was advanced to the office of bishop, at which time the public charge of the church at Germantown was laid upon him. He preached until near the time of his death, in March, 1803.

In 1731 the congregation obtained for their place of worship a house erected by John Pettikoffer for his dwelling-house, and meetings were held there till 1770.

About this time, early in the eighteenth century, the Tunkers of Bebberstown attempted an enterprise, which connects them closely with the Ephrata Brethren, indeed Ephrata was often called "Tunkertown." Conrad Beissel, who had about 1732 founded the large monastery in Ephrata, had been a Tunker.

At Ephrata the habit of the Capuchins or White Friars was adopted by both the brethren and sisters, which consisted of short trowsers and vest, with a long white gown and cowl of woolen webbing in winter, and linen in summer. That of the sisters differed only in the substitution of petticoats for trowsers, and some peculiarity in the shape of the cowl. Monastic names were given to all who entered the cloister. There were three places of worship,—Sharon, Bethany, and Zion. The brethren had a farm, a paper-mill, printing-office, and oil-mill; the sisters spun linen and wove cloth.

We are indebted to "Historic Notes of Olden Time in Roxborough and Manayunk," written by Horatio Gates Jones, and published in the *Manayunk Star* in 1859, for the following translations from the "Chronicon Ephratense," published in 1786, which purported to be the work of two monks, whose religious names were "Lamech" and "Agrippa." One of them says,—

"On the 12th of April, 1736, I moved to Brother Alexander Mack's, where three of us lived for some time. In the year 1737 we built a house in a valley one mile from Germantown, into which we moved October 14th of the same year. Another hermit, named John Reisman, and a couple of married people, came to and lived with us. On the 21st of March, 1738, my three brethren—Alexander Mack, Henry

Hoecker, and John Reissman—left me, and went to the hermits in Ephrata, whilst the housekeeper went again to the country. After this another pious housefather came and lived with me, but only up to March 27, 1739, at which time I moved also to the solitary ones at Ephrata."

It would seem from this that the supposed monastic establishment founded by the unknown author of the "Chronicon Ephratense" was only kept up about seventeen months, and could not have been composed of more than seven persons. The question is, Where is the house spoken of by the author of the "Chronicon?" Was it the old Gorgas mansion, now known as the "Monastery?" It is altogether unlikely. The "Historic Notes," from which we have already quoted, say that in the valley of the Wissahickon, on the eastern side, on the brow of a hill, and a mile above the Red Bridge, there is "a large, three-story house of dressed stone, with an old-fashioned hollow cornice. That building is the so-called 'Monastery of the Wissahickon,' but not as originally built, for many of the windows have been walled up, and a cornice that once projected over the first row of windows has been removed. In fact, the old house, which was a grand mansion in its pristine glory, has been thoroughly modernized, with the exception that it has escaped the vandalic coat of exterior plaster which in this region has ruined many a noble old house."

But, as the writer proceeds to show, the ground in question was sold in March, 1747, to John Gorgas, of Germantown. In 1752 the latter conveyed half of it to his brother, Joseph Gorgas, and there is a recital in the deed that Joseph had since (1747) erected at his own cost and charges "a three-story stone house or messuage on a certain piece or spot of land." Joseph Gorgas was a member of the society of Seventh-Day Baptists. It is conjectured that he erected this house for purposes of seclusion and meditation. It is said, "Hither were gathered congenial spirits like himself, and there they held sweet communion." A small strip of land below the county bridge is pointed out as the place where the monks were accustomed to administer the rite of baptism in the Wissahickon, and on the early township map the spot is designated as the Baptisterion.

Joseph Gorgas sold the lot with the house, now called the "Monastery," to Edward Milner in 1761, and it has since gone through various hands. The house in which the unknown author of the "Chronicon" lived for seventeen months could not have been the stone mansion to which tradition affixes the title. There is no proof that Gorgas allowed his house to be used for monastic purposes, but novelists have made much of the legends and tales of hermits and monks that cluster thickly about the vicinity. George Lippard and Dr. William Fahnestock drew abundantly on the wealth of literary material in this beautiful valley of the Wissahickon.

In 1770 the Tunkers built their meeting-house, which still stands on the main street of the modern Germantown, above Sharpnack Street, and held their first meeting June 8th. The following persons were then members: Alexander Mack, minister, with his wife and daughter; Christopher Saur, exhorter, with his wife and son; Margaret Bozer, deaconess; George Shriber and wife, Henry Slingluff and two daughters, Philip Weaver and wife, Peter Sybert and wife, John Slingluff and wife, Henry Slingluff, Anthony Snyder and wife, Richard Roob, Michael Keyser, Peter Keyser and wife, Jacob Bowman and wife, Justus Fox and wife, John Kime, Conrad Good, Conrad Stamm and wife, Hannah Stamm, Mary Baker, Sarah Baker, Susanna Baker, Eve Fith, Elizabeth Bozer, Mary Bossert, Margaret Herzbach, Magdalen Mellenger, Elizabeth Roob, Christian Van Lashet and wife, William Spyra, Nathaniel Shriber, Katharine Shriber, Henry Sharpnack and wife, Mary Nyse, Rudolph Haly and wife, Mary Fend, Sybelia Ent.

OLD TUNKER CHURCH, GERMANTOWN.

The church had no graveyard for the members, who were buried in the Mennonite and other grounds until 1793, when the yellow fever raged so terribly in the city that sufficient places could hardly be found to bury the dead in. The brethren then took up a subscription for a graveyard, to which Alexander Mack subscribed 10*s*., Peter Keyser 15*s*., Garret Clemens 15*s*., Michael Keyser 10*s*., Dirck Keyser 10*s*., Christian von Lashet 15*s*., Peter Keyser, Jr., 11*s*. 3*d*., William Keyser 10*s*., Benjamin Lehman 11*s*. 3*d*., Thomas Langstroth £1, Peter Leibert 15*s*., etc. In 1804 they also bought the adjoining lot to the meeting-house for a road, that they could drive in with a "*wagon or cart to the stable, and down to the graveyard, if needs be; and also to enlarge the graveyard at a future day.*" Four hundred and thirty pounds were paid for it, in two installments. The first was made up by subscription, and the second was borrowed from Peter Leibert and Peter Keyser, Jr., at six per cent. interest. To the subscription we find Peter Leibert gave $50; Peter Keyser, Jr., $50; Peter Keyser, Sr., $40; Michael Keyser, $30; Benjamin Lehman, $53.33; William Keyser, $20; James Lynd, $10; Keturah Clemens, $10; Catharine Langstroth, $10; John Keyser, $10, etc.

Rev. Alexander Mack, Jr., and Christopher Saur were occasionally assisted by Philip Weaver, Nathaniel Shriber, and Daniel Leatherman. Weaver afterward went to Pipe Creek, Ind., and Schreiber and Leatherman to North Carolina. Rev. C. Saur preached regularly until 1778, and occasionally until April, 1780, when he removed from Germantown to Mathatchey, where he died in August, 1784. The Rev. Peter Keyser succeeded Rev. Christopher Saur,

Google

and was made bishop Aug. 22, 1802.[1] Although he resided in Philadelphia, his connection with the Germantown meeting remained. He was always ready to conduct the services on Sundays, although he had to come from Philadelphia for the purpose. This duty, without regard to weather, he was never known to neglect. After he was installed as bishop he was assisted in the ministry at Germantown by Charles Hubbs, Christian van Lashet, and John W. Price.

The first Tunker Church in Philadelphia was organized by Bishop Keyser in 1813, and for more than four years the members worshiped in a school-room at the northwest corner of Fourth and Vine Streets. March 19, 1817, the members of this congregation held a meeting for the purpose of considering the expediency of building a meeting-house, when it was stated that nearly five thousand dollars were already subscribed. It was resolved to undertake it, and James Lynd, George Gorgas, Jacob Ziegler, James Gorgas, and John Rink were appointed a committee to procure a piece of ground. They purchased a lot on the east side of Crown Street, below Callowhill, from Jesse Stellwagen for four thousand two hundred and fifty dollars. It was forty-five feet front on Crown Street, running through of that width to Fourth Street, being about eighty-six feet from street to street. Peter Keyser, James Lynd, John Heisler, John Fox, Christopher Lehman, J. Gorgas, Christopher S. Langstroth, Michael Keyser, and John Leibert were appointed trustees, and also were the building committee. Strafer & Ritter agreed to "lay the brick at two dollars and sixty-seven cents per thousand, and the stone at seventy-five cents per perch, and make an allowance in the bill." W. Steinmetz agreed to furnish the brick "at eight dollars and fifty fifty cents per thousand, and give a donation of three thousand brick." William Jones offered to "plaster the house at ten cents per yard, and make a present of fifty dollars." These prices, of nearly seventy years ago, are perhaps worth record.

The house was consecrated Oct. 12, 1817. In the morning Bishop Keyser spoke from the ninth chapter of Hebrews, first to fifth verses. In the afternoon he spoke from the nineteenth chapter of Luke, forty-sixth verse; and in the evening from the twenty-sixth chapter of Acts, twenty-second and twenty-third verses. March 5, 1818, he presented the church with a fine, large pulpit Bible, which was in use until April 21, 1854, when it was replaced by a new one.

The first additions to the church in Philadelphia took place in the baptism of Christian Flower and Catharine Evans, on Easter day, April 6, 1817, in the Schuylkill, by Bishop Keyser. He (Keyser) was assisted by James Lynd, John Heisler, Timothy Bangor, John Righter, Thomas Major, and John Fox in his ministrations to the Philadelphia Church during 1818 and for some time after.

At this time (1884), the denomination of Brethren or Tunkers have two churches in this city, as follows:

Marshall Street above Poplar, Rev. Joel K. Reimer presiding elder; Main Street above Sharpnack, Germantown, Rev. J. R. Reinse.

THE MENNONITES.

The sect known as Mennonites has erroneously been claimed by some writers as Baptists. Dr. William Cathcart, in his "Baptist Encyclopædia," sums up the article upon "Menno and the Mennonites" by the declaration, "The Mennonites of to-day are a little nearer us than are the orthodox members of the Society of Friends, but they are not Baptists." Nor, although nearer to the Society of Friends than to the Baptists, are they identical with the Quakers. At present they have two churches in Philadelphia, and in the United States they have one hundred and twenty churches and twenty thousand members. They have three divisions,—Mennonites, Reformed Mennonites, and the Omish Church, whose discipline is more strict than either of the two first. Mennonite colonists gave early Germantown much of its distinctive character, and among their number were men quite as remarkable in their way as Zinzendorf, Muhlenberg, and Thomas Elwood. It was left for the poet Whittier to discover the hidden literary material in the quiet life and pastoral beauty of that humble colony, and to write of Francis Daniel Pastorius as "The Pennsylvania Pilgrim." Though in later life he joined the Friends, or Quakers, Pastorius was socially and politically the Mennonite leader in early Germantown.

We have said that mild and pure Mennonites much

---

[1] Bishop Keyser was for sixty-three years pastor of the Germantown and Philadelphia Churches, of forty-seven of which he was the bishop. He was a most efficient preacher in both the English and German languages. Beside his profound knowledge of Scripture he was also distinguished as an eloquent orator, and whenever he preached he drew crowds of hearers from all denominations. "He was diligent in business, fervent in spirit, serving the Lord," for beside faithfully discharging his numerous secular and ministerial labors, he was engaged in almost every measure for the good of his fellow-man. He was long a member, and for a while secretary, of the Board of Health, inspector and treasurer of the prison, an active member of the Society for Alleviating the Miseries of the Public Prisons, and was director and controller of the public schools when the system was first adopted. Germantown was his birthplace, and he was baptized by Martin Urner, of Coventry, on the 25th of September, 1784, in the eighteenth year of his age. He was called to the ministry in 1785. In his early youth he was remarkable for his quickness of conception and wonderful retentiveness of memory, which enabled him to commit whole chapters of Scripture with very little labor; and he soon had the whole of the New and Old Testaments indelibly fixed in his memory. In 1794 he relinquished the tanning business in Germantown and removed to Philadelphia to enter into the lumber business, which he carried on with his brother-in-law, George Gorgas, under the firm of Keyser & Gorgas, until 1828, when he retired on a competency, and moved back again to Germantown, into the house left him by his father. (The Tunkers, like the Friends and the Mennonites, do not believe in their ministers devoting themselves entirely to preaching.) Bishop Keyser was a descendant of a family noted for its martyrs. Leonard Keyser, the Mennonite, was publicly burnt to death at the stake near Schaarding, Bavaria, in August, 1527.

The family moved from Germany into Holland, settling in the city of Amsterdam, from whence Dirck Keyser, with his little son, Peter Dirck Keyser, emigrated to America in 1688, and were among the original settlers of Germantown.

resembled the Friends, or Quakers, in their religious beliefs, and the sects readily harmonized. Barclay's "Religious Societies of the Commonwealth" says the early leaders of "Society of Friends took great interest in the Mennonites." The Yearly Meeting of 1709 gave fifty pounds (then a large sum) "for the Mennonites of the Palatinate, who had fled from the persecution of the Calvinists in Switzerland. This required the agreement of the representatives of above four hundred churches." Jacob Felner, a Netherland Mennonite, wrote, Aug. 6, 1709, to Amsterdam, from London, saying that the English Friends had "sent eight families to Pennsylvania and helped them liberally." Quakers joined the Mennonite Church at Haarlem and at Crefeld. Mennonites joined the Quaker Societies in England and in America. The two first histories of the Quakers were written in Holland. William Sewel, the historian, is said to have been a Mennonite. Of all the Germans and Hollanders who came to Pennsylvania during Penn's administration, none were so much in accord with the spirit and hopes of that great lawgiver and statesman. If there is, as there should be, much in religious heritage, no sect in America could lay claim to a nobler history, quiet and seemingly unknown though it be. The Mennonites assert themselves, with good reason, to be descendants of and heirs of the doctrines of the Waldense communities of the twelfth century, and later, the Poor Brethren of Lyons, the martyrs of Provence and of Switzerland. The Waldenses were mostly weavers, tradesmen, and farmers, and they spread over Europe in comparative obscurity, settling in Flanders, thence extending to Holland, where they went by the name of Tisserands or Weavers. The Anabaptists of the sixteenth century drew Mennonites to their ranks. John of Leyden, and Thomas Munzer, those fanatic iconoclasts and socialists, probably had some Waldense followers, but the real strength of the sect sided with the far different movement of Menno Simons, Dirck Philips, David Jovis, and Battenburg, at their noted convention at Buckhold, Westphalia, in 1538. Menno was the first to teach the complete severance of church and state. He also taught the doctrine of the inner light, also non-resistance, and denounced war, infant baptism, and the taking of oaths. They were bitterly persecuted, two hundred and twenty-nine being put to death, seventy-four by fire in Antwerp alone. They were crushed with weights, broken on the wheel, cruelly mutilated, driven from their homes, and so caused to found silk and linen manufactures at Hamburg, in Prussia, and up the Rhine. The men who organized the early Baptist Churches in England had been Mennonites at Amsterdam, and from these Baptists, George Fox, so Barclay says, imbibed many of his views. Hardly anything in the history of the early Quaker missionaries is more interesting than their account of the welcome they received among the Mennonites in Holland and elsewhere, and their naïve astonishment that the doctrines of the two sects should be so similar. Thomas Story, recorder of deeds, left Philadelphia in 1715, and visited the Dutch Mennonites, preaching in many of their assemblies, and entertained by them in staid and cordial fellowship. In religious matters he said they "had no difference."

In the year 1683, William Penn offered a refuge to the persecuted Mennonites, and they settled in Germantown that autumn, having arrived in Philadelphia October 6th. On the 12th of that month a warrant was issued to Pastorius for 6000 acres of land; a fortnight later fourteen divisions were allotted, the colonists drawing lots for choice. By May, 1684, Pastorius had shared out 5350 acres, as follows: to the purchasers in Frankfort, Germany, Jacobus van de Walle 535 acres, John Jacob Schutz 428, Johan Wilhelm Uberfield 107, Daniel Behagel 356¾, George Strauss 178½, Jans Laurens 535, Abraham Hosevoet 535, total 2675 acres; to purchasers from Crefeld, Germany, Jacob Telner 989 acres, Jan Streypers 275, Dirck Sipman 588, Govert Remke 161, Lenert Arets 501, Jacob Isaacs 161, total 2675 acres also. Pastorius received 200 acres, and Jurian Hartsfelder 150 acres. It is said also that Heinrich Frey and, probably, Cornelius Bom were of the first colonists. Pastorius dug the first cave, and others followed his example, and built log huts in which they passed the first winter. Most of the purchasers in Germany seem to have sent friends or relatives with Pastorius. Walter Seimens, Isaac van Bebber, and Jacob Telner, the central figure in the migration, afterward owner of Telner township, on the Skippack, came over in 1684, and for thirteen years lived at Germantown in close business and social relations with the principal Friends. He was the largest land-owner and the first burgess in Germantown, and sold two thousand acres to the Op den Graeffs. In 1698 he removed to London, and was a merchant there as late as 1712. Though often preaching in company with the Quaker ministers, and, indeed, claimed as of that persuasion, he called himself a Mennonite. We shall hear more of Van Bebber, whose brother and father arrived in 1687. Another emigrant of 1684 was Jan Bockenogen, from Haarlem, and an ancestor of the late Henry Armitt Brown, of the Philadelphia bar. Many settlers arrived in 1685 and 1686, among them the Kassels, who brought with them the manuscripts of Ylles Kassel, a Mennonite minister of Krisheim, born before 1618, and graphically describing the sufferings of his inoffensive and pilgrim-like brethren, poor, persecuted, industrious wanderers as they were, hoping and searching in vain for a refuge, until they found it in the peaceful vales of Pennsylvania. Muhlheim, a town on the lower Rhine, also sent many colonists. One by one all but two of the original Crefeld purchasers visited Germantown. Professor Siedensticker, of the University of Pennsylvania, "shows that before 1692 all of the original thirteen

purchasers, except Jan Lensen, had been in one way or another associated with the Quakers." In 1688 the first Mennonite minister in Pennsylvania, Willem Rittinghuysen, great-grandfather of the famous scientist David Rittenhouse, came to Germantown with his family and others, and two years later built, on Wissahickon Creek, the first paper-mill in America. His ancestors had long been paper-makers in the cities of Arnheim and Broich, Holland.

Glimpses of the daily life of the colonists abound. Pastorius says that it will "not be believed by coming generations, in what want and need and with what Christian contentment and persistent industry this German township started." Wilhelm Strypers, in 1784, wrote home, "I have made a brave dwelling-house, and under it a cellar fit to live in, and have much Indian corn and buckwheat." In 1785 the honest Wilhelm had "two pair of leathern breeches, two leather doublets, handkerchiefs, stockings, and a new hat." Bom wrote that he had no rent-tax nor excise to pay, and that the "next year [1685] he would plant an orchard." Most of the Crefeld emigrants were weavers, and Germantown grew to be called a place

> "Where live High German people and Low Dutch,
> Whose trade in weaving linen cloth is much."

Pastorius, therefore, when a town-seal was needed looked out on the fair clover fields, the delicate blue blossoms of slender flax, and the broad arbors of vines under which the honest weavers sat, and he chose a trefoil clover-leaf, bearing a vine, a flax stalk, and a weavers' spool, with the inscription, "Vinum, Linum, et Textrinum." Hendrick Sellers gave the ground for the first Mennonite Church at Germantown, but little further is known about it. Klas Jansen was one of the earliest Mennonite preachers in the region. Pastorius went to Assembly in 1687 and 1691, and Abraham Op den Graeff in 1689, 1690, and 1692. It was on the 18th of February, 1688, that Pastorius, Hendricks, and the two Op den Graeffs, Dirck and Abraham, sent to the Friends' Meeting the first public protest against slavery ever made upon this continent, and from Germantown their protest went to the Philadelphia Quarterly Meeting, in April, and thence to the Yearly Meeting, at Burlington, in July, being there laid on the table. In 1691 the Keith controversy among the Quakers extended to Germantown, and Pastorius wrote two pamphlets on the subject.

In 1694 Cornelis Plockhoy and his wife, both aged and destitute, sole survivors of the twenty-five Mennonites who had, in 1662, founded the first colony of that sect at Horekill, on the Delaware, came to Germantown, were given a home and cared for. Their colony had been destroyed by Sir Robert Carr in 1664, and of the missing twenty-three colonists no record whatever has ever been found. The same year, 1694, about fifty Pietists and Chiliasts reached Germantown, led by Daniel Falkner, Johannes Kelpius, and others, and founded on the Wissahickon the society of the "Woman in the Wilderness," of which we shall give some further account.

Falkner's Swamp, in Montgomery County, was named after Daniel Falkner, who became a man of considerable note. Reynier Jansen, afterward the printer, arrived about November, 1698, and began printing in Philadelphia in 1699, being the second printer in the middle colonies, and producing books that are now almost unique. The first school was begun December 30th in Germantown, with Pastorius as teacher. The village stocks had been built in 1795, being thought needed to terrorize evil-doers.

In 1702–3 we find the first mention of organization for church purposes. One of Samuel W. Pennypacker's fine historical essays on the early German settlers (printed in the *Pennsylvania Magazine of History*, and collected in a volume) states that, "Feb. 10, 1703, Arnold van Fossen delivered to Jan Neuss, on behalf of the Mennonites, a deed for six square perches of land for a church, which, however, was not built till six years later." Other sources of information complete the story. It was May 23, 1708, that the Mennonite Church at Germantown was established in a building of their own, they having previously met at private houses. There were fifty-two members, Rev. Jacob Godtschalk and wife, William Rittenhouse and wife, Harman Casdrop and wife, Martin Kolb and wife, Isaac van Centern and wife, Conrad Johnson and wife, Henry Cassel and wife, Harman Taylor, John Kry, Peter Coernerts, Paul Klumpkes, Arnold van Fossen, John Kolb, Wynant Bowman, John Gorgas, Cornelius Classen, Arnold Koster, Mary Tuynen, Helena Krey, Gartrude Conners, Mary van Fossen, Barbara Kolb, Anna Bowman, Margaret Huberts, Mary Sullen, Elizabeth Husters, Margaret Tuysen, Altien Revenstock, John Nise, Hans Nise, John Lensen, Isaac Jacobs, Jacob Isaacs, Hendrick Sellen, John Connerts, Peter Keyser, Herman Koster, Christopher Zimmerman, Sarah van Centern, Civilia Connerts, Altien Tuysen, Catharine Casselberg, and Civilia van Fossen. Branches from this church were established at Skippack, Conestoga, Great Swamp, and Manatawny before 1726, and by that date they had added, as ministers and exhorters, Henry Kolb, Martin Kolb, Claes Johnson, Michael Ziegler, John Gorgas, John Conerads, Claus Rittinghuysen, Hans Burghaltzer, Christian Herr, Benedict Hirschy, Martin Beer, Johannes Bowman, Velte Clemer, Daniel Langanecker, and Jacob Beghtly.

In 1702 the Skippack settlement, of which something has been said in the record of the Moravians and Lutherans, was founded as an outgrowth of the Crefeld purchase and of the Germantown colony. It was in Perkiomen township, in what is now Montgomery County, but then was part of Philadelphia County. Matthias van Bebber bought and located six thousand one hundred and sixty-six acres, and so

the settlement was long called Bebber's township. The colonists brought here under this patent were mostly Mennonites. One hundred acres were given for a church of that denomination, which was built in 1725, the first trustees being Hendrick Seller, Hermann Kuster, Klass Jansen, Martin, Henry, and Jacob Kolb, and Michael Ziegler. The Van Bebbers, or Van Bibbers, were men of means and energy. Their descendants are still persons of mark in Delaware, Maryland, and Virginia, as well as in Pennsylvania, and many have won eminence as soldiers, lawyers, physicians, clergymen, or writers. A Van Bebber was one of the boldest of the Indian fighters in Western Virginia during colonial times.

In 1727 the Confession of Faith of the Mennonites, translated into English, was published at Philadelphia. It embraced a translation of the Confession of Dortrecht, adopted in 1632. In 1740 the teacher in the Mennonite log church in Germantown was that quaint, pious, and modest pedagogue Christopher Dock, who in 1718, or perhaps 1714, had opened his first school on the Skippack. His treatise on his methods of teaching, finished in August, 1750, formed a fifty-four page pamphlet, published by the younger Saur in 1770. It is thought to be the earliest publication of the kind in America, and Mr. Pennypacker has translated most of it, and also some of Dock's curious hymns, still in use among the Mennonites. Meanwhile the mystic community of Tunkers at Ephrata, Lancaster Co., had obtained a hand printing-press (in 1745) and printed more than fifty books, hymns, and pamphlets. In 1748 they completed the translation from Dutch into German for the Mennonites of Pennsylvania of the latter's great historical book and martyrology, "The Martyr's Mirror" of Tideman Jans Van Braght, which contains much elsewhere unattainable in regard to the origin of their peculiar tenets. It was a massive, brass-clasped folio of fifteen hundred and twelve pages, and is one of the most rare and valuable of the Americana most sought for by bibliophilists.

Dr. J. G. De Hoop Scheffer, of Amsterdam, in a recent work, says that intercourse between the Netherlands and the American Mennonites ceased in 1758, but that a few years later the distinct Mennonite communities near Philadelphia were the following: Skippack, Germantown, Deep Run, Plain, Perkasie, Salford, Rockhill, Saucon, Great Swamp, Mateschen, Lower Milford, Hosensak, and forty near Conestoga. In 1770, however, we get better information from Morgan Edwards, who says that at that time they had in Pennsylvania thirteen churches, forty-two meeting-houses, fifteen ordained ministers or bishops, and fifty-three probationary or licensed preachers. Their families numbered about eight hundred and ten, containing about four thousand and fifty souls, of whom fourteen hundred and forty-eight were baptized members of their churches.

The Germantown Church was under the charge of one of their ministers, but his name is not known. Of the earlier ministers only Benedict Hirschy was living. The same writer, describing their peculiarities, says,—

"They will neither swear, nor fight, nor bear any civil office, nor go to law, nor take interest for the money they lend (though many break through this last). Some of them yet wear their beards. Nor are the ancient rites of washing feet, etc., wholly out of use among them. They, like the Tunkers, use great plainness of speech and dress. This last is so capital a point with them that some have been expelled from their societies for having buckles to their shoes and pocket-holes to their coats."

In a preceding paragraph we spoke of Kelpius and the "Society of the Woman in the Wilderness," begun about 1694. This was the popular name for them, but hardly did justice to their undoubted singleness of purpose, character, and zeal. They numbered about fifty, and after being a short time in Germantown, chose their permanent abode on the Ridge in the neighborhood of the Wissahickon, where they lived in log huts and caves or "dug-outs." John Kelpius, their leader, was from Sieburgen, in Transylvania. The only others whose names are known were John Seelig, Daniel Geissler, Conrad Mathias, Bernard Kuster, Daniel Falkner, and Christopher Witt. All were highly-educated men, much influenced by the mystic views of the mediæval mystics, such as Eckart, Tauler, Weigel, and Böhme. Kelpius wrote and read Latin, Greek, Hebrew, German, and English. The hermits were properly classed among the Pietists. Kelpius argued that there was a threefold state of progression in the soul,—the barren, the fruitful, and the sacrificial or transcendent, which last was that of the elect and chosen, who had put everything else aside. We are told, more definitely, that these hermits believed that "the Woman in the Wilderness," mentioned in the Revelation, was prefigurative of the great deliverance that was soon to be displayed for the church of Christ. "As she was to come up from the wilderness leaning on her beloved," so the beloved in the wilderness laid aside all other engagements because being hermits, trimmed their lamps, and adorned themselves with holiness, that they might be prepared to meet the same with joy. Therefore they observed the signs of the times and every new phenomenon, whether moral or preternatural, of meteors, stars, or colors of skies, if peradventure the harbinger might appear. The hut or house of Kelpius was upon what is now called Hermit's Lane, about half way between the Ridge road and the Wissahickon. He died in 1708, and was buried in his garden. The remaining hermits began controversies among themselves upon the subjects of matrimony and celibacy, which led to a breaking up of the community. Some married, and some went to Ephrata. Seelig resided for a number of years with William Levering, near the present Roxborough Baptist Church. He died in 1745. Christopher Witt was not one of the original hermits, not having come to Pennsylvania till 1704. He re-

turned to Germantown after the death of Kelpius, where he practiced medicine, and obtained a wide reputation as a conjuror, root-doctor, botanist, naturalist, and astrologist; indeed, a curious mixture of charlatan and sage. His death, at the age of ninety, occurred in 1765.

THE MORAVIANS.

The Moravians, or United Brethren (*Unitas Fratrum*), have a history that reaches far into the past, and is illustrated by deeds of heroism and endurance second to those of no other church in existence. They are the descendants, and still retain in some degree the ritual and discipline, of the old Bohemian and Moravian Churches of the Middle Ages. Near the close of the fourteenth century their organization had taken decided form. About the year 1400, John Huss, converted by the writings of the great English reformer John Wyclif, organized the famous sect that (known as Hussites) were, after his martyrdom, persecuted with dreadful severity, and some of them took arms, and tried to free Bohemia from Catholicism. The religious wars that followed were fearful in their fanatic excesses and atrocities. The nobles were divided, and all the horrors of civil war swept over the land. Those who believed in peace and suffering rather than assault, were fused into a pure, simple, and beautiful organization, this occurring in the year 1457, to which date the present Moravian Church can refer its origin, thus being the oldest of the Protestant Churches. In 1722, Lewis, Count Zinzendorf, received a company of Moravian exiles on his estate Bertholdsdorf, in Upper Lusatia, and there they founded, under his direction and with his help, that village dear to the hearts of all Moravians, Herrnhut, from which so many missionaries have gone forth. This date marks the reorganization of the noble church which had flourished a century before Luther's Reformation under the auspices of the ardent and eccentric Zinzendorf.[1]

One of the first Moravian colonies to America, sent to Georgia in 1735, failed of success, and its members were removed to the site of Bethlehem, their first permanent settlement in North America. They had spent the summer of 1740 in building a house for the famous George Whitefield, at Nazareth, on his five thousand acres of land, situated in the Forks of the Delaware, and now included in Upper Nazareth township. This tract, purchased early in the spring of 1740 from William Allen, a Philadelphia merchant, was intended by the great itinerant as a colony for such of his followers as chose to leave England, and as the site of a school for negro orphans, but circumstances prevented the fulfillment of his designs. His Moravian workmen, as first stated, were allowed to make a settlement there, and on Dec. 22, 1740, having finished Whitefield's asylum at Nazareth, they began, ten miles distant, to rear Bethlehem. Father David Nitschman, their first bishop, and Bishop John Martin Mack helped to fell the first tree to build the first house. Deep snow lay on the ground, and the cold was intense. The next year the timbers were squared and the stone hewn for a larger building, whose corner-stone was laid Sept. 28, 1741, in the presence of seventeen brethren and sisters. The first house was torn down in 1823; the second is still standing in the west wing of the old row on Church Street, next to the Moravian Church, and is one of the most interesting memorials of early Pennsylvania. The name Bethlehem was bestowed upon the colony by Count Zinzendorf, who expected it to become a station for missionary enterprises among the Indians. Instead of that it soon took the forms of an asylum, a school, and academy, and an organized Moravian centre.[2]

[1] Nicholas Lewis, Count of Zinzendorf and Pottendorf, was born at Dresden, May 26, 1700, educated in the Lutheran Church by his grandmother, Baroness Gersdorf, entered Halle in 1710, and the University of Wittenberg in 1716, took an important government position in Saxony in 1721, but resigned it to preach the gospel in 1727. In 1734 he passed an examination in theology at the Stralsund Lutheran University. He came to America in November, 1741, under the assumed name of S. Lewis von Thürnstein. After organizing the First Moravian Church he returned to Europe, Jan. 2, 1743, and died at Herrnhut, May 9, 1760.

[2] Bethlehem has had an interesting history. It is forever associated with self-denying devotion and arduous labor, and is of interest to Christians and to political economists, for here was a sort of society life, pure and kindly. Additions were made to the first buildings until there was a compact assemblage of walls and roofs, massive and foreign in appearance, and thought by many to be representatives of monasteries and nunneries in disguise, though the usages, customs, and spirit of the United Brethren are far different from that of the Church of Rome.

Google

In 1742, the death of Whitefield's friend and helper, William Seward, changed his plans, and he sold the entire Nazareth tract to the Moravians at cost price, the transfer taking place in London, in 1743, for £2200, or about two dollars per acre. The tract was transferred by the Penns with the rights of court baron, the only manor possessing that privilege, and the feudal right consisted in the payment of a red rose in June of each year. The "Rose Tavern," on whose swinging sign was this floral emblem, built in 1752, is mentioned in colonial history and lives in tradition. The whole domain was nominally the property of Erdmuth Dorothea, Countess of Zinzendorf. Their settlements, according to Reichel's "History of Nazareth Hall," extended to and were made at Ephrata in 1743, in Old Nazareth in 1744, at Gnadenthal in 1745, at Christian Spring in 1748, and in Friedensthal in 1750; the total population of all these in 1754 numbering two hundred and seventy-nine. At this time the total number of Moravians belonging to the "Bethlehem Economy" or commune, and governed by its presiding board, including missionaries, numbered one thousand and thirty-four. The corner-stone of Nazareth Hall was laid May 3, 1755, and among those present were Delawares and Mohicans from Gnadenhütten Missions. Bishop Spangenberg presided, and some of the exercises were held on the green in front of the Ephrata stone house that Moravian hands had reared for Whitefield fifteen years before. Rev. Peter Böhler told of the commencement of Nazareth, and of the first Moravian service held there in May, 1740, under an oak-tree near the Whitefield house. In 1759, June 6th, the hall was opened as a boarding-school for Moravian boys, beginning with ninety-two pupils, transferred from Bethlehem. J. C. Ekesparre was the first principal, and Rev. F. C. Lembke his successor. By 1764 there were one hundred and six pupils under his charge, but the church found itself unable to meet the heavy expense, and a system of retrenchment was adopted ending finally in the closing of the Nazareth School in 1779. But it was reopened as a boarding-school for boys of all denominations in 1785, and has been in prosperous existence ever since.

Some allusion has been made to the social organization of the United Brethren. As soon as they were established in Pennsylvania they began to develop their peculiar system of what deserves to be called "Christian Socialism," being a scheme that in some respects would have delighted the hearts of Ruskin and of Kingsley. It was a communion of labor. According to the best authorities the lands belonged to the church, and the farms, workshops, and factories were worked for its benefit. No money was paid to any one. Members of the society devoted themselves to its service, and were put at work in whatever department seemed to the elders most applicable; the pledge of the church was to furnish the necessaries of life to each family and each member. It was a little commonweath, choosing their officers, and making, under the circumstances, the most ardent and successful efforts to educate all the children, male and female. This is the fundamental fact in Moravian history in this country. Their early relations with the Indians also were such that when the French and Indian wars broke out they were enabled to be of great service to the colonies; and the almost absolute seclusion of the homely, primitive settlements they had made in far-off and then frontier valleys, was broken in upon. The quiet and healthful influence of their quaint and old-fashioned customs and doctrines spread more widely. Interesting, indeed, it is to learn that Zinzendorf's daughter, the young Countess Benigna, opened the first Moravian school in Pennsylvania in a house in Germantown, and it is said planted a pear-tree, still standing. The church was a church of missionaries. They had a fixed purpose, educational and progressive, and were active in Christian philanthropy. The limits of Pennsylvania in 1740 were the Susquehanna on the west, the Blue Mountains on the north. Indian villages abounded, and danger of outbreaks was felt. Philadalphia had a population of but thirteen thousand. The colony was settled by a mixture of all races,—French, German, English, Swedes, Dutch, and others. Especially the Germans were in great need of organized religious societies. There were one hundred and twenty thousand of them in Pennsylvania, nominally Lutheran and Reformed, but having not more than eight or ten ministers in their number, and no church organizations. These were Mennonites, or Simonians, from Holstein, with their offshoots, Flemingians and Waterlandians, Arians and Socinians, Old and New Tunkers, Sabbatarians, Hermits, who lived in retirement near Ephrata; and, in brief, there were representatives of almost every conceivable form of belief and mysticism. Zinzendorf, on his arrival, said that Pennsylvania was a Babel. Spangenberg mourned over the irreligion and neglect everywhere manifest among the Germans. The need of the work the Moravian leaders tried to do was therefore manifest.

Here the elders, bishops, and ministers lived, also the students, artisans, and laborers, and also the self-denying women who established the first Moravian schools for girls. From here missionaries were sent out to the Mohicans and throughout Western Pennsylvania, and even as far east as Connecticut. Here Zinzendorf preached, and here, for fifteen years, Bishop Spangenberg, the friend and biographer of Zinzendorf, lived and labored. At Bethlehem the sexes and various conditions of life were divided into classes or choirs, residing in separate buildings, and each governed by a spiritual adviser selected from its number. Until 1762 it was the head of a communistic association of all the brethren of Pennsylvania. The first important accession to their number was in 1742, when a colony of fifteen married couples, five widowers, and twenty-two young men, all led by Bishop Peter Böhler, arrived from Herrnhut. Jan. 5, 1749, the first school for girls was opened in Bethlehem with sixteen scholars, daughters of missionaries and of devout Moravian brethren. In October, 1785, this arrangement was developed into a day- and boarding-school, in other words, into the Bethlehem Female Seminary, which has continued to the present time with ever widening influence for good. John Andrew Huebner was the first principal, 1785–90. From 1785 until the present time there have been more than six thousand pupils at the Moravian Seminary at Bethlehem.

The first Moravian in Pennsylvania was probably George Böhnisch, who preached in 1734 to the Silesian settlers at Skippack. He organized the first Moravian congregation in Pennsylvania, under the name of the Associated Brethren of Skippack. They built a church upon the Wiegner farm, which is two miles south of Kulpsville, and about eight miles southwest of Hatfield, on the North Pennsylvania Railroad, in Montgomery County. Among the early members were Henry Frey, John Kooken, George Merkel, Christian Weber, John Bonn, Jacob Wenzen, Jost Schmidt, William Bossen, and Jost Becker, of Skippack; Henry Antes, William Frey, George Stiefel, Henry Holstein, and Andrew Frey, of Frederick township; Matthias Ginelem and Abraham Wagner, of Matsche; John Bartolet, Francis Ritter, and William Pott, of Oley; John Bechtel, John Adam Gruber, Blasius Mackinet, and George Bensel, of Germantown. This congregation at Skippack was the rallying point of early Moravians in that region, and when the congregations at Nazareth and Bethlehem were afterward formed, the brethren, in their journeys backward and forward, generally stopped at Skippack on their way. Whitefield preached at Skippack (most probably at Wiegner's farm) on his way to view his purchase of five thousand acres of land at the forks of the Delaware, which he made of William Allen in 1740. He was surprised to find on his arrival that there were two thousand persons ready to listen to him.

The noted Bishop Spangenberg arrived in 1736, David Nitschman followed the same year, and George Neisser in 1737. Peter Böhler settled at Nazareth in 1740, and Christian Rauch began labor among the Mohicans that summer. The field was so large that these devoted apostles could not organize any distinct and individual church. That task was reserved for Zinzendorf at Philadelphia.

On the 10th of December, 1741, Count Lewis Zinzendorf arrived in Philadelphia. He was a man of great talents, and strong desire to do good. He is said to have had a hope of uniting all Protestant Christians into a confederacy or league. As previously stated, he assumed the name Lewis von Thürnstein, and came on an unarmed merchant vessel. Zinzendorf accepted the invitation of Henry Antes, a pious wheelwright and farmer in Falkner's Swamp, now Frederick township, Montgomery Co., and attended a Synod or Conference at Germantown, Jan. 12, 1742. It was regardless of denominationalism, though the German Reformed predominated. Zinzendorf, wishing to become acquainted with the people, went to Germantown before the Synod assembled, reaching there December 30th, and preached in the German Reformed Church on the 1st of January, his first sermon in America, from the text, "And without controversy great is the mystery of godliness." January 12th, the first of seven so-called Pennsylvania Synods was begun. It was in the house of Theobold Endt, a Germantown clockmaker, whose descendants, the Endts, still live in that vicinity. The house yet stands, in good repair, west side of Germantown Avenue, near Queen Street, a quaint two-story stone house. Zinzendorf was made moderator, and for two or three days delegates and visitors from various sects met and discussed the best way of bringing about a more perfect union of all Protestant denominations. There were a number of Moravians present, but not as delegates, for no settled congregation of that sect as yet existed. In this and the succeeding Synods the end aimed at was a noble one, but no definite results were reached, though Zinzendorf's ideas impressed the assemblies, as may be seen by the form of some of their resolutions.

Through the earlier half of 1742, Zinzendorf preached at Oley, at Falkner's Swamp, at Germantown, and other places, and gathered the nuclei of subsequent Moravian congregations. At Falkner's Swamp he organized a congregation on March 30, 1742, and at Oley the next day. It is probable that these congregations existed for a short time, but they were broken up by the superior attractions of Nazareth and Bethlehem.

The establishment of a school at Germantown, which must have led to the formation of a religious congregation under the charge of the Brethren, was an early subject of care. It appears that Andrew Eshenbach, from Naumburg, preached at Germantown in 1740, and was the means of drawing attention to the Moravians. In the early part of 1742 the Brethren rented a house in Germantown of J. Ashmead for Count Zinzendorf and his assistants, which was opened as a school in that year. The Countess Benigna assisted as a teacher, as did also Anna Nitschman, who subsequently became the second wife of Zinzendorf. In the annals of early Moravian settlements (Reichel, p. 181), it is said, under date of March 25, 1742 (Sunday), that Brother Ludwig (Zinzendorf) organized a congregation in Germantown, and preached in the Reformed Church, from Psalms xix. 21. On April 8th he preached there again, from St. John vi. 1–14. In the school on April 29th he preached again to the Germantown congregation from John xx. 24. A love-feast was held at his house on May 4th. The proposed school was opened at his house, with twenty-five girls as pupils. The teachers were Brothers Seyffert, Zander, and George Neissor; Sisters Benigna, Magdalene Muller, and Anna Nitschman. At this time Zinzendorf seems to have alternated between Germantown and Philadelphia. How long the Germantown congregation remained is not known. It must have died out after he left North America.

In Philadelphia Zinzendorf began ministrations in a barn on Arch Street below Fifth, then fitted up with seats and used in partnership by the German Reformed and the Lutherans. His Lutheran tendencies and training fitted him to take charge of a Lu-

theran Church, and May 30, 1742, the congregation above mentioned called him to take its charge. Indeed, it is said that he claimed to be inspector-general of the Lutherans, and had for some months supplied a Lutheran Church in Germantown. He accepted the call of the Philadelphia Lutherans, but wishing to do a certain amount of missionary work elsewhere, associated John Christopher Pyrlæus, a Saxony Presbyter, with him as assistant, and left matters much in his charge. Rev. Henry Jacobson, in his "History of the Moravian Church in Philadelphia," proceeds to tell what the consequence was. Pyrlæus, though evidently a hard worker, gave offense to a strong faction, and on the 29th of July, 1742, while in the pulpit, and officiating, a gang of his opponents dragged him down, and from his place, trampled upon him, and put him out of the church. The only accounts left do not enable us to identify the cowardly assailants, except that there seems to have been trouble between the growing Moravian element and the conservative Lutheran element. This affair was the prime cause of the establishment of a separate Moravian Church as soon as Zinzendorf returned from his preaching tour. Without this event, to crystallize the tendencies of things, separation might have been long delayed. The foregoing account of the causes which led to the organization of this congregation is that of Rev. Hermann Jacobson in his history, but another view is strongly supported by Mr. Westcott, viz., that the church was built by Zinzendorf, for the Lutheran congregation over which he claimed authority, upon his first arrival in the country, but the arrival of Henry Melchior Muhlenberg, with direct authority from the University at Halle, in the latter part of that year, changed the tactics of Von Thürnstein (Zinzendorf), and so he made arrangements to transfer the church to the Moravians.

The congregation Zinzendorf organized consisted of thirty-four persons. They took up a lot on the east side of Bread Street and south side of Sassafras [now Race] Street, which, on Aug. 20, 1742, was transferred by William Allen and wife to Samuel Powell, Joseph Powell, Edward Evans, William Rice, John Okley, and Owen Rice, for a lot thirty-five feet east and west on Sassafras Street, by one hundred and two feet deep. The parties named were not all Moravians, but the deed was made to them in trust, according to the declaration of April 22, 1746, for "a certain congregation of Christian people, as well German as English, residing in the city of Philadelphia, belonging to the church of the Evangelical Brethren, who have caused to be erected thereon a new building for and to their use and service, and intended so to be and remain in their use and service for and as a church and school-house to S. Lewis Thürnstein, knight, David Nitschman, Joseph Spangenberg, Henry Antes, John Broomfield, and Charles Brockden." Twenty-five feet adjoining this lot were afterward purchased, probably before 1746, of Lawrence Kunze, although the conveyance was not actually made until Jan. 15, 1782. The church building was commenced immediately after the conveyance of 1742. The corner-stone was laid Sept. 10, 1742, by Count Zinzendorf, and proceeded with such rapidity that it was dedicated by him on the 25th of November following. This building was set back from Sassafras Street thirty-five feet. It had a front of forty-five feet on Bread Street, afterward called Moravian Alley, and was thirty feet deep. The building was about twenty feet in height to the eaves, from which started a broken pitch- or hip-roof of about ten feet to the upper ridge. There were two large windows on the eastern side, and two of corresponding size on the west. Two small windows were

THE ORIGINAL MORAVIAN CHURCH ABOUT 1742.

on the south, one to give light to the gallery. The discipline of the church requiring that the brethren and sisters should be separated in worship, the sisters' door was on the west side near the south corner of the building, while the brethren entered on the east by a door near the north corner. The church was a two-storied building, the first story being used as the church proper. Ritter's "History of the Moravian Church in Philadelphia," to whom we are indebted for these particulars, says that the lower audience-chamber, or church proper, was about twenty feet in height from the floor, wainscoted about five feet, and plainly whitewashed above to the ceiling, which was also whitewashed. Stairways, with old-fashioned broad hand-rails, on the north and south sides of the church, led to the galleries, which extended also on the east side of the church. The pulpit was on the west side of the room. Six steps led up to it, and the seat was a board built into the wall. In front of the pulpit a large "gloria" of wood, with carved rays, and

gilt, darted from the letters "I. H. S." in the centre. A square oaken table in front of the pulpit was covered with a green cloth, with an old-fashioned, high-back, rush-bottom chair behind it. An organ was in the gallery. A sconce and candelabra hung from the ceiling. The pews, ten in number on each side of the church, were separated by a broad aisle. They were really plain benches with a rail at top. The only touches of comfort in the room were the window-curtains on the western side, which were large and of green color. It is believed that in this little room the congregation worshiped for full fifty years, without a stove in winter. This is more probable from the fact that when a stove was obtained, the building being without a chimney, the pipe was led through a window into the yard. The entrance to the hall, or upper chamber, was by stairways leading from the galleries. This room was in fact an attic, the east and west shaped by the roof, but the whole being wainscoted, so as to make the interior sightly. It was lighted by six small dormer-windows on the east and a square window on the south. It was fitted up with a table and chair for the minister or teacher; plain benches; a hanging sconce or candelabra; side branches of tin with candlesticks; a small organ, which was placed on the south side of the room. The hall was, when the church was first opened, intended to be used for night services. But it seems, from a statement in the newspapers of the day, that these exercises were so much interrupted by rude young men who made noises with some sort of an instrument, making a sound like that of a cuckoo, that the attempt had to be relinquished. This room was used for the more sacred ordinances of the church, the washing of feet, the communion, love-feasts, reception of new members into the congregation, and the trials of members for infractions of the ecclesiastical or moral law.

On the 30th of June, 1746, a parsonage house was commenced on the north of the church, which extended to Race Street. It adjoined the latter, and, when finished, made the whole seem like one building. It was thirty feet front by thirty-five feet deep. It was intended for the residence of the minister and of missionary brethren. There were four rooms on the first floor, used for parlor or reception-room, study, kitchen, and room for the family. Five or six sleeping apartments were in the second story, and a passage or door led into the hall or second story of the church adjoining, and it was used by the sisters upon occasion. A similar entrance in the first story admitted the minister. The entrance for the brethren was effected by the original door on the northeast of the church, access to which was had by a passageway ten feet wide, leading from Sassafras Street, on the east of the parsonage. On the east and south of the church was a space reserved for a garden, which was neatly cultivated.

This first Moravian congregation in Philadelphia contained those who had left the Lutherans when the Pyrlæus affair occurred, and a number of Moravians from Herrnhut, by way of England, who had been awhile in Nazareth and Bethlehem (Jan. 1, 1743). On the evening of his departure from America Count Zinzendorf organized these members into the First Moravian Church. Mr. Ritter gives the names of the following Moravian ministers between the years 1743 and 1747, some, and perhaps all, of whom sometimes preached at Philadelphia: Peter Böhler, David Bruce, Thomas Yarrel, John Okley, Owen Rice, Richard Utley, Edward Evans, Thomas Greening, Matthew Reitz, Richard Ronner, Andrew Eschenbach, John Bechtel, and Daniel Neubert. Between 1747 and 1751, Abraham Reinke, Owen Rice, and John Gambold. Rev. Hermann Jacobson says that the brethren of most influence in the congregation were Pyrlæus, Böhler, Rice, Yarrel, Rentz, and Reinke. The last four, ordained as deacons, soon became missionaries and ministers elsewhere.

Count Zinzendorf's zeal frequently led him to measures which would seem strange to persons living at the present day. In a Philadelphia paper, published in 1743, is a letter from Zinzendorf to Frederick Vende, a cooper, residing at Germantown, and his wife, dated Philadelphia, Dec. 26, 1742. It seems to have been a demand for Magdalena, the daughter of Vende, who was claimed as a member of the Moravian congregation. It will show the manner in which the Count discharged his ecclesiastical duties:

"DEAR COOPER AND COOPERESS:

"Although I take you both to be notorious children of the devil, and you, the woman, to be a twofold child of hell, yet I would make your damnation as tolerable as possible. . . . For although the laws of this country wisely provideth against such unreasonable parents, and will not suffer you to keep her against her consent, yet for want of it you may vex her soul. If, therefore, that sevenfold devil which possesseth you will permit you to recollect yourself, then consider what has happened, and leave your daughter to the congregation as perhaps the best means to promote your temporal and perhaps spiritual welfare. . . . In case you die without forcing your daughter away, your former sins shall be forgiven you. But if you presume your murdering spirit against her soul by her consent or not, I recall my peace, and you I leave to the devil; and the curse of your child—thereby lost—shall rest on you until she is redeemed."

Zinzendorf's biographers say that the idioms of the colloquial German dialect, in which this and some equally startling letters are written, lends itself poorly to translation, and evidently seemed only a rather strong sort of an appeal to those who received it. However this may be, there is evidence enough of the count's eccentricity in his published sermons and writings. He was a strong, earnest, and very peculiar man, and engaged in many controversies. The Moravian doctrines were attacked by Rev. Gilbert Tennent and other Presbyterians. This led to the publication of an able pamphlet on the Moravian side, entitled, "The Examiner; or, Gilbert against Tennent, containing a confutation of the Rev. Mr. Gilbert Tennent and his adherents. Extracted chiefly from his own writings, and formed upon his own plan of com-

paring the Moravian principles with the standard of orthodoxy, in distinct columns, etc., by Philalethes." In the *Pennsylvania Gazette* of April 7, 1743, is a translation from the Latin, by P. Reading, B.A., of a letter of Lewis von Thürnstein, in which he styles himself deacon of the Moravian Church. It is addressed "To people of all ranks and persuasions which are in Pennsylvania." It sets forth the conditions in which Christian people are dispersed, the different sorts of opinions of religions, and contains a defense of the brethren. It is dated "Lecha [Lehigh], Aug. 29 [according to the vulgar computation], 1742." In the same paper Peter Böhler advertises "that many pieces concerning the Moravian brethren have been mistranslated," and he gives notice that the congregation at Bethlehem will themselves "cause such things to be translated as from time to time they shall judge useful." In the same paper of May 15, 1743, are printed "Answers of the illustrious Count of Zinzendorf, which he wrote down with his own hand in the German tongue, directly upon the sight of the following questions, without any premeditation, at Germantown, March 21, 1741–42. Translated by Peter Böhler."

The questions are upon doctrines, polemical points, etc. The Rev. Gilbert Tennent, in a subsequent paper, reviews Zinzendorf's positions. Zinzendorf made a farewell speech, Dec. 29, 1742 (O. S.), at the house of John Stephen Benezet, a wealthy member of a noble Huguenot family. He settled in Philadelphia in 1731, and had been for some time a Friend, but was the first treasurer of the Moravian congregation, and three of his daughters married Moravian clergymen. The count was his guest when first arriving in Pennsylvania. Said Zinzendorf, "Here, in America, the congregation of God in the spirit is the 'factotum,' and not the Moravian Church." ("Factotum" meaning "chief thing.") "I see no reason," he went on, "why the Moravian order and church discipline should be introduced in this country. The only cause for not leaving the Moravian plan out entirely is, that it unites the Lutheran and the Reformed." Here we see again the apostle's idea of church unity. He set sail for Europe early in January, 1743, and was never again able to visit America, though often expected and ardently longed for, especially by the Nazareth community, which reared its large buildings in full expectation of his speedy return. Financial and political causes combined to prevent this. Yet the most notable figure in early Moravian history in America is that of this picturesque enthusiast, Count Lewis Zinzendorf.

In 1747 the Philadelphia congregation was threatened with disunion. It was composed of both English and Germans, the latter having Brother Rentz as pastor, and the former Brother Yarrel. Bishop Cammerhof, of Bethlehem, wrote to Count Zinzendorf, and explained it by saying that the English were proud and overbearing. The English, on their part, accused the Germans of exercising too severe discipline, and of arrogating all the high officers. The existence of the church was in danger. Bishop Spangenberg had to visit Philadelphia, investigate and measure out judicious punishment. Brother Abraham Rienke was made pastor of both Germans and English.

Meanwhile, as Reichel says in his "Memorials of the Moravian Church," a small congregation was founded by the Moravians in Allemingle township. It commenced in the establishment of a school, which was opened in February, 1747, by the brethren. On Dec. 14, 1751, a new school-house, which had just been erected, was dedicated by Nathaniel Seidel, on which occasion sixty partook of the love-feast and seventeen of the sacrament. In January, 1755, Rev. Abraham Rienke officiated at the first interment made in the graveyard adjoining the house. This building was called in later times "the old white church." The Moravian congregation remained until October, 1755, when in consequence of Indian depredations and barbarities, the church was broken up, and some of the families belonging to it removed to other parts of Pennsylvania. The school-house was afterward sold to the Lutherans.

According to the statements in Ritter's history, the following ministers had charge of the First Moravian Church in Philadelphia during the quarter of the century following the year 1750, to wit: 1651, John Gambold; 1751–53, Abraham Rienke; 1753–54, Jacob Rogers, —— Herman, John Brandtmiller, and Abraham L. Rusmayer; 1754–56, John Valentine Haidt, Christopher Frank, and Thomas Yarrell; 1756–62, Christian Otto Krogstrup, Jasper Payne, —— Herman, Jacob Rogers, —— Till, and Henry Beck; 1762–74, George Neissor, Richard Utley, and Jacob Fries; 1774–84, Daniel Sydrick.

During the same time transient visits were paid to the church by Bishops Spangenberg, Cammerhof, and Rev. George Soelle. The church was maintained during all this time without a settled pastor, the itinerancy being a part of the discipline of the church. Daniel Sydrick, as noted above, was in charge during the Revolutionary war. The history of the Moravians seems to have been a quiet and undisturbed current while the war swept about and over them. We do not hear of any disturbance even during the British possession of Philadelphia. When Sydrick retired, in 1784, Rev. George Neissor, who had been one of their pastors between 1762 and 1764, assumed charge, but died in November, that year, and lies buried in the graveyard at the corner of Franklin and Vine Streets. The itinerant character of the pastorate was at this time changed, and a permanent one established by Rev. John de Watteville, a son-in-law of Count Zinzendorf, and husband of his eldest daughter, Henrietta Benigna Justina. This minister was familiarly called "Brother Johannes," and he was a delegate from the parent church in Herrnhut to its branches

in America. On Sunday, June 5, 1785, the committee appointed by Brother Johannes to transact the business of the United Brethren Church in Philadelphia, met for the first time. It consisted of the following persons: Bernhardt Adam Grube, Jacob Fries, ministers; Adam Goos, George Schloscher, John Peter, John Cornman, George Senneff, Conrad Gerhardt, Godfrey Haga, and Thomas Bartow. This was called the standing committee or vestry, and of that body Brother Thomas Bartow was appointed secretary and general accountant of the church. It appears that Brother Neissor was succeeded by B. A. Grube and Rev. Jacob Fries. The name of the latter does not appear upon the church minutes after June, and Rev. B. A. Grube, between July and October, 1785, also retired. Rev. John Meder succeeded, and was very attentive to his duties, preached regularly twice on Sundays, and added, after the latter service, catechisation and special religious instruction for the youth of his congregation. He also held religious meetings on Wednesday and Friday evenings of each week, and performed all parochial duties. He continued in these ministrations during the dreadful periods of the yellow fever of 1793 and 1798. In 1799 he was called to serve the congregation in New York, and Rev. John Frederick Frueauff was appointed for the vacancy, which he filled until the year 1803.

We have thus brought the story of the Moravian Church down to the beginning of the present century. Let us pause a moment to observe what the manners, customs, and church government of these interesting people were before the great controversies and changes which occurred between 1817 and 1825. The discipline of the church at this time was very straight. Admission to communion was not a matter following upon confirmation. Applicants were admitted only after six months' probation, during which time there were interviews with the minister, conferences and instructions, after which it was necessary that the application should pass the Conference at Bethlehem, where it was determined, after prayer, by lot. The lot was the governing influence among Moravians which settled many difficult matters, most prominent among which was marriage. Under this custom the Moravian who was matrimonially inclined and wanted a wife made known his desire to the minister or Conference. He had the right of suggesting his companion, and if the lot luckily was favorable he was happy, but if he drew a blank or negative the lot was again resorted to, and some marriageable woman chosen. It was his duty to be obedient to the will of Providence. It is claimed by Moravian writers that this chance method of determining the most serious obligation which human beings can enter into was generally happy, even when the persons brought together were previously almost strangers.

In the early period of the church, and until after 1800, there were peculiar regulations in regard to costumes, which were enforced by superior authority. In the meetings the sexes were separated. The women generally wore caps exceedingly plain, and white, three-cornered kerchiefs covering the breast and shoulders. The females were divided into classes, designated by the color of their cap-ties. Young girls from twelve to sixteen years of age were allowed to wear red ribbons; the single sisters who had attained the dignity of womanhood wore pink ribbons; married women were designated by ribbons of blue; while widows had white ribbons to their caps. The brethren were also divided into classes, consisting of great boys (*knaben*), single brethren, married brethren, and widowers. They wore simple costumes, but not such plain marks of distinction between them as were observable among the women. Ritter says,—

"The straight, unlappeled, dark-brown coat, the broad-brimmed, low-crowned hat, the knee-buckled small-clothes, the broad, round-toed shoes were consistent characteristics of a Moravian brother, while the plain drab or silk bonnet, the three-cornered white kerchiefs, the plain silk gown (Sunday dress), the comfortable hood-finished cloak, the stuff shoes for comfort and convenience were the sisters' concession to St. Peter's advice, 'Whose adorning let it not be that outward plaiting the hair and wearing of gold or putting on of apparel.'"

The officers of the church included some not known in other religious organizations. The "inviter" was an officer whose duty it was to give notice of a death, and to invite the friends of the dead person to attend the funeral. Written or printed invitations to attend funerals were before the Revolution, and for some years afterward, unknown. He was dressed in appropriate costume, and passed from house to house, bringing forth the inmates by loud raps administered with his knuckles, or by the knocker, if the door possessed such an adjunct, and, upon response being made, informed the person who answered the summons of the nature of his errand in a proclamation, in a solemn tone, and in set words. The German Churches also had inviters, and upon the cessation of that duty by John Merck, in 1794, Henry Cress, of the German Lutheran Church, was appointed inviter of the Moravian congregation. The chapel servant had charge of such preparations as were necessary during the time of service in the congregation, the preservation of order, etc. His duties were somewhat analogous to those of sexton of a modern church. The almoners administered the charity which the congregations contributed to the needy. The sustentation fund committee had charge of moneys given for the support of the minister and maintenance of worship in the church. This was effected by annual subscriptions of twenty shillings from each subscriber, and from the rent of some small properties near the church. The collections were not many. There was one for the poor annually, which Ritter says yielded from eight to ten pounds. One was taken up for the Society for the Propagation of the Gospel among the Heathen, usually called the Heathen Society. This averaged about thirteen pounds per annum. There were no

regular Sunday collections. The offerings were taken as the people were departing, upon a pewter plate, at each door, by the chapel servants.

In 1794, the standing committee of 1785 being reduced by the deaths of Brothers Senneff, Peter, and Bartow, their places were filled by the election of Brothers Isaac Smallwood, Jacob Ritter, Sr., and Jacob Frank. Rev. John Meder succeeded Brother Bartow as secretary of the committee between 1792 and 1794, after which Frederick Boller was elected. Brother Bartow, being the steward and general accountant from 1785 to 1792, was succeeded in the latter year by Brother Conrad Gerhardt, who held it until 1814. The collectors of the Sustentation Fund were, in 1785, George Schloscher; 1785 to 1788, George Senneff; 1788 to 1793, Godfrey Haga; from 1793 to 1800, and up to 1823, Jacob Ritter, Sr. The almoner from 1785 to 1814, with the exception of one year, in which George Schloscher officiated, was Conrad Gerhardt. The organists in 1785 were George and John Peter, and they were succeeded by Frederick Boller and John Boller. The chapel servant from 1785 to 1787 was John Merck, and Jacob Frank from 1787 to 1819. John Merck was "inviter" from 1786 to 1794, and was succeeded by Henry Cress and George Gasner, of the Lutheran Church. Brother Jacob Ettwein was grave-digger in 1786, and for some years thereafter.

Until the year 1757 the Moravians owned no burying-ground in the city. The Nazareth burying-ground was laid out in June, 1743, but upon the decease of any of the members interments were made in the various cemeteries in or near the city, either by contract or by courtesy. The cemeteries most used during this period were those of the Church of England, the Quaker burying-ground, and the Potter's Field. In May, 1757, the congregation purchased a piece of ground for burial purposes, of which the following are copies of the titles:

"*Deed May 10th*, 1757.

"Samuel Jones, and Amy his wife, heirs of Joshua Lawrence, to Lewis Cassler, for lot of ground in the Northern Liberties, north side of Vine Street, and west side of a fifty feet street, since called Lawrence Street, being eighty feet two inches on Vine Street by one hundred and forty feet on Lawrence Street, granted by patent of John Penn to Joshua Lawrence with other ground Feb. 15, 1734."

Lewis Cassler subsequently conveyed the above as follows in trust:

"*Deed burial-ground December 28th*, 1786.

"Ludwig Cassler to George Schlosser, John Peter, Adam Goos, John Cornman, Thomas Barton, Godfrey Haga, and Conrad Gerhart, for lot of ground on north side of Vine Street and west side of a fifty feet street called Lawrence Street, in trust. Consideration, £82 15s. Pennsylvania currency, or $215.33⅓.

(Signed) "SAMUEL JONES.
"AMY JONES.

"Witnesses,
"L. WEIS.
"PETER MILLER."

The following, from the church diary, is the account of the consecration of the new ground and the interment of the first corpse:

"1757. The 28th of June was the new burying-ground of the United Brethren in Philadelphia consecrated by Brother Otto Krogstrup, and the first corpse buried, namely, Mary, a daughter of Adam and Margaret Schitteheim, who was born and baptised on the 19th of January, 1755, by Brother Franck, aged 2 years, 4 months, 12 days."

On a slip of paper attached to the above is the following:

"The tombstone is to be in breadth twelve inches, and in length eighteen inches. *Es ist so in Bethlehem ausgemacht.* (It is so made in Bethlehem.)"

The oldest tombstones in the yard are those of Elizabeth Payne, who died Aug. 28, 1757, and Mary Helm, who died June 28, 1757. The Christian Indians during the disturbances with the Paxton boys were protected by the Moravians in the city, but suffered severely with disease. In the period from the 9th of February to the 24th of December, 1764, fifty-six Indians died by smallpox and fever. July 11th, four of them died, on the 16th three, and on the 24th and 28th, each day, three. When the first one died a grave was dug for the body in the church burying-ground on Vine Street, between Seventh and Eighth Streets. But some "evil-minded persons filled up the grave in the night." After this all who died were buried in the Potter's Field, now Washington Square. The Indians left the barracks on March 20, 1765, being liberally supplied with necessaries by the colonial government, and went to Fort Allen. The Moravian burying-ground appears to have been unprotected, except by a post-and-rail fence, until 1786, when the "committee of the church" ordered the purchase of four thousand feet of New England pine boards to make a board fence, of which report was rendered and account of items stated, amounting to £50 11*s*. 3*d*., which sum was immediately collected and paid. During the prevalence of the yellow fever in 1793 eleven, and in 1798 thirteen, members of the congregation died.

The Nazareth graveyard was laid out in 1756, and Peter Lehnart was the first buried there, Feb. 14, 1756. A matter of considerable interest relates to the method of arranging the graves. A history of religious denominations, published in 1783, remarks that, as one of the peculiarities of the Bethlehem Moravians, "These simple-minded people lay their dead with their heads to the south and their feet to the north." But this is not a universal rule. In Herrnhut, the Moravian Mecca, the place where the Unitas Fratrum were renewed, the dead are buried in rows, east and west, the feet toward the west. In Nazareth, Lancaster, Litiz, Philadelphia, and Lebanon they were buried lying east and west, with feet toward the east. In the Bethlehem cemetery it is the lay of the land which induced the north and south arrangement.

When the nineteenth century dawned the pastor of the First, or Race Street, Church was Rev. John Frederick Frueauff, but in 1803 he was called to the inspectorship of Nazareth Hall, and so resigned his

charge.[1] Rev. Joseph Zaeslein became his successor, and served till 1812; but losing his wife, and the church rules forbidding any one without a wife from acting as minister, he resigned and went to Bethlehem. Rev. John C. Beehler occupied the pulpit for one year, then went to Staten Island, N. Y. Rev. John Meder (who had ministered to the congregation from 1785 to 1789) again assumed charge, but in 1814 was succeeded by Rev. George Godfrey Miller, of Muskingum Station. In 1817 the latter removed to Litiz, then a strong Moravian centre. Rev. William Henry van Vleck was next appointed in 1817. He preached his introductory sermon in English from 1 Cor. iii. 11–13. During the pastorship of this clergyman a question came to a final decision which had been mooted in the congregation in 1806. The situation of the church at the corner of Race and Bread Streets had become by the changes in business an active neighborhood not inviting to strangers; not only the objection to the locality was urged, but the fact that the old church was inconvenient and too small. Want of funds and the difficulty of finding another suitable location quelled the agitation in 1806. It was renewed about ten years afterward. There were some who advocated building upon the burial-ground lot of the congregation at Lawrence [now Franklin] and Vine Streets. But there was not unanimity, and the matter was again suspended.

In 1817 the congregation settled finally an irritating question, which had been the cause of heat, controversy, and separation in the Lutheran and Reformed Churches, namely: the subject of changing the services from the German to the English language. The Moravian congregation in Philadelphia had been founded by Germans, and was under the control of the Bethlehem establishment, which was entirely German. But the changes in manner, and the fact that the German children were taught in English, and that they forgot the language of their fathers as soon as possible, offered a serious obstacle to the progress of the congregation. In fact, the German element in the Moravian congregation had been so weakened years before that it was not able to resist, even had it been willing to do so, the partial use of English in the church services. They were held every other Sunday in German; but, the majority now becoming in great degree English, they joined in 1817 in voting that the German language should not be used in the future services of the church. The question was carried by a large majority, there being few Germans in the congregation willing to contest the matter. The result of this movement was exceedingly beneficial to the church. It brought into the congregation a new element, and, in comparison with previous progress, may be said to have originated a new era of prosperity. Mr. Van Vleck was fully capable of carrying on the services in English to the entire satisfaction of persons acquainted only with that tongue. Ritter says, "His popularity was induced as well by his unadorned oratory and manner as by the spirit-endowed matter. Untiring in zeal and winning in its application, he reached the heart kindly."

The access of new members and the dissatisfaction with the old arrangements brought the question of a change of the location of the church into prominence once more in 1819. It seemed that there could be no agreement as to the proper place for the new location, and at length it was determined to tear down the old church on Race Street, and erect a more modern and convenient edifice in its place. The committee was composed of Daniel Man, Francis Kampman, Jacob Boller, William Gerhard, and George Ritter.

In the spring of 1819 the venerable building, which at that time was the most quaint and striking specimen of the style of architecture of the eighteenth century, and where the fathers of the Moravian Church in America had preached, was, after seventy-seven years of service, torn down. The corner-stone of the new building was laid on the 12th of May, 1819. Fifteen clergymen of the Presbyterian, Episcopal, Lutheran, Reformed, and Baptist Churches assembled in the Moravian parsonage and accompanied Rev. Mr. Van Vleck to the spot where the ceremony took place. Mr. Van Vleck delivered an address, and placed in a box to be inclosed in the corner-stone books, coins, written papers, names of officers of the church, etc., and this inscription:

"This corner-stone
of a new church or meeting-house of the
society styled
The Protestant Episcopal Church of the Unitas
Fratrum, or United Brethren,
adhering to the twenty-one doctrinal doctrines
of the
Augustan Confesses or Confession of Augsburg,
erected on the site of the former church
built in the year 1742,
was solemnly laid
in the name of God the Father, God the Son,
and God the Holy Ghost."
May 12, 1819.

"Text appointed for the day in the Brethren's Church, 'I will restore health unto thee, and I will heal thee of thy wounds, saith the Lord.'—Jeremiah xxx. 9.

"'Ye are the temple of the living God.'—2d Corinthians i. 16.

"Present number of members belonging to the congregation one hundred and fifty adults, of whom fifty are communicants; one hundred children; total, two hundred and fifty."

[1] Nazareth Hall and the boarding-school there, as well as the extended economy of the brethren, had been extremely prosperous, outgrowing their earlier difficulties. Rev. C. G. Reichel, a graduate of the Moravian Theological Seminary in Barby (Saxony), became in 1785 principal of the school, and so remained till 1802; during these seventeen years one hundred and sixty-three pupils were taught there. Mr. Reichel was then made a bishop, and called to Salem, N. C., where the Moravians had settled in 1753. In 1818 he returned to Herrnhut. Mr. Fruesauff must have held an inspectorship over some other department at Nazareth, as Reichel's successor, Rev. Jacob Van Vleck, took immediate charge of the school, serving from 1802 until 1809. This gentleman was descended from an old Dutch family in New York, and during his administration the Moravian Theological Seminary was founded.

In order to suffer as little inconvenience as possible, the southern portion of the building, which comprised the original house for the church, was first torn down, and the new church building was erected upon its site. The old parsonage building, which fronted the church on Race Street, was left standing, to be used until the church was completed. The congregation removed for public worship to the old academy on Fourth Street, below Arch. The English Lutheran congregation of St. Matthew's was worshiping there at the same time, and an amicable arrangement was made between the two congregations, by which it was agreed that the Rev. Mr. Van Vleck should preach alternately with the Rev. Mr. Cruse, of St. Matthew's. The contractor for the building was Joseph Worrell, a member of the society. Its dimensions were forty-four by fifty-three feet. Mr. Van Vleck conducted the regular services of the day, preaching from 1 Kings, chapter ix., verse 3. In the afternoon there were further services, in which the Rev. Dr. Broadhead, of the Dutch Reformed Church, and Dr. Helmuth, of St. Michael's and Zion's Lutheran Churches, took part. In the evening the Rev. Mr. Cruse, of St. Matthew's English Lutheran Association, and Mr. Helfenstein, of the German Reformed Church, assisted Mr. Van Vleck. There were also present Bishop White, of the Protestant Episcopal Church, and Rev. Drs. Shaefer and Mayer, of the Lutheran Church.

The building cost about ten thousand dollars, one half of which was the gift of Godfrey Haga. Ritter says, in his description of the building,—

"The front entrance of the church was guarded by a small vestibule of about five feet in depth and ten in breadth, leaving a door at each side opening to the stairway of the galleries, as well as to the area below; but for the more convenient egress of the congregation, a large folding-door formed the centre of the partition. The elevation of the building was two feet six inches, leaving only space below for a current of air. A cellar was objected to, lest at some future period it might be let for the storage of malt or spirituous liquors. The height of the building was twenty-nine feet to the eaves, and thirty-six feet to the apex. The interior arrangement was plain and unadorned. The pulpit was a meagre apology for a sightly rostrum."

The side galleries were nine feet wide; the organ gallery twelve feet. A new organ, which cost twelve hundred dollars, was placed in position in 1825, E. N. Scherr builder; the old organ, which had cost four hundred dollars, being taken in part payment. The first organ the church had bought was in 1797, of Peter Kuntz, organist of Christ Church, and was in use till 1809, when it was exchanged with John Shermer for one of four stops, which cost four hundred dollars, valuing the old organ, which was taken in part payment, at one hundred and twenty dollars, thus requiring only two hundred and eighty dollars in cash. This organ remained until after the erection of the new church, in 1819. The organists between 1800 and 1825 were Frederick Boller, John Boller, Jacob Boller, and Abraham Ritter, who served from 1817 to 1843.

After the church was dedicated the old parsonage on Race Street was torn down, and a passage through from Race Street was opened. On each side of this space was built a three-story brick house for the church home, one of them being the residence of the pastor. In 1822, Mr. Van Vleck was called to the inspectorship of Nazareth Hall. He was succeeded by Rev. Samuel Reinke, who served until December, 1822. He preached his valedictory sermon November 8th, from Acts xx. 18. He was succeeded by Rev. John G. Herman, who was in charge of the congregation in 1825.

During this quarter-century there were changes in the officers of the church. The standing committee —analogous to the vestry or trustees in other churches —was composed in 1800 of Isaac Smallwood, Jacob Ritter, Sr., and Jacob Frank. From 1803 to 1809 it consisted of Conrad Gerhardt, Godfrey Haga, Jacob Frank, Jacob Ritter, Sr., John Jordan, and John Boller. In 1809 there was a vacancy caused by the death of John Boller, and Benjamin Lyndall was chosen to fill it. Conrad Gerhardt died in 1814, and his place was filled by the election of Jacob Ritter, Jr., in 1817. In 1821 Adam Neiss replaced Jacob Frank, deceased. He was expelled in the succeeding year, and Joseph Lyndall was elected in his place. In 1825, Joseph Lyndall and Godfrey Haga being dead, John W. Peter and George Esler were elected. Benjamin Lyndall died in 1818, and Thomas C. Leuders was chosen in his place. The secretaries of the committee were as follows: 1794–1802, Frederick Boller; 1802–9, John Boller; 1809–18, Jacob Ritter, Jr.; 1818–25, John Wise Peters. The treasurers of the church were: from 1795–1814, Conrad Gerhardt; from 1814–15, William Gerhardt; and from 1815–34, Jacob Ritter, Jr. The stewards after Thomas Barton, who served from 1785 to 1792, were: Conrad Gerhardt, 1792–1814; William Gerhardt, 1814–15; John Jordan, 1815–36.

The collector of the sustentation fund from 1793 to 1823 was Jacob Ritter, Sr. The almoners were, from 1788 to 1815, Conrad Gerhardt, and from 1815 to 1836, William Gerhardt. The superintendent of the burial-ground from 1812 to 1818 was Benjamin Lyndall, and from 1818 to 1825, and afterward, Jacob Ritter, Jr.

Jacob Frank, the chapel servant, who was appointed in 1787, served until his death, Nov. 26, 1819, he being then above the age of seventy-six years. Jacob Ritter, Sr., was also chapel servant from 1787 to 1819. They were assisted in those positions between 1801 and 1804 by Zachariah Poulson, father of Zachariah Poulson, publisher of the *Daily Advertiser*. Poulson, Sr., was a native of Denmark, and was born at Copenhagen, June 16, 1737. His father, Nicholas Poulson, brought him to America in 1749, settling in Germantown, where he died a few years afterward. Zachariah was placed as an apprentice with Christopher Sauer, printer, in Germantown. He married Anna Barbara, daughter of Andrew Stollenberger,

formerly of Lindenbach, near Wertheim-Leibenstein, in Germany. Zachariah Poulson died in Philadelphia, June 4, 1804. He was succeeded as chapel servant by Jacob Ritter, who served for many years. In 1820, Adam Neiss took this office, but was expelled from the church in the same year, and George Ritter was elected in 1820. He served many years afterward.

Godfrey Haga, long a member of this congregation, died in 1825. He had disposed of one hundred thousand dollars in charitable gifts in the nine years previous to his death. In his will, after bequests to relatives and friends, amounting to more than fifty thousand dollars, he bequeathed two thousand dollars to the Church of the United Brethren, six thousand dollars to the bishop at Bethlehem, to be divided among superannuated preachers and their widows, and twenty-five thousand dollars were bequeathed to benevolent institutions in Philadelphia. The residue of his estate was bequeathed to the Society of the United Brethren for the Propagation of the Gospel among the Heathen, of which he was a member, the interest on twenty thousand dollars of that amount to be expended at Nazareth Hall in educating pious young men for the gospel ministry and for missionary purposes; the residue for the "purpose of enlarging the schools in the Indian country of North America and elsewhere, for furnishing and providing books, diet, and clothing for such children whose parents are unable to supply them, and for the instruction of persons as schoolmasters and schoolmistresses in the seminaries of Nazareth and Bethlehem." The value of this residue thus disposed of was two hundred and twenty thousand dollars.

A number of the earliest members of the church died during this period. John Adam Goos, born in 1712, probably one of the "original thirty-four," whose names are not all recorded, died Nov. 28, 1804, aged ninety-two. George Schlosser died Feb. 25, 1802, aged eighty-seven; Conrad Gerhardt, Feb. 24, 1815, aged seventy-five; John Cornman, June 22, 1794; Isaac Smallwood, Jan. 7, 1811, aged fifty-six; John F. Boller, Nov. 24, 1802, aged thirty-five; Abram Frank, Nov. 26, 1819, aged seventy-six. In 1805 the burial-ground at Lawrence and Vine Streets was surrounded with a strong brick wall, as the street had been graded several feet below the natural surface.

In November, 1817, the congregation received an elegant piece of plate for the baptismal rite, inscribed "Unitas Fratrum, Philadelphia." It was the gift of an unknown lady, who sent it with a note, unsigned, begging its acceptance. A set of silver plate for communion service was presented by Capt. James King in 1820, and is still in use. The first Sunday-school was opened at the church Feb. 26, 1820, with about seventy scholars. A Bible class for men was opened Oct. 24, 1821, and was held weekly.

The church built in 1819 was soon found to be inconveniently located, and in some other respects not suited to the needs of the congregation. In the spring of 1853 the sale of the old premises was ordered, and also that a new church be built on some new site. The lot so long occupied as a burial-ground seemed to fulfill the requirements, and was adopted. March 7, 1854, the property at the corner of Race and Bread Streets was sold for sixteen thousand dollars at public auction. Thus the home and birthplace of Moravianism in Philadelphia passed into secular hands after one hundred and twelve years of use by the "Unitas Fratrum." The sum of seven thousand five hundred dollars was paid for ground sufficient to extend the cemetery lot to the corner of Franklin and Wood, and for a brick house already occupying the corner. The house was demolished, and April 30, 1855, the corner-stone of the new edifice was laid by Bishop Wolle, aided by the pastor, Rev. E. A. de Schweinitz, Brethren Bohnsen, Schultz, and others, besides Dr. Mayer, of the English Lutheran, and Revs. J. Berg and Bomberger, of the German Reformed, Churches. On the 26th of January the church was formally dedicated. The building committee consisted of Abraham Ritter, Jacob E. Hagert, Charles L. Bute, and Francis Jordan. The dimensions of the building were fifty-five by eighty feet. This church, like its predecessor, stands on classic ground. A portion of its site had been for one hundred and twenty years in Moravian hands, and here, in the midst of trade and commerce, rests the hallowed dust of the elders and the founders of the church. On the 25th of November, 1883, one hundred and forty-one years had passed since Moravians met in their own church in Philadelphia.

We have said that the present church building is at the southwest corner of Wood and Franklin Streets, and open to Vine Street. The principal room has space for five hundred worshipers. The basement floor has a vestibule, Sunday-school room, minister's room, apartment for "love-feast" arrangements, and other conveniences. The organ is eighteen feet front, eight feet deep, and twenty-nine feet high, and cost two thousand dollars. The furniture is neat and worthy of the place.

The more recent changes in pastorate and committees must be noted. It was in 1822 that Rev. W. H. Van Vleck was succeeded by Rev. Samuel Renike, who served one year, and was followed by Rev. John G. Hermann, who went to Lancaster in 1826. Rev. Peter Wolle then took charge until 1836, and Rev. David Bigler, from Antigua, followed, until 1842. Rev. Henry A. Schults served from Sept. 1, 1842, to June, 1844, and Rev. William H. Benade till November, 1844. From the month of November Rev. Emanuel Rondthaler supplied the pulpit until Nov. 30, 1848, when his death occurred, and Rev. Edward Reichel filled the gap until April, 1849. Rev. Edward Rondthaler then assumed the pastorate until August, 1853, when Rev. Edmund A. De Schweinitz took charge.

In the church committees the changes up to 1825 have been given already. In 1830, Abraham Klewel was chosen in place of J. W. Peter, deceased. In 1834 the tenure for life or good-behavior plan was changed to an election for a term of three years. The first committee consisted of Brothers John Jordan, John Binns, Valentine Hent, Thomas C. Lueders, Charles L. Bute, and Abraham Ritter. In 1837, Charles Williams took the place of Valentine Hent. In the election of 1840 the latter returned to office, and William Boller took Mr. Lueders' place. In 1843, Joseph Cake and Thomas W. Jones took the places of Mr. Bute and Mr. Williams. The board of 1846 was as follows: George Esler, William Boller, John Binns, A. B. Renshaw, Frederick Wilhelm, Alexander Leimer. In 1847 the church was incorporated, and the standing committee called elders. The election of 1849 chose A. B. Renshaw, T. W. Jones, Philip A. Cregar, Charles Williams, Alexander Smith, and Frederick Bourquin. In 1862, Abraham Ritter took Mr. Williams' place on the committee, and in 1855 Mr. Bourquin and Mr. Jones retired in favor of Charles Williams and C. L. Bute.

The stewardship was held by Thomas C. Lueders, 1836–38; Charles L. Bute, 1838–42; Valentine Hent, 1842–45; Thomas W. Jones, 1845–46; Frederick Wilhelm, 1846–49. The secretaryship was held by Henry J. Boller, 1825–33; John P. Binns, 1833–36; Abraham Ritter, 1836–40; William Bollar, 1840–47. The almoners were William Gerhard, 1836–46; F. Wilhelm, 1846–49; A. B. Renshaw, 1849–52; Abraham Ritter, 1852.

THE PROTESTANT EPISCOPAL CHURCH.[1]

Before entering fairly upon a sketch of the history of the Protestant Episcopal Church in Philadelphia, it may be said that, as it is at present organized, this denomination may be viewed from two different points,—*i.e.*, the *civil and political*, or the strictly *ecclesiastical*. The parishes are organized bodies incorporated under the State laws, and practically they are, in many respects, the sources of all power. They form the primary constituencies of the church. A number of citizens wishing to establish a parish organize themselves, and apply to the civil authorities for a charter, and if there are no legal hindrances they become duly incorporated. By a vote of the Diocesan Convention they are "admitted into union with the diocese," and acquire the right to send three lay members as deputies to represent the parish in the Episcopal Convention. They elect their own rectors. The clergy have seats in the Convention by right of their orders, and many of them have no parochial connection. The clergy represent themselves; the parishes are represented by the lay deputies. In any important matter the vote is taken in the Convention "by orders," and a majority of the clergy and a majority of the laity (and in some cases the consent of the bishop) is necessary to the approval of the proposed action. This principle of a distinct recognition of the rights of the laity runs through all the higher deliberative councils of the Protestant Episcopal Church, and has done so from its first organization after the war for independence.

In the other, the strictly *ecclesiastical* view, the bishops are the source of power. They alone can lawfully ordain the clergy, who in turn administer the sacraments of the church. Bishop Bedell says, "No historical record of a succession of civil governments is so perfect as is the proof of the perpetuation of the Episcopate in Christ's Church, by a succession of consecrators, dating back to the Apostles' days."

No attempt has ever been made to establish in Philadelphia *parochial boundaries*, the whole city being theoretically regarded as the joint parish of all the rectors of the churches in the city limits. For a few years, about 1855, an informal division of the city into parochial divisions was made, for the purpose of systematically distributing relief to the poor, through the Episcopal Aid Society (which has long ceased to exist), but it was altogether informal and temporary. Quite recently, to avert the evils of the erection of rival churches near each other, a canon was passed, forbidding, under ordinary circumstances, the erection of a church in a new locality without the consent of the rectors of the three churches nearest to the proposed new site. This canon has accomplished its object, doubtless, but has practically proved something of a hindrance to the rapid growth and extension of the church. Something like parochial metes and bounds will doubtless ultimately be established.

The Protestant Episcopal Church in Philadelphia has always comprised a large number of persons of wealth and prominent social position. It has received, not only into the ranks of its clergy but also into its general membership, large and valuable additions from those who by birth and early training were affiliated with other religious bodies. The United States census of 1880 gives the Protestant Episcopal Church in the country at large almost the largest percentage of comparative increase during the preceding decade, and this steady and rapid growth is largely accounted for by additions from those of other denominations.

To all who are identified with the Protestant Episcopal Church the Episcopate is the centre of influence and government. The bishop is placed in such peculiar relations to all the souls in his diocese, and to all associations, authoritative assemblages, and institutions of the diocese, that very much of the church history will naturally centre around him, and the life and activities of the church and the life and labors of the bishop run parallel and are closely interwoven. This was to an unusual degree the case with Bishop William White. He took so prominent

[1] The history of the Protestant Episcopal Church in Philadelphia was contributed by Rev. Washington B. Erben.

a part in the affairs of the church at a critical period in its history, he was so influential in arranging its orders, discipline, doctrine, and worship, and his life was so prolonged in the high station to which he was called, and which he so honorably filled, that his personal labors and influence are apparent in much of the early history of the church.

He held a prominent position in the church at large, and his influence was widely felt. But Philadelphia was his home, and here most of his work was performed, and no general history of this city would be complete that did not notice his life and labors.

The Rt. Rev. William White, D.D., the "Father of the American Church," was the son of Col. Thomas and Mary White, and was born in Philadelphia, March 26, 1748.[1] He pursued his studies and received his earlier education in the preparatory department and the grammar school connected with the College of Philadelphia (now the University of Pennsylvania), and graduated at the age of seventeen. At that early age he had already decided to devote himself to the ministry of the church. For several years he pursued his theological studies under the direction of the Rev. Dr. Peters and the Rev. Dr. Duché. He took special interest and pleasure in a course of theological exercises, in which four other young men looking forward to the ministry joined with him, under the direction of the Rev. Dr. William Smith, provost of the college. During the Sunday evenings of a few months, for several successive years, these young men wrote out and delivered notes and exegeses upon Bible history. These exercises having been first submitted to the provost, were then delivered in public, in the hall of the old college, two speakers in turn each evening, the provost at the conclusion enlarging upon the themes discussed by the young men. The bishop says, "Although this was far from being a complete course of ecclesiastical studies, it called to a variety of reading and to a concentration of what was read, and was also of use as an introduction to public speaking."

BISHOP WILLIAM WHITE.

There was no bishop in America, and to obtain orders he sailed from Chester for London on Oct. 15, 1770, in the ship "Britannia." He was received in England by his aunts, Miss White and Mrs. Weeks. There were several obstacles in the way of his securing immediate ordination. He was not yet quite twenty-three, the canonical age for ordination, and he was not a graduate of either Oxford or Cambridge. The archbishop of Canterbury granted a faculty or dispensation for his ordination *infra ætatem*, and he passed so successful an examination, as to his learning, before the bishop and three clergymen, that the examining chaplain said, "that his examination would have been an honor to either of the universities."

He was ordained deacon on Dec. 23, 1770, in the Chapel Royal of St. James' Palace, Westminster, by Dr. Philip Yonge, Bishop of Norwich, acting for the Bishop of London. He remained in England until he reached the canonical age of twenty-four years, requisite to his ordination to the priesthood. He performed no clinical duties, but pursued his studies, visited several parts of England, and spent some weeks at Oxford. On April 25, 1772, he was advanced to the priesthood by Dr. Richard Terrick, Bishop of London. The English colonies in America were then under the Episcopal jurisdiction of the Bishop of London, and after his ordination the bishop licensed the Rev. Mr. White to officiate in Pennsylvania. He sailed from England in June, on the ship "Pennsylvania Packet," Capt. Osborne, and after a tedious voyage reached Philadelphia on the 19th of September, 1772.

The Rev. Richard Peters, rector of the united churches of Christ Church and St. Peter's Church, asked the vestry to secure the services of two assistants, as the work was too great for himself and the Rev. Mr. Duché, and suggested the appointment of the Rev. William White and his friend and collegemate, the Rev. Thomas Coombe. The rector consented to give to each of the assistants one hundred pounds per annum, in addition to any sum given by the vestry, and on Nov. 30, 1772, the Rev. Mr. White entered upon his duties as an assistant minister in the united churches, at a stipend of one hundred and fifty pounds per annum. This was the commencement of his connection with this parish, which continued unbroken for sixty-four years. The Rev. Dr.

[1] He was baptized in Christ Church on May 25, 1748, by the Rev. Dr. Jenney.

Peters died July 10, 1776. The Rev. Jacob Duché, a native of Philadelphia, who had been the popular and acceptable assistant in the United Churches since 1759, was elected rector. Mr. Duché left for England in 1777, where, ten years after, in 1787, he witnessed in Lambeth Chapel the consecration of his former assistant, successor, and friend as bishop of the commonwealth of Pennsylvania.

At the commencement of the war of independence the Rev. Mr. White at once espoused the cause of the colonists. On the very day on which independence was declared the vestry of the United Churches requested the rector and assistant ministers to "omit those petitions in the liturgy wherein the king of Great Britain is prayed for," and he acquiesced in their action. In 1776 he took the required oath of allegiance to the United States. Rev. Dr. Bird Wilson, in his "Life of Bishop White," says of him, "When he went to the court-house for the purpose a gentleman of his acquaintance, standing there, observing his design, intimated to him by a gesture the danger to which he would expose himself. After having taken the oath he remarked, before leaving the court-house, to the gentleman alluded to, 'I perceive by your gesture that you thought I was exposing my neck to great danger by the step which I have taken; but I have not taken it without full deliberation. I know my danger, and that it is greater upon account of my being a clergyman of the Church of England. But I trust in Providence. The cause is a just one, and I am persuaded will be protected.'"

Immediately after the battle of Germantown, in 1777, the British troops entered Philadelphia, and Congress adjourned to Lancaster and York. The Rev. Mr. White went to the residence of his brother-in-law, Mr. Aquila Hall, of Harford County, Md., and while on his way thither, was informed of his appointment by Congress as its chaplain, and he immediately proceeded to York to fulfill the duties of that office. The Rev. Mr. Duché, it may be stated, who won all hearts by his enthusiastic espousal of the cause of the colonists, and whose name is associated with the first prayer offered in Congress in 1775, changed his views, and believing the cause of the colonists to have become hopeless, he retired to England in 1777. The rectorship was subsequently declared vacant. The British left Philadelphia on June 18, 1778, for New York, and Congress re-entered the city in July following. Dr. White returned, resumed his ministry in the United Churches, and was elected rector by the vestry on Easter, 1779. He was chosen one of the chaplains of Congress each successive year until the removal of the seat of government to Washington, in 1801.

It would be foreign to a history of Philadelphia to enter into any very prolonged account of the general ecclesiastical questions which affected the condition of the members of the Church of England in the American colonies during the period prior to the consecration of Bishop White. We shall here notice, as briefly as possible, some of the matters which affected the church in Philadelphia, or were settled in this city, and in the arrangement of which Bishop White took a prominent part. The Bishop of London had ecclesiastical jurisdiction over the colonial churches. There was no bishop on this side of the Atlantic. The rite of confirmation could not be administered, and any one in this country who wished to be ordained to the ministry of the church had to make the long, perilous, and expensive voyage to England, to be admitted there to holy orders.

At the commencement of the Revolution many of the clergy who were in the colonies felt that by reason of their connection with the State church, and their allegiance to the crown, they were in conscience bound not to oppose the royal authority. From various causes many of them retired to England, and the churches where they had ministered were closed. After the close of the Revolutionary war all connection with the Church of England was of course at an end. The clergy left here were few in number, widely scattered, and bound together by no formal organization. Strong popular prejudices existed among many who were not Episcopalians against an Episcopal Church, as not consistent with a Republican form of government. These facts, and the added fact that at that period the Church of England was not enabled by law to extend the episcopate to any who would not swear allegiance to the British crown, as required by the English ordinal, enhanced the difficulties which environed the Episcopalians in the colonies.

Several meetings of a general character had brought together a number of the clergy in the colonies at various periods. The first meeting of which anything is known was held in Philadelphia in 1760. Another was held May 20, 1761. The Rev. Dr. Smith and Rev. Messrs. Campbell, Craig, Reading, Sturgeon, Neill, Barton, Inglis, Thompson, Duché, Chandler, of New Jersey, and Keene, of Maryland, were present. The facilities for travel were poor, the distances which separated them great, and it is doubtful whether these meetings were continued. In 1783 a Convention was held in Connecticut, and Rev. Samuel Seabury was elected bishop, and requested to go to England, and, if possible, obtain consecration at the hands of the English bishops, and if not successful there, to apply to the non-juring bishops of the church in Scotland.

The Rev. William White called a meeting of his vestry in November, 1783, which led to further measures, culminating in the meeting of a Convention of delegates from Pennsylvania churches, held at Christ Church, May 27, 1784. This was followed by a meeting held in New York, attended by representatives of seven States, and by a meeting held in Christ Church, Philadelphia, Sept. 27, 1785, over which Dr. White presided, and which was also attended by representatives from seven States. At this meeting the

title, Protestant Episcopal Church in the United States of America, was formally adopted as the name of the ecclesiastical organization. This title had been first used in a "Declaration of Rights and Liberties," drawn up by the clergy in Maryland, at a meeting held to consider church affairs.

A correspondence was entered into with the English Church respecting the consecration of American bishops. The question was a novel one, and there was considerable delay. The English bishops had to first secure authority from Parliament for such action, and they wished first to be assured as to what the doctrine and ritual of the American Church would be, for the American Convention had made a revision of the Prayer-Book. The Rev. Dr. William Smith, of Philadelphia, had, among others, taken a prominent part in the work of revising the Prayer-Book. At last all was made satisfactory to the English authorities, and they were willing to consecrate three of the American clergy who should have been chosen by the Conventions held in the States, as bishops. The results of this have proved to be widespread and far-reaching.

The thirteen English colonies in struggling successfully for freedom from unjust and tyrannical government by the crown, fought and won a battle, the fruits of which are now enjoyed by the English-speaking colonists all over the globe, for the present extensive English colonies are far more kindly governed than were the original thirteen colonies before the Revolutionary war. In the same way the English churchmen in the American States, who finally succeeded in persuading the Church of England to provide lawfully consecrated bishops of the Anglican succession for the United States, started and quickened a movement which has outrun these bounds. The establishment of colonial episcopates by the Church of England during the past century has been a marvel. They are numerous, effective, and exist now wherever English rule is established. In 1883 the number of English colonial bishops was more than twice the number of the bishops in England.

In all this work of organizing the American Church and securing for it the episcopate from the English Church, William White was prominent. He was accepted as a wise and judicious leader by the American clergy and laity, and he had given much careful consideration to the questions at issue. In 1783 he had published a pamphlet entitled, "The Case of the Episcopal Churches Considered," and given the outline of a plan for organization, which contained the fundamental principles afterward adopted by the American Church, and from which it has never essentially deviated. "The essential unity of the whole American Church as a national church, its independence of any foreign jurisdiction, the entire separation of the spiritual and temporal authority, the participation of the laity in the legislation and government of the church, and the election of ministers of every grade, the equality of all parishes, and a threefold organization (diocesan, provincial, and general) were fundamental principles of his plan."

All difficulties, as we have said, having been removed at the second session of the third annual Convention of the Protestant Episcopal Church in the State of Pennsylvania, held in Christ Church on Sept. 14, 1786, the Rev. William White, D.D., was unanimously chosen to be bishop. This Convention was composed of the following persons, viz.: Rev. William White, D.D., president; Rev. Samuel Magaw, D.D., Rev. Joseph Pilmore, Rev. Robert Blackwell: Laity, Hon. Francis Hopkinson, Esq., Dr. Gerardus Clarkson, Mr. Andrew Doz, Mr. John Swanwick, Mr. John B. Gilpin, Mr. Jacob Duffield, Mr. Jacob Ashton, from Trinity Church, Oxford; Mr. John Swift, St. James', Bristol; Mr. Isaac Bullock, St. John's, Concord; Mr. Benjamin Marshall, St. Martin's, Marcus Hook; Mr. James Witby, St. Paul's, Chester; Richard Willing, Esq., St. David's, Radnor; and Robert Ralston, Esq., St. Peter's, Chester County.

The following resolutions were adopted:

"On motion agreed, That it is most honorable for the church in general, and perfectly agreeable to the minds of all members present, that a reasonable sum be fixed upon to defray the necessary expenses of the voyage of the bishop-elect to and from England.

"*Resolved*, That the sum be two hundred guineas, or three hundred and fifty pounds, currency.

"*Resolved*, That the said sum be apportioned among the churches severally, to be raised by them, according to the salaries which they pay respectively to their officiating minister or ministers, or the sums which they may be supposed able with convenience to pay."

On October 29th Dr. White preached a Thanksgiving sermon in Christ Church, and on the following day he went to New York, and on Nov. 2, 1786, he sailed from that port, and eighteen days after landed at Falmouth, making the quickest voyage across the Atlantic then recorded. He was accompanied by the Rev. Samuel Provoost, D.D., who had been elected Bishop of New York.

He and Dr. Provoost were consecrated bishops on Sunday, Feb. 4, 1787, in the chapel of the Archiepiscopal Palace, at Lambeth, in the city of London. The consecrating bishop was Dr. John Moore, Archbishop of Canterbury. The Archbishop of York, the Bishop of Bath and Wells, and the Bishop of Peterborough united in the imposition of hands.[1]

Bishop White returned to Philadelphia in May, 1787, and on May 28th of that year he held his first ordination service in Christ Church, admitting Joseph Clarkson to the diaconate. Until his death, on July 17, 1836, the bishop held the rectorship of the United Churches, and, almost to the close of his life, the

[1] The Rev. James Madison, D.D., was consecrated Bishop of Virginia, in the same place, on Sept. 19, 1790. There had been a verbal understanding between Bishop White and the Archbishop of Canterbury, that no consecration of bishops should be held in the United States, until there were three bishops having the English succession, to unite in the consecration. The consecration of Bishop Madison completed the canonical number, and from that time all the bishops of the American Church were duly consecrated in this country.

venerable prelate preached regularly at one or other of the churches, when not elsewhere engaged. His last sermon was preached in St. Peter's Church, on Sunday morning, June 26, 1836.

His life was so prolonged, his official actions so numerous, not only in his own diocese, but in the great ecclesiastical body over which he was for so many years the presiding bishop, and which he saw grow from small and feeble beginnings to strength and greatness, that we cannot here fully review his character or his works. Judged by the standard of the activities of the present age, he might perhaps be deemed somewhat wanting only in aggressiveness of effort and a pronounced advocacy of the more distinctive principles of his church. But he possessed, in an eminent degree, precisely the qualities and characteristics which were needed and most valuable for the times in which he lived, and for the necessities and circumstances of the church during the period of his active leadership. The purity of his character, his amiable manners and disposition, his tolerant charity and lack of arrogance, disarmed suspicion, conciliated all who knew him, and won friendship and respect alike for himself and for the church which he represented. He was endowed with providential fitness for the work he so well accomplished. He was a cultivated scholar and an exact theologian. His published works, "Memoirs," "Lectures on the Catechism," "Pastoral Letters," "Calvinist and Arminian Controversy," etc., all give evidence of his piety and learning. He was one of the founders of the Philadelphia Bible Society, comprising members of the different Protestant churches, and was its president until his death. He was also one of the founders of the Society for the Institution and Support of First-day or Sunday-schools, and a valued member of other societies not connected with the church.

Among his personal peculiarities, Bishop Stevens, in his interesting memorial sermon, "Then and Now," delivered in Christ Church on the centennial of the bishop's ordination to the diaconate, says, "Bishop White never bowed at the name of Jesus in the Creed, and even wrote two articles in defense of his not doing it. . . . He never turned to the east to say the Creed or the Gloria Patri. He never preached in a surplice, but always, when not engaged in episcopal duties, in the black gown. He never required the people to rise up as he entered the church, and at the close of the service to remain standing in their pews until he left the chancel. He never asked the congregation to stand up while he placed the alms-basins, with the offertory, on the Lord's Table, or notified the communicants to continue in their places, after the benediction, until the clergy had reverently ate and drank what remained of the consecrated bread and wine. . . . He magnified his office, not by arrogant claims or by extolling unduly its sacred functions, but by a loving discharge of its duties, under the eye of God, in the humility of a servant, and with the fidelity of an apostle."

Bishop White was the personal friend and acquaintance of many of the most eminent men in American history. George Washington, Benjamin Franklin, Robert Morris, John Adams, Lafayette, and a host of others, were in friendly relations with him; to some of them he bore pastoral relations, and by all he was honored, trusted, and beloved. He was worthy of the eulogium pronounced of him by Bishop Hobart, in his sermon at the consecration of Bishop Onderdonk, who spoke of the venerable Bishop White as "one whose long-protracted and revered years, whose pure and heavenly character, whose meek and lowly and beneficent virtues excited naught but love; one whose eminent patriarchal services have done so much for the church that he has for more than half a century cherished; whose piety is as pure as it is lovely and engaging. . . . What a privilege to enjoy his confidence, his affection, and his counsel."

THE PATRIOTS' PEW IN CHRIST CHURCH.

Bishop White died at his residence, on the north side of Walnut Street, five or six doors west of Third Street, on July 17, 1836, in the eighty-ninth year of his age. His remains were deposited in the family vault in the grounds adjoining Christ Church, by the side of those of his brother-in-law, Robert Morris, the great financier of our country during the Revolutionary war. His income was derived mainly from his stipend as rector of the United Churches. As bishop he received nothing except the interest on the legacy of Andrew Doz, for the support of the episcopate, the principal of which was about four thousand dollars. His income from the rectorship was about twenty-three hundred dollars per annum. He had a respectable but not large private estate. After his death the London papers commented upon the smallness of his salary as a bishop, which led the editor of the *United States Gazette* to say of him editorially, "Bishop White enjoyed a revenue beyond a monarch's command; his daily income was beyond human computation. If he went forth, age paid him the tribute of affectionate respect, and children rose up and called him blessed."

On Dec. 23, 1870, the remains of Bishop White were removed and reinterred within the chancel of Christ Church, the vestry of the parish resolving at the same period that a memorial window should be erected there to his memory. It was a solemn, grand, and stately ceremony. Many distinguished persons of the clergy and laity were present, and numerous representatives of churches, societies, and corporations. The pall-bearers were the Rev. Drs. Morton,

Digitized by Google

Page, Beasley, Buchanan, and Suddards, and the Rev. Mr. Dupuy. The procession entered the church, and after an appropriate service, a memorial discourse —"Then and Now"—was delivered by the Rt. Rev. William Bacon Stevens, D.D., LL.D., bishop of the diocese. The following was read by a grandson of Bishop White, the Rev. W. W. Bronson:

"PHILADELPHIA, Dec. 23, 1870.

"TO THE RECTOR, CHURCH WARDENS, AND VESTRYMEN OF CHRIST CHURCH, PHILADELPHIA.

"*Beloved Brethren*,—By a vote of your body, passed Dec. 7, 1870, it was

"*Resolved*, That the remains of Bishop White—the family of the bishop co-operating—should be removed from the family vault and deposited in the chancel of Christ Church. As the representatives of the families of our venerated ancestor we beg leave to tender you our grateful acknowledgments for the distinguished honor thus paid to the memory of the departed. We have discharged our portion of this grateful work. The sacred dust lies here before you; to you and to your official custody we now intrust it; assured that it will be reverently cherished and sacredly guarded until reanimated by Him who has said, 'I am the Resurrection and the Life!'

"On behalf of the descendants of Bishop White,

"WILLIAM WHITE BRONSON."

The Rev. Edward A. Foggo, D.D., rector of Christ Church, on behalf of the parish, replied thus:

"MY REVEREND BROTHER,—I, the rector, for myself, the church wardens, and vestrymen of Christ Church, and for our successors in office, receive this sacred trust at your hands. Here, beneath the chancel in which for so long a period Bishop White ministered, we will deposit his remains; and here shall they rest, until the time come when the Great Bishop and Shepherd shall bid the dead arise, and gather into one fold all who have departed hence in the true faith of His Holy Name."

When the remains were deposited in the vault, Bishop Stevens said,—

"In the name of the Father, and of the Son, and of the Holy Ghost, Amen.

"I, William Bacon Stevens, bishop of the diocese of Pennsylvania, acting for and in behalf of the said diocese, and at the request of the rector, church wardens, and vestrymen of Christ Church, Philadelphia, do here solemnly commit to this, its final resting-place on earth, the sacred dust of William White, who was baptized as an infant in this font, served this church sixty-four years as a minister of Christ, and governed this diocese nearly half a century as its first bishop, and during most of the same period was the presiding bishop of the Protestant Episcopal Church in the United States of America.

"In thus reinterring, after a lapse of thirty-four years, all that remains of this venerable servant of God, let us offer up our thanksgiving and praise for his good example, for his exalted character, and for his signal services to the Church of God. We deposit beneath this chancel this sacred dust, until the trumpet shall sound, and the dead shall be raised incorruptible and shall be changed.'"

In 1826, when Bishop White was about eighty years of age, he gave his consent to the election of an assistant bishop. A special Convention was held in the fall of that year, but the Convention was not able to agree upon any of the candidates voted for. The Rev. Bird Wilson, D.D., professor of Systematic Divinity in the General Theological Seminary in New York, but canonically connected with the diocese of Pennsylvana, came within one vote of being elected. It was said that if he had consented to cast his own ballot for himself, he would have been chosen, but this he was unwilling to do.

At the regular annual Convention, held in May, 1827, and which convened in the chamber of the House of Representatives in the borough of Harrisburg, the Rev. Henry Ustick Onderdonk, D.D., was elected to be "assistant bishop of the diocese during the life of Bishop White, and to be the bishop of the diocese after his demise."

He was the son of Dr. John Onderdonk, an eminent physician of New York, and was born in New York City in March, 1789. He graduated from Columbia College, and studied medicine, completing his medical studies and receiving his degree in Scotland. He afterward studied theology, and became rector of St. John's Church, Canandaigua, and afterward, at the time of his election as assistant bishop, was rector of St. Ann's Church, Brooklyn, N. Y. He was consecrated in Christ Church, Philadelphia, on Thursday, Oct. 25, 1827. Bishop White was consecrator, and Bishops Hobart, Kemp, Bowen, and Croes united in the service. The consecration sermon, at the special request of Bishop White, was preached by Bishop Hobart, of New York. He entitled his sermon "The Christian Bishop, approving Himself unto God, in reference to the Present State of the Protestant Episcopal Church in the United States of America." This sermon was simply a pious discourse, but party spirit ran high at the time, the church was excited over one of the forgotten controversies of the times, and unkind and injurious remarks were made about the sermon, which led Bishop White the following year, in his annual address, to say, "I hold myself bound to declare my abhorrence of the calumnies to which he became subject by his compliance with my request;" and "this is not the suggestion of private friendship, however felt and cherished for a right reverend brother, but an act of justice to him, and an imperious duty on my part."

Assistant Bishop Onderdonk entered with great vigor and activity upon his duties. Even with the limited facilities and rude means of travel in those days, he visited nearly every portion of the State. He was a fine preacher, and his sermons, several volumes of which were published, were much admired. He was always facile with his pen, and it was said had written over one hundred sermons while a candidate for orders, as a preparation for his entrance upon the ministry. At Bishop White's death, July 17, 1836, he became Bishop of Pennsylvania.

On Sept. 6, 1844, at a special Convention called at his request, he tendered his resignation, which was accepted. In October he was deposed. The excessive use of spirituous stimulants, indulged in to counteract painful disease and endure the fatigues of laborious journeys, was the basis for the action taken in his case. His after-life was marked by such unfeigned humility and Christian consistency that on Oct. 21, 1856, he was by the House of Bishops canonically restored to his proper functions, and he officiated after this on some occasions, with the consent and approval of the Bishop of Pennsylvania. He died on Dec. 6, 1858, aged nearly seventy years.

His remains were interred in the churchyard of the church of St. James the Less, Falls of Schuylkill, Philadelphia. The Rt. Rev. Dr. Bowman, assistant bishop of the diocese, officiated at his burial, and in his annual address before the Convention, in May following, Bishop Bowman thus tenderly alludes to the departed prelate: "In December last I was called to the melancholy duty of attending and assisting at the funeral of our late diocesan, the Rt. Rev. H. U. Onderdonk, D.D. The preliminary services were held in St. Peter's Church in this city; the interment took place in the quiet and beautiful cemetery of St. James the Less. There, clothed in his robes of office, we committed to their last resting-place all that was mortal of him who had stood to us in so near and sacred a relation. Now that he is 'no more in the world,' I am sure that all will rejoice with me that he departed in full standing as a bishop in the church of God, and to remember him by those qualities which equally become the man, the Christian, and the bishop. Courteous and fair in the discharge of his perplexing duties, singularly cautious and restrained in speaking of those who were opposed to him, indefatigable in his laborious office, eloquent in the pulpit, and irrefutable in his defenses of the church, we may well rejoice that such a man's sun went calmly down, and that his life and labors ended together. In this result no one, I know, rejoices more heartily than our own honored diocesan (Bishop Potter), to whose effective eloquence in the House of Bishops this happy result is largely due. The dead are in the hands of God, and 'tis well for us that we are not called to strike the balance of their virtues and their faults. While we labor to imitate the one and to avoid the other, let us consider that the utmost that any man can wish or hope for is to have inscribed upon his tomb, 'A sinner saved by grace.'"

The Rt. Rev. Alonzo Potter, D.D., LL.D., was the third Bishop of Pennsylvania. He was the greatest of a great family. His brother, Horatio Potter, has long been the honored bishop of the diocese of New York. The Rt. Rev. Dr. Henry C. Potter, son of Bishop Alonzo Potter, was, in 1883, consecrated as assistant bishop of New York, and will succeed his uncle in that see; another son, Rev. Dr. Eliphalet N. Potter, has, for a number of years, been president of Union College, Schenectady,—the late Hon. Clarkson N. Potter, of New York, was one of his family,—and the other surviving sons fill responsible public or private stations.

The ancestors of the family were English, and settled at Portsmouth, R. I., between the years 1640 and 1660. Alonzo Potter was born July 6, 1800, in the town of Beekman, now La Grange, Dutchess Co., N. Y. He graduated with honors from Union College in 1818, and almost immediately became a tutor, and later, professor of Mathematics and Natural Philosophy in that institution. He was baptized and confirmed in St. Peter's Church, Ph[illegible] while in this city pursued some of his theological studies with Rev. Dr. S. H. Turner, under the direction of Bishop White. Dr. Turner then lived in a house on the west side of Second Street, about three doors north of Catharine Street, and the lessons were given at his house to young Mr. Potter and several other candidates for holy orders.

He was ordained to the diaconate by Bishop Hobart, to the priesthood by Bishop Brownell, married to the daughter of Rev. Dr. Eliphalet Nott, president of Union College, and received, but declined, a call to the presidency of Hobart College. In 1829 he became rector of St. Paul's Church, Boston, Mass., but in 1831 returned to Union College, of which he became vice-president, and professor of Moral Philosophy. He was elected assistant bishop to Bishop Griswold, with the succession to the episcopate of Massachusetts upon the death of that venerable prelate, but declined to accept. In 1845 he was elected Bishop of Pennsylvania. He was consecrated in Christ Church, Philadelphia, on Tuesday, Sept. 23, 1845. The presiding bishop, the Rt. Rev. Philander Chase, of Illinois, was consecrator, and Bishops Brownell, Hopkins, George W. Doane, McCoskey, Alfred Lee, and Freeman, united in the service.

The entrance of Bishop Potter upon the duties of his office in Pennsylvania was marked by a remarkable increase in the activities of the church. He very soon made himself acquainted with the condition and the wants of his diocese. On the day following his consecration he consecrated the new Church of the Nativity, Philadelphia. Within a week he began an extended visitation of his diocese, and held his first confirmation service in St. Paul's Church, Erie. During the early years of his administration, a large number of new churches were erected in the city of Philadelphia. He infused something of his own energy and strong purpose into others, and the church received an impetus during his episcopate which has been beneficially felt ever since. Throughout his administration of the affairs of the diocese, the growth of the church was continuous, steady, and encouraging. Just before his death the arrangements were completed for a division of the diocese, by setting off the western portion of the State as the diocese of Pittsburgh, though this was not actually accomplished until a few months after his death, under his successor, Bishop Stevens. Bishop Potter had a large, comprehensive mind. He was clear-sighted and far-seeing, and his broad catholic spirit, and unselfish and untiring devotion to his work, gave him great influence not only among his clergy, but to an unusual degree among the laity of his diocese. In the general councils of the church he was no less influential. His sermons and public discourses were clear, compact, and convincing. No one has ever grasped the true idea of the real position of the Episcopal Church in America better than himself, and his charges are

among the most valuable emanations from the American Episcopate.

All through his life he was a writer as well as a speaker, and his published works all bear traces of his profound learning, breadth of thought, and comprehensive Christian charity. He was not a vain man. He dealt but little with the ornaments and superficial graces of oratory, but he was one of the strongest and most convincing speakers. In his treatment of special subjects he was possessed of an unusual grasp of thought, and his discourse, for instance, "On the Drinking Usages of Society," is one of the best lectures on the subject of temperance ever delivered.

Besides the numerous churches erected in Philadelphia during his episcopate,[1] he has left in the Hospital of the Protestant Episcopal Church, the Philadelphia Divinity School, and the Episcopal Academy enduring monuments of his spirit and influence. Of the first two he laid the foundations: the last, though established long before, was quickened by his efforts from an almost dormant condition into greatly enlarged activity and usefulness. The Church Home for Children, the endowment of the Burd Orphan Asylum, and a number of other church institutions of greater or lesser magnitude mark in this city his beneficent influence. In connection with William Welsh, he gave considerable thought and attention to efforts to organize the services of Christian women, and though the plans devised have not yet been fruitful, they may yet be developed practically in the future.

He was thoroughly loyal. He issued numerous special prayers for the Union soldiers and for the nation, which were models of devotion, piety, and patriotism, and in his last message to his Convention, dated March 18, 1865, just before the close of the civil war, he writes, "In our longings for a return of peace, and for a reunited nation, we must turn from them whose breath is in their nostrils, or rather, we must remember whose they are, and how powerless in arms and feeble in counsel they may be, if left to the inspiration of earthly and carnal persons. We must pray more fervently and constantly that the spirit of justice and mercy, of patience and magnanimity, may preside over every measure; and that He who alone can make men to be of one mind, may infuse the sweet influences of His love and of His presence into all hearts."

His health giving way under the burden of the duties of his large service, Bishop Samuel Bowman was in 1858 elected as his assistant bishop, and after the sudden death of Bishop Bowman, in 1861, Bishop William Bacon Stevens was elected as assistant bishop, and became the successor of Bishop Potter in this see.

On March 30, 1865 (leaving his diocese by special commission in charge of the assistant bishop), he sailed from New York for California in the new steamship "Colorado." During this voyage Bishop Potter held religious services every Sunday on board the vessel. His sermons were extemporaneous, but were written out by him after their delivery. Professor Agassiz, the distinguished naturalist, was a passenger as far as Rio de Janeiro, and it was much to the bishop's pleasure when, "at the celebration of the Lord's Supper on Easter day, which the bishop administered in his state-room to a few communicants after service, Professor Agassiz came forward and knelt at the table as an humble recipient of the memorials of the death of his Saviour, Christ."

He passed through the Straits of Magellan, and touched at Callao, Peru, on June 6th. Here he heard for the first time of the wonderful events which had occurred in the preceding three months,—the fall of Richmond, the surrender of Lee, the ending of the Rebellion, and the assassination of President Lincoln. He touched at Panama, crossed the Isthmus, and consecrated the American Episcopal Church there, and returned to the vessel. He became ill, and was unable to leave the vessel when she arrived at San Francisco on July 1st, and about noon on July 4, 1865, he died on board, of the Panama fever. His remains were brought to the East in charge of a deputation from the diocese of California, and on Friday, August 11th, the obsequies of Bishop Potter were solemnized in Christ Church, Philadelphia. His successor, the Rt. Rev. Bishop Stevens, at the request of the diocesan clergy, and also in compliance with resolutions passed by the House of Deputies and the House of Bishops, delivered in St. Luke's Church, Philadelphia, on Thursday, Oct. 19, 1865, a "Discourse commemorative of Bishop Alonzo Potter," before the General Convention, which was at that time holding its session in this city. In this discourse Bishop Stevens says, "I remember on one occasion, when a mere boy, that my mother, then a member of a Congregational Church in the city of Boston, permitted me to go one Christmas-day to St. Paul's Church. I was drawn there by a desire to see the church dressed in living Christmas green, and to hear what I had been told was strange music for the house of God. I went with all a boy's curiosity; I listened with open ears; a new and peculiar sensation took possession of me; I had never before beheld the service; it was all new, striking, and attractive. That was my first introduction to the Episcopal Church; that was the first time that I saw or heard Bishop Potter. How strange the combination of events that drew us both away from Boston, that kept us a thousand miles apart for years, and then brought me to his side again, first as a filial presbyter, then as his assistant, and now, alas! the chariot has come between us and borne him aloft, and left me with the mantle of the ascended father! Would to God that I might have a double portion of his spirit!"

The Rt. Rev. Samuel Bowman, D.D., who was for

[1] Thirty-four new parishes in Philadelphia were admitted to union with the Convention during his episcopate.

some three years assistant to Bishop Potter, was born in Wilkesbarre, Pa., May 21, 1800. Among the interesting incidents of his early life we may record the following: "When he was but seventeen years old his father was suddenly removed by death. On the evening after the funeral, as the family group was seated in silence, made sad by the bereavement, Samuel quietly took the Bible, read a chapter, and then called upon them to join him in prayer. The request electrified the weeping group. Samuel had never before evidenced any marked religious feelings, and the family had never before united in family prayer, but from that hour the duty was continued until he left his home to study his profession."

When he was a lad the news came to the village that a clergyman of the Protestant Episcopal Church was to visit Wilkesbarre, and would hold there a church service. At the hour when the stage was expected to arrive quite a number of the citizens assembled to meet him. It was quite a patriarchal scene. The oldest men of the place were there to give a welcome to the coming stranger. The young clergyman was the Rev. Jackson Kemper (afterward missionary bishop of the Northwest). Under the auspices of the Society for the Advancement of Christianity in Pennsylvania, he made a missionary tour through that part of the State in the summer of 1814. He was invited to hold service in the academy at Wilkesbarre, and from his lips Bishop Bowman first heard the service of the church, at whose altar he afterward long and faithfully ministered.

He was ordained deacon by Bishop White, in Christ Church, Philadelphia, on Aug. 25, 1823, and advanced to priest's orders by the same bishop in 1824. After having had temporary charge of the congregation at St. John's Church, Pequea, and at Allentown, Easton, and Leacock, he was, in 1827, elected associate rector of St. James' Church, Lancaster, Pa., and in 1830, on the death of the rector, Rev. Joseph Clarkson, he became rector of the parish, and continued in charge of it until his elevation to the episcopate. In 1845, at the Convention of the diocese, which finally elected Bishop Potter, Dr. Bowman received a majority of the votes of the clergy, but not a sufficient number of votes from the laity to elect him. In 1848 he was elected Bishop of Indiana, but declined. In 1858 he was elected assistant bishop of the diocese of Pennsylvania, and was consecrated in Christ Church, Philadelphia, on Aug. 25, 1858. The Rt. Rev. Bishop Kemper was the consecrating bishop, and among the other bishops present who united in the service were Bishops De Lancey, Alfred Lee, and Williams.

Bishop Bowman was tall and dignified and graceful in his movements. His voice was agreeably modulated, and he was a pleasing and effective preacher. As a pastor and parish priest he was a model. He was beloved as well as respected by the parishioners among whom so much of his life had been quietly spent. He was one of the earliest advocates of the free-church system, and St. John's Free Church, Lancaster, was erected through his efforts. Several other local charities are monuments of his zeal and charity.

He carried into the episcopate the same qualities that had marked his parochial ministry, and in the short period during which he held the office, by his sincerity, gentleness, amiability, and tolerant charity, he did much to allay the violence of party spirit. It is near the truth to say that probably no one of those who have held the same rank in the church ever gained a stronger hold on the affections of his clergy than did Bishop Bowman. With Bishop Potter, to whom he bore the official relation of assistant, their relations passed from those of an official character into those of the most confidential friendship and the most harmonious action. At a special meeting of the Convention, called not long after his death, Bishop Potter in his address, referring to his late assistant, said, "He was a true, devoted, and loving soul,—one of nature's noblemen, made more noble by the grace of our Lord Jesus Christ. . . . I had occasion sixteen years since, when elected to the episcopate of Pennsylvania, to learn, by a communication from him, whom I had not then seen or known, the greatness of his moral nature, and the modesty of his self-appreciation. I mourn him as a friend beloved, as an associate honored."

On Saturday, Aug. 3, 1861, while on an episcopal visitation in the western part of the State, near Titusville, in the oil region, in consequence of a freshet and landslide in the Alleghany Valley Railway, he undertook with other passengers to walk some miles toward the place he had appointed to visit. He was unable to keep up with the others, and was missing when the train reached the point of starting. He had been overcome by the fatigue and heat, and dropped dead, alone, by the side of the railway track. A memorial stone marks the spot of his lonely death, and St. James' Church, Titusville, was erected by a general offering as a memorial of him. His remains were interred in the churchyard of St. James' Church, Lancaster, under the walls of the church in which he had served for so large a period of his mortal life.

The Rt. Rev. William Bacon Stevens, M.D., D.D., LL.D., the present Bishop of Pennsylvania, was born in Bath, Me., on July 13, 1815, and was the son of William and Rebecca (Bacon) Stevens. In early life losing his father—an officer in the war of 1812—he was brought up in Boston, the home of his maternal and paternal ancestry. He pursued his earlier studies in the Phillips Academy, Andover. While young, and still prosecuting his studies as a medical student, he made an extended voyage around the globe. While at Canton, China, he rendered valuable services in the American hospital established there. On his return he went to Savannah, Ga., where (after graduating as M.D. from Dartmouth College) he entered upon the practice of his profession with distinguished success. He was confirmed by Bishop Elliott, in

Christ Church, Savannah, Ga., and there first became a communicant of the Protestant Episcopal Church. He was one of the first vestry and building committee of St. John's Church, Savannah, and pursued his studies as a candidate for holy orders under Bishop Elliott. This was in fulfillment of the earlier purpose of his life, which had been changed by ill-health. He was ordained by the same prelate to deacon's, and later to priest's, orders in 1843-44, in Christ's Church, Savannah. He took charge of the church work at Athens, the seat of the University of Georgia, and was soon elected a professor of Belles-Lettres, Oratory, and Moral Philosophy in that institution. He became secretary of the diocese, and was elected a deputy to the General Convention, which met in New York in 1847. Emmanuel Church, Athens, was founded by his efforts, and he continued to be its rector until he left the State.

In October, 1847, he was called to the rectorship of St. Andrew's Church, Philadelphia, then vacant by the resignation of the Rev. Dr. Thomas M. Clark, now Bishop of Rhode Island. The invitation was declined by him, and was twice renewed before acceptance was given. He entered upon his duties as rector of St. Andrew's Church on Aug. 1, 1848, and was instituted by Bishop Potter in the following September, the institution sermon being preached by his predecessor, the Rev. Dr. Clark. He at once took a prominent position in the diocese, and his pastorate was marked by success. The church was soon again filled by a large congregation, a debt of twenty-one thousand dollars was extinguished, and during his rectorship of thirteen years and six months, five hundred and fifty-five communicants were added, of whom three hundred and twenty-five were by confirmation.

At a special Convention of the diocese of Pennsylvania, held Thursday, Oct. 24, 1861, he was elected assistant bishop of the diocese. He was consecrated in St. Andrew's Church, Philadelphia, on Jan. 2, 1862. The consecrating bishop was the Rt. Rev. John Henry Hopkins, D.D., and among the other bishops who united in his consecration were Bishops Alfred Lee, Alonzo Potter (to whom he was to be assistant), William Henry Odenheimer, Henry W. Lee, Thomas M. Clark, and Horatio Potter. Upon the death of Bishop Alonzo Potter, July 4, 1865, Bishop Stevens became Bishop of Pennsylvania.

Bishop Stevens is rather above the usual height, courteous in manners, and graceful and dignified. His voice is cultivated and finely modulated. He is a perfect master of all the graces of oratory, and few public speakers in the pulpit, the forum, or at the bar are his equals in the delivery of polished, appropriate, and felicitous addresses. His style of composition is a very happy one. He is always correct in his language, expressing his thoughts clearly, and is fertile in the use of appropriate illustrations.

He has always been a writer, and his published works are numerous. Among them are contained an interesting and exhaustive treatise on the "History of the Silk Culture in Georgia," two volumes of "Historical Collections," prepared by him as historian of the State of Georgia, a devotional work on "The Parables of Our Lord," etc. His "Charges and Memorial Sermons," delivered upon special occasions, are valuable contributions to the history of the church. Among those which have been published are his charges upon "The Undeveloped Powers of the Church" and on "The Relations of the Clergy and Laity," and his "Memorial Discourses" upon Bishop Bowman, Bishop Potter, William Welsh, and Hon. T. N. Conyngham; also his sermon "Then and Now," preached at the reinterment of Bishop White, and giving a *résumé* of church history during the preceding century, and an address upon "A Glimpse at the Religious Aspects of Europe," delivered by him at the request of the Convention after his return from one of his visits to Europe.

In 1868, Bishop Stevens was appointed by the presiding bishop to take charge of the American Episcopal Churches on the continent of Europe, which position he held six years.

Bishop Stevens is a fortunate man. Honors and emoluments have come near him and he has taken them. He has traveled extensively, seen much, is a keen observer, and converses well. He observes the usages of good society, and personal intercourse with him is a delight to his friends. His clergy have never been arrayed against him, and he has always moved along just about fairly abreast of the wishes and opinions of the majority of the clergy and laity of his diocese.

During his episcopate about twenty new parishes, in Philadelphia, have been admitted into union with the Convention, but this by no means indicates the entire growth of the church in this period. Some of the parishes, like St. James', have erected new and larger churches, others have greatly improved their church edifices, and many have added parish buildings, Sunday-school buildings, chapels, or rectories. His episcopate has been marked, too, by the greatly extended and systematized missionary works of various kinds performed in this city. Besides the City Mission, he has fostered a German mission, a French church, a Spanish mission, an Italian mission, and a church mission to deaf mutes, all of which will be noticed elsewhere.

Among the many interesting episodes of Bishop Stevens' varied and eventful career we notice the following: In his Convention address in May, 1868, he says, "Three times since we last met here I have been at the point to die,—once while at Pittsburgh, whither I had gone to assist in the consecration of Bishop Kerfoot; again in England, where I had gone to recruit my health; and thirdly, after my return. I had planned out a system of visitations which, had I been permitted to fulfill my appointments, would

have enabled me to make a visit to nearly every parish in the diocese. My carefully-laid plan was suddenly broken up. On the morning of Thursday, the 20th of February last, as I was returning to Philadelphia from Scranton (where I had held an ordination and confirmation the day before), the car in which the Rev. John Long and the Rev. A. A. Marple and myself were sitting was thrown from the track by a broken rail, over an embankment thirty-five feet high, into the frozen canal, and crushed to pieces and burned. It pleased God in His wise but loving providence to inflict greater injuries on me than on any one else. My head, neck, back, breast, and limbs were much bruised and wounded, and I was conveyed in almost a lifeless state to the residence of Judge Conyngham, at Wilkesbarre, about eleven miles distant from the place of the accident. Here I was confined for eight weeks, and did not resume my duties until May."

In his Convention address of 1877, alluding to the Centennial celebration held in Philadelphia in the preceding year, Bishop Stevens says, "While hundreds of thousands visited the shrines of liberty in Independence Hall and Carpenters' Hall, tens of thousands visited old Christ Church, the great historic temple of the Protestant Episcopal Church, to see the place where Washington and his companions worshiped, where Franklin and his family attended service, where Bishop White, the patriarch of the Protestant Episcopal Church, ministered from the period of youth to hoary age, and where were held conventions and consecrations second in historic interest to none ever held on this continent."

On Saturday, July 1, 1876, at the close of the national centennial commemoration of the hundredth anniversary of the passage of the act declaring the colonies free and independent, on the 2d of July, 1776 (held in Independence Square on this day because the 2d came on Sunday), Bishop Stevens officiated by pronouncing the benediction.

On Monday, July 3, 1876, the centennial commemorative services, ordered by a resolution of the diocese of Pennsylvania, were held in Christ Church. By request of the committee of arrangements Bishop Stevens preached an historical discourse, which has since been published. There was a large gathering of the clergy and laity in the venerable edifice, a special form of service which had been set forth by the bishop was used, and the music was unusually appropriate and impressive. The Bishop of Central Pennsylvania was present, and took part in the exercises.

On Tuesday, July 4, 1876, Bishop Stevens, having been requested by the authorities in charge to officiate as chaplain on the occasion of the national centennial commemoration of the Declaration of Independence of July 4, 1776, in Independence Square, he opened those august services with a prayer, which he had prepared for the occasion.

On Sunday, Sept. 10, 1876, in Trinity Church, Geneva, N. Y., Bishop Stevens officiated as consecrator at the consecration of the Rt. Rev. William Stevens Perry, D.D., as Bishop of Iowa; the Most Reverend Ashton Oxenden, D.D., Lord Bishop of Montreal and Metropolitan of Canada, and Bishops Coxe, Kerfort, and Bissell, united in the imposition of hands. Dr. Perry, the newly consecrated bishop, was the son of a sister of Bishop Stevens.

Bishop Stevens attended, with a number of other American bishops, the second Conference of Anglican bishops, held at Lambeth, July 2, 1878. While in Great Britain he preached in Westminster Abbey the anniversary discourse before the Society for Propagating the Gospel, at its one hundred and seventy-seventh anniversary. He also preached in Canterbury Cathedral and in the Royal Chapel, Savoy, London. At the request of the Archbishop of Canterbury and the English bishops, Bishop Stevens preached the closing sermon to the Lambeth Conference in St. Paul's Cathedral, London. In reference to this discourse Bishop Stevens says, in his address to his Convention here in May, 1879, "I felt that this honor was conferred on me, not for any personal merit, but for the sake of the old diocese of Pennsylvania, the first fully organized one in the United States, and because I was the successor of the venerable Bishop White, who had been consecrated Bishop of Pennsylvania, in the chapel of Lambeth Palace, and who had presided for nearly fifty years over the Protestant Episcopal Church in this country.

"In this connection I take pleasure in saying that a number of the American bishops then in England felt that they ought not to let the occasion pass without some marked recognition of the solemn and important gathering, and especially of the fact that in the chapel of the palace where we met, the first three American bishops of the Anglican line of succession were consecrated to their holy office. It was also felt that it would be a graceful act on our part and a grateful recognition of the extreme kindness and courtesy of the Archbishop of Canterbury, in the midst of his severe domestic sorrow, to associate with that memorial the name of the dear son who had so recently been taken from him, and who had, while in America, so endeared himself to the hearts of so many of the bishops and clergy and laity whom he met at our last General Convention. Hence it was resolved, with the approbation of his grace of Canterbury, to put up a memorial window in the Lambeth Chapel which should commemorate both events. That window has been completed and is now in its place, and has given great satisfaction to all who have seen it. I am sure that you will rejoice with me that such a memorial of the three bishops who brought to this country the Anglican Episcopate, has been placed in the very chapel where, nearly a hundred years ago, they were consecrated to their office."

Bishop Stevens, during the twenty-three years of his episcopate, has seen his diocese reduced in its

territorial extent, first, by the erection of the diocese of Pittsburgh, in 1865, and subsequently by the erection of the diocese of Central Pennsylvania, in 1871, so that since this latter date the diocese of Pennsylvania has comprised only the city of Philadelphia and the four adjacent counties, Bucks, Chester, Delaware, and Montgomery. Notwithstanding this, so steady and great has been the growth of the Protestant Episcopal Church in the diocese of Pennsylvania that in many important respects the church is as large and strong in the limited diocese as it was when the whole State formed but one diocese. The number of clergy, of communicants, and of Sunday-school teachers and scholars is about the same or greater than in the whole State in 1862.

At present (in 1883) in the city of Philadelphia alone, not including the church statistics of the four adjoining counties, there are 80 parishes, 80 churches, 15 chapels, 154 clergymen, 50 Sunday-school and parish buildings, 36 parsonages, 2400 Sunday-school teachers, 26,000 Sunday-school scholars, 65 charitable, benevolent, and humane institutions under the auspices of the church, 24,500 communicants, and about 250 miscellaneous parochial organizations, such as guilds, industrial schools, workingmen's clubs, mothers' meetings, etc.

The annual offerings of the parishes in Philadelphia during the year ending May, 1883, amounted to $725,000, and the estimated value of the church property is about $8,000,000. The bishop occupies the episcopal residence, No. 1633 Spruce Street, purchased in 1869, and has a salary of $6500 per annum. This sum (apart from the income from the fund for the support of the episcopate in Pennsylvania, the principal of which amounts to $60,000) and the amount needed to defray the expense of holding the Annual Diocesan Convention, is raised by an annual assessment upon the parishes, proportionate to their strength. Apart from this assessment (and, of course, pew-rentals) all the receipts of the Protestant Episcopal Church are derived from voluntary offerings.

Christ Church.—The history of old Christ Church is virtually the history of the Protestant Episcopal Church in Philadelphia for a long period. The venerable building, on the west side of Second Street, north of Market Street, is a fine and well-preserved specimen of a style of church architecture which appeared in London after the great fire. It has been the scene of so many interesting events of historical and ecclesiastical importance, and so many distinguished men have served or worshiped in it, that, apart perhaps from Independence Hall, it may be deemed the most interesting historical building in Philadelphia, a noble monument to the piety that founded and the devotion which has so carefully guarded and preserved it.

The principal facts in the early history of Christ Church have been carefully collated by the Rev. Dr. Dorr in his "History of Christ Church," and incidentally noticed in the published writings of Bishop White, Dr. Bird Wilson, Mr. Smith, and others. They are voluminous, covering as they do the space of nearly two centuries, and we give here as full and continuous a summary of this history as our space will allow.

In the royal charter granted to William Penn by Charles II. there had been inserted, at the suggestion

FIRST CHRIST CHURCH.
[From an old drawing in Philadelphia Library.]

of Compton, Bishop of London, a clause providing that "if any of the inhabitants of the said Province (Pennsylvania), to the number of twenty, shall at any time hereafter be desirous, and shall by any writing, or by any person deputed for them, signify such their desire to the Bishop of London that any preacher or preachers to be approved by the said bishop may be sent unto them for their instruction, that then such preacher or preachers shall and may be sent, and reside within the said Province without any denial or molestation whatsoever."

The Rev. Thomas Clayton was sent to Philadelphia by Dr. Bray, the Bishop of London's commissary in Maryland and Virginia. It is said that he did not find at his entrance above fifty of the communion of the Church of England to make a congregation, and yet within two years the congregation at

Digitized by Google

Philadelphia was increased to about seven hundred members. What was then termed "a very fine church" was built upon the site of the present church in 1695. It would seat about five hundred persons, is thought to have been built of brick, and had galleries. In 1702 it had a church bell, and a brick belfry was built in 1708. The present church stands at the corner of Church Street, but it is a tradition that when the first church was built, and for some time after, all was open on the south side of the church, and that no buildings stood between the church and the north side of High (now Market) Street. The Rev. Mr. Clayton died in 1699, of yellow fever, at Sassafras, Md.

The second rector of Christ Church was the Rev. Evan Evans, sent out by the Bishop of London. The Rev. Mr. Evans died in 1718, in the pulpit of Christ Church, while officiating, having been stricken with apoplexy, and was buried in the church. During this period services seem to have been performed in Christ Church by numerous clergymen, assisting the rector or supplying services in his absence. Among them were the Rev. George Keith, the first missionary sent out by the Society for the Propagation of the Gospel, Rev. Mr. Rudman, pastor of the Swedish Church, Rev. John Thomas, who came over from England in 1704, Rev. Dr. Talbot, of St. Mary's Church, Burlington (whom the Rev. Dr. George Morgan Hill, now rector of that parish, in an exhaustive volume, endeavors to prove had been consecrated as bishop by the non-juring bishops),[1] Rev. Mr. Humphrey, of Chester, Rev. Mr. Ross, of New Castle, Rev. Andrew Sandals, of Gloria Dei Church, Rev. Thomas Hughes, of Virginia, William Skinner, Rev. Mr. Weyman, and Rev. John Urmston. The Rev. John Vicary was sent out as rector in 1719, but died in 1722.

The king for some time gave the rector fifty pounds per annum. After that was withdrawn, the vestry gave the rector one hundred and fifty pounds per annum and a parsonage. He had also his "surplice fees," which formed a considerable part of his income.

In 1711, Christ Church was enlarged, and ninety pounds realized from the sale of new pews. Governor Sir William Keith became one of the vestry, and built a permanent "Governor's pew" in the church. The church plate, still preserved, was brought over from England by the Rev. Mr. Evans, in 1708, on his return from a visit to England. It was the gift of Queen Anne, and the flagon and chalice bear the inscription, "*Anna Regina, in usum Ecclesiæ Anglicanæ apud Philadelphiam*, A.D. 1708."

[1] The same statement is made in regard to the Rev. Dr. Richard Welton, who also officiated at the same period in Philadelphia. They are both said to have put on bishop's robes, and performed confirmation services. As soon as news of their performances reached England, they were recalled and their acts disavowed. Welton went to Portugal, and died in 1726. Dr. Talbot submitted, took all the required oaths, and made his peace with the church.

Of the Rev. Mr. Evans, Penn, who kept on good terms with people of all denominations, says, in writing of him, "The new minister seemed to be a goodish sort of man, sober and mild in disposition, and if he would behave conformably, and Asheton would keep him in order and at peace with the Quakers, he might count on as much favor in all reasonable things as he could from any Governor of his own way."[2]

The Rev. George Keith, spoken of above, was originally a member of the Kirk of Scotland, then a member of the Society of Friends, and later a clergyman of the Church of England. He had peculiar views and divided the Quakers, forming a sect called Keithians, and after he entered the church many of them followed him. Indeed, during the first quarter of the eighteenth century in Philadelphia, and in the settlements in its vicinity, quite a considerable number of the Friends joined the church. Keith says that Christ Church "had a good vestry, discreet, and in harmony with one another," and that the missionaries were very successful in making converts among the Quakers, especially the Keithians. In 1712, Col. Quarry presented Christ Church with a flagon, two plates for the communion service, and a silver basin for the font.

Prior to 1719 burials had been made either in the church or in the churchyard. In 1719 a lot was purchased at the southeast corner of Arch and Fifth Streets from James Steele, and in 1720 the first interments were made there.[3]

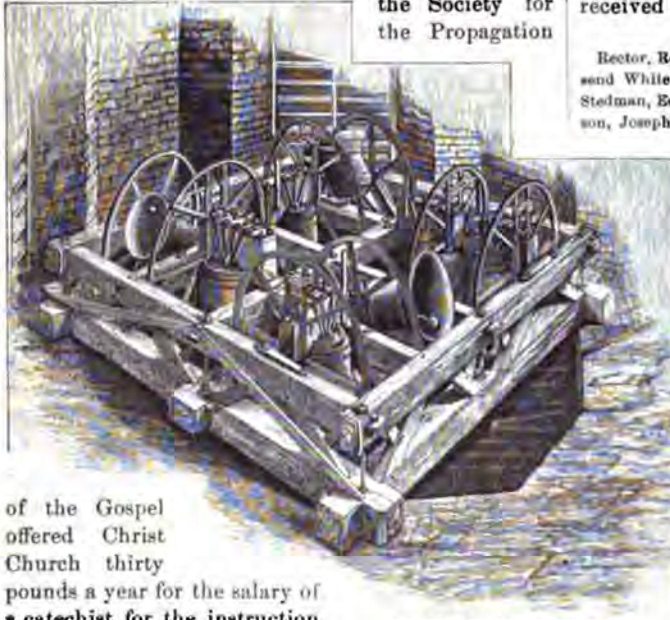
The pulpit was temporarily supplied by the Rev. Mr. Weyman, of Trinity Church, Oxford, Rev. Jonas Sidman, of Swedes' Gloria Dei Church, and the Rev. Mr. Holbrook. In September, 1726, the Rev. Archibald Cummings entered upon the rectorship. The church edifice was enlarged, a steeple built, and an organ procured from London. This was virtually the erection of the present edifice. Dr. John Kearsley, a member of the parish, was practically the architect of the building, and supervised its erection. The corner-stone was laid April 27, 1727, Lieutenant-Governor Patrick Gordon performing the ceremony, Mayor Charles Reed, Recorder Andrew Hamilton, Rev. Mr. Cummings, and other gentlemen assisting. In digging for the foundations some old graves were disturbed, and the widow of the former sexton was paid one shilling and sixpence per diem to gather up the bones.

[2] The Mr. Asheton spoken of was a kinsman of Penn, a prominent citizen and official, and one of the earliest members of Christ Church.

[3] The tomb of Benjamin Franklin and his wife are in the northwest corner of this burial-ground, and about fifteen years ago the vestry replaced the part of the brick wall opposite this tomb by an open iron railing, so that it can be seen and the inscription on the slab easily read by passers-by on Arch Street. Few or no interments have been made here since about 1850, and the ground has long ceased to yield any income to the parish. Its preservation in good order is an expense, to meet which the vestry a few years ago asked for donations to be added to a small existing fund, the income from which is used for this purpose.

In 1743, Dr. Kearsley asked for a committee to audit his accounts as trustee and overseer since 1727. He had "toiled hard, neglected his own business, and received no recompense but calumny and ill-treatment." The committee reported in a very complimentary way, and the vestry voted the doctor their thanks, and also voted "forty pounds for a piece of plate, as a lasting memorial of his services to this church and congregation." In August, 1744, the church wardens reported the church as finished, all but the tower and steeple. In 1740 the pulpit had been moved to the east end of the middle aisle, and there was introduced a chandelier of twenty-five branches, which cost fifty-six pounds. The Rev. Mr. Cummings died in April, 1741. In 1735, Rev. Richard Peters became his assistant, and was able and popular. He withdrew soon, however, on account of some difference, and after holding several offices of public trust, Dr. Peters became rector.

The Rev. Robert Jenney became rector in 1742, and Rev. Eneas Ross was for a brief period his assistant. In 1746 the Society for the Propagation of the Gospel offered Christ Church thirty pounds a year for the salary of a catechist for the instruction of the negroes in the parish. The congregation increased this sum, and Mr. William Sturgeon, a graduate of Yale College, was appointed as assistant and catechetical lecturer, and is said to have done his difficult work well. By 1754 the tower and steeple were completed, and a chime of eight bells placed in position. The bells were brought over from England by Captain Budden, who charged no freight on them, and thereafter, whenever his ship arrived in port the bells rang a merry peal. On the approach of the British army in the Revolutionary war, these bells were taken down and hidden by the commissary of military stores, at Bethlehem, Pa.; but after the British troops evacuated the city they were brought back and replaced.



CHRIST CHURCH CHIMES.

In 1753 the residents in the lower part of the city were desirous to have a church erected in their own neighborhood, and applied to the vestry, but no action was taken until 1758, when steps were taken toward the erection of St. Peter's Church. The Rev. Dr. Robert Jenney was rector of Christ Church from 1742 until his death, on Jan. 5, 1762. He was "a man of strict honesty, one that hated dissimulation, exemplary in his life and morals, and a most zealous member of the church." He lies interred in the middle aisle of Christ Church.

After the death of Dr. Jenney, the Rev. Dr. Richard Peters became, in 1762, rector of Christ Church, and also rector of St. Peter's Church. Christ Church was originally organized under "Articles of Association," and St. Peter's Church, when united with it, was received under the same. In 1765, Dr. Peters, on his return from a visit to England, brought out a "charter" which had been granted by the proprietaries. The first vestry under this charter, which was received June 28, 1765, was the following:

Rector, Rev. Richard Peters, D.D.; Wardens, Charles Stedman, Townsend White; Vestrymen, Dr. John Kearsley, Jacob Duché, Alexander Stedman, Edward Duffield, William Pyewell, John Ross, Henry Harrison, Joseph Redman, Peter Turner, Sr., Redmond Conyngham, Peter Sonmans; Questmen, Joseph Swift, Joseph Sims, Joseph Stamper, Thomas Gordon, James Humphreys, William Bingham, William Plumsted.

After the erection of St. Peter's Church, the two were known by the name of the United Churches, and St. James' Church, after its erection, was included under the same charter and title. The Rev. Dr. Richard Peters died July 10, 1776, having resigned the rectorship on account of ill-health, in the previous year. The Rev. Jacob Duché, who had been assistant in Christ Church since 1759, was unanimously chosen rector. In 1772, the work being too great for Dr. Peters and Mr. Duché, the Rev. Thomas Combs and the Rev. William White (afterward Bishop White) were chosen additional assistants. The Rev. Mr. Duché having returned to England, the vestry declared the rectorship vacant, and in 1779 elected the Rev. William White their rector.

Dr. John Kearsley, who had taken an active part in the erection of St. Peter's Church, as well as of Christ Church, died Jan. 16, 1772, aged eighty-eight years. By his will, dated April 29, 1769, he left a large part of his estate in trust to the corporation of the United Churches of Christ Church and St. Peter's, to found an institution which he named Christ Church Hospital, for the support of ten or more distressed women of the communion of the Church of England. This legacy, which was some-

Digitized by Google

what enlarged afterward by other generous legacies, has been most faithfully guarded and judiciously administered, and Christ Church Hospital now stands among the noblest and most useful of the charities of the Protestant Episcopal Church.

On March 26, 1781, the Rev. Robert Blackwell was elected assistant to the Rev. Mr. White in the United Churches. Mr. Blackwell was descended from a Long Island family, from which Blackwell's Island in New York harbor derives its name. He had been a chaplain during the Revolution, attached to the First Pennsylvania Brigade. He had a large private fortune, was married to a sister of the Hon. William Bingham, and while in Philadelphia resided in a fine old mansion on the south side of Pine Street above Second, which [in 1884] is still standing. He resigned in 1811.

Zion Lutheran Church, at Fourth and Cherry Streets, having been burned, the use of Christ Church on Sunday afternoons or evenings by that congregation was offered and accepted. During the absence of Rev. William White, in England, for the purpose of being consecrated bishop, the Rev. John Andrews officiated in Christ Church, and the Rev. Mr. Blackwell in St. Peter's Church. In 1794, the Rev. James Abercrombie was elected assistant in the United Churches. Dr. Abercrombie gave much of his time to the destitute rural churches, but remained assistant until 1832, and died June 26, 1841, aged eighty-three years.

In 1811, the Rev. Jackson Kemper (afterward Bishop of the Northwest) was elected assistant in the United Churches, and remained until 1831. Rev. James Milnor was assistant, 1814–16. Rev. William Augustus Muhlenberg was assistant, 1816–20. He was the author of the hymn "I would not live alway," and founder of St. Luke's Hospital, New York, and of St. John's Guild. The Rev. William H. De Lancey (afterward Bishop of Western New York) was assistant from 1822 in the United Churches, and later was rector of St. Peter's Church until his consecration, in 1839.

In 1828 St. James' Church, which had been one of the United Churches, became a separate parish, Bishop White still remaining its rector. In 1832 Christ Church and St. Peter's Church became separate parishes and distinct corporations, Bishop White, however, being rector of each. At Christ Church his assistant was the Rev. John W. James, at St. Peter's Church the Rev. Dr. De Lancey, and at St. James' Church Rev. Francis L. Hawks.

Bishop White died July 17, 1836. His assistant, the Rev. John W. James, died a few weeks later, and the Rev. Benjamin Dorr, of the diocese of New York, became rector of Christ Church, and was instituted on Ascension day, May 4, 1837. In 1836 extensive alterations were made in the interior of the church, and a new organ purchased. Dr. Dorr continued in the rectorship until his death, in 1869. After the death of Bishop Stone, in 1838, Dr. Dorr was elected Bishop of Maryland, but declined. He was scholarly, quiet, and of great devotion. He was honored and beloved not only in his own parish, but throughout the church. During the last year or two

CHRIST CHURCH IN 1829.

of his prolonged ministry his health was much impaired, and most of the duties were performed by his assistant. The present rector, the Rev. Edward A. Foggo, D.D., who had been assistant to Dr. Dorr for the previous six or eight years, was elected to the rectorship, and was instituted by Bishop Stevens, on Wednesday, Dec. 15, 1869.

In 1871 a new parish building, with ample accommodations for the Sunday-schools, was erected adjacent to the church, and opened on the first Sunday in December. In style it corresponds with the old church.

In 1883 extensive improvements were made to Christ Church. The church was restored to the condition, in its general interior arrangements, which existed before the changes made in 1836. The wooden floor which covered the marble memorial stones in the aisle was taken away. Though the arrangement of the interior has restored this venerable church to the condition it was in during Bishop White's ministry, it has been modernized, and made comfortable and attractive. Just after the completion of this restoration and these improvements, the General Convention of 1883 assembled in Philadelphia in October. The sessions of that body were held in the church of the Holy Trinity, but the opening religious services were held in Christ Church. Nearly fifty bishops were present in their robes, and an historical sermon was delivered by Bishop Clark, of Rhode Island.

Beginning with the winter of 1869, a series of free services were held in the church on Sunday evenings, and gas was first introduced for the general lighting of the edifice.

In addition to the services held in Christ Church, the parish has maintained services at several other places, which will be noticed more at length in connection with the buildings named. The Ladies' Aid Association of Christ Church assisted greatly in the erection of Calvary (Monumental) Church, and for a long period paid the stipend of the clergyman there. Calvary Church becoming feeble, for a period of years was carried on as a chapel of Christ Church, services being held by the Rev. G. Woolsey Hodge, assistant to Dr. Foggo. Christ Church Chapel, on Pine Street above Nineteenth, was erected in 1877, and has been very successful. At Christ Church Hospital services are regularly maintained in the chapel by the chaplain, that institution being under the care of Christ Church and St. Peter's Church. In 1880 the endowment fund for the support of Christ Church, which had been begun a few years before, reached the sum asked for, fifty thousand dollars. This is invested, and is likely to be increased. The parish has ever been generous in its offerings for extra parochial, missionary, and charitable objects.

We have here given an outline of the history of this venerable church and parish. Its full history would require volumes. The record of the names of distinguished and pious men and womén who have labored for it and worshiped in its courts, would be a long list. It is most gratifying to be able to record the facts which show its great vitality and usefulness at the present period of its history. Notwithstanding the removal of so many families to the western and suburban portions of the city during the last twenty-five years, old Christ Church is still a strong parish. At scarce any former period in its honorable career, was the Sunday-school work, the charitable work, and the local parochial missionary work, more systematically and effectively carried on than at present. The ritual and services are stately and dignified; they accord with the historical spirit of the church.

The present rector is the Rev. Edward A. Foggo, D.D.; assistant, Rev. E. C. Belcher. The Rev. William P. Lewis, D.D., is minister-in-charge of Christ Church Chapel. Wardens, Thomas H. Montgomery and Isaac Welsh. In the Convention year ending May, 1883, Christ Church reported having three hundred and forty-eight communicants, and the annual expenditures and appropriations for parochial, charitable, and missionary purposes were $20,329.08.

The following bishops were consecrated in Christ Church: Rt. Rev. Robert Smith, D.D., Bishop of South Carolina, on Sunday, Sept. 13, 1795; Rt. Rev. Edward Bass, D.D., Bishop of Massachusetts, on Sunday, May 7, 1796; Rt. Rev. Theodore Dehon, D.D., Bishop of South Carolina, on Thursday, Oct. 15, 1812; Rt. Rev. Nathaniel Bowen, D.D., Bishop of South Carolina, on Thursday, Oct. 8, 1818; Rt. Rev. Henry U. Onderdonk, D.D., Assistant Bishop of Pennsylvania, on Thursday, Oct. 25, 1827; Rt. Rev. James Hervey Otey, D.D., Bishop of Tennessee, on Tuesday, Jan. 14, 1834; Rt. Rev. Carlton Chase, D.D., Bishop of New Hampshire, on Sunday, Oct. 20, 1844; Rt. Rev. Nicholas Hamner Cobbs, D.D., Bishop of Alabama, on Sunday, Oct. 20, 1844; Rt. Rev. Cicero Stevens Hawks, D.D., Bishop of Missouri, on Sunday, Oct. 20, 1844; Rt. Rev. Alonzo Potter, D.D., LL.D., Bishop of Pennsylvania, on Tuesday, Sept. 23, 1845; Rt. Rev. Samuel Bowman, D.D., Assistant Bishop of Pennsylvania, on Wednesday, Aug. 25, 1858.

Christ Church Chapel.—About the year 1875, to provide services for members of Christ Church who were living at such a distance from the parish church as to make it inconvenient for them to be regular attendants, and who still were desirous to remain connected with the old church, and also to provide additional church accommodations for others, the Rev. G. Woolsey Hodge, then an assistant minister in Christ Church, began the services of Christ Church Chapel, which for a couple of years were held, part of the time, in an upper room in a building on Chestnut Street, temporarily fitted up as a chapel, and afterward, by courtesy, in the chapel of the French academy building, Twenty-first Street above Chestnut. The services were popular and well attended from the beginning, and the board of managers, to whom the care of the chapel had been committed by the vestry of Christ Church, purchased, in the autumn of 1876, a lot on the north side of Pine Street, between Nineteenth and Twentieth Streets, having a frontage on Pine Street of ninety-six feet. A row of dwelling-houses on a small street in the rear was included, and these are left standing for the present, the rental being devoted to the payment of an incumbrance remaining on the ground.

A neat chapel, to accommodate about two hundred and fifty persons, was built and opened in 1877.

This has since been somewhat enlarged. Chairs are used instead of pews. The Rev. Mr. Hodge resigned the assistantship March 10, 1880. The present minister in charge of Christ Church Chapel, the Rev. William P. Lewis, D.D., entered on his duties Oct. 6, 1880. The present number of communicants is three hundred and seventy-two. The sittings are all free. There is usually a daily service, a weekly celebration of the holy communion, and on several of the greater festivals two celebrations. There is a surpliced choir of men and boys. The ritual is very churchly, but conservative. Altogether the chapel has accomplished its intended purposes very successfully and satisfactorily. The property is estimated to be worth thirty thousand dollars; the total debt, which is being reduced, is about twelve thousand dollars.

St. Peter's Church, at the southwest corner of Third and Pine Streets, was the second church edifice erected by churchmen within the city limits. Christ Church was not large enough to accommodate the members of all the church families in Philadelphia. The first request to the vestry of Christ Church to build a church in the lower part of the city was made in 1753. At that period, and for a long time after, the best residences in the city were between Second Street and the Delaware. Many of the "merchant princes" lived on South Front Street, some in Swanson and Water Streets. The first steps toward the building of the new church were taken in 1758. The vestry appointed a committee, of which Dr. John Kearsley was an active member, and the erection of the church was begun. A lot at Third and Pine Streets was granted for the purpose by the "honorable proprietaries," and this was afterward enlarged by subsequent purchase of ground for the graveyard. The church was begun in September, 1758, finished in 1761, and opened for the first services on Sept. 4, 1761, the sermon being preached by the Rev. Dr. William Smith, provost of the college. It was named St. Peter's Church after its completion. It was ninety feet in length and sixty in width, with no spire, but surmounted by a small cupola. Christ Church gave it two small bells, which had been used before they procured a chime. As noticed in the history of Christ Church, it and St. Peter's were known as the United Churches, both being under one rector. Gen. Washington, while residing in Philadelphia, was an attendant at St. Peter's Church, as well as Christ Church, as appears by the following interesting letter, written by Bishop White to Col. Mercer, in reply to certain inquiries:

"PHILADELPHIA, Aug. 15, 1835.

"DEAR SIR,—In regard to the subject of your inquiry, truth requires me to say that Gen. Washington never received the communion in the churches of which I am the parochial minister. Mrs. Washington was an habitual communicant before the general left his seat in Congress to take command of the army. Afterwards, during the war, whenever he was in this city, and since, having rented a house near my other church (St. Peter's), he attended there. He was an antipode to those who are in the habit of changing the places of their attendance. . . .

"Respectfully, your humble servant,

"WILLIAM WHITE."

The Rev. William H. De Lancey, who had been an assistant minister in the united parishes from 1822 to 1828, and also since 1833, upon the death of Bishop White, July 17, 1836, became rector of St. Peter's Church. Prior to that date, however, in 1832, Christ Church and St. Peter's Church had become distinct and separate corporations, Bishop White being rector of each. Dr. De Lancey was consecrated Bishop of Western New York in 1839. The Rev. William H. Odenheimer, who had been assistant to Dr. De Lancey for a short time, succeeded him as rector. He was one of the most laborious of parish priests. He introduced daily prayers at St. Peter's Church, it being the first church in Philadelphia where the daily morning and evening prayer was said. In 1859, Dr. Odenheimer was consecrated Bishop of New Jersey, and the Rev. George Leeds, D.D., was rector from April 14, 1860, until 1867. He was succeeded by the present rector, the Rev. Thomas F. Davies, D.D., whose rectorship began in May, 1868. The spire of St. Peter's Church was erected in 1842, a fine chime of bells having been presented to the parish.

At the present time St. Peter's Church is a strong and vigorous parish. Like Christ Church, it has paid great attention to the local parochial and missionary work. It has a fine Sunday-school and parish building, erected a few years ago on Lombard Street. St. Peter's house, at Front and Pine Streets, is a centre of active charitable associations. This ground, occupied by the old family mansion, was given to St. Peter's Church by G. Dawson Coleman, Esq., about ten years ago, and the old house was replaced by the present building. The Memorial Church of the Holy Comforter, at Nineteenth and Titan Streets, was founded as a chapel of St. Peter's Church in 1868, and this splendid set of buildings was erected by a devoted member of this parish. An endowment trust for the future and permanent support of St. Peter's Church was begun in 1872, and now amounts, we believe, to over thirty thousand dollars. Christ Church Hospital is under the joint trusteeship of Christ Church and St. Peter's Church. The rectory of St. Peter's Church is No. 717 Pine Street.

The present church wardens are the Hon. John Welsh and George Harrison Fisher. The expenditures in 1883 for parochial and missionary purposes were $20,107.16. Number of communicants, seven hundred and seventy-one. Clergy, Rev. Thomas F. Davies, D.D., rector; Rev. Alexander J. Miller, assistant.

The Memorial Church of the Holy Comforter.—The Memorial Mission of St. Peter's Church was inaugurated on Advent Sunday, 1868, the earlier services being in charge of the Rev. Franklin L. Bush, assistant in St. Peter's Church. Tentative services were held for some time in a hall near Second and Pine Streets; afterward a frame church was erected on South Nineteenth Street, near Federal, and after this had proved successful, the present buildings at

the corner of Nineteenth and Titan Streets were erected, as a memorial to her mother and sister, by Miss Margaretta S. Lewis, on ground which had long been owned by the family, and in a neighborhood newly built up and densely populated, mostly by the industrious working classes. There is a large and beautiful stone church, and a parish- and Sunday-school building, recently enlarged by the generous benefactress of this church, which is a model of beauty and convenience. The church-work carried on here is extensive, varied, and successful. The Rev. R. F. Chase, Joseph A. Nock, George M. Christian, and Algernon Morton were in charge of this work successively for short periods. The Rev. Alexander H. Vinton, the present rector, has been in charge for the past five or six years. The vestry is, we believe, the vestry of St. Peter's Church.

St. Paul's Church, on the east side of Third Street, below Walnut, was the third Protestant Episcopal Church erected in Philadelphia. It has an interesting history. Many of the most influential clergy in the church have been included among its rectors, and many of the most earnest and prominent of the laity in this city have been members of this ancient parish. From its commencement St. Paul's Church has been "thoroughly evangelical." It was a centre of doctrinal preaching, and its influence extended far beyond the confines of the parish. It was almost the most influential parish in the country, and the effects of its teachings and influence are still felt in the party with which it was identified. The church edifice has been maintained, but by the removal of many members to other parts of the city and other causes it has ceased to be so strong and influential as it was formerly. Two of its most successful rectors, Rev. Dr. Tyng and Rev. Dr. Richard Newton, were called from it, and accepted the rectorship of the Church of the Epiphany. The Sunday-school work of this parish was carried on most successfully in Dr. Newton's rectorship, and he introduced a system of "Sunday-school Anniversaries," with emblems, music, and offerings, which was not only largely successful in his own parish, but was introduced elsewhere.

In 1758–59, Rev. Dr. Jenney, rector of Christ Church, required an additional assistant minister, and the Rev. William McClenachan, who had been sent out as a missionary by the London Society, was elected. The Bishop of London refused to license him, upon the ground that he had been appointed to take charge of a church in Virginia, and requested Christ Church to give him no encouragement. Some of the members attached themselves to Mr. McClenachan, and, very curiously, eighteen Presbyterian ministers, assembled in Synod in Philadelphia, sent a letter to Archbishop Secker in his behalf. His followers and friends decided to build a church, and St. Paul's Church was built in its present location, being completed and opened for the first services on Sunday, Dec. 20, 1761. The building was the largest in the province, and in a few days one thousand sittings had been taken in it. The Rev. Mr. McClenachan resigned in 1765, and soon afterward died on the Eastern Shore of Maryland. The Rev. Hugh Neill officiated temporarily. The vestry, about this time, anxious to secure a clergyman from England, wrote and assured the Bishop of London of their "adherence to the faith, principles, and practices of the Church of England." In 1768 the Rev. William Stringer arrived with a letter of introduction from the Rev. George Whitefield. He had been ordained in London by a man who professed to be a bishop of the Greek Church. While here he became convinced that the Greek bishop was an impostor, and he returned, with highly commendatory letters from St. Paul's vestry, and was duly ordained by Terrick, Bishop of London, after which he was elected rector of St. Paul's Church, and continued in charge until the Revolutionary war. The Rev. Samuel Magaw, D.D., became rector in 1781, and took an active part in organizing the Protestant Episcopal Church. The Rev. Dr. Joseph Pilmore, Rev. Benjamin Allen, Rev. Stephen H. Tyng, D.D., Rev. Samuel A. McCoskry (afterward Bishop of Michigan, and who was consecrated in St. Paul's Church on July 7, 1836), Rev. James May, D.D., Rev. Dr. Richard Newton, Rev. Dr. Kingston Goddard, Rev. R. Heber Newton (son of Dr. Richard Newton), and Rev. Messrs. Roche and Boyer have been among the rectors of this parish. During the rectorship of the Rev. R. Heber Newton he proposed to the vestry a plan for erecting a row of buildings for business purposes on Third Street, and erecting a new church and parish building in the rear, which would have secured an annual revenue equal to an endowment for the support of the old church. The vestry, being unwilling, among other reasons, to disturb the family vaults by the side of the present building, did not accept the plan.

The present rector of St. Paul's Church, the Rev. William S. Adamson, entered on his duties on Oct. 1, 1879. The church wardens are Thomas Latimer and William A. Farr; communicants in 1883, two hundred and seventeen; receipts and expenditures for the year, $3374.96; value of church property, $85,000.

St. Thomas' Church.—The church for colored persons long known as St. Thomas' African Church, on Fifth Street, below Walnut, west side, was the *fourth* Protestant Episcopal Church built in Philadelphia (within the city limits),—the only one erected between 1761 and 1800. Most of the colored people in Philadelphia were attendants at the St. George's Methodist Church, but in 1787, a number of them thinking they were badly treated by being ordered to sit only in the gallery, left that church in a body. They organized a society, partly beneficial and partly religious, called the Free African Society. Being uneducated, they sought and received kindly counsel from some of the Society of Friends, and from Bishop White, who united together in advising them. A

congregation was formed, and the church on Fifth Street opened for the first services on July 17, 1794, the prayers being read by the Rev. Dr. James Abercrombie, assistant in the United Churches, and the sermon preached by the Rev. Dr. Samuel Magaw, rector of St. Paul's Church. Absalom Jones, a colored man, of good character and principles, formerly a slave, was ordained by Bishop White to deacon's orders in 1795, and to the priesthood in 1804. The congregation organized in 1794, their Constitution providing "that none among us but men of color—Africans or the descendants of the African race—can elect or be elected to any office among us, save minister or assistant minister; and that no minister shall have a vote at our elections." On the other hand the Church of St. Thomas was admitted into connection with the Protestant Episcopal Church in the diocese of Pennsylvania, but, it was "provided, it is not to be understood to entitle the African Church to send a clergyman or deputies to the Convention, nor to interfere with the general government of the Episcopal Church."

On several occasions efforts were made to admit this church into union with the Convention, but they failed. Finally, in 1863-64, St. Thomas' Church was admitted on the same terms and to the same rights as all other parishes, it having complied with a condition prefixed to the resolution admitting it, that its Constitution should be amended so as to make no distinction of color.

Rev. Absalom Jones died in 1818, after a ministry of twenty-two years. The church has been at times since then under the rectorship of white clergymen, at others, under colored clergymen. The Rev. James Wiltbank, 1825; Rev. Peter Van Pelt, D.D., 1830; Rev. Jacob M. Douglass, 1834; and Rev. Mr. Bowen, have been among the white pastors; the Rev. William Douglass, 1839; Rev. Mr. Alston, and the present rector, Rev. J. Pallam Williams, among the colored ministers. The church has a parsonage and a cemetery.

St. James' Church, Kingsessing.—This church, on the Darby road, about three miles below Chestnut Street, was one of the old Swedish churches. It was erected in 1760, during the pastorate of Rev. Dr. Charles Magnus von Wrangel, and was united to Gloria Dei Church, both being under one pastorate. In 1842-43 it became a separate corporation, and in 1844 it was admitted into union with the Convention of the Protestant Episcopal Church, the Rev. Samuel C. Brinkle being rector at the time. The present rector, the Rev. Charles A. Maison, D.D., has been connected with the parish since 1857. The venerable church is preserved in excellent order, and the parish is quite useful and prosperous. The grounds, including a cemetery, are extensive, comprising about two blocks. It has a rectory, a Sunday-school building, and a memorial parish building, erected about fifteen years ago.

In 1883 the number of communicants reported was one hundred and eighty-one, and the expenditures for parochial and extra parochial objects were $3438.85.

Trinity Church, Oxford, about three miles northwest of Frankford, was built in 1711, and was for many years the only church north of Philadelphia in the whole State. Before the present building was erected, another building, spoken of by one writer as built of logs, on the present site, which had been used for school purposes and as a meeting-house, was occupied by the Keithians. In 1698 it was transformed into an Episcopal Church. It was named Trinity Church, Oxford, and was served for some years by the clergy of Christ Church or the minister of the Swedish Church. It is barely possible that the present edifice was an enlargement of the building used prior to 1711. In 1700, Thomas Graves, a member of the congregation, deeded to Joshua Carpenter, the brewer, and John Moore, three acres of ground "for the use and service of those of the communion of our Holy Mother, the Church of England, and to no other use whatsoever." This was added to the burial-ground.

The Rev. Messrs. Clayton, Evans, Clubb, Weyman, and Thomas were among the earlier clergy who ministered at Trinity Church, most of them also supplying other stations. At that period Oxford included, in an indefinite way, a large district, comprising Frankford, Tacony, etc. The Rev. Dr. William Smith, provost of the college, now University of Pennsylvania, was rector from 1766 to 1777. He took an active part with Bishop White in settling the organization of the Protestant Episcopal Church, and wrote the preface to the Book of Common Prayer. Lay deputies from Trinity Church attended the earliest Conventions of the church, and the parish was admitted into union with the Convention in 1786. The Rev. George Sheets was in charge from 1816 to 1854, and on Oct. 1, 1854, the Rev. Edward Y. Buchanan, D.D. (brother of President James Buchanan), became rector, and remained in charge until his resignation, Oct. 1, 1882. During Dr. Buchanan's ministry a rectory was built, the churchyard inclosed with a stone wall, an addition made to the old church, without any material alteration of the old building, and a fine chapel built at Crescentville, two miles distant. There was also a remarkable increase in the charitable offerings made by the parish, and for some missionary and benevolent purposes the offerings of Trinity Church were the largest made by any church in the diocese.

The present rector, Rev. R. Bowden Shepherd, was assistant to Dr. Buchanan for about eighteen months, and became rector Oct. 1, 1882. A neat parish building was erected adjacent to the church, and a tablet in the front wall designates it as a memorial of Dr. Buchanan's long and faithful pastorate. It was dedicated April 23, 1883.

Trinity Church, Oxford, with its venerable building

and old churchyard, is more like an old English rural parish church than any other church in the diocese. An object of curiosity to visitors is the burial-ground, and one of the old grave-stones, dated 1708, bears the following inscription, an evidence, doubtless, of some religious controversy which agitated the local community at that period:

"Here by these lines is testified,
No Quaker was she when she dy'd;
So far was she from Quakerism
That she desired to have baptism
For her own babes and children dear,—
To this these lines true witness bear.
And, furthermore, she did obtain
That faith that all shall rise again
Out of the graves at the last day,
And in this faith she passed away."

Church wardens, William Overington and Harvey Rowland. Money expenditures and appropriations, $6091.66.

All Saints' Church, Lower Dublin Township, near Torresdale, and just within the city limits, was built in 1772 to accommodate members of Trinity Church, Oxford, and others living in that neighborhood. For many years it was associated with Trinity Church and St. Thomas' Church, White Marsh, and the three churches were served by the same clergyman for a considerable time. The Rev. John Henry Hobart (afterward Bishop of New York) was in charge of the services in All Saints' Church for a while (in 1798) soon after his ordination. The parish was separated from Trinity Church, and the Rev. Frederick W. Beasley became rector in August, 1834, and so remained until his death, on Dec. 28, 1878.

During Dr. Beasley's prolonged rectorship a fine new church was erected, and consecrated May 29, 1864. A handsome new rectory was built and donated to the parish by Alexander Brown, Esq., and the parish had at the time of his death the old rectory and Christ Chapel at Eddington (Oak Grove), and a chapel and parish building at Andalusia. All of these, except All Saints' Church and rectory, are beyond the city limits, and lie in Bucks County. Christ Chapel is just about being erected into an independent parish. The Rev. John T. Magrath was rector of All Saints' Church in 1880–81. The present rector, the Rev. Frederick J. Bassett, entered upon his duties Nov. 19, 1882. The church wardens are Charles R. King, M.D., and Alexander Brown.

St. James' Church[1] (admitted 1810).—As the city extended westward, to accommodate members of Christ Church and St. Peter's Church living at a distance, a new church was erected as one of the United Churches. A lot was purchased from Mary Muhlenberg, on the east side of Seventh Street, above Market Street, and the corner-stone of St. James' Church was laid on June 23, 1827, by Bishop White, and it was consecrated by him May 1, 1810. Bishop White continued to be rector of this new church, as well as of Christ Church and St. Peter's Church, until his death. St. James' Church, however, became a separate parish in 1828. The present rector, the Rev. Henry J. Morton, D.D., became connected with St. James' Church as assistant to Bishop White in 1830, and upon the bishop's death (in 1836) became rector of the parish.

The old church was sold and torn down, and the present splendid and costly buildings erected at the northwest corner of Walnut and Twenty-second Streets in 1870. The new site cost fifty-five thousand dollars, and the value of the buildings and ground is about two hundred and fifty thousand dollars, which is free from any debt. The buildings consist of a church and chapel. The venerable rector, who is still active in his duties as pastor of this flourishing parish, has been connected with it for over half a century. The expenditures in 1883 for parish and other purposes were $31,839.08. Church wardens, Richard M. Cadwalader and Joseph M. Wilson.

St. John's Church, Northern Liberties (admitted 1816).—On June 16, 1764, a lot of ground on the south side of Brown Street, above Second Street, one hundred feet wide by two hundred feet deep, was deeded by various parties to Rev. Jacob Duché, John Coats, and others, and to their survivors in trust, with intent that a church should be built thereon. In 1811 the surviving trustees granted this lot to the United Churches, and in 1816 St. John's Church was erected. It is a large, substantial brick edifice. The Rev. George Boyd was rector from 1815 until his death, in 1851. Dr. Boyd, the esteemed rector of this parish for the first thirty-six years of its existence, was one of the earliest advocates of the free church system, and in St. John's Church endeavored with varying success to develop the system of supporting the church by the offerings. After his death the church was much weakened, and for a while services were held by a candidate for orders. Under the rectorship of the Rev. Charles Logan (1865–1874) it revived. The present rector, the Rev. George A. Latimer, has been in charge since Oct. 12, 1877. The church is free from debt, and has a parsonage. In 1883 it reported one hundred and twenty communicants, and $1887.88 as total receipts and expenditures.

St. Luke's Church, Germantown (admitted 1818).—Prior to 1811 the church people living in Germantown were attendants at either Trinity Church, Oxford, or All Saints' Church, Lower Dublin. A congregation was organized, under the name of St. Luke's Church, and the first service held on June 9, 1811, in the German Reformed Church. Thomas Armat presented a lot on Main Street, afterward enlarged by purchase, and the corner-stone of a church was laid on March 30, 1818, and the building consecrated on Aug. 27, 1818. Among the earlier clergy were the Revs. Jackson Kemper, Jehu C. Clay, and

[1] The following parishes are noticed in the order of their admission into union with the Convention of the diocese.

Charles M. Dupuy. The Rev. John Rodney became rector in August, 1825. In 1868 he became rector emeritus, which position he still holds. No other clergyman in the diocese has been so long connected with one parish. Rev. B. Wistar Morris (now Bishop of Oregon) was first an assistant and then rector of the parish, 1868. Rev. Albra Hadleigh was rector from April 11, 1869, until his death. He was succeeded by the Rev. William H. Vibbert. The present rector, the Rev. Samuel Upjohn, began his ministry in November, 1883.

A fine parish building was erected in 1867, and a new church, erected on the site of the old one at a cost of seventy thousand dollars, was consecrated June 8, 1876. The parish is a strong and prosperous one, reporting, in 1883, five hundred and ten communicants, and the value of the church property at one hundred and fifty thousand dollars. Annual expenditures for all purposes, $15,264.15.

Trinity Church, Southwark (admitted 1821).—The corner-stone of Trinity Church, Southwark, on the south side of Catharine Street above Second, was laid by Bishop White, April 25, 1821, and the church, a plain, substantial brick edifice, was consecrated by him Jan. 17, 1822. The first rector was the Rev. Manning B. Roche. Among the clergy who have held the rectorship were Rev. William Cooper Mead, D.D., the Rev. Levi S. Ives (afterward Bishop of North Carolina, and who was consecrated in this church on Sept. 22, 1831), and the Rev. John Coleman, D.D., who held the rectorship about twenty years. Dr. Coleman's ministry was for some years unusually popular, and the classes for confirmation unprecedentedly large, and during his rectorship the church was enlarged and the present front added. The later rectors have been the Rev. Thomas M. Martin, Rev. Daniel Washburn, Rev. Jesse Y. Burk (now secretary of the trustees of the University of Pennsylvania, and during whose rectorship the parsonage was purchased), Rev. F. Mansfield, and the present rector, the Rev. A. D. Heffern, who entered upon the charge on Easter-day, 1882. The parish is free from debt, has a rectory, a cemetery, several small special endowments for parochial uses, and one hundred and sixty-six communicants. The annual expenditures for 1883 were $4023.86.

St. Stephen's Church (admitted in 1823).—This church, on Tenth Street above Chestnut, was organized in 1822. A building, which had been used by St. Thomas' Methodist congregation, was purchased, and altered after plans by William Strickland, who designed its Gothic front. Joseph R. Ingersoll, Edward Shippen Burd, Sheldon Potter, and others took an active interest in the undertaking. The corner-stone was laid May 30, 1822. A portion of the old church was used, but it was substantially a new structure. The Rev. Dr. James Montgomery became rector, and continued in charge until his death, in 1833. The Rev. Henry W. Ducachet, D.D., talented, cheerful, and active, held the rectorship from 1834 until his death. The Rev. William Rudder, D.D., for some time Dr. Ducachet's assistant, succeeded him in the rectorship (1864–80). The present rector is the Rev. S. D. McConnell. The interior of this church is richly decorated, and it contains some memorial statuary of Mr. Burd's children, and the tomb of E. S. Burd, a munificent benefactor of the parish.

St. Stephen's Church is the trustee of the Burd Orphan Asylum for Children, a richly-endowed and well-conducted charity, and has for some years maintained, wholly or in part, the church mission service for deaf mutes. The Rev. G. J. Burton, warden of the asylum, and the Rev. H. W. Syle, in charge of All Souls' Deaf Mute Mission, are assistant clergy in this parish. In 1883 St. Stephen's Church reported six hundred communicants; total expenditures, $40,700.53; value of church property, $850,000.

St. Andrew's Church (admitted 1823).—This church, located on the west side of Eighth Street above Spruce, was organized in May, 1822. The first services were held in the Masonic Hall, and the Rev. Gregory Thurston Bedell was the first rector. The corner-stone of the present edifice was laid on Sept. 9, 1822, and the church was completed and consecrated by Bishop White on May 31, 1823. It is a large, substantial, and convenient building. The front is "one of the most perfect specimens of the Grecian Ionic order, taken from the temple of Bacchus, at Teos." Dr. Bedell died Aug. 30, 1834. The following clergy have been rectors: Rev. John A. Clark, D.D., Sept. 23, 1835, to February, 1843; Rev. Thomas March Clark, D.D., now Bishop of Rhode Island, Nov. 1, 1843, to May 1, 1847; Rev. William Bacon Stevens, D.D., now Bishop of Pennsylvania, Aug. 1, 1848, to Feb. 1, 1862. He was consecrated assistant bishop of Pennsylvania in St. Andrew's Church on Jan. 2, 1862. The present rector, the Rev. Wilbur Fisk Paddock, D.D., entered upon the charge June 3, 1862.

The parish is prosperous. It has sent out many members who have founded other parishes, and an unusually large number of those who became clergymen have been connected with it. The interior of the church has recently been much improved. In 1883 it reported five hundred and fifty-three communicants, an endowment fund of about $50,000, raised in the past fifteen years. Annual expenditures, $11,-057.79; value of church property, $86,000.

St. Matthew's Church, Francisville (admitted 1825).—St. Matthew's Church, at the northeast corner of Girard Avenue and Eighteenth Street, had its origin in services begun in 1822, through the aid and efforts of the Female Protestant Episcopal Association of Penn township. Francisville was the name given to an irregular tract of land near the Ridge road and Coates Street. The corner-stone of St. Matthew's Church was laid in its bounds on Oct. 17, 1822. Bishop White says it was "at the distance of about a mile from the city of Philadelphia, to the

northwest." Among the rectors have been the following: Revs. Norman Nash, 1822; James Wiltbank, Jacob M. Douglass, George Emlen Hare, D.D., 1844–62. During Dr. Hare's rectorship the present church and school-house, handsome stone buildings, were erected at the new site. Also the Rev. D. Otis Kellogg, Rev. J. Houston Eccleston, D.D., and the present rector, the Rev. John P. Hubbard, who entered on the rectorship in December, 1880. In 1883 it reported having four hundred and nineteen communicants; annual expenditures, $6806.92.

Grace Church (admitted 1827).—In 1829 the Rev. Benjamin B. Smith (now the venerable presiding bishop of the Protestant Episcopal Church in the United States) was rector of Grace Church, and in his report says, "This small edifice, after repairs, and being prepared very commodiously and neatly for divine service, was consecrated by Bishop White, Nov. 30, 1828." This building appears to have been in Penn township. On April 24, 1833, the corner-stone of the present building, at the southeast corner of Twelfth and Cherry Streets, was laid, the Rev. S. C. Brinckle being rector at the time. The Rev. William Suddards, D.D., became rector of Grace Church, December, 1834, and at his resignation, in 1881, was made rector emeritus. He died Feb. 19, 1883. His tact and his great talent as a preacher made him, during his prolonged ministry, one of the most influential clergymen of the diocese. The Rev. J. W. Ashton was temporarily his assistant. The present rector, the Rev. Reese F. Alsop, D.D., took charge Oct. 16, 1881. Communicants, three hundred and forty-two; money expenditures and appropriations in 1883, $19,015.01.

St. Mary's Church, Hamiltonville, West Philadelphia (admitted 1827).—St. Mary's Church is on Locust Street, near Fortieth, in a part of the city once belonging to the Hamilton estate, and known as Hamiltonville. It was admitted in 1827, but services were held prior to that date. Various clergymen officiated in this suburban village church, among them (1834–35) the Rev. Robert Piggott, rector of All Souls' Church, in the city, who also officiated sometimes at Mantua, adjacent to Hamiltonville, north of Market Street. The present rector, the Rev. Thomas C. Yarnall, D.D., took charge in 1844. The parish has grown to be quite a strong one, and a few years ago a handsome and costly stone church was built on the site of the old church. The parish has a rectory and Sunday-school building. The Rev. Robert F. Innes became Dr. Yarnall's assistant Jan. 1, 1881. The parish reported, in 1883, three hundred and thirty-eight communicants; money expenditures and appropriations, $9888.77.

St. David's Church, Manayunk (admitted 1833).—St. David's Church originated in the suggestions of the Rev. Robert Davis. The Rev. Christain F. Crusé was the first pastor. The corner-stone of the church was laid Aug. 13, 1832, and the church was consecrated May 1, 1835. Among others, the Rev. Charles W. Quick and Rev. F. H. Bushnell have held the rectorship for considerable periods. The present rector is the Rev. Charles Logan. During his ministry the parish has erected a fine stone church, a beautiful parish and Sunday-school building, and also a mission chapel in the southern part of Manayunk. 1883,—communicants, three hundred and fourteen; money expenditures and appropriations, $8349.68. Church wardens, Orlando Crease and Richard Hey.

Church of the Epiphany (admitted 1834).—The Church of the Epiphany, at the northwest corner of Fifteenth and Chestnut Streets, occupies one of the most valuable and eligible sites in the city. The parish was formed at first, to a great extent, of members of the St. Paul's Church, who followed their pastor, the Rev. Stephen H. Tyng, D.D., in this effort to extend the church work in Philadelphia. The church was consecrated by Bishop White on Oct. 1, 1834. It immediately became, what it has always been, a large and influential congregation. Dr. Tyng held the rectorship until his removal to New York in 1845. The following have been among the rectors who succeeded him: Rev. Mr. Fowles, Rev. Dudley A. Tyng, Rev. Mr. Cracraft, Rev. Richard Newton, D.D., and the present rector, the Rév. George H. Kinsolving, who took charge Oct. 17, 1881. The parish has a mission chapel at Twenty-third and Cherry Streets. A Monday noon meeting of the city clergy has been held in the lecture-room of the Church of the Epiphany for many years. 1883,—communicants, six hundred and thirteen; money expenditures and appropriations, $27,938.32; value of church property, $300,000.

Church of the Ascension (admitted 1837).—The Church of the Ascension, on the south side of Lombard Street, above Eleventh, was consecrated Sept. 27, 1836. The Rev. John B. Clemson, D.D. (still living in the diocese), was its first rector, taking charge in the fall of 1835. The prospects of this new church were very bright for a while, but the erection of St. Luke's large church near by, and the vicinity of the Church of the Ascension becoming the place of residence of many colored persons affected it, and it has nearly always been a rather weak and struggling parish. For some years it was maintained by St. Luke's Church as a chapel, but is now an independent parish again. Among the numerous clergy who have had it in charge were the Rev. Frederick Ogilby, Rev. Samuel Cox, Rev. John A. Childs, D.D., and Rev. (now bishop) William H. Hare. Bishop Potter often attended the services when he wished only to worship, not officiate. The present rector, the Rev. G. Woolsey Hodge, took charge December, 1880. It is conducted now on the free church system, and has a surpliced choir.

Emmanuel Church, Kensington (admitted 1837).—Emmanuel Church, on Marlborough Street above Girard Avenue, was erected through the efforts of

the Rev. Christian Wiltberger, the first pastor, and consecrated June 7, 1838. The Rev. J. Gordon Maxwell succeeded him, entering on the rectorship while a deacon, and remaining until his death. During his prolonged ministry the church edifice was improved, and the congregation increased greatly in numbers. It has always been a useful and prosperous parish. The present rector is the Rev. N. L. Briggs. 1883,—communicants, three hundred; money expenditures, $3680.06.

All Saints' Church, Moyamensing (admitted 1838).—This parish seems to have been one of the results of several distinct efforts, made at about the same time, to extend the church in the southern part of the city. One mission was called All Saints', another St. Mark's, a third All Souls', and still another the Evangelist's. In the end the two parishes of All Saints' and the Evangelist were established, and the others given up. Some of the All Souls' congregation joined the Church of the Ascension. All Saints' Church is on Twelfth Street below Fitzwater, and is a fine stone church, with good Sunday-school accommodations. The parish owns a parsonage. The Rev. Thomas H. Quinan, Rev. Henry E. Montgomery, Rev. John P. Lundy, D.D., Rev. Thomas K. Conrad, D.D., and Rev. George Bringhurst have been among its rectors. The present rector is the Rev. H. L. Duhring. 1883,—communicants, four hundred and fifty; money expenditures, $8153.10.

St. Luke's Church (admitted 1839).—The corner-stone of St. Luke's Church, one of the largest churches in the city, on Thirteenth Street above Pine, was laid by Bishop Onderdonk, on May 24, 1839, and the church was opened Oct. 18, 1840. The means for erecting it were advanced by seventeen gentlemen belonging to seven of the city churches, and were in part refunded by the sale of the pews, sixty-seven of which were at once sold for thirty-five thousand dollars. The church, with ground, organ, and furniture, cost fifty-eight thousand dollars. The Rev. W. W. Spear was the first rector. On his resignation in 1846 he was succeeded by the Rev. M. A. DeWolfe Howe, D.D., who remained until his consecration as Bishop of Central Pennsylvania, which took place in St. Luke's Church, Dec. 28, 1871. He was followed by the present rector, the Rev. C. George Currie, D.D. A few years ago a fine chapel and parish building was erected adjoining the church, and the interior of the church much improved. It has a rectory and a Home for Aged Women. 1883,—communicants, six hundred and fifty; expenditures and appropriations, about $20,000; value of church property, $175,000. Church wardens, George L. Harrison and Andrew Wheeler.

St. Philip's Church, Spring Garden (admitted 1841).—This church, now located on the north side of Spring Garden Street below Broad, was originally located on the north side of Vine Street below Eighth. The church was consecrated on Oct. 1, 1841, and regular services began in it on the following Sunday. The Rev. Edmund Neville, 1841–49, was the first rector. The following have been among the rectors: Rev. Charles D. Cooper, 1849–68; Rev. Dr. Pratt, Rev. Percy Browne, and Rev. W. F. Chesley Morsell, 1879–82. During Mr. Cooper's pastorate the confirmation classes were very large, and many members of the Friends joined his church. During Mr. Morsell's pastorate the church at Eighth and Vine Streets and a chapel on Ninth Street were sold, the old church being devoted to business purposes by the purchasers, and the congregation, still retaining the name of St. Philip's Church, removed and took possession of the present building, then called the Church of the Advocate, which was heavily incumbered with debt. The two congregations were merged into one, and the debt on this property somewhat reduced. This building was first known as the Church of the Intercessor, Rev. R. A. Carden, rector, 1859; then as the Bishop's Church, Rev. J. W. Bonham and Rev. E. Owen Simpson, rectors; then as the Church of the Advocate, Rev. John W. Claxton, D.D., rector; and now as St. Philip's Church. It is at present without a rector.

Church of the Advent (admitted 1842).—The Rev. John J. Kerr was the first rector (1841 to 1848). The congregation began worshiping in the Commissioners' Hall, Northern Liberties, and organized there on Nov. 27, 1840. Afterward they rented and used Temperance Hall, nearly opposite. The corner-stone of the present church at York Avenue and Buttonwood Street was laid May 13, 1844, and the church consecrated by Bishop Alfred Lee, on June 28, 1845. The Rev. Samuel A. Clark, Rev. Phillips Brooks, and Rev. John W. Claxton have been among its rectors. The present rector is the Rev. James F. Powers. The church is quite prosperous. In 1883 it reports communicants, three hundred and sixty; expenditures and appropriations, $8967.61. It has no debt, and has begun an endowment fund which already amounts to about five thousand dollars.

Church of the Evangelists (admitted 1842).—The services of the Mission Church of the Evangelists began March 12, 1837. The Rev. N. Sayres Harris, first rector, took charge June 1, 1837. Services were held in a rented building until a small church on Fifth Street, above Catharine, was purchased, altered, and consecrated April 14, 1839. The Revs. Quinan, Woodward, and Huckel followed as rectors. The Rev. Samuel Durborow was rector from April 1, 1855, until May 1, 1870, when he resigned to become superintendent of the Philadelphia Protestant Episcopal City Mission. During his rectorship the old church was sold, the corner-stone of the present edifice, a fine, large brick church, with spire, on Catharine Street above Seventh, was laid May 1, 1856, and the building completed in the following year. It was consecrated by Bishop Potter on Dec. 18, 1864, it being the last church consecrated by him in this diocese. During Mr. Durborow's pastorate the congregation

was quite a large one. The Rev. Jacob Miller and the Rev. Thomas L. Franklin, D.D., followed as rectors. The present rector, the Rev. R. Percival, took charge Sept. 12, 1880. A considerable debt had accumulated on the church, after its consecration, prior to his ministry. He has introduced daily services and a surpliced choir. Number of communicants reported in 1883, two hundred and thirty.

Emmanuel Church, Holmesburg (admitted 1844).—Services, in a chapel at Holmesburg, were held by Rev. Dr. Beasley, rector of All Saints' Church, Lower Dublin, of whose parish it formed a part, until Jan. 1, 1844, when Emmanuel Church, Holmesburg, was set off as a separate parish, and the Rev. William H. Bourns became its rector. The Rev. George G. Field and Rev. John P. Lundy, D.D., have been among its rectors. The present rector, the Rev. D. C. Millett, D.D., took charge in September, 1864. The parish has become a very prosperous one, and is admirably supplied with a fine church, a beautiful parish building built in 1879, a rectory, and a cemetery. The chapel, built at Tacony, was under its care for some years after its erection, but is now an independent parish. 1883,—communicants, one hundred and thirty-nine; expenditures, $3492.31. Church wardens, Andreas Hartel and Joseph H. Brown.

CHURCH OF ST. JAMES THE LESS.

Church of the Nativity, Spring Garden (admitted 1845).—The Church of the Nativity, at the northwest corner of Mount Vernon and Eleventh Streets, was consecrated by Bishop Potter on Sept. 24, 1846. The Rev. N. Sayres Harris, the first rector, took charge Aug. 1, 1845. The Rev. Robert C. Matlack, D.D., was for many years rector, and was followed by Revs. William Newton and W. H. Lewis. The present rector is the Rev. William M. Jefferis, who took charge Dec. 3, 1882. 1883,—communicants, two hundred and four; the money expenditures were $4610.76. Church wardens, Charles H. Brightley and John E. Baird.

Church of St. James the Less, Falls of Schuylkill (admitted 1846).—This is a beautiful little Gothic edifice. It has a rectory, parish building, and a large burial-ground. The first rector was the Rev. David H. Macurdy, who took charge Aug. 6, 1846. The church was erected in 1847. Among its rectors have been the Revs. Christopher B. Wyatt, J. P. Hammond, and E. Shippen Watson. The present rector, the Rev. Robert Ritchie, took charge in 1870. Church wardens, George Blight and Ellis Yarnall.

Church of the Redemption, Spring Garden (admitted 1846).—The first services were held on March 30, 1845, the sermon being preached by the Rev. Dr. Ducachet. The corner-stone of the present church, at the northwest corner of Twenty-second and Callowhill Streets, was laid March 6, 1846, and the church completed soon after. It has since been enlarged and improved. The mission was placed in charge of the Rev. George A. Durborow, then a candidate for holy orders, and after his ordination he was its faithful and devoted rector until his death, April 27, 1869. He was followed by the Rev. J. P.

Digitized by Google

Du Hamel, D.D. The present rector is the Rev. Thomas R. List, who took charge about eight years ago. The parish has a rectory. 1883,—communicants, two hundred and sixty; expenditures, $4623.35. Church wardens, Alexander Crow and Thomas Buchanan.

St. Mark's Church, Frankford (admitted 1846).—St. Mark's Church, a fine building, enlarged and improved since its erection, was built in 1846, and consecrated on October 22d of that year. The first rector was the Rev. Henry S. Spackman. The Rev. Daniel S. Miller, D.D., was rector of St. Mark's Church for twenty-eight years (1853–81), and during this period the parish was distinguished for its thorough organization and the vast amount of lay work performed by William Welsh, Esq., and others. John Clayton was an efficient member of the parish and rector's warden for twenty-five years. The present rector, the Rev. Robert C. Booth, was Dr. Miller's assistant for a year or two, and on his resignation was elected to the rectorship May 1, 1881. 1883,—communicants, eleven hundred and twelve; expenditures and appropriations, $10,702.57. Church wardens, Harvey Rowland, Jr., and Benjamin Rowland. The Rev. Samuel Tweedale (deacon) has for many years been assistant minister in the parish.

Church of the Crucifixion, Moyamensing (admitted 1847).—This church was begun as a church mission to the poor, especially colored people, living in the most degraded part of the city,—Bedford and Baker Streets. Rev. Edward C. Jones and Rev. O. E. Shannon were the earlier missionaries. A church was built about 1851 on Eighth Street near Shippen. Rev. George Bringhurst was missionary for a number of years. During his rectorship white people attended largely, but few colored, and when he became rector of All Saints' Church, he took the whites along with him. The Rev. Joseph R. Moore for about ten years did an excellent work among the colored poor, and founded the Home for the Homeless. The present rector, Rev. Henry L. Phillips (colored), is doing his work with great fidelity. To give better accommodations, a new church and mission building will be erected on Bainbridge Street above Eighth, at a cost of about twenty-five thousand dollars. The corner-stone was laid by Bishop Stevens on Oct. 22, 1883, and the buildings are now being erected.

Church of the Messiah, Port Richmond (admitted 1847).—The corner-stone of the Church of the Messiah, at the corner of East Huntingdon and Edgemont Streets, Port Richmond, was laid on June 28, 1847, and the church, a neat stone edifice, seating about four hundred persons, was opened on Easter Day, 1848. The first rector was the Rev. Samuel Hazlehurst. When the enterprise was first undertaken, it was supposed that the vicinity would in a short time be occupied by gentlemen's private residences, but the erection of chemical works and factories near by led this class to locate elsewhere. Though the parish has a good church building and a comfortable parsonage, it has never acquired much strength. Rev. Reese C. Evans, Rev. Jacob Miller, and Rev. L. N. Voight have been among its rectors. Rev. E. D. Widdemer, the present rector, took charge April 24, 1883.

Church of the Atonement (admitted 1847).—The first services were held in the fall of 1847, in the Wills Hospital, until the completion and opening of the present church, at Seventeenth and Summer Streets, on the first Sunday in Advent, 1847. The first rector was the Rev. Kingston Goddard, D.D. The present rector, Rev. Benjamin Watson, D.D., entered upon his duties in 1859. Recently the interior of the church has been altered and improved. 1883,—communicants, three hundred and eleven; expenditures, $7113.83. Church wardens, William C. Houston and William Hill.

St. Mark's Church (admitted 1848).—St. Mark's Church, on Locust Street, west of Sixteenth, is in some respects the finest church building in the city. It is of brown stone, with a stone spire, and has a fine school building. The corner-stone was laid April 25, 1848, and the church finished and consecrated on May 21, 1849. The Rev. J. P. B. Wilmer, D.D., afterward Bishop of Louisiana, was the first rector. The Rev. Walter Mitchell, Rev. E. A. Washburne, D.D., and Rev. E. A. Hoffman, D.D. (now dean of the General Theological Seminary), followed as rectors. The present rector, the Rev. Isaac L. Nicholson, D.D., entered on his duties in 1880. The parish is a strong and active one. It has a rectory, and also a building used by St. Mark's Workingmen's Club. The daily prayers have been said in the church since its erection, and it has now a surpliced choir, and numerous celebrations. 1883,—communicants, nine hundred and ten; expenditures, $34,030.60; value of church property, $280,000. Church wardens, Ernest Zantzinger and William B. Robins.

Church of the Mediator (admitted 1848).—The Rev. Samuel A. Clark, while a deacon, organized this mission congregation. The Rev. John A. Vaughan, D.D., took charge of the parish in January, 1848, and soon after the present church was built, at the northwest corner of Nineteenth and Lombard Streets. Rev. Dr. W. W. Spear was rector for several years. The present rector, the Rev. Samuel E. Appleton, D.D., took charge in 1860. The parish has been a very useful one, and steadily grown in strength and numbers. It has now a fine Sunday-school and parish building adjoining the church. 1883,—communicants, four hundred and forty; expenditures, $8714.04.

St. Jude's Church, Spring Garden (admitted 1848).—The Rev. Daniel S. Miller, D.D., immediately after his ordination, on Oct. 28, 1847, organized this congregation under the name of St. Jude's Church, and soon after the present church, on Franklin Street, above Brown, was built. It has within a

few years been enlarged, and has a parish building in the rear. The Rev. Edward Lounsbery was for some years rector. The present rector, the Rev. W. H. Graff, has been in charge about thirteen years. It is conducted on the free church system. 1883,—communicants, two hundred and ninety-two; expenditures, $5873.03.

Zion Church, Penn Township (admitted 1849).—This congregation was organized by the Rev. Jacob M. Douglass in the fall of 1848. Zion Church, at Eighth Street and Columbia Avenue, was built about 1857. The lot was donated by Benjamin W. Frazier. A parish building has been added to the church within the last few years. The present rector, the Rev. William R. Carroll, has been in charge nearly ten years. 1883,—communicants, one hundred and seventy-seven; expenditures, $3505.07.

Church of the Resurrection, Rising Sun (admitted 1850).—This congregation was organized, in 1849, by the Rev. Thomas J. Davis, who still remains connected with it as rector emeritus. The Church of the Resurrection, on North Broad Street, in the old village of Rising Sun, was built in 1853. The Rev. Joseph R. Moore, on Sept. 1, 1870, became rector of the newly-organized parish of St. George's Church, Kenderton, about a mile from the Church of the Resurrection, and on April 1, 1871, the two parishes were united under the Rev. Mr. Moore, Rev. Mr. Davis becoming rector emeritus. The church work has been greatly developed, and the parish is quite flourishing. 1883,—communicants, one hundred and ninety-six; expenditures, $3097.20.

St. Andrew's Church, West Philadelphia (admitted 1852).—A building named St. Mark's Church was erected in 1819, at the corner of Thirty-sixth and Sycamore Streets, in what was then termed the village of Mantua. The Rev. James Montgomery, afterward rector of St. Stephen's Church, was the rector for a short time. After his resignation the building was unused, was sold by the sheriff, and finally burned by incendiaries. The Rev. George W. Natt, whom many still living remember with affection for his many virtues, in 1851 organized St. Andrew's Parish, bought the lot with the ruined walls of St. Mark's still standing on it, and built a church and rectory. The Rev. Samuel E. Smith became rector in 1863, and in 1865 the property was sold, and a new church erected on the present site, Thirty-sixth and Baring Streets. This neighborhood was rapidly filling up with fine residences, and the parish has grown steadily. At present the erection of a new and still larger church has been begun. Rev. Dr. R. Bethell Claxton was rector until his death in May, 1882. The present rector is the Rev. Charles W. Duane, who took charge in 1882. 1883,—communicants, three hundred and twenty-five; receipts, $11,707.36.

Church of the Saviour, West Philadelphia (admitted 1852).—The Rev. Heman Leyer, D.D., had charge of this congregation in its earlier stages, about 1853. In 1855 the Rev. Henry W. Woods became its rector, and the present Church of the Saviour, a handsome brown-stone building, was built on Thirty-eighth Street, above Chestnut, in 1856. The Rev. Henry A. Wise, Jr., was rector prior to 1861. Rev. J. Houston Eccleston, D.D., was rector for a number of years, and the present rector, the Rev. W. H. Meade, D.D., took charge in April, 1883.

Christ Church, Germantown (admitted 1853).—The Rev. Addison B. Atkins, D.D., was the first rector of this parish, and took charge in July, 1854. A fine church was soon after completed. Eight or ten years ago, by a terrific tornado, this church was greatly damaged. The present costly and beautiful church and school building were then erected. The Rev. John B. Falkner, D.D., is rector. 1883,—communicants, two hundred and thirty; expenditures, $11,627.78. During the year a new tower was added to the church.

Trinity Church, Maylandville, West Philadelphia (admitted 1853).—The Rev. H. W. Woods had charge of the earlier services of Trinity Church, Maylandville, conjointly with the rectorship of the Church of the Saviour, West Philadelphia, and in after-years it was for some time supported by the latter parish. The present rector, Rev. Richard N. Thomas, has been in charge for about three years. A new and larger church was erected at Forty-second Street and Baltimore Avenue, and opened for services on March 11, 1882. Church wardens, William A. Sloan and Allen Childs.

St. Clement's Church (admitted 1855).—This church, at Twentieth and Cherry Streets, was erected in 1858–59, the Rev. Henry S. Spackman, D.D., being its first rector. It is a very beautiful stone edifice, and has a splendid parish building in the rear. The church tower was deemed unsafe and was taken down. The Revs. H. G. Batterson, D.D., W. H. N. Stewart, D.D., Theodore M. Riley, and O. S. Prescott, D.D., have been among the rectors. St. Clement's Church has the most "advanced ritual" of any parish in the city, and there has been considerable litigation in the civil courts and debate in the ecclesiastical tribunals in efforts to direct or control it. At present, after a pledge by the rector to give up certain ceremonies at the bishop's request, all its diocesan relations are harmonious. The Rev. B. W. Maturin is rector, and has several assistants. Some of its clergy are connected with one of the English orders (St. John's, Cowley, we believe). It has a clergy-house and is about introducing a sisterhood. The services are largely attended. 1883,—communicants, six hundred and fifteen; expenditures, $15,673.98. Church wardens, Henry Flanders and B. F. Holl.

St. Paul's Church, Chestnut Hill (admitted 1856).—This parish was organized in June, 1855, and a beautiful Gothic church was erected in 1856. The Rev. Alexander Shiras, D.D., was the first rector.

The Rev. William Hobart Hare, now Bishop of Southern Dakota, was rector for several years. The present rector, the Rev. John Andrews Harris, D.D., has been connected with the parish since 1864. It is exceedingly prosperous. 1883,—communicants, one hundred and thirty-seven; expenditures, $11,108.20. Church wardens, Edward S. Buckley and Richard C. McMurtrie.

Church of the Holy Trinity (admitted 1857).—This church, at Nineteenth and Walnut Streets, is in many respects the most prominent and influential parish in Philadelphia. Erected just when the western part of Walnut, Spruce, and neighboring streets began to be built up with fine residences, it has always had a large congregation, comprising many of the most prominent laity in the city. The church, which has a fine parish building connected with it, was built in 1858, and in 1883 received some considerable improvements. A fine chime of bells was recently placed in the tower, being a gift from Mr. Joseph E. Temple. The first rector was the Rev. Alexander H. Vinton, D.D. He was succeeded by the Rev. Phillips Brooks, D.D., and the Rev. Thomas A. Jaggar, D.D., now Bishop of Southern Ohio, who was consecrated in this church on April 28, 1875. The present rector, the Rev. W. Neilson McVickar, D.D., took charge in 1875. Holy Trinity Memorial Chapel, noticed below, is connected with this parish. 1883, —communicants, nine hundred and twenty-five; contributions, $61,728.33; value of church property, $400,000. Church wardens, Alexander Brown and Lemuel Coffin.

HOLY TRINITY MEMORIAL CHAPEL.—A plain church, built about 1859, and known as Cranmer Chapel, located near the Church of the Holy Trinity, unable to be self-sustaining, was taken by the parish and renamed Trinity Chapel. About ten years ago, to give enlarged accommodations, the chapel was sold, to be used as a public school, and with the proceeds enlarged by generous donations, and one special gift of fifty thousand dollars from Mrs. Wilstach as a memorial of a deceased daughter, the present beautiful church and parish building, at Twenty-second and Spruce Streets, were erected. The school building is a memorial to John Bohlen, Esq., long an active and generous member of the parish. This work has been under the care of the following assistant ministers: Rev. H. L. Duhring, Rev. R. N. Thomas, Rev. R. A. Edwards, and Rev. George F. Bugbee, who is the present minister in charge (1883). The Memorial Chapel reports,—communicants, four hundred and twenty-five; receipts, $4170.59.

Calvary (Monumental) Church, West Philadelphia (admitted 1857).—Calvary Church was erected as a memorial of Bishop White, chiefly by the efforts of the Ladies' Missionary Association of Christ Church, which collected funds for the building, and for some years supported the missionary. The cornerstone was laid on April 4, 1851, and the church and a Sunday-school building erected soon after. The first rector was the Rev. Joseph H. Smith. Revs. A. Christman, Charles R. Bonnell, and Francis J. Clere, D.D., have been among the rectors. The location at Front and Margaretta Streets becoming unsuitable, the ground was sold, the last service held on April 23, 1882, and the building, a beautifully proportioned stone chapel, taken down and re-erected in its original form, on a lot which had been purchased on Forty-first Street, above Oregon, West Philadelphia. The Rev. Thomas P. Hutchinson has had charge of Calvary Church for some years. 1883,—communicants, forty-nine. Church wardens, William P. Troth, Jr., and George B. Bonnell.

Church of the Covenant (admitted 1858).—This church was organized by the Rev. Dudley A. Tyng, after his resignation of the Church of the Epiphany, and for several years popular services were held in Concert Hall, on Chestnut Street. After Mr. Tyng's sudden death the Rev. B. T. Noakes became rector, and the corner-stone of the present Church of the Covenant, on Filbert Street, above Seventeenth, was laid on April 22, 1861, and the building was soon after completed. The Rev. Charles E. Murray was rector for a number of years, but about two years ago, upon the completion of the Pennsylvania Railroad (elevated road) in front of the church, it was feared that the church would have to be abandoned and he resigned. Soon after the Rev. Dr. Richard Newton took charge of the services as rector, and the Rev. Dr. Daniel S. Miller voluntarily became his assistant. The services are largely attended. 1883,—communicants, three hundred and fifty; expenditures, $6804.16.

Church of St. John the Baptist, Germantown (admitted 1858).—The Rev. William N. Diehl was the first rector of the Church of St. John the Baptist, erected on Germantown Avenue, near Mehl Street, and this amiable and esteemed clergyman held the charge until his death. The present rector, the Rev. Charles H. Hibbard, took charge Dec. 1, 1882.

Calvary Church, Germantown (admitted 1859).—Calvary Church, at Manheim and Pulaski Avenue, was erected in 1859–60. The Rev. Thomas K. Conrad, D.D., was the first rector. The present rector, the Rev. J. De Wolfe Perry, has been in charge since 1864. It has a fine school building and a rectory. 1883,—communicants, one hundred and forty; expenditures, $7373.88.

Church of St. Matthias, Spring Garden (admitted 1859).—This parish was organized in 1856. First services held in a hall. A large lot, on which the present stately church stands, at the corner of Nineteenth and Wallace Streets, being a portion of the land occupied by the City Hospital, was purchased, and a chapel built in 1859. Rev. R. A. Carden, Rev. R. G. Chase, and Rev. R. F. Chase were rectors. In 1870 the Rev. Richard N. Thomas became rector, the church was built, and the parish became so strong that in some respects it stood fifth in im-

portance among the city churches. The Rev. Robert A. Edwards, the present rector, took charge Jan. 1, 1879. 1883,—communicants, four hundred and fifty; receipts, $16,363.79.

Church of the Incarnation (admitted 1860).—A congregation named the Church of the Holy Apostles was organized in January, 1856. The Rev. B. Franklin was the first minister, and a large lot at the corner of Broad and Jefferson Streets was taken up, and a chapel built. It became involved, and in 1860 was reorganized under the name of the Church of the Incarnation, the present rector, the Rev. Joseph D. Newlin, then assistant in St. Mark's Church, becoming rector of the new parish. The present church, a beautiful and costly building, was built some years after. The parish is strong and flourishing. 1883,—communicants, four hundred and fifty; receipts, $18,909.68.

Church of St. John the Evangelist (admitted 1860).—A mission, called the Boone Street Mission, was begun by the Rev. George A. Latimer in about 1855. In June, 1859, the Rev. Washington B. Erben, upon his ordination, took charge of the congregation then worshiping in the old Shiffler Hose Hall, organized the parish of St. John the Evangelist's Church, and built a small chapel on Reed Street above Second. The Rev. Charles L. Fischer became rector, and the present church at Third and Reed Streets was built. Rev. W. F. B. Jackson and Rev. John G. Bawn were rectors. The present rector, Rev. J. Edgar Johnson, has had charge about six years. The church is at present largely assisted by George L. Harrison, Esq. 1883,—communicants, two hundred and eighty; receipts, $6561.95.

St. Michael's Church, Germantown (admitted 1860).—The Rev. J. Pinckney Hammond, in 1858, became rector of a newly-organized parish in Germantown, and the corner-stone of the Church of the Holy Cross was laid, addresses being made by Bishops Bowman and Doane. The erection of Calvary Church, in the same vicinity, led to the abandonment of the location, and Mr. Hammond organized St. Michael's Church. A beautiful little church was built on High Street, and opened on St. Michael's Day, 1859. It has always been conducted on the free church plan. The present rector, Rev. John K. Murphy, took charge in 1869. The parish has now a parsonage and a school building, and is quite successful. 1883,—communicants, two hundred and eight; offerings, $4432.34.

Church of St. Luke the Beloved Physician, Bustleton (admitted 1861).—The memorial Church of St. Luke the Beloved Physician was erected, and for some years largely supported, by Mrs. Pauline Henry, as a memorial to her husband, Dr. Bernard Henry. The corner-stone was laid Sept. 19, 1860. The first rector was the Rev. Leighton Coleman. The present rector is the Rev. Samuel F. Hotchkin. 1883,—communicants, eighty-one.

The House of Prayer, Branchtown (admitted 1861).—The House of Prayer was built about twenty years ago. The Rev. T. Gardiner Littell was its first rector. Present rector, Rev. George Bringhurst. 1883,—communicants, ninety.

St. Timothy's Church, Roxborough (admitted 1861).—This is one of the wealthiest and best-appointed parishes in the vicinity of Philadelphia. In connection with its parish work it has a very successful Workingmen's Club. The parish was organized at Advent, 1859. The Rev. John Leighton McKim was the first rector. Until the erection of the church, in 1862, the church services were held in an old building erected in 1746, once a tavern, but known in the neighborhood then as the old poorhouse. The present rector is the Rev. Robert E. Dennison. 1883,—communicants, three hundred and four; expenditures, $7506.74. Church wardens, J. Vaughan Merrick and William Penn Stroud.

St. Albans Church, Roxborough (admitted 1862).—The present rector of St. Albans Church is the Rev. J. J. Joyce Moore. 1883,—communicants, sixty-seven; expenditures, $1803.95.

Grace Church, Mount Airy (admitted 1862).—Grace Church is a neat edifice, and the parish has a parsonage. The Rev. Robert A. Edwards was rector for some years. The present rector, Rev. Simeon C. Hill, has been in charge about ten years. 1883,—communicants, one hundred and fourteen; expenditures, $3602.96. Church wardens, F. B. Gowen and C. M. Bayard.

Free Church of St. John, Frankford Road (admitted 1864).—The Rev. George Boyd, D.D., left a lot for church uses on Cemetery Avenue near Frankford road, and on it a very pretty little church was built about twenty years ago. Among the clergy who have had charge of it were the Rev. Dr. George P. Schetky, Rev. Charles R. Bonnell, Rev. Joseph A. Nock, and Rev. John G. Bawn. For some years the City Missions supplied it with clerical services. Present rector, Rev. H. A. F. Hoyt. 1883,—communicants, one hundred and fifteen; receipts, $1723.96.

St. James' Church, Hestonville (admitted 1867).—This is a neat stone church erected about 1868, at Fifty-second Street and Kershaw Avenue, West Philadelphia. The Rev. T. William Davidson is the present rector. 1883,—communicants, fifty-nine; receipts, $1147.73.

Church of the Holy Apostles (admitted 1868).—The present rector of the Church of the Holy Apostles, the Rev. Charles D. Cooper, on resigning the rectorship of St. Philip's Church, took charge of this new enterprise in the southwestern part of the city, and in 1870 a fine church was built at Twenty-first and Christian Streets, to which a large and beautiful Sunday-school building has since been added. The parish is quite a successful one. The Sunday-school, under the superintendence of George C. Thomas, is the largest in the city. 1883,—communicants, four hundred and ninety; Sunday-school scholars

and teachers, one thousand and twenty-eight; expenditures, $9455.09. Church wardens, George C. Thomas and Lewis H. Redner.

Church of the Good Shepherd (admitted 1869).—This is a small edifice on Cumberland Street east of Frankford Avenue, built about ten years ago. The Rev. A. A. Rickert was the first minister in charge. Rev. John A. Goodfellow is the present rector. 1883,—communicants, one hundred and forty-five; receipts, $5231.95.

St. Stephen's Church, Bridesburg (admitted 1869).—This church was built about 1870. St. Mark's Church, Frankford, previously maintained a mission service here, which developed into this church. William Welsh, Esq., took a generous interest in the movement. It has no rector at present. 1883,—communicants, ninety-eight.

Church of the Holy Innocents, Tacony (admitted 1869).—This pretty little chapel was at first a mission of Emmanuel Church, Holmesburg, which began the services in 1867. The corner-stone was laid Sept. 29, 1868.

Church of the Messiah (admitted 1870).—This church, at Broad and Federal Streets, grew out of a mission established by St. Andrew's Church, which built a small chapel for it on Thirteenth Street below Washington Avenue in 1861. The Rev. George Bringhurst took charge, organized the parish, a large lot at Broad and Federal Streets was taken on ground rent, and the present Church of the Messiah built in 1871, at a cost of seventeen thousand dollars. After Mr. Bringhurst's resignation, in 1875, the parish being heavily encumbered, the Rev. Mr. Durborow, of the City Mission, obtained a pledge from about twenty prominent laymen to pay the annual interest for five years, dividing the amount between them. Thus relieved, the Rev. F. H. Bushnell, who became rector in 1877, has nearly succeeded in clearing this valuable property of debt. 1883,—communicants, one hundred and ninety; receipts, $4376.70.

St. George's Church, Kenderton (admitted 1870).—The rector of the Church of the Resurrection, Rising Sun, Rev. Joseph R. Moore, is also rector of this chapel, and holds occasional services.

St. Paul's Church, Aramingo (admitted 1870).—This chapel, built recently as a memorial of William Welsh, on Kensington Avenue, near Bockius Street, was at first a mission of St. Mark's Church, Frankford. The Rev. Henry E. Cooke is at present its rector. 1883,—communicants, eighty-two; receipts, $3139.96.

St. George's Church, West Philadelphia (admitted 1870).—This is a small stone church, at Hazel Avenue, near Sixty-first Street, West Philadelphia, near the village of Cardington, built about ten years ago. The services held in it are at present under the charge of the Rev. G. J. Burton, warden of the neighboring Burd Orphan Asylum, who also holds the rectorship of this parish.

St. Timothy's Church (admitted 1871).—This church is on Reed Street, below Eighth. The building was erected in 1856, the Rev. William C. Cooley being the first rector. The parish was originally organized as the Church of our Saviour, but in 1870 it was reorganized, and the name changed to the Church of St. Timothy. The present rector is the Rev. Robert T. Roche, D.D. 1883,—communicants, seventy-five; receipts, $1561.28.

St. Sauveur's (French) Church (admitted 1872).—This congregation was begun in 1871, and for some years it was aided by the Philadelphia Protestant Episcopal City Mission. It now occupies a chapel in the French Academy building, Twenty-first Street, above Chestnut. It is thoroughly organized, and does a large missionary and parochial work in its special field. It has all the time been in charge of the Rev. C. F. B. Miel, formerly the Abbé Miel, a distinguished and eloquent priest of the Roman Catholic Church, and one of the preachers at the Madelaine, in Paris, who was canonically received into the ministry of the Protestant Episcopal Church by Bishop Stevens in June, 1871. 1883,—communicants, ninety; expenditures, $2745.70.

Church of the Annunciation (admitted 1872).—This parish at present occupies a temporary but rather pretty frame chapel at Norris and Camac Streets, erected in 1871 for the Church of Our Merciful Saviour. This parish was organized by the City Mission, the Rev. E. S. Widdemer and Rev. J. W. Ashton being rectors. A few years ago the present rector, the Rev. H. G. Batterson, D.D., took charge, and the name was changed to the Church of the Annunciation. There is now a surpliced choir and frequent services. The erection of a new church is contemplated. 1883,—communicants, two hundred and eighty; expenditures, $4337.89.

Church of the Beloved Disciple (admitted 1874).—The first efforts which resulted in the organization of this parish were made by the Rev. Dr. A. Louderback, the mission being called Holy Innocents. The name was changed to the Church of the Beloved Disciple, and the present building, on Columbia Avenue, above Twentieth Street, erected about ten years ago. Rev. John P. Du Hamel, D.D., is the present rector. 1883,—communicants, one hundred and ninety-two; receipts, $5189.64.

St. Peter's Church, Germantown (admitted 1874).—St. Peter's Church, corner of Wayne and Harvey Streets, was built by a congregation composed to a large extent of members of Christ Church, Germantown, who, with the Rev. Theodore S. Rumney, D.D., then rector of Christ Church, withdrew and formed St. Peter's parish. The buildings, comprising a church and school-house, are very fine, and the parish is thoroughly organized. Dr. Rumney is still the rector. 1883,—communicants, two hundred and sixty-six; expenditures, $13,106.14. Church wardens, Henry H. Houston and Edmund A. Crenshaw.

Church of the Holy Comforter, West Philadelphia (admitted 1875).—This church, at Forty-eighth Street and Haverford Avenue, is a neat stone building, and was erected about ten years ago. For several years it was aided by the Church of the Saviour, and the Rev. Joseph A. Stone was the first pastor. The Rev. H. Morton Reed, who recently resigned to accept another charge, was rector for some years, and during his ministry the church was improved and a school-house built. 1883,—communicants, two hundred and fifty-three; receipts, $3001.60.

Church of the Transfiguration (admitted 1875).—For several years prior to 1878 church services were held in a frame church which stood over the tunnel of the Pennsylvania Railroad, on the south side of Chestnut Street, at Thirty-second Street. In 1877 the Rev. Thomas K. Conrad, D.D., accepted the rectorship, and the present Church of the Transfiguration, at Woodland Avenue and Walnut Street, West Philadelphia, was built and opened in January, 1878. 1883,—communicants, ninety-eight; expenditures, $5281.91; value of church property, $26,000.

Church of St. Ambrose (admitted 1881).—This congregation has a small church on Twenty-eighth Street, above Girard Avenue. Rev. William M. Harrison is rector. 1883,—communicants, one hundred and thirty-three; expenditures, $1758.03.

Gloria Dei (*Old Swedes*) **Church** will be found at the beginning of this chapter, under the head of the Swedish Church. It was admitted into union with the Non-Parochial Churches Convention in 1845.

St. Barnabas Church, Haddington.—This church, on Sixty-fifth Street near Hamilton, West Philadelphia, is under the City Mission. It was built in 1872. The Rev. John G. Bawn has been in charge for some years. Recently it was freed from all debt, and a comfortable rectory built.

Christ Church, Franklinville.—This church, at Sixth and Venango Streets, was built about seven years ago by the City Mission. The services are in charge of the Rev. Thomas J. Taylor.

Church of the Redeemer (Seamen's Mission).—This mission has a fine church and a mission building at the corner of Front and Queen Streets. It is supported by the Churchmen's Missionary Association for Seamen. Rev. Benjamin H. Latrobe, missionary.

St. Chrysostom's Church.—This is a small chapel near Twenty-eighth Street and Susquehanna Avenue, recently built. The Rev. Charles S. Daniel is in charge.

All Souls' Mission for Deaf Mutes.—Regular church services are held in the sign language for an organized congregation of deaf mutes by the Rev. H. W. Syle, who is himself a deaf mute, in the parish building of St. Stephen's Church, Tenth Street above Chestnut.

St. Barnabas' Mission.—This mission has a very convenient church at Third and Dauphin Streets. It was built about six years ago, to provide additional church accommodations for many who had been attendants at the Episcopal Hospital Chapel. The Rev. Charles E. Betticher took charge in February, 1882. 1883,—communicants, two hundred and fifty-seven; receipts, $1941.20.

Capella Italiana Episcopale dell' Emmanuello.—An interesting and very promising mission for Italians now occupies a neat chapel on Christian Street above Tenth, which was formally dedicated by Bishop Stevens as the Italian Church of Emmanuel, on Dec. 20, 1883. The Rev. Michelé Zara, an amiable and talented priest in the Roman Catholic Church, was canonically received into the ministry of the Protestant Episcopal Church by Bishop Stevens on Nov. 27, 1882. He soon after began this mission, and the church for its use was recently purchased, and dedicated Dec. 20, 1883.

La Santisima Trinidad (Spanish Mission).—Señor Parmenio Anaya, licensed by the bishop as a lay-reader, has held church services in the Spanish language for about a year past in the Bible-House at Seventh and Walnut Streets. The congregation is made up largely of Cubans. The Rev. Mr. Anaya was ordained deacon by Bishop Stevens in December, 1883.

In addition to the services held in the foregoing churches and chapels, church services are also held in the chapel of the Episcopal Hospital, Front Street and Lehigh Avenue, where a large congregation attend the services; in the chapel of the Burd Orphan Asylum; in the chapel of Christ Church Hospital; in St. Peter's House, Front and Pine Streets; in the Church of the Epiphany Mission Chapel, Twenty-third and Cherry Streets; by the City Mission clergy in many of the public institutions; and a service for the Chinese is held in the lecture-room of the Church of the Epiphany by the Rev. E. W. Syle, D.D., for many years a missionary in China.

Protestant Episcopal Educational Institutions.—THE PHILADELPHIA DIVINITY SCHOOL. The Divinity School of the Protestant Episcopal Church in Philadelphia is the outgrowth of the Diocesan Training School for the education of young men for the ministry, established by Bishop Potter in 1857. The Training School was placed under the Rev. George Emlen Hare, D.D., and a few lectures were given by Bishop Potter himself. The students were taught in one of the rooms of the Episcopal Academy, and some fifteen or twenty young men received instruction in the Training School. In 1859 the Divinity School was organized, and incorporated in 1863, and the Training School absorbed into it. A large and convenient building at the northwest corner of Thirty-ninth and Walnut Streets, formerly the private residence of Mr. Thomas Allibone, was purchased, and used by the seminary for many years.

In 1881 this building was sold and a new, large and beautiful building was erected on the Darby road, near Fiftieth Street, where the institution had some

years before purchased about twenty acres of ground. The new Divinity School is conveniently arranged, and has provision for a resident professor, and rooms for about one hundred students. The building cost about seventy-five thousand dollars. A fine chapel will soon be erected, a donation sufficient for the purpose having been made. The formal opening of the new Divinity School building took place on Monday, Oct. 30, 1882, but it had been occupied for a short time previous to that date.

The faculty is composed of the Rev. Daniel R. Goodwin, D.D., LL.D., dean; Rev. George Emlen Hare, D.D., LL.D., professor of Biblical Learning; Rev. Clement M. Butler, D.D., professor of Ecclesiastical History; Rev. Matson Meier-Smith, D.D., professor of Homiletics, and other occasional and special instructors. The Rev. John A. Childs, D.D., is secretary. The Divinity School is not diocesan, but is a general church institution, governed by a board of overseers, of which Bishop Lee, of Delaware, is the president. It has endowments sufficient to sustain several professorships.

THE ACADEMY OF THE PROTESTANT EPISCOPAL CHURCH was organized in 1785. About that time proceedings were brought against the College of Philadelphia, which resulted in the forfeiture of its charter and the establishment of the University of Pennsylvania. In 1784 the vestry of Christ Church and St. Peter's, "being informed that many persons wished to see an academy instituted in connection with those churches, appointed a committee which, on October 27th, reported in favor of a subscription for that purpose.

The academy was organized on Jan. 1, 1785, by a meeting of persons who had subscribed certain sums, and was placed under the management of sixteen trustees. The Rev. John Andrews was chosen principal of the academy April 21, 1785. It was chartered May 29, 1787, by the name of the Trustees of the Academy of the Protestant Episcopal Church in the City of Philadelphia, and for its endowment ten thousand acres of land were granted by the State from lands not then taken up. This tract was subsequently located on the head-waters of Pine Creek. It afterward received bequests from Andrew Doz, the estate of John Keble, and others.

The academy was first opened, April 4, 1785, in a house on the east side of Fourth Street, below Market. A large building was erected on the south side of Chestnut Street, west of Seventh, and while this was still unfinished the academy was removed to it in 1788. It proved to be too expensive, and was sold in 1791. A house was then purchased at Third and Pear Streets for the use of the academy. Afterward, in 1824, the schools were kept in Locust Street above Ninth. There was a grammar school, which was strictly the academy, and also a free or charity school for boys, and another for girls, supported by subscriptions, which were for a time carried on in connection with the academy. These were given up when public schools became common. The academy languished until, in 1845, it was revived through the interest and efforts of Bishop Alonzo Potter. The Rev. George Emlen Hare, D.D., became head master of the academy in 1845, and in a few years, under his efficient administration, it reached the maximum number of pupils. In 1849, to provide the needed additional accommodations, the trustees undertook the erection of the present academy building, since enlarged, on the south side of Locust Street, below Broad.

In 1859 the present head master, the Rev. James W. Robins, D.D., succeeded Dr. Hare. Dr. Robins has thoroughly devoted himself to the institution, and it has been very successful. Including the department for small boys, it can provide tuition for about three hundred, and is usually filled. "Thousands of the sons of citizens of Philadelphia have been trained by its wholesome discipline and instruction, and many of these have risen to the highest offices in Church and State, as well as in business and civil life."

In 1882 the Society of the Alumni of the academy presented to it a memorial window to Bishop Potter. In 1883 the same association issued an appeal, and undertook to raise an endowment fund of fifty thousand dollars by 1885, in commemoration of its one hundredth anniversary, to be celebrated that year.

The Clergy Daughters' Fund.—This fund is made up of offerings to be devoted to support education of the daughters of church clergymen.

Fund for the Education of Sons of the Clergy.—The object of this diocesan fund is indicated in the title.

The Advancement Society.—The venerable English Society for the Propagation of the Gospel, to which the Church of England missions in America were so largely indebted for support during the colonial period, continued to make a few grants to missions in the United States after the Revolution, but finally discontinued them altogether. In 1812 the Society of the Protestant Episcopal Church for the Advancement of Christianity in Pennsylvania was formed. It is a close corporation, electing its members. The Advancement Society has done a noble work for the church by sending out and supporting missionaries in all parts of the State, and by aiding in the erection of churches, assisting candidates for orders, and making grants of Bibles and prayer-books for distribution. It is also by its charter empowered to "receive and hold in trust moneys, houses, lands, etc., given or bequeathed—strictly applying them in accordance with the wishes of the persons so giving or bequeathing—for any church purposes, . . . or for any other purpose promotive of the advancement of Christianity in Pennsylvania." It thus holds in trust a considerable part of the fund for the support of the episcopate in Pennsylvania and other trust funds.

The Bishop Potter Memorial House for Deacon-

esses.—This was founded in 1866, chiefly through the efforts of William Welsh, as a home for the education of Christian women as deaconesses, and in other church work. It occupies the old mansion in the Episcopal Hospital grounds. At present it is without a house mother.

The Seamen's Mission.—The Churchmen's Missionary Association for Seamen of the port of Philadelphia was founded in 1847. Mr. Joseph E. Hover and Mr. Isaac Welsh were among its earliest promoters. The Floating Church of the Redeemer was built and moored for four years in the Spruce Street Dock, which was rented from the city. The dock was then rented to parties for commercial purposes, and the Floating Church was sold to St. John's Church, Camden, who placed it on their lot in Camden, and worshiped in it for several years, until it was destroyed by fire on a Christmas morning. The Church of the Redeemer, at the northwest corner of Swanson and Catharine Streets, was built in 1857–59. It is now disused, and the ground is offered for sale. In 1878 the present Church of the Redeemer and the adjacent mission and school building, at the northwest corner of Front and Queen Streets, was built. The association maintains this church, and distributes reading matter among sailors. The missionaries have been the Rev. Richard S. Trapier, 1847–58; Rev. A. Christman, Rev. W. F. Davidson, Rev. R. F. Chase, and Rev. Washington B. Erben, 1864–78. During Mr. Erben's pastorate the resources of the mission were gradually increased, and a fund of over thirty thousand dollars was raised, sufficient to pay for the present site and erect the new buildings. The endowment fund, which amounts to about eight thousand dollars, was also somewhat enlarged. The present missionary, the Rev. B. H. Latrobe, took charge in 1878.

The Bishop White Prayer-Book Society.—This society was organized in 1833. It has published several editions of the Book of Common Prayer, and of the Hymnal, and has distributed them in large numbers throughout the whole land.

The Episcopal Female Prayer-Book Society.—This society was founded in 1834. It publishes and has widely distributed a large and well-printed octavo edition of the Book of Common Prayer.

The Episcopal Female Tract Society.—This society was organized in 1822. It has published about seven hundred different church tracts, which have been widely distributed.

The Church Temperance Society.—The Pennsylvania Diocesan Branch of the Church Temperance Society (an affiliation of a General Church Society) was organized on Sept. 21, 1881. The Rev. Henry S. Getz was for some time its agent. It is a movement to unite together the friends of temperance and the advocates of total abstinence in efforts to restrain persons from the abuse of alcoholic liquors. Pledges of "total abstinence," or "partially restrictive pledges," may be made by members. The success of similar efforts made by the Church of England has led to the introduction of this plan here. Within the last three years parochial temperance organizations have been formed in about thirty of the Philadelphia parishes.

The Protestant Episcopal Association for the Promotion of Christianity among the Jews.—This association was organized in 1857. The Rev. Louis C. Newman, a converted Israelite, was its missionary until his death, Nov. 22, 1880.

The Sunday-School Association of the Protestant Episcopal Church.—This voluntary and informal association of those engaged in church Sunday-school work in Philadelphia, for conference about the best methods of carrying out their work, began its meetings about fifteen years ago. They have proved to be very valuable, and are largely attended by teachers and superintendents. It has in various years held large public meetings of the scholars in the Academy of Music and other large buildings. Mr. George C. Thomas has been a prominent member of the association since its commencement. A Lenten Offering for missions is taken each year in the Sunday-schools during Lent, and for several years past about three thousand dollars has been raised in this way in Philadelphia each year. Mr. John Marston, Jr., first suggested this Lenten Offering to the Philadelphia church Sunday-schools, and it has recently been widely introduced in other dioceses.

The Bishop White Parish Library Association.—This association was organized in 1840. Its object is to provide rectors of feeble parishes with standard publications of the church.

The Chinese Mission.—Some Chinese were taught in St. Andrew's Church Sunday-school during Bishop Stevens' rectorship, and one was baptized by the name of "Bedell," who returned to China, and was a respectable Christian. In 1875–76, in the same Sunday-school, an effort was made to keep together a class of Chinese scholars. There are now about one hundred Chinese laundries in Philadelphia, and Mr. Thomas Latimer recently placed a copy of the Chinese New Testament in each of them.

Protestant Episcopal Church Notes.—At the time of the Irish famine, in 1847, in response to an appeal from Bishop Potter, nearly nine thousand dollars was received from the Protestant Episcopal Churches in Philadelphia and its vicinity. This amount was invested in corn-meal by the gratuitous agency of Thomas Robins and William Welsh, and consigned to the care of Brown, Shipley & Co., Liverpool, who generously declined any compensation for their services. Three-fourths of it was made subject to the order of the Archbishops of Armagh and Dublin, for the use of the Irish poor; and one-fourth to the order of the Primus of the Scotch Church, and of the Bishop of Edinburgh, for the use of the poor of Scotland.

—The Brotherhood of the Protestant Episcopal Church, a beneficial association, was in existence in Philadelphia from 1851 until about 1877, when it disbanded, and the funds were divided among its members *pro rata*.

—The Mission House, for the training of men for foreign missionary work, was in successful operation for some years in West Philadelphia, and then removed to New York City about fifteen years ago. The building, No. 3518 Lancaster Avenue, is now owned and occupied by the Pennsylvania Working Home for Blind Men.

—In 1819, Sheldon, Potter & Co. began the publication in Philadelphia of a church magazine, called the *Church Record*, and edited by the Rev. Jackson Kemper and the Rev. George Boyd.

In 1823 it was discontinued as a magazine, and succeeded by the *Philadelphia Recorder*. This newspaper soon after changed its name to that of *Episcopal Recorder*, and was for many years published by William Stavely. It was sold to Thomas H. Powers in about 1869, and discontinued as a church periodical. McCalla & Stavely in 1870 began the publication of the *Episcopal Register*, which has become an influential weekly journal.

In about 1845 the *Register*, a church weekly of a high literary character, was published in Philadelphia. Professor Henry Reed and others were contributors to its columns. It was only published for one year. The Rev. Dr. Herman Hooker, who established a church book-store in Philadelphia, published for a number of years the *Banner of the Cross*, but in 1861, on the outbreak of the Rebellion, it lost its large Southern circulation, and was discontinued.

—After the consolidation of the city of Philadelphia many new parishes still continued to use the old names of the districts in connection with their titles, that they might more readily be distinguished.

—During the civil war, 1861–65, the churchmen and the parishes in Philadelphia were fervent and profuse in their evidences of their loyalty to the United States government. A number of the Philadelphia clergy became chaplains. The Rev. Washington B. Erben was chaplain of Rush's Lancers, Sixth Pennsylvania Cavalry; Rev. Mr. Egan, chaplain of Chorman's Cavalry; Rev. Archibald Beatty, Rev. Henry S. Spackman, Rev. Charles R. Hale, Rev. J. Pinkney Hammond, Rev. Richardson Graham, Rev. John Long, Rev. Alexander Shiras, and others, served as chaplains either in the field or in the military hospitals. The laity in Philadelphia were munificent in their private subscriptions for the equipment of regiments and other patriotic purposes, and in nearly every parish there were organizations of ladies engaged in benevolent efforts to aid and relieve the soldiers, especially the sick and wounded. Special prayers were issued by the bishop, and used in all the churches until the return of peace.

—On the 24th of May, 1884, the Diocese of Pennsylvania completes the first century of its diocesan organization. The Convention of 1883 appointed a committee to make arrangements for the proper celebration of the Centennial, and fixed the time for its annual meeting so as to be in session on that day.

—The Evangelical Education Society, a general association, assists young men while studying for the ministry. Its office for many years has been in Philadelphia, at No. 1224 Chestnut Street.

—Soon after Bishop Potter came to Philadelphia, the Episcopal Rooms were established on the second floor of a building on Walnut Street above Fifth. They were then removed to No. 708 Walnut Street, and remained there many years. In 1880 they were removed to No. 1102 Walnut Street. A committee was appointed in 1883, by the Diocesan Convention, to secure, if possible, a diocesan house, and the bishop's office and other church offices will doubtless soon be provided for in such a building.

The Protestant Episcopal denomination has the following officers and church organizations in this city in 1884:

Bishop of the Diocese of Pennsylvania, William Bacon Stevens, D.D., LL.D; house, 1633 Spruce Street; office, 1102 Walnut Street.

Officers of Church Institutions in Philadelphia.—Secretary of the Bishop, of Hospital of the Protestant Episcopal Church, of Board of Missions of Diocese of Pennsylvania, of the Trustees and Overseers of the Divinity School, and of Trustees of Protestant Episcopal Church in the Diocese, Rev. John A. Childs, D.D., 1102 Walnut Street.

Secretary of Standing Committee, James S. Biddle.

Treasurer of Episcopal and Convention Fund, Benjamin C. Godfrey, Episcopal Rooms, 1102 Walnut Street.

Treasurer of Christmas Fund, R. P. McCullagh.

Treasurer of Board of Missions of Diocese of Pennsylvania, Edward Pugh.

Treasurer of Hospital of Protestant Episcopal Church, William W. Frazier, Jr.

Secretary of the Bishop White Prayer-Book Society, James S. Biddle.

Treasurer of Corporation for Relief of Widows and Children of Deceased Clergymen, J. Somers Smith.

Registrar of the Diocese and Head Master of the Academy of the Protestant Episcopal Church in Philadelphia, Rev. J. W. Robins, D.D.

Treasurer of Clergy Daughters' Fund, Charles W. Cushman.

Treasurer of Evangelical Educational Society, William C. Houston.

General Agent of Evangelical Educational Society, Rev. R. C. Matlack, D.D.

Treasurer of the Society for the Advancement of Christianity in Pennsylvania, George W. Hunter.

Corresponding Secretary of Society for Advancement of Christianity in Philadelphia, Rev. John K. Murphy, Germantown.

Treasurer of Society for the promotion of Christianity among the Jews, Richard Ashhurst.

Protestant Episcopal Sunday-School Association, Rt. Rev. William Bacon Stevens, D.D., LL.D., president; Corresponding Secretary, Rev. W. H. Graff; Treasurer, W. A. Farr.

Superintendent Protestant Episcopal City Mission, Rev. Samuel Durborow.

Missionaries to Public Institutions, Rev. Thomas L. Franklin, D.D., Rev. Richardson Graham, Wallingford, Delaware Co.

Missionary to House of Mercy and Homes, Rev. I. Martin, M.D.

Churches.—All Saints, Twelfth and Fitzwater Streets. Rev. Herman L. Duhring.

All Saints, Torresdale, Bristol turnpike. Rev. F. J. Bassett.

Calvary, Manheim Street and Pulaski Avenue, Germantown. Rev. James DeWolfe Perry, Jr.

Calvary Monumental, Forty-first Street, above Oregon. Rev. T. P. Hutchinson.

Chapel of the Burd Asylum of St. Stephen's Church, Market Street, west of Sixty-third. Rev. Gideon J. Burton.
Chapel Christ Church, Pine Street, below Twentieth. Rev. William P. Lewis, D.D.
Chapel Epiphany Mission, corner Twenty-third and Cherry Streets.
Chapel Episcopal Hospital, Huntingdon Avenue and Front Street. Rev. A. B. Crawford.
Christ Church, Second Street, below Arch. Rev. E. A. Foggo, D.D.; Rev. E. C. Belcher, assistant.
Christ Church Hospital, Belmont Avenue. Rev. Edmund Roberts.
Christ Church, Germantown, Tulpehocken Street, near Adams. Rev. John B. Falkner, D.D.
Church of the Advent, York Avenue and Buttonwood Street. Rev. J. F. Powers.
Church of the Annunciation, corner Norris and Camac Streets. Rev. H. G. Batterson, D.D.; Rev. E. B. Taylor, assistant.
Church of the Ascension, Lombard Street, above Eleventh. Rev. G. Woolsey Hodge; Rev. H. O. Dubois, assistant.
Church of the Atonement, Seventeenth and Summer Streets. Rev. Benjamin Watson, D.D.; Rev. J. Sanders Reed, assistant.
Church of the Beloved Disciple, Columbia Avenue, above Twentieth Street. Rev. J. Pleasonton Du Hamel.
Church of the Covenant, Filbert Street, above Seventeenth. Rev. Richard Newton, D.D., Chestnut Hill.
Church of the Crucifixion, Eighth Street, above Bainbridge. Rev. Henry L. Phillips.
Church of the Epiphany, corner Fifteenth and Chestnut Streets. Rev. G. H. Kingsolving.
Church of the Evangelists, Catharine Street, above Seventh. Rev. Henry R. Percival; Rev. Edward Warren, assistant.
Church of the Good Shepherd, Cumberland Street, east of Frankford Avenue. Rev. J. A. Goodfellow.
Church of the Holy Apostles, Twenty-first and Christian Streets. Rev. Charles D. Cooper, D.D.
Church of the Holy Comforter, Forty-eighth Street and Haverford Avenue. Rev. Henry Morton Reed.
Church of the Holy Innocents, Tacony. Rev. G. E. D. Mortimer.
Church of the Holy Trinity, Nineteenth and Walnut Streets. Rev. William N. Neilson McVickar; Rev. Walter Jordan, assistant.
Church of the Incarnation, corner Broad and Jefferson Streets. Rev. Joseph D. Newlin; Rev. E. Cope, assistant.
Church of the Mediator, Nineteenth and Lombard Streets. Rev. Samuel E. Appleton, D.D.
Church of the Messiah, Broad and Federal Streets. Rev. F. H. Bushnell.
Church of the Messiah, East Huntingdon and Edgemont Streets Rev. E. S. Widdemer.
Church of the Nativity, Eleventh and Mount Vernon Streets. Rev. William M. Jefferis.
Church of the Redeemer (Seamen's Mission), South Front and Queen Streets. Rev. B. H. Latrobe, Jr.
Church of the Redemption, Twenty-second and Callowhill Streets. Rev. Thomas B. List.
Church of the Resurrection, Broad and Tioga Streets. Rev. Joseph R. Moore.
Church of St. Sauveur (French), Twenty-first Street, above Chestnut. Rev. C. Miel.
Church of the Saviour, Thirty-eighth Street, below Market. Rev. William H. Meade, D.D.
Church of the Transfiguration, northwest corner of Walnut Street and Woodland Avenue. Rev. Thomas K. Conrad, D.D.; Rev. E. H. Supplee, assistant.
Clay Mission (colored), Winslow Street, below Twelfth.
Deaf Mute Mission of St. Stephen's Church, Tenth Street, above Chestnut. Rev. Henry Winter Syle.
Emanuel, Marlborough Street, above Girard Avenue. Rev. Nathaniel L. Briggs.
Emanuel, Holmesburg. Rev. D. C. Millett, D.D., Holmesburg.
Franklinville Mission, Sixth and Venango Streets. Rev. T. J. Taylor.
Gloria Dei, Swanson Street, below Christian. Rev. Snyder B. Simes.
Grace, Twelfth and Cherry Streets. Rev. Reese F. Alsop, D.D.
Grace, Germantown, Mount Airy. Rev. S. C. Hill, Mount Airy Avenue.
Holy Comforter (Memorial), Nineteenth Street, above Wharton. Rev. Alexander H. Vinton.
Holy Trinity (Memorial), Twenty-second and Spruce Streets. Rev. George F. Bugbee.
House of Prayer, Branchtown. Rev. George Bringhurst.
L'Emmanuello Chiesa (Italian Mission), Christian Street, below Eleventh. Rev. M. Zara.
La Santisima Trinidad (Spanish Mission), Rooms, 136 South Seventh Street. Rev. Parmenio Anaya.
St. Alban, Ridge and Fairthorne Avenues, Roxborough. Rev. J. Joyce Moore.
St. Ambrose, Twenty-eighth Street, above Girard Avenue. Rev. William M. Harrison.
St. Andrew, Eighth Street, above Spruce. *Rev. W. F. Paddock, D.D.; Rev. Charles E. Milnor, assistant.
St. Andrew, southwest corner Thirty-sixth and Baring Streets. Rev. Charles W. Duane.
St. Barnabas, Sixty-fifth and Hamilton Streets. Rev. John G. Bawn.
St. Barnabas Mission, Third and Dauphin Streets. Rev. Charles E. Betticher.
St. Bartholomew, Nineteenth Ward. Rev. James Saul, D.D.
St. Chrysostom, Twenty-eighth Street and Susquehanna Avenue. Rev. C. S. Daniel.
St. Clement, Twentieth and Cherry Streets. Rev. B. W. Maturin, Rev. G. E. Shepperd, Rev. I. I. Cameron, Rev. Charles Fields.
St. David, Centre Street, above Baker. Rev. Charles Logan.
St. David Chapel, Manayunk, Terrace. Rev. H. P. Chapman.
St. George, Hazel Avenue, near Sixty-first Street. Rev. Gideon J. Burton.
St. James, corner Twenty-second and Walnut Streets. Rev. Henry J. Morton, D.D.; Rev. William H. Burr, assistant.
St. James the Less, Nicetown Lane and Falls of Schuylkill. Rev. Robert Ritchie.
St. James, Hestonville, Fifty-second Street and Kershaw Avenue. Rev. T. W. Davidson.
St. James, Kingsessing, Woodland Avenue above Sixty-eighth Street. Rev. Charles A. Maison, D.D.
St. John, Brown Street, below Third. Rev. George A. Latimer.
St. John Free Church, Cemetery Avenue, one square from Frankford road. Rev. Henry A. F. Hoyt.
St. John the Baptist, corner Germantown Avenue and Mehle Street, Germantown. Rev. Charles H. Hibbard.
St. John the Evangelist, Third and Reed Streets. Rev. John E. Johnson.
St. Jude, Franklin Street, above Brown. Rev. William H. Graff.
St. Luke, Thirteenth Street, below Spruce. Rev. C. G. Currie, D.D.
St. Luke the Beloved Physician (Memorial), Bustleton. Rev. Samuel F. Hotchkin.
St. Luke, Main Street, below Mill, Germantown. Rev. Samuel Upjohn.
St. Mark, Locust Street, above Sixteenth. Rev. Isaac L. Nicholson, D.D.; Rev. Henry McCulloch and Rev. Henry McDowell, assistants.
St. Mark, Frankford. Rev. R. C. Booth; Rev. S. Tweedle, assistant.
St. Mark's Mission, New York Railroad and Orthodox Street. Rev. S. Tweedle.
St. Mary, Locust Street, above Thirty-ninth. Rev. Thomas C. Yarnall, D.D.; Rev. Robert F. Innes, assistant.
St. Matthew, Girard Avenue and Eighteenth Street. Rev. John P. Hubbard, D.D.
St. Matthias, corner Nineteenth and Wallace Streets. Rev. Robert A. Edwards; Rev. Theodore H. Waterman, assistant.
St. Michael, High Street, near Morton, Germantown. Rev. John K. Murphy.
St. Paul, Third Street, below Walnut. Rev. William S. Adamson.
St. Paul, Chestnut Hill, Chestnut Avenue. Rev. J. A. Harris, D.D.
St. Paul, Kensington Avenue, near Bockius Street. Rev. H. E. Cooke, Frankford.
St. Paul, Cheltenham. Rev. Edward W. Appleton, D.D., Ashbourne.
St. Peter, Third and Pine Streets. Rev. Thomas F. Davies, D.D., Rev. Alexander J. Miller.
St. Peter, corner Wayne and Harvey Streets, Germantown. Rev. Theodore S. Rumney, D.D.
St. Peter's House, Lombard Street, above Third. Rev. Francis M. Taitt.
St. Philip, Spring Garden Street, below Broad.
St. Stephen, Tenth Street, above Chestnut. Rev. S. D. McConnell; Rev. Francis G. Burgess, assistant.
St. Stephen, Bridge and Melrose Streets, Bridesburg: Vacant.
St. Thomas, corner Fifth and Adelphi Streets. Rev. J. P. Williams.
St. Timothy, Reed Street, below Eighth. Rev. Robert T. Roche, D.D.
St. Timothy, Ridge Avenue, near Shur's Lane. Rev. Robert E. Dennison, rector, Roxborough; Rev. N. F. Robinson, assistant minister.

Trinity, Southwark, Catharine Street, above Second. Rev. Andrew D. Heffern.
Trinity, Oxford road, near Second Street turnpike. Rev. R. B. Shepherd.
Trinity Chapel, Crescentville.
Trinity, Maylandville, Forty-second Street and Baltimore Avenue. Rev. Richard M. Thomas.
Zion, Eighth Street and Columbia Avenue. Rev. William R. Carroll.

The Reformed Episcopal denomination have the following church organizations:

Church of Holy Trinity, Twelfth and Oxford Streets. Rev. H. S. Hoffman.
Church of Our Redeemer, Sixteenth and Oxford Streets. Rev. Charles H. Tucker.
Church of the Corner-Stone, northwest corner of Eighteenth Street and Fairmount Avenue. Rev. J. B. North.
Church of the Sure Foundation. Rev. William Newton.
Emanuel, East York and Sepviva Streets. Rev. Forrest E. Dager.
Grace Chapel, Falls of Schuylkill. Rev. Alexander Sloan.
Reconciliation, corner Thirteenth and Tasker Streets.
Second, Chestnut Street, west of Twenty-first. Right Rev. William R. Nicholson, D.D.; Rev. F. H. Reynolds, assistant.
St. John's, Frankford Avenue, above Adams Street. Rev. Johnson Hubbell.
St. Paul, corner Orthodox and Mulberry Streets, Frankford.
Third, Wayne Street and Chelton Avenue. Rev. J. Eastburn Brown.

THE CATHOLIC CHURCH.[1]

Pennsylvania was professedly founded as a land of religious toleration, as appears from the laws adopted in England for the government of the colony, which provided,—

"That all persons living in this province who confess and acknowledge the one almighty and eternal God to be the creator, upholder and ruler of the world, and that hold themselves obliged in conscience to live peaceably and justly in civil society, shall in no way be molested or prejudiced for their religious persuasion or practice in matters of faith and worship, nor shall they be compelled at any time to frequent or maintain any religious worship, place or ministry whatever."

In the first clause of the charter of privileges, Oct. 28, 1701, the same pledge is given in nearly the same language, and it is added:

"And that all persons who also profess to believe in Jesus Christ, the Saviour of the world, shall be capable (notwithstanding their other persuasion and practices in point of conscience and religion) to serve this Government in any capacity, both legislatively and executively, he or they solemnly promising, when lawfully required, allegiance to the king as sovereign, and fidelity to the proprietor and Governor," etc.

There was then no legal debarment of Catholics from entering the newly-founded colony of Penn.

The first known reference to the presence of a priest and the celebration of mass in Philadelphia may be found in the following extract from a letter of Rev. John Talbot, a nonjuring Episcopal minister to the secretary of the (London) Society for Propagating the Gospel in Foreign Parts, dated at New York, Jan. 10, 1707–8, which says, "Arise, O Lord Jesus Christ! help us and deliver us for thine honor. Since Mr. Brooke, Mr. Moore, and Mr. Evans went away there's an Independency at Elizabethtown, Anabaptism at Burlington, and the Popish Mass at Philadelphia. I thought that the Quakers would be the first to let it in, particularly Mr. Penn; for, if he has any religion 'tis that, but thus to tolerate all without control is the way to have none at all."[2]

In "Church Documents," by Pott & Amery, New York, under "Connecticut," page 37, is another letter from Rev. John Talbot to George Keith, who was engaged also by the Society for Propagating the Gospel, in which he says, under date of Feb. 14, 1708, "I saw Mr. Bradford in New York. He tells me that Mass is set up and read publically in Philadelphia, among which Lionel Britton [or Brittain], the church warden, is one, and his son is another."

The next reference to the celebration of mass is contained in a letter from Penn to Logan, dated 29th Seventh month, 1708 (Logan papers): "Here is a complaint against your Government that you suffer publick mass in a scandalous manner. Pray send the matter of fact, for ill use is made of it against us here."

In another letter from Penn to a correspondent in Philadelphia, he says, "It has become a reproach to me here with the officers of the Crown that you have suffered the scandal of mass to be publicly celebrated."

Others than Talbot made the charge that if Penn had any religion he was a Papist. To that he replied,—

"If the asserting of an impartial liberty of conscience, if doing to others as we would be done by, and an open avowing and steady practicing of these things at all times and to all parties will justly lay a man under the reflection of being a Jesuit or Papist of any rank, I must not only submit to the character, but embrace it, too."

Such were the sentiments and the policy of the founder of Pennsylvania, and that it had "become a reproach to him" that mass was "publically" celebrated, and that he spoke of it as the "scandal of the mass" must not be too harshly judged, when we consider the temper of the times in England and his fears that his proprietary interests would be made to suffer.

That there were Catholics then living in Philadelphia is evident from the documents we have quoted. Dr. John Gilmary Shea, the eminent Catholic historian, furnished Thompson Westcott with the result of investigations in England by Very Rev. Pamfilo da Magliano, provincial of the Franciscans in this country, which shows there were Franciscans "in North America," and that of the number Rev. Polycarp Wicksted and Rev. James Haddock "were in North America in 1708," and that, therefore, "probability points," says Mr. Westcott, "to either as being the celebrant of the mass in Philadelphia in 1707–8."

Dr. John Gilmary Shea, in an article in the *American Catholic Quarterly Review* for July, 1883, says,—

"The earliest evidence we have of the presence of priests in Philadelphia is connected with the conversion of Lionel Brittain, a prominent and well-to-do personage, and the public celebration of mass at the time.

[1] This article was contributed by Martin I. J. Griffin.

[2] The authority for this statement is to be found in "The History of the (Episcopal) Church in Burlington, N. J.," by Rev. George Morgan Hill, D.D., Trenton, 1876, which contains many of Talbot's letters.

This conquest preceded the entrance of the Jesuits into that province, and was probably due to the Franciscans who had been sent to Maryland by the Propaganda some years before."

We believe, however, that to the Jesuits belongs the honor of establishing the first Catholic Church in this city. In the "Roman Catalogue of the Society of Jesus," the names of three priests are recorded as being in New York City between 1683 and 1696,—Fathers Thomas Harvey, Henry Harrison, and Charles Gage. Farther Harvey was born in London in 1635, was in New York from 1683 to 1690, and in Maryland in 1693, and again in New York in 1696,[1] and it is very probable that on his way from New York to Maryland, Philadelphia and the intervening country was ministered to. He returned to Maryland and died there in 1719, aged eighty-four.

In "The Records of the English Province of Society of Jesus," by Henry Foley, S.J., vol. iii. p. 394, is this important testimony from the "Annual Letters of the English Province regarding the Mission in Maryland," under date of 1685–1690, which says,—

"Our mission in the West Indies, Maryland, and indeed in New York, underwent the same fate with those in England. In the latter (New York) there were only two priests, and these were forced in the storm[2] to change their residence, as was also the Catholic governor himself. *One of them traveled on foot to Maryland*, the other, after many perils on the sea,—having been captured and plundered by Dutch pirates,—at length arrived safe in France. In Maryland great difficulties are suffered. Our Fathers yet remain to render what consolation they can to distressed Catholics."

The name of the priest who "traveled on foot to Maryland" is, unfortunately for investigators, not given. But who will gainsay the probability that he did not pass through Philadelphia, and, if so, spiritually attend such Catholics as he could discover?

The Assembly of New York, in 1691, declared the act of 1683, whereby religious toleration was proclaimed, to be "null and void." A bill of rights excluding Catholics from its privileges was adopted. This bill of rights was repealed by King William in 1697, and in 1700 an act passed whereby any "Jesuit priest and Popish missionary" was "deemed and accounted an incendiary and a disturber of the public peace and safety, and an enemy of the true Christian religion, and shall be adjudged to suffer perpetual imprisonment." Harborers of priests were to pay two hundred pounds and stand three days in the pillory.

As the return, made June 13, 1696, by Mayor Merritt, of New York City, to Governor Fletcher shows but nine Catholics in New York City, it is a fair presumption that Father Harvey had "traveled on foot" from that city to Maryland, returned as far as Philadelphia, where no such restrictive and unjust laws existed, and ministered to the Catholics of this city who believing themselves privileged by the charter and laws openly professed their faith, and in 1708 had mass "publically" celebrated.

Thus far, it will be observed, no reference has been made to the "old priest" spoken of by William Penn in a letter from London, in 1686, as one "who had rare shad," nor of the house northwest corner of Front and Walnut Streets, nor of "the house at southeast corner of Second and Chestnut Streets," said to have been "built for a papal chapel." Investigations by Mr. Westcott prove the former property to have been owned by Friends, and the latter too large for any congregation the Catholics could possibly have had.

The gossip and traditions related by Watson regarding the place of early Catholic worship need not be critically examined. In those days Catholics did as Catholics in country districts sparsely settled do now,—have mass celebrated at the house of one of their number, and by changes very often from the house of one to another. This was the custom before the founding of St. Joseph's Church.

The "old priest" spoken of by Penn is very clearly proven to be Rev. Jacobus Fabricius, the Dutch pastor of the Swedish Lutheran congregation. He was called "priest" by his own people and by the Quakers; the term was applied to all "members of the gospel of whatever denomination of Christians."

As yet, no further reference to the Catholics of Philadelphia or their affairs has been discovered until the visits of Rev. Joseph Greaton, S.J., from about 1722 to the founding of old St. Joseph's Church. We are, however, of the opinion that Rev. Thomas Harvey visited this city from time to time prior to his death in Maryland, in 1719.

In the first "Catalogue of the Jesuits in the Province of England," Rev. Joseph Greaton is recorded in 1722 as a "missioner in Maryland," but this is not to be taken restrictively as applying to the colony of Maryland, but to the Jesuits' province, which then included Pennsylvania. Traditionary evidence shows that Father Greaton passed through Adams County, Pa., on a visit to Philadelphia as early, perhaps, as 1722.

The probabilities are that Father Greaton visited the Catholics of this city from that time until he concluded to establish a permanent residence here and found a church; that in 1729 he received the land upon which afterward the little chapel of St. Joseph's was built, and that in 1731 he began its erection.

It was finished in 1732, and on Feb. 26, 1732, mass was first celebrated within the eighteen by twenty-eight feet chapel, to a "congregation," says Mr. Westcott, "originally consisting of eleven persons."[3]

[1] "Documentary History of New York," and "Brief Sketch of the Catholic Church in New York," by Rev. J. R. Bayley.

[2] The "storm" was the Revolution of 1688, and Thomas Dongan was "the Catholic governor" of New York.

[3] To "not more than ten or twelve persons," says a manuscript in the archives of the Archbishop of Baltimore, and believed to be that of Archbishop Carroll. "To forty," says Rev. P. A. Jordan, S.J., now one of the assistants at old St. Joseph's, in "The Woodstock Letters," printed for the Jesuits in 1873.

It is probable that Father Jordan's figures are correct. Surely from

Father Greaton was born in London, Feb. 12, 1678, was admitted to the Society of Jesus July 5, 1708, being then in holy orders.

In 1710 he was studying theology (third year) at Liege. In 1711 he was teaching at St. Omer's. In 1712 and 1713 he was procurator and consultor at Watten. In 1714 his name appears in "Personarum" of the "Catalogue of the English Province" as *John*, and as being "on the mission."

From 1715 to 1720 he was a missionary priest in the College or District of St. Chad, Staffordshire, England. In 1722–25 he was a missioner in England. In another catalogue his name appears as *James*. These *aliases* become of importance, as will appear farther on.[1]

The land upon which St. Joseph's Chapel was built was purchased in 1729, but it is believed full payment was not made until May 15, 1733, when the deed for the lot was put on record. Father Greaton's residence was begun in 1732 and finished in 1733. It was a large substantial mansion, and is still standing.

The original deed, when the church property was first purchased, was not recorded, perhaps because official sentiment was not then favorable to the Catholics becoming established as a church organization, though public opinion was not hostile. While the Catholics were few and were visited occasionally by a priest, they were almost unnoticed, but when it became known that land had been obtained for a chapel, the Assembly of Feb. 6, 1730–31, passed an act "enabling religious societies of Protestants within this province to purchase lands for burial grounds, churches, houses of worship or schools." It is believed this act was designed to prevent "popish worshipers" from securing land. Though the title and preamble contemplated only Protestant associations, the second section, which is the main enacting clause as to religious societies previously formed, confirms all sales, gifts, or grants made of any lands or tenements to any person, in trust, for sites of churches, houses of worship, schools, almshouses, burial grounds, to the person to whom the same were sold or given, in trust, for the several religious societies for whose use the same were purchased or given.

At a later period it will appear that the design of this act was to restrict or prevent the securing of lands by any religious society except Protestants.

The erection of the first Catholic chapel in Philadelphia (eighteen by twenty-eight feet) attracted the attention of the authorities, and at the session of the Provincial Council, July 25, 1734, Governor Patrick Gordon informed the Council that he was under no small concern to hear that a house, lately built on Walnut Street, in this city, had been set apart for the exercise of the Roman Catholic religion, commonly called the "Romish Chapel," where several persons resorted on Sundays to hear mass openly celebrated by a Popish priest. He conceived, he said, the public exercise of that religion to be contrary to the laws of England, some of which, particularly the 11th and 12th of King William III., are extended to all His Majesty's dominions; but those of that persuasion here imagining they have a right to it from some general expressions in the chapter of privileges granted to the inhabitants of this government by our late honorable proprietor, he was desirous to know the sentiment of this board on the subject. It was observed thereupon that if any part of the said charter was inconsistent with the laws of England it could be of no force, as being contrary to the express terms of the royal charter to the proprietary. The consideration was postponed till next meeting, the laws and charter to be laid before the board.

At the meeting held on the 31st of July this matter was resumed:

"The minute of the preceding Council being read and approved, the consideration of what the Governor then laid before the Board touching the Popish Chappell was resumed, and the charter of privileges, with the laws of the province concerning liberty, being read, and likewise the Statute of the eleventh and twelfth of King William the Third, chapter 4, it was questioned whether the said statute, notwithstanding the general words in it, 'all others his Majesty's dominions,' did extend to the plantations in America, and, admitting it did, whether any prosecution could be carried on here by virtue thereof while the aforesaid law of this province, passed so long since as the fourth year of her late Majesty, Queen Anne, which is five years posterior to the said statute, stands unrepealed. And under this difficulty of concluding upon anything certain in the present case, it is left to the Governor, if he thinks fit, to represent the matter to our superiors at home, for their advice and directions in it."

In the *London Magazine and Monthly Chronologer* of July 7, 1737, a correspondent, in speaking of the Quakers, gives "a small specimen of a notable step which the people of that profession have taken toward the propagation of Popery abroad, and as I have it from a gentleman who has lived many years in Pennsylvania, I confide in the truth of it. . . . In the town of Philadelphia, in that colony, is a public Popish chapel, where that religion has free and open exercise and in it all the superstitious rites of that church are as avowedly performed as those of the Church of England are in the Royal Chapel of St. James. And this chapel is not only open upon fasts and festivals, but is so all day and every day of the week, and exceedingly frequented at all hours either for public or private devotion. . . . This chapel, slightly built and for very good reasons, is but small at present, though there is much more land purchased around it for the same pious purposes than would contain Westminster Abbey and the apartments, offices, etc., thereunto belonging."

In reply to this a correspondent, on July 21st, said,—

the time of the mass in 1708 up to 1732 there were by immigration or birth forty who professed the Catholic faith. Father Greaton would not have been likely to erect even the humble chapel he did were the numbers of the faithful not in excess of ten or twelve.

[1] For the above, and other information relating to Father Greaton, we are indebted to Brother Henry Foley, S.J., author and compiler of "The Records of the English Province of the Society of Jesus," completed in nine volumes.

"What private understanding may be between Papists and Quakers I know not nor believe there is any. But it is plain that beads, *Agnus Dei*, bells, or even mass, are in no way detrimental to society, and the Yea and Nay folks in Pennsylvania find the Papists as useful in their trade and of as peaceful behavior as any sort of Christians."

That the Quakers were not hostile to the Catholics at the time mentioned is also proven by the letter of Rev. Colin Campbell to the secretary of the (London) Society for the Propagation of the Gospel in Foreign Parts. Speaking of "the obstruction that I and our missionaries in Pennsylvania and New Jersey meet with," under date of Nov. 2, 1742, he says,—

"What is the effect of Quakerism now in Pennsylvania but a nursery of Jesuits; no less than two priests are in Philadelphia, four in Conestoga, a county in the country, and what the end of Quaker power will prove we may plainly guess. Many Irish Papists turn Quakers, and get into places as well as Germans."[1]

The "two priests" referred to were Fathers Greaton and Neale. Campbell's predecessor, Rev. John Talbot, had bewailed the permitting "Popish mass in Philadelphia" in 1707, and declared that if William Penn "had any religion 'tis that," and that Penn was "a greater Antichrist than Julian the apostate." He also called him "the lewd Governor," and charged that instead of trying "to convert the Indians to the faith, he labors to make Christians heathens, and proclaims liberty and privileges to all that believe in one God."[2]

It was this proclaiming "liberty and privileges to all who believed in one God" that made Father Greaton and his flock insist, in 1734, that they "had the right to the public exercise of their religion."

Thirty-five years after Talbot's testimony Rev. Colin Campbell's shows that Penn's policy had made Pennsylvania "a nursery of Jesuits," but strangely, too, that "many Irish Papists were turning Quakers."

It seems the principle of "tolerating all without control" worked rather oddly in those days.

Father Greaton was the only priest stationed in Philadelphia from the building of St. Joseph's until April 21, 1741, when Rev. Henry Neale, S.J., who had arrived in Maryland from England the year before, came to assist him. On the 25th he wrote to the Superior in England (Pennsylvania then being a separate mission from Maryland and subject to the provincial in England), saying, "I find things otherwise than represented in England, I mean as regards a competent maintenance of one in my station, for an amount of twenty pounds only will not suffice." Father Neale died May 5, 1748. It is not likely that Father Neale remained in Philadelphia from 1741 to 1748, the number of Catholics not justifying the permanent residence here of two priests.

As Rev. Robert Harding, who succeeded Father Greaton in 1750, and built St. Mary's in 1763, arrived in this country in 1732, and is recorded as laboring in Maryland and "occasionally in Pennsylvania," it is not likely that when he came as successor, in 1750, he came to a city he had visited while on the mission between 1732 and 1741, when Rev. Henry Neale, S.J., was sent as assistant to Father Greaton, and perhaps remained so until his death, in 1748.

In 1747, Father Greaton purchased from John Michael Brown and Sarah, his wife, for ninety-two pounds, fifteen and one-half acres on Wingohocking Creek. Rev. P. A. Jordan, in "Woodstock Letters," says, "About the time of Father Greaton's profession he came into his patrimony, and contrary to the custom prevailing in our society, he was granted permission to use his money for missionary purposes. It was with this money he purchased the grounds on the Nicetown road, and in other places in the city and State."

This John Michael Brown is in several Catholic histories set down as a priest who attended, in 1729, a church near Nicetown, erected by a Miss McGawley for tenantry she brought from Ireland. About 1865 the remains of this "Priest" Brown were reinterred in the graveyard of St. Stephen's Church, Nicetown, and services performed appropriate for a deceased priest. But for all that he was not a priest but "a physician, late of the West Indies," as he declared in his will. He ministered to bodies, not to souls.

He never assumed to be a priest. He had vestments and chalices to be sure, but they were for the missionaries on their way from Conewago, Lancaster to Philadelphia, and return. By will he bequeathed to his sister Anastatia his "church vestments," and, we presume, likewise the sacred vessels, as he directed that his sister Eleanor should get "all my plates except what belongs to the church vestments." He gave directions as to the size of his grave-lot, of the wall to be built around it, and of what material it should be constructed, and ordered "the bones of my child, if they may be found, shall be interred with my body" in the grave "in the orchard on my plantation."

Dr. Brown died in 1750. His executors were Rev. Theodore Schneider, Robert Meade (great-grandfather of the late Gen. Meade), and Robert Luther, of Mount Serrat. By his will he left twenty pounds to Rev. Theodore Schneider, who had, in 1741, founded a mission at Goshenhoppen, Bucks Co. In 1747, Father Neale purchased one hundred and twenty-one acres there for twenty-five pounds, and in 1748 Father Greaton bought three hundred and seventy-three acres for fifty-one pounds. Father Schneider, a Bavarian Jesuit, in that year built the first chapel of the Blessed Sacrament on "the Goshenhoppen farm," where he was assisted by Rev. William Wapeler, who also, in 1741, founded the mission at Conewago, Adams Co. Father Schneider was born in Bavaria in 1703, and entered the Society of Jesus in 1721. Father Wapeler was born in Westphalia in 1711, and entered the Society of Jesus in 1728.

[1] History of the Episcopal Church in Burlington. By Rev. George Morgan Hills. Trenton, 1876.

[2] Ibid.

As to Miss "McGawley," there was no land-owner in the neighborhood of that name or of any name resembling it. A diligent search for a record of conveyance of land or record of will has failed to discover any.

In the annual letters of the English province regarding the mission of the Jesuits in Maryland, as given in "The Records of the English Province of Society of Jesus," is the following under date of 1741:

"In Pennsylvania. We had opened a mission here about this year (1741), called Missio S. Fran., Borgiæ, Pennsylvania, with four Fathers, having Father Joseph Grayton (*sic*) as Superior."

The "mission opened about" 1741 must refer to that of Conewago in Adams County, founded by Rev. William Wapeler. Under date of 1746–47 the same authority has "Pennsylvania. There were four Fathers, with Father Grayton, Superior." "Pennsylvania. With the same Father Superior, there were five Fathers here."

In 1750 "the two missions [Maryland and Pennsylvania] were mixed together."

Father Greaton, as we have stated, remained here from 1732 to 1750, then "the two missions [Maryland and Pennsylvania] were mixed together," when he was recalled to Maryland, where he labored until his death at Bohemia, in that State, on Sept. 19, 1752. According to Oliver's "Collections," he died Aug. 19, 1753; the "Catalogue of Deceased Members of the Society of Jesus" gives the date as Aug. 9, 1753. We have accepted the date as given in De Courcy and Shea's "History of the Catholic Church."

Father Greaton's will was made in Philadelphia Sept. 2, 1749, his executors being Rev. R. Harding and Rev. Robert Digges, of Prince George County, Md.; witnesses, Rev. T. Schneider, John Dixon, and Patrick Carroll.

Father Greaton was succeeded, in 1750, by Rev. Robert Harding, S.J. He had come from England in 1732, and labored in Maryland and missions until sent to Philadelphia, in 1750, as successor to Father Greaton.

From the building of St. Joseph's the faithful who died were generally buried in the space adjoining the chapel where they had worshiped, though there is foundation for the belief that the southeast section of what is now Washington Square was used for the interment of Catholics. It was a space distinct from the Potter's Field, which that square originally was, and was not solely for poor Catholics.

A correspondent of the *Sunday Dispatch* says,—

"I am inclined to believe that most Catholics of that day were interred in some burial-ground in general use,—that of the Friends or in the Episcopal Cemetery,—and that the grave was blessed in each case, according to the usual form of burial service, at the time of the funeral."

Before 1748 there are no records of burials. From Dec. 24, 1748, to Dec. 24, 1749, there were eight male and ten female Catholics who were buried. From the same dates in the following years the interments numbered as set down:

1749–50	15 burials:	7 males,	8 females.
1753–54	21 "	12 "	9 "
1754–55	19 "	11 "	8 "
1755–56	47 "	22 "	25 "
1856–57	24 "	13 "	11 "
1758–59	40 "	Number by sex not specified.	

Here is a total of one hundred and sixty-six burials in seven years. Add to that the number from 1732 up to 1749, and it will be seen that as nearly all these were buried in St. Joseph's, space was becoming scarce toward 1760.

In November, 1755, three vessels arrived at Philadelphia, having four hundred and fifty-four Catholics. These were the banished Acadians driven from their homes and brought to this city as its allotment of the number of these people forced from their homes by British oppression. Though not over one-third of the number were able-bodied men, yet they "were looked upon with great suspicion, and even with fear," says Thompson Westcott. A letter of that time speaks of them as not being "better than so many scorpions in the bowels of the country."

The war between France and England, and the general alarm prevailing that all the Catholics would unite with the French, was the foundation of the fear growing out of the presence of these poor people simply because they were Catholics. They "were of the same superstitious persuasion as our inward enemies," it was said. But many of the banished were sickly, and all were poor. Subscriptions for their relief were taken up. They were quartered on the ground on the north side of Pine Street, above Fifth.

Governor Morris, of Pennsylvania, in writing from Philadelphia to Governor Dinwiddie, of Virginia, on Aug. 19, 1755, speaks of the defenseless condition of the colony, and says that the French "might march in and be strengthened by the Germans and Irish Catholics, who are numerous here." He wrote to Governor Hardy, of New York, on July 5, 1756, declaring that "the Roman Catholics in this and the neighboring province of Maryland are allowed the free exercise of their religion." Governor Hardy, in replying, says, "I have heard that you have an ingenious Jesuit in Philadelphia."

At the time of and just after the French and Indian war, the position of the Catholics in Pennsylvania was that of a class suspected of sympathizing and aiding, if occasion allowed, the French, who, being Catholics, were judged to have the good will of all Catholics irrespective of nationality. In those days the Catholics were Irish and German.

Lord Loudon, commander of the British army in America, had a return made to him on April 29, 1757, of the number of Roman Catholics in Pennsylvania in 1757, which is as follows:

	Men.	Women.
Under the care of Robert Harding:		
In and about Philadelphia, being all Irish (or English)	72	78
In Chester County	18	22
Under the care of Theodore Schneider:		
In and about Philadelphia, being all Germans	107	121
Philadelphia County, but up country	15	10
Berks County	62	55
Northampton County	68	62
Northampton County, Irish	17	12
Bucks County	14	11
Chester County	13	9
Chester County, Irish	9	6
Under the care of Father Farmer:		
In Lancaster County, Germans	108	94
In Lancaster County, Irish	22	27
In Berks County, Germans	41	39
In Berks County, Irish	5	3
In Chester County, Irish	23	17
In Chester County, Germans	3	...
In Cumberland County, Irish	6	6
Under the care of Matthias Manners:		
In York County, Germans	54	62
In York County, Irish	35	38
	692	673
Total sum		1365

April 29, 1757.

With the total number of thirteen hundred and sixty-five, and these widely separated, and about one-half women, the authorities were yet fearful. A militia act was passed in that year ordering that, in taking the names of all persons liable to military duty, the name of "what religious society each person belongs" should be taken, "especially such as are Papists or reputed Papists;" and all such, when found, were not allowed to belong to the militia, and all "arms, military accoutrements, gunpowder, and ammunition, of what kind soever, which any Papist or reputed Papist shall have in his house or houses or elsewhere, shall be taken" from them, and "shall be delivered to the colonel of the regiment within whose district the said arms are found, by him to be safely kept for public use."

To have, to conceal, or deny the possession of any such "arms, accoutrements, gunpowder, or ammunition" was an offense punishable by imprisonment for "three months." But all "Papists or reputed Papists," though thus debarred from joining the militia or having arms, were yet taxed twenty shillings, to be "paid the captain of each militia company" by all between seventeen and forty-five years, and parents were held for all young men between seventeen and twenty-one.

In November, 1756, a number of Catholics were arrested in Philadelphia for "being disaffected and treasonable," and Dr. Hugh Mathews had company at his house that was deemed seditious, as "many letters and papers had been read and handed about in the said company which there was great reason to suspect contained some traitorous and treasonable matter."

Still, Father Harding and his flock were undeterred. In 1757, while all this injustice growing out of fear was being perpetrated, he "peacefully razed to the ground" the original chapel of St. Joseph's, and erected one sixty by forty feet.

In August, 1758, the Rev. Ferdinand Farmer (German name Steinmeyer) came to Philadelphia to aid Father Harding, with particular reference to ministering to the Germans. His register of baptisms and marriages began on Aug. 29, 1758. He was born in Swabia, Germany, Oct. 13, 1720. He entered the Society of Jesus at Landesperge, Sept. 26, 1743, and arrived in America June 20, 1752. He is thus described by Mrs. Corcoran to Rev. P. A. Jordan, S.J.: "He was tall and upright, of a ruddy, pleasing countenance; graceful in manner and fluent in conversation; full of *bon homie* and anecdotes. . . . In his deportment he was gentle, like his Model, but showing by the bright flash of his light gray eyes that he could feel for his master's honor and defend his cause." Father Jordan adds, "He was a philosopher and astronomer, intimate with the *literati* of his day, and in 1779 one of the trustees of the University of Pennsylvania, soon to be Philadelphia's pride." He is described in a pamphlet issued in 1820–22 as being "of a slender form," and having "a countenance mild, gentle, and beaming with an expression almost seraphic. . . . My childish imagination," said the writer, "ever personified in him one of the Apostles."

In addition to the duty of attending to the Germans in this city, he journeyed as a missionary throughout Pennsylvania, New Jersey, and New York among the scattered people of these regions. By the Catholics of New York his name should be held in veneration as having been in reality the apostle of the faith in that city. The excessive labors of a long-continued service as a missionary at length affected the health of this devoted Jesuit. According to his usual custom of visiting New York once a month, he set out for that city April 10, 1785, while unwell. He discharged his task, and returned to Philadelphia on May 7th. He continued to do duty until about two weeks before his death, on Aug. 17, 1786.

St. Joseph's "chapel" was enlarged in 1757. After the enlargement of the church and the consequent decrease of the burial-space, the necessity for a burial-ground was acknowledged. "It was," says Rev. P. A. Jordan, S.J., "rather the increasing demand for resting-places for those who 'sleep in the Lord' than the increased number of those 'fighting the combat' that induced the purchase of the ground" now St. Mary's.

In 1758 a subscription-list for the purchase of *most* of the ground at present occupied by St. Mary's Church and graveyard was opened, and three hundred and twenty-eight pounds fifteen shillings and sixpence subscribed.

The money being thus secured, the purchase was made on May 10, 1759.

Joseph Shippen and his wife conveyed for two hundred and fifty-five pounds (subject to a small quit-rent) to James Reynolds (mastmaker) and Bryan O'Hara (perukemaker) the lot of ground, sixty-three

by three hundred and ninety-six feet, now occupied by St. Mary's.

On Jan. 22, 1760, Reynolds and O'Hara conveyed this property to Daniel Swan (coachman), Thomas Mallaby (rigger), John Cottringer (tailor), Edward Harrington (carpenter,—he owned the ground on the northward), William Hussey (tailor), and James White (merchant).

The deed of purchase was acknowledged on Jan. 26, 1760. A declaration of trust was signed by Swan and his associates named above, in which they declared that the property was "conveyed to us by the direction and appointment of the members of a congregation professing the Roman Catholic religion, and belonging to the Roman Catholic Chapel on the south side of Walnut Street," and that said property "was purchased with the proper moneys raised by a voluntary subscription or contribution of the said congregation to the intent only that we or such or so many of us as shall be and continue in unity and religious fellowship with the said congregation should stand and be seized of the said lot of ground and premises to the uses, intents, and purposes . . . for the benefit, use, service, and behoof of the said chapel and congregation, and for a place to bury their dead forever."

ST. JOSEPH'S SCHOOL-HOUSE, CHURCH, AND RESIDENCE IN 1776.
[From a drawing made by Rev. P. A. Jordan, S.J.]

This declaration of trust was not recorded until Jan. 28, 1788, or twenty-eight years after it was executed. The cost of recording was eleven shillings sixpence.

Interments were at once made in the new burial-ground, and on the northwest corner of the ground may now be seen the tombstone of one who died April 20, 1760.

The St. Mary's burying-ground having been obtained and used, the active members of the faithful set about procuring funds for the erection of a church. The subscription-list shows that £1315 1½s. were subscribed, and that the managers contributed £22 10s.

When St. Mary's was built it was denominated Mission No. 1 in a report, in 1765, of Rev. George Hunter, Superior of the Jesuits, to Rev. James Dennett, the English Provincial, and its income set down as ninety pounds, of which forty-five pounds were from house-rents, twenty pounds salary from London, and twenty-five pounds gratuities. This twenty pound salary was derived from the fund said to have been bequeathed by Sir John James for the missions in Pennsylvania, and as Rev. Henry Neale, who came as assistant to Father Greaton in 1741, speaks of twenty pounds as not being sufficient for his support, it is probable that this so-called Sir John James fund was then existing, though the earliest known record of its existence is a record of Bishop Challoner, made Sept. 29, 1748.

It is believed that the Sir John James fund was Father Greaton's patrimony invested under this assumed name to protect it from being confiscated, owing to the persecutions which the Jesuits and all Catholics were subjected to in England.

By injudicious investments the fund so decreased that the bequest to Pennsylvania mission ceased, as a forty pound bequest to the poor of London had to be satisfied. In December, 1768, Father Harding presented to John Dickinson, author of the "Farmer's Letters," an address on behalf of the Roman Catholics of Pennsylvania, thanking Mr. Dickinson for his patriotic efforts in behalf of American liberty.

About 1770, Joseph Crukshank, on Market Street, between Second and Third, reprinted from the seventh London edition the first Catholic prayer-book printed in this country, entitled "The Garden of the Soul; or, a Manual of Spiritual Exercises and Instructions for Christians who being in the world aspire to Devotion."

On Sept. 1, 1772, Rev. Robert Harding died, aged seventy years. The *Pennsylvania Gazette* of September 2d said of him that he was "a gentleman who in the integrity of his life and exemplary conversation is greatly lamented." Rev. Jacob Duché said of him, "He is a well-bred gentleman, and is much esteemed, I am told, by all denominations of Christians in this city for his prudence, his moderation, his known attachment to British liberty, and his unaffected pious labors among the people to whom he officiates."

He was one of the founders of the Sons of St. George.

Father Harding was succeeded in the title to the

Digitized by Google

church property by Rev. John Lewis, as the will of Father Harding directed. He was vicar-general of the Vicar Apostolic of London and Superior of the Jesuits, and thus entitled to the revenues of the society's property. Father Farmer remained alone from the time of Father Harding's death until Rev. Robert Molyneux came, about June, 1773. He and Father Farmer were pastors during the Revolution. "Their voices were," says Rev. P. A. Jordan, S.J., "on the side of the colonies and aided in strengthening the Irish brigade and the dragoons under the Catholic Gen. Moylan."

Washington and John Adams, on Oct. 9, 1774, "went to the Romish Church in the afternoon," as is stated in an entry in Washington's diary and Adams' letter to his wife, Abigail.

Washington made no comments in his diary, but Adams speaks of "the afternoon's entertainment" being to him "awful and affecting; the poor wretches fingering their beads, chanting Latin, not a word of which they understood; their Pater Nosters and Ave Marias; their holy water; their crossing themselves perpetually; their bowing and kneeling and genuflecting before the altar. . . . Here is everything which can lay hold of the eye, ear, and imagination, everything which can charm and bewitch the simple and ignorant. I wonder how Luther ever broke the spell?"[1]

There was at this time but one Catholic congregation, though there were two "chapels,"—the "Old" and "New,"—St. Joseph's and St. Mary's. The former was used for week-day services, the latter for Sunday. It is believed the present St. Mary's Church was the one visited by Washington and Adams in 1774, and also by Washington on Sunday, May 27, 1787.

In March, 1776, Congress appointed a commission to visit Canada to secure the aid or neutrality of the Canadians. Rev. John Carroll, of Maryland, accompanied Franklin and Chase. Father Carroll came to Philadelphia *en route* to New York, and was given a letter of introduction from Father Farmer to Rev. Peter R. Floquet, S.J., of Montreal. The mission proved a failure, and Father Carroll returned in June to Philadelphia, and remained at St. Joseph's for several days.

The first occasion upon which Congress attended a Catholic Church was at the funeral of Monsieur Du Coudray. This French engineer officer, while on his way to join Washington's army, 15th of September, 1777, was drowned while crossing the Schuylkill River at the Middle Ferry. While crossing in a scow the horse upon which he was seated took fright and plunged overboard, carrying his rider with him. Du Coudray had just assumed the duty of inspector-general of the American army. In honor of his services, and perhaps with the expectation of assistance from France, Congress resolved that this officer should be buried with honors of war, and that the members of that body should attend his funeral.

Gerard, the French minister, invited "the President of Congress, the President of the State, the Council officers, civil and military, and a number of the principal gentlemen and ladies of the city" to celebrate the anniversary of the Declaration of Independence, 1779, "at the new Catholic chapel." This was at St. Mary's. The invitation sent to Dr. Rush can be found in the Ridgway Library, and the discourse of the chaplain to Gerard delivered upon this occasion was published in *The United States Magazine* for 1779.

On Sept. 21, 1779, Luzerne, the French minister, as successor of Gerard arrived in Philadelphia and was instructed in the English language by Father Molyneux.

In 1781 subscriptions "towards paying for the old school-house and lot purchased for £400" were taken up and £180 3*s.* subscribed; £54 17*s.* 6*d.* was also subscribed "towards building the new school-house." It was finished in May, 1782, at a cost of £440 15½*s.*, and was situated back of Walnut Street, in the rear of what is now No. 326 Walnut Street. The ground was bought from Samuel Meredith.

On May 8, 1780, the funeral of Don Juan de Miraillés, the acting Spanish ambassador, took place at the Catholic Church. The church was, we believe, St. Mary's, as its size alone made it necessary to use it on account of the large attendance.

The members of Congress and the members of the Supreme Executive Council of Pennsylvania, and other public men attended a *Te Deum* celebration in thanksgiving for the birth of the Dauphin of France, son of Louis.

On Sunday, Nov. 4, 1781, a mass of thanksgiving for the victory at Yorktown was celebrated at St. Mary's Church. Abbé Bandol, chaplain to the French minister, delivered the discourse. Many of the principal public men then in Philadelphia attended on the invitation of the French minister.

This is the *Te Deum* celebration said to have taken place in St. Joseph's Church at which Washington and Lafayette, Rochambeau and De Grasse are said to have attended. Investigation proves they could not have been present, and as St. Mary's was *the* church, the church used on Sundays or great occasions, we believe this celebration took place there.

In 1782, St. Mary's Church was greatly improved. Additional pews were placed in it and galleries were erected. The total subscription for this was £1204 17*s.* 1*d.*

On Aug. 17, 1786, Rev. Ferdinand Farmer died. The funeral services were performed at St. Mary's, where Rev. Robert Molyneux delivered the discourse. The burial took place at old St. Joseph's. He was sixty-six years of age, entered the Society of Jesus

[1] Familiar Letters of John Adams to his wife, Abigail, during the Revolution. By Charles Francis Adams. New York, 1876.

26th of September, 1743. "He was," said Father Molyneux, "esteemed by all ranks and particularly reverenced and loved by his flock, who had nearer opportunities of knowing his singular worth and merit."

That he was "esteemed by all ranks" may be proven by the fact that Hon. John Swanwick, member of Congress, in "Poems on Several Occasions," Philadelphia, 1797, has a poem addressed "To Rev. Robert Molyneux on the death of Rev. Ferdinand Farmer."

"His funeral was attended," says the *Pennsylvania Gazette* of Aug. 23, 1786, "by all the Protestant clergy, the members of the Philosophical Society, the professors and trustees of the University, and a vast number of the inhabitants of all denominations in this city."

In the fall of 1784, Rev. John Carroll, Superior of the missions, came to Philadelphia, and administered the sacrament of confirmation as he had been empowered to do by the Congregation of the Propaganda on June 9, 1784, "to confer the sacraments of confirmation, bless oils, etc." In 1787 he was appointed the first bishop of Baltimore.

Father Farmer died Aug. 17, 1786. Rev. Francis Beeston succeeded him about the 1st of January, 1787, and remained until recalled to Maryland, in 1790. In April, Rev. J. B. Causé came, and remained until December, when he went to Westmoreland County, near the present town of Greensburg, to attend a Catholic colony settled there. In October, 1787, Rev. William O'Brien was here. Rev. Peter Helbron came in November. Father Molyneux remained until February, 1788, and was succeeded as pastor by Rev. Laurence Graessl, who came here as early as Nov. 4, 1787. In May, 1789, Rev. Thomas Keating was assistant, and remained until September, 1790, when he went to Charleston, S. C., where he founded the first church. He returned to Philadelphia, and died early in 1793. Rev. Francis Anthony Fleming came on Dec. 30, 1789. Rev. Christopher Vincent Keating came July, 1790, and remained until December, 1795, when he returned to Dublin. Rev. Leonard Neale, afterward the second archbishop of Baltimore, came on Dec. 21, 1793.

During the yellow fever of 1793, Fathers Graessl, Keating, and Fleming labored as Catholic priests everywhere do in times of pestilence. Fathers Graessl and Fleming gave their lives as a sacrifice to duty. During the fever three hundred and thirty-five Catholics died. Of this number two hundred and fifty-one were buried at St. Mary's, thirty in the German portion of it, and fifty-four at Holy Trinity.

In 1795, Rev. Matthew Carr, O.S.A., came to Philadelphia from Ireland. He built St. Augustine's Church in 1800. Rev. Dr. Carr, on April 10, 1798, blessed the marriage of Le Chevalier de Yrujo, minister of France, to Maria Teresa Sarah McKean, daughter of Chief Justice Thomas McKean.

After the close of the Revolutionary war the affairs of St. Mary's Church were conducted by managers. In the fall of 1787 the Roman Catholic Society of St. Mary's was organized, and on Saturday, Sept. 13, 1788, was incorporated. The trustees named were Rev. Robert Molyneux (the title being in his name), Rev. Francis Beeston, Rev. Laurence Graessl (pastors), George Meade, Thomas Fitzsimmons, James Byrne, Paul Esling, John Cottringer, James Eck, Mark Willcox, and John Carrell.

In 1795–97 the priests stationed in this city were Rev. Leonard Neale, Rev. Michael Ennis, Rev. Matthew Carr, O.S.A. In 1798–99 the priests who from time to time performed duties at St. Joseph's or St. Mary's were Very Rev. M. Carr, O.S.A., Rev. John Rossitter, O.S.A. (had been an officer of the French army, remained in this country and became a priest), Rev. George Stanton, O.S.A., Rev. John Burke (died September or October, 1799), Rev. B. A. McMahon, O.S.A., Rev. Peter Helbron, Rev. Nicholas Brennan, Rev. Francis Beeston, Rev. D. Boury, Rev. Philip Stafford, O.S.A., Rev. William O'Brien, Rev. Michael Lacy, and Rev. Leonard Neale, who in March, 1799, went to Georgetown College as rector, and on Dec. 7, 1800, became coadjutor to Bishop Carroll, and his successor in 1815. Father Neale was the last of the Jesuits at St. Joseph's and St. Mary's until St. Joseph's came in possession of the Jesuits in 1833, save for a brief period in 1814, when John Grassi, S.J., was stationed there. In 1817, Father Grassi returned to Rome, and became rector of the Propaganda. He died Dec. 12, 1849.

In 1798, Rev. Michael Ennis and Rev. Joseph La Grange died of yellow fever, which then prevailed.

In 1800, Rev. M. Carr was pastor, assisted by Rev. John Rossitter. Rev. Philip Stafford, Rev. George Stanton, Rev. William O'Brien, and Rev. B. A. McMahon were here also in January, 1800.

In 1801, Fathers Carr, Rossitter, Stafford, and Lacy were in the city. The Augustinians went to St. Augustine's Church in 1802, and in January, 1802, Rev. Raphael Fitzpatrick became pastor of St. Joseph's and St. Mary's.

On April 12, 1803, Rev. Michael Egan, O.S.F., came to Philadelphia from Lancaster, where he had been assistant to Rev. A. L. de Barth since his arrival from Ireland, in 1802. He was pastor until appointed the first bishop of Philadelphia by Pius VII. on April 8, 1809, who decreed the founding of four new dioceses, Philadelphia, New York, Boston, and Bardstown. The consecration of Father Egan as bishop took place at Baltimore, Oct. 28, 1810.

In 1804–7, Fathers Egan and Rossitter were pastors. On Dec. 26, 1808, Rev. W. V. Harold and Rev. James Harold came. They remained until 1813, when they returned to Ireland, in consequence of difficulties with Bishop Egan.

On July 22, 1814, Bishop Egan died, and was buried at St. Mary's.

From his death until December, 1820, Philadelphia was without a bishop. Father De Barth acted as administrator. Several to whom the appointment was tendered declined. Rev. William V. Harold, for whom it was sought, was refused. Finally Very Rev. Henry Conwell, of the Archdiocese of Armagh, Ireland, accepted. He found Rev. William Hogan acting as pastor of St. Mary's Church, by appointment of Vicar-General De Barth. By reports given him he deemed it proper to suspend Father Hogan. Then ensued that lamentable schism of which we will speak more particularly in the account of St. Mary's Church.

From this time St. Joseph's and St. Mary's are to be considered as separate churches, having separate pastors, and until the cessation of the strife distinct and antagonistic interests. Heretofore they had been one congregation. All the priests lived at St. Joseph's.

In 1821 St. Joseph's Church was enlarged. The adherents of Bishop Conwell came to St. Joseph's to worship.

On Easter Tuesday, 1821, the adherents of Bishop Conwell assembled at St. Joseph's, at three o'clock in the morning, and before daylight proceeded to St. Mary's, and took possession. When the Hoganites assembled ensued "the battle of St. Mary's."

On March 1, 1823, a meeting was held at St. Joseph's of those sustaining Bishop Conwell in the Hogan schism, and opposing the amending of the charter of St. Mary's by the State Legislature so as to create a board of trustees of eleven laymen and excluding priests. Charles Johnson, John Keating, Jr., Michael McGrath, Dr. Joseph G. Nancrede, and John Carrell, Sr., were appointed a committee to report resolutions.

The resolutions declared in bishops alone was the right to appoint pastors; that the pious founders of St. Mary's intended "its pastor should at all times participate in the management of its temporal concern," and that the alteration of the charter as proposed by a committee of the State Senate was an infringement of chartered right, and defeating the intentions of the founders.

In 1823, Rev. John Walsh was at St. Joseph's.

On Feb. 13, 1824, Bishop Conwell, while residing at St. Joseph's, baptized Joseph Lucien Charles Napoleon Bonaparte, son of Charles Julius Laurence Lucien Bonaparte, and his wife Princess Zenaide Charlotte Julia, daughter of Joseph, formerly king of Spain. The latter was the godfather, and the godmother was Letitia, mother of Emperor Napoleon. She was represented by proxy,—the Princess Charlotte Bonaparte, the child's aunt. Ex-King Joseph presented Bishop Conwell with a diamond episcopal ring, formerly the property of Cardinal Ximenes.

In March, 1824, notice was given in the papers that an enlargement of the church was necessary, and contributions were solicited. At this time the notice declared "the chapel of St. Joseph's to be utterly disproportioned to the extensive number of the congregation, and in all respects unsuited for the purpose of divine worship."

In 1824 the clergymen at the church were Bishop Conwell, Rev. William V. Harold, Rev. J. Cummiskey, and Rev. John Ryan.

In 1825, Bishop Conwell, Rev. J. Cummiskey, and Rev. John Ryan were at St. Joseph's, and Father Jordan says that in this year Rev. C. Ferry was one of "the canons or prebendaries of St. Joseph's."

In 1826, Rev. Roger Baxter was stationed at the church, remaining there until his death, May 22, 1827. Rev. James Smith took his place, but does not appear to have remained long.

In February, 1827, Rev. John Hughes, afterward the illustrious archbishop of New York, who had here been ordained Oct. 15, 1826, and stationed at Bedford, Pa., was recalled and stationed at St. Joseph's, after the death of Father Baxter, to take the place of Rev. William V. Harold, removed by Bishop Conwell. The pastor of St. Joseph's was Rev. T. J. Donahoe, with Father Hughes, Rev. John Reilley, and Rev. S. S. Cooper as assistants.

The trouble at St. Mary's still continued. But at "St. Joseph's," wrote Father Hughes on May 2, 1828, "all is quiet. I received such encouragement that I was lately on the point of enlarging the church, which is much too small for the concourse of people that attend it. But I have declined for the present."

In 1829, Rev. T. Donahoe was pastor, and Rev. John Hughes assistant. On Dec. 29, 1829, Father Hughes wrote to Rev. M. Purcell: "At the little chapel of St. Joseph's there is peace and piety. They are, generally, poor; and Massillon says, 'the poor are the objects of God's predilection.'"

In June, 1830, Bishop Kenrick came to Philadelphia as coadjutor to Bishop Conwell, whose episcopal residence was at St. Joseph's. He speedily and effectively grappled with the trustee troubles at St. Mary's, and by vigorous and resolute measures destroyed the rebellious spirit and introduced harmony.

In April, 1833, the Jesuits were placed in charge of St. Joseph's, and have ever since continued to direct its affairs. Rev. Stephen Dubuisson was appointed a Superior.

In 1837 it was determined to build a new church. On Monday, May 7, 1838, mass was celebrated in the old church for the last time. On June 4th the cornerstone of the present edifice was laid by Rev. James Ryder, senior pastor, in the presence of Bishop Conwell. Rev. Felix Joseph Barbelin was assistant pastor. In 1839 he became pastor, and so remained until his death, June 8, 1869.

On Jan. 11, 1840, the first Sodality of the Blessed Virgin organized in this country outside of a Catholic college, was instituted by Father Barbelin. On Friday, April 22, 1842, Rt. Rev. Henry Conwell died. On Jan. 31, 1848, a society for the relief of emigrants

from Ireland was organized. It was the foundation of the present St. Joseph's Hospital, Seventeenth Street and Girard Avenue.

St. Mary's Church was founded 1763, by Rev. Robert Harding. The contributions for its erection amounted to thirteen hundred and thirty-seven pounds.

In colonial and Revolutionary days St. Mary's was the principal Catholic Church of this city. It was used on Sundays and special occasions, St. Joseph's (the old chapel) being used for services on week-days.

In 1782, after the close of the Revolutionary war, contributions to the amount of twelve hundred and four pounds were taken up for the improvement of the church, and new pews, galleries, and other additions were made.

On July 4, 1779, the third anniversary of the Declaration of Independence was celebrated at this church. The French minister (Gerard) invited the distinguished men of the time then present in Philadelphia to attend.

Feb. 22, 1800, was "a day of mourning throughout the United States" for the death of Gen. Washington. St. Mary's was draped in mourning, and Rev. Mr. Carr delivered an eulogium on his character.

In 1810 the church was enlarged to its present size. On April 11, 1811, Gen. Stephen Moylan died, and on the 14th was buried at St. Mary's.

On July 22, 1814, Bishop Egan died. Rev. L. de Barth became administrator, and acted until the appointment and arrival of Rt. Rev. Henry Conwell, early in December, 1820. At this time the pastor of St. Mary's was Rev. William Hogan, who had been appointed in April, 1820, by Father De Barth. Father Hogan said St. Mary's was at this time "the largest congregation in America." On Dec. 12, 1820, Bishop Conwell suspended him. Then ensued the schism in the congregation, which became divided into "Hoganites" and "Bishopites." On April 9, 1822, when trustees were elected a riot took place, and a portion of the wall and railing of the church were torn down and used as missiles. Both factions held elections, the Bishopites on the south side of the church, the Hoganites on the north. Two sets of trustees were elected, and appeals to the courts and to Rome were made by both parties. Hogan left Philadelphia in 1823, and spoke and wrote against the Church. He married twice, and died at Nashua, N. H., in 1848. By this schism many Catholics abandoned their faith. The controversy continued until finally suppressed by the vigorous course of Bishop Kenrick, soon after his arrival as coadjutor bishop, in 1830. In April, 1831, he ordered "the cessation of all sacred functions" at the church. On May 18th the trustees submitted, declaring that "they disclaimed all right to interfere in the spiritual concerns of the church," since which time there has been peace at St. Mary's.

In April, 1828, Rev. William Mathew, D.D., and Rev. Jeremiah Keiley became pastors. In 1829, Rev. Tolontina de Silva was assistant to Father Keiley, who remained in pastoral charge until the close of 1834, when he opened, on Jan. 1, 1835, Laurel Hill College. The enterprise not proving successful, it was closed in August. On Sept. 24, 1837, Rev. C. J. Carter became an assistant to Bishop Kenrick. He became pastor in 1841, and remained until March, 1849, when he erected the Church of the Assumption, on Spring Garden Street, below Twelfth, where he remained until his death. Father Carter's successor was Rev. George Strobel, who died in 1877. He had been stationed at St. Mary's from August, 1846. In March, 1838, Rev. Peter Richard Kenrick, brother of the bishop, became a pastor. He remained until appointed coadjutor to Bishop Rosati, of St. Louis. He was consecrated at St. Mary's on Nov. 30, 1841. He is now the venerated archbishop of St. Louis. He succeeded Bishop Rosati in 1847.

During the riots of 1844 St. Mary's was guarded by military and by members of the congregation, but it was not injured.

The present rector is Very Rev. Ignatius F. Horstmann, D.D., a native of this city, one of the most eloquent and impressive speakers in the Catholic Church. He has been in charge since December, 1877. His assistant is Rev. Thomas Kelly.

Though this parish has been afflicted, yet have the highest honors been conferred upon it. Two of its pastors have become bishops, one of whom is now an archbishop. Here worshiped many distinguished French families, who for their safety were obliged to leave France on the outbreak of the revolution. Many lie entombed in its cemeteries, their descendants still worshiping at the altar around which their ancestors met and breathed many fervent prayers for the preservation of their land from anarchy. Within the graveyard repose the remains of learned and eminent men, prominent among whom may be mentioned Gen. Stephen Moylan, of the Revolution, and Capt. John Barry, "the father of the American navy."

Holy Trinity Church.—By the return made to Lord Loudon on April 29, 1757, there were two hundred and twenty-eight German Catholics "in and about Philadelphia," under the care of Rev. Theodore Schneider, who had founded the mission at Goshenhoppen, Berks Co., in 1741, and from thence attended the German Catholics in Philadelphia. In August, 1758, Rev. Ferdinand Farmer came to St. Joseph's, and until his death, in August, 1786, ministered more particularly to the Germans. After his death their numbers justified the more active in projecting a separate congregation. Accordingly, they organized an association in 1787, and on Feb. 21, 1788, Adam Premir bought from the Supreme Executive Council of Pennsylvania the lots on the northwest corner of Sixth and Spruce, being sixty-eight feet ten inches front on Sixth Street, and one hundred and ninety-eight feet on Spruce. Pre-

mir purchased for the congregation and with money contributed by the members. Application being made to the Legislature for an act of incorporation, it was granted Oct. 4, 1788, under the title of "The Trustees of the German Religious Society of Roman Catholics, called the Church of the Holy Trinity in the City of Philadelphia." Rev. John Charles Helbron was the first pastor, being named in the deed of Adam Premir, Nov. 13, 1790, conveying the church to the trustees. He was succeeded by Rev. Peter Helbron, who came from Goshenhoppen in 1792. He was, after 1793, assisted by Rev. Lawrence Phelan, who preached in English on Sunday afternoons. In 1796, Rev. John N. Goetz was appointed by Bishop Carroll assistant at the church, and he became a favorite of the trustees. They removed Father Helbron and appointed Father Goetz pastor, and Rev. William Elling, assistant, in place of Father Phelan. Rev. Leonard Neale, vicar-general, reported this action to Bishop Carroll, who, by pastoral letter dated Feb. 22, 1797, condemned the action of the trustees. The controversy continued until 1802, Father Goetz withdrawing or being dismissed by the trustees and Father Elling submitting to the authority of the bishop. He continued at the church until his death, in April, 1811. The first Catholic orphan asylum in the city was established adjoining the church, to care for the orphans of Catholics who had died of yellow fever in 1798. The first Sisters of Charity sent out by the mother house of the order at Emmittsburg, Md., founded by Mother Seton, were sent to this asylum on petition of the trustees of Holy Trinity. The asylum was incorporated in 1807, and is now located at the southwest corner of Seventh and Spruce Streets.

In 1810 Rev. Adam Britt was pastor, and in 1826 Rev. Francis Roloff. He was succeeded by Rev. Father Carroll, and in 1831 by Rev. J. Vanderbrack. In 1833 Rev. Francis Guth, the pastor, founded St. Vincent's Orphan Asylum. It is now located at Tacony. In 1834 an assistant at the church was Rev. Henry Lemcke. He had been a soldier in the wars against Napoleon, and died Nov. 29, 1882, at the Benedictine Monastery at Carrolltown, Cambria Co., Pa., aged eighty-six years.

On July 29, 1834, a solemn high mass of requiem was celebrated at this church for the repose of the soul of Gen. Lafayette.

In 1836, Rev. Father Stahlschmidt was pastor; in 1842, Rev. Otto H. Burgers; in 1845, Rev. Andreas Skopes; in 1847, Rev. Nicholas Perrine; and in 1854, Rev. P. M. Carbon, who remained until his death, Oct. 24, 1871.

On June 23, 1860, the church was destroyed by fire. From the first trustee trouble, in 1797, there had really never been a cessation of the spirit of dissension relative to the affairs of the church. Finally, in 1859, a settlement was arrived at, though it imposed a debt of ten thousand dollars on the congregation. This was considered preferable to continue a litigation, and was advised by Bishop Neumann, Father Carbon, and by "some of the best lawyers and men of equity in the city." The destruction of the church so soon afterward made the burden very heavy.

In the burial-ground of this church Stephen Girard was buried; but on the completion of Girard College the body was removed to that institution.

In 1880 Rev. H. Schick was pastor, and on Oct. 7, 1883, the arrival of the German pioneer founders of Germantown was commemorated at this church. The pastor now (February, 1884) is Rev. Ernest O. Hiltermann.

St. Augustine's Church.—In 1796, June 11th, Very Rev. Dr. Matthew Carr, O.S.A., resident at the time at St. Joseph's, and pastor later on of both it and St. Mary's, purchased from Jonathan Meredith and wife, for a yearly ground-rent of three hundred and forty dollars, a lot of ground on North Fourth Street one hundred and seventy-five by eighty-five feet, on which St. Augustine's Church was built. On the 12th of the same month, 1796, Dr. Carr opened a subscription-list in aid of the new church, and in September of the same year (probably the first Sunday, the feast of Our Lady of Consolation, chief patroness of the Augustinian Order) was laid its corner-stone.[1]

The number of subscribers in 1796 was two hundred and forty-four, and the amount given $8679.02. The following are the names and amounts of some who subscribed in 1796, viz.:

Name	Amount	Name	Amount
Thomas Fitzsimons	$500.00	John Walsh	$53.33
John Leamy	200.00	George Washington	50 00
John Rudolph	100.00	Commodore Barry	150.00
J. Ingersoll	30.00	Capt. —— Hoare	10.00
Samuel Meredith	30.00	Capt. —— O'Connor	10.00
Thomas Allibone	20.00	Capt. —— Faulkner	10.00
James Vanuxem	20.00	George Meade	50.00
Isaac Jones	15.00	Mathew Carey	50.00
Montgomery & Newbold	20.00	Jasper Moylan	50.00
J. & B. Waln	20.00	—— Dunn, M.P. (Ireland)	20.00
Valentine Peacan	100.00	Stephen Girard	40.00

Gen. Washington and Governor Thomas McKean are said to have been present at the blessing of the first stone, in 1796. The church was of Roman style, one hundred and twenty-five feet long, sixty-two feet wide, forty feet to the eaves, and with a tower seventy-five feet high. The architect, builder, and superintendent was Nicholas Fagan, and his father-in-law, John Walsh, a wealthy lumber merchant, gave nearly all the lumber used in the building of the church.

Later on, in 1830, City Councils sold to Dr. Hurley, O.S.A. (successor to Dr. Carr), the State-House clock and bell. The clock was the same one that had struck the hours on July 4, 1776, and the bell was one that had belonged to the province of Pennsyl-

[1] During the riots of 1844 nearly all the church books were lost. Only six are known to have been saved. In these have been preserved, first, the original list of subscribers to the church, commenced June 12, 1796, with the amounts given; second, a diagram of the pews of the same church, with names of pew-holders from the day when they first took possession, June 7, 1801, down to 1808; third, the financial accounts for nineteen days, from Dec. 12, 1811, to Jan. 1, 1812, and the complete registries of baptisms, confirmations, and marriages. This sums up all the records of the early years of this church that have been preserved.

vania in colonial times, and had been used to call the Assembly together long before the State-House was built.[1]

It is noteworthy that St. Augustine's was the first in the State of either Catholic or Protestant Churches to have the altar and chancel at the western end. This singularity of position was doubtless due to the site of the lot.

In 1799, money for the building being hard to get, and the country being impoverished from the Revolutionary struggles, the Legislature sanctioned a lottery, projected by Dr. Carr, to raise ten thousand dollars toward defraying the building expenses. This was a favorite means at this time to raise funds for all kinds of projects,—for example, street improvements, schools, and churches of all denominations.

In 1801, June 7th, opens the registry of the first pew-holders, and in the same year, October 8th, is registered the first baptism, and October 20th the first marriage. From this it would seem that the church, that had been founded in 1796, was not blessed and opened to divine service until five years after,—that is, until June, 1801.[2]

Among the original pew-holders (1801–7) are Capt. James Butler, Capt. J. Rossitter, Capt. —— Burke, Commodore Barry, Pierce Maher, John Rudolph, Don Joseph Viar, Thomas Fitzsimons, Mathew Carey, Jasper Moylan, Richard W. Meade, Nicholas Esling, John Leamy.

In 1802, Dr. Carr took up his pastoral residence at St. Augustine's, leaving his fellow-religious, Father John Rossitter, O.S.A., in charge of Sts. Joseph's and Mary's, and in company with Rev. Raphael Fitzpatrick and Rev. Michael Lacy.

In 1803 St. Augustine's and St. Joseph's became distinct parishes, Dr. Carr giving up to Rev. Michael Egan, O.S.F., the parish of St. Joseph's and the vicar-generalship, which he had held since 1799.

In 1804, September 24th, the Fathers of St. Augustine's received their charter from the Legislature. The first incorporators were Revs. Dr. Carr, Dr. Hurley, and John Rossitter (all O.S.A.), Rev. Demetrius (the famous Prince) Gallitzin, and Rev. Louis de Barth.

During the years from 1801 to 1830 the Fathers of St. Augustine's ministered in a very extensive territory. They baptized and married at Germantown, Bustleton, Frankford, Darby, Norristown, Cobb's Creek, and Villanova (then known as Belair), Lamberton, Burlington, and Trenton, in New Jersey, and Wilmington, in Delaware.

[1] See *Sunday Dispatch* for more regarding this bell; also Etting's History of Independence Hall.

[2] The marble tablet on the façade of the present church puts its foundation in 1798, and its dedication in 1801. Father Jordan puts the foundation in 1799. Amid this conflict of authorities we have chosen the view that seems best supported by collateral evidence,—viz., that as the ground was bought in 1796, the subscription-books opened in 1796, one should put the foundation of the church (as above) on the first Sunday of September, 1796, and its dedication in 1801.

In 1822, Father Philip Larissey visited Staten Island and the towns along the Hudson River, also (but in year not known), Boston, Mass., where he built the Mortuary Chapel, in St. Augustine's parish. In 1834, Dr. Hurley, with sanction of Bishop Dubois, of New York, opened a mission at Binghamton, N. Y., and about this time Father James O'Donnell, O.S.A., opened the one at Salina, N. Y., near Syracuse, and later on one in Williamsburg, Long Island.

In 1800, January 1st, Dr. Carr received into the church the first Philadelphian to become Catholic and Christian in the nineteenth century. He was a negro slave named Cæsar Ducombe. Among the many interesting entries in the old registries of St. Augustine's we note the following:

Baptisms.

1801, December 1st, Caroline Eugenia Girard, Henrietta Maria Girard.
1803, November 20th, Augusta Virginia Peale.
1806, March 20th, Mary Frances Borie.
1810, September 13th, Adolphus Edward Borie.
1810, November 11th, Mary Ann Da Costa.
1816, June 4th, Sophia Elizabeth Borie, Emily Mary Borie, Charles Beauveau Borie.
1817, July 17th, George Washington Singerly.
1819, June 3d, Charles Louis Borie.
1820, November 19th, Louisa Augusta Da Costa.
1822, March 6th, Mathew Carey Lea.
1823, April 6th, Bertrand Peale.

Marriages.

1808, February 12th, John Joseph Borie to Sophia Beauveau.
Fielding Lucas to Elizabeth Carroll.
John Hoskins to Catharine Girard.
Henry Dominic Lallemand to Henrietta Maria Girard. The witnesses to this marriage were Stephen Girard, Joseph Buonaparte, Count of Survilliers, Marshal Count de Grouchy, Gen. Charles Lallemand, of the Imperial army, etc.

In 1808, January 11th, Dr. Hurley baptized Peter Albright, the same who afterward, in 1844, took so prominent a part in burning the churches, and who exulted that the record of his baptism as Catholic had been destroyed at St. Augustine's.

In 1821, February 1st, Dr. Hurley assisted at the marriage of his sister Catharine to Augustus Taney, brother of the late chief justice of the United States, Roger B. Taney.

In 1820 the first musical celebration which arrested public attention in the United States was at St. Augustine's Church. Dr. Hurley had got it up with the aid of Messrs. Carr and Schetky, well-known teachers of music, to raise funds to erect an altar and beautify the church. The trombones and their players came from Bethlehem, Pa., from the Moravian Seminary, and other amateurs from various parts of the United States.[3]

On Sunday, May 27, 1821, Bishop Conwell issued sentence of excommunication against (Rev.) William Hogan from the altar of St. Augustine's Church.

In 1832, during the ravages of the Asiatic cholera, Dr. Hurley had all the furniture, books, etc., removed from the school and convent, and turned them into

[3] See Binns' Autobiography.

hospitals for the reception of persons stricken with the disease. The buildings were fitted up suitably, and charitable nurses administered to their wants. Binns says three hundred and sixty-seven patients were cared for in all, of whom only forty-eight were Catholics. The city afterward paid the expenses of this charity, but Dr. Hurley declined to accept any other pecuniary remuneration. His church was destroyed in 1844.

In 1833, Father Nicholas O'Donnell, O.S.A., assistant to Dr. Hurley, undertook the editorship of the *Catholic Herald*, the pioneer of Catholic Philadelphia newspapers. He continued it up to 1839.

In 1836 was purchased, for cemetery purposes, by Dr. Hurley, a lot of ground at Bush Hill, formerly the country-seat of Governor Andrew Hamilton (in 1740) upon Schuylkill Eighth [Fifteenth] Street, below Coates [Fairmount Avenue]. It was opened on the 1st of September, 1836. The first interment was of a child. The growth of the city in after-years compelling it to be vacated, the remains of those who had been buried there were removed (where they had kin) to St. Augustine's graveyard on Fourth Street, or to Cathedral Cemetery, while the unclaimed dead were buried at the expense of the church, at St. Dennis' graveyard, at Haverford, Delaware Co. The last interment at Bush Hill was on the 20th of August, 1853.

In 1838 the census of the parish of St. Augustine's gives the following numbers, viz.:

Number of yearly communicants	750
" " these who have not made first communion	200
" " baptisms	183
" " marriages	54
" " converts	15
" " adults in the parish	2146
" under fourteen and over seven years	350
" under seven years	506
Total number	3002
Of these there were natives of Ireland	1494
" United States	508
" Germany	73
" England	37
" Italy and Switzerland	8
" Scotland	5
" France, etc	21
" unclassified	856
Total number	3002

In 1840, Father James O'Donnell, O.S.A., of this church, built at Williamsburg, N. Y., the church of St. Mary's, and on June 27th, of this year, it was blessed by Bishop Dubois. In 1844, May 8th, Wednesday, was consummated a gross wrong against Christianity. The church of St. Augustine's, founded fifty years before through the piety and charity of Philadelphians, aided by contributions from even those of alien creeds, of even the great hero of America's patriotism; the church that had opened its portals in time of dire distress to the woe-stricken of 1834, when abandoned by their own lawful guardians; the church that was a repository of so many monuments of art and learning as should have insured it respect and veneration by all who had any regard for aught holy or renowned for age, or hallowed by religious or patriotic associations; this church was, on the day above, with all its buildings, convent, library, schools, etc., given to the flames, and thus destroyed by the violence of a mob of fanatics. Its treasures were lost or scattered, and the few recovered were disfigured, mutilated, and ruined.

The following is a summary of the ruin wrought during 1844:

Two churches destroyed by fire, one church twice fired and desecrated, one seminary and house of retreat burned, two presbyteries destroyed, one theological library destroyed, two schools destroyed, one sisters' orphanage destroyed, about forty dwelling-houses destroyed, about forty lives lost, about sixty citizens wounded; and riot, rebellion, and treason rampant; the laws set at defiance, and peace and order imperiled by the violence of ruffians. The losses to the church, including buidings, personal property, etc., are three thousand volumes, the property of Dr. Carr, Dr. Hurley, Rev. George Staunton, Rev. Thomas Kyle, Rev. James O'Donnell, and the Catholic Library Association,—valued at $13,020.

Church furniture	$5,370.87	
Rev. John P. O'Dwyer's effects	9,225.00	
Rev. James O'Donnell's effects	6,916.75	
Rev. Thomas Kyle's effects	570.00	
Rev. Francis Ashe's / William Harnett's } effects	150.00	
Four servants' effects	170.00	
Six trombones	300.00	
House furniture	3,650.07	
		$39,372.69
Damages to buildings		44,255.06
Total amount of damages to buildings and personal property.		$83,627.75

This was claimed from the city. The Court of Nisi Prius, in 1847, November 29th, awarded $47,433.87. The singularity of this figure is accounted for from the fact that the jury that had the case in hand were unable to agree, until one of them, brighter witted than his fellows, suggested that each of them should name the sum he was willing to allow for damages, and the sum total should be divided by twelve, their number. This was agreed to, with the result that the damages found reached the figure as above.

The causes of this destruction may be given: first, the remote ones, viz., the growing spirit of hostility to foreigners, and especially to Catholics, which had first found vent in 1834 in the destruction of the Ursuline Convent at Charlestown, Mass.; second, the malignant efforts of the ministers of various Protestant churches in 1841, in New York chiefly, to raise persecution *vs.* Catholics: and proximate causes, the association of Protestant clergymen in Philadelphia in 1842, under the title of the "Protestant Association," which was directed against the church. Incidentally, the crisis was brought about in Philadelphia by, first, the evil results of the Hogan schism, and, second, by the bold language used in the pulpit and out of the pulpit by the champions of the Catholic side. This undoubtedly was an occasion to the enemies of the faith to turn to the unchristian weapons of fire and bloodshed.

Within three months after the destruction of St. Augustine's, Father O'Dwyer, O.S.A., had erected the chapel of Our Lady of Consolation, which served as a parish church until the new and present one was built, in 1848. During the interval of three months the congregation of St. Augustine's was allowed by the courtesy of St. Joseph's Fathers to use their church

for devotions, mass, etc. The chapel of Our Lady was torn down in 1871, to make room for the large and well-equipped parish schools on Crown Street.

In 1847 it was resolved to proceed toward the rebuilding of St. Augustine's. The court had now awarded damages for the ruin of 1844, and, in April of this year, the congregation voted three thousand dollars toward the expenses of the new church. On May 27th (Sunday) the corner-stone was blessed by Bishop Kenrick; Dr. Ryder, S.J., preached. The site of the new church is identical with that of the old one, and the side lines of the building the same. The present church extends eighteen feet farther to the rear to allow of sanctuary room, and eight feet nearer Fourth Street to allow of a tower. The dimensions are one hundred and fifty-two feet long, sixty-two feet wide, and height of tower two hundred feet. The style is Roman Palatine; the architect, N. Le Brun.

In 1848, December, Sunday, the new church was consecrated (free of debt) by Bishop Kenrick, while Bishop Hughes, of New York, preached at high mass. In 1847 the Synod of Philadelphia had laid down the boundaries of the parishes of St. Augustine's and St. Joseph's, and in 1876 Bishop Wood revised them as they are at present.

The schools of St. Augustine's are noticed first in Dr. Carr's time. In 1813 he put a mortgage "on and for the benefit of the school-house." This is the earliest mention of a school. From the date above it may be inferred that a school existed prior to 1813. This school-house was afterward "rented to a Mr. Badlock." In 1838 the "school-house" is insured perpetually in the Philadelphia Company for forty dollars premium; in 1841 the teachers were, for the boys, Peter Madigan and —— Nugent, and for the girls Mrs. —— Holmes. In 1871 the fine large brick building now in use was put up by Father Mark Crane, O.S.A., pastor, and in 1874 given into the charge of the Brothers of the Christian Doctrine. The Sisters of St. Joseph, who succeeded the Sisters of the Holy Cross, now conduct the girls' department in the parish school, and a select academy on Fourth Street. Previous to the coming of the religious named above, the schools were under lay teachers, directed by the Fathers of the church. It should not be forgotten that the Orphans' Asylum on Spruce Street was at an early year in this century indebted largely, if not chiefly, to the efforts of Dr. Hurley, O.S.A., who in this was greatly aided by Mr. Cornelius Tiers (now deceased). Dr. Hurley got the Sisters of Charity from Emmittsburg, Md., in 1814.[1]

The societies of St. Augustine's Church of which earliest mention is made are: 1828, January 8, founded St. Augustine's Beneficial Society; in 1837 are mentioned a Library Society, a Rosary Society, and a Temperance Society. This seems the first temperance society on record. In 1840, Sunday, June 28, Dr. Moriarty founded the St. Augustine's Catholic Total Abstinence Society. In 1840, August 28, Dr. Moriarty founded the St. Augustine's Catholic Temperance Beneficial Society of Philadelphia; in 1840, September (by the same), a Temperance Literary Association for the young men of the parish. Early in 1843 (by the same), St. Augustine's Youth's Literary Institute. The Confraternity of Our Lady of the Cincture, being an usual aggregation in Augustinian churches, was probably from the beginning. The oldest members now living found it in standing when they first joined.

The pastors of St. Augustine's Church have been: Carr, Matthew, D.D., 1801–20; Hurley, Michael, D.D., 1820–37; O'Donnell, Nicholas, 1837–39; Moriarty, Patrick Eugene, D.D., 1839–44; O'Dwyer, John Possidius, 1844–50; Moriarty (second time), 1850–55; Stanton, Patrick Augustine, D.D., 1855–57; Mullen, Ambrose Augustine, 1857–61; Crane, Mark, 1861–71; Crane, Peter, 1871 to date.

St. John's Church.—In consequence of the continued difficulty between the trustees of St. Mary's Church and Rt. Rev. Henry Conwell, D.D., Bishop of Philadelphia, and Rt. Rev. Francis Patrick Kenrick, coadjutor, Rev. John Hughes, then pastor of St. Joseph's Church, formed the design of erecting a church whose affairs should be conducted without trustees. On the festival of St. John, 1830, he received permission from Bishop Kenrick to undertake the erection of the desired church.

He accordingly announced to his congregation his purpose, and solicited donations toward the work. On Monday he waited at home to receive subscriptions; but he waited in vain. On Tuesday he was likewise disappointed; he began to feel discouraged. On Wednesday a servant-woman called upon him. "This is the first day, Father," said she, "since you spoke to us on Sunday, that I have been able to come out. I have brought my contribution for the new church." The sum was thirty-seven and one-half cents. "I took the money," said Father Hughes, "ran to my bedroom, and, throwing myself upon my knees, thanked God that the work was done. From that moment I never had a doubt of the success of my enterprise." Five thousand dollars were contributed by one individual, while M. A. Frenaye, so well known in connection with the church until his death, about ten years ago, contributed most munificently, and rendered valuable services toward the erection of the church. In February, 1831, Father Hughes purchased the ground on which the church stands; it is ninety-seven feet wide by one hundred and fifty-six feet long, and cost about thirteen thousand dollars. On Friday afternoon, May 6, 1831, the corner-stone

[1] See *Life of Mother Seton*, and *Catholic Herald*, Sept. 30, 1852.

was laid by Bishop Kenrick, assisted by Rev. John Hughes and Rev. T. J. Donahue, of St. Joseph's; Rev. William and Rev. Nicholas O'Donnell, and Rev. Michael Hurley, of St. Augustine's; Rev. Jeremiah Keiley, of St. Mary's, and Rev. M. Carroll, of Wilmington, Del.

Father Hughes in writing to the present Archbishop Purcell, of Cincinnati, Ohio, in September, 1831, says of the church, "It will cause those who give nothing toward its erection to 'murmur' at its costliness, and those who did contribute to be proud of their own doing. As a religious edifice, it will be the pride of the city. The leading Protestants and infidels proclaim it the only building that is entitled to be called a church, 'inasmuch as its appearance indicates its use, and there is no danger of mistaking it for a workshop.'"

Joseph Bonaparte presented to the sanctuary a "Flagellation of Christ," by Hannibal Caracci, said to be valued in London at one thousand guineas. Signor Monachesi, whose paintings decorate many of our churches, ornamented the sanctuary as a voluntary offering. The other portions of the edifice were decorated by the same artist, whose only compensation was a voluntary contribution of the congregation in December, 1832.

On Passion Sunday, April 8, 1832, the new church was opened for divine service, and dedicated by Bishop Conwell and Kenrick. A sermon on the "Marks of a True Church" was delivered by Rev. Dr. Power, of New York. The collection amounted to eight hundred and fifty dollars. Father Hughes thought the sermon injudicious, as many Protestants were present at his invitation. "The sermon caused some irritation and provoked controversy," and was a remote cause of the discussion between Father Hughes and Rev. John Breckinridge.

The 4th of July, 1832, was celebrated in St. John's Church by the citizens. A platform was erected in front of the altar. Father Hughes said, "The selection of St. John's was intended as a compliment to the Catholics and to the church." During that month Father Hughes had more converts than for a year previous. At the celebration the prayer was recited by Father Hughes.

At this church on Tuesday evening, April 29, 1833, Mozart's Requiem Mass was performed for the first time in this country. The exterior of the church had not yet been completely finished; so in October, 1833, an organization of a number of the congregation took place. They formed a society for the exterior finishing of the church so as to procure means for its completion, in order that it might be made to correspond with the interior decorations. This society had a president, three vice-presidents, two secretaries, a treasurer, and twenty members of financial committee. After the dissolution of the society, after having accomplished the object of the formation, the names of the members, alphabetically arranged, and of those who had been officers, were engrossed on parchment and deposited in the archives of the church. For some time after the erection of the church Father Hughes was alone in the pastoral charge. Rev. F. X. Gartland was sent to assist him in 1832. Father Gartland was frequently left in pastoral charge, as Father Hughes several times accompanied Bishop Kenrick on his episcopal visitations. In June, 1834, Father Hughes preached a sermon in behalf of the Polish exiles who were obliged to leave their native land after the suppression of the Polish Revolution. Two hundred and three dollars were contributed.

Father Hughes and his assistant labored energetically to liquidate the debts of the church, which was not yet wholly completed. Many of the creditors were urgent in their demands, while all appeals for money with which to pay this indebtedness were but feebly responded to. Father Hughes, as a last resort, determined to visit Mexico in order to collect the means necessary to satisfy the creditors. For this purpose he studied Spanish for six months, determined to go without the knowledge of his congregation. Preparations were accordingly made to start; during the celebration of mass one Sunday, a carriage awaited Father Hughes. But Father Gartland could not restrain his concern at the near departure of the pastor. Accordingly, he informed the congregation of what was Father Hughes' intention, and he appealed to the people for whom he labored not to allow their beloved pastor to undertake such a journey. George Edwards arose and offered one thousand dollars, twelve others gave five hundred dollars; and throughout the church there arose responses proving the generosity of the people and their love for Father Hughes. About four thousand dollars were thus subscribed. After mass a meeting was held in the pastoral residence; among those present here were Dr. Joseph Nancrede, Charles A. Repplier, Michael McGrath, George Edwards, Francis Tiernan, R. F. Walsh, and Mr. Blaim. Mr. Repplier was chosen treasurer; all agreed to secure the payment of about fifteen thousand dollars of the debt then pressing, and so pledged their faith to Father Hughes. The appeal of Father Gartland and this action of the influential members of the congregation had the desired effect, and the most urgent demands were paid.

Father Hughes continued to labor energetically for the dissemination of the faith and the interests of his people. In the years 1834–35 he was engaged in a now celebrated controversy and discussion with Rev. John Breckinridge. The Propaganda in the beginning of 1836 decreed the division of the diocese, the transfer of Bishop Kenrick to Pittsburgh, and the appointment of Rev. John Hughes as coadjutor to Bishop Conwell. The division not being sanctioned by the Pope, the elevation to the episcopacy of the founder of St. John's was reserved for a short time, and to a see where his services were more necessary.

The cost of the ground and the erection of St. John's Church was about seventy-three thousand dollars. At the time of the appointment of Father Hughes as coadjutor to Bishop Dubois, of New York, in November, 1837, the indebtedness on the church was forty thousand dollars. On Sunday, November 26th, he announced to his congregation the honor that had been conferred upon him, and likewise upon them, by his elevation to the responsibilities of a bishop. His ordination took place at New York Jan. 7, 1838. In a few weeks he returned to this city and celebrated his first pontifical mass at St. John's. On Sunday, Jan. 27, 1838, he preached a sermon for the benefit of the Ladies' Benevolent Society attached to the church. His text was, "The poor ye have always with you." Over four hundred dollars were collected. During this year Bishop Kenrick made St. John's his cathedral. On the transfer of Father Hughes to New York, Rev. F. X. Gartland became pastor.

Previous to 1839 the church had been lighted by chandeliers, but in the beginning of that year it was resolved to introduce gas. Bishop Hughes, learning of this determination, wrote to Mr. Frenaye, " You will ruin the church and be sorry for it when too late. Leave gas to the theatres, fancy stores, and toy-shops, but do not desecrate the church with the association which it will present to the eye. If not for my sake, I would beg for God's sake that you will not do this." He offered to give one hundred dollars to defray an expense that had been incurred. Now the new electric light is within a few feet of the church, and will, no doubt, in a short time supersede the gas that so displeased Bishop Hughes.

On March 2, 1840, a meeting of the friends of the St. Charles Seminary was held at this church for the purpose of organizing, on a more efficient plan than had heretofore been in operation, the various auxiliary societies of St. Charles Seminary that existed in the city. John Keating presided; Judge Randall and Louis Laforgue acted as secretaries. Addresses were delivered by Rev. Dr. Moriarty and Rev. Dr. O'Connor, president of the seminary, who presented a plan for the establishment of these societies.

In June, 1840, Bishop Kenrick issued a pastoral letter recommending the temperance pledge to his people. On the 28th of that month he delivered a sermon at this church on the subject, when the pastors and three hundred and twenty of the congregation received certificates of membership. A greater number would have done so at that time but for the want of certificates. Within a month over twelve hundred of the congregation had taken the pledge. The society then organized ceased to exist in 1877; Mr. Edward McGovern being its last president, the late Bernard Rafferty the last secretary, and Francis Cooper the last treasurer.

On July 28, 1840, Bishop Hughes again visited the scenes of his labors as a parish priest and the church he had founded. He had lately returned from a voyage to Europe. On the above date he delivered a sermon to his former parishioners. On the 28th of October a charity sermon, for the benefit of St. John's Asylum, was delivered by Very Rev. Dr. Power, of New York. Bishop Hughes was expected to speak, but was detained owing to the school controversy in New York. He sent Dr. Power as a substitute, saying it was the first time he had ever disappointed an engagement.

On Nov. 21, 1841, the Feast of the Presentation of the Blessed Virgin, Very Rev. Peter Paul Lefevre, administrator of diocese of Detroit, was consecrated bishop of that see. The ceremony was performed at St. John's by Bishop Kenrick, assisted by Bishop England, of Charleston, and Bishop Hughes, of New York. Pontifical mass was celebrated by Bishop Kenrick; Archpriest, Very Rev. Edward Barron, V.G.; Deacon, Rev. F. X. Gartland; Subdeacon, Rev. C. J. Carter; Master of Ceremonies, Rev. M. Maller, C.M., President of the Theological Seminary. The sermon was delivered by Bishop Hughes.

During the riots of May, 1844, Gen. Cadwalader placed Maj. Dithmar with a guard for the defense of the church. No attempt was made, however, to destroy or damage this the cathedral church.

On Sunday, Sept. 3, 1848, the pallium was placed by Bishop Kenrick on the Most Rev. P. R. Kenrick, Archbishop of St. Louis. Rev. Edward J. Sourin preached. On Thursday, July 23, 1846, the obsequies of Pope Gregory XVI. were celebrated at this church by pontifical mass sung by Bishop Kenrick. Sermon by Rev. J. P. O'Dwyer, O.S.A., pastor of St. Augustine's. The text of the discourse was, " Beloved of God and of men, whose memory is in benediction." D. Desmond, the Roman consul, the foreign consuls, and the city authorities were present.

Father Gartland continued in pastoral charge until 1850, at which time he received the appointment of Bishop of Savannah. He was *dignus* in the nomination. Thus, once again, was a pastor of St. John's elevated to the dignity and honor of a bishop. A number of the personal friends of Father Gartland, and members of his congregation, as a tribute to his services in behalf of religion, on receiving information of the honors and responsibilities conferred upon their beloved pastor, presented him with a purse containing one thousand and fifty dollars.

On the transfer of Father Gartland to the bishopric of Savannah, his assistant, Rev. Edward J. Sourin, became pastor.

On May 22, 1853, the church was consecrated by Bishop Neumann. In the evening he lectured for the benefit of the orphans. During this year this church contributed $5935.75 toward the erection of the cathedral.

On Sept. 12, 1854, Bishop Gartland, the former pastor of this church, died a victim to yellow fever. He was born in Dublin in 1808, came to this country at an early age, studied at Mount St. Mary's College,

and was ordained in 1832. The universal regret at the demise of this prelate was nowhere more sincere than in St. John's parish, where Father Gartland had labored. Sad were the hearts of the people when they assembled to assist at the celebration of pontifical requiem mass by Rt. Rev. Bishop Kenrick, on Wednesday, Sept. 27, 1854. In 1855, Rev. J. Sourin, S.J., was pastor, the Jesuits having been given charge of the church. In 1856, Very Rev. James Ryder, S.J., was pastor. He continued in the pastoral charge until 1857, when he was succeeded by Rev. John McGuigan, S.J., who was assisted by Rev. Father Paccharini, S.J. In 1858, Rev. John Blox, S.J., was pastor, assisted by Fathers Lachat and Ward. In 1860, January 9th, the funeral obsequies of Rt. Rev. John Neumann, late bishop of this diocese, took place at this church.

On April 27th, Rev. John Blox, the pastor, died. His assistants in the pastoral charge at this time were Fathers Lachat and Immasso, the latter of the seculars, and stationed at the church to assist the Jesuits.

In 1861 the Jesuits surrendered the control of the church, and Rev. John Brannagan, of St. Patrick's, was appointed pastor, in which position he remained but a few days, being transferred to the interior of the diocese. He was succeeded by Rev. John P. Dunn, of St. Theresa's, who continued in pastoral charge until his death, in 1869. During his pastorate he had been assisted by Rev. P. R. O'Reilly, the present rector, Rev. Richard Keenan, Rev. Father Immasso, Rev. Peter McGrane, Rev. John Fitzmaurice, at present rector of St. Agatha's Church, West Philadelphia, Rev. James Powers, and Rev. James Fitzmaurice, now rector of the Church of the Sacred Heart. On Feb. 27, 1861, Rt. Rev. Bishop Wood blessed the present bell. It weighs sixteen hundred and forty pounds. The present rector is Rev. P. R. O'Reilly, who has been stationed at St. John's for the past twenty years. He succeeded Rev. John P. Dunn in 1869.

St. John's parish extends from the south side of Vine to the north side of South, and from the west side of Ninth to the east side of Broad. This is a populous and wealthy district, and within it reside a number of influential Catholics, but as many who possess wealth are not the most liberal in its distribution, so to the working classes, principally, must be given the honor of contributing the means for the support of the church, as theirs was the first contribution toward its beginning.

The assistants to Rev. P. R. O'Reilly are Rev. J. Ferry, Rev. J. J. Donnelly, and Rev. P. Burke.

On Sunday, April 16, 1882, the commemoration of the fiftieth anniversary of the opening of the church was celebrated by solemn pontifical mass being offered by Rt. Rev. William O'Hara, D.D., Bishop of Scranton, Pa. The sermon was delivered by Rt. Rev. J. R. Shanahan, Bishop of Harrisburg, Pa. In the evening solemn pontifical vespers was sung by Bishop Shanahan, and the sermon was preached by Rt. Rev. Martin Crane, bishop of the diocese of Sandhurst, Australia.

St. Dominic's Church (Holmesburg).—The corner-stone of this church was laid Sept. 9, 1849, by Very Rev. F. X. Gartland. Rev. Dominic Berrill, O.P., was its first pastor, and remained until 1855, when he was transferred to St. Stephen's Church, Nicetown. He died May 11, 1856. His successor at St. Dominic's was Rev. M. A. McGrane. In 1867 he was transferred to Wilmington, Del., being succeeded by Rev. P. A. Lynch. He remained until 1870, when he was transferred to Bristol, his successor being Rev. Thomas W. Power, who, after a pastorate of two years, was appointed to build the church of St. Cecilia (now the Visitation). On Nov. 10, 1872, Rev. James O'Connor, D.D., formerly rector of St. Charles Seminary, was appointed pastor. He made many improvements. On Aug. 20, 1876, Dr. O'Connor was consecrated Vicar-Apostolic of Nebraska. On Oct. 8, 1876, Rev. Lawrence J. Wall, who had been first assistant at the church from June 22, 1872, was appointed rector, and still continues. He has added to the pastoral residence, purchased land for a cemetery, established a convent, and much improved the church.

St. Joachim's (Frankford).—The corner-stone was laid Sept. 28, 1845, by Rt. Rev. Celestin de la Hailandiere, Bishop of Vincennes, Ind., assisted by Rt. Rev. P. R. Kenrick and Rev. Dominick Forestal, the pastor. The ground was purchased on which to erect the church in 1843, but the riots of 1844 delayed the beginning of the edifice until 1845.

Rev. Dominick Forestal died in 1847, and is buried in St. Mary's Cemetery, South Fourth Street. In 1864, while Rev. John McGovern was pastor, a church was purchased from the Presbyterians and opened as a parochial school in care of Sisters of Immaculate Heart. In 1873 the old church was taken down, and on June 28, 1874, the corner-stone of the present church was laid by Most Rev. James F. Wood, archbishop. Rt. Rev. William O'Hara, Bishop of Scranton, preached; Right Rev. J. F. Shanahan, Bishop of Harrisburg, was present. On Oct. 20, 1880, the church was dedicated by Archbishop Wood. Rev. B. A. Maguire, S.J., preached. The present rector is Rev. J. P. Byrnes.

The Immaculate Conception (Front and Canal Streets).—The corner-stone of this church was laid Sept. 11, 1870, Rev. Michael A. Filan, now rector of the Church of the Annunciation, being its first pastor. On the festival of the Immaculate Conception, Dec. 8, 1872, the church was dedicated. In 1880 the parochial school was erected, and on August 29th dedicated. Early in 1881, Rev. M. A. Filan was transferred to the Annunciation Church as successor to Rev. J. McAnany, deceased. Rev. P. J. Daily, of the Annunciation, then became rector of the Immaculate Conception, and is such at present.

The Church of the Gesu, as it is now known, was formerly called the *new* St. Joseph's, and later the Holy Family. The lot for the church and college under the charge of the Jesuit Fathers was purchased Nov. 20, 1866. It is three hundred and ninety-five by two hundred and fifty-nine feet.

The corner-stone of the chapel of the Sacred Heart was laid June 24, 1868, and the building was opened and dedicated December 6th of the same year.

The parochial school, one of the largest and most complete school buildings in the city, was finished and opened in September, 1879. It is intended as the preparatory department of the Jesuit College contemplated to be erected.

The corner-stone of the new Church of the Gesu, supposed to be the largest non-cathedral church in the country, was laid Sunday, Oct. 5, 1879. The church now in course of erection will be similar in design to the Church of the Gesu in Rome. It will be two hundred and thirty feet on Eighteenth, and one hundred and fifteen feet on Stiles Street. The entire square, from Seventeenth to Eighteenth, and from Stiles to Thompson Streets, will be occupied by the church and college. The parochial school is on the southwest corner of Seventeenth and Stiles Streets, Rev. B. Villiger, S.J., being the rector.

St. Clement's Church is in Paschallville, West Philadelphia. This parish was organized in 1864, when Rev. A. J. Gallagher, first assistant at the Church of the Assumption, was appointed pastor of Darby parish. The Catholics of Darby and vicinity had been attending the Church of St. Mary's, at Kellyville, the corner-stone of which was laid Sept. 23, 1847. Within six weeks after Father Gallagher's appointment he had erected a temporary chapel, which was blessed under the title of St. Cecilia's.

In 1866 a bequest of ground was made by Clement Ewig, and the church-site was changed to it. On June 24, 1866, the corner-stone of the present St. Clement's Church was laid by Rt. Rev. J. F. Wood, the dedicatory sermon being delivered by Rt. Rev. John McGill, Bishop of Richmond, Va. Rev. A. J. Gallagher remained pastor four years, when he was succeeded by the present rector, Rev. Thomas O'Neill.

St. Elizabeth's Church (Twenty-third and Berks Streets).—The corner-stone of the temporary church was laid Sept. 22, 1872, and on December 22d of the same year it was blessed. It continued to be used for divine service until Dec. 23, 1883, when the basement of the present church, the corner-stone of which was laid May 27, 1883, was blessed.

From the founding of the parish, in 1872 to 1878, Rev. Bernard Dornhege resided in apartments over the then church. Other portions were used during that time, and are now, as a parochial school. In 1879 the third story and the present pastoral residence were erected. In December, 1881, a lot on Islington Place, in the rear of the church, was purchased, and upon the erection of a pastoral residence on this lot the present parsonage will be occupied by the Sisters engaged in the parochial school.

Father Dornhege has been assisted during his rectorship by Rev. F. X. George (died May 26, 1880) and by Rev. John J. O'Reilly (died Nov. 24, 1880). His present assistants are Rev. John F. Lynch, appointed Feb. 1, 1881, and Rev. Michael E. Mulligan, appointed Jan. 1, 1884.

St. Bonifacius (Diamond Street and Norris Square). —The corner-stone of this church was laid Dec. 9, 1866, by Rt. Rev. J. F. Wood; sermon by Rev. A. Grundtner, pastor of St. Alphonsus. Rev. John W. Gerdemann, pastor. He afterward apostatized and married. On July 14, 1867, the church was dedicated. In 1876 the Redemptorist Fathers took charge of the church, burdened with a very heavy debt. The rector is Rev. F. X. Schnüttgen, C.SS.R., who has been in charge since July, 1877.

St. John's Church (Manayunk) was erected about 1830. In 1834 it was enlarged at an expense of two thousand dollars, and on Dec. 14, 1834, it was reopened. High mass was celebrated by Rev. Stephen L. Dubuisson, S.J.; Rt. Rev. F. P. Kenrick preached. Rev. Charles H. J. Carter was pastor. Rev. James A. Brehony is the present rector.

The Church of the Visitation is on Lehigh Avenue east of Front Street. This parish was established under the name of St. Cecilia in 1872, when in November Rev. Thomas W. Power, pastor at St. Dominic's, Holmesburg, was appointed to build a church upon the lot of ground corner of Cambria and C Streets. He erected a temporary chapel, and on Christmas day, 1872, blessed it by permission of Bishop Wood. He remained until September, 1874, when he resigned the pastorship. His successor was Rev. P. J. Garvey, D.D., who remained until the next month, when he was succeeded by Rev. A. D. Filan. On Feb. 5, 1875, Rev. Thomas J. Barry was appointed. He secured the permission of the archbishop, and changed the site of the church to its present location, and the title to the Visitation. The corner-stone of the present church was laid Oct. 22, 1876, by Archbishop Wood. The erection of the magnificent church was completed, and on Sept. 9, 1883, it was dedicated by Rt. Rev. William O'Hara, D.D., Bishop of Scranton; sermon by Rt. Rev. J. F. Shanahan, D.D., Bishop of Harrisburg. In the evening Monsignor Capel, the distinguished English priest, lectured.

The Church of St. Vincent de Paul is in Germantown. The corner-stone was laid Sept. 12, 1849, by Rt. Rev. F. P. Kenrick. Rev. M. Domenec, afterward Bishop of Pittsburgh, was the first pastor. The church was dedicated in 1851, and in 1857 was enlarged.

On July 18, 1875, the corner-stone of St. Vincent's Seminary was laid, and on Nov. 9, 1879, the chapel of the Immaculate Conception, attached to it, was dedicated.

On March 28, 1880, Rev. James Knowd, aged seventy-six, died, and also, on Nov. 26, 1883, Rev. James Rolando, C.M., president of St. Vincent's Seminary.

The Church of Our Lady of the Nativity, Belgrade Street, Port Richmond, was founded in 1882, being dedicated on Aug. 22d of that year. Rev. L. Helger, C.SS.R., is rector.

St. Bridget's Church (Falls of Schuylkill) was founded in 1853, when the corner-stone was laid. Rev. E. McMahon was the first pastor; Rev. James Cullen succeeded, followed by Rev. Thomas Fox, until his death, Dec. 30, 1874. Rev. Richard O'Connor succeeded him until his death, Jan. 31, 1883. Rev. Michael F. Martin is now rector, with Rev. John Keul assistant.

The Church of the Assumption of the Blessed Virgin (Manayunk) was built in 1849 for the use of the German Catholics. It was dedicated Jan. 6, 1850, by Rev. Louis Condenhove, C.R., by permission of Bishop Kenrick, who preached in English, Father Condenhove in German. Rev. F. J. Martersteck is the present rector, Rev. Herbert Hammeke assistant.

Polish Catholic Chapel.—At Friendship Hall, East Norris and Sepviva Streets, the Polish Catholics have a chapel; Rev. Emil Kattein, chaplain. On Sept. 12, 1883, the two hundredth anniversary of the rescue of Vienna by John Sobieski III., king of Poland, was commemorated. Mass was celebrated by Rev. Emil Kattein, assisted by Rev. James Regney and Rev. H. M. Effertz. Rev. Hubert Schich, rector of St. Alphonso's Church, spoke in German, and Father Kattein in Polish.

All Saints' Church (Bridesburg) was dedicated on Sunday, Feb. 3, 1861, by Rev. Father Helmpraecht, C.SS.R., of New York. Rev. John McGovern, of Frankford, preached. The corner-stone was laid Aug. 15, 1860, by Father Carbon, pastor of Holy Trinity Church. Father Carbon preached in German, and Father Dausch in English. On Feb. 20, 1874, Rev. Rudolph E. Kuenzer, then pastor, died. Rev. John F. Fechtel, the present rector, is assisted by Rev. Henry Effertz.

The Church of the Sacred Heart of Jesus (on Third Street, below Reed).—The temporary chapel was dedicated Dec. 10, 1871; Rev. Thomas F. Hopkins was the pastor. The corner-stone of the present church was laid on Pentecost Sunday, May 19, 1872, and the church was dedicated Sept. 30, 1877. Rev. James J. Fitzmaurice has been the rector since Nov. 24, 1876. The assistant priests who labored at this church were Rev. Francis Keane, Rev. F. McNamee, Rev. John J. Ward, Rev. Thomas F. Shannon, Rev. John J. McElroy, and Rev. William Loughran, under Rev. Thomas F. Hopkins, Rev. A. D. Filan, Rev. S. B. Spalding, Rev. B. F. Ruxton, and Rev. Thomas A. Logue under the present rector.

St. Malachi's Church (on Eleventh Street above Master) was founded in 1851. Rev. John Kelly was the first pastor. He died Feb. 2, 1874, aged fifty-two years, and was succeeded by Rev. Edmund F. Prendergast, the present rector. In 1865 the church was greatly improved. The assistants to Father Prendergast are Rev. M. A. Mullen, Rev. William Egan.

St. Mary Magdalene di Pazzi is on Marriott Street, below Eighth. Before its founding Rev. De la Piance assembled the Italian children of that locality for religious instruction every Sunday afternoon in St. Paul's Church. On March 21, 1852, a meeting of Italian Catholics was held in St. Joseph's schoolroom, to consider the adoption of measures by which a church could be had.

In August, 1852, Bishop Neumann gave the use of the Cathedral Chapel to the Italians, and about six hundred assembled every Sunday. On Sept. 24, 1852, a small church used by colored Protestants, on Marriott, below Eighth Street, was purchased, and on the 23d of the following month was opened by Rev. Cajetan Mariani, late of Florence, Italy, and Knight Honorary of the Order of St. Joseph in Tuscany, who had come to America in 1851, and for a time was professor of music in the Seminary of St. Charles Borromeo.

An increase in the congregation rendered a new and larger church necessary. Accordingly, on May 14, 1854, the corner-stone of a new church was laid. Rev. J. M. Guigan, S.J., preached. The church was dedicated in November, and Father Mariani continued to serve the people bodily as well as spiritually until his death, March 8, 1867. He wrought many cures of diseases. Rev. Cajetan Sorrentini then became pastor. Rev. James Rolando succeeded him for a short time. Rev. Joseph Rolando then became rector; then Father Cicaterri, S.J.; then Father Rolando again. On Oct. 14, 1870, Rev. Antonio G. Isoleri, the present pastor, was appointed. In 1873 the parochial school was built, and in 1874 the Missionary Sisters of Third Order of St. Francis were placed in charge of it, and continued until August, 1882. In 1876 St. Mary Magdalene di Pazzi Orphan Asylum for girls was opened at 913 South Seventh Street. It continued until Aug. 26, 1882, when the orphans were placed in the Catholic Home.[1]

On Oct. 14, 1883, the corner-stone of the present church was laid by Rt. Rev. J. F. Shanahan, D.D., Bishop of Harrisburg, who spoke in English, and Rev. Father Cassini, of Harrisburg Diocese, in Italian. Pope Leo XIII. sent his blessing by cablegram.

This church, the founder, Father Mariani, declared, in a circular issued in 1854, to be the first Italian church in the United States.

The Cathedral of Sts. Peter and Paul.—The Cathedral Church of the Archdiocese of Philadelphia is located at Logan Square. M. A. Frenaye, in 1846, purchased the ground from the Farmer's Life and Trust Company of New York. On June 29,

[1] On Feb. 9, 1878, a requiem mass for the repose of the soul of Victor Emmanuel, king of Italy, was celebrated. On the 18th a similar service was performed for the repose of the soul of Pope Pius IX.

1846, Bishop Kenrick issued a pastoral letter declaring that the anxiety manifested for several years by the clergy and laity, and the assurance of generous support given him, determined him to undertake the erection of a suitable building. On the evening of July 26th following, a meeting in favor of the project was held in St. John's school-room, eight hundred persons being present. Very Rev. F. X. Gartland presided, and addressed the meeting. Rev. E. J. Sourin also spoke, saying that though many thought the location too far westward, "yet time would soon prove that worshipers will not be wanting to cover the pavement of the projected cathedral. On August 18th the lines of the building were laid out, and on Sept. 16, 1846, the corner-stone was laid in the presence of eight thousand persons. The collection

THE CATHEDRAL OF STS. PETER AND PAUL.

Digitized by Google

amounted to eleven hundred and forty-eight dollars. The corner-stone was the gift of James McClaranan. It is a massive block of white marble, weighing one and a half tons. The foundation walls were laid under the direction of John Nailis, and cost $9716.16.

The ground on which the cathedral is built is one hundred and thirty feet wide by two hundred and sixteen feet long, and cost sixteen thousand nine hundred dollars.

Meetings were held and collections made annually under authority of Bishop Kenrick until his transfer, in 1851, to be Archbishop of Baltimore. Like efforts were made under Bishop Neumann, his successor. In April, 1857, Rt. Rev. James F. Wood, coadjutor to Bishop Neumann, came to Philadelphia, and observing the inconveniences to which the Catholics of the city were subjected, determined to erect a chapel for their use. Accordingly this was done, and on Dec. 13, 1857, it was dedicated.

On Sunday, Sept. 13, 1859, the large gilt cross was raised. Addresses were made by Rt. Rev. Bishop Spalding, of Louisville, Ky., afterward Archbishop of Baltimore, and Rev. Hugh McLaughlin, of St. Ann's. On Jan. 5, 1860, Bishop Neumann died. On Easter Sunday, 1862, religious services took place in the cathedral for the first time, when vespers was recited by Bishop Wood, Very Rev. Dr. O'Hara, and others.

On Sunday, Nov. 20, 1864, the cathedral was dedicated by Bishop Wood; Archbishop Spalding, of Baltimore, preached. Archbishops Purcell, of Cincinnati, McCloskey, of New York, and Bishops Fitzpatrick, of Boston, Timon, of Buffalo, Domenec, of Pittsburgh, Bayley, of Newark, Farrell, of Canada, Laughlin, of Brooklyn, McFarland, of Hartford, Goesbriand, of Burlington, Vt., Luers, of Fort Wayne, Lynch, of Toronto, and Rt. Rev. B. Wiemer, Mitred Abbot of Latrobe, Pa., were present. A bronze medal, three inches in diameter, was struck at the mint by order of Bishop Wood, in commemoration of the event. On March 20, 1867, the remains of Bishops Egan and Conwell were removed to this cathedral, and with requiem services interred beneath the grand altar. The cathedral is erected according to original plans of Fathers Maller and Tornatori, then of the Theological Seminary. Napoleon La Brun arranged the plan and superintended the work for a time; his successor was John Notman. The Church of St. Charles in Rome is the model after which the cathedral is erected. This grand edifice was begun by Bishop Kenrick, continued by Bishop Neumann, completed and adorned by Archbishop Wood. A native of Ireland began it, a native of Bohemia continued it, a native of the United States finished it,—all nations worship in it. On May 23d the first Provincial Council of Pennsylvania met at this cathedral. On Oct. 20, 1882, the late Archbishop Wood issued an appeal in order to secure funds to build the grand altar, to renovate and improve the church, to pay the debts "so that the cathedral might be consecrated." For this purpose fifty thousand dollars were needed. The altar, costing ten thousand dollars, has been erected.

James Frederic Wood was born in Philadelphia, at the southwest corner of Second and Chestnut Streets, April 27, 1813. His parents were both English, his father being a native of Manchester and his mother of Gloucestershire. They came to this country in 1809 and settled in Philadelphia, where Mr. Wood engaged in business as a merchant and importer. The son, James Frederic, received his elementary education in a school on Dock Street. In November, 1821, he was sent to England, to the grammar school attached to the Church of St. Mary de Crypt, in Southgate Street, Gloucester, where he remained for more than five years. He then returned to Philadelphia and attended the school of Mr. Sanderson, on Market Street. In November, 1827, he went to Cincinnati and there obtained a situation in the Branch Bank of the United States as chief clerk. He was speedily advanced to the position of individual bookkeeper and discount clerk. In 1833 he was appointed paying and receiving teller of the Franklin Bank of Cincinnati, the capital of which was one million dollars. He was appointed cashier of the same bank in the year 1836.

Shortly before this he was converted to the Catholic faith, and was baptized on the 7th of April, 1836, by the Most Rev. Archbishop Purcell; and in September, 1837, he resigned the office of cashier in the Franklin Bank, and in October, of the same year, went to Rome to study for the priesthood. He entered the College of the Propaganda as a subject of the Diocese of Cincinnati. He remained at Rome nearly seven years, diligently prosecuting his studies in the sacred sciences. During this time he won the confidence and esteem of the authorities of the College of the Propaganda, and was appointed by them Prefect of Discipline.

At the completion of his studies in the college he was ordained priest on March 25, 1844, by Cardinal Fransoni, Prefect of the Sacred Congregation of the Propaganda. Returning to this country, he arrived at Cincinnati in the beginning of October, 1844. He was appointed assistant rector of the cathedral at Cincinnati, which position he efficiently filled for nearly ten years, when he was assigned the pastorate of St. Patrick's Church, of the same city.

While in the active discharge of his duties as pastor of St. Patrick's he received the bull appointing him Coadjutor Bishop of Philadelphia, with the right of succession. He was consecrated bishop by the Most Rev. Archbishop Purcell on April 26, 1857, twenty-one years after his reception into the church, and thirteen years after his ordination. Bishop Wood immediately proceeded to Philadelphia, and on his arrival here, in the beginning of May, 1857, entered upon the fulfillment of the duties of his office, taking charge specially of the financial affairs of the diocese.

These were in such condition, owing to the magnitude of the important ecclesiastical undertakings commenced, but not as yet completed, the then comparative paucity and poverty of the Catholic population of the diocese, and a number of other circumstances, that the administration of them required great exertions and skillful management. To this Bishop Wood specially devoted himself, and with great success. By judicious management and by vigorously urging forward the system of diocesan collections the means were secured for continuing the erection of the cathedral, and sustaining other important religious works. Without waiting for the completion of the cathedral itself, Bishop Wood erected the present cathedral chapel, and organized the cathedral parish. The parish grew rapidly from the time of its organization and the erection of the chapel, and it is now one of the strongest parishes in the city.

On the demise of Bishop Neumann, Jan. 5, 1860, Bishop Wood succeeded to the title and full administration of the diocese. Through his efforts the work of completing the cathedral was carried on with such vigor that it was dedicated Nov. 20, 1864. The cathedral chapel was enlarged, a number of churches partly erected were completed, and the building of others was commenced, and in the course of time finished and opened for divine worship. Additional religious orders were introduced into the diocese, and the charitable institutions already existing were enlarged and strengthened. Among these may be specially mentioned the Sisters of the Good Shepherd, the Servants of the Immaculate Heart of Mary, the Sisters of the Third Order of St. Francis Assisium, the Little Sisters of the Poor, and others. The Catholic Home for Destitute Orphan Girls, 1720 Race Street, was established, and the orphan asylum known as St. Vincent's Home, Eighteenth and Wood Streets, was enlarged.

In 1862, at the invitation of his Holiness Pius IX., Bishop Wood went to Rome and was present at the canonization of the Japanese martyrs, and again in 1867, at the celebration of the eighteen hundredth anniversary of Sts. Peter and Paul. He was also present at the opening of the Vatican Council on Dec. 8, 1869, and participated in its deliberations for several months. He was then compelled by severe illness to leave Rome, and as soon as his health permitted he returned home, but before his departure from Rome he placed on record his belief in the infallibility of the Holy Roman Pontiff and his desire that it should be defined as a dogma of faith. He arrived in New York, on his return, on April 4, 1870, and, after resting there a few days, proceeded to Philadelphia, where an enthusiastic public reception was given him by the clergy and laity of the diocese, on the afternoon of April 7th, in the Cathedral of Sts. Peter and Paul.

Between 1870 and 1875, when the see was raised to a higher rank, and its prelate with it, Bishop Wood continued to give the full measure of his ability to the conduct of the affairs of the diocese and to develop that executive force and theological diplomacy for which he afterward became distinguished. The prudence which guided him in the ecclesiastical sphere was seen in his reserved and reticent attitude on many public questions, upon which there is a strong temptation for men in his position to pronounce. Content with being a good citizen, he carefully abstained from politics and forbade their presence or discussion in the church. But he never flinched from taking a decided stand on questions or movements that threatened the church, the State, or society at large. There appears to be no doubt that in the wise adjustment of the boundaries of the several sees made from the original diocese of Philadelphia, Bishop Wood suggested most of the plan, and was instrumental in the organization of the separate ecclesiastical districts. Much of his labors during the few years before 1875 appear to have been directed generally to the complete organization and equipment of the sees over which he was called a little later to preside. The great event in the history of the diocese and in the life of its prelate took place in 1875, when the Holy See appointed James Frederic Wood archbishop of the new ecclesiastical province of Philadelphia. The date of his creation was the 15th of February. At the same time that a cardinal was given to America and several of the far Western sees were raised to more important positions, Philadelphia was given an archbishop. On June 17th, with appropriate and elaborate ceremony, with distinguished prelates from other parts of the country around him, and with the assured reverence and affection of the great body of the church, he received the sacred emblems of his office.

In May, 1880, occurred the Provincial Council at Baltimore. In this Archbishop Wood took a prominent part, helping to shape its course, and sharing in those acts that were intended to solidify and harmonize the affairs of the church. On April 26, 1882, the silver jubilee of the consecration of Archbishop Wood was celebrated by a solemn pontifical mass and sermon at the cathedral. This was the twenty-fifth anniversary of his elevation to the bishopric of Philadelphia. Bishop Shanahan, of Harrisburg, delivered the sermon on this occasion, which was a day marked with a white stone in the history of the Catholic Church in this city. Bishop O'Hara, of Scranton, was also present, and a host of lesser ecclesiastical dignitaries. Congratulations came from all quarters, Rome, Ireland, and many parts of the United States. The students of the American College in Rome addressed the archbishop in felicitous Latin verse, and engrossed addresses came from the Lazarist Fathers of Germantown and from the Redemptorist body of this city.

Though in his seventieth year and much crippled

and debilitated by disease, the tireless prelate set about completing the work which would remain the crowning act of his busy and useful life. The cathedral on Eighteenth Street, though in use for divine service for many years, and to the casual observer seemingly finished, yet required much labor and great expenditure to make it all he wished to see it and had intended it should be. The grand altar was to be built, handsome pews take the place of the temporary ones, and the whole vast interior be fitly decorated. Besides, a debt of twenty-five thousand dollars remaining due on the building had to be paid. He set about accomplishing all this and hoped to see his task completed, and the noble structure then solemnly consecrated to God forever. Nigh half-way to the finish had the work progressed when death came upon him in the midst of his labors. Shortly before midnight on Wednesday, June 20, 1883, he breathed his last. He had completed his seventieth year on the 26th of April previous. The solemn obsequies of the illustrious archbishop took place in the cathedral on Tuesday, the 26th. They were the most impressive ever celebrated in this city.

Distinguished ecclesiastics in great numbers from every part of the country were in attendance. The presence of the mayor, presidents of Councils, judges of the courts, and prominent citizens, irrespective of creed, gave evidence of the high esteem in which Archbishop Wood was held by the entire community.

Maternity of the Blessed Virgin Mary is at Bustleton. The corner-stone was laid Oct. 2, 1870, by Bishop Wood. The ground was presented by John B. Williams.

On Dec. 11, 1870, it was opened for divine service by Rev. John McGovern, pastor of St. Joachim's Church at Frankford. It is forty-six by seventy feet, and cost five thousand five hundred dollars. Its pastors have been Revs. J. F. Kelly (died May 14, 1871), John Loughran, J. Ward, H. Garvey, J. O'Byrne, M. J. Armstrong, James A. Brehony, M. P. O'Brien, D. S. Bowes, B. J. Conway, and Rev. A. P. Haviland, the present rector.

St. Alphonsus (German) Church is located at the southwest corner of Fourth and Reed Streets. The corner-stone was laid June 19, 1853, by Bishop Neumann. Father Regis was the first pastor. On March 4, 1860, the church was dedicated by Bishop Wood; sermon delivered by Very Rev. P. E. Moriarty, O.S.A. Father Nicola was then pastor. In July he was succeeded by Father Alphonse, of Syracuse, N. Y. The year following, Rev. Alphonsus M. Zoeller and Rev. Anthony Rossadowski were pastors. Rev. Anthony Grundtner succeeded; he died Aug. 13, 1876. His successor was Rev. John B. Maus. On his transfer to Allentown, Rev. Hubert Schick, of Holy Trinity, was appointed rector, and is at present in charge.

St. Ann's Church (on Lehigh Avenue and Cedar Street).—The corner-stone was laid July 4, 1845, by Very Rev. F. X. Gartland, assisted by Rev. P. Rafferty and Rev. D. McDevitt. Sermon by Rev. Dr. Manahan, of New York. Father McDevitt was the first pastor. In November, 1846, the church was dedicated by Very Rev. F. X. Gartland. Sermon by Bishop Hughes, of New York. In 1847, Rev. Hugh McLaughlin was appointed pastor, and continued such until his death, in 1865. On December 21st a new organ was used for the first time, when pontifical mass was celebrated by Bishop Gartland, of Savannah. On July 29, 1866, the corner-stone of a new church was laid adjoining the old church.

The present rector is Rev. Thomas Kiernan, who succeeded Father McLaughlin in 1865.

St. Stephen's Church (Nicetown).—On Sept. 21, 1843, the corner-stone was laid by Bishop Kenrick, who also preached the sermon. On Monday, Jan. 1, 1844, it was dedicated by Rev. M. Maller, C.M., president of the Theological Seminary. Sermon by Rev. E. J. Sourin. In 1846, Rev. M. Domenec, afterward Bishop of Pittsburgh, was pastor. On Feb. 21, 1848, the remains of Dr. John Michael Brown were removed from Miss Dickinson's field, on the road from Nicetown to Frankford, to St. Stephen's graveyard, Bishop Kenrick and other clergymen present at reinterment. This ceremony took place in the belief that the remains were those of a priest who died in 1750. Subsequent investigation proves that he was a physician. It is probable that in his house mass was celebrated, and thus came the tradition that he was a priest. On May 11, 1856, Father Berrill, the pastor, died. In 1857 the pastor was Rev. Eden McGinnis, and in 1859, Rev. Dr. Bulfe. In 1861, Rev. John D. Davis was pastor. In 1871, Rev. E. J. Martin was pastor, and in 1875, Rev. John Kelly. The present rector is Rev. William A. McLaughlin. He has purchased ground at northeast corner Broad and Butler Streets, on which to erect a new church.

The Church of the Annunciation is located at Tenth and Dickinson Streets. The corner-stone was laid April 15, 1860, and the church opened for service Christmas day, 1860. Rev. John McAnany was pastor until his death, Christmas day, 1880. Rev. M. A. Filan was appointed his successor, and is at present in charge. The church was completed and dedicated in 1863.

In 1881 the property northeast corner Tenth and Dickinson Streets was purchased, and a convent of the Sisters of the Immaculate Heart founded.

St. Francis Xavier's Church (Twenty-fifth and Biddle Streets) was erected in 1839 under the direction of Rev. M. O'Connor, afterward Bishop of Pittsburgh, which see he resigned to become a Jesuit. He died in Baltimore Oct. 18, 1872. The church was opened for divine service on the first Sunday of Advent, 1839, when Very Rev. P. E. Moriarty, O.S.A., delivered the sermon. On June 6, 1841, the church was dedicated by Bishop Kenrick. Father O'Connor was succeeded

by Father Whelan. He was succeeded in 1842 by Rev. P. Rafferty, who remained until his death, in 1863. In 1843 the church was enlarged. After the death of Father Rafferty, Rev. James Maginn, the present rector, was appointed. On Jan. 23, 1880, he celebrated with his people the twenty-fifth anniversary of his ordination.

The Assumption Church is situated on Spring Garden Street, below Twelfth. The corner-stone was laid on May 21, 1848, by Bishop Smith, of Glasgow, Scotland, then on a visit to this city. Bishop Kenrick preached. Rev. C. J. Carter was the first pastor and continued rector until his death, Sept. 17, 1879, when Rev. A. D. Filan, the present rector, was appointed. On Nov. 11, 1849, the edifice was dedicated by Very Rev. F. X. Gartland; sermon by Rt. Rev. Ignatius A. Reynolds, D.D., Bishop of Charleston, S. C. On Sept. 11, 1859, the church was consecrated by Bishop Neumann; sermon by Bishop Spalding, of Louisville, Ky. The celebrant of the mass was Bishop Wood. Rt. Rev. R. P. Miles, Bishop of Nashville, Tenn., was present.

St. Teresa's Church (corner of Broad and Catharine Streets) was founded in 1853, the corner-stone being laid by the present rector, Rev. Hugh Lane. On May 29, 1853, Rev. Dr. Manahan, of New York, preached. On Christmas day of the same year the church was opened for service. Rev. Nicholas Cantwell, rector of St. Philip's, celebrated the first mass. In 1859 Rev. John P. Dunn acted as pastor until the return (in 1860) of Father Lane. In 1868 the large school adjoining the church was erected. It cost thirty thousand dollars, and was paid for in two years. In 1876 the Convent of the Sisters of the Immaculate Heart, No. 1514 Christian Street, was purchased, and a select school opened. A new convent is to be erected on Broad Street adjoining the parochial school.

The Church of St. Edward the Confessor (at Eighth and York Streets) was formerly a Protestant Episcopal Church. It was purchased by Archbishop Wood and dedicated as a Catholic Church by him on Nov. 26, 1865. Very Rev. Dr. O'Hara, Bishop of Scranton, Pa., preached. Very Rev. Edw. McMahon, formerly vicar-general of the Diocese of Pittsburgh, was the first pastor, and so remained until his death, Oct. 7, 1873. His successor, Rev. P. F. Sullivan, is the present rector.

On Sunday, May 6, 1883, the corner-stone of a new St. Edward's Church was laid by Very Rev. M. A. Walsh, V.G. Rev. Jos. V. O'Connor preached. Ten years' litigation resulted from the sale of the church to the Catholics, but the final decision was in favor of Archbishop Wood.

St. Agatha's Church (Thirty-eighth and Spring Garden Streets).—The old church was at the corner of Thirty-sixth and Sycamore Streets, and was formerly the Protestant Episcopal Church of St. Andrew, and was erected by Judge Peters and others in 1821. In 1865, it was purchased for nine thousand dollars by Bishop Wood. On Oct. 10, 1865, Rev. John Fitzmaurice was appointed pastor, and has since continued in charge. On Oct. 20, 1865, the church was dedicated by Bishop Wood, assisted by Rev. M. F. Martin, Rev. John Fitzmaurice, and Rev. John P. Dunn. Bishop Wood preached. In 1870 the church was enlarged, and the congregation increased so that, in 1874, it was necessary to purchase the site of the present church. The lot cost twenty-eight thousand dollars. The corner-stone of the new church was laid on the 18th of October, 1874, by Rt. Rev. James F. Wood, D.D., who preached the dedicatory sermon. The edifice was completed in 1878, and was dedicated on the 18th of October, in that year, by Archbishop Wood; sermon by Rt. Rev. J. F. Shanahan, D.D., Bishop of Harrisburg. The dedicatory mass was celebrated by Rt. Rev. William O'Hara, D.D., Bishop of Scranton. This church cost one hundred and sixty thousand dollars.

St. Charles Borromeo Church is situated at the southwest corner of Twentieth and Christian Streets. The corner-stone was laid July 19, 1868. A temporary frame chapel was erected for the use of the people until the parish church was completed. On April 9, 1871, the basement was dedicated, and used for church service until the completion of the church, in 1876. On May 7th of that year it was dedicated, the empress of Brazil being among the number present.

Rev. James O'Reilly, now pastor at Keene, N. H., was the first rector, and continued so until May, 1877, when he was succeeded by Rev. Nicholas Walsh, the present rector.

St. James' Church (at Thirty-eighth and Chestnut Streets, West Philadelphia) dates from 1850. On July 14th of that year the first meeting was held at the first house in Mary Street, below Chestnut, to receive subscriptions. Rev. J. V. O'Keefe was pastor. On Aug. 4, 1850, the corner-stone was laid by Right Rev. P. R. Kenrick. Rev. Richard O'Connor was pastor from 1854 to 1862, when he went to Rome, and became professor of English in a college. He returned to this country, and died Jan. 3, 1883, as pastor of St. Bridget's Church, Falls of Schuylkill. Rev. Michael F. Martin became his successor at St. James'. He remained until Nov. 9, 1874, when he became pastor of St. Mary's, on the death of Rev. George Strobel. Rev. Francis O'Neill then became pastor. He died suddenly at Saratoga, N. Y., Aug. 8, 1882. Rev. Patrick J. Garrey, D.D., then became rector, and continues to the present time.

Our Mother of Sorrows Church is situated at the Cathedral Cemetery, West Philadelphia. It is the second church built there. The first was called St. Gregory's. It was founded soon after the purchase of the forty-three acres for cemetery purposes, in 1849.

On Nov. 1, 1867, the corner-stone of the present church (Our Mother of Sorrows) was laid by Rt. Rev. J. F. Wood, D.D. Rev. Francis A. Sharkey

was its first pastor, and continued so until his death at Liverpool, England, on April 10, 1881. He was succeeded by Rev. John W. Shanahan, the present rector. The church was dedicated to divine service on Sept. 28, 1873. In September, 1879, the parochial school was opened. In March, 1882, a Sunday-school was opened in Haddington for the Catholic children of that locality. It is attended to by one of the assistant priests. Father Shanahan has for assistants Rev. James F. Shields and Rev. John J. Denver.

St. Veronica's Church is situated at Second and Butler Streets, on a portion of the ground of the New Cathedral Cemetery. The cemetery contains forty-one acres, and was on Aug. 30, 1868, consecrated by Rt. Rev. William O'Hara, D.D., Bishop of Scranton. On June 2, 1872, the corner-stone of the church was laid, and on September 23d it was dedicated. The church was erected by Very Rev. M. A. Walsh, D.D., when pastor of St. Michael's Church. The present rector is Rev. W. A. Power, who succeeded Rev. William F. McLaughlin.

St. Peter's Church.—In 1841 there existed but one German Catholic Church in Philadelphia, that of the Most Holy Trinity, corner of Spruce and Sixth Streets. At that time a number of Catholic Germans, living in the northern part of the city, petitioned Bishop Francis Patrick Kenrick for permission to build a new church in that part of the city and to obtain the services of a proper priest. The bishop granted the former permission upon condition that at least fifty men subscribed to the request. Thereupon a much larger number of names was referred to the prelate. Seeing the necessity of organizing a new congregation, the bishop advised these men to send a committee to Rev. Father Alexander Czvitkovicz, the Superior of the Redemptorists in America, to induce him to undertake the charge of the intended church and parish. Father Alexander showed himself willing, provided the new congregation collected at least one-third of the money necessary for building the church. The bishop on his part promised the Fathers a sum of money which he was about to receive from Vienna for the support of German churches. Father Rumpler, who in absence of Father Alexander, then in Europe, had charge of affairs, wrote, July 12, 1841, that he gave permission for the erection of the church, provided the title thereof be in the hands of the bishop.

In the following year the ground southeast corner of Fifth Street and Girard Avenue was bought for eleven thousand seven hundred dollars.

Toward the end of 1842, Rev. Father Louis Cartuyvels came and began the organization of the congregation. Two frame buildings which stood on the lot when purchased were converted into a temporary church and dwelling-house for the Fathers. But preparations were made at once for the erection of a new church. The corner-stone was laid on Aug. 15, 1843, by the Rt. Rev. Francis Patrick Kenrick. At the request of the faithful, the new church was dedicated to the Apostle St. Peter. The first congregation that assembled in the temporary church numbered only about two hundred persons. Nevertheless, a parochial school was started at the same time, thus securing a Christian education to the children. About a hundred children formed the first school.

Rev. Father Cartuyvels, the first Superior, was in 1844 succeeded by Rev. Father Joseph Fey, C.SS.R., who had charge of this church and congregation until August, 1848, when he was recalled to Europe by his Superiors. During the anti-Catholic riot of 1844, during which St. Augustine's and St. Michael's Churches were burned by the mob, the building of St. Peter's was not interfered with; nevertheless watch was kept day and night.

Toward the close of 1845 the church was finished, and on December 29th it was blessed and opened for service. In 1846 the decorations of the interior were finished, and on Feb. 14, 1847, the church was solemnly consecrated by Bishop Kenrick. The church is built in the Roman style, one hundred and sixty-six feet long and sixty-four feet wide.

Two months after the consecration a mission was given by a number of Redemptorist Fathers, and thus the apostolic labors of the Fathers in the city of Philadelphia were effectually inaugurated. The work of salvation was continued by the Fathers who succeeded from time to time in charge of this congregation up to the present day. The number of faithful continually increased. In course of time, however, several other German parishes were formed as circumstances required. The following are the Superiors who, in succession, had charge of St. Peter's Church: After the departure of Rev. Father Fey, 24th of August, 1848, Rev. Father Louis Condenhove was appointed. About the same time the Sisters of Notre Dame took charge of the girls' school, and in 1853 the Christian Brothers of the boys. Father Condenhove was succeeded, in 1853, by Rev. Father Benedick Bayer, whose administration was, however, of short duration, as he died on March 16, 1854, after having rendered signal services to the order to which he belonged. His successor was Rev. John Hespelein, and toward the close of 1855 Rev. Father Robert Kleineidaur succeeded. During the latter's administration the steeple of the church was finished and three bells placed therein.

In April, 1859, Rev. Father Lawrence Holzer became Superior, who displayed a special energy in bringing about the erection of the German Orphan Asylum at Tacony. On the 5th of January, 1860, the Redemptorist Fathers were most painfully affected by the sudden death of Bishop John N. Neumann, who was a member of their order, and as such doubly dear to them. In 1861, Father Holzer was replaced by Rev. Father Anthony Urban, and the latter's administration closed in May, 1862, when Rev. William Luehrmann was appointed for the next three years.

In August, 1865, Rev. Father John D. Dycker became Superior. He erected the new school-house in 1867, which accommodates over one thousand children. His successor, Rev. William Loewekamp (1868–74), had the church completely renovated and frescoed, and purchased a new organ, which cost twelve thousand dollars.

He was succeeded, in 1874, by Rev. Father George Sniet, who, at the most earnest request of the archbishop, and with the consent of the higher Superiors of the order in 1875, took charge of the church and congregation of St. Bonifacius, near Norris Square, on Diamond Street. Rev. Father Michael Holans took his place at St. Peter's until 1880, when the present incumbent, Rev. Father Joseph Wirth, was appointed rector.

St. Michael's Church is situated on Second Street, above Master, on ground of New Amsterdam, a town once projected there. The ground was purchased as early as 1831, and by notice in the *United States Gazette* lots for burial purposes were offered for sale. On Jan. 15, 1833, a public meeting in favor of building the church was held at Commissioners' Hall, when three thousand dollars were subscribed. On Easter Monday, April 8, 1833, the corner-stone was laid by Bishop Kenrick, assisted by Rev. Michael Hurley, Rev. John Hughes, and Rev. Terence J. Donaghoe (the pastor), Rev. Jeremiah Keiley, Rev. William Whelan, Rev. Nicholas O'Donnell, O.S.A., Rev. Tolentine de Silva, Rev. James Foulhouze, and Rev. F. X. Gartland.

When completed, the church was in the Gothic style of the twelfth century, according to designs of William R. Crisp.

The altar-piece was a rich and beautiful painting of St. Michael the Archangel, by Guido, and once the property of Cardinal Fesch, uncle of Napoleon Bonaparte.

On Sept. 20, 1833, the church was so far completed as to allow of its dedication by Bishop Kenrick. The venerable Bishop Conwell, then over eighty years of age, was present. High mass was celebrated by Rev. Terence J. Donaghoe, pastor; Rev. Edward McCarthy, S.J., deacon; Rev. Patrick Costello, subdeacon; Rev. John Hughes, pastor of St. John's, preached the dedicatory sermon, his subject being the sacrifice of the new law for which Christian temples are erected.

Application was made to the Legislature of Pennsylvania for the act of incorporation, which was in due time passed, and the affairs of the corporation of St. Michael's have been from that day to this directed and superintended by a board of trustees, composed of six laymen, the pastor of the church, and the bishop of the diocese, who is *ex officio* president of the board.

A handsome female seminary was also erected at the corner of Second and Phœnix [now Thompson] Streets, and here the educating and training of the minds of the young was intrusted to the good Sisters of Charity.

During the riots of 1844 this church and convent were destroyed by fire. The keys of the church were given by Rev. John Loughran to Capt. Fairlamb, who, searching the church, found neither arms nor men secreted; the front door was left unlocked, rioters entered, passing through the military, and set fire to the sacred edifice. The bare walls told the tale of that night's destruction. The convent was also destroyed, houses of the "Irish" were attacked, and many killed on both sides.

In six days after the destruction of the church Father Donaghoe had a temporary one erected. On Aug. 24, 1846, the corner-stone of the present church was laid by Bishop Kenrick; sermon delivered by Rev. E. J. Sourin. In October following a storm of wind and rain destroyed the eastern wall. On Feb. 7, 1847, the new church was dedicated; Bishop Kenrick preached. In December, 1847, a verdict for twenty-seven thousand dollars was given for the destruction of the church in the riot of 1844. In November, 1844, a verdict of $6468.98 was given against the county for the destruction of the school-house.

In 1845, Rev. T. J. Donaghoe went to Dubuque, Iowa, and Rev. William Loughran became pastor. In 1860 he returned to Ireland, and there died. On July 17, 1856, the Sunday-school gave an excursion on the North Pennsylvania Railroad to Fort Washington. At Camp Hill Station an accident occurred by which fifty-nine persons were killed. Among the number was Rev. Daniel Sheridan, an assistant at the church. A public subscription of thirteen thousand nine hundred dollars was made to relieve the distress occasioned by this accident.

Rev. Thomas Keiran became pastor in 1860, after the death of Father Loughran. He remained such until the death of Rev. Hugh McLaughlin, pastor of St. Ann's Church, Port Richmond, in 1865, when he was transferred to that church, where he still remains. Father Keiran was succeeded by Rev. Maurice A. Walsh, who is now pastor of St. Paul's Church, vicar-general, and administrator of the archdiocese since the death of Archbishop Wood. On Sept. 20, 1866, the church was consecrated by Archbishop Wood. Father Walsh was succeeded at St. Michael's in 1879 by Rev. C. P. O'Connor, D.D., the present rector, who is assisted by Rev. M. Lawlor, Rev. James E. Cleary, and Rev. P. J. Tierney.

St. Paul's Church (situated on Christian Street, between Ninth and Tenth).—The corner-stone of this church was laid May 7, 1843, by Rt. Rev. F. P. Kenrick, Bishop of Philadelphia, assisted by a number of priests. The hall of the commissioners of Moyamensing, directly opposite, was placed at the disposal of the clergymen, where they robed prior to the services. The collection amounted to four hundred and sixty dollars.

The church was opened for divine service on Sun-

day, Dec. 17, 1843, when Rev. Dr. O'Connor preached. On January 21st, Bishop Hughes, of New York, preached at the late mass, when a collection in aid of the building fund was taken up.

During the riots of May, 1844, Gen. Patterson, on May 9th, placed Capt. Fairlamb in charge of the militia guarding this church.

On July 4, 1847, the church was dedicated by Bishop Kenrick. The sermon was delivered by Very Rev. Dr. McGill, afterward Bishop of Richmond, Va.

On Nov. 26, 1861, the church was destroyed by fire. Rev. P. F. Sheridan, pastor, was at the time in Ireland. It was rebuilt, and on Sept. 21, 1862, was reopened for divine service by Rt. Rev. J. F. Wood.

In 1867 the hall of the commissioners of the district of Moyamensing, opposite the church, was purchased for thirteen thousand five hundred dollars and opened as a convent of the Sisters of the Immaculate Heart. It had been used during the war as a military hospital.

On July 9, 1879, Rev. P. F. Sheridan, the pastor, died. He was succeeded by the Very Rev. Maurice A. Walsh, D.D., vicar-general and at present the administrator of the archdiocese. On July 8, 1880, he and his people celebrated the twenty-fifth anniversary of his ordination as a priest.

St. Patrick's Church.—In 1839, Rt. Rev. F. P. Kenrick rented a frame house at the corner of Nineteenth and Rittenhouse Streets for the use of the Catholics of the neighborhood as a chapel. It had been brought from near the navy-yard, and had been used as a vinegar-factory and carpenter-shop.

On June 5, 1841, a meeting was held in it to take steps to erect a church. Dr. Nancrede presided, with D. Dule as secretary. Addresses were delivered by Very Rev. M. O'Connor (afterward Bishop of Pittsburgh), Fathers Carter and Dunn, Dr. T. J. P. Stokes, and William A. Stokes. The contributions were seven hundred dollars.

The corner-stone was laid July 4, 1841, by Bishop Kenrick; Very Rev. P. E. Moriarty, O.S.A., preached. On December 5th the church (one hundred by sixty feet) was dedicated by Very Rev. M. O'Connor, V.G. Mass was celebrated by Rt. Rev. P. P. Lefevre, D.D., of Detroit; sermon by Rt. Rev. P. R. Kenrick, of St. Louis.

The first pastor was Rev. Daniel McDevitt. He was succeeded by Rev. William O'Hara, who remained until consecrated Bishop of Scranton, Pa., on Aug. 12, 1868. He was succeeded by Rev. P. A. Nugent, of St. John's Church, Manayunk. He resigned and went to Europe. His successor was the present pastor, Very Rev. J. E. Mulholland, appointed 12th of May, 1869. On Nov. 19, 1871, the church was consecrated by Rt. Rev. William O'Hara, D.D., Bishop of Scranton, assisted by Rev. James E. Mulholland as archdeacon, Rev. Francis P. O'Neill and Rev. Anthony Shields as deacons, Rev. M. A. Ryan and Rev. J. J. Boyle, masters of ceremonies. Sermon by Rev. Thomas F. Hopkins. Father Mulholland is assisted by Rev. Thomas W. Power, Rev. Luke McCabe, and Rev. Charles J. Vandergrift.

St. Philip's Church.—The corner-stone of this church (Queen Street, below Third) was laid in 1840 by Rt. Rev. John Hughes, Bishop of New York. On Sunday, May 9, 1841, the church was dedicated by Bishop Kenrick. High mass was celebrated by Rev. J. P. Dunn, the pastor; the collection amounted to five hundred dollars. This was intended to be a "free" church, to depend upon voluntary collections for its support, and no revenue was to be derived from the renting of pews. After a brief trial, however, this plan was abandoned.

On June 30, 1841, a meeting was held at the church for the purpose of raising funds and to hear the financial report for the year. Hon. Judge Doran presided, John Maher was secretary. The report showed that fourteen thousand dollars had been collected during the year, and that thirteen thousand nine hundred and forty-one dollars had been expended. Collectors for each square were appointed, and seven hundred dollars were subscribed. Addresses were made by Bishop Kenrick, Fathers Dunn and Carter, Judge Doran, and Dr. Maurice Morrison, of Buenos Ayres.

On Oct. 25, 1841, after being closed several weeks for plastering, the church was reopened. Bishop Kenrick delivered the sermon.

During the riots of 1844 the "Native American" rioters attacked the church on July 6th and 7th, and attempted to set it on fire.

On May 9, 1844, Gen. R. Patterson detailed the Lafayette Light Guards, Lieut. Pearce, and the Independent Rifles, Capt. Florence, to protect the church, a duty in which they succeeded.

Rev. John P. Dunn was pastor, and Rev. Nicholas Cantwell, assistant. He is now the venerated pastor of the church. He was ordained at St. Mary's Church on Nov. 4, 1841.

On June 30, 1847, a solemn high mass was celebrated at St. Philip's by Abbe de Massip for the repose of the soul of Daniel O'Connell, the Irish patriot. A funeral discourse in the Irish language was delivered by Rev. M. F. Jennings, O.S.F., of Galway, Ireland, from the text, "Remember, man, thou art but dust."

The Diocesan Synod of 1853 having instituted in the diocese of Philadelphia the devotion of the forty hours' exposition of the blessed sacrament on the festival of Corpus Christi in this year, the first celebration of this devotion in the diocese took place at this church.

On June 21, 1857, the church was consecrated by Bishop Neumann, assisted by Bishop Wood and Rev. Nicholas Cantwell as assistant priest, Rev. N. O'Brien of the seminary as archdeacon, Rev. David Whelan as deacon, and Rev. Robert Reilly as subdeacon. Solemn high mass was celebrated by Bishop

Wood, Rev. John Loughran being assistant priest, and Robert Reilly and Rev. John McAnany, deacon and subdeacon.

In January, 1860, the present stained-glass windows (nineteen and a half by three feet six inches) were placed in the church. They were made by George Morgan & Brother, of New York, and cost three thousand dollars.

The Diocese of Philadelphia was founded by Pope Pius VII., by decree of April 8, 1809. Rev. Michael Egan, pastor of St. Mary's Church, was appointed the first bishop. He was consecrated at Baltimore, Oct. 28, 1810. He died July 22, 1814. Rt. Rev. Henry Conwell became bishop in 1820, died in 1842. Rt. Rev. Francis Patrick Kenrick, D.D., consecrated coadjutor June 6, 1830, translated to Baltimore, 1851, died July 8, 1863. Rt. Rev. John Nepomucene Neumann, D.D., C.SS.R., consecrated March 28, 1852, died Jan. 5, 1860. The late Most Rev. James Frederic Wood, D.D., was consecrated coadjutor *cum jure successionis*, April 26, 1857, in Cincinnati, created archbishop June 17, 1875, died 1883. On Feb. 12, 1875, Philadelphia was erected an archdiocese. On June 17, 1875, the pallium was received by Archbishop Wood, who, since June, 1862, had been assistant at the pontifical throne. The archdiocese was, on the Feast of St. Teresa, Oct. 15, 1875, consecrated to the Sacred Heart of Jesus. It is under the patronage of Our Blessed Lady Conceived without Sin and of the Apostles Sts. Peter and Paul.

"According to the census of 1880, the church in the United States counted 6,200,000 Catholics in 11 archdioceses, 48 dioceses, 8 apostolic vicariates, and 2 apostolic prefectures, with about 5000 priests, 6000 churches and chapels, 600 colleges and academies, and 350 charitable institutions."

The following statistics show the condition of the archdiocese: churches, 127; in course of erection, 7; chapels, 53; stations, 31; priests, 260; priests in college, 35; students in seminary, 106; at Rome, 4; ecclesiastical institutions, 3; colleges, 3; Brothers of the Christian schools, 51; Franciscan brothers, 4; orders of religious women, 13; number of religious women, novices and postulants, 1020; schools of the Christian Brothers, 9; schools of Franciscan Brothers, 1; number of boys taught by Christian Brothers, 3587; academies and select schools for young ladies, taught by Sisters, 26; parochial schools, 59; number of scholars, 22,000; number of scholars at academies and select schools taught by Sisters, 2100; orphan asylums, 6; number of orphans,—boys, 495; girls, 503; total, 998; hospitals, 4; widows' asylum, 1; homes for aged poor, 2; conferences of St. Vincent de Paul, 27; Catholic population, 300,000.

LIST OF CATHOLIC CHURCHES IN PHILADELPHIA.

Cathedral of St. Peter and St. Paul, Eighteenth Street, opposite Logan Square. Rev. John J. Elcock, rector; Rev. D. A. Brennan, chancellor and secretary; Rev. Thomas F. Shannon, Rev. James P. Sinnot, Rev. Alexander A. Gallagher, assistants.

All Saints, Bridesburg, corner Brown and Bockius Streets. Rev. John F. Fechtel; Rev. Henry Effertz, assistant.

Annunciation, Tenth and Dickinson Streets. Rev. Michael J. Filan, rector; Rev. William Masterson, Rev. D. O'Connor, Rev. Robert Clancey.

Assumption, Spring Garden Street, below Twelfth. Rev. A. D. Filan, rector; P. J. Wynne, Rev. Thomas Logue.

Assumption of the Blessed Virgin, Oak Street, Manayunk. Rev. F. J. Martersteck, rector; Rev. Herbert Hammeke.

Chapel of Little Sisters of the Poor, Eighteenth Street, above Jefferson. Chapel services by the Fathers of the Society of Jesus, at the Gesu.

Church of the Gesu, Seventeenth and Stiles Streets. Rev. B. Villiger, S.J., Rev. Peter Blenkinsop, S.J., Rev. Charles Cicaterri, S.J., Rev. Alphonse Coppens, S.J., Rev. J. A. McHugh, S.J., Rev. P. Claven, S.J., Rev. Livius Vigilante.

Church of the Sacred Heart, Third Street, below Reed. Rev. J. J. Fitzmaurice, pastor; Rev. S. B. Spalding.

Holy Trinity (German), northwest corner Sixth and Spruce Streets. Rev. E. O. Hiltermann; Rev. J. Kemmerling, assistant.

Immaculate Conception, Front and Canal Streets. Rev. P. J. Dailey, D.D., rector; Rev. Joseph O'Keefe, J. J. Clark, assistants.

Maternity of Blessed Virgin Mary, Bustleton. Rev. A. P. Haviland.

Our Lady of Consolation, Chestnut Avenue, Chestnut Hill. Rev. F. J. McShane, O.S.A., Rev. John Emmett, O.S.A., Chestnut Avenue.

Our Lady of the Nativity, Alleghany Avenue and Belgrade Street. Rev. Q. Hilger, C.SS.R.

Our Lady of the Visitation, B. V. M., Front Street and Lehigh Avenue. Rev. Thomas Barry, pastor; Rev. Joseph A. Strahan, Rev. John Cox, assistants.

Our Mother of Sorrows, Forty-eighth Street and Lancaster Avenue, Hestonville. Revs. John W. Shanahan, rector; James F. Shields, John J. Denvir.

Polish Congregation, Sepviva and Norris Streets. Rev. Emil Kattein.

St. Agatha, Thirty-eighth and Spring Garden Streets. Rev. John E. Fitzmaurice, Rev. P. W. Brannan, Rev. Richard Tobin.

St. Alphonsus, southwest corner Fourth and Reed Streets. Rev. Hubert Shick, pastor; Rev. A. Mersch.

St. Ann, Lehigh Avenue and Cedar Street. Rev. Thomas Kiernan, rector; Rev. Thomas F. Mullen, Rev. Francis J. Quinn, and Rev. Owen P. McManus, assistants.

St. Augustine, Fourth Street, below Vine. Rev. Peter Crane, O.S.A., Very Rev. P. A. Stanton, O.S.A., Rev. Henry A. Fleming, O.S.A., and Rev. N. J. Murphy, O.S.A.

St. Boniface, Diamond Street and Norris Square. Very Rev. Francis X. Schnüttgen, C.SS.R., Superior and pastor; Rev. Ferdinand A. Litz, C.SS.R., Rev. Francis Frischbier, Rev. G. Hilger, C.SS.R., Rev. Leonard Schwabl, C.SS.R., Rev. Louis Zinnen, C.SS.R.

St. Bridget, Falls of Schuylkill. Rev. John Keul.

St. Charles Borromeo, Twentieth and Christian Streets. Rev. Nicholas J. Walsh, rector; Rev. James C. Wynne, Rev. Peter McCullough, Rev. Francis P. Dougherty, and Rev. P. J. Mellon, asistants.

St. Clement, Seventy-first Street and Woodland Avenue. Rev. Thomas O'Neill, Rev. John F. Graham.

St. Dominic, Holmesburg. Rev. Lawrence Wall, Rev. P. A. Quinn.

St. Edward the Confessor, corner Eighth and York Streets. Rev. P. F. Sullivan, rector; Rev. John J. Rodgers, Rev. John P. Connell.

St. Elizabeth, southeast corner Twenty-third and Berks Streets. Rev. Bernard Dornhege, pastor; Rev. John F. Lynch, Rev. M. E. Mulligan, assistants.

St. Francis Xavier, Twenty-fifth and Biddle Streets. Rev. James Maginn, Rev. William Meigher, Rev. Michael Sculley.

St. James, Thirty-eighth and Chestnut Streets. Rev. P. J. Garvey, Rev. Edmund E. Rowan, Rev. Joseph H. O'Neill, Rev. William Craig.

St. Joachim, Pine Street, above Franklin, Frankford. Rev. J. P. Byrne; Rev. Michael C. Donovan, assistant.

St. John the Baptist, Manayunk. Rev. James A. Brehony, pastor; Rev. F. P. Fitzmaurice, Rev. J. Campbell.

St. John the Evangelist, Thirteenth Street, above Chestnut. Rev. P. R. O'Reilly, Rev. J. J. Ferry, Rev. J. J. Donnelly, Rev. P. F. Burke.

St. Joseph, Willing's Alley, below Fourth Street. Rev. Joseph M. Ardia, S.J., pastor; Rev. A. Romano, S.J., Rev. P. A. Jordan, S.J., Rev. Patrick Duddy, S.J., Francis O'Neill, S.J., Rev. Blasius A. Skiffini.

St. Malachi, Eleventh Street, above Master. Rev. Edmond F. Prendergast, pastor; Rev. M. A. Mullin and Rev. William Egan.

St. Mary, Fourth Street, above Spruce. Rev. Ignatius F. Horstmann, D.D., pastor; Rev. Joseph Kelly.

St. Mary Magdalene di Pazzi, Marriott Street, above Seventh. Rev. Antonio Isoleri, appointed missionary.

St. Michael, Second and Jefferson Streets. Very Rev. Charles P. O'Connor, D.D., pastor; assistants, Rev. M. J. Lawlor, Rev. James E. Cleary, Patrick J. Tierney.

St. Patrick, Twentieth Street, below Locust. Rev. J. E. Mulholland, pastor; Rev. T. W. Power, Rev. Charles Vandergrift, Rev. L. V. McCabe.

St. Paul, Christian Street, above Ninth. Very Rev. Maurice A. Walsh, V.G., pastor. Rev. William Walsh, Rev. R. F. Hannagan, Rev. Walter P. Gough, assistants.

St. Peter, Fifth Street and Girard Avenue. Redemptorist Fathers; assistants, Rev. Joseph Wirth, C.SS.R., Rev. Joseph Hovestadt, C.SS.R., Rev. John B. Hotz, C.SS.R., Rev. Matthias Kuborn, Rev. Louis Dolch, Rev. T. A. Timmer, Rev. Leonard Lentsch, Rev. Peter Ewald, C.SS.R.

St. Philip de Neri, Queen Street, above Second. Rev. N. Cantwell, Rev. H. McGlynn, Rev. James Trainor, Rev. Francis Trainor.

St. Stephen, Nicetown. Rev. William McLaughlin.

St. Teresa, Broad and Catharine Streets. Rev. Hugh Lane, Rev. Thomas Toner, Rev. P. Beresford, Rev. Henry Hesson.

St. Veronica, Second and Butler Streets. Rev. William Power.

St. Vincent de Paul, Price and Evans Streets. Rev. P. V. Byrne, C.M., Rev. J. P. Neck, C.M., Rev. J. J. Hennelly, C.M.

St. Vincent, corner Ash and Bocklus Streets, Tacony. Rev. G. J. Freude, Rev. J. Scheld.

St. Vincent Orphan Asylum. Rev. G. J. Freude.

THE METHODISTS.

The first Methodist society in Philadelphia was formed in 1768, probably under the administration of Capt. Webb, who was a British quartermaster in Albany, N. Y. The first class consisted of seven persons. At first the meetings were held near the drawbridge which then spanned Dock Creek at Front Street on the Delaware, and the services were conducted in a sail-loft, the use of which was obtained from a sail-maker whose name was Croft. This was the date of the organization of the first society. Some thirty years before George Whitefield, so well known for his fervor and eloquence, had visited Philadelphia and had produced a profound impression. He had gathered around him a number of earnest Presbyterian ministers, who assisted him in his revival meetings. So great was the effect that it was represented that the theatres were closed, and "all books except such as treated of religion were unsalable." In a few months, however, Whitefield died in England, and no further effort was made at that time to establish Methodist services. Some, however, who remembered Whitefield, were favorably disposed toward Mr. Wesley's ministers when they subsequently arrived. Dr. Wrangel, also a Swedish missionary, who had labored in Philadelphia, on his return to Europe, advised his friends in Philadelphia to attend the meetings of Mr. Wesley's ministers, should they arrive, and a few of his followers at once united with the society. Worship was held in the sail-loft which occupied the spot where the building Nos. 248 and 250 South Water Street now stands, until the fall of 1769, when Messrs. Boardman and Pilmore were sent by Mr. Wesley to preach in New York and Philadelphia. Mr. Pilmore began by preaching on the State-House steps on Chestnut Street, and afterward addressed large audiences on the race-ground, in what was called Centre Square. In a letter to Wesley, he informs him that the congregation numbered about one hundred. The society, however, remained small, as in 1771, when Francis Asbury arrived, there were only between thirty and forty members in the city.

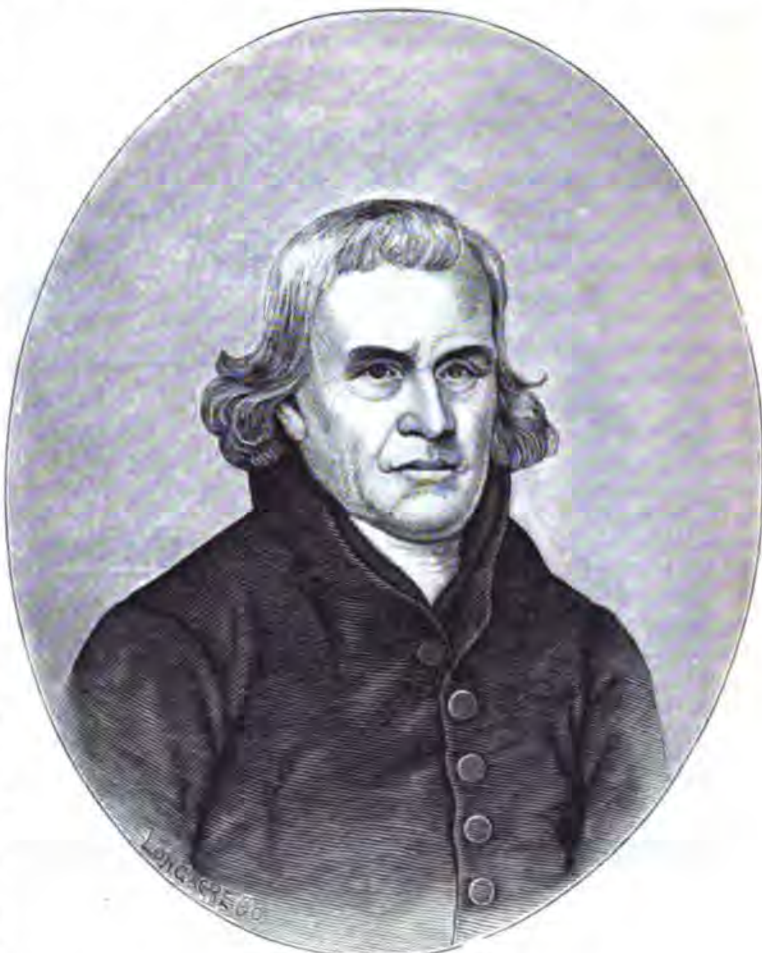
In November, 1769, an unfinished building, which had been commenced by some members of the German Reformed Church of St. George, and who had become largely indebted, was sold at public sale. It was purchased by a gentleman who, a few days afterward, conveyed it to the Methodist Society for six hundred and fifty pounds, Pennsylvania currency. Though unfinished, religious services were immediately held in this building, which for years had no other name than the preaching-house, though afterward it was named St. George's, and has been so officially recognized ever since. It was not only the first Methodist Church edifice in Philadelphia, but is to-day the only church edifice belonging to Methodism in the United States now standing that was erected before the commencement of the present century. When Methodism was thus introduced, the leading churches of other denominations had been occupying the territory, some of them for nearly one hundred years. The Churchmen, Friends, Presbyterians, German Reformed, and Baptists were comparatively strong. The progress of the first church was very slow, as in a few years the excitement of the Revolution became great, and during the occupancy of the city by the British troops St. George's Church was used as a riding-school for cavalry. After the Revolution closed, in 1783, the society was still small; its members, however, though few, were very earnest, and a number of remarkable conversions took place. Though the congregations were weak, some noted men occasionally attended. A note in John Adams' diary, in

CAPT. THOMAS WEBB.

Google

1774, speaks highly of Capt. Webb's "fluent and eloquent preaching." The opposition excited, however, was strong. Pamphlets against Methodism were published, and most extravagant denunciations were made. In October, 1771, Francis Asbury, who had been sent as a missionary by Mr. Wesley, arrived in Philadelphia. He was the apostle of Methodism in America. Though he had been preceded by several excellent ministers, no one had attempted a thorough organization until he came. He not only labored in Philadelphia and New York, but traveled extensively along the Atlantic seaboard. In July, 1773, the first annual Conference was held in this city. It was attended by nine ministers, of whom only six took appointments, but circuits were organized covering a large part of New Jersey, Delaware, Eastern Pennsylvania, and Maryland, with the city of New York. At that time one hundred and eighty members were reported for Philadelphia, but it should be remarked that this included not only the city, but all the members in Eastern Pennsylvania and in Northern Delaware.

In May, 1774, the second annual Conference was also held in this city, showing a membership which had almost doubled during the year, though the largest increase had been in Maryland and Virginia. In 1775 the third Conference in Philadelphia was held, showing a like increase throughout the country generally, though the growth in Philadelphia was not so large. The excitement of the Revolutionary war scattered their membership, and, as has been said, greatly retarded the work. In 1776, owing to the unsettled state of Philadelphia, the annual Conference was held in Baltimore. Subsequently it convened in that city, and in other places farther south until the war closed. At that time ministerial changes were very frequent. Mr. Pilmore, Mr. Boardman, Mr. Shadford, Mr. Asbury, and others, successively occupied the pulpit. All of these, however, left the country shortly after the Revolutionary war commenced and returned to England, excepting Mr. Asbury, who remained steadily attached to the fortunes of American Methodism. Earnest young men were, however, admitted to the ministry, and during the whole period of excitement the number of ministers and of members constantly increased throughout the Middle States. The membership in Philadelphia, however, was greatly diminished. In 1776 it was 137; in 1777, 96; in 1779, 89; in 1780, 90; and in 1783, 119. After the war, in 1784, the number rose to four hundred and seventy, but this embraced the places adjacent to the city also. St. George's Church, which had been occupied by the British cavalry, was left in a very bad condition. The congregation was weak. A rough board floor was put down on the east end of the church, while the other half was an earthen floor. The seats were rough, and the pulpit was simply a square box. In 1779, Rev. Freeborn Garrettson, a native of Maryland, a minister of great earnestness, was sent by Bishop Asbury to build up St. George's, and the bishop himself, two years afterward, raised two hundred and seventy pounds for the ground-rent, and four years subsequently raised five hundred pounds more to assist the church. During all this time the members of the Methodist society labored under peculiar difficulties. They were considered simply as members of a society;



BISHOP FRANCIS ASBURY.

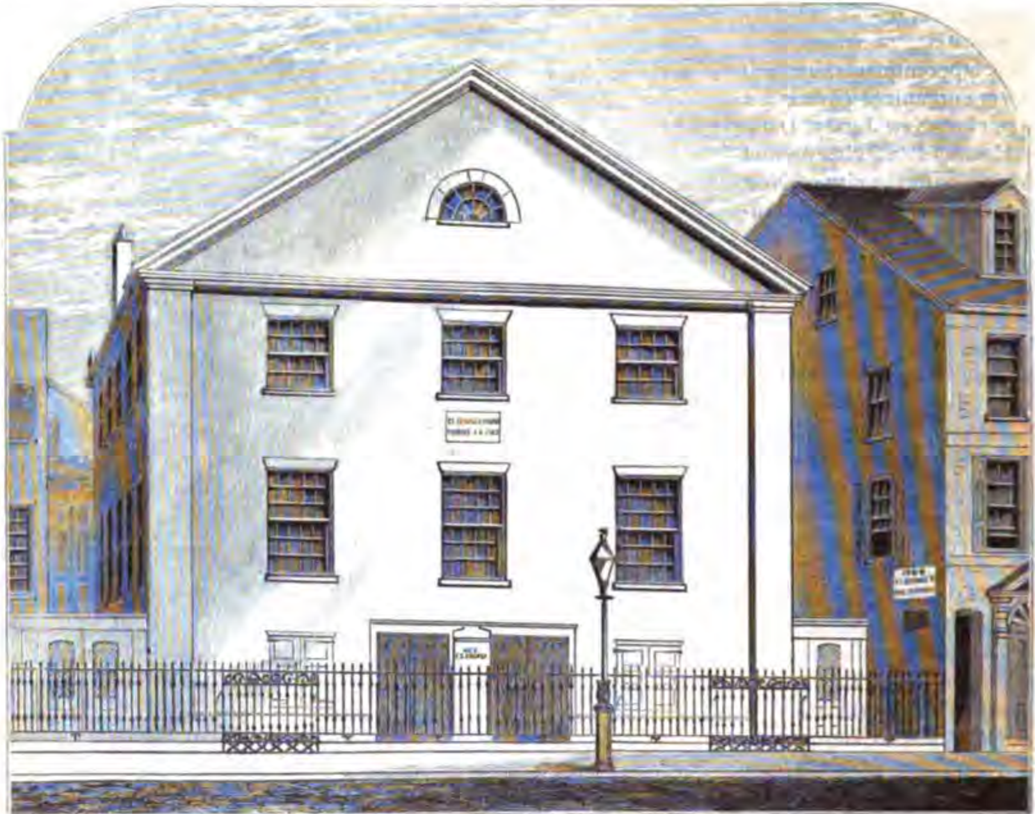
their ministers were not ordained, and the members went to other churches for baptism and the Lord's Supper; they held a membership in the Episcopalian or Presbyterian, or some other church, as well as being members of a Methodist society. During the war some of the ministers of the Church of England left the country. Other churches also were greatly disorganized, and the Methodists were anxious to be organized into a separate church, that they might have the benefit of the ordinances from time to time. This state of things continued until 1784, when Mr. Wesley, assisted by some ministers of the Church of England, ordained Dr. Thomas Coke as superintendent or bishop of the Methodist society, and requested that Francis Asbury should be associated with him. Dr. Coke, accompanied by Richard Whatcoat and Thomas Vasey, sailed from England for the United States, and Bishops Coke and Asbury first met in November, 1784, at Barratt's chapel, Delaware. Messengers were sent out to request the attendance of all the ministers in Baltimore at Christmas to hold a Conference and determine various matters in reference to the organization of the Church. Mr. Wesley had prepared a copy of his minutes and directions to ministers, and he also prepared a Sunday service and a liturgy abridged from that of the Church of England, which he deemed suitable for the American churches.

The famous Christmas Conference in Baltimore commenced on the evening of Dec. 24, 1784, and closed Jan. 2, 1785. At this session the Methodist Episcopal Church was organized, and the outlines of the present Discipline were adopted. Francis Asbury was elected as joint superintendent or bishop with Bishop Coke, and was ordained by him, and a number of the ministers were elected deacons, and a few elected as elders. At this time the number of ministers amounted to eighty-three, and the membership to fourteen thousand nine hundred and eighty-eight. The Conference also took incipient measures to establish a school at Abingdon, Md., to be called Cokesbury College, and Bishops Asbury and Coke were very earnest in making collections for it. It opened under favorable auspices, and was doing great good, but in ten years the building was destroyed, probably by an incendiary. Another building was secured in Baltimore, but it was subsequently destroyed, accidentally, by fire. The early ministers, though they met in Maryland, were of one mind in reference to slavery, and in their minutes said, "We do hold in the deepest abhorrence the practice of slavery."



ST. GEORGE'S METHODIST EPISCOPAL CHURCH.

The membership of St. George's continued to in-

crease, and about 1789 a prayer- and class-meeting was established in the southern part of the city, which developed, in 1790, into a separate church, which was called Ebenezer. The building was of brick, of small dimensions, and of the plainest style. It was located on the east side of Second Street, between Catharine and Queen Streets. This building gave way, in 1813, to a larger one, on Christian Street, between Third and Fourth, and this again was rebuilt in 1851. In its cemetery a number of the earlier ministers rest in peace.

In 1789 a book concern, or publishing-house, was projected by Bishop Asbury and Rev. John Dickens, and a few small publications were issued and put on sale. This enterprise started on six hundred dollars, borrowed capital, but so enlarged that in 1804 it had accumulated a capital of forty-five thousand dollars. The prevalence of the yellow fever and its ravages in Philadelphia a few years previous had produced an unfavorable feeling as to the location of Philadelphia, and in 1804 the book concern was moved to New York. In 1796 an association was organized to aid in the support of superannuated ministers, called the chartered fund, and was located in Philadelphia.

R Allen

During the early years of the church the colored people worshiped in the gallery of St. George's, but in 1794 a separate church was organized by Richard Allen and others, who were men of more than ordinary ability. Some difference of opinion took place between the colored and the white churches. The colored members complained of inequality and of injustice. Their church, however, continued in ecclesiastical relations with the other churches until 1816, when it became an independent church, and organized with other churches what is known as the African Methodist Episcopal Church, and elected Richard Allen as bishop. In 1796 a second colored church was organized in Brown Street, between Fourth and Fifth, and was called Zoar. Its membership has remained in connection with the regular church to this time, and it now occupies a site on Melon Street, near Twelfth. This secession affected considerably the membership of the Methodist Episcopal Church in Philadelphia. In 1815 the white membership was reported at seventeen hundred and twenty-five, and the colored membership at thirteen hundred and seventy-one. After the secession took place, while the white membership had slightly increased, the colored membership had been reduced to seventy-five, showing that almost the entire colored membership had seceded from the church. While there may have been personal causes and individual grievances, the secession arose out of that preference which each race has for an association with its own people. Up to that time Methodism had not fully recognized the importance or propriety of giving a colored pastorate or separate church organization to the individual colored churches. From that time to the present the great majority of the colored members of Methodist Churches in this city have affiliated with the African Church. A secession also occurred in New York, and formed what was termed the Zion Church, also claiming to be Methodist Episcopal, and one or two organizations of that order have for many years existed in Philadelphia. In the mean time in the regular Methodist Episcopal Church new churches have been established, and there are now some six colored churches belonging to the regular organization. A small organization, also, known as the Union African Methodist Church, has existed as an independent body.

While new churches were established from time to time, what was termed the circuit system still prevailed in the city, and for many years the ministers alternated between the different churches. But in 1800 a movement was made to establish a second church in the vicinity of St. George's, fifty members withdrawing and renting the north end of Whitefield's Academy. At first this organization was regarded as independent, but was subsequently approved by the Conference, and was known as Union Church. They purchased the southern part of the academy in 1815, and the edifice was rebuilt in 1833. The charter of St. George's Church allowed them to organize other congregations, and at first they acquired title to the Ebenezer and subsequently to the Nazareth and Salem Church properties, and owned a cemetery lot on Crown Street, near Vine. The lot being too small, they bought a burying-ground

Digitized by Google

on Sixteenth and Coates Streets, where Hedding Methodist Church was afterward erected.

A Methodist Episcopal Church in Germantown was built about the beginning of the century, but a society had been founded some years previously. Bishop Asbury preached there as early as May, 1773, and Capt. Webb and others delivered sermons in the open air, "once under an apple-tree." The venerable Henry Boehm says of them, in 1802, that there was a small class formed, originally in a school-house, but from which they were soon excluded. He drew up a subscription, heading it with his yearly salary, which was then eighty pounds, and secured a sufficient amount to buy a lot and erect a small house. This church, though now included in the city, was at that time connected with the Bristol Circuit, which extended from the Northern Liberties beyond Easton. The ministers traveled over that immense area on horseback, visiting the societies about once a month, the other religious services being conducted by local preachers, exhorters, and class-leaders. The Kensington Church, in the northern part of the city, was built in 1804. This church was called the Old Brick. It was under the control of St. George's Church, but was deeded to separate trustees in 1809. After these earliest churches were founded there came a period of comparative inactivity, and for some ten years but little was done in church-building. The only exception was that the Union Church purchased a location and founded the church of St. Thomas on Tenth Street below Market. The attendance, however, was but small, and the church was finally sold.

In 1816 commenced a new era of church extension, and St. John's, Nazareth, and Salem were founded, and shortly afterward St. James and Holmesburg. Again a period of inactivity followed for ten years, when, in 1829, Asbury, in West Philadelphia, was built, and from 1832 to 1834 there followed in quick succession Fifth Street, St. Paul's, Paul Street, Frankford, Mount Zion, Manayunk, Bustleton, Haddington, Somerton, Western, Bethel, and Front Street. The spirit of church-building continued, and, in 1836, Mount Carmel was founded; 1837, Emory and Green Street; 1838, a small colored church called Wesley; and, in 1840, Cohocksink and Milestown. Since that period the progress in church-building has kept pace with the population, until now, in the area of the city, embracing the county, there are nearly one hundred church edifices belonging to the Methodist Episcopal Church, valued at nearly three millions of dollars. In 1881, the membership, as shown in the minutes, was twenty-six thousand one hundred and eighty-seven, and the number of Sunday-school scholars thirty-four thousand eight hundred and sixty-four. The growth, which is large, was never very rapid, but was steady in its increase, and was largely owing to the activity and efficiency of its early ministers and their successors. It is impossible to name in the limits of this article but a few of them. Ezekiel Cooper was one of the most remarkable men who especially labored for the progress of the church in Philadelphia, and was at one time spoken of most favorably by his brethren for the office of bishop. By his business skill he placed the Book Concern on advanced ground, and took a deep interest in all the enterprises of the church. A tablet was erected to his memory in front of St. George's Church. Dr. Thomas Sargent was also a distinguished minister, who filled many appointments, not only in Philadelphia, but in Baltimore and in Cincinnati. In one of the pulpits in the latter city he died. William Ryland was one of the finest orators, and was six times congressional chaplain. James Smith, John Emory, afterward bishop, Charles Pitman, Rusling, Bartine, Lybrand, Barnes, Durbin, Kennedy, and many others adorned the pulpit from time to time.

Under the supervision of many of the ministers there were occasionally remarkable and extensive revivals, wherein in a single church sometimes from four hundred to nine hundred persons were supposed to be converted. Henry Boehm, to whom we have alluded, who was the companion of Bishop Asbury, was the first to make arrangements for translating the Methodist discipline into German. The early members of the Methodist Churches were generally plain people, of but small means, and the early churches were remarkable for their simplicity and plainness, and all of them had free seats. In 1841 a number of the members associated together to build Trinity Church, which was erected in 1842, and was the first church of more modern architecture, and was for many years the chief centre of Methodistic wealth and influence. It was located on Eighth Street, but in the increase of business the site was abandoned, and, uniting with Sixteenth Street [Hedding], they erected a beautiful edifice on Mount Vernon near Fifteenth Street. Trinity was followed by the erection of a number of finer churches. The most commodious and beautiful structure is the Arch Street Church, at the corner of Broad. Though the Philadelphia Conference originally embraced Northern Pennsylvania and a large part of Western New York, as well as New Jersey and Delaware, with the Eastern Shore of Maryland, its bounds have been from time to time contracted by the erection of other Conferences, and now it embraces but a comparatively small territory in the southeastern part of Pennsylvania. The sessions of the Conference have been very frequently held in Philadelphia, and large audiences are always in attendance. In 1832 and in 1864 sessions of the General Conference were held in this city, and a large number of delegates from all parts of the Union were in attendance, and the General Conference of 1884 will be held here in the month of May.

The Philadelphia Conference about 1860 established a Conference Tract Society, and a small store

was opened for the circulation of tracts. In 1866 a building at 1018 Arch Street was purchased by the society, large subscriptions having been made by a number of gentlemen for the purpose. The lower rooms are occupied as book-stores, while the upper rooms are set apart for a bishop's office, for a historical society, and a hall in which preachers' meetings and other Methodistic associations are held. The room for the book-store is spacious and well arranged. At the General Conference of 1864 a board of church extension was established, and its office was located in Philadelphia. For some years it occupied rooms in the building owned by the Tract Society, but in 1878 erected a building at 1026 Arch Street, which is also large and commodious.

During the civil war a number of the ladies were associated together in benevolent work, preparing articles and sending aid to the soldiers at the front. At the close of the war, they turned their attention to other benevolent efforts, and founded a home for the aged. A large block of ground containing nearly six acres was purchased on Lehigh Avenue and Thirteenth Street, and a large and substantial building was erected. The property is now valued at about two hundred thousand dollars, and is wholly free from debt. In 1880 the ladies also took in hand the building of an orphanage. A property was temporarily rented, moneys were collected, and subsequently Mr. J. M. Bennett tendered two acres of ground on the north of the park, with a building sufficiently commodious to furnish provision for about fifty orphans. To this foundation he afterward added twenty acres of ground adjacent. As a benevolent institution it is now in operation.

While the Methodist Episcopal Church has thus grown, there have been several secessions from it, and other branches of Methodism have been established. Allusion has already been made to the African Church, which embraced Bethel, Union, Allen, Frankford, Germantown, and West Philadelphia Churches, the African Zion Church, and the African Union Church.

There was also a secession in 1829. A number of prominent members united to form a Methodist Protestant Church, omitting from their discipline the episcopacy and presiding eldership, and adding lay delegation. For a time the body seemed to flourish, and several churches were erected. All of these, however, have since either disappeared or reunited with the parent body. A small branch, known as the Free Methodists, have opened one or two churches with comparatively small membership. In addition to the work among the English and colored population, in 1846 services were commenced in the German language, and there are now two churches, composed of a membership exclusively German. The English-speaking portion of the Methodist Episcopal Church is in connection with the Philadelphia Conference, the colored with the Delaware Conference, and the German with the East German Conference.

The following table presents the names, date of erection, and the number of members, embracing probationers, together with the value of church property and the number of Sunday-school scholars, as shown in the minutes of 1881:

Date.	Churches.	Members.	S. S. Scholars.	Church Property.
1769.	St. George's	275	260	$39,000
1790.	Ebenezer[1]	504	521	60,000
1796.	Zoar (colored)	365	355	18,000
1797.	Germantown, Haines Street[2]	564	702	36,000
1801.	Union[3]	227	160	50,000

Thus in a little more than a hundred years the Methodism of the city has grown from an humble commencement to become one of the largest, if not the largest, Protestant body in the number of its churches, the number of its members, and of its Sabbath-school scholars, within the bounds of the city of Philadelphia.

Much of the present growth and prosperity of the Methodist Episcopal Church in this city is due to the gifted and highly respected Bishop Matthew Simpson. Bishop Simpson is the son of James Simpson and Sarah Tingley, and was born in Cadiz, Ohio, June 21, 1811. James Simpson, the father, was a native of the county of Tyrone, Ireland, and in 1793, being then thirteen years of age, left his native country in company with his parents, and landed in Baltimore after a three months' passage, during which the family had been captured by the British, and had lost all their possessions. They first settled in Huntingdon County, Pa., then went to Pittsburgh, and subsequently to Cadiz, where James was married. The latter became a merchant; was associated for a time with Mr. Wrenshall, grandfather of Mrs. Gen. Grant, and finally died in 1812, in Pittsburgh, to which place he had removed for medical attendance. James Simpson's mother belonged to an old Scotch family. His father had served in the British army, and the family on that side had been Presbyterians, but Bishop Simpson's grandmother heard John Wesley preach in Ireland, and from that period became a Wesleyan Methodist. Sarah Tingley, the bishop's mother, was the daughter of Jeremiah Tingley, of New Jersey, a Revolutionary soldier, and belonged to a very old family of French and English ancestry which early settled in America. A near relative was Rev. Mr. Manning, one of the early presidents of Brown University. Besides Matthew there were two other children, both daughters; one married a Methodist clergyman, and the other George McCullough. After the death of James Simpson at Pittsburgh, his family returned to Ohio. In 1828, after having been for some time at Cadiz Academy, where, partly under the care of Rev. Mr. McIntosh and Dr. McBean, he made considerable progress in Latin, Greek, Hebrew, and the modern languages, he attended the Madison College, Pa., where he reviewed the course in mathematics and read Hebrew, etc., and was appointed tutor, succeeding Judge Moses Hampton, of Pittsburgh. He soon returned home, however, studied medicine, and in 1833 practiced a short time. Being urged to enter the ministry, he was admitted in the summer of 1833 into the Pittsburgh Conference, and was given an appointment on the circuit in which he had been brought up, together with one year's time in which to arrange his personal affairs. At the end of eight months he relinquished his secular business altogether, and in 1834 was stationed in Pittsburgh, where he remained two years. He then removed to Monongahela City, where he remained until 1837, being in the mean time elected vice-president of Alleghany College and professor of Natural Science. In the spring of 1839 he was elected president of the Indiana Asbury University, which office he filled until 1848, declining in the interim the presidency and a life trusteeship of what was then Woodward College in Cincinnati.

In 1844 he was a member of the General Conference when the great discussion took place which led to the separation of the Methodist Churches North and South. In 1848 he removed to Cincinnati for four years, having been chosen editor of the *Western Christian Advocate*. At the Boston Conference, in 1852, he was chosen bishop, there being then but three active bishops,—Waugh, Morris, and Janes. Previously thereto he had declined the presidency of the Northwestern University at Evanston, Ill., and also of Dickinson College. He was elected a delegate to the Irish and British Conferences by the General Conference at Indianapolis in 1856, and in 1857 attended the Irish Conference at Cork and the British at Liverpool. From there he went to Berlin as a delegate to the Evangelical Alliance, and then traveled extensively through Europe, Asia (including the Holy Land), and Egypt, from which tour he returned early in 1858 so debilitated as to be unable to preach for a year. In 1859, removing from Pittsburgh to Evanston,

Ill., he accepted the presidency of the Garrett Biblical Institute. The question of establishing theological schools as a part of Methodist polity was then before the church, and Bishop Simpson accepted the presidency of this institute to give force to his own opinions on the subject in favor of such establishment, which he expressed by speech and in writing, thus doing much to fix the permanent policy of the church, now settled in accordance with his views. Bishop Simpson was an intimate friend of Secretary Stanton, both having attended the same congregation at Pittsburgh where the latter went to practice law, and early in the late war, through him and President Lincoln, he gained an inside view of the mighty questions pressing upon the country. He was among the first to advise the emancipation of the slaves, though Mr. Lincoln then objected, and upon being asked if he would arm them, he replied that there was plenty of spading and hauling to do, and they were fully as able to work for those freeing them as for their masters. Early in 1862 he went to California and Oregon, by the way of the Isthmus of Panama, and upon his return by the overland route found that President Lincoln had already issued his preparatory emancipation proclamation. In the fall of 1863 he delivered an address before the Christian Commission at the Academy of Music, Philadelphia. This afterward became his famous lecture, "The Future of Our Country," which was repeated in Boston, New York, Cincinnati, Pittsburgh, and other cities. The first Sunday after the capture of Fort Sumter he preached in the Chicago "wigwam" upon the issues involved in the conflict and its settlement. He was intimately acquainted with President Lincoln, and the day after his second inauguration preached in the capitol, and rode from the building with Mr. and Mrs. Lincoln. He never again saw the President alive, but after his death, at Mrs. Lincoln's request, he made the prayer before the funeral procession started from the White House and also delivered the address at Springfield, Ill., as the body was laid in the tomb.

Early in President Johnson's administration he declined Secretary Stanton's invitation to go South and study the condition of the freedmen with a view to the establishment of a freedman's bureau, on the ground that his church allegiance was his first duty; but he agreed to give the matter his attention for a few months, and recommended Gen. O. O. Howard to the Secretary. In May, 1868, he made the opening prayer at the Republican National Convention at Chicago, which nominated Grant and Colfax. In June, 1870, he went to Europe to complete the work suspended by the death of Bishop Kingsley, and while there attended the German, Swedish, Norwegian, and English Conferences. He was urged by President Grant, whose acquaintance he had made during the war at Nashville, whither he had gone to organize churches, to become one of the San Domingo commissioners. He declined, as his episcopal duties then required his entire time. In January, 1874, he went to Mexico to assist in planting missions. In 1875 he again attended several European Conferences. He made the prayer at the breaking of the ground for the Centennial Buildings, and again at the opening, May 10, 1876. In September, 1881, he preached the opening sermon at the Ecumenical Council held at the City Road Chapel, London, which was built by Mr. Wesley. In the same month, at a large meeting of Englishmen and Americans at Exeter Hall, held on account of President Garfield's death, and at the invitation of Minister Lowell, he delivered an address, closing with the sentiment, "God bless the queen for her womanly sympathy and queenly courtesy." At the end of the address the audience rose to their feet and cheered the sentiment and the speaker. He preached about this time in many localities throughout England and Scotland, and in some parts of Ireland. His time has been almost wholly devoted to the advancement of his church. Besides assisting in the building of numbers of churches, he helped establish the Pittsburgh Female College and Beaver Seminary and College in 1853 and 1854, and has aided a number of literary enterprises. He has also delivered a large number of addresses and lectures in this country and Europe, among which were a course of lectures in Yale College on preaching, and several sermons, in 1882 and 1883, before the students of Cornell College. As an author he has contributed to Methodist literature "A Hundred Years of Methodism" and "Lectures on Preaching." He was also the editor of the "Cyclopædia of Methodism," published by L. H. Everts & Brother, of Philadelphia, which is the standard authority in the church. It was the first undertaking of the kind by any church in the United States, though other denominations have since issued similar publications.

Not only is the Methodist Church indebted to the ability and energy of Bishop Simpson for this most compact and complete record of the church, but those of different religious beliefs who have since undertaken in like manner to prepare compendiums of their own church history have paid, in so doing, a silent though willing tribute to the man who led the way. Bishop Simpson is probably more widely known in this country than any other prominent member of any church, and not alone because of his leadership as a Methodist. While always devoting his time and talents to that cause which in his youth he embraced with his whole heart, he has taken a sincere and practical interest in all that pertains to the temporal welfare of his country. During and since the late war his suggestions and advice, often sought though seldom offered, have always had just and great weight with those high in official position. Bishop Simpson chose a profession which he has honored, and which has honored him, and has at all times exerted an influence that has been far-reaching in its effects and benefits.

Early in his ministry Bishop Simpson married Miss Ellen H. Verner (who is still living), daughter of one of the oldest citizens of Pittsburgh. They have had three sons and four daughters. Two of the former are dead, one living only five years. The survivor is Matthew Verner Simpson, assistant city solicitor of Philadelphia. Of the four daughters, two are at home, one is the wife of Col. James R. Weaver, consul-general at Vienna, and some time since consul at Antwerp, and the other married Rev. C. W. Buoy, now pastor of a church in Philadelphia.

In 1884 there are the following Methodist organizations in the city not connected with the regular church:

African Methodist Episcopal.—African Methodist Episcopal Book Concern and Publishing House, and office of *The Christian Recorder*, *Child's Recorder*, and the *Monthly African Methodist Episcopal Magazine*, 631 Pine Street. B. T. Tanner, D.D, editor; Theodore Gould, publisher.
Allen Chapel, Lombard Street, above Nineteenth. Rev. C. T. Shaffer.
Bethel, Centre, Germantown. Rev. L. C. Chambers.
Bethel, Sixth Street, above Lombard. Rev. C. C. Felts.
Campbell Chapel, Paul and Oxford Streets, Frankford. Rev. Thomas A. Cuff.
Little Wesley (Mission), Hurst Street. Rev. George W. Gibbs.
Morris Brown Mission, Vineyard Street, near Poplar. Rev. R. H. Coleman.
Mount Pisgah, Locust Street, above Fortieth. Rev. A. A. Robinson.
Union, Fairmount Avenue, below Fifth Street. Rev. T. G. Stewart, D.D.
Zion Mission, Seventh Street, below Dickinson. Rev. J. E. Rawlin.
Methodist Episcopal (Zion African).—Frankford Mission. Rev. T. H. Slater.
Trinity Chapel, St. Mark Chapel, Mount Olive Mission. Rev. T. H. Slater.
Wesley, Lombard Street, below Sixth. Rev. M. H. Ross.
Free Methodist.—First Church, Master Street, below Twenty-third. Rev. George Eakins.
Twelfth Street, corner Twelfth and Dickinson Streets.
West Philadelphia Mission, corner Market and Thirty-seventh Streets.
Methodist Protestant.—St. Luke, Broad Street and Germantown Avenue. Rev. W. R. Graham.
Independent Methodist.—J. Baker Steward, President.
Ridge Avenue, Twenty-fifth Street and Ridge Avenue. Rev. J. Baker Steward.
Tabor, Eighteenth and Dickinson Streets. Rev. Joseph Duckworth.
West Philadelphia Mission. Supplied by Rev. Chilton Dean.

THE CHRISTIANS.

The sect so well known in the West as Christians (the first "i," long accent), and now numbering over seventy-five Conferences in the United States and Canada, sprang from a union of three seceding bodies,—one from the Methodist Episcopal Church, Christmas, 1793, under Rev. James O'Kelly, of South Carolina, who refused to accept an episcopacy; another from the Baptists, under Rev. Abner Jones, of Vermont, in September, 1800; and the third from the Presbyterians, under Rev. Barton W. Stone, of Kentucky, in 1801, and greatly enlarged and extended after 1812 by the preaching of Rev. Alexander Campbell. The first schism mentioned began with the name Republican Methodists, but soon gave this up for the terms, Disciples of Christ, the Christian Connection, and Christians. The common point of agreement was the adoption of the New Testament as their only code, and they have all now adopted the Baptist doctrine of immersion. In many regards, however, the usages of the Methodist Church seem to prevail. This interesting departure may be studied in Baird's "Religion in America," in McClintock and Strong's "Encyclopædia," in the "Life of Bishops Coke and Asbury," and the reports of the Conference of 1793. The sect is strong in Tennessee and Kentucky, and in parts of the newer States and Territories, having, for instance, two colleges in California.

By the preaching of Rev. Elias Smith the congregation in Philadelphia was founded. He was born at Lyme, Conn., June 17, 1769, taught school in early life, and commenced preaching in 1790. He was ordained as a Baptist minister in 1792, and settled at Woburn, Mass., until September, 1801. He embraced the doctrine taught by Dr. Abner Jones about the beginning of 1803. In the course of subsequent evangelist labors he came to Philadelphia, and by his preaching there is reason to believe that the Christian Church was established there.

The foundation of the Mount Zion Christian Church in Philadelphia dates back at least as far as the year 1807. The congregation must have been formed before the 5th of August, 1807, at which time we find that a piece of ground on Sixth Street had been taken up. Robert Ferguson was the owner, and by a declaration of trust made to Jacob Stintzman, Thomas Wallace, and Robert Punchan, the trustees, he declared that he would hold the lots for such uses as they would appoint. There were four of them on the east side of Sixth Street, together making a width of eighty-three feet on that street, south of Christian Street, and one hundred and thirty-six feet six inches on Christian Street. On the 29th of June, 1809, Ferguson gave a deed to the Mount Zion Christian Church. This purchase was supplemented by others a few years afterward, so that the property of the church embraced a considerable piece of ground. James Enue, by deed of Nov. 15, 1809, conveyed to the trustees two lots on Christian Street, east of the ground purchased of Ferguson, each twenty feet front, running southward one hundred and one feet six inches, and a lot on Marriott's Lane, east of Sixth, twenty feet front, running north one hundred and two feet six inches, and adjoining the other lot. On the same day Joseph Marble conveyed to the trustees a lot at the corner of Sixth Street and Marriott's Lane, running along the latter one hundred feet four inches. Andrew McCalla, on the 20th of February, 1812, conveyed to Thomas Wallace, Israel Boake, John Hunter, Solomon Morgan, and John Newman, deacons or trustees of Christian Church, Mount Zion, a lot on the east side of Sixth Street, north of Marriott's Lane; and Mary Hering, of Bath, England, by deed of April 24th, conveyed another lot on the east side of Sixth Street, north of Marriott's Lane. By these conveyances the congregation became owner of "

ning one hundred and fifty-six feet on Christian Street, and extending through to Marriott's Lane west of Sixth Street.

The congregation built a frame meeting-house of one story at the southeast corner of Sixth and Christian Streets. In 1809 it was incorporated under the title, Christian Church, Mount Zion, of Southwark. The trustees then were Thomas Wallace, chairman; Andrew McCalla, secretary; Israel Boake, treasurer; John Newman and Solomon Morgan, deacons; and John Hunter, Jacob Lawrence, Sr., Joshua Raybold, Robert Fanshaw, Michael Cooper, William Beament, and Edward McCrea. These gentlemen were of the following occupations: Thomas Wallace was a tailor, living at No. 373 South Second Street. Andrew McCalla, shoemaker, lived at No. 263 South Fourth Street. Israel Boake was a nailer, whose shop was in Beck's Alley, and who lived at No. 494 South Second Street. John Newman was keeper of a china-shop and cheap store at No. 387 South Front Street. Solomon Morgan was a grocer at No. 235 South Fourth Street. John Hunter, well known in Southwark and Moyamensing as "Squire" Hunter, was justice of the peace at No. 186 South Sixth Street. Joshua Raybold was constable for the district of Moyamensing. He afterward became a justice, succeeding Hunter. He was also clerk of the Supreme Court of Pennsylvania from 1824 to 1829. He was father of Frederick A. Raybold, an eminent member of the Philadelphia bar. Jacob Lawrence, Sr., was a carter and resided at No. 494 South Second Street. Michael Cooper was at this time a tax-collector, and afterward a constable.

In April, 1810, "Elder Frederick Plummer, of the Christian Church, preached in the meeting-house at Christian Street, on Sunday, the 21st, and in the afternoon preached and baptized at the navy-yard, on the Delaware River."

It is believed that Rev. Mr. Smith, after various missionary visits, first came to Philadelphia as permanent pastor of the Christian Church in 1811, and returned to Portsmouth, N. H., in 1815. He was a busy man, and was active, during a long life, in moral and religious enterprises. He was the author of several books, religious essays, etc., and did a great deal of work in the periodical and newspaper which he projected and conducted. His works are as follows: "Clergyman's Looking-Glass," 1803; "History of Anti-Christ," 1803; *Christian's Magazine*, published quarterly from 1805 to 1807; "Sermons on the Prophecies," Exeter, 1808; *Herald of Gospel Liberty*, published weekly, from September, 1808, to September, 1817, at Portsmouth, N. H., Portland, Me., and Philadelphia (this paper, it is claimed, was the first religious paper published in the United States); "New Testament Dictionary," Philadelphia, 1812; "The Fall of Angels and Men," Philadelphia, 1812; "Life, Conversion, Preaching, Travels, and Sufferings of Elias Smith," Portsmouth, 1816; *The Herald of Life and Immortality*, a periodical—ten numbers, serial, from January, 1819, to October, 1820; "The Age of Inquiry," Exeter, 1825; "American Physician and Family Assistant," 1832; "People's Book," Boston, 1836; "The Christian's Pocket-Companion." Mr. Smith died at Lynn, Mass., on the 29th of June, 1846.

In the course of time the Christian congregation built a better church building than that which they originally occupied. It was of brick, plain in appearance, and not extensive in size, being forty feet front and forty-seven feet deep. It was finished and opened for worship Sept. 5, 1819. Elder Robert Ferguson was pastor at this time, and remained until he was succeeded by Elder Frederick Plummer, who had charge of the church for a number of years, and was officiating in 1825. Mr. Ferguson accepted a call from a church in the South.

The history of this congregation is uneventful. Much industry was shown, but proselytism was not rapid. Their baptisms in the Delaware were objects of particular attention. Elder Plummer secured for those ministrations a piece of ground in New Jersey, on the bend of the river between Kaighn's Point and Gloucester Point, which in the course of time became very valuable, and was disposed of to great advantage.

The Christians have at the present time (1884) two churches in the city, as follows: First, Marlborough, above Belgrade, Rev. John G. Wilson; Mount Zion, Christian, below Sixth, Rev. E. E. Mitchell.

BIBLE CHRISTIANS.

The Bible Christians, or Bryanites, are one of the branches of Methodism, and they are spoken of by Bishop Simpson in his "Encyclopædia of Methodism." They dress plainly, and affect a great simplicity in speech and manners. "They have class-meetings, love-feasts, circuits, districts, and an annual Conference, to which they admit lay delegates. The strength of the church lay in the laboring classes in England, where it originated. The Bryanite form originated with William O'Bryan, a Cornwall preacher, in 1815, but it is thought that he gained his doctrines in large measure from Rev. William Cowherd, rector of Christ Church, Salford, about 1800. The latter is properly entitled to be called the founder of the Bible Christian sect. He was educated for the ministry, held the church-living of Beverly, in Yorkshire, and was classical teacher and professor of Philology in Beverly College. Afterward he was rector of St. John's, Manchester; and becoming, while holding that position, a believer in the doctrines of the New (Swedenborgian) Church, he left the Church of England and became pastor of the New Jerusalem Church in Peter Street, Manchester. Eventually he emancipated himself from the creed of Swedenborg, and determined to be unshackled by human creeds. He obtained means to erect a meeting-house at Salford, which was completed in 1800. He preached without salary or

support from the congregation, maintaining himself by the practice of medicine. He was determined to free himself from the slavery of sects. He declared that his principles were taken directly from the Bible, and that his congregation should proclaim themselves simply Bible Christians.

In the year 1807 he began to inculcate the doctrine of abstention from the flesh of animals as food, and total abstinence from all intoxicating liquors, as religious duties.

One of the men who listened to Mr. Cowherd's preaching was William Metcalfe, a native of Shroadzil, in Orton parish, Westmoreland. He also had been connected with a Swedenborgian Church, and went to Salford to study theology, but became a convert to Mr. Cowherd's views, and was ordained in 1811. Both he and his wife were strong vegetarians. In 1817 forty-one members of the Bible Christian Church — principally those who worshiped under Dr. Cowherd—determined to emigrate to America. Among them were two ministers, Rev. James Clarke and Rev. William Metcalfe. There were twenty other adults, and nineteen children. They sailed from Liverpool in the Liverpool packet "Captain Singleton." Their intention was to better their position, to propagate their religious views, and to establish a Bible Christian Church in the United States. Tradition reports that eleven adults and seven children became backsliders on the food question, and when they reached Philadelphia others apostatized. Rev. James Clarke and his family and two other families located as farmers in Lycoming County, where they formed a church and Sabbath-school. They taught strange doctrines to their neighbors, who could not understand what Christianity had to do with eating meat. Mr. Clarke was disappointed, and resolved to try his chances elsewhere. He went to Baltimore, and was not successful. He then settled in Indiana as a farmer. Rev. Mr. Metcalfe resolved to remain in Philadelphia; and first, in order to find means of support, he opened a day school and academy. Notice was soon given that—

"the members of the Bible Christian Church assembled every Sabbath-day in the school back of No. 10 North Front Street, at half-past ten o'clock in the morning and at three o'clock in the afternoon; they do not form a sectarian church, deriving their doctrines from human creeds, but they hold *all the doctrines*, though not all the *ideas*, of the various sects, so far as they are respectively founded on the moral expressions of the sacred Scriptures; that they humbly seek, through the institutions of the Word of God, to become more efficiently edified in Bible truths; and that they respectfully invite their fellow-mortals of any and every profession to come and hear for themselves, and, if disposed, to join with them in church-membership, and unite in the all-important service of worshiping God according to the teachings of His word."

The yellow fever visitation of 1818 broke up the school, and caused Mr. Metcalfe to remove his residence to the Germantown road, West Kensington. In 1821 the services of the Bible Christian Church were resumed at No. 7 Pear Street. Several further changes were made.

Meetings were held for a time in a school-house in Coates Street, then upon Germantown road, and afterward upon Little Green Street. On the 31st of May, 1823, Turner Camac and wife conveyed to James Royle, David Nuttall, George Richards, Jeremiah Horrocks, John Walker, Jonathan Wright, and Moses Kay, trustees of the Bible Christian Society, and to William Metcalfe a lot of ground on the west side of Third Street, West Kensington, sixty feet front and two hundred feet deep to a twenty-feet wide alley, subject to a ground-rent. This piece of ground was north of the present Girard Aveuue, and upon it was placed a frame school-house which had been built on Coates Street for a Lancasterian school. It was removed, put in order for use as a meeting-house, and was opened and dedicated as a place of worship on the 21st of December, 1823. Mr. Metcalfe was pastor at that time, and for many years afterward.

During this period he was engaged in a number of public discussions, and wrote a series of papers on the principles of his sect for the *Freeman's Journal*. He also edited the *Rural Magazine and Literary Evening Friend*, devoted to literature and agriculture, published by R. & C. Johnson, No. 33 Market Street, during the year 1820. In that year a series of tracts entitled "Letters on Religious Subjects," explanatory of Bible Christian doctrines, most of which were written by Rev. Dr. Cowherd, were republished under the editing of Mr. Metcalfe. He also published a tract about this time entitled "The Duty of Abstinence from all Intoxicating Drinks." It is believed to have been the first total-abstinence tract published in the United States. In 1821 he published a tract entitled "Abstinence from the Flesh of Animals;" and he wrote articles in the *Philadelphia Gazette*, the *United States Gazette*, and other papers.

The Bible Christians carried out the principle of opposition to the employment of liquors so thoroughly "that the wine used for sacramental purposes was expressly made in such manner as to remain unfermented, and consequently unintoxicating. Hence it has been claimed that the Bible Christian Church was the first temperance society, based upon the total-abstinence principle, in modern time."

Christ Church, on Third Street, above Girard Avenue, Rev. Henry S. Clubb, pastor, belongs to the Bible Christians.

THE UNITARIANS.

Unitarianism made no beginning in Philadelphia till near the close of the last century, though there were doubtless many who sympathized with the well-known liberalism of Dr. Franklin.[1]

---

[1] A short-lived deistic society had been started in 1790, under the lead of John Fitch, the inventor of steamboats, and the membership ran up to forty. Its meetings in Church Alley were usually occupied with essays and debates, in which "the God of Nature" was the central theme, and a rigid code of morals was urged. The Rev. Elihu Palmer,

The famous Joseph Priestley, LL.D., a powerful opponent of Trinitarianism,—a man eminent alike in science, philosophy, and theology,—being persecuted in England for his sympathy with the French Revolution, came to America in 1794, and pursued his many-sided labors till he died in 1804. In 1796 he gave a course of lectures in Lombard Street Universalist Church, vindicating the "Evidences of Christianity," and exposing its corruptions, having among his hearers many members of Congress and others of distinction. Under his impulse, a constituency was soon found for a Unitarian society, which was organized June 12, 1796. There were fourteen original members, nearly all sturdy and free-minded Englishmen, who probably brought their opinions across the water.

Among them were John Vaughan, long the librarian of the Philosophical Society, who had once been the *protégé* of Dr. Franklin in Paris, and who entertained here so many distinguished foreign guests as to help the city to its reputation for hospitality; Ralph Eddowes, who had quitted the city of Chester after a brave but faithful struggle against the usurpations of a municipal ring; James Wood, a merchant, and father of the late Catholic Bishop Wood; the latter was himself christened by James Taylor, another original member, a lay preacher, and Scotch merchant, who kept for a time the "Manchester Store" at 18 North Third Street; William Turner, who migrated hither to retrieve his fortunes after bankruptcy, eventually paid all his old debts, and left a competency; and William Young Birch, from Manchester, a bookseller and stationer in Second Street, near Chestnut, who, in 1800, went into partnership with Abraham Small in the bookselling and publishing business, and accumulated a large fortune, of which he left two hundred and fifty thousand dollars to the Pennsylvania Institution for the Blind, besides other public bequests. The other original members were William H. Smith, Ralph Eddowes, Jr., Peter Boult, Samuel Darch, Josiah Evans, John Eddowes, Thomas P. Jones, Thomas Astley, and Rev. William Christie, who seems occasionally to have occupied the pulpit. Dr. Priestley, who settled at Northumberland, was among those whose names were added later. Thus began the first *declared* Unitarian society in America.

Inconspicuous and unpopular, the society found no place for years in the lists of city churches, perhaps because it had no abiding place. Its services were held at times in the hall of the University, in the Lombard Street Universalist Church, in a hall once owned by the guild of carpenters, and at several periods in a room in Church Alley. There was no legal incorporation till 1813, when it took the name, "First Society of Unitarian Christians." In 1824, when a new charter was taken out, the word "Congregational" was inserted to express a recognized affinity with sister-churches in New England, which bore that name.

In 1808 and later, several members acquired a title to lots on the northeast corner of Tenth and Locust Streets, which they conveyed to the society as a site for a house of worship and for a burial-place. In March, 1812, the corner-stone was laid, and on the 14th of February, 1813, the society dedicated an octagonal brick church large enough for three hundred persons. At a later day the bell and belfry of this building were transferred to the public school-house on Locust Street near Twelfth, and the iron tongue, which once rang out the fire-alarm, or called the little company of Unitarians to their simple service, or to share in that sacred communion which the late Thomas Bradford satirically called "John Vaughan's supper," now summons the children to their daily lessons. The present church edifice, Doric in style, with seats for eight hundred persons and a vestry in the rear, was built on the same premises in 1828.

For twenty-eight years there was no settled minister. The society was occasionally favored by the presence of distinguished preachers from New England, but the main dependence was on the lay preaching of Ralph Eddowes and James Taylor, and the reading of printed sermons by John Vaughan.

In August, 1824, came William Henry Furness, born in Boston, 1802, and graduated from Harvard in the class of 1820. After hearing him four times, the society gave him a unanimous call. He was ordained Jan. 12, 1825, and during his remarkable ministry of fifty years the society became strong, numerous, and influential. Between 1840 and 1861, some dissatisfaction was caused by the decided stand taken by Dr. Furness against negro slavery, then supreme alike in state and church. But he was never a popular agitator; his love of the true, the beautiful, and the good led him toward quiet studies, the promotion of gentle humanities and the fine arts; so that both his preaching and his personality have been powerfully felt in the direction of good-will, intelligence, and refinement. A scholar of fine taste, he has produced many beautiful hymns, besides several translations from the German; but he has found the love-work of his life in a study of the gospels and the character of Jesus, developing in a succession of books a theory at once rational and reverent.[1] The venerable patriarch resigned his pas-

a native of Connecticut and graduate of Dartmouth, who had been expelled from the "Universal Baptists" for denying the deity of Christ, and whose mind was rapidly moving toward deism, was desired to become the minister of this society, but the influence of Bishop White is said to have prevented their procuring of any suitable hall, and the society soon became invisible.

[1] Rev. Mr. Furness published in 1836 "Remarks on the Four Gospels," which he expanded into a large work in 1838, entitled "Jesus and His Biographers." He is also the author of "A Life of Christ," "Domestic Worship," "Julius and Other Tales from the German," "Thoughts on the Life and Character of Jesus of Nazareth," "The Veil Partly Lifted and Jesus becoming Visible," "Unconscious Truth of the Four Gospels," besides hymns and other devotional pieces in verse, translations from the German, and a volume of "Gems of German Verse." He

torate on the 12th of January, 1875, the fiftieth anniversary of his ordination; but he continues, in his eighty-third year (1884), to be hale and hearty, and delights the people by the vigor of his occasional discourses.

Rev. Joseph May, the present incumbent, a son of Samuel J. May, late of Syracuse, N. Y., and educated at Harvard, was installed Jan. 12, 1876. He has a fine standing among his brethren, and is a man of original qualities and genuine ability. Under his ministry the society has taken a new departure by the purchase of lots on the north side of Chestnut Street below Twenty-second, where a handsome church edifice, with a Sunday-school building attached, is now in course of erection, probably at a cost of one hundred thousand dollars.

The Unitarian Society of Germantown, now the Twenty-second Ward of the city, came into legal existence July 7, 1866; the following names being signed to the application for a charter: E. W. Clark, Atherton Blight, George Nichols, J. H. Withington, R. V. Sallada, James A. Wright, H. T. Hoyt, Conyers Button, A. W. Harrison, Philip S. Justice, and James Traquair. Their declared object is "to meet for the worship of the Almighty Father in the simplicity of the faith of Jesus Christ." Their meetings were held in Langstroth's Hall till 1869, when they had completed a pretty Gothic church, on the corner of Chelten Avenue and Green Street, at a cost of thirty thousand dollars, to which was added, in 1880, an elegant building for parish uses, costing about ten thousand dollars more. The first settled minister was Rev. William W. Newell, since master of a preparatory school in New York. Rev. Silas Farrington, now of Manchester, England, succeeded him in 1868, and Rev. Charles G. Ames was in charge from 1872 to 1877. Rev. Samuel Longfellow followed, but resigned in 1882 to become the biographer of his poet-brother. Rev. John H. Clifford, the present pastor, was installed Feb. 10, 1883. Through all these changes the society has maintained a healthy growth, and was never more flourishing and active than now.

REV. WILLIAM HENRY FURNESS.

The Spring Garden Unitarian Society, a young and promising enterprise, dates from May 29, 1881, when ninety-five persons, meeting in the hall of Spring Garden Institute, signed the following covenant: "In the freedom of truth, and in the spirit of Jesus Christ, we unite for the worship of God and the service of man." The petition for a charter, granted June 18, 1881, was signed by Joshua G. James, J. Peter Lesley, Susan I. Lesley, Samuel Sartain, Hector McIntosh, Alice Bennett, M.D., A. C. Rembaugh, M.D., Julia A. Myers, Rudolph Blankenburg, Anna Wise Longstreth, and Charlotte L. Peirce.

The society is the outgrowth of a series of Sunday evening meetings in the hall of Spring Garden Institute, begun in November, 1876, by Rev. Charles G. Ames, with the countenance and support of the neighboring Unitarian societies, and kept up with more or less regularity till the nucleus of the audience fixed itself in an organization. The church building with lot, on the southeast corner of Broad and Brandywine Streets, was bought of the New Jerusalem Society for twenty-five thousand dollars, and was first occupied March 12, 1882, though its use on Sunday mornings was conceded to the Swedenborgians till November.

The society has continued under the ministry of Mr. Ames, and its covenant membership has nearly doubled, though including less than half the congregation. Probably no religious society in the city is more thoroughly identified with the system of co-operative charity, some thirty-five members being officially connected with various institutions of undenominational benevolence.

THE CONGREGATIONALISTS.

From a very early period there have been in this city large numbers of persons who were trained in the polity of the first churches that were formed in New England by the Puritans, and very naturally they have desired to worship in accordance with their early education and their associations. It is difficult to decide as to which was the first example of Congregationalism in this city. The Universalist Church on Lombard Street, above Fourth, was founded as an

edited for three years *The Diadem*, a Philadelphia annual; has been contributor to the *Christian Examiner*, and is the author of a number of published sermons, many of which are in support of the anti-slavery cause, in which he took great interest.

Independent or Congregational Church. The present Chambers Presbyterian Church, at Broad and Sansom Streets, was founded in 1820 as a Congregationalist or Independent Church. In 1836, Matthias B. Denman, Lemuel Coffin, Henry C. Blair, James W. Boyd, Dr. William K. Brown, Dr. James H. Briscoe, William S. Charnley, Joab Brace, Jr., Thomas Elmes, Archelaus Flint, Joshua P. Haven, David W. Prescott, Henry W. Safford, Joseph Seaver, Sabine W. Colton, Martin Thayer, Edward S. Whelen, and Hancock Smith founded the First Congregational Church, and elected Rev. Dr. John Todd pastor. During the early part of the year they met in a well-furnished room on the northeast corner of Eighth and Chestnut Streets. In a short time they purchased a lot at the northeast corner of Tenth and Clinton Streets upon which to erect a church. The corner-stone was laid Sept. 6, 1836, and the church was dedicated Saturday evening, Nov. 11, 1837. Dr. Todd, though a great Biblical scholar and a sound theologian, was not an attractive preacher, and the church struggled on through many difficulties, but was finally, in February, 1842, sold by the sheriff, and purchased by Hosea Kellogg for the First Presbyterian Church.

Several attempts were afterward made to establish a Congregational Church in the city, but without success until the winter of 1863–64, when the desire took permanent shape. On the 5th of April, in pursuance of a public notice inviting "New Englanders and all others interested in the formation of a Congregational Church in Philadelphia," a meeting was held at the house of James Smith, 210 Franklin Street. Careful and serious deliberation was held respecting the need of such an effort, the encouragements for the undertaking, and the difficulties to be met and overcome. It was concluded to form a Congregational Church in this city, and necessary steps were at once taken for giving effect to this decision. Concert Hall, on Chestnut Street, above Twelfth, was engaged for services on Sunday, and clergymen were engaged to conduct public worship. The first public services were held on Sunday, May 15, 1864, and were conducted morning and evening by Rev. Henry Ward Beecher, of Brooklyn.

A confession of faith and covenant having been adopted as its religious and doctrinal basis, the formal organization of the church in accordance with the simple methods of the denomination took place on Monday, May 30th, in the parlors of Mr. Smith. After a brief address and prayer by Rev. Newton Heston, of Brooklyn, he read the confession of faith and covenant, to which those who were to compose the church gave their individual assent. The *distinctive act* by which the church was constituted was the adoption by these persons of the following minute:

"We whose names are hereto subscribed do solemnly adopt the Confession of Faith and Covenant just read as the expression of our Christian faith and our sacred pledge to each other and to our Saviour; and by this act we do constitute ourselves a church of Christ under the name of the Central Congregational Church of Philadelphia."

This action clothed the body with all the essential powers and rights of a church, competent for all appropriate Christian work. Thus constituted, however, it was without recognized standing or vital union with other churches of the denomination. With the view of securing this fellowship, and in accordance with Congregational usage, an ecclesiastical council was called, composed of clerical and lay delegates from prominent churches in different parts of the country. This council met on the 1st of June, and, after considering the doctrinal basis of the church, the reasons assigned for its formation, and its prospects of usefulness, approved the action already taken, and by public services welcomed the church to membership in the denomination and commended it to the confidence and Christian fellowship of the churches at large.

The Sunday services continued to be held at Concert Hall, conducted by clergymen from abroad, and the weekly prayer-meetings were held at the house of Mr. Smith, conducted by members of the church. In September Rev. Edward Hawes, of Waterville, Me., accepted a call to the pastorate, and by advice of a council was publicly installed Oct. 25, 1864. Mr. Hawes had become widely known by his labors in raising funds for the United States Christian Commission, and by his personal service among the soldiers at various points at the South. His ministry here was continued for nearly nine years, and until a substantial church building had been completed and the church itself established on a basis of assured success. In 1873 he resigned his charge and accepted a call to the North Church in New Haven, Conn.

In the spring of the next year Rev. James R. Danforth, of Newton, Mass., accepted a call from the church, and was duly installed its pastor on Thursday, June 18, 1874. At installation services it is customary for some minister of the denomination to express the fellowship of the churches. On this occasion there was a departure from the usual procedure, and the fellowship of the churches, not the Congregational Churches only, but of the brotherhood of evangelical churches, was expressed in addresses by representatives of different denominations. Rev. George D. Boardman, D.D., conveyed the greetings of the Baptist Churches. Rev. R. D. Harper, D.D., spoke in behalf of the Presbyterians, and Rev. R. M. Hatfield, D.D., on behalf of the Methodists.

Public services were held at Concert Hall until July, 1865, and during the remainder of that year in the hall at the northeast corner of Broad and Arch Streets. In April, 1865, the church purchased the lot of ground at the northwest corner of Eighteenth and Green Streets, and at once made preparations for the erection of a building. The corner-stone of the chapel was laid with appropriate religious ceremonies on Monday, June 12th, and the building was dedi-

cated on Sunday, Jan. 7, 1866. The walls of the main structure were erected in 1871, and the completed church was dedicated on Sunday, June 2, 1872. It is of the Gothic style of architecture, and built of graystone trimmed with brownstone.

The ground on which the Central Congregational Church stands was purchased for $24,000; the cost of the chapel and of such part of the main building as had to be put up with it was $38,000; and the cost of the main edifice, including the furnishing, was $50,000; making a total cost of $112,000.

CENTRAL CONGREGATIONAL CHURCH.

From the very first an efficient Sunday-school has been maintained by the church. It was for eleven years under the able and judicious superintendence of Nelson F. Evans, who is now the president of the Young Men's Christian Association. On his resignation, in 1880, William H. Wannamaker was chosen his successor.

Rev. James R. Danforth, the pastor of the Central Congregational Church, was born in Jersey City, N. J., Aug. 8, 1839. His studies preparatory to college were pursued in the Lyceum, then taught by Hon. William L. Dickinson, whose recent death Jersey City still mourns, and at the grammar school of Columbia College, in New York, then under the headship of Charles Anthon, LL.D., the finished classical scholar.

After finishing his preparatory studies he entered the University of the City of New York, but was obliged by ill health to intermit his studies for several years. Resuming his college course at the West, he graduated in 1865 at Beloit College, Wisconsin. His theological studies were pursued at the Congregational Seminaries of Chicago and Andover, he having graduated at the former in 1868.

In the summer of that year he was ordained pastor of the Congregational Church in Woodstock, Ill. Under the labors of pastor his health gave way after a few months, and he resigned his charge and spent a year in travel in Europe, and two years in study in Germany, chiefly at the University of Leipsic. Shortly after his return, in 1872, he accepted a call to the charge of the Central Congregational Church of Newton, Mass. After a short pastorate at that place he accepted a call from the Central Congregational Church of this city in May, 1874.

The church, under Mr. Danforth's ministry, has had a steady and healthful growth. Soon after entering on his pastorate here, seeing that the debt of thirty thousand dollars, which remained on the church property, was a serious hindrance to the success of his work, he began an effort which has resulted in the almost total extinguishment of the debt.

Mr. Danforth has always been a close student and an accurate scholar. After completing his theological course of study he was invited to a college professorship, a position for which, by his tastes and his education, he was well fitted. As, however, he regarded the Christian ministry as his proper calling, he declined this invitation. From the bent of his mind and his training, the style of his preaching is scholarly and logical rather than rhetorical.

Mr. Danforth is one of the State secretaries of the American Congregational Union, and a member of the executive committee of the American Missionary Association.

Trinity Congregational Church at Frankford has for its minister Rev. E. N. Yelland.

THE GERMAN REFORMED.

So many Germans, we are told, immigrated to Pennsylvania during the first fifty years of the eighteenth century, that the proprietaries were rather alarmed, but the peaceable habits and steady industry of the new-comers soon reassured them. The Germans made settlements on what was then the frontier, in valleys now among the richest and fairest in the State; others settling in or near Philadelphia engaged in business or manufactures. Germans ill-treated in New York province and elsewhere removed to Pennsylvania. Thus the number of religious sects, and also of divers dialects, were materially increased. Herr von Beck, in his "Reise Diarium," dated Philadelphia, June 6, 1734, says, "Here are some of all religions and sects." His list contains Lutherans, Reformers, Church people, Presbyterians, Quakers, Catholics, Dunkers, Mennonists, Sabbatarians, Seventh-Dayers, Separatists, "Bohemisteir," Swenkfelders, "Tutchfelders," and "Well-Wishers." Nearly all the German colonists were Protestants, and were pretty evenly divided between the two great doctrines, the Reformed (or Calvinistic) and the Lutherans (or church of the Augsburg Confession). The first Bible printed in America was Luther's version.

Digitized by Google

The first congregation of the Reformed Church in Pennsylvania is thought to have been formed in 1726 by John Philip Boehm, at Whitpaine township, in Philadelphia County (now in Montgomery), sixteen miles from Philadelphia. This rests upon the statement of Rev. Michael Schlatter,[1] who, in his journal, writing in 1746, says that Boehm had been preaching to large assemblies for twenty years. In another portion of his journal Schlatter calls Boehm "the oldest German minister in these regions." Boehm was a schoolmaster, not then licensed to preach, but there being no regular minister he felt called upon to lead in divine service according to the best of his ability. Boehm reminds one of the pious and gentle Mennonite schoolmaster, Christopher Dock, who was teaching and preaching on the Skippack as early as 1718. In 1729 an application was sent to the Classis of Amsterdam and the Synod of North Holland for his ordination. The early dependence of the German Reformed Churches upon the Dutch Church in Europe is a singular fact. It lasted until 1792, when the French conquest of Holland interrupted communication. To Boehm's request the Classis and Synod replied, acknowledging his former acts, and said that, "according to the custom of the church, he must be confirmed or ordained by the ministers of New York, with a declaration that he receive the Heidelberg catechism and all the formula, engaging strictly to regulate his ministry in accordance with them, and submit himself to the ecclesiastical ordinances of the Synod of Dordrecht." The Whitpaine church was then organized, meeting in Rev. Mr. Boehm's house until, in 1740, a church was constructed. "It was of stone, small in size, but built with remarkably heavy walls, constructed of stone and mud mortar, as no lime could at that time be procured. The pulpit was high up, in one corner." In 1750 the congregation contained thirty-six communicants. Mr. Boehm remained in charge until his death, May 1, 1749. "He was buried in the inside of the church, still called after his name, and his resting-place is in the southeast corner of the present church, covered with an arch, which was built in 1818. His funeral sermon was preached May 7, 1749, at the church in Germantown, by Rev. Michael Schlatter, who once a month visited the congregation at Whitpaine." In his journal, under date of June 25, 1751, he reports Whitpaine as "without a supply," and it remained so until 1760 or 1762, when Rev. George Alsentz left the Germantown Church and took charge of Boehm's old church at Whitpaine, serving other churches also in the neighborhood. He was pastor there when he died, in 1769, and he was buried in the old graveyard of the Reformed Church at Germantown. Rev. Alsentz was succeeded by Rev. Christian Foehring, who officiated from 1769 to 1772, when Rev. John Gabriel Gebhard became pastor, and served until 1774. Rev. John William Ingold then took charge of Whitpaine and Skippack, or Worcester Church, and preached for a year at Boehm's old church. He had assumed this charge at the request of the congregation, without authority from the Coetus; and having trouble about his salary he left the church. The Rev. John H. Weikel was the next occupant of this pulpit, which he took in 1776. A new German Reformed Church was built in 1762, about a mile from Boehm's church, known as "Wentz's church." It was erected by the exertions of Rev. John Philip Leidich, and was dedicated Nov. 13, 1763. This church was generally under the control of the ministers of Boehm's church.

The church at Skippack was organized almost as soon as that at Whitpaine. It was the work of pious Palatines, as they were called. The famous Upper Palatinate province lay on both sides of the Rhine, and had Manheim for its capital. Marshal Turenne desolated it with fire and sword in 1674, and thence flowed the first notable German emigration to America, beginning in 1680 or 1682. Mennonite Palatines founded Germantown. The later arrivals were many of the members of the Reformed Church, and the particular colony that founded the Skippack settlement consisted of one hundred and nine Palatines that arrived at Philadelphia in the ship "William and Sarah," Capt. Hill, from Rotterdam and Dover, on the 27th of September, 1727, under charge of Rev. George Michael Weiss (or Weitzius), who was sent out by the Upper Consistory or Classis of the Upper Palatine. Mr. Weiss soon went to Skippack, in the county of Philadelphia, about twenty-four miles distant, where he was accompanied by a portion of his emigrants. Here they built a log church, in the erection of which Rev. John Philip Boehm is said to have assisted. Mr. Weiss sent back to the consistory of the Palatinate information of the great spiritual wants of the Germans in the province. The latter laid the state of the case before the Synods of the Netherlands in 1728, and an effort was made to send out assistance. In 1729, Rev. Mr. Weiss, in company with Elder J. Reif, went to Holland to collect money, Bibles, and tracts for use in North America. The Synods of North and South Holland and the Classis of Amsterdam were solicited, and valuable contributions obtained. After Mr. Weiss returned to America he went to the province of New York, and he became pastor of a church at Rhinebeck, near Albany. He came back to Philadelphia in 1732. It is probable that Mr. Weiss was succeeded at Skippack by the Rev. Johannes Henricus Goetschiey, who came to Pennsylvania about 1729, and had a very extensive circuit, preaching also at Old Goshenhoppen, New Goshenhoppen, Folkner, Swamp, Oley, and other places in Philadelphia and

---

[1] Mr. Schlatter had been sent from Europe with authority to unite the scattered German Reformed congregations in a better organization. The Dutch Classis and Synod also sent over, a little later, Revs. Weiber, Steiner, Otterbein, Hendel, Helfenstein, Helfrich, Gebhard, Vollicker, Blumer, Faber, Becker, and Herman, all able and devoted men.

adjoining counties. It is supposed that he died in 1739.

One of these Reformed congregations, early established by Rev. Mr. Weiss, was that at "Folkner Schwam" (or Swamp), in Frederick township, in 1727. Rev. M. Goetschiey preached there for a few years. Henry Antes, afterward ordained, preached at times. Rev. John Philip Leidich took charge of the church in 1748, and so remained till 1761, when Rev. Conrad Steiner became his coadjutor. In 1770, Rev. Nicholas Pomp, a native of Germany, and graduate of Halle, became pastor there, and remained in charge till the Revolutionary war had fairly begun. A book of his against Universalism ("Das Ewig Evangelium") was printed in 1774, by Henry Miller, Philadelphia.

At Great Swamp, in Upper Hanover, J. Henry Sproegel, about 1726, gave fifty acres of land for religious and educational purposes. The promise was made to Jacob Moyer, a Mennonite, but no formal deed was executed. Meanwhile the German Reformed Church had organized, and Rev. J. H. Goetschiey was the minister in 1730. In 1737 they built a church on the Sproegel tract. In 1746 it was arranged by Mr. Schlatter that Rev. George M. Weiss should be pastor of this church, and of New Goshenhoppen and Old Goshenhoppen. The three congregations contributed £40 a year. Mr. Weiss recorded in 1746 that "Grosen Schwam" congregation had forty-eight families. Old Goshenhoppen Reformed Church was also served as early as 1730 by Rev. Mr. Goetschiey. Rev. Michael Schlatter preached there, in "a new stone church," on the 20th of September, 1746. At that time trouble had been made by "a certain schoolmaster who undertook to preach without regular license." This was subsequently arranged, and Rev. George M. Weiss became pastor in 1746–47. New Goshenhoppen Church was taken charge of in January, 1730, by Rev. Mr. Goetschiey, and the congregation then had forty-five families. This church was also the scene of divisions and factions in 1746. They were settled by the efforts of Messrs. Boehm, Schlatter, and Weiss, and the latter was placed in charge. Difficulties about the church site at Great Swamp began in 1850, the Mennonites having raised the money for Abraham Moyer to erect buildings on the tract claimed under the deed of 1726. It was also claimed by the Lutherans. The German Reformed rebuilt their church in the year 1769, and caused to be surveyed two and a half acres of ground for church use, wishing to appropriate the rest to the use of the schoolmaster and to the support of the school already put up. The Mennonites also built a church, and the Lutherans erected a school-house. In 1796 this dispute was settled. Half went to the German Reformed Church, and the remainder to the Lutherans and Mennonites. Rev. G. M. Weiss, who took charge of Great Swamp, and Old and New Goshenhoppen in 1750, remained there till his death, in 1762. No permanent supply was obtained until 1766, when Rev. John Theobald Faber, a native of Toggenheim, arrived from Holland, though Rev. Jacob Reiss officiated for a short time. Rev. Mr. Faber married the daughter of Erhard Rose, of Reading, and was still in the pastorate till 1779. Rev. Caspar Wack had, about this time, a roving commission, preaching at many points in Philadelphia County. He was born in Philadelphia in 1752, his father being an elder of the Reformed Church on Race Street. Dr. Weyberg educated him, and in 1770 he began service as a catechist, preaching at Tohicon, Indianfield, and Great Swamp. In 1773 he was given charge of several churches in Philadelphia, Bucks, and Northampton Counties.

The Trappe Reformed Church at Providence, in Montgomery County, now St. Luke's, was in existence at a very early date, and the log house used for a church was in use until 1835. For October, 1746, Mr. Schlatter's journal contained the following:

"When, on the 18th, I returned to Providence, I preached there in a barn, since the poor congregation there has not been able to build a church. When I had made them known my commission they obligated themselves to raise a salary of fifteen pounds annually in money or grain, or one hundred Holland guilders for the support of a pastor."

Rev. John Philip Leidlich took charge in 1748, and continued as pastor until his death, Jan. 4, 1784. The earliest tombstone in the burying-ground attached to this church chronicles the death of Evalt, who departed this life March 16, 1760, aged sixty-nine years. In Scull's map of Pennsylvania, published in 1770, this church is marked as "the Dutch meeting." The most common names upon the tombstones in the burying-ground of St. Luke's are Paul, Reed, Shenkle, Netz, Buckwalter, Hillborn, Casey, Ricknor, Daringer, Smith, Dull, Francis, Wiland, Schneider, Eselin, Shore, Tyson, Thomas, Spear, Everhart, Garber, Izenburg, Longabough, Koons, Espenship, Wanner, Hanger, Shade, Beidler, and Stauffer.

There was also a Reformed Church in Allemingle township, Philadelphia County, in 1746. Rev. John Brandmiller was sent there to preach in that year. Mr. Schlatter visited it in 1747. A congregation was in existence at Manatawny, or Oley, in 1746. Mr. Schlatter records a visit there in the autumn of that year, in company with Mr. Weiss. In 1748 he was with Rev. Mr. Bartholemacus and Rev. Mr. Hochrentiner, at the same place. Both congregations were kept up for many years.

One of the important points occupied by the Reformed Church as early as 1728 was Germantown, and here the Moravian, Lutheran, Mennonite, and Reformed Congregations made that remarkable effort to unite under a common church union. It was characterized by a liberality, sincerity, and Christianity superior to trammels of creed, and no rightful church history of America can avoid admiring mention of this seemingly futile but really wise and fruitful movement.

The Reformed Church in Germantown was begun by John Bechtel, who arrived in 1726, and held services twice daily at his house. In 1733 they built a small church, and made Bechtel their pastor. He was licensed by the authorities in Heidelberg, but not at that time ordained. The latter ceremony was performed at Germantown, April 18, 1742, by Rev. David Nitschman, a bishop of the Moravian Church. This ordination was not regular; but Bechtel was now willing to join in a movement for the union of all the Germans in Pennsylvania. A convention of delegates was called in January, 1742, in Mr. Bechtel's church, and they resolved to form themselves into a Christian Union, which "allowed ministers, congregations, and members to remain in their former ecclesiastical connections, and, subordinately to this unity, to control their own affairs. It was to be a unity in the spirit." Nitschman was strongly in favor of this movement, and Bechtel was charmed with his eloquence and doctrines. The Rev. John Philip Boehm, however, opposed the whole movement, and wrote a pamphlet against it. It was replied to by George Neisser, schoolmaster in Bethlehem. Bechtel endeavored to establish the German Reformed congregations upon the basis of the articles of the Synod of Bern, established in 1532. Boehm, Weiss, Dorsitus, and Goetschiey opposed the schism. Bechtel adhered. The Germantown Church did not approve of the heresy, and on the 9th of February, 1744, Rev. Mr. Bechtel was dismissed by the congregation which he had established and to which he had preached sixteen years. Rev. Mr. Boehm took charge of the congregation, preaching also at Philadelphia and Whitpaine, and was aided by Rev. Mr. Weiss, and others. When Rev. Michael Schlatter arrived, in 1746, it was resolved that the church in Germantown should unite with that of Philadelphia, and Mr. Schlatter served both congregations. He preached his first sermon at Germantown, Sept. 18, 1746, from Joshua xxiv. 14, 15. Sixty men pledged themselves to pay twenty-five pounds annually for the support of a minister. In 1747 Mr. Boehm withdrew from the Germantown Church, and on the 15th of February installed Mr. Schlatter as permanent pastor.

Their first meeting-house was in Germantown opposite the market-house. The front half was first built, and the back part was added in 1762. It had an ancient shingle-roofed steeple, after the Dutch manner, and was surmounted by a well-finished iron cock, being the Dutch sign of a church. It was a low, elongated stone building with its adjunct additions and bare beams to the gallery, and high and narrow pulpit and sounding-board.

From 1752 to 1755 Rev. John Steiner preached there, and then moved to Frederick, Md. Between 1755 to 1758 there was no regular supply. In the latter year Rev. John Alsentz, who had been a year in Philadelphia, took charge of the Germantown Church, remaining there about four years. Another interregnum of nearly ten years without a settled pastor followed. In 1772, and until January, 1776, Rev. John Conrad Albert Helfenstein, a native of Moszbach, and theological graduate at Heidelberg, was minister of this church.

The congregation in Philadelphia was organized by Rev. Mr. Weiss in 1732. The consistory of the church at that time was composed of Jacob Diemer, Michael Hillegas, Peter Hillegas, Joost Schmidt, Heinrich Weller, Jacob Siegel, and William Rohrich.

FIRST REFORMED CHURCH.

In 1734 the German Lutheran and Reformed Churches rented of William Allen a barn on Arch Street, near Fifth. By the agreement made between these congregations, in force when Zinzendorf came to Pennsylvania, the Lutherans, having a minister (Rev. Valentine Kraft), were to have the use of the barn three-fourths of the time. Zinzendorf sent a letter to Boehm, desiring to speak before the Reformed. The latter replied that the Lutherans might do as they chose, but he could not preach before the Reformed. When Mr. Schlatter arrived, in 1746, the congregation at Philadelphia had already commenced a new stone church, which he saw in its unfinished condition on the 17th of September. On the next day he preached, "in the old half-fallen church in Philadelphia," from Isaiah xlviii. 17, 18. On the 6th of December, 1747, he preached for the first time in the uncompleted new church at Philadelphia, because the old church was not large enough to contain one-half of the people who desired to attend worship. On the 14th of July, 1748, the church was still unfinished, and Mr. Schlatter loaned the congregation

Digitized by Google

sixty pounds, or four hundred and six Dutch guilders, out of moneys held by him in trust for religious uses, for the purpose of finishing it. Peter Kalm, the Swedish traveler, who visited Pennsylvania in 1748, says of this building,—

"The old German Reformed Church is built in the northwest part of the town, and looks like the church in the Ladngoord field, near Stockholm. It is not as yet finished, though for several years together the congregation has kept up divine service in it."

This building must have had a very quaint appearance. It was of stone, and was hexagonal in form. It is referred to sometimes, in old advertisements, as "the six-square Dutch Church." Its location was on the south side of Sassafras Street (or Race), east of Fourth, still occupied by the same congregation.

The church appeared prosperous, but in 1749 a dangerous schism took place, caused by the arrival of Rev. John Conrad Steiner, of Canton Zurich, Switzerland, an eloquent preacher. The Coetus, or Council, desired to put him in charge of the Lancaster Church, but he probably had other ambitions, for, remaining in Philadelphia and preaching occasionally, he gained a large party in Schlatter's church, and strife followed. Schlatter then made up his mind to withdraw, and he selected as the text for his farewell sermon Christ's lamentation over Jerusalem. But, overcome by his feelings, he paused, and read Matthew x. 14. He then left the church. A vote was taken at Philadelphia and Germantown as to whom the congregations preferred. It stood in Philadelphia for Steiner 140, Schlatter 110. Harbaugh's "Life of Schlatter" says that this vote was fraudulent, as the congregation had not for some years much exceeded the latter number.

Steiner's friends then appointed the 14th of January, 1750, for his introductory sermon. But the advocates of Schlatter were early in the church, and he was in the pulpit. Civil officers were present and preserved order. The church officers were appointed by Schlatter, and there was no disturbance. Steiner made another attempt to preach on the 28th of January. Of this Mr. Harbaugh says,—

"Steiner went to the church for that purpose before the time on that day, under conduct of twenty-four men, and entered the pulpit. When Mr. Schlatter arrived many had collected in and around the church, expecting a tumult, but a number of civil officers were present. Mr. Schlatter calmly requested Mr. Steiner, in the name of God, to come out of his pulpit, which, however, he refused to do, and made an effort to commence the services. Confusion and controversy ensued, which continued for about two hours, though without violence. The result was a mutual agreement that neither party should hold service there till the question as to who had the proper claim to the church was settled."

Peter Kalm, on the contrary, declares that there *was* violence on this occasion. He says,—

"In the year 1750 another clergyman of the Reformed Church arrived, and, by his artful behavior, so insinuated himself into the favor of the Rev. Mr. Slaughter's [Schlatter's] congregation that the latter lost most half of his audience. The two clergymen then disputed for several Sundays together about the pulpit; nay, people relate that the newcomer mounted the pulpit on a Saturday, and stayed in it all night. The old one being thus excluded, the two parties in the audience made themselves the subject both of the laughter and scorn of the whole town, by beating and bruising each other and committing other excesses."

It was agreed to leave the whole controversy to six men, five of whom should be Quakers and one an Episcopalian. John Smith, of the Society of Friends, was one of these arbitrators. Both parties bound themselves in the sum of two thousand pounds to stand by the award. It was given on the 6th of March in favor of Mr. Schlatter. Four days later, with one hundred and twenty of his adherents, he held worship in the church, and they were not further disturbed. The regular church was much injured by the dissension. Steiner had a large party, and, being very energetic, the old organization became disheartened and weakened. Schlatter himself wearied, and probably by his own request, at the end of 1750, the Coetus appointed him to visit Europe. On Christmas day the Lord's Supper was administered by Schlatter for the last time, and on the 5th of February, 1751, he set sail from New Castle. Steiner had then one hundred and seventy adherents, and they determined to build him a house, which would also answer for a church. It was placed at a little distance from the old one. Steiner's congregation engaged him "for a year only." Thus, in 1751, there were two German Reformed congregations in Philadelphia, a city that could then scarcely support one.

The history of these rival congregations for the next few years is interesting. Steiner only stayed in charge of his church till 1752, when he thought it advisable to remove to Germantown, and Rev. Mr. Rubel took charge. Rubel was high-tempered, and caused much disturbance. Meanwhile the parent church had been supplied during Schlatter's absence in Europe by Rev. Samuel Luther, who had been a school-teacher in 1749, and by other Reformed Church ministers. In 1752, Mr. Schlatter returned, and again took charge of his old congregation. In 1755 the Coetus advocated the simultaneous withdrawal of Rubel from the new church and Schlatter from the old one, so that the weak and disputing congregations could be united under a new minister, and this was accomplished the same year, both ministers preaching their farewell sermons, and, after some irregular supplies, Rev. William Stoy, of Tulpehocken, Berks Co., a Westphalian by birth, and ordained by the Amsterdam Classis, was placed in charge for one year. Though an able man, he occasioned much talk by marrying, as was thought, below his station, and by persuading the young lady to break a previous engagement, so he did nothing to heal the dissensions still rife, and retired at the end of twelve months. During part of 1758, Rev. John G. Alsentz acted as pastor, and was succeeded by other "temporary supplies" until 1763, in which year Rev. Caspar Dietrich Weyberg, a Swiss clergyman, who had been preaching at Easton, Pa., for a year, received a call. He began his duties November 13th, and was able, by his tact and zeal, to entirely heal the wounds which had been so painful for over thirteen years. The Philadelphia congregation thus united contained over two hun-

dred heads of families, and thenceforward prospered greatly.

The first cemetery of the Reformed Church was a lot of ground on the Northeast (now Franklin) Square. The patent the church claimed under was issued Dec. 14, 1763, by John Penn. The first warrant granted to Philip Boehm and Jacob Seigel, dated June 1, 1741, from Thomas Penn, and notes of several payments and surveys previous to 1763 are in existence. The tract was between Sixth and Seventh Streets, south of Vine, and measured three hundred and six feet north and south by one hundred and fifty feet in width. The sum of £189 0*s.* 7*d.* was the last payment for the above-described piece of land. There was a long struggle over this property, the city claiming that the grant to the church by the Penns was illegal, and that the Penns did not own the property on the square.

The controversy was revived from time to time by action of Councils, and to the church it was a continual worriment. The city had ordered suit to be brought against the congregation before the year 1800. But in February, 1801, City Councils passed a resolution directing that the suit should be discontinued on condition, first, that the congregation would yield possession of all the square in which interments had not been made; second, that the congregation should accept a lease from the corporation of that part of the lot in which interments had been made, but for which the church had no patent; third, that the congregation should not erect buildings on that portion of the lot for which it had a patent, and that length of possession should be no bar to the city's rights.

A lease was signed on the 28th of September, 1801, which gave to the congregation peaceable possession for fifteen years, and for some time nothing more was done in relation to the controversy. In the autumn of 1816 the congregation asked for a renewal of the lease for ninety-nine years. It was refused, but a short lease was granted.

In May, 1818, a resolution was before Councils directing that the Northeast Public Square should be closed to burials after the 15th of June, but both branches could not be brought to pass it. In October a committee was appointed to settle with the German Reformed congregation. In April, 1821, Councils passed a resolution, absolute in its terms, which ordered the German Reformed congregation to remove from the square. The controversy remained in this condition, the church still holding possession of the lot, until the Supreme Court's decision favorable to the city. It was found that the five public squares —Centre, Northeast, Northwest, Southeast, Southwest—were granted to the city of Philadelphia for public uses by William Penn, under the charter of 1701, and were, in fact, dedicated to that use by the original plan of the city, 1682–83. The uses of the inclosure seem to have been forgotten for many years.

By act of Feb. 19, 1800, the Legislature granted to the German Reformed congregation for a burial-place and charity school one-half of the lot bounded south by Mulberry, east by Schuylkill Sixth [Seventeenth], north by Cherry, and west by Schuylkill Fifth [Eighteenth], being two hundred and eighty-eight feet in length north and south, and one hundred and ninety-eight feet broad on Arch Street. The grant was sought by the church in consequence of the difficulty which existed in reference to the use of the burial-ground in Northeast Square.

In 1762 a new church was organized in Philadelphia, and proved an unfortunate enterprise. Its first evidence of existence was given July 30th, when John Gamber, Johan Stillwagen, Barnhardt Lauwerswyler, Christopher Gellan, William Clampfer, elders; Caspar Geyer, Adam Eckert, Philip Boehm, George Wack, George Justus, and Jacob Schreiner, deacons, all representing a congregation in Philadelphia, signed a call to the Rev. Mr. Rothenbuhler, of Berne, Switzerland, then preaching at New York. He was ordained in 1752, and came to America in 1760 or 1761.

In the spring of 1763 he began preaching in Philadelphia, and soon made application for admittance to the Coetus, but was refused because said to be intemperate. He remained with the congregation, which received the name of St. George's. They purchased a lot on Fourth Street below Story (now called New Street), and prepared for the erection of a large church building, but they got heavily into debt. The next year Benjamin Franklin sent a letter to Jonathan Williams, of Boston, by Mr. Rothenbuhler, in which that gentleman was recommended to the charitable of that city, his object being to make collections for the purpose of paying the debt of St. George's. This scheme failed. Rothenbuhler died Aug. 9, 1766. The church became disorganized; the heavy ground-rent pressed severely, and several of the members, who had made themselves personally responsible for the debts, were in a bad situation. Lednum's "Rise of Methodism" states that some of these parties were sent to jail for the debts they had contracted, and when their acquaintances inquired of them, as they looked through the prison windows, "For what were you put in jail?" They answered, "For building a church." To go to jail for the pious deed of building a church became a proverb in the city of Brotherly Love. In January, 1769, they petitioned the Legislature to pass an act allowing them to sell the church, pay their debts, and distribute the balance, if any remained, among the first contributors. This act was passed Feb. 18, 1769. The ground had been taken up in 1763 by John Frick, Jacob Rothe, John Haugh, Conrad Alster, Valentine Kern, Lawrence Bomberger, Sigmond Hagelganns, Peter Teiss, Robert Shearer, John Scheh, Christian Rothe, and Joseph Job, upon ground-rent of Dr. Shippen. The too-expensive building was in size fifty-

five by eighty-five feet. The church was sold June 12, 1770, to William Branson Hockley for seven hundred pounds. Two days afterward he transferred it to Miles Pennington, a Methodist, for six hundred and fifty pounds, and it has since been known as the Methodist Episcopal Church of St. George.

In 1769 the Frankford Street Reformed Church, now the Frankford Presbyterian, was organized chiefly by Swiss from Basle. The following names appear in the first congregation: Rudolph Neff, Jacob Neff, George Kaster, Sr., George Kaster, Jr., Frederick Kaster, Rudolph Mower, Gerick Judy, Peter Mood, Samuel Neswinger, Jacob Myer, Jacob Lelelly, Martin Laty, Henry Rohrer. To these were afterward added,—Jacob Zebley, Jacob Oneyer, Rudolph Skutes, Leon Hardfrollick, Jacob Schmidt, David Bleuh, Frederick Sheibly, Leonhardt Kaufman, and Ulrich Neff. A lot was purchased on a street now called Church Street, running from Frankford to Paul Street, from Henry Paul, by deed to Henry Rohrer, dated Feb. 16, 1769. The latter conveyed the property on the 12th of October to the congregation. April 23, 1770, John Finney transferred to them a lot on which a parsonage was afterward erected. The first church was built on the southeasterly part of the lot. There were no pews, but benches were used. The work was commenced in April, 1770; the corner-stone was laid on May 4th by Rev. Frederick Foehring, and the church was dedicated November 11th. This church cost £382 13*s.* 6½*d.*, and by the 13th of February, 1771, £375 5*s.* 9*d.* had been collected from members and others, and the persons authorized to receive subscriptions were discharged. Rev. Mr. Foehring was in charge of this church probably until the Revolution. Rev. John Christian Stalschmidt supplied the pulpit in August, 1770.

We now come to the Revolutionary period, and the condition of the German Reformed Churches that clustered in and about Philadelphia at that time.

Harbaugh, in "The Fathers of the Reformed Church," upon authority of Jonas Detwiler, of Montgomery County, states that John H. Weikel was pastor at Boehm's, Whitpaine, and other churches in the northwestern part of Philadelphia County (now Montgomery County) from 1776 to 1781. At the commencement of the Revolutionary war he preached a sermon from Ecclesiastes iv. 13,—"Better is a poor and wise child than an old and foolish king who will be no more admonished," which so angered his congregation that he soon resigned.

In 1784, upon the 28th of March, Rev. John Herman Winkhaus received a call from the Whitpaine congregations at Boehm's and Wentz's churches, and the churches at the Trappe and Worcester. He was a native of Altena, in Prussian Westphalia, born Nov. 26, 1758, and educated at the Latin school at Limburg and the University of Duisburg, in Cleves. He remained in charge until April 9, 1787, when, receiving a call from Philadelphia, he resigned. For two years the churches at Whitpaine, Worcester, and Trappe had no pastor. Rev. Philip Reinholdt Pauli succeeded in 1789, and served till 1793, preaching in Whitpaine, and in Boehm's and Wentz's churches. He was succeeded by Rev. Nicholas Pomp, who was in charge from 1794 to 1797,—he being, at the time, also minister at Falkner's Swamp and Goshenhoppen. In 1796, Rev. Lebricht Frederick Herman took charge of these congregations as a supply, holding the position about six months. He was born in the principality of Anhalt Cothen, Oct. 9, 1761. He was educated at the Orphans' House at Halle and at the university in that city. From 1782 to 1785 he was assistant preacher at Bremen, and was then called by the deputies of the Synod of Holland to go to Pennsylvania to assist in supplying the great destitution which existed in the German Reformed Church. He was ordained to that work in February, 1786, with Rev. Mr. Troldenier. He arrived in August, 1786, and was called to the congregations of Easton, Plainfield, Dryland, and Greenwich, N. J. Four years afterward he had a call to Germantown Church, where he remained twelve years. Rev. Samuel Helfenstein, son of Rev. John Conrad Helfenstein, preached in this district from 1796 to 1799, and was followed in 1799 and 1780 by Rev. Thomas Pomp. About 1783 Rev. Nicholas Pomp accepted a call to Baltimore (from Falkner's Swamp). Rev. Frederick Dallicker (name derived from De la Cour) died while pastor at Falkner's, Jan. 15, 1799. Rev. Lebricht F. Herman assumed charge of that church and also the one at Frankford, in 1800, and preached many years in the tall hour-glass-shaped pulpit perched in one corner of the square building there. Rev. Mr. Faber's successor at Great Swamp was Rev. Frederick Vandersloot, who resigned in 1786, after seven years' service, and Mr. Faber was recalled and acted till his death, Nov. 2, 1788.

The Germantown Church, in 1775 in Rev. Mr. Helfenstein's charge, passed under the pastorate of Rev. Samuel Dubbendorf May 17, 1777. He had left the chaplaincy of a Hessian regiment. He afterward preached at Lykens Valley. Rev. John C. Helfenstein was recalled to Germantown, and died in 1790, leaving five sons, three of whom were ministers. Dr. Helmuth and Dr. Dallicker preached funeral sermons. Dr. Hermann, as noted, was his successor. During 1793 Gen. Washington and his family attended this quaint, low, stone church in Germantown. Ministers from here generally supplied the Frankford Church for some time after the death of Rev. Christian F. Foehring, in 1779. In 1787 the Frankford congregation was incorporated, and Rev. Philip R. Pauli was made exhorter though not yet ordained. This church was used by the Americans as a prison. Lately, in the journal of a Hessian officer, discovered in Hesse-Cassel, was found an entry under date of 1777, stating that he was in the battle of Trenton and captured, and he says that "they were imprisoned for

a time in a church of a little village called Frankford, above Philadelphia."

Dr. Caspar Deitrich Weyberg, to whom allusion has been made as taking charge of the Race Street Church, Philadelphia, when the Revolution began, was a true patriot, acted as chaplain for the Continentals, stayed in the city when the British entered, and even preached the doctrines of freedom to the Hessian soldiers in their own language. He was causing many desertions when the British put him in prison, and turned his church into a hospital. May 5, 1779, he speaks in a letter of beginning again to preach, but in the school-house. The first sermon which Dr. Weyberg preached after being liberated from prison, was from the text, Psalms lxxix., "Oh, God! the heathen are come into thy inheritance. Thy holy temple have they defiled." Dr. Weyberg died Aug. 21, 1790, and was buried by the side of his predecessor, Mr. Steiner, in the German Reformed graveyard, in the Northeast (now Franklin) Square. Dr. Weyberg was succeeded in the Race Street Church by Rev. John Herman Winkhaus, who preached his introductory sermon at Philadelphia Church, Sept. 26, 1790, only a month after Dr. Weyberg's death. He remained in charge for a short time over three years, when yellow fever, caught while in his ministrations, caused his death at the age of thirty-four. Samuel Weyberg, Jr., supplied the pulpit for a short time. Rev. Dr. William Hendel assumed the pastorate Feb. 9, 1794. He was a native of the Palatinate, and had been preaching in the Tulpehocken region since 1769, at times supplying no less than nine congregations, and doing thoroughly pioneer work. The arduous labors of the yellow fever season of 1798 proved too much for the venerable clergyman, and he died of the epidemic September 29th. Dr. Helmuth, of the German Lutheran Church, preached the funeral sermon.

The formation of Montgomery County out of the upper portion of Philadelphia County, by an act of Assembly passed on the 10th of September, 1784, takes from our consideration the history of the German Reformed Churches situated within the new county. There were in 1800 in this district churches at Whitpaine and Wentz's, and the churches at the Trappe, Worcester, Falkner's Swamp, Great Swamp, and at Old and New Goshenhoppen. There only remained of the German Reformed Churches in Philadelphia the First Church, in Race Street, below Fourth, the church at Germantown, and the church at Frankford. The death of the Rev. Dr. William Hendel by the yellow fever (1798) left the Philadelphia Church six months without a settled pastor. On the 14th of January, 1799, the congregation elected Rev. Samuel Helfenstein, D.D. He was promised a salary of three hundred pounds and a parsonage. Mr. Helfenstein was the son of Rev. John Christian Albert Helfenstein, who for several years was the minister of the German Reformed congregation in Germantown and elsewhere. His mother was a native of Philadelphia, and her maiden name was Kircher. Samuel was born at Germantown on the 17th of April, 1775, and was educated by the Synod to which his father had belonged. His oratorical powers were of a high order, and he was a leader among his ministerial brethren. Rev. David Van Horne, in his "History of the Reformed Church in Philadelphia," thus describes the church built in 1772, in which Rev. Mr. Helfenstein preached:

"It was ninety feet long on Race Street, with large double doors near either end, having at their tops a very heavy ornamented coping. A low brick wall, covered with flat stones, ran along the sidewalk in front, upon which was an iron railing or fence, with gates located at the few steps fronting either entrance. The building was of brick, with here and there a brick burned black and glazed, set in the wall by way of ornamentation. Between the doors in front were two windows, with corresponding ones in the second story for lighting the gallery. The east gable, on Sterling Alley, had two windows below, with a large central one in the second story and a large circular one in the attic. The width of the building was sixty-five feet, and its height was forty-two feet. In the rear were two doors, corresponding to those in front, between which was located a high pulpit with its spiral staircase, and a sounding-board projecting over the head of the speaker. Directly opposite, in the front gallery, was the organ, where the choir was stationed to sing the German hymns and chorals. The ceiling was high and arched, the gallery broad and firmly set, and the pews above and below deeply set, in the old-fashioned style."

On the same lot was the school-house, built in 1753. In 1793 it was torn down to make way for a larger structure in the rear of the church, which building has served the purposes of education ever since, and is still standing. The first Sunday-school was opened by this congregation on the 14th of April, 1806, with forty scholars. In the earlier history of the church, the schoolmaster and the sexton resided in this building, the schoolmaster being also the organist. During Dr. Helfenstein's time he had about thirty students studying under his direction for the ministry.

About the beginning of the century a new question began to call for a settlement. The English-speaking members of the congregation desired sermons in English. Dr. Helfenstein was conservative on this point. In April, 1804, a consistory resolution to call a meeting to consider the question was lost through some informality. In 1805 the Synod was petitioned to pass a resolution recommending that preaching in the English language be allowed every third Sabbath for the "benefit of those who do not understand the German." On the 9th of July, 1805, this motion was offered before the consistory,—

"*Resolved*, That, as the board of corporation of the Race Street Church, and in conformity to the wish of Synod, we will introduce the English language into our services before the congregation shall be destroyed through strife."

The vote upon this was a tie, Dr. Helfenstein voting in the negative. "A proposition followed," says Rev. David Van Horne, "from the party wishing English services for compromise; but all efforts for an amicable arrangement failed. Finding that there was no hope of receiving any consideration in their desires, the Englisl [illegible] dividing the congregation

almost equally, and taking fully one-half of the members." This occurred in the year 1806; and the subsequent progress of the seceders belongs to the history of the Dutch Reformed Church, hereafter to be given. The remainder of the church clung to the German, and they had a season of enjoyment of that language for eight or ten years. A new English party then sprung up in the congregation. Like those who had gone before them, they demanded that some of the services should be held in English, and their elders resisted stoutly. The question was carried into the church elections, but the English party was in the minority. In 1817 the board of corporation, being German adherents, became suspicious that Mr. Helfenstein was inclined to help the English innovators, and without any notice of complaint or citation dismissed him from the pastorate. The next Sabbath he took his stand before the altar, and gave an account of what the board had done. After this he withdrew, without attempting to hold religious service, his statement having created for him much sympathy. The board then closed the church, and a lawsuit was commenced, which ended in the Supreme Court issuing a mandamus, compelling the board to open the church doors. On the Sunday after this judgment was rendered, Mr. Helfenstein re-entered the pulpit. Upon this, the leader of the German party rose and said, "Come, my brethren! this is not our minister;" upon which the German party left the church *en masse*. This sudden event did not entirely change the character of the preaching in the old church. The use of the German language was still continued, but the English was also introduced. The two tongues were used alternately in the services, and so continued until after 1825.

The members of the Race Street congregation, who withdrew in September, 1817, organized themselves under the title of the German Reformed Church of the Northern Liberties,—afterward the Independent German Reformed Church of the Northern Liberties. They opened their meetings in the old Commissioners' Hall of the Northern Liberties, on Third Street, above Buttonwood, and organized with sixty-seven members, but were mostly poor in this world's goods. On the 29th of December, 1818, they called as pastor Rev. Frederick William Vandersloot, a native of Dessau, Germany, born Nov. 11, 1773. He had come to America in 1801, was licensed to preach in 1802, and ordained in 1803.

They purchased a lot of ground on the west side of St. John Street, between Tammany and Green. The corner-stone was laid May 8, 1819, and a plain brick church put up, the dimensions of which were sixty by fifty-five feet. In December, 1820, they petitioned the Legislature for authority to set up a lottery by which seven thousand dollars might be realized for church purposes, but it was denied.

In March, 1824, Rev. Mr. Vandersloot accepted a call to Virginia, preaching in several counties there, and afterward, returning to Pennsylvania, preached in York County till his death, in 1831. He was a fine linguist, composed many hymns and poems, and was gifted with good musical talents. When Mr. Vandersloot resigned his Philadelphia pastorate, Rev. Henry Bibighaus became his successor. Bibighaus was son of a Bucks County farmer, who engaged in business, taught school, became an organist, and after reaching middle age studied theology under Dr. Helfenstein, Sr., and was ordained in October, 1824.

There was a school-house in the Northern Liberties about the year 1800 which was alternately supplied by pastors of the German Reformed and the Lutheran Churches. There was also a school-house in Kensington similarly occupied by alternate services. Van Horne says,—

"Both of these school-houses were supplied with the pulpit, were under the special control, and were the property, of the two churches, the Reformed owning the one in Kensington."

Rev. Mr. Herman, who was preaching in Germantown in 1800, gave up the use of the English in the pulpit in that year, and therefore accepted a call from the churches at the Swamp and Pottstown, and also afterward supplied congregations in Chester, Montgomery, and Berks Counties. His wife was Mary Johann, daughter of Daniel Fiedt. They educated five sons for the ministry. He died in 1848, aged eighty-seven. After a short interregnum the Germantown Church was permanently supplied by Rev. J. W. Runkel, and he preached in English and German after March 1, 1802. Mr. Runkel was born at Oberengelheim in 1749, came to America at the age of fifteen, entered the ministry, and engaged in widespread and highly-successful missionary work for years throughout Maryland, Virginia, and Pennsylvania. In 1805 he accepted a call in New York City, but in 1812 returned to Germantown to spend his declining years, preaching only at times, until, in 1815, he received a call from the churches at Gettysburg, Pa., and Taneytown and Emmittsburg, Md. In 1819 he confined his services to the Gettysburg Church, which he served for seven years, after which, being well stricken in age, he withdrew from active service Nov. 5, 1832, in the eighty-fourth year of his age. He was one of those typical evangelists of the frontier, and his endurance, energy, and enthusiasm were marvelous.

Rev. F. W. Vandersloot supplied the pulpit from 1811 to 1813, and was succeeded in 1814 by Rev. Caspar Wack. He is believed to have been the first German Reformed minister in the United States who preached in English. Though for a number of years his services were in German, he was required by his residence in the country to keep up his English education. Mr. Wack remained at Germantown, preaching quite as much in English as in German, until 1826, attending also to the church at White Marsh. He subsequently supplied the church at Pikeland,

Chester Co., and died at Trappe, July 19, 1839, aged eighty-seven.

The history of the German Reformed Church at Frankford during the few years more in which it adhered to that communion is substantially that of the church at Germantown. Rev. Mr. Runkel preached every fourth Sabbath in the German language, at other times in English. He settled with the officers of the church, on the 13th of November, 1805, for three and a half years' services at the rate of one hundred dollars per annum. What was called the Church Company, composed of Abraham Duffield, John W. Clellan, and others, leased the German Reformed Church at Frankford, Feb. 13, 1803, for three years, time to expire on the first Sunday in April, 1806. The German Reformed had possession on the fourth Sunday, but at other times the services were by ministers of other Protestant sects in the English language. The last election for officers of the German Reformed Church was held Jan. 5, 1807, and the following were elected: President, John Rohrer; Secretary and Treasurer. George Castor; Trustee, Joseph Dearman; Elder, Caleb Earle; Deacon, John Meyers; Sexton, George Rohrer. These officers petitioned the Presbytery of Philadelphia in April, of the same year, for a supply in the pulpit, which ultimately led to the incorporation of the members of the German Reformed Church of Frankford on the 9th of April, 1808, as the Frankford Presbyterian Church of Frankford, in the township of Oxford and county of Philadelphia.

The Reformed Church of the United States, or German Reformed, have the following church organizations in this city in 1884:

English.—Reformed Church Publication Board, 907 Arch Street. Rev. Charles G. Fisher, superintendent.
First Church, Tenth and Wallace Streets. Rev. D. Van Horne, D.D.
Christ Church, Green Street, below Sixteenth. Rev. James Crawford.
Grace, southeast corner Tenth and Dauphin Streets. Rev. A. B. Stoner.
Heidelberg, Nineteenth and Oxford Streets. Rev. James I. Good.
St. John, Haverford Avenue, above Fortieth Street. Rev. John P. Stein.
Trinity, Seventh Street, north of Oxford. Rev. D. Ernest Klopp, D.D.
German.—Bethlehem, Norris and Blair Streets. Rev. John G. Neuber.
Emanuel, Thirty-eighth and Baring Streets. Rev. John Knelling, D.D.
Emanuel, Bridesburg. Rev. William F. Forster.
Salem, Fairmount Avenue, below Fourth Street. Rev. F. W. Berlemann.
St. John Chapel, Ontario and Tulip Streets. John G. Neuber.
St. Luke, Twenty-sixth Street and Girard Avenue. Rev. W. Walenata.
St. Mark, Fifth Street, above Huntingdon. Rev. G. A. Scheer.
St. Paul, southeast corner Seventeenth and Fitzwater Streets. Rev. A. E. Dahlman.
Zion, Sixth Street, above Girard Avenue. Rev. Nicholas Gehr, D.D.

THE DUTCH REFORMED.

The first Dutch pastor, Rev. Everasdus Bogardus, sent to America, reached New York about 1627, and on his return to Holland, in 1647, was lost at sea. John and Samuel Megapolensis succeeded him. In 1738 some of the Dutch Reformed ministers in New York proposed having an association of clergy, called the Coetus, which was done in 1738. In 1754 the effort to develop this body into a regular Classis narrowly failed of success. In 1771, under the noted Rev. J. H. Livingston, the Dutch Reformed Church in America was divided into five Classes with a yearly General Synod. The first preaching in English in this church was that of Rev. Dr. Laidlie, of Scotland, in 1764. The last Dutch sermon was preached in New York in 1804. The doctrines of the church are now, as always, Presbyterian.

In the previous division we alluded to the schism in the First Church of the German Reformed, in 1806, on the language question. The new organization developed into the first congregation of the Dutch Reformed Church in Philadelphia or vicinity. It is probable that at the time of withdrawal they had no definite idea of establishment, whether they would become connected with some other denomination than the Reformed, or whether they hoped to obtain from the superior authorities of the German Reformed Church the privileges which had been denied them by the members of their own congregation. Their desires and hopes were evidently for a continuance of connection with the German Reformed Church. They adopted the title of the Second Reformed Association, and obtained a room for meeting in that cradle of congregations, the academy, on Fourth Street, below Arch. According to the diary of Joseph Eastburn, he began to preach for them regularly on the third Sabbath in July, 1809, and gave his services to the congregation during the whole of the year, except when called by duty to the almshouse, the prison, and the hospitals, until the congregation obtained Rev. James K. Burch as regular preacher. The name was then changed, in January, 1810, to the Evangelical Reformed Congregation of the city and vicinity of Philadelphia. On the 18th of January, 1810, the trustees addressed a letter to Joseph Eastburn, signed Philip Peltz, president, and Matthias Gebler, secretary, in which they expressed their sincere thanks "for the many services you have rendered the congregation, and in being instrumental [under God] of adding another church to the cause of Christ." They also inclosed one hundred dollars, saying that it was an inadequate acknowledgment, but all that they could then raise. He at once turned the amount over to the treasurer as a subscription toward a church building. Rev. Mr. Burch, their new pastor, had been a Presbyterian, and led the party that went out from the Third Presbyterian Church, and organized the Fifth. The congregation grew rapidly, and on the 14th of April, 1810, Edward Pennington and wife conveyed to the Evangelical Reformed congregation two lots of ground on the west side of Crown Street, north of Race, bounded on the south by the Race Street lots. The whole front on Crown Street was one hundred and five feet; one lot was eighty-seven and a half feet deep, the other one hundred and seventy-five feet deep. The corner-stone was laid May 27, 1810, and the church was dedicated June 28, 1811. It was of brick, eighty-five feet by sixty-two and a half feet, a

substantial building, having its longest side on Crown Street. The pulpit stood on one of the sides, leaving the bulk of the congregation on either side of the preacher. The galleries were perched up midway between the floor and the ceiling. The ascent to the pulpit was by means of circular stairs.

Meanwhile the tendency was toward a union with the Dutch Reformed, and in February, 1813, the title of the church was changed from the Evangelical Reformed to the First Reformed Protestant Dutch Church. It was enrolled in the Classis of New Brunswick in April of that year, and was regularly organized in May. Mr. Burch resigned, and was succeeded by Rev. Jacob Broadhead, who was installed on the evening of Oct. 10, 1813. Rev. Jacob Broadhead had been one of the pastors of the Collegiate Church, New York, was a graduate of Union College, class of 1801, and tutor in that college for three years, also pastor of the church at Rhinebeck between 1804 and 1809. He retained charge of the First Philadelphia Church till 1836, and then returned to service in New York. He died in 1855, aged seventy-three.

The Second Reformed Dutch Church was known previously as the Tabernacle and Independent Tabernacle, and afterward as the Seventh Presbyterian Church. The congregation bought two pieces of ground for burial purposes. The first was purchased of Henry Pratt, May 11, 1824, and was on the south side of Sassafras [Race] Street, between Schuylkill Seventh [Sixteenth] and Schuylkill Eighth [Fifteenth] Streets. It had a front of eighty feet on Race Street and sixty feet on Cherry, and extended two hundred and ninety-two feet to the latter street. Another lot was purchased of Thomas Reeves, Jr., and wife, April 11, 1825. It was on the north side of Cherry Street, east of Tenth. It had a width of thirty-three feet on Cherry Street, and a depth of one hundred and forty-four feet. The College of Pharmacy is built on the northern portion of this lot.

The First Reformed Dutch Church, on Spring Garden, had its origin in religious meetings held in Penn Township Hall, at Garden [now Eighth] and Buttonwood Streets, which resulted in an association probably in 1817. On the 27th of March, 1818, Abraham Warthman conveyed to the "First Reformed Dutch Church in the District of Spring Garden," a lot on the east side of Garden [Eighth] Street, between Pegg's Lane and Buttonwood Street. It was fifty feet front by one hundred and thirty-seven feet deep, subject to a ground-rent of one hundred and seventy-five dollars. John Hyde on the same day conveyed the adjoining lot, which was fifty feet front and one hundred and forty feet deep, subject to one hundred and forty dollars ground-rent. Garden Street was in direct line with Eighth Street, and was considered to commence as a separate street at Callowhill Street. Afterward it was considered a portion of Eighth Street, and few persons now know that it was once disconnected with that street. A church building was erected upon it, which stood back from Garden Street. It was of plain brick, sixty feet front by seventy feet deep. On the 3d of May, 1818, the church was opened for services. Sermons were preached by Rev. Mr. Broadhead in the morning, by Rev. Mr. Parker in the afternoon, and by Rev. Mr. Valentine in the evening. Rev. Mr. Hoff was pastor of this church in 1821. Trouble shortly afterward ensued, and the congregation was nearly broken up for two or three years. On the 3d of July, 1824, John Douglass, sheriff, sold to Frederick Gaul the entire lot, with the brick building and an adjacent wooden school-house. An effort was made to reorganize the church, and the pews were disposed of in August of that year. Mr. Gaul bought the property in hope that the congregation might be revived, and held it for some years, during which time religious services there were irregular.

The First Reformed Dutch Church, at the northwest corner of Seventh and Spring Garden Streets, is a very handsome building seventy-one by one hundred and fifteen feet. The corner-stone was laid Dec. 15, 1853, and the building was dedicated April 29, 1855.

At present the Reformed Dutch Church has the following organizations in this city:

First, corner Seventh and Spring Garden Streets.

Second, Seventh Street, above Brown. Rev. Nathaniel I. Rubinkam.

Third, chapel, 909 North Broad Street.

Fourth, Cotton Street, above Cresson, Manayunk. Rev. Cornelius Schneck.

Fifth, Otis Street, between Memphis and Cedar. Rev. C. F. C. Suckow.

THE LUTHERAN CHURCH.

The first emigration of Lutherans to America was from Holland, and settled at New York in 1626; the second was the Swedish colony of 1636; the third, and most important and influential, was that of German Lutherans during the first half of the eighteenth century, which to a large extent was the result of the persecution of the Palatinate Protestants. Germany, Switzerland, and Alsace sent thousands of earnest Lutherans to America, though at first they had very few regularly-appointed pastors, and often had to be satisfied with the services of men of doubtful standing. It is a well-known fact that in the time of Queen Anne, when thousands of German Protestants from the Alsace, the Palatinate, and adjacent parts had arrived in England, and encamped near London, many of them Lutherans, about three thousand were in 1710 transported to New York. Within the following years there was a strong influx of Germans in Pennsylvania. In 1717 the Colonial Records of Pennsylvania state that the Governor called the attention of the Council to the unwonted influx, and it was ordered that each emigrant should within a month of his arrival report himself at Philadelphia, and take the oath of allegiance. Between 1727 and 1742 thousands of German settlers arrived, and, still having almost no ministers, were forced to depend on the

kindly offices of the few Swedish Lutheran clergymen then in the colony. Meanwhile, in 1733, Revs. Bolzius and Gronan began faithful work among the Saltzburg colonists, who that year settled in Georgia, at Ebenezer, where the churches they established still flourish. About this time Lutheran settlements were made at Purrysburg, then in Beaufort County, S. C., in Spottsylvania or Virginia (1735), and in Waldsborough, Me. (1739). It was in the Middle States and Maryland, and chiefly in Pennsylvania, that German Lutheranism took a firm hold. There is a profound interest attached to even the slightest local records of the church, whose attendants number more than thirty millions of souls, whose doctrines prevail at such universities as Leipsic, Halle, Göttingen, Jena, Rostock, Greifswalde, and others, and whose writers, theologians, and evangelists will compare favorably with those of any other evangelical denomination.

It was in 1726 that we first hear of a German Lutheran clergyman in Pennsylvania ministering to the poor and toiling colonists. Most of the church histories say there were no clergymen of this denomination in Pennsylvania prior to about 1740, but this is an error. In 1726, Rev. Anthony John Hinckle was complained of before the General Assembly, as having "married persons not according to the laws of the province." He was arrested, examined, and ordered "to be discharged on payment of costs." This he refused to do, and was sent to jail, but for how long is not known. We also learn that Johann Caspar Stoever, "missionary and student," came in 1728; John Philip Streiter, in 1737. Rev. Valentine Kraft and Rev. Mr. Falkner (Swedish Lutheran) were also in the province. Lutheran churches were built by 1730 at New Hanover, and near Lebanon, where Rev. Mr. Stoever labored in 1733. The following year there was a congregation at York. The Lutherans and Reformed had worshiped in a barn on Mulberry Street, near Fifth, about 1734. But none of these had settled pastors, nor seemed to contain the elements of permanency. An attempt was soon made under somewhat more favorable auspices. The Wicaco Swedish Church was too distant to accommodate the Germantown people, and in 1737 the First German Lutheran congregation in Pennsylvania was organized at Germantown, the corner-stone of a church being soon laid, and the fraternal services of Rev. John Dylander, of the Swedish Church, being called into requisition. The new church did not thrive; there were only seven members in 1740. In 1742, Valentine Kraft, who had been dismissed from the Lutheran congregation at Philadelphia, went to Germantown, where he was in charge of the church for one year, but he was dismissed by that congregation also. Rev. Henry Melchior Muhlenberg, who was then pastor of the church in Philadelphia, also took charge of one in Germantown.

Dr. H. M. Muhlenberg is undoubtedly the brightest and most heroic figure in the early history of the Lutheran Church in America, and his arrival constituted a new era, coming, as he did, with zeal and scholarship, to become the patriarch of Lutheranism here. His education was of the highest order; besides easily reading Greek and Hebrew, he was able to speak Latin, German, French, Dutch, English, and Swedish, all with ease and fluency. The history of his labors would be nearly a complete history of the church from the time of his arrival till his career closed, half a century later. Inspired with religious fervor in the school of Francke, the noted German theologian, director of the Halle University, he was enabled to carry on in some degree the same sort of work among the Pennsylvania German Lutherans that Edwards did in New England and the Wesleys and Whitefield in England and America. All these were his earlier contemporaries, and no one of them labored with greater self-devotion.

Muhlenberg's call to this new field was in September, 1741, in consequence of three deputies having been sent to England and Germany from three congregations in Pennsylvania.

After a visit to the Georgia and Carolina colonies, he reached Philadelphia Nov. 25, 1742. Upon his arrival Rev. M. Kraft was "occupying a disputed jurisdiction, and Muhlenberg was soon involved in a difficulty with the Moravian leader, Count Zinzendorf, but this was amicably settled. His first sermon, December 5th, was in "the old log barn" on Mulberry Street, and on that afternoon he preached in the Swedes' Church, Gloria Dei, where he often officiated after Dr. Dylander's death.

The Philadelphia congregation in 1743 consisted of one hundred persons. The trustees and elders were J. V. Unstadt, L. Bast, J. H. Keppele, J. G. Burghardt, J. D. Seckel, H. Miller, and L. Herman. It was arranged that Mr. Muhlenberg was to serve each congregation—Philadelphia, New Providence, and Hanover—four months in the year. Nesman, the Swedish minister, in this year reported that "there were twenty Lutheran congregations in America."

The Philadelphia Lutherans decided to build as soon as possible. In 1743 they bought for two hundred pounds the lot of ground on Fifth Street, above Mulberry, extending northward from the street called Appletree Alley to Cherry Lane. On the 5th of April, 1743, the corner-stone was laid, and on the 20th of October divine service was held. At that time the windows had no sashes, and light was admitted through the cracks in the boards, which were placed in the window-frames. The congregation was seated on boards placed upon blocks. This building was seventy feet long, forty-five feet wide, and thirty-six feet high. It had a steeple fifty feet high, but this being put up before the walls were dry, the latter began to spread, and the steeple was taken down in 1750. The plan was adopted of building the porches on the north and south sides of the church, and that is why it appeared in the form of a cross. The church

cost thirteen hundred and ten pounds, but the congregation could only raise six hundred and sixty-one pounds, so they remained six hundred and forty-nine pounds in debt. This burden was heavy upon them for some years. Not until the 14th of August, 1748, was this or St. Michael's Church completed and dedicated. The whole cost by that time, exclusive of the ground, was about eight thousand dollars. Peter Kalm, the Swedish traveler, says that about 1750 St. Michael's received a very fine organ from Germany.

LUTHERAN CHURCH IN 1743.

In January, 1745, Pastor Peter Brunnholtz arrived at Philadelphia, bringing with him Messrs. Schaum and Kurtz, students of divinity. Mr. Brunnholtz officiated alternately at Philadelphia and Germantown, and Mr. Schaum, who was appointed master of the German school, officiated at Germantown upon occasions. Three years later came Messrs. Handschuch, Hartnick (founder of the Hartnick Seminary), and Weygand; in 1751, Schultz and Heinzelman; in 1753, Geroek, Haneil, Wortman, Wagner, Schartlin, Shrenk, and Rauss; in 1758, Bager; in 1764, Voigt and Krug; in 1769, Helmuth and Schmidt; in 1770, Kunze. All of them were men of energy and education, clergymen and teachers. When the first Synod was held at Philadelphia, in 1748, there were six regularly called Lutheran ministers present. The Synod of 1751 reported forty congregations, and sixty thousand as the Lutheran population. Most of this gain was from Central Pennsylvania.

We have referred to "the three Lutheran congregations" in Philadelphia County, and have described one. Providence township contained fifty families in 1742, and was so thrown under the ministrations of Dr. Muhlenberg that the next year they built a costly and commodious stone church in the village now called Trappe or "The Trappe."[1] Over the door of the porch was a tablet with the following inscription: "Sub Remigio Christi, has edes Societate augustanæ confess. deditæ dedicates ex ipso fundamento exstruxit Henricus Melchior Mulenberg una cum censoribus I. N. Crossmano, F. Marstellero, H. A. Heilmano, I. Mullero, H. Hasio et G. Kebnero. A.D. MDCCXLIII."

The pews formerly, and each seat in the pews, were branded with a hot iron. When Dr. Muhlenberg first came to Pennsylvania the congregation worshiped in a barn. Buck's "History of Montgomery County" says in relation to this church,—

"It is built of stone, two stories high, fifty-four feet in length, and thirty-nine feet wide. At the ends of the roof are two iron vanes each bearing the date 1743. . . . From the floor to the ceiling of the roof is about thirty feet. The original pulpit is still here, with its sounding-board, all of black walunt. The four pillars, as well as the joists which support the galleries, are of hewn oak twelve by fifteen inches in thickness. The pews have never been painted. All the woodwork of the church is done in a very rude and rough manner, denoting simplicity, solidity, and strength."

The corner-stone was laid May 2d, and on the 12th of September the church was roofed in. A log school-house was built before the church was commenced. The Lutheran congregation at New Hanover, Philadelphia Co., or the Swamp, was the largest in Pennsylvania. When Dr. Muhlenberg took charge it had one hundred and twenty members, who were worshiping in a log building. He kept school all the week, and preached the gospel every Lord's day. In the schools he taught young people of from eighteen to twenty years of age and upwards, and sometimes the parents. On Whitsunday, 1743, he administered the sacrament of the Lord's Supper, having then previously confirmed twenty-six catechumens. A school-house was soon erected by the congregation. The Germantown Church, under Pastor Brunnholtz, who took charge in 1745, with Mr. Vigero, a Philadelphia schoolmaster, and Mr. Schaum, as occasional readers, began to grow materially. On the 15th of April, 1746, the corner-stone of an additional building was laid, being six feet wider than the old church, thirty feet being added to the length. The cost was estimated at one hundred and sixty pounds currency, but the pews and sacristy cost fifty-six pounds in addition. The members subscribed sixty pounds, and the remainder was borrowed on interest. In 1748 the congregation owed two hundred and thirty-six pounds currency, which burden was very much eased in the following year by a contribution of three hundred florins from the consistory of Würtemberg.

[1] In regard to the name of this village, Trap, or the Trappe, there has been much speculation. Many persons have been disposed to assign its origin to the German word *treppe* ("steps"); and the late Governor Francis R. Shunk, who was born at the Trappe, had as his private seal the effigy of three steps, with the motto, "Eich ersteigo" ("raise yourself"). Dr. Muhlenberg, in his journal, after speaking of Jacob Schrack, one of the first settlers in that neighborhood, who arrived from Germany in 1717, and purchased two hundred and fifty acres of land, which is embraced in the present village, says, "They built a cabin and dug a cave in which they cooked. They kept a tavern in a small way, with a shop, and beer, and such things. As once an English inhabitant, who had been drinking in the cave, fell asleep, and came home late, and was in consequence scolded by his wife, he excused himself by saying he had been at the *trap*. From that time this neighborhood was called the Trappe, and known as such in all America." In Reading Howell's "Map of Pennsylvania," published in 1792, and in Scott's "United States Gazetteer" of 1795, it is called "Trap," thus proving that this name did not originate from the German name of *treppe* for steps, but from the English word trap, signifying a snare, or rather a pitfall.

Between 1750 and the outbreak of the Revolution the small churches we have been describing went on developing, and began to require separate pastors. Rev. Peter Brunnholtz at Germantown preached also at St. Michael's, in Philadelphia, as Dr. Muhlenberg's duties were also of a missionary and evangelist nature. He died in 1757. John Dietrich Heinzelman officiated at St. Michael's and Germantown as occasion required. He was called as assistant minister of St. Michael's on July 26, 1753, and died on Feb. 9, 1756. After the death of Pastor Brunnholtz, John Frederick Handschuch was called as minister of St. Michael's. He had left the Lancaster Church because of an uproar over his marriage to a deacon's daughter, had then preached at New Hanover and at Providence, and then, as the first really resident clergyman, at Germantown. From 1756 to the time of his death, Oct. 9, 1764, he remained at St. Michael's. Rev. John Louis Voigt, an inspector at the Halle Orphan House, began preaching at Germantown, and at St. Peter's, at Barren Hill (1764). In 1765 Christopher Emanuel Schulte arrived in America from Halle, and he was chosen vice-rector of St. Michael's Church. Dr. Muhlenberg having been called to that charge after the death of Mr. Handschuch, and having officiated in fact after his return to Philadelphia in 1761, from the Trappe (Church of Augustus), John Frederick Schmidt, in 1769, was sent to Germantown, where he remained sixteen years.

Rev. Mr. Hartnick took charge at the Trappe, but only remained six months. In April, 1762, the Rev. Jacob Van Buskirk took charge of this old church, and served for two years. In 1764 he gave up the Trappe congregation, which remained for more than a year without a settled minister. Meanwhile Mr. Van Buskirk served the congregation at New Hanover. In December, 1765, the Rev. John Ludwick Voigt became the pastor, and remained in that position for more than thirty-three years.

New Hanover, or the Swamp, enjoyed the labor of John Nicholas Kurtz even before 1750, under Dr. Muhlenberg's supervision. In 1759 Mr. Schaum was preaching at New Hanover. Mr. Handschuch also gave his services to this charge. Mr. Schulte, also, was among those who attended to the spiritual wants of the people in that section of Philadelphia County. In 1764 Mr. Voigt officiated at New Hanover. After he left Germantown and Barren Hill he returned again to New Hanover.

The Philadelphia congregation grew greatly, beyond all possible accommodation even when the school-house also was used; they even rented the academy on Fourth Street, and held service there for some time. The only remedy was evidently to colonize and found a new and large church, and the history of the enterprise shows how much in earnest its projectors were and how wonderfully their efforts were crowned with success. A lot at the southeast corner of Cherry and Fourth Streets, having a width of ninety-eight feet on Fourth Street, was bought of Daniel Wistar for £1083 12*s.*; another of thirty-six feet on Fourth Street was bought of Paul Weitzel and Andrew Graff, of Lancaster, for £456 17*s.* May 16, 1766, the corner-stone of Zion Church was laid. The length of the building was one hundred and eight feet, the breadth was seventy feet. The building was put under roof at an expense of £3756. The number of bricks used in it was five hundred and twenty-five thousand five hundred and sixty-seven. In 1767 the church was plastered and the floor was laid, but further work was postponed in consequence of the want of money. On the 25th of June, 1769, the building yet unfinished was consecrated. The whole cost amounted to £8000 currency, exclusive of the cost of the ground (£1540), and the debt was £5200 currency. The church was the largest and handsomest then in North America. The roof and ceiling were supported by eight large columns of the Doric order, which served for bases for the arches of the ceiling, which was ornamented and finished in the most ornate manner, and the inside was handsomely furnished. The most careful preparations were made to fittingly celebrate the consecration.

The Lutheran Synod was in session, and a procession was formed at St. Michael's to walk to Zion Church. It was composed of the corporation of St. Michael's, representatives of the German Reformed Church in Lancaster, and deputies from York, Old Germantown, New Germantown, Reading, Schuylkill, Hanover, Providence, Pikestown, and Barren Hill. The one hundredth Psalm was sung, and the sermon was preached by Pastor Kurtz from Mark, 16th chapter, 15th, 16th, and 20th verses. The evening was dedicated to the service of the children, in which Pastor Schmidt, Pastor Helmuth, and Muhlenberg took part. On the next day, Monday, June 26th, the Rev. Richard Peters, rector of Christ Church and St. Peter's, preached a sermon in the new Lutheran Church of Zion, at the instance of the wardens and vestrymen of the incorporated congregation of St. Michael's, from St. Luke, chapter 2d, verses 13th and 14th. In commencing, Mr. Peters said,—

"Your invitation to the ministers and members of the Episcopal Church to mix their devotions with yours, and to partake of the joy you must needs feel on bringing this large building to such an admired and astonishing perfection, fills us with a high sense of your brotherly love to us in Christ Jesus. It reminds us of the love and tender affection which existed among the first Christian churches, and which makes so large and so delightful a part of the Apostolic epistles recorded in Scripture."

Zion Church was in charge at various times of Pastor Muhlenberg, Pastor Schulte, and Pastor Schmidt. Pastor John C. Kunze, of Artern, arrived in 1770, being the eleventh ordained minister who had been sent from Halle, and was appointed junior member in Philadelphia in 1771. Pastor Schulte resigned, and went to Tulpehocken. In 1773, Rev. Henry Muhlenberg, son of Dr. Muhlenberg, who had been ordained in 1770, was appointed assistant minister at

Philadelphia. In 1774, Dr. Muhlenberg resigned, and went to reside at the Trappe, where he remained until his death, in 1787. In 1775, Rev. Henry Muhlenberg and Rev. John C. Kunze, his brother-in-law, were in charge of the Philadelphia congregations.

In 1759 two hundred pounds were appropriated for the purchase of additional ground for burial purposes. The first lot had cost nine hundred and fifteen pounds, and the next year four hundred and forty-seven pounds were appropriated for the purchase of a house adjoining the church for a parsonage, and for a lot upon which to erect a school-house. The school-house was completed July 27, 1761. Pastor Brunnholtz had begun some time before, and the number had increased from a dozen to eighty, and still the school grew, till they were transferred to the church, and finally, that winter, back to his own house, when partitions were removed and a large room formed. Now, at the new school-house, there were one hundred and twenty pupils. The tuition was modeled on the plans of the German orphan schools, and the children were divided into six classes. There were quarterly examinations in the church before the whole congregation; afterward cakes were distributed among them, and printed verses from Scripture were also given out. Said Mr. Brunnholtz, writing to Halle, "In pleasant weather we go out into the country with the children, walking two by two. At one time they repeat their verses as if with one mouth, and at another time they sing, which animates me even in the greatest despondency. Sundays they assemble in front of my house, whence they go by twos to the church, where they are examined by Mr. Heinzelman." Dr. Muhlenberg, Provost Wrangel, and other ministers assisted in the dedication of this school-house.

Difficulties of a curious nature meanwhile arose in Germantown, beginning in 1753, in opposition to Pastor Handschuch. The malcontents got possession of the parsonage house and church, and elected for their minister Conrad Andrae, who was a disowned minister of Deuxponts. He died shortly after, and they elected Rev. Mr. Rapp.

Pastor Handschuch and his friends numbered about twenty families, and, being deprived of their church, they rented a house for twelve pounds per annum in March, 1753, where they held divine service, and where Mr. Handschuch kept school for four days in the week. He, however, withdrew from Germantown in a short time and went to Philadelphia.

The old members of the congregation met in the Reformed Church, and had only occasional services, but they kept together and purchased a lot for one hundred pounds on which to build a school-house. In 1762 one hundred heads of families belonging to the Germantown congregation petitioned the Synod for the appointment of a minister. The Synod replied that "this could not well be done, as the church was then in the hands of those who had contributed nothing to its erection." To this the petitioners answered that they would have the church restored to them either amicably or they would obtain possession of it by a judicial decision, and that in the mean time they had made arrangements for a place of meeting, and Peter Kurtz, of Tulpehocken, was therefore appointed.

Suit was then brought against the Rapp party, and in April, 1763, the judgment was that the party opposed to Rapp should one Sunday hold religious service in the morning and on the next Sunday in the afternoon. The Rappites had the church at all other times. Pastor Kurtz preached in 1763 and 1764, and was succeeded by John Ludwick Voigt, who preached his first sermon in 1764. The troubles with Rapp still continued, but it was finally agreed to unite on a certain day and determine who should be minister, Pastor Voigt or Rapp, and the decision was unanimously in favor of Voigt, therefore the old congregation obtained possession of the church and parsonage. Pastor Voigt, in March, 1765, accepted a call to New Hanover and Providence, and Pastor James Van Buskirk was appointed minister. He served four years, when he was appointed minister of the congregations of Macungie, Saccum, and Upper Dublin. John Frederick Schmidt succeeded him in June, 1769, and completed the restoration of peace and harmony to Germantown.

The small churches in the vicinity of Philadelphia also grew, but slowly. St. Peter's, at Barren Hill, twelve miles from the city, was a direct outcome of the Germantown difficulties just described. There had been a stone school-house there in 1759, where services were often held. In 1761 the church was built. It cost, before roofed, five hundred pounds, and twelve hundred pounds when finished. An attempt to pay the debt by a lottery failed, and an effort to raise the funds in England and Germany fared no better. In order to secure the creditors, the Swedish provost, Dr. Wrangel, Dr. Muhlenberg, and Henry Keppelle afterward became security for the debt, then amounting to upward of one thousand dollars. The creditors were not immediately pressing, but the congregation did not even pay the interest, and at length the sureties were called on. The first means of remunerating them was one hundred pounds, donated by the king of England. As a further means of increasing the interest of this congregation in the settlement of its debts, the church, school, and lot were transferred to the German Lutheran congregation, but it was considered parochial to St. Michael's. A short time afterward the Count of Roedelscheim, of Germany, died, and left by his will thirteen thousand guilders to the German Lutherans of Pennsylvania, three thousand of which were directed to be specially paid to discharge the debt of the Barren Hill Church.

The pastors of the churches in Germantown preached here. After 1769, Daniel Schroeter, "from the University at Philadelphia," took charge of this church, but soon went to Manheim, near Lancaster, and Mr.

Moller, a theological student, became his successor. Among the names on the early tombstones here are Mitchell, Hilkner, Bisbing, Kolp, Lentz, Freas, Wampall, Bartle, Dager, Fie, Russell, Haas, Hitner, Streeper, Sneyder, Schlatter, Staley, Hagey, Steer, Harman, Hallman, Rex, Faust, Tompson, Clay, Cressman, Gillman, Woolf, Stull, Kats, and Scheets. A German Lutheran Church was built in Lower Merion township in the year 1769, at the intersection of cross-roads half a mile east of Athensville, near the Delaware County line. It received the attention of various Lutheran ministers. The most common names on the tombstones here are West, Lainhoof, Knox, Kugler, Marten, Dolby, Calflesh, Sheaf, Pechen, Miller, Goodman, Litzenburg, Smith, Wagner, Fis, Super, Bittle, Latch, Epright, Fimple, Paget, Hammill, Sibly, Zell, Nagle, Hoffman, Mayer, Creekbom, Knowl, Horn, Trexler, and Ott. There was also a Lutheran Church at Frankford in which John Frederick Schmidt preached about 1769. Another at Whitpaine was also served by him.

In 1773, on the eve of the war, the need of home-trained ministers urged the Lutherans to establish a seminary. For the maintenance of this school a number of Lutherans agreed to associate themselves into a body to be called "A Society for the Promotion of Christianity and all Useful Knowledge among the Germans in America." It was to consist of twenty-four members, who were to contribute ten pounds each, with foreign patrons and honorary associates. The studies were to be of the higher sciences, English law, medicine, and theology. The first meeting of this society was held on February 9, 1773, the twenty-four members having been then obtained. The control of the institution was intrusted to the Rev. H. M. Muhlenberg and Mr. Keppele, directors; Dr. Kunze and Mr. Kuhl, associate directors; Rev. Henry Muhlenberg and another thereafter to be elected, inspectors. On the 15th of February the school commenced with five scholars. Mr. Leps taught Latin that year, but was ordained in 1774, and took a church in New York. The seminary managed to keep alive until 1778, but was then abandoned. When we stop to consider the immense amount of missionary labor that the few ministers then in Pennsylvania had to perform, it will seem a marvel that they ever undertook this enterprise. The population was very much unsettled, ever moving farther west. Dr. Muhlenberg wrote home that in five years half of his congregation had changed. Besides this, roads and bridle-paths were extremely bad, or entirely lacking, and Indian difficulties were not unusual. Rev. Mr. Kurtz, in his narrative, says that July 2, 1757, the lifeless bodies of no less than seven of his church members, murdered the night before by Indians, were brought to the church and lay before the pulpit till the funeral services the next day.

During the Revolutionary war the Lutheran Churches suffered greatly. Many of their members joined the patriots, and their property was not spared by the British. At Germantown they plundered Rev. Mr. Schmidt's house, and forced him to leave with many of his parishioners. The church was also injured, and the organ was destroyed. It is said that during the Revolution this church was used for a battery by British troops, soldiers being quartered in the building. At one time they were dislodged by a charge of Americans coming from Mount Airy. Maj. James Witherspoon, of the New Jersey Brigade, who fell in the battle of Germantown Oct. 4, 1777, was buried in the cemetery here, when the contest raged fiercely on that day. Mr. Schmidt returned and acted as pastor till 1786. Rev. Mr. Weinland was his successor for three years, when he accepted a call to New Providence, in which trust he afterward died. Mr. Weinland came from Roemhild, and was the last ordained German Lutheran minister sent to America by the University of Halle. In 1790, Rev. Frederick D. Schaefer, at the age of twenty-seven years, was elected minister. The parish over which these ministers ruled embraced the Frankford, Nicetown, Whitpaine, Rising Sun, the Ridge, and Barren Hill congregations. The church at Germantown, which in 1770 had one hundred and seventy persons partaking of the Lord's Supper, and thirty-nine catechumens confirmed, was not so large again until after the Revolution. In 1786 the church was incorporated. The Barren Hill Church also suffered during the Revolution. It was occupied by the contending armies as a battery and stable. It received much injury, and after the enemy left Pennsylvania it was found full of dirt and rubbish, and greatly injured. Rev. Henry M. Muhlenberg, in his journal of date Nov. 4, 1777, says of St. Peter's that it was used as a stable for horses by a part of the American army encamped in the vicinity. Lafayette used this church as a point of observation in May, 1778. St. Michael's, in Philadelphia, and Zion Churches (Revs. Muhlenberg and Kunze, pastors) suffered during the war. The pastors left when the British came in, and Zion Church was made a hospital. It cost the congregation one thousand three hundred pounds for repairs, and Sept. 22, 1782, the building was reconsecrated. St. Michael's was used as a garrison church, and occupied by British chaplains, the few Lutherans left using it in the afternoons. Rev. H. Muhlenberg went to Lancaster in 1779, and Dr. Helmuth[1] was his successor. Rev. M. Kunze went to New York in 1784. For a while Dr. Helmuth had both churches on his hands, but Rev. John F. Schmidt was called to Zion. In 1780 the Legislature

[1] Helmuth was one of the last of the twelve ministers who were sent over from Halle before the Revolution. He died in 1825, in the eightieth year of his age. While in Philadelphia he was appointed professor of German and the Oriental languages in the University of Pennsylvania. In 1785, with Dr. Schmidt, he established a seminary for candidates for the church, a school maintained for more than twenty years.

revived and reaffirmed the charter granted by the Penns in 1765, but a special enactment provided for non-election of officers in the church during British occupancy. On Oct. 10, 1790, the great organ was opened in Zion Church, being the largest and best instrument then in America. It was built by David Tannenberg, who was self-taught in this branch of mechanism. The frame was twenty-four feet front, eight feet deep, and twenty-seven feet high. The divisions consisted of five turrets and four frames, of two stories, except the side turrets, which, on account of the large pipes, were only one story in height. In the front there were one hundred metal pipes, and in the body there were two thousand pipes, with five sets of keys. St. Michael's had its organ repaired and the church rededicated in 1791. Zion Church lost no less than six hundred and twenty-five members of its congregation by the yellow fever in 1793.

Dec. 26, 1794, the vestry-room of Zion Church, in the tower, took fire, and the whole building was soon destroyed. Scarcely anything was saved except a few pipes from the organ. This fire was caused by putting hot wood-ashes into a box. Offers were at once made by other congregations, tendering their buildings for worship. Christ (Episcopal) Church made such an offer, also the German Reformed Church, on Race Street, near Fourth, which was most convenient. Soon after a lot south of the church, and now fronting on Loxley's Court, was bought for three thousand five hundred pounds, and a school-house subsequently erected thereon. The walls were strong, and the work of rebuilding was commenced. The tower was raised higher than before, the interior fixtures replaced, and in November, 1796, the church was reconsecrated.

In Zion Church the ceremonies of commemoration of the death of Washington took place December, 1799, and in the succeeding year the ceremonies of the Grand Lodge of Masons of Pennsylvania. In 1817 the third centennial jubilee of the Reformation by Martin Luther was celebrated in Zion Church. It was intended to be something more than a mere Lutheran demonstration, and the design was to bring together representatives of all Protestant sects. Among the ministers present were Bishop White, of the Protestant Episcopal Church, and Rev. Dr. Alexander, of Princeton.

Both Zion and St. Michael's paid attention to educational matters. The lot granted in 1763 by the Penns, on the south side of Vine, east of Eighth, was supplemented by purchases, in 1776, of an adjoining lot for about two thousand five hundred dollars; and by a succession of grants and purchases the whole square, bounded by Race, Vine, Franklin, and Eighth Streets, finally became the property of Zion and St. Michael's congregations. Portions of the ground were reserved for school uses, but a space, extending from Franklin to Eighth, was kept as a burying-ground, and used for that purpose during many years. In 1787 a school for poor children was opened by Zion congregation, for which the Legislature gave one thousand acres of land. A society for aiding the poor was also established in February, 1790. In 1789, to these churches, which had been educating eighty poor children, the Legislature granted, for the maintenance of a school, five thousand acres of land in Tioga County. In 1794 the Zion congregation erected a school-house in the Northern Liberties, on a lot at the corner of Second and Brown Streets, which had been purchased some time previous. The establishment of the public-school system and the multiplication of secular schools gradually did away with the system of church instruction.

Zion's first Sabbath-school was organized May 17, 1804, by a widow, Mrs. Anna Cruse, who began with six children. Another class was commenced in April, 1805, at the Northern Liberties school-house, corner of Brown and St. John Streets.

As early as 1796, when the troubles between the German and the English parties began to take dangerous form, these well-endowed churches were about to establish a large school, with five teachers, where both English and German should be taught. The school of Zion Church contained two hundred scholars and forty teachers before 1804. The four day-schools of the churches numbered two hundred and fifty pupils. It was during Dr. Schmidt's administration, in 1802, that the pro-English agitation began among the younger Lutherans. The first trial of strength was Feb. 14, 1803, and the advocates of the German language won, also in 1804, and again in 1805, the latter time by a majority of thirty-four members of the corporation.

Upon this triumph they offered the English party the entire use of St. Michael's Church and the burial-place belonging there, as well as the use of the school-house in Cherry Street, and the privilege of burying in the other ground of St. Michael and Zion, to such of the English-speaking members as had relatives interred there. This was made upon condition that the new congregation should assume and pay one-third of the debt of the two churches, which was then six thousand eight hundred and thirty-one dollars, but the English party refused, and renewed the contest in 1806. On that occasion the most strenuous efforts were put forth, so that nearly fourteen hundred votes were polled. The Germans won by a majority of about one hundred and thirty. The English party then went out in a body, carried off with them fully one-half of the members of the congregation, and formed St. John's Church. Dr. Schmidt survived this misfortune six years. He died May 16, 1812, at the age of sixty-six years, forty-three of which had been spent in the service of the churches at Germantown and Philadelphia. Dr. Helmuth delivered an affecting sermon. Before the death of Pastor Schmidt, on account of failing health, the congregation had elected as pastor Frederick D. Schaefer of St. Michael's,

Germantown. When he entered upon his duties new trouble was impending. The secession of the advocates of English preaching in 1806 had taken away the younger members. But in about eight years another party arose, which demanded alternate English and German preaching. The request was resisted, as had been the movement in 1806. In the early period of these controversies the English-speaking members of the congregation formed an association called the St. Michael's Society, the object of which was to "unite the members of the German Lutheran congregation by having divine service performed in the church in the English as well as in the German language." This society prepared a paper entitled "Observations Addressed to the Congregation upon the Subject of Preaching only German, and the Consequent Decline of the Congregation." A copy of this address was sent to every Lutheran, and a meeting was called for Sept. 26, 1815. The place appointed was the school-room of the church in Cherry Street, above Fourth; but when the persons intending to hold the meeting resorted to that place, they found the room already filled with the German party, and they were crowded out. This was repeated, until the meeting was abandoned. A meeting of the German party was held in the Northern Liberties in December, 1815. Frederick Eberle was chairman. Christian Manhart said,—

"Brethren, they want to steal our property, to rob our churches. They have associated themselves into a society. Their articles were that they take Irishmen, Frenchmen, Englishmen, and even black men, into their churches. We shall oppose them with all our bodily strength."

John Donneck said that "blood should flow in the churches before English should be introduced."

In December, 1815, a meeting of the corporation of the church was held, and a letter, signed by Dr. Michael Leib, champion of the English-preaching party, was sent to George Honey, the president. They met in the vestry-room of the church, and when the petition was to be presented a large number of the German party attempted to prevent its reading. The German party also prepared a petition, which was very strong in its expressions. The following is a translation:

"*To the Honorable Corporation of St. Michael's and Zion's Congregation in and near Philadelphia:*

"We, the undersigned, members of the German Evangelical Lutheran congregation in and near Philadelphia, herewith give an honorable corporation to know our liveliest displeasure on the inconsiderate undertaking of introducing a strange language in our churches.

"At a time when our beloved congregation tasted the deepest rest, when the worthy German gospel was preached among us with peculiar energy and power, when not only an increase of the number of our congregational members, but a powerful spiritual awakening, particularly among our youth, appeared to manifest itself, exactly at that time it is ventured on to sow the seeds of discord, of disturbance, and of destruction.

"We declare ourselves briefly by this opportunity, and only aver to an honorable corporation that we are determined, as we have also firmly bound ourselves before God, and solemnly before each other, to defend with our bodies and lives our German divine worship against every attack, and to oppose with all our power the introduction of a strange language in our churches.

"To this end we herewith apply to an honorable corporation, and to you, fathers and brothers particularly, who, in this respect, cherish similar feelings with ourselves, who, with us, prefer divine service in German to the English, and pray you assiduously, in virtue of your oaths before God and our whole congregation, to guard our exclusive privileges and the welfare of our whole union, so that the tempter may not succeed in destroying our beautiful German establishment.

"We pray you, dear fathers and brothers, to direct a steady eye to the character of our church, according to which, in important occurrences, at least two-thirds of the corporation and congregation are required before any innovation can be brought about.

"We pray you, dear fathers and brothers, agreeably to a resolution of the corporation, not again to let it be brought to an election whether the English divine service shall be introduced in our German churches or not.

"We pray you, dear fathers and brothers, for the suppression of a pernicious example, by repealing a resolution which permits the members of the corporation to speak in a strange language when the honorable church council is assembled on business of the congregation; such an example hath, in our view, the most baneful consequences.

"We further pray you to make such arrangements that the opponents of the German language and German divine worship may never be permitted to meet in our school-house for the attainment of their base views, because we ourselves would thereby give them the means in hand for our destruction.

"We pray you, dear fathers and brothers, for the sake of the ashes of our ancestors, who gave their wealth—yea, their blood—to build us German churches, thereby to enable us to enjoy the blessings of the German gospel; we pray you for the sake of the peace of our congregation, for the sake of the innocent hearts who, under present circumstances, suffer the deepest sorrow; we pray you for the sake of the German Lutheran order; yea, we pray you for the sake of Jesus Christ our Saviour, to comply with our prayers. And, finally, be assured that we will, with all our powers, yea, with body and life, support you, dear fathers and brothers, in all such measures that may tend to the welfare, the advancement, and to the perfecting of our German divine service.

"Experience teaches us that if we give up the breadth of a finger of our property, of our exclusive rights and privileges, that we are then near our destruction. In that event we shall become the object of laughter of every civilized nation.

"We are, with esteem and devotion, on honorable church councils, sincere brothers, etc.

[SEAL.] [NAMES.]

"The above is a true translation from the original hereto annexed. Witness my hand and seal, Jan. 12, 1816.

"JOHN GOODMAN, *Notary Public.*
"Residing in the Northern Liberties,
"County of Philadelphia."

The controversy culminated in the indictment of the whole German party, which, being found in the mayor's court, was taken by *certiorari* to the Supreme Court, before Judge Yeates, in July, 1816. The defendants were Fred. Eberle, Fred. Buckhalter, John P. Krocker, Charles Gunther, Fred. Beunecker, Adam Risinger, John Seyfert, Matthias Scheurman, Theobald Schmidt, George Weinman, Conrad Weckerle, David Schuh, John Donneck, Michael Knorr, William Yager, Christian L. Manhart, Jacob Link, John Dankworth, Christian Reish, John Schlag, John Cruse, Henry Dohnert, Christian F. Cruse, Jacob Chur, Jr., Gottlieb Schwartz, F. A. Schneider, John Chur, Henry M. Maxheimer, Fred. Hoeckley, Fred. Fricke, John William Berg, Charles Lex, Valentine Flegler, Henry Flegler, Frederick Schwikhart, Christian Jahns, Jacob Endress, John Seifert, Matthew Scheurman, David Scheurman, Jacob Scheurman, Henry Schweir, Casper Pickles, John Bournman, Jacob Chur, C[illegible] midt, John George Dau, Jacob Eberl[illegible] William Weyman, John

Peter, Henry Luben, Peter Selfert, Philip Zehner, Christopher Bush, Amos Burman, Henry Miller, Philip Eberle, John Herpel, F. A. Gildner, Fred. Oberthaur, Charles Bartholoma, Charles Dominique, John Andrew Maurer, John Zehner, William Walter, John Mickeline, George Selfert, Melchior Wahl, John Moole, Nicholas Hartzell, Elias Frey, and George Mark. As to the last fourteen names the grand jury found "*ignoramus*," and they were not tried. The defendants were charged with conspiracy, on Dec. 26, 1815, to "acquire for themselves unjust and illegal authority and power in the said congregation, and to distress, oppress, and aggrieve peaceful citizens of this commonwealth, also members of the said congregation," that they conspired to "prevent by force of arms the use of the English language in the worship of Almighty God." A very important part of the charge, on which great stress was laid in the evidence and in the arguments of counsel, was the allegation that defendants had "conspired with their bodies and lives to prevent the introduction of English," etc. The trial lasted for several days, and all the defendants on trial were convicted. An application to the Supreme Court in banc for a new trial was not successful. The defendants, however, were not punished, having received pardons from Governor Snyder.

The election for officers of the corporation in January, 1816, was carried on with much warmth and with the general incidents of a secular contest. The German party was very violent, and succeeded, according to the returns, in electing their candidates. But this result was also contested in a proceeding before Judge Gibson at *Nisi Prius*, after the conspiracy case was disposed of. The proceeding was by *quo warranto* against George C. Woelper and seven others, and the jury found in favor of the commonwealth, which established that the defendants were illegally chosen. Motion to set aside this verdict was made, but it was refused. Notwithstanding that the English party triumphed by the law, their situation in the congregation was so unpleasant that they resolved to follow the example of St. John's congregation, and secede. They went out about the end of 1817, and formed what was afterward known as St. Matthew's English Lutheran congregation.

We will now trace the history of these two revolting bodies. Those who withdrew in 1806 adopted the title of the Evangelical Lutheran Church of St. John. They withdrew to the academy on Fourth Street, where, in October, they procured the services of Rev. Philip F. Mayer, a graduate of Columbia College. In 1808 they were incorporated. It had grown so fast that they purchased that year a large lot on Race Street, between Fifth and Sixth, running northward to Mulberry Alley. A portion of the lot extended out to Fifth Street, and included some of the old houses known as the "Fourteen Chimneys." The corner-stone was laid March 9, 1808, by Rev. Philip F. Mayer, in the presence of a large number of persons and clergymen, including Rev. Dr. Helmuth, of the German Lutheran Church; Bishop White and Messrs. Blackwell, Abercrombie, and Andrews, of the Protestant Episcopal Church; Green, Janeway, and Potts, of the Presbyterian Church; Staughton and Smith, of the Baptist Church; and McDowell, provost of the University. The building was sixty-eight feet by one hundred and sixty-eight feet. Frederick Graff drew the design for the front, and William Rush did the carving over the pulpit. The eagle which sustained the sounding-board was particularly admired. It has since been transferred to Independence Hall. The figure of the bird was perched over the keystone of the arch, and the sounding-board was suspended from its beak by a long chain. The pulpit was an octagonal box with winding stairs, the pews were high and stiff-backed. There were triple windows at the ends, besides plenty of side-windows. At that date it was the finest church in the city. The building committee consisted of John Goodman, Jr., Christlieb Bartling, Michael Fox, John Hay, Adam Eckfeldt, and John Greiner. The building was dedicated in June, 1809. In 1820 a new organ was procured. As soon as possible they built a school-house on Fifth, at the corner of Mulberry Alley. It was a rather ambitious institution, called "St. John's Lyceum." Here Professor James Cutbush, in 1812, gave lectures on chemistry, natural philosophy, and mineralogy, and the next year a larger building was constructed at the corner of Race and Chester Streets, but Professor Cutbush was called to a position at West Point, and the school proved a failure in other hands.

Those who separated in 1817 organized themselves at the academy, on Arch Street, under the title of the Lutheran Church of St. Matthew. The first board of officers was composed of Andrew Geyer, president; George E. Baker, secretary; George Krebs, treasurer; Samuel Keemle, John Geyer, Abraham Beidelman, and Adam Steinbock, vestrymen. Among the members of the church at this time are to be found the names of Lex, Dannaker, Bush, Gougler, Croll, Baumbirn, Fredericks, Freed, Blumner, Ripperger, Wagner, Cline, Eberle, Shoch, Eisenhart, Hinecle, Lower, Knipe, Leoscher, Armbruster, and Kneedler. These names all indicate German nativity, but those who possessed them, and who belonged to this congregation, were of American birth. In the articles of union the members of this church expressed the opinion that if the Lutheran Church in America did not abandon her exclusive character and adapt herself to the language of the descendants of the founders, the sons and daughters of those founders would go over to other sects, and the strength of the Lutheran Church in America would be greatly diminished. They secured the services of Rev. Christian F. Cruse, and were worshiping in that building, under charge of Mr. Cruse, in the year 1825. A call was extended,

in 1818, to Rev. George Lochman, D.D., of Lebanon, but he declined. Similar fortune attended a call made in 1820 to Rev. Benjamin Kurtz, D.D., of Baltimore. The first purchase of real estate made by this congregation was on the south side of Buttonwood Street, between Fifth and Sixth, April 11, 1820, from Henry Pratt, by Charles Eberle, Andrew Bush, and Henry Burkhart, in trust, subject to a ground-rent of sixty dollars.

During the fourteen or more years that the question of introducing English had been agitated, the views of the conservatives had decidedly changed. Schmucker says in his history that they began to see how short-sighted their policy had been.

Hazelius says,—

"The obstinate adherence of many of our older ministers to the exclusive use of the German language in the service of the church, presents us with a hindrance to its growth which could not fail to effect the heart of every well-wisher of our Zion. The instruction of the young in the elements of religion became thereby necessarily imperfect. They understood little or nothing of the public services in the sanctuary, in consequence of which the love to the church of their fathers waxed cold in many, and, finding more instruction and edification in the houses of worship pertaining to those denominations of Christians who taught and preached in the language of our country than in their own, thousands left our church and connected themselves with English churches, while others became negligent attendants on the word of God in their own denomination."

Dr. Morris says,—

"Where are the thousand respectable families who abandoned our communion because their children didn't understand German? Go into any considerable town or city and you will see them maintain a conspicuous standing in almost every denomination of Christians."

After the secession of 1817, the members of the old church corporation, who were all Germans—"taking into consideration the impossibility of rearing children in the centre of an American community to understand the German language properly, and that as they grew up they must leave the church; that the congregation must depend upon emigration for its supply of members, and that strangers would supplant the natives"—attempted a plan of introducing English by which the German language would have been continued as long as fifty persons should desire it; but they failed in obtaining the consent of the congregation.

Rev. Dr. John C. Kunze, after he went to New York (in 1789), had risen to the emergency, and so he compiled a hymn-book composed largely of German hymns translated into English verse, generally in the original metre, so that they could be sung in either language. He also composed a liturgy and catechism in English, founded on the German books, and until his death, which occurred in 1807, he was a steady and vigorous advocate of the change to English. It is said upon the best authority that if the seceders from St. Michael's and Zion Churches had remained a few years longer, they would have won a peaceful victory.

In 1820 the two old congregations decided to have but one pastor. Dr. Helmuth retired, and Rev. Mr. Schaefer was elected. In 1823, Rev. Charles R. Demme, of Germany, was called as assistant pastor. That year Dr. Helmuth died, and was buried in St. Michael's Cemetery.

During this great contest in which the radicals departed, and built up new and thriving churches in Philadelphia, and even the conservatives submitted at last to the inevitable, the church at Germantown was carried safely through the storm. Rev. John C. Becker (or Baker), born in Philadelphia in 1791, took sole charge of this famous old church in 1812, after having been Dr. Schaefer's assistant in the parish for a year; but the creation of Montgomery County lessened their labors. Mr. Becker fully realized the evil effects of the policy pursued in the German-speaking churches of Philadelphia. He was determined to prevent such a disaster happening to the church at Germantown, and owing to his successful labors in the expression of his views, the officers agreed, in 1813, to have English services on alternate Sundays. The change was not effected without remonstrance from the old German members; but as he spoke both languages fluently, and acted judiciously, he succeeded in reconciling them. In 1817 he organized a Sabbath-school. In 1819 the congregation wanted a new church. The corner-stone of the new building was laid March 25th. It was finished and dedicated November 21st by Rev. Drs. Helmuth, Schaefer, and Mayer. It had been intended to build a steeple and belfry, in which were to be placed the bells of the old church; but during the removal of the bells the ropes used broke, so that the bells fell to the ground and were cracked. One of the church writers says, "The people, in a manner disconsolate for their loss, seem to have felt that in their affections no new bells could ever take the place of the old. The contemplated steeple for the new church was abandoned, and the sonorous, deep-toned summons, which without fail for Sundays and Christian festivals for over seventy years had called the people together, was heard no more." The master of this church kept supervision for some time over the Frankford Church. By 1822 the friends of English services at Barren Hill were so numerous that two out of three sermons were in that language.

St. Matthew's (English) Evangelical Lutheran congregation was organized on the 26th day of January, 1818, by members of the German Evangelical Lutheran congregation of this city, who felt persuaded that the introduction of the English language into the regular services of their religion could no longer be delayed. Their first place of worship was in the old academy building, on Fourth Street, near Arch, the services being conducted by Rev. Christian F. Cruse, who acted as temporary ministerial supply. Efforts were soon made to secure a suitable church edifice in which to hold all their congregational exercises. A lot on New Street, near Fourth, was purchased, and a church building erected thereon, in

which for many years they and their children worshiped. After long-continued use, in consequence of the changes in that locality, which was being more and more surrendered to business purposes, another location was deemed desirable, and the congregation removed to its present situation on Broad Street, northwest corner of Mount Vernon. The location now occupied by the congregation was purchased in 1875. The erection of a chapel and parsonage was at once commenced, both of which buildings were ready for use and taken possession of during the spring of 1876. The purpose is, at as early a day as possible, to place a church building on the vacant corner, of symmetrical design with the structures already completed. The cost of the property thus far has exceeded one hundred thousand dollars. The succession of pastors is as follows:

Rev. Charles Philip Krauth, D.D., from 1827 to 1833. His removal was occasioned by a call from the trustees of Pennsylvania College at Gettysburg, Pa., to become its first president.

Rev. Jacob Medtant served from 1834 to 1838.

Rev. Stephen A. Mealy, from 1838 to 1841.

Rev. Theophilus Stork, D.D., from 1841 to 1850.

Rev. Edwin W. Hutter, D.D., from 1850 to 1873.

Rev. W. M. Baum, D.D., from 1874 to the present date.

The numerical growth and financial condition of St. Matthew's have been such that at various times in its history it has been instrumental, through its members, in originating and establishing other prosperous church enterprises. St. Mark's, on Spring Garden Street, near Thirteenth; St. Luke's, on Fourth Street, near Thompson; St. Peter's, on Reed Street, near Ninth; Grace Church, Spring Garden and Thirty-fifth Streets; and Messiah, Sixteenth and Jefferson Streets, were severally started and fostered by this congregation. Together with the parent church these congregations are all in a growing condition. The Sabbath-schools, the enrolled membership, and the work of Christian charity and denominational benevolence are steadily increasing.

Edwin W. Hutter, D.D., who was for twenty-three years pastor of this church, was also one of the prominent men of Philadelphia. He was born in Allentown, Lehigh Co., Pa., Sept. 12, 1813, of German ancestry. His grandfather, Christian Jacob Hutter, settled in Lancaster before the Revolution, but later in life removed to Easton, where he established *The Sentinel* newspaper, and where Charles L., the father of Edwin W. Hutter, was born. In 1811, Charles L. Hutter removed tc Allentown, and continued the publication of *Th Republican*, which had been started by his fathe Upon the death of Charles L. Hutter, Edwin V Hutter returned from school at Nazareth, and at t' age of sixteen took the editorship of his fathe papers,—*The Independent Republican* and *The Leh Herald*, and at the same time assumed a parer

Digitized by Google

and several Lutheran churches in the city have grown out of the missions originating under his ministrations. In addition to his other labors, Mr. Hutter was one of the editors of *The Lutheran Observer* from 1857 to 1870, and upon the death of Rev. Benjamin Kurtz, on Dec. 24, 1865, pronounced the eulogy on his life and character, at Selinsgrove, Pa.

In 1868, Mr. Hutter received the degree of doctor of divinity from the Pennsylvania College at Gettysburg. In 1871 his health began to fail in consequence of his severe and too often self-imposed labors in his parish. Nothing was too hazardous or trying in aid of his church. In the pulpit, in the Sunday-school, and especially among the poor and infirm, the sick and the dying, as friend and counselor, he was ever ready, never thinking of himself or his personal comfort. He was a prodigious worker, and spoke English and German with uncommon facility. In society he was agreeable and refined, especially among people of learning. He had a rich fund of humor, and his short newspaper paragraphs abounded in wit. A deep thinker and a close reader, he gave tone and dignity to everything he discussed, and all the newspapers he conducted were marked by his strong and vigorous style. During the war he was an active worker for the Union, and with his philanthropic wife, who was a daughter of Col. Jacob Shindel, performed great service in relieving the sick and wounded soldiers, and providing for those in the field. His remains are buried in Laurel Hill Cemetery.

St. James' Evangelical Church (German).—For a number of years members of St. Michael's, Zion, and St. Paul's Churches, residing in Kensington, so called, were desirous of having a church in that district. The great distance often prevented their attendance at service, or, if they went to St. Paul's, corner of Brown and St. John Streets, the crowd inside was so great that it was not possible to enter. The attention of the mother congregation and also of Synod was directed to this state of affairs. The necessity for a new church was so evident that Synod appointed the Rev. Benjamin Keller as missionary to undertake its establishment. On Sunday, Nov. 5, 1854, the first service was held by him in Phœnix Hall, northwest corner of Thompson Street and Frankford Avenue, at which thirty-four persons were present. But few services were held here, as a change of location was decided upon, and Central Hall, on Frankford Avenue, opposite Master Street, was secured, at a rental of one hundred and twenty dollars per annum. A Sunday-school was opened and a choir organized.

The congregations of St. Michael's and Zion Churches then purchased the lots at the corner of Columbia Avenue and Third Street, for five thousand four hundred and fifty dollars.

On Friday evening, April 27, 1855, an organization, named the Evangelical Lutheran St. James' Church, was effected, a constitution adopted, a pastor (the Rev. B. Keller) and a church council elected.

May 27, 1855, the Lord's Holy Supper was celebrated for the first time, fifty-two communicants partaking. Early in the spring of 1856 the mother congregation resolved to proceed with the erection of a church, sixty-one by ninety-five feet. April 11th the contract was awarded to Messrs. Jacob & George Binder, for fifteen thousand one hundred and twenty dollars. The steeple was to cost one thousand six hundred and fifty dollars extra, and had to be paid for by the members of St. James'. April 16th ground was broken, April 19th the corner-stone laid, and Dec. 28, 1856, the church was dedicated. Rev. C. R. Demme, D.D., preached in the morning, Rev. J. T. Vogelbach in the afternoon, and Rev. G. F. Krotel in the evening. In September, 1857, a parochial school was opened, with Mr. E. Becker as teacher. The mother-church agreed, for a period of five years, to pay annually five hundred and four hundred dollars respectively to the salaries of pastor and teacher.

In January, 1857, the Rev. B. Keller resigned the pastorate of the church, and Feb. 9, 1857, the Rev. J. T. Vogelbach, of Allentown, Pa., was elected his successor. His pastorate extended over a period of nearly twenty-four years, until his demise, in November, 1880. During this time, in 1867, a new parochial school-house was erected, and the beautiful pictures of Christ's crucifixion, Dr. Martin Luther, and Philip Melanchthon placed in the church.

During his later years, beginning with June, 1878, Pastor Vogelbach was assisted by the Rev. A. Richter, who became his son-in-law, and eventually his successor. As regular pastor, the Rev. Mr. Richter remained but one year, and on Oct. 1, 1881, was succeeded by the present pastor, the Rev. F. W. Weiskotten, formerly of Bethlehem, Pa. The present membership is eleven hundred communicants. The Sunday-school numbers one thousand pupils, with one hundred teachers and officers.

St. Mark's Evangelical Lutheran Church was organized March 26, 1850, at a meeting of Christian people favorable to the erection of a new English Lutheran Church in the northwestern section of Philadelphia, held in the Commissioners' Hall, in the district of Spring Garden. At this meeting a charter was adopted, and four elders, four deacons, and four trustees were elected as officers of the congregation; at the same time a building committee, consisting of nine persons, was appointed. The elders elected were B. Slaugh, D. R. Erdman, M. Buehler, and S. Heritage; the deacons, I. Sulger, W. B. Riehle, F. Zimmerman, and J. Lower; the trustees, P. Sides, A. R. Hortter, C. H. Moore, and M. E. Afflick. A Sunday-school was opened on the morning of April 14, 1850, in Brotherly Love Hall, at the northeast corner of Twelfth and Wistar Streets. At a meeting of the congregation held April 30, 1850, the Rev.

Theophilus Stork, D.D., was elected pastor, who at that time was pastor of St. Matthew's Evangelical Lutheran Church, situated on New Street, below Fourth. A lot of ground on the south side of Spring Garden Street, above Thirteenth, was purchased, and the erection of the building commenced. The corner-stone of the new edifice was laid by the Rev. Philip F. Mayer, D.D., pastor of St. John's Church, Philadelphia, in the presence of a large concourse of people, June 27, 1850. Contracts for work on the building were awarded as follows: carpenter-work to William Denney, brick-laying to Morris E. Afflick, painting and glazing to Charles Foster, iron-work to Heins & Adamson, and brownstone work to John Heugh.

The first religious services of the congregation were held in Brotherly Love Hall, on the fourth Sunday in October, 1850. These services were transferred to the church in January, 1851, the basement of the building being then so far completed that it could be occupied for that purpose. The church was consecrated on the second Sunday in November (9th), 1851. At a congregational meeting, held Feb. 23, 1864, it was resolved to enlarge the church edifice. Plans prepared by Sloan & Hutton, architects, were adopted. An entire new front of brownstone, with central tower and lofty spire, was erected, the side walls were strengthened, a new roof put on, the audience-room considerably lengthened, the ceiling raised, and side-galleries put in. Workmen commenced the removal of the old front April 18, 1864, and the alterations and repairs were completed by the 5th of November, 1865, and the building reconsecrated. A very heavy expenditure of money was incurred in making these improvements, which were a virtual reconstruction of the edifice. In 1864 the residence adjoining the church on the west side, No. 1314 Spring Garden Street, was purchased for a parsonage. In the summer of 1880 the audience-room of the church was again improved, altered, and repaired, and the roof was strengthened, at a cost of between nine and ten thousand dollars.

The congregation now (1884) has on its roll a list of six hundred communicant members, and a Sunday-school of four hundred and fifty persons, including officers, teachers, and scholars.

The following are the names of the pastors, and their terms of service, viz.: Rev. Theophilus Stork, D.D., April 30, 1850, to April 4, 1854; Rev. Charles A. Smith, D.D., July 2, 1854, to June 30, 1855; Rev. Theophilus Stork, D.D. (second time), July 1, 1855, to Jan. 4, 1859; Rev. Charles P. Krauth, D.D., LL.D., Oct. 1, 1859, to Dec. 31, 1861; Rev. Gottlob F. Krotel, D.D., Jan. 1, 1862, to April 12, 1868; Rev. John A. Kunkelman, D.D., May 10, 1868, to June 1, 1879; Rev. Samuel Laird, Sept. 1, 1879,—present pastor. The present officers of the congregation are: Elders, Philip Diehr, William Anspach, George A. Hight, and George Mueller; Deacons, Charles D. Colladay, J. Jacob Mohr, W. Frederick Monroe, and Reuben S. Shimer; Trustees, Henry F. Chorley, William K. Kepner, Edmund J. Frank, and Josiah C. Brooke; Superintendent of the Sunday-school, Henry F. Chorley; Assistant Superintendents, Edmund J. Frank, Edward Cline, and Susan E. Monroe.

St. Johannes' (German) Church.—In 1861 a branch Sunday-school was established at Broad Street and Fairmount Avenue, under the supervision of Zion, St. Michael's, and St. Paul's congregations. Soon afterward a parish school was established by the old congregation at the southwest corner of Thirteenth Street and Fairmount Avenue (Coates Street), first with one and soon with two teachers, and the lot at Fifteenth and Ogden Streets was purchased for the erection of a church at some future time. The Sunday-school was transferred to the building at Thirteenth Street and Fairmount Avenue. In September, 1865, the corner-stone of the church at Fifteenth and Ogden Streets was laid, and in April, 1866, the school-rooms and lecture-room were dedicated for the use of parish school, Sunday-school, and for Sunday evening services.

In February, 1867, the members of the old congregation living in the northwestern part of the city, together with other persons who had joined in the new enterprise, called the Rev. Adolph Spaeth, who had been from 1864 to 1867 collegiate pastor of old Zion's congregation, to become the first pastor of St. Johannes. He accepted the call, and was installed October 10, 1867. On the 10th of May, 1868, the church was dedicated to the service of the triune God. The cost of the building, together with the steeple, bells, etc., was about sixty-five thousand dollars, of which the sum of forty thousand dollars came from the property of the mother-church, which was at that time divided among the newly-formed congregations. The first pastor still serves this congregation, which has during the last years erected two mission chapels, one in North Penn Village, the other on Jefferson Street, near Twenty-sixth Street.

Holy Communion (English) Church.—At the present time there are thirty-two Lutheran Churches in the city, the handsomest being the Holy Communion Church, at the southwest corner of Broad and Arch Streets. Though a separate organization, it may be regarded as a branch or offshoot of St. John's Church, on Race Street, between Fifth and Sixth. The need of a new church was greatly felt, and on the third Thursday in October, 1870, at the suggestion of Rev. J. A. Seiss and William M. Heyl, a resolution was passed by the trustees of St. John's, embodying the desire of some of the members of the congregation for a new church, and promising their co-operation and aid. After several meetings a number of gentlemen assembled on Dec. 28, 1870, at the office of Mayor Fox, and effected an organization to establish an Evangelical Lutheran Church in the vicinity of Broad and Arch Streets. Twenty-seven

thousand dollars were pledged toward this object at this meeting, one person engaging to subscribe twenty thousand dollars of that sum. Subscription books were opened, and a committee on facts and plans was appointed. In answer to a public call a large meeting was held, in the hall at the corner of Broad and Arch Streets, on Feb. 28, 1871, to consider the subject, at which Hon. Daniel M. Fox was chosen president; William Musser, Joseph Jones, George K. Ziegler, W. L. Schaffer, Dr. John Rommel, S. Gross Fry, Dr. H. E. Goodman, Frederick Graff, and John R. Baker, vice-presidents; and P. A. Keller, W. W. Kurtz, Joel G. Baily, Charles E. Blumner, and C. D. Norton, secretaries.

The meeting was opened with prayer by Rev. Dr. C. P. Krauth, and addresses were delivered by Mayor Fox, Dr. Seiss, and Dr. Krauth. Three lots were purchased at a cost of sixty thousand dollars, fronting seventy-five feet on Arch Street with a depth of one hundred and thirty-nine feet on Broad Street. The corner-stone was laid Nov. 28, 1871, and the Sunday-school room was dedicated and occupied Dec. 25, 1873. The first service was held in the lecture-room on Oct. 11, 1874, and the church was dedicated Feb. 17, 1875, at which time one hundred and fifty-nine persons were enrolled as members. On the 20th the congregation was regularly incorporated. The present membership of the church is two hundred and sixty-five.

The church is built of greenstone, variegated with light sandstone and stone of other colors. The style of architecture is the Florid German Gothic. The square tower at the northeast corner rises from the pavement, in the castellated style, to the height of ninety-two feet. The main audience-room is one hundred and twelve by seventy feet. On the Arch Street front the main building is relieved by a covered arcade, the arches being supported by polished stone pillars. The interior is very rich, and the cost of the lots, building, organ, and furniture was two hundred and twenty-five thousand dollars. The pastor is Rev. Joseph A. Seiss, D.D.

Emanuel's Congregation is an offshoot of St. Michael's and Zion Church. The mother-church in 1864 purchased the building known as Robert Reicke's school-house, on Sixth Street, below Christian, and fitted up the upper story for a parochial school, with three teachers, for the use of the children of the parish. The lower story was used by the members in the neighborhood for church service. Zion's congregation, having been authorized by the Legislature of Pennsylvania to sell their valuable ground on Eighth Street above Race, voted to their Southwark members forty thousand dollars for the erection of a church. Thereupon, Rev. H. Grahn was called in July, 1866, and organized Emanuel's (German) Lutheran congregation. In 1867 a lot was purchased at the southeast corner of Fourth and Carpenter Streets, for fourteen thousand dollars, and in 1868 the corner-stone of the new church was laid. The building was dedicated on July 4, 1869, Rev. J. W. Mann, D.D., preaching the dedicatory sermon. The edifice is of brick, with brownstone trimmings. It has a front of one hundred and six feet, and a depth of sixty-four feet, with a tower one hundred and ninety feet high, and clock and a chime of three bells. The lot and improvements cost eighty-six thousand two hundred dollars. In 1872 the congregation erected a parsonage on a portion of the church lot, at a cost of six thousand five hundred dollars. The church has also a parochial school, with two teachers, and Sunday-school, with four hundred children and thirty-eight teachers. The church membership (in 1884) is seven hundred. Rev. H. Grahn, who organized the congregation, is still its pastor.

Zion (German) Church, on Franklin Street, above Race, is another fine Lutheran Church. It is built of brownstone, and has a steeple one hundred and eighty-six feet high. The corner-stone was laid May 10, 1869, and the building was dedicated on the 11th of September, 1870. This is the original Zion congregation which removed from Fourth and Cherry Streets.

St. Paul's (German) Church, at the corner of St. John and Brown Streets, is an offshoot of Zion Church. The present site of the church was first occupied as a mission early in the present century, but in 1840 a church edifice was erected and occupied by St. Paul's congregation, under the ministerial charge of the pastor of Zion Church. It was dedicated Dec. 13, 1840, and being struck by lightning, it was partially destroyed by fire July 16, 1847. It was repaired at a cost of fourteen thousand dollars, and is still in use. On the 14th of April, 1869, St. Paul's congregation became a separate organization, having its own pastor and council. In the fall of 1868, Rev. Emil Reiche, of Würtemberg, was chosen as their pastor, and began his labors as soon as the church was officially organized. He was not in sympathy with the Lutheran Synod, and remained until July, 1870, a portion of his congregation, under the leadership of Rev. Mr. Reiche, forming a new organization, under the name of St. Paul's Lutheran Church, Independent. The latter erected a church at the corner of Fourth and Canal Streets. It is at present under the charge of Rev. G. J. Müller. A number of the old St. Paul's congregation adhered to their church, and called Rev. F. Wischan to the pastorate in September, 1870. He accepted, and at once entered upon the discharge of his duties, and is still pastor. The church has a membership of about four hundred persons, and a Sunday-school of eight hundred pupils. The parochial school adjoining the church is attended by four teachers, and has two hundred and twenty pupils.

The Lutherans have the following church organizations in this city in 1884:

Committee of General Council on Foreign Missions. President, Rev. A. Spaeth, D.D.; English Secretary, Rev. B. M. Schmucker, D.D.; German Secretary, Rev. F. Wischan; Treasurer, William H. Staake. Meets in Seminary on the fourth Monday of each month.

Theological Seminary, Nos. 212 and 214 Franklin Street. Faculty, Rev. C. W. Schaeffer, D.D., Rev. W. J. Mann, D.D., Rev. Henry E. Jacobs, D.D., Rev. A. Spaeth, D.D.

Board of City Missions. President, Rev. H. Grahn; English Secretary, L. L. Houpt; German Secretary, John C. File.

Orphans' Home, Main Street, above Carpenter, Germantown. President, Henry Lehman; Secretary, Lewis L. Houpt; Treasurer, John C. File; Superintendent, Charles F. Kuhnle; German Transcribing Secretary, Rev. F. Wischan.

Lutheran Mission and Church Extension Society. President, Rev. S. Laird; Treasurer, Peter A. Keller; Secretary, William H. Staake.

Rev. J. Fry, D.D., Reading, Pa., Treasurer of German Evangelical Lutheran Ministerium of Pennsylvania and the Theological Seminary.

William H. Staake, Esq., Treasurer of General Council.

The Lutheran, No. 117 North Sixth Street. Rev. G. W. Frederick, Business Agent.

Lutheran Observer, No. 524 Walnut Street. Editors, Rev. F. W. Conrad, D.D., Rev. V. L. Conrad, Ph.D., Rev. H. M. Bickel.

Publication Society, No. 42 North Ninth Street. President, Rev. William M. Baum, D.D.; Superintendent, H. S. Boner.

English (*General Council*).—Advent, Fifth Street, above Cumberland. Rev. J. F. C. Fluck.

Christ, corner of Main Street and Southampton Avenue, Chestnut Hill. Rev. Charles J. Hirzel.

Holy Communion, southwest corner of Broad and Arch Streets. Rev. Joseph A. Seiss, D.D.

St. John, Race Street, below Sixth. Rev. E. E. Sibole.

St. Luke, Fourth Street, above Girard Avenue. Rev. J. L. Sibole.

St. Mark, Spring Garden Street, above Thirteenth. Rev. Samuel Laird.

St. Michael, corner of Main and Church Streets, Germantown. Rev. F. A. Kahler.

St. Paul, Twenty-second Street, above Columbia Avenue. Vacant.

St. Peter, Reed Street, east of Ninth. Rev. E. B. Cassady.

St. Stephen, Powelton Avenue, below Fortieth Street. Rev. W. Ashmead Schaeffer.

Trinity, Rope Ferry Avenue, below Passyunk road. Rev. S. A. K. Francis.

German (*General Council*).—Emanuel, corner of Fourth and Carpenter Streets. Rev. H. Grahn.

German, corner of Martin Street and Prospect Avenue.

Immanuel, corner of Tackawanna and Plum Streets, Frankford. Rev. Matthias Schimpf.

St. James, corner of Third Street and Columbia Avenue. Rev. F. W. Weiskotten.

St. John, corner of Fifteenth and Ogden Streets. Rev. A. Spaeth, D.D.

St. Michael, corner of Cumberland Street and Trenton Avenue. Rev. F. P. Bender.

St. Paul, northwest corner of St. John and Brown Streets. Rev. F. Wischan.

St. Peter, corner of Fifty-second and Myrtle Streets, West Philadelphia.

St. Thomas, corner of Herman and Morton Streets, Germantown. Vacant.

Trinity Mission, Rising Sun. Rev. A. Linss.

Zion, Franklin Street, above Race. Rev. William J. Mann, D.D.; Rev. J. E. Nidlecker, assistant.

Independent Lutheran.—St. Paul, corner of Fourth and Canal Streets. Rev. G. J. Müller.

Swedish (*Augustana Synod*).—Swedish services for sailors. Home, 422 South Front Street.

Zion, Ninth Street, below Buttonwood. Sunday afternoon, Rev. C. J. Petri.

German (*Missouri Synod*).—St. John, corner of Wharton and Barlow Streets. Rev. O. Schroeder.

English (*General Synod*).—Calvary, southeast corner of Forty-third and Aspen Streets. Rev. Samuel A. Holman.

Grace, corner of Thirty-fifth and Spring Garden Streets. Rev. J. H. Mentges.

Memorial, hall, 2529 Ridge Avenue. Rev. J. R. Williams.

Messiah, corner of Sixteenth and Jefferson Streets. Rev. E. Huber.

St. Matthew, northwest corner of Broad and Mount Vernon Streets. Rev. William M. Baum, D.D.

Trinity, corner of Main and Queen Streets, Germantown. Rev. Luther E. Albert, D.D.

"THE NEW CHURCH" (NEW JERUSALEM, OR SWEDENBORGIAN).

The earliest promulgation of Swedenborg's doctrines in America was made in a course of lectures in Philadelphia by James Glen, of Scotland. They were delivered in a hall over Bell's bookstore, South Third Street, adjoining St. Paul's Church, in June, 1784. Notice of the lectures was given in the daily papers. Many prominent citizens attended, among whom were Miers Fisher, lawyer; John Young, a student-at-law, afterward Judge Young; and Francis Bailey, printer and publisher. Mr. Glen brought with him from Scotland several of Swedenborg's books, which had been translated from the Latin into English. Copies of these books came into the hands of Mr. Bailey, who printed several of them, among which were the following: In 1787, "A Summary View of the Doctrines of the New Church;" in 1789, "The True Christian Religion," in two volumes octavo; and in 1796, "Conjugial Love," one volume octavo. Among the names published with the edition of "The True Christian Religion," as subscribers to that work, are to be found those of three of the signers of the Declaration of Independence, viz.,—Benjamin Franklin, Robert Morris, and Thomas McKean.

A number of those who had become interested in Swedenborg's writings held meetings at the residence of Mr. Bailey, No. 116 High [Market] Street, for reading and conversation, and subsequently for worship. In 1794, Rev. William Hill, an English clergyman, who had been ordained by Mr. Hindmarsh, came to the United States, and preached the doctrines of the New Church in Philadelphia and at other places. He returned to England in 1804. In time the meetings became too large for Mr. Bailey's residence, and in 1808 were removed to the school-room of Johnson Taylor, No. 37 Cherry Street, where they were held until 1815, when the receivers of New Church doctrines took measures for effecting a permanent organization, changing their place of meeting to the school-room of Maskell M. Carll, No. 226 Arch Street, who acted as lay reader to the congregation which met there every Sunday for worship.

On the 25th of December, 1815, the organization was effected under the title of the American Society for Disseminating the Doctrines of the New Jerusalem Church, by the following-named twelve gentlemen: Daniel Thunn, William Schlatter, Johnson Taylor, William Kneass, Maskell M. Carll, Job Harrison, John K. Graham, John Hunt, Condy Raguet, Charles Beywroth, John Sterling, of Glasgow, Scotland, and William Barton, of New York. On the 1st of January, 1816, there were added Francis Bailey, Daniel Groves, Frederick Eckstein, and William Strickland. On the same day the organization was completed by the election of the following officers: President, Jonathan W. Condy; Vice-President, William Schlatter; Treasurer, Daniel Thunn; Re-

cording Secretary, William Kneass; Corresponding Secretary, Condy Raguet.

Jonathan W. Condy was a member of the bar in excellent standing. He was a successful maritime and prize lawyer, and was employed in many important cases. In 1810 he edited, with American references, Samuel Marshall's "Treatise on Insurance." William Strickland was the well-known architect, who did more in his time than any of his professional contemporaries in beautifying the city. He was born in Philadelphia in 1787, and studied under Latrobe. The Bank of the United States, the Mint, the Merchants' Exchange, and other public buildings, besides many churches and residences, were his work.

William Schlatter was a very successful merchant, and was thought to possess great wealth. He was established in business before 1805 as a merchant at No. 129 High Street, near Fourth. He built, about the year 1815, the fine, large, double mansion on the south side of Chestnut Street, east of Thirteenth. He lost his property, and died Jan. 10, 1827. Daniel Thunn's bookstore was in Sixth Street below Market; William Kneass was an engraver at No. 8 South Eighth Street; Johnson Taylor was a school-teacher, as was Maskell M. Carll; Daniel Groves was one of the leading brick-layers and contractors of the time; John Hunt, the coach-builder, was at No. 60 Zane Street [now Filbert]; Frederick Eckstein was a distiller; John K. Graham, a grocer; and Job Harrison, a shoemaker. Condy Raguet was one of the best-known politicians and writers of the time, a native of Philadelphia, and born in 1784. He made two voyages to the West Indies, and in 1805 published "A Short Account of San Domingo, and a Circumstantial Account of the Massacre there." He was one of the founders of the Philadelphia Savings-Fund Society, was president of the Pennsylvania Company for Granting Annuities, etc., and at one time was president of the Chamber of Commerce.

In 1815 he was elected a member of the State Assembly, and in 1818 a State senator. In 1822 he was appointed consul to Rio Janeiro, and afterward made *chargé d'affaires*. He remained in that country for five years. Mr. Raguet was a prominent writer on political economy, and published several important books and pamphlets on banking and the currency. In the latter part of his life he was editor and publisher of the *Philadelphia Gazette*. He died in 1842.

In 1816 the society secured a lot of ground at the corner of Twelfth and George [now Sansom] Streets, containing ninety feet on Twelfth Street, and ninety-nine feet on George Street, and at once proceeded to the erection of a house of worship.

The corner-stone was laid with appropriate services on June 6, 1816. The building being finished in the course of the year, the Rev. John Hargrove, of Baltimore, ordained Maskell M. Carll as minister and pastor, and on the 1st day of January, 1817, the new temple was consecrated with solemn services by the Revs. Messrs. Hargrove and Carll. The society continued to worship here until 1824, when severe commercial reverses among the members compelled the sale of their temple and their removal to other quarters. Their meetings for worship were for some years afterward held in Mr. Carll's school-room, Arch Street above Seventh, but were at length discontinued for a period. The society, however, did not abandon its organization. In 1840 a hall was rented, and the Rev. Richard de Charms invited to become its minister. He was succeeded by Rev. William H. Benade, formerly a preacher of the Moravian faith, and son of Bishop Benade, of the Moravian Church.

In 1853 the society purchased ground at the corner of Broad and Brandywine Streets, and erected a church thereon, which it occupied until the fall of 1882, when it was sold to the Spring Garden Unitarian Society.

In 1822 another society, known as the Second Philadelphia Society of the New Church, was formed. In that year the Rev. Manning B. Roche, pastor of Trinity Protestant Episcopal Church, having become a receiver of the doctrines of the New Jerusalem Church, tendered his resignation to the bishop, and on the following Sunday made a public resignation of his charge, in an affectionate address to his congregation. A number followed him, and thus laid the foundation for the Second Philadelphia Society. The first meetings were held in Commissioners' Hall, South Second Street, above Christian.

This society purchased a lot on Fourth Street, below German, and erected a house of worship, which was dedicated on the 25th of October, 1829. Mr. Roche remained the pastor for several years, during most of which time he attracted large audiences. After his resignation and removal from the city the congregation, from various causes, was gradually reduced in numbers, until at length it ceased to hold public services. The society was virtually dissolved in 1880, transferring its property to the First Society, then worshiping at Broad and Brandywine Streets.

Rev. William H. Benade was pastor of the first society until the year 1854, when he resigned, and, in connection with some of the members who were in harmony with certain views of church order which he entertained, formed a third society, and built a small house of worship in Cherry Street, west of Twentieth. This society, known as the Society of the Advent, is still in existence. Rev. Louis H. Tafel is the minister.

There is also a New Church Society in Frankford. This society was organized more than fifty years ago, and was for a long period of time, and until his death, under the pastoral charge of Rev. James Seddon. There are quite a large number of receivers of Swedenborg's doctrines in Frankford. The minister of this society in 1884 was the Rev. J. W. MacPherson.

In the first New Jerusalem Society Mr. Benade was succeeded by Rev. E. A. Beaman. Rev. B. F. Barrett, Rev. E. R. Keyes, and Rev. W. F. Pendleton subsequently occupied the pulpit. In 1878, Rev. Chauncey Giles, who had been pastor of the New Church Society in the city of New York for fifteen years, was invited to become the pastor of the Philadelphia society, and accepted the call. Under his ministry it soon began to increase in numbers and activity. This growth continued until it became necessary to seek for larger accommodations. To this end a lot of ground at the corner of Chestnut and Twenty-second Streets was purchased in May, 1881, and the work of erecting a new house of worship and a suitable building for the Sunday-school, a free library and reading-room for social entertainments and for business meetings was commenced, and the work completed in the year 1883. On the 11th of March the main edifice was dedicated to the "worship of the Lord Jesus Christ in his Divine Humanity." The cost of the ground and buildings, when completed, was one hundred and fifty-three thousand dollars. No debt remained on the property when the church was dedicated, the members of the society having within the space of two years raised among themselves nearly the whole of this large sum.

REV. MANNING B. ROCHE.

The buildings were designed by and erected under the supervision of Theophilus P. Chandler, architect. The lot of ground has a front of about one hundred and sixty-four feet on Twenty-second Street, and ninety-two feet on Chestnut Street. The church is placed on the northern end of the lot and is ninety-two feet by seventy-three, and the Sunday-school building is on the eastern side and is about sixty-four feet by forty-two feet. By this arrangement a large lawn is left at the corner of the streets, which adds greatly to the beauty of the buildings. The grouping, as is shown in our illustration, is very successful; the monotony of having the buildings directly upon the street is avoided, and a full view of two sides of each is obtained at once. The church can be entered from Twenty second Street or from Chestnut, either through the Sunday-school or across the lawn.

The church is in outline simple and dignified, belonging to the early English Gothic style of architecture of the thirteenth century. It is built without any clere-story, the church being spanned by one large truss. The orientation is correct, the chancel end facing east; the south and north sides are broken with windows and gables, which have the appearance of transepts. At the southwestern corner a picturesque porch, vaulted with stone, gives entrance to the main edifice. This porch is in itself an architectural gem of much beauty, as it is something never done before in this city,—in fact it is only seen in the old cathedrals and churches abroad. The stone arches run up to a Gothic groin, of which there are very few examples in America. The roof, which is necessarily very high and wide, is relieved by graceful but simple pinnacles at the corners and between the windows. The roof is covered with red tiling. The material used in the construction of both edifices is Trenton and Newark brownstone, which has a soft, warm, pleasing color, eminently well suited for this purpose. On the interior the roof timbers are exposed, and the arches and piers at the east end are of finely-finished stone-work. At the right of the chancel is the robing-room and at the left a fine organ, which was built at the factory of H. L. Roosevelt, in Philadelphia. The windows are filled with cathedral glass in graceful geometric forms, so arranged that in the future memorial windows may be substituted. A striking feature of the windows is that the mullions are of heavy stone-work appropriately grooved and decorated, which give a very rich effect to the whole structure. The church will seat comfortably about nine hundred people.

The Sunday-school building belongs to a later style of Gothic architecture than the church. It is built of the same material and is two stories in height. The windows are peculiarly striking, the mullions here being also of stone and filled with glass leaded into the stone-work. There are no wooden frames either inside or outside. On the first floor is a ladies' parlor, infant-class room, free library and reading-room, and book-room for the sale and distribution of books and tracts. The second floor is the main Sunday-school hall, which has an open timber roof. A stone cloister connects the two buildings near the chancel end of the church. The interior of both the church and

Digitized by Google

Sunday-school building is finished in hard woods, cherry being used in the church and butternut in the Sunday-school building.

The work of the society in making known the doctrines of the New Church is, in one of its features, novel, but practical and business-like. It uses the press largely in order to supplement its pulpit work. Most of the pastor's sermons are printed, and on the Sundays after their delivery are handed by ushers to the congregation as it is leaving the church, each person being invited to take one or more copies. In this way from eight to twelve hundred neatly-printed discourses are taken away nearly every Sunday, read at home, and handed around to friends and neighbors. Over fifty thousand copies of Mr. Giles' sermons have, in this way, been distributed in a single year.

The American New Church Tract and Publication Society has its headquarters in the Sunday-school building. This society was organized in 1866, and incorporated under the laws of Pennsylvania. Its object, as stated in the constitution, "is to print and distribute tracts and other publications of a religious character; also to stereotype New Church works, and to arrange, when practicable, with some leading house in the book-trade to print, publish, and circulate them through the ordinary channels of trade."

The society was fortunate in being able to make an arrangement, at the very start, with the extensive publishing house of J. B. Lippincott & Co., of Philadelphia, to "print, publish, and circulate" its books, thus securing all the advantages of their large facilities for reaching the public. This arrangement still exists, and has, from the first, been entirely satisfactory to both parties. During the first year of its existence the cash receipts of the society, from voluntary subscriptions, were $5384.95, and it stereotyped thirteen hundred and ninety-six pages, at a cost of $1938.82. In the second year (1867) the receipts were $3823.84. Stereotype plates of Swedenborg's "Heaven and Hell," "Divine Love and Wisdom," and a part of his "Divine Providence" were made, at a cost of $3184.29. During the third year nearly five thousand dollars were raised and expended in making new translations of some of Swedenborg's works and in stereotyping them. Since then the society has expended on an average not less than three thousand dollars a year in the prosecution of its work. These facts are mentioned to show how vigorously the young society went to work and how well the initial efforts have been sustained. In the mean time the publishers (J. B. Lippincott & Co.) have pushed out the new and handsomely printed editions of the society's books, securing for them a wide distribution through the regular channels of the bookselling trade, and extended notices from the press.

NEW JERUSALEM CHURCH, CORNER OF CHESTNUT AND TWENTY-SECOND STREETS.

Digitized by Google

The energy displayed by this society at the outset has never abated. Among its officers and managers are some of Philadelphia's most active and successful business men, and they have brought to the work of the society their practical wisdom and the business methods which lead to success. Their work in the society is voluntarily given, there being no salaried officer of any kind, so that all the funds of the society are used for the manufacture and distribution of its books and tracts.

Its issue of tracts in exposition of New Church doctrines has been very large, aggregating many hundreds of thousands; so has its work of supplying Protestant clergymen who make application for them with Swedenborg's work on "Heaven and its Wonders, and Hell, from Things Heard and Seen," and with a "Life of Swedenborg;" the first a volume of four hundred and fifty-three pages, and the other a volume of two hundred and sixty-six pages. Up to the close of 1883 Protestant clergymen and theological students had asked for and been supplied by the society with twenty-two thousand two hundred copies of the work on "Heaven and Hell," and seven thousand four hundred copies of the "Life of Swedenborg." Parallel with this work, and far exceeding it in cost, has been that of L. C. Iungerich, a merchant of Philadelphia, and a member of the First New Jerusalem Society. In 1873 he announced, through circulars and advertisements, that he would supply, without cost, any Protestant clergyman in the United States or Canada with a copy each of two of Swedenborg's large and most important works, viz., "The True Christian Religion," eleven hundred and twenty-nine pages, and the "Apocalypse Revealed," twelve hundred and two pages. The call for these books each successive year since that time has been large. At the close of the year 1883 twenty-three thousand six hundred of the "True Christian Religion," and sixteen thousand five hundred of "The Apocalypse Revealed" had been furnished to clergymen in response to their application for the books, at a cost to the donor of over thirty-three thousand five hundred dollars. The whole number of books thus supplied, up to 1883, by the Tract Society and Mr. Iungerich has reached nearly seventy thousand volumes. The offer of the Tract Society remains open, and Mr. Iungerich, at his death, in 1882, left ample means, in a trust fund, for the continuance of his part of the work.

THE HEBREWS.

The first Israelites in Philadelphia are believed to have been descendants of those families expelled from Spain by the well-known edict of Ferdinand and Isabella, but little concerning the Jewish people and church in Pennsylvania is to be found in any records previous to the Revolution. H. P. Rosenbach, in his lecture before the Young Men's Hebrew Association, mentions a tradition to the effect that "there were Jews in Pennsylvania before the landing of Penn." In January, 1726, a special act was passed to allow Arnold Bamberger and others to hold lands, and to engage in trade and commerce. Twelve years later the proprietaries sold a piece of land to Nathan Levy for a family burying-ground, and this passing finally into hands of the first Jewish congregation, deserves a more particular account. Richard Peters was then secretary to the proprietaries, and, under date of Feb. 17, 1747, he writes to them, saying,—

"On the 20th of September, 1738, there was laid out by order of Mr. Thomas Penn, for a burying-place for Mr. Nathan Levy's family, the quantity of sixty foot in front, on the north side of Spruce Street, between the Eighth and Ninth Streets, the east side thereof, being two hundred and forty feet west from the west side of Eighth Street. It is about fifty feet distant from Spruce Street [he meant from Ninth]. Mrs. Levy being buried there, and some other of the family since, Mr. Levy now desires the Proprietaries will grant him a patent, to include the ground within the wooden inclosure, and a ten-foot alley from Spruce Street [again Ninth], of such breadth as you please. The ground is full small, but, as I know it is not agreeable to you to part with any ground in the city, I have put Mr. Levy off from desiring an enlargement. You will be pleased to mention the terms or quit-rent to be reserved in the patent."

The year 1747 is believed to have witnessed the establishment of a congregation, called "Mikve Israel" ("Hope of Israel"), though it was long before they were able to build a synagogue. A letter from Jacob Henry, in New York, to Bernard Gratz, in Philadelphia, dated "Jan. 6, 1761," contains the following allusion:

"I am told there is great and mighty news with you at Philadelphia, that the building of a synagogue is actually resolved on, and, according to my intelligence, is to be put in execution with the utmost vigor. This is news. I could hardly have thought, seven months ago, that the same would be talked of this twenty-four years to come. Pray, Barnard, if your time permits, let me know who is at the head of this grand undertaking, with a short sketch of the plan, whether the synagogue is to be Hambro, Pragg, or Poland fation [fashion]. For my part, I think it will be best after the old mode of Pennsylvania. The same seemingly suits everybody. The expenses are not great, for the Rev. Mordecai Yarnall serves without fee or reward, and you must know, if you gitt a new fation Mordecai, he will expect great things for nothing. But, to shorten this long epistle of mine, I will only add that I wish you may go threw your good works, and myself the pleasure to see it built."

His postscript says, "The ink is frozen and weather very cold; wood £3 per cord." The reference in the above to Rev. Mordecai Yarnall is evidently a jest, for the only person of that name in Philadelphia at the time was a member of the Society of Friends, and a minister. It has been suggested that he had displayed much interest in the welfare of the Jews, and was well known to them all. During the period between 1747 and 1775 the congregation of Mikve Israel is believed to have worshiped in a small house in Sterling Alley, which ran from Cherry to Race Street, between Third and Fourth.

In September, 1751, a notice in the *Pennsylvania Gazette* said,—

"Whereas, many unthinking people have been in the habit of setting up marks, and fired several shots against the fence of the Jews' burying-ground, which not only destroyed said fence, but also a tombstone in it, there being a brick wall now erected, I must desire the sportsmen to

forbear (for the future) firing against said wall. If they do, whoever will inform, so that the offender be convicted thereof before a magistrate, shall have twenty shillings reward paid by

"NATHAN LEVY."

In 1774, Mr. Levy gave this ground to the congregation of Mikve Israel.

Afterward Mr. Michael Gratz was deputed by the congregation to buy the ground extending to the corner of Ninth Street, and title-deeds were made out in his name. This fact afterward led to the mistaken impression that Mr. Gratz had presented the congregation with the land; therefore sixty feet were reserved for the Gratz family. Among the earlier Jewish leaders were Bernard and Michael Gratz, brothers, and eminent merchants. They took the name of Gratz from the place they came from in Germany. They are thought to have taken their name from the town of Grätz in Styria, Austria, or from Grätz in Posen.

Another member of the first congregation and synagogue was David Franks, a son of Jacob Franks, a prominent merchant of New York. David Franks afterward left the Jewish faith. By untiring industry he accumulated a large property, but, by adhering to the British or loyal cause, his property was confiscated and he became very poor. The *Pennsylvania Gazette* of Jan. 26, 1769, had a letter from New York, which said, "Last Monday died Mr. Jacob Franks, for many years an eminent merchant." David Franks was equally eminent for years in Philadelphia, in social affairs and in business. He became a leading member of the famous and fashionable Mount Regale Fishing Company, which met and held stately revel at Peter Robinson's aristocratic tavern at the Schuylkill Falls. He and Sampson Levy are on record as subscribers, at forty shillings apiece, to the first assembly ball, in 1758, and Mrs. Marks, whose husband was a wealthy merchant, was one of the belles of the ball. Mr. Franks lived in the Logan mansion, built about 1755, at the northwest corner of Second Street and Lodge Alley [now Gothic Street], and then as fine a residence as any in Philadelphia. His name appears in various large financial transactions and agreements. In 1743 he married Margaret, daughter of Peter Evans. His daughter Abigail married Andrew Hamilton, attorney-general of the province. Another daughter, Rebecca, was one of the leading belles of her time. She and Miss Auchmuty were among the ladies of the "Meschianza," a gorgeous *fête* given to Gen. Howe in 1778.

This small Jewish congregation, for some years before the Revolution, had met at a house in Sterling Alley, which runs from Cherry to Race Streets, between Third and Fourth. The congregation was humble and the members poor, as the following minute of proceedings in 1773 will show:

"At a meeting of the Mahamod Kahal Kadosh Mikve Israel this 28th day of Shebat, 5533, present, Bernard Gratz, parnass; Mr. Solomon Marache, gabay; Mr. Michael Gratz, Mr. Henry Marks, Mr. Levi Marks, Mr. Moses Mordecai, Mr. Mordecai Levy, and Mr. Levi Solomon, it was resolved unanimously, that in order to support our holy worship and establish it on a more solid foundation than it is at present, we, the underwritten, do mutually agree and promise to pay annually to the parnass or gabay for the time being, the several sums annexed to our names, which are to be paid in equal quarterly payments, and it is understood that this subscription is to continue for the term of three years from this date, which money is to be appropriated for the use of the synagogue and charitable uses now established in the city of Philadelphia, in the province of Pennsylvania.

"As witness our hands this twenty-second day of February, one thousand seven hundred and seventy-three, in the thirteenth year of his Majesty's reign.

"Bernard Gratz, parnass, £10 per annum.
"Michael Gratz, £10 per annum.
"Levi Marks, £10 per annum.
"Solomon Marache, £5 per annum.
"Henry Marks, £5 per annum.
"Levi Solomon, £4 per annum.
"Mordecai Levy, £3 per annum."

At the breaking out of hostilities the principal Jews of New York, being strong Whigs, were driven out by the occupation by the British army. Many of them came to Philadelphia, and increased the number of the congregation Mikve Israel, and new quarters were sought. They hired a three-story brick house belonging to Joseph Cauffman, in Cherry Alley, between Third and Fourth Streets, on the south side, nearly opposite Sterling Alley. The building is believed to be the same afterward known as the Golden Fleece Tavern. In the second story of the building the synagogue was accommodated, and conveniences for worship introduced. Among the Jews who came from New York was the Rev. Gershom Mendez Israel Seixas. He was a rabbi of influence and eloquence. He had officiated at New York, at the Mill Street Synagogue, from the year 1766, being then but little over twenty-one years of age. Under Mr. Seixas' ministrations the upper-room synagogue in Cauffman's house became overcrowded.

In March, 1782, the Jewish congregation, still worshiping in the house of Mr. Cauffman, received notice to quit the premises. Bernard Gratz and Solomon M. Cohen were appointed to purchase or hire a place for worship. They reported that they had agreed to purchase a house in Sterling Alley, probably the house used for worship before the Revolution. A subscription was taken up, and a committee was appointed to conduct the affairs of the congregation, and fit up and prepare the house. It consisted of Isaac Moses, Haym Levy, Solomon M. Cohen, Simon Nathan, Bernard Gratz, and Jonas Phillips. Upon consideration, this committee thought that the fitting up and repairing of the house would amount to nearly as much as building a new one. The estimate for the latter was six hundred pounds, and the subscriptions being short, Haym Solomon agreed to pay one-fourth of the cost.

The house in Sterling Alley was then sold. A lot of ground was then bought of Robert Parrish and Henry Hill, in Cherry Street, west of Third, north side. Here the congregation built a plain brick building for a synagogue, with a house adjacent, for the *hazan*, or reader. It was nearly square, one story

high, seated about two hundred persons, and stood a little back from Cherry Street. A committee, consisting of Jonas Phillips, president; Solomon Marache, Simon Nathan, Haym Levy, Isaac Moses, and Solomon M. Cohen, with Benjamin Seixas, treasurer, was appointed to prepare rules for the dedication service. On the 13th September, 1782, the synagogue being ready for use, it was solemnly dedicated by the rabbi, Gershom Seixas, and the congregation, according to the ancient Jewish forms.

The "Pennsylvania Archives and Colonial Records" contain, under date of Sept. 12, 1782, a "Memorial from the President and others of the Jewish Congregation" in Philadelphia, praying for the sanction of the commonwealth, and stating that the synagogue was to be dedicated on the following day, the 13th. From this memorial we quote as follows:

"The congregation of Mikve Israel (Israelites) in this city, having erected a place of public worship, which they intend to consecrate to the service of the Almighty to-morrow afternoon, and as they have ever professed themselves liege subjects to the sovereignty of the United States of America, and have always acted agreeably thereto, they humbly crave the protection and countenance of the chief magistrates in this State to give sanction to their design, and will deem themselves highly honored by their presence in the synagogue whenever they judge proper to favor them."

A long paper in the handwriting of Haym Solomon, dated 1784, is extant, which, after describing certain difficulties connected with the transfer of the title, adds that "the dedication was on September 17th." Additional evidence has rendered it certain that the church was dedicated on the 13th of September. This synagogue, the first and for some years the only one in the State, was known as the "Portuguese Synagogue," because some of its members were Lisbon Jews. Mease, writing in 1810, says that "there was formerly a German synagogue in Church Alley, and thirty years ago (1780) there was one in Pear Street." The Polish Jews, a few years later, worshiped in the Adelphi building, South Fifth Street.

The members of the Mikve Israel congregation at this time were as follows: Isaiah Bush, Abraham Barrias, Abraham Van Etting, Mayer Solomon, Mayer M. Cohen, Sol. Cohen, Isaac Da Costa, Nunes, from the Capes, Samuel Da Costa, Mayer Daiklain, Samuel De Lucena, Bernard Gratz, Michael Gratz, Moses Gomez, Daniel Gomez, Philip Moses, Samuel Hays, Jacob Hart, Manuel Josephson, Barnueb S. Judah, Isaac Judah, Israel Jacobs, Abr. Levy, Hagima Levy, Isaac H. Levy, Solomon Levy, Jacob Cohen, Ezekiel Levy, Jacob Levy, Henry Marks, Isaac Moses, Solomon Marache, Moses H. Myers, Abrm. Henriquez, Jos. Solomon, Isaac Da Costa, Jr., Isaac Madeira, Joseph Madeira, Solomon Marks, Isaac Moses, Sr., Eleazar Sey, Zodak Dormisted, Simon Nathan, Lyon Nathan, Moses Judah, Moses Nathan, Joseph Abandanon, Andrew Levy, Jonas Phillips, Cushman Polock, Samuel Alexander, Gershom Seysius, Benjamin Seysius, Haym Solomon, Mordecai Sheftal, Sheftal Sheftal, Barendt Spitzer, Moses B. Franks, Joseph Simons, Michael Marks, Jacob Mordecai, Mordecai M. Mordecai, Jacob Meyers, Benjamin Nunez, Asher Myers, Moses A. Meyers, Abraham Sasportes, Judah Myers, Joseph A. Myers, Abraham Seixas, Mordecai Levy, Michael Hart, Napthali Phillips, Naim Van Ishac, Napthali Hart, Lazarus Barnet, Levi Solomon, Joseph Henry, Isaac Abraham, Myer Hart, Judah Aaron, Solomon Aaron, Isaac Cardoza, Manuel Myers, Colonorus Van Shelemah, David Bash, Reuben Etting, Samuel Israel, Joseph Carpelles, Moses Homberg, Moses Jacobs, Solomon Etting, Moses Nathan, Marcus Elkin, Meyer Hart and Sons, Solomon M. Myers, Samuel Lazarus, Philip Russell, Jacob Cohen, Ephraim Hart, Henry Noah, and Levy Phillips.

Something has been said of several of these, and all were representative men of that time. Simon Gratz afterward bought the house, southwest corner of Seventh and Market, in which Jefferson wrote the Declaration of Independence, and paid for it in two payments in 1798 and 1802. Bernard and Michael Gratz lived at 107 Sassafras Street, and were merchants. Manuel Josephson's place of business was at 144 High Street. Israel Jacob's store was at No. 52 North Second Street; in October, 1771, he was one of a committee to represent Philadelphia in the Assembly. Jonas Phillips, 110 North Second Street, was one of the leading Jews of the time, and at the head of church affairs. He married Rebecca Machada, of New York, born in 1746, and died in 1831. One son, Napthali, became a wealthy New Yorker; another son, Zalegman, born at No. 82 Chestnut Street, became one of the leading lawyers of the time. Until the day of his death, which was Aug. 2, 1839, he wore a queue. The Phillips family was descended, on the mother's side, from a lady named Nunez, who, with twenty-eight of her relatives, escaped from the Spanish Inquisition, by way of Lisbon, to London, and her grandchildren emigrated to America. Isaac Moses subscribed three thousand pounds to the Bank of Pennsylvania to supply the Continental army with provisions for two months. Samuel Hayes was a subscriber to establish the old Chestnut Street Theatre in 1792. Moses Levy belonged to a wealthy branch of that extensive family. A house of his, No. 104 (now 308) Chestnut Street, was sold to the Bank of North America for ten thousand dollars. He was presiding judge of the District Court for some time after 1808, and for six years before that date was city recorder. His law-office was at No. 311 Chestnut Street, and his residence where the Washington House stands, below Eighth. His brother Moses, also a lawyer, and, according to tradition, brilliant, successful, and eccentric, left the synagogue, and joined the Episcopal Church. Benjamin Nones was notary public and sworn interpreter, at No. 22 Chestnut Street, from 1806 to 1824, and served in the Revolutionary army. Bernard Solomon was published by Enoch Story, inspector, in February, 1778, for having re-

tailed whiskey. He absconded, and five guineas were offered for his arrest. Levy Marks was a tailor, and his sign (in 1760) was a Prussian hussar, but five years later was a gentleman and lady. Henry Marks' starch-factory swung the sign of a blue bonnet. Abraham Cohen in 1800 headed his advertisement of money to lend by the trite remark, "A friend in need is a friend indeed." His office was opposite the Bank of Pennsylvania. Haym Solomon, a broker and banker, native of Poland, was a remarkable man. Being in New York when the British took that city, he was locked for weeks in that loathsome dungeon called the "Prevot," but, escaping, came to Philadelphia, and gave the most valuable assistance to the struggling young nation, "at a time," said a committee of the United States Senate in 1850, "when the sinews of war were essential to success." He negotiated all the war securities from France and Holland on his own personal security, without the loss of a cent to the country, he receiving only a commission of one-quarter of one per cent. He was banker for the French government on the accession of M. de la Luzerne, and through his hands passed one hundred and fifty millions of livres. At the time of his death, early in 1784, it is claimed that the United States were indebted to Solomon at least three hundred thousand dollars for advances to ministers and agents of foreign governments for the use of the United States. The committee of the United States Senate asserted that this debt was a just one, and reported a bill, in 1850, for payment of the amount, with interest, to the heirs of Haym Solomon; but it was neglected, and has never been paid. Among those thus aided with loans were Jefferson, Madison, Arthur Lee, Baron Steuben, Robert Morris, and others, also a number of foreign ministers. Israel Israel, who died in 1821, aged seventy-eight, was one of the most interesting characters of the Revolutionary period. His brother Joseph served in the Continental army. Both belonged to the congregation Mikve Israel. Israel Israel lived in Carter's Alley, below Third, and lost his property by fire while there. At one time he was high sheriff of Philadelphia. His wife was Hannah Erwin, one of the famous women of the Revolution, and his daughter became Mrs. Ellet, the author. Lossing's "Pictorial Field-Book" says that "the patriotism of the Israels and the heroism of Hannah Erwin Israel will never be forgotten." Betrayed by Tories into British hands, Mr. Israel, who had at one time been a Grand Master, was saved from death by the use of Masonic signs.

The year after the synagogue was built, Rabbi Seixas, Simon Nathan, *parnass*, or president, with Asher Myers, Bernard Gratz, and Haym Solomon, their *mahamod*, or associate councilors, addressed the Philadelphia Council of Censors in relation to the declaration required from each member of the Assembly, as follows: "I do acknowledge the Scriptures of the Old and New Testament to be given by Divine Inspiration," and that part of the State Constitution which declared that *no other* religious test should be required of any civil magistrate. They represented that this provision deprived them of the right of ever becoming representatives. They did not covet office, but they thought the provision improper, and an injustice to the members of a persuasion that had always been attached to the American cause. This memorial caused no immediate action, but it had an influence, and led to subsequent modification of the test-clauses.

After the close of the Revolution, Rabbi Seixas returned to New York, where he remained until his death, in 1816, in charge of the synagogue in that city. Rev. Jacob Raphael Cohen, an Englishman from Toronto, was his successor at Philadelphia. He remained in charge of the Hebrew congregation until his death, in 1811.

After Rabbi Cohen's death, his son Abraham was appointed *hasan*, or reader. It may not be generally known that all of the Cohens throughout the world claim descent from Aaron, the first high priest, brother of Moses, the law-giver, "Cohen" in Hebrew meaning "priest." Abraham Cohen was succeeded in 1816 by Rev. Emanuel Nunes Carvalho as minister. The latter died in 1818. Next came (in 1818) Hortnig Cohen, reader; then Mr. Bensaden, also as reader; then (in 1825) Rev. Abraham Keyes, of Barbadoes, as minister; then Rev. Isaac Leeser; then Rev. Sabatai Morais.

The congregation, after the synagogue was finished, remained for some years in debt. On the 27th of February, 1788, application was made to the General Assembly of Pennsylvania for permission to set up a lottery to pay the amount due upon the synagogue building. No action was taken upon it at the time, but on April 6, 1790, the Legislature passed an act to allow the Hebrew congregation to raise eight hundred pounds by lottery. The managers were Manuel Josephson, Solomon Lyon, William Wistar, John Duffield, Samuel Hayes, and Solomon Etting. Messrs. Wistar and Duffield were not Israelites. The lottery was successful. The congregation, in April, 1788, issued an appeal to citizens of all sects, closing as follows:

"Whereas, the religious order of men *in this city* denominated Jews were without any synagogne until the year 178[illegible], when they purchased a lot of ground and erected thereon the buildings necessary and proper for their religious worship; and whereas, many of their number at the close of the late war returned to New York, Charleston, and elsewhere (which they had been exiled from on account of their attachment to American measures), leaving the remaining few of their religion here; and whereas, the present congregation, after expending all the subscriptions, loans, gifts, etc., made the society, to the amount of at least £2200, were obliged to borrow money to finish this building, and to contract other debts that are now not only pressingly claimed, but a judgment is actually against their improvements, and which must be sold unless they are enabled immediately to pay the sum of about £800, and which, from a variety of delicate and distressing causes, they are wholly unable to raise among themselves; they are therefore under the necessity of earnestly soliciting from their worthy fellow-citizens of every religious denomination their benevolent aid and help, flattering themselves that

their worshiping Almighty God in a way and manner different from other religious societies will never deter the enlightened citizens of Philadelphia from generously subscribing toward the preservation of a religious house of worship. The subscription-paper will be enrolled in the archives of their congregation, that their posterity may know and gratefully remember the liberal support of their religious society."

This appeal was certainly not a success, or the above-mentioned lottery act would not have been necessary. Another evidence of the sad financial difficulties of the congregation about this time is found in the efforts to obtain help from their brethren abroad. An earnest appeal was made to the German synagogue in Paramaribo, Surinam, Feb. 24, 1790 (18th Adar, A.M. 5550).[1] An application was also made to their compatriots in London, also to several congregations elsewhere, from whom some help was received.

On Sunday, 4th Tamuz, 5549 (June 28, 1789), the congregation Mikve Israel met to raise funds. B. Gratz, *segan*, stated that Jacob Cohen, *hazan* (or reader), had written, informing him that his engagement as *shochet* and *hazan* had expired, and wishing to know whether the congregation intended to continue the arrangement. All the members present, except one, were in favor of such continuance, and each subscribed the same amount that he had paid during the year just expired. They then balloted for a trustee, to have in charge all books, archives, and papers of the congregation, and elected Manuel Josephson, who received five votes; Samuel Hays, three votes; and Moses Nathan, one vote. It was afterward resolved that the deeds of the synagogue should stay in the hands of Jonas Phillips till the debt of the congregation to Robert Waln was discharged; then they also should be given to the trustee.

Among the subscribers on this occasion to the minister's salary, called the "offering," were the following: Manuel Josephson, £1 5*s.* 6*d.*; Samuel Hayes, £1 2*s.* 6*d.*; Solomon Lyon, £1 10*s.*; Jonas Phillips and son, £2 12*s.* 6*d.*; Sholas Barrnitza, 14*s.* 6*d.*; Tuy Phillips, 12*s.*; Bernard Gratz, £1 16*s.*; Michael Gratz and son, £1 19*s.*; Michael Levy, 17*s.* 6*d.*; Isaac Moses, Sr., 7*s.* 6*d.*; Moses Nathan Levy, 2*s.* 8*d.*; Moses Nathan Levy's brother, 18*s.*; Solomon Aaron, 7*s.* 6*d.*; Jacob Cohen, Sr., £1 2*s.* 6*d.*; Myer Hart, 11*s.*; Abraham Hart, 7*s.* 6*d.*; Michael Hart Cohen, £1 11*s.*; Solomon Etting, £1 2*s.* 6*d.*; Benjamin Nones, £2 3*s.* 6*d.*; Isaac Ximenus, 6*d.*; Joseph Henry, 8*s.*; Myer and Solomon Marks, 3*s.*; Mr. Aaron Syefort, £10 10*s.*

At a meeting of the congregation, July 19, 1789, present Solomon Lyon, Benjamin Nones, Samuel Hayes, and Myer Hart, the *segan* stated that the cemetery had been opened several times, and to prevent this in future a person was willing to build a house near it and live there. This was allowed, on condition that the taxes should be paid by the person occupying the house. Jewish cemeteries have been subjected to many outrages, and, within a few years, in provinces of Russia, Bulgaria, and Roumania have been openly violated. During the British occupation of Philadelphia the gate of the Jews' burying-ground was used as the place of execution of deserters. A gentleman writing upon this subject some years ago, said, "When I was a school-boy, about 1785, observing the old gate marked with many holes, I asked my father what had caused them, and he told me that the British shot deserters at that gate, and that it was a custom in European armies to shoot deserters at the gates of Jews' burying-grounds. Happening to mention this to the late Col. Walbeck, in the year 1813, he informed me that it was much the practice yet in Europe."

The following persons were, among others, buried in the Jewish ground, Spruce Street, before the year 1800: Nathan Levy, 1753; Jacob Henry, March 20, 1761; David Gomez, July 28, 1780; Matthew Gomez, May 5, 1781; Sarah Judah, June 20, 1783; Miriam Marks, April 11, 1784; Sarah Marks, June 7, 1784; Abraham Levy, April 8, 1786; Emanuel Josephson, Feb. 30, 1796. This last was a stonecutter's error, as Mr. Josephson's death, according to a notice in the *Philadelphia Minerva* of Feb. 6, 1796, occurred on January 30th. After 1800, and previous to 1820, the following were buried there:

Abby De Lyon, November, 1803.
Mrs. Isaiah Nathans, April, 1804.
Rachel Roderigo De Costa, Jan. 15, 1805.
Moses and Benjamin Nones, Oct. 28, 1805.
Rachel Roderigo De Leon, April 28, 1806.
Jacob Roderigo Penayra, April 28, 1806.
Jonas Hibblen, 5568, Adar 13, 1807.
Jacob Joachim Levy, May 23, 1809.
Isaac Pesoa, Dec. 3, 1809.
Rebecca Roderigo Pensyra, Dec. 5, 1809.
Israel Jacobs, March 3, 1810.
Rachel Levy, Dec. 23, 1810.
Rev. Jacob R. Cohen, Sept. 9, 1811.
Jacob M. Bravo, April 29, 1812.
Charlotte Levy, May 15, 1812.
Ezekiel Hyman Judah, Sept. 29, 1812.
Rachel Phillips, March 9, 1814.
Rebecca Cohen, Oct. 14, 1815.
Moses Nathans, Feb. 24, 1815.
Michael Gratz, 73 years, Sept. 11, 1811.
Miss Miriam Gratz, 58 years, Sept. 12, 1808.
Gertrude Moses, Sept. 8, 1811.
Sarah Gratz, Feb. 20, 1817.
Mrs. Bela Plock, Nov. 17, 1815.
Isaac Rodriques, March 7, 1816.
Jacob Bazam, Nov. 26, 1810.
Rev. E. N. Carvalho, March 20, 1811.
John Jacob, May 15, 1818.
Mayer Deckheim, May 2, 1818.
Henriette Manx, Aug. 1, 1819.
Abraham Hart, Aug. 12, 1820.
Rachel Nones, Nov. 7, 1820.

When Washington became President the following interesting address was sent by the Hebrew congregation in Philadelphia, also speaking for

[1] The Jews date from the creation, which they fix in 3761 B.C., which would make the present year, our 1884, their year 5645. Bishop Usher's date for the creation was 4004 B.C. The Greek Church decided upon 5509 B.C., and the Abyssinian Church on 5492 B.C.

the congregations in New York, Charleston, and Richmond:

"TO GEORGE WASHINGTON, PRESIDENT OF THE UNITED STATES.

"SIR,—It is reserved for you to unite in affection for your character and person every political and religious denomination of men, and in this will the Hebrew congregations aforesaid yield to no class of their fellow-citizens.

"We have been hitherto prevented by various circumstances peculiar to our situation from adding our congregation to those which the rest of America have offered on your elevation to the chair of the Federal government. Deign then, illustrious sir, to accept this, our homage.

"The wonders which the Lord of Hosts hath worked in the days of our forefathers have taught us to observe the greatness of His wisdom and His might throughout the events of the late glorious Revolution; and while we humble ourselves at His footstool in thanksgiving and praise for the blessing of His deliverance, we acknowledge you, the leader of the American armies, as His chosen and beloved servant. But not to your sword alone is our present happiness ascribed. That, indeed, opened the way to the reign of freedom; but never was it perfectly secure till your hands gave birth to the Federal Constitution, and you renounced the joys of retirement to seal by your administration in peace what you had achieved in war.

"To the eternal God who is thy refuge we commit in our prayer the care of thy precious life, and when, full of years, thou shalt be gathered from the people, thy righteousness shall go before thee, and we shall remember amid our regret that 'the Lord has set apart the godly for himself,' while thy name and thy virtues will remain an indelible memorial on our minds.

"MANUEL JOSEPHSON,

"For and in behalf and under the authority of the several congregations aforesaid.

"PHILADELPHIA, Dec. 13, 1790."

Washington immediately replied as follows:

"GENTLEMEN,—The liberality of sentiment toward each other which marks every political and religious denomination of men in this country stands unparalleled in the history of nations.

"The affection of such people is a treasure beyond the reach of calculation; and the repeated proofs which my fellow-citizens have given of their attachment to me, and approbation of my doings, form the purest source of my temporal felicity. The affectionate expression of your address again excites my gratitude and receives my warmest acknowledgment.

"The power and goodness of the Almighty were strongly manifested in the events of our late glorious Revolution, and His kind interposition in our behalf has been no less visible in the establishment of our present equal government. In war He directed the sword, and in peace He has ruled in our councils. My agency in both has been guided by the best intentions and a sense of the duty which I owe my country; and as my exertions have hitherto been amply rewarded by the approbation of my fellow-citizens, I shall endeavor to deserve a continuance of it by my future conduct.

"May the same temporal and eternal blessings which you implore for me rest upon your congregations.

"G. WASHINGTON."

By 1818 the old synagogue was found too small, and in 1820 a new building became a necessity. The corner-stone was laid Sept. 26, 1822, on the Cherry Street lot, west of Third, but the synagogue was not dedicated till Jan. 21, 1825. It measured forty feet in front by seventy feet in depth, and was two stories high. It was constructed in Egyptian style, and was built of Schuylkill stone. Its principal entrance was through an elevated doorway, with inclined jambs supporting a large, covered cornice, on which were sculptured the globe and wings,—the Egyptian emblems of immortality. The interior embraced two semicircular blocks of seats. The dome was supported by Egyptian columns copied from the temple at Tentyra, and was formed by semicircular archiv with richly-paneled segments extending from the ark to the altar. The ark wheat was on the east, and immediately opposite the altar was neatly decorated with pilasters supporting a covered cornice enriched with globe and wings, together with a marble tablet containing the ten commandments in Hebrew. It was approached by a flight of three steps, between cheek-blocks which supported two handsome tripods crowned with lamps. The galleries, which were semicircular, extended round the north and south sides of the building, and were supported by the columns before mentioned, which extended to the dome. The building was designed by William Strickland. The furniture in the lower portion of this building was afterwards removed to the new synagogue on Seventh Street on the erection of the latter, and was placed on the lower floor of that building, which is now used for minor services.

Mrs. Anna Royall, in her "Sketches of Life and Manners in the United States," published in 1826, gives the following account of a visit to the synagogue Mikve Israel:

"I attended the Jews' synagogue one Saturday, which is their Sabbath. Here I found about twenty men, but not one female. They all had their hats on and were standing, although there were seats convenient. Over their shoulders they wore a long linen scarf, in shape and size similar to those worn by ladies. It came down before, and each end was slung over the arm, as ladies wear them in summer. The service was nothing more than one of them, dressed like the others, standing at a desk, with a large Hebrew book open, out of which he read aloud as fast as his tongue could go, with a singing tone, and turning the leaves over with surprising rapidity. During all the time he was bowing his head up and down with such rapidity that it kept pace with his tongue, or kept time with his song, rather. While he was thus engaged the audience were walking to and fro, bowing in the same manner."

Mikve Israel occupies a solid and commodious building on the east side of Seventh Street, above Arch, and was dedicated May 10, 1860. This is the oldest congregation in the city, their former synagogue having been on the north side of Cherry Street, west of Third.

The German Congregation Rodef Sholem ("Followers of Peace") is supposed to have organized in 1800. The first place of meeting was at the corner of Margaretta Street and Cable Lane [now New Market Street], in a red frame building. The *hazan* and *rabbi* was Rev. Mr. Isaacs, who, it is said, was the inventor of the horse ferry-boats, then used on the Delaware River. He was succeeded by Rev. Jacob Lipman. The congregation removed from Margaretta Street to Church Alley, near Third. While it worshiped there Myer Ullman was *parnass*, and held the office until his death, when he was succeeded by Mr. Bomeisler, and afterward by Herman Van Beil. The congregation applied to the Legislature in December, 1808, for authority to establish a lottery for the purpose of erecting a synagogue. Dr. Lieb presented the petition, but the committee to which it was referred reported against it. In 1821 the effort was renewed, but with- success. The congregation then made an appeal

to the public, asking for contributions. About this time the congregation obtained a lot for a burial-ground on Frankford road. Through this ground Ellen Street was afterward laid out.

corner of Mount Vernon Street is one hundred and twenty-five feet high. The congregation is of German origin, and was the second of the Hebrew persuasion formed in the city. The corner-stone was laid July 20, 1869, and the building dedicated Sept. 10, 1870.

The Hebrew Church organizations in the city are as follows:

The Board of Managers of the Hebrew Sunday-school Society, incorporated in 1858, have under their supervision two schools, but they are not attached to any particular congregation. They meet in the school-house of the Hebrew Education Society, Seventh Street, above Wood, and in the building at the southwest corner Tenth and South Streets. Each has a sewing-school attached.

Adath Jeshurun, Julianna Street. Rev. Elias Eppstein. German and Hebrew school attached.

Anshe Emeth, New Market Street, above Poplar, Rev. A. Applebaum. Hebrew school attached.

Beth-el-Emeth, Franklin Street, above Green. Rev. George Jacobs. Religious school every Sunday morning for free instruction.

House of Israel, Crown Street, between Race and Vine. Rev. H. Rubin. Hebrew school attached.

Hungarian Congregation Chelrra Emmas Israel.

Jewish Hospital Synagogue, Olney road, near York pike. Rev. L. Saenger.

Keneseth-Israel (Reformed Congregation), Sixth Street, above Brown. Rev. Dr. Samuel Hirsch, rabbi; Rev. William Armhold, reader. A religious and German school attached.

Krakauer Beth Elohim, 417 Pine Street. Rev. Abraham Koper.

Mikve Israel, Seventh Street, above Arch. Rev. S. Morais.

Rodef Shalom, Broad and Mount Vernon Streets. Rev. Dr. M. Jastrow, rabbi; Rev. Jacob Frankel, reader. There are Sunday- and evening-schools at 838 North Fifth Street, and a religious school for Hebrew and German on Sixth Street, below Parrish.

HEBREW SYNAGOGUE.
[View showing Broad Street, looking south.]

At the present time (1884) there are ten Jewish synagogues in the city. Rodef Sholem, southeast corner of Broad and Mount Vernon Streets, is a very large building, of striking architectural appearance, in the Saracenic style of architecture. It is constructed of sandstone, decorated with stone of other colors. The interior is beautifully finished. The steeple on the

THE UNIVERSALISTS.

The Universalists were but little known in America until about 1740, when a few persons in New England and the Middle States professed their distinctive doctrines. There was no church organization till much later; but Dr. George De Benneville preached Universalist doctrines with great energy and zeal, in

Digitized by Google

and about Philadelphia, as early as 1741, and is thought to have published the 1753 Germantown edition of Seigvolk's "Everlasting Gospel."[1]

In the summer of 1770, Rev. John Murray, who had been a Methodist minister, came to America, and soon began a series of Universalist sermons at Bachelors' Hall, Kensington. This was in the fall and winter of 1770–71.[2] At that time he was unable to obtain a hearing in any church, although it is believed that Rev. Morgan Edwards, of the Baptist Church, and Rev. Jacob Duché, of the Church of England, favored these doctrines, or at least took interest in them, showing partial conviction. Murray was received at the house of the Baptist minister in Philadelphia, and was invited to preach in his pulpit. The latter privilege was withdrawn, however, before a sermon was preached, and perhaps social courtesy ceased at the same time. After these discourses were preached at Bachelors' Hall, Murray visited Connecticut, R. I., and preached in New Jersey at Good Luck and other places. In his journal he says, "I think it was in January of 1773 that a most important solicitation drew me to Philadelphia; and, having frequently visited that city, I had many opportunities with strangers collected there."

In his journal he speaks of Thomas Say, Anthony Benezet, and Christopher Marshall, who were in unity with him in religious faith.

During the year 1773, and in the spring and summer of 1774, he preached in Pennsylvania, New Jersey, and New York.

In 1784, Murray was again in Philadelphia, and met for the first time an important assistant among the teachers of his doctrine,—Rev. Elhanan Winchester, who was a recognized Baptist minister, and who had preached, during part of 1780 and 1781, the doctrine of universal salvation at the First Baptist Church. The result was a great commotion among the members of the denomination, which finally resulted in the exclusion of Winchester and his adherents from the Baptist Church. Rev. Abel C. Thomas says ("A Century of Universalism in Philadelphia and New York") that the members of the congregation of the First Baptist Church were two to one in Winchester's favor, but that by politic movements the minority obtained possession,—which is said to be nine points of the law,—and in the issue the Universalists were divested of any legal claim.

Winchester's adherents withdrew about March, 1781. They went to the hall at the academy, in Fourth Street, below Arch, reserved for the use of religious congregations. While here Mr. Winchester preached, Jan. 4, 1782, a sermon called "The Outcasts Comforted," from Isaiah lxvi. 5, addressed to his friends "who had been cast out and excommunicated for believing this glorious doctrine." This was soon afterward printed. The number of this congregation was probably less than one hundred. This society, which was at first known by the name of the Universal Baptists, worshiped at the academy for four or five years. During that time Winchester issued "The Gospel of Christ no Cause of Shame,"—two discourses, of one hundred and forty pages, published in 1783; also "A Serious Address to Young People," delivered May 20, 1785. An effort was made in 1785 to raise funds to build a church for the use of this society. Before they succeeded in this object it is probable that they removed their meetings to the Masonic Hall, or lodge, which was on the south side of Lodge Alley [now Gothic Street], between Second Street and Exchange Place. In November, 1785, Anthony Cuthbert, mast-maker, and Abraham Collins, sail-maker, who were brothers-in-law, bought the Masons' lodge for four thousand dollars. They paid one-fourth cash, and gave a bond and mortgage for the balance. On Jan. 16, 1786, they united in a deed of trust, in which they declared that they held the property for the use of the Society of Universal Baptists. The preamble recited in the deed is as follows:

"WHEREAS, The society of people called Baptists, known by the name of the First Baptist Church in Philadelphia, did, on or about the month of March, 1781, disunite from the fellowship of said society divers of those members who held and professed, and for so holding and professing, the doctrine of the universal love of God and the final restitution of all things through Jesus Christ our Lord; and whereas, the members of said society so disunited, and divers other persons holding the same doctrine, have united together and formed a religious society called the Society of Universal Baptists."

The deed of trust recited that the one thousand dollars paid by Cuthbert and Collins were raised by subs[illegible] they being personally responsible on [illegible] and bond, it was stipulated that

[1] De Benneville may rightfully be called the first Universalist preacher in America, so far as our information extends. His parents were refugee Huguenots, but died during his infancy. After an eventful and adventurous boyhood he "conceived the doctrine of universal restitution," to use his own words, and he opened his testimony in the market-house of Calais about the seventeenth year of his age. He was taken before a magistrate and sentenced to eight days' imprisonment. Notwithstanding the warning that a repetition would endanger his life, he persisted for the space of two years in preaching in France, mostly in the woods and mountains. In these labors Dr. Benneville had equally zealous preachers in co-operation, a Mr. Durant being of the number. At Dieppe these two ministers were seized, and condemned to death. Durant was hanged, but a reprieve arrived from Louis XV. for De Benneville. He was imprisoned for a long time in Paris, and was finally liberated by the intercession of the queen. He afterward went to Germany, in which country he spent about eighteen years, preaching extensively, devoting himself in the meanwhile to scientific studies. In the thirty-eighth year of his age he emigrated to America, and established himself in Oley, Bucks Co., as a physician, and also, temporarily, as a teacher. He preached and traveled much as a medical botanist among the Indian tribes in Northern Pennsylvania. He intermarried with the Bartolet family of Oley, and about 1757 he removed to Milestown, where he died in 1793, aged ninety years.

[2] In his autobiography, Murray says, "The combined efforts of the clergy in Philadelphia barred against me the door of every house of public worship in the city. Bachelors' Hall was in Kensington, but at Bachelors' Hall the people attended, and a few were enabled to believe the good word of their God." Bachelors' Hall, a favorite place of resort in colonial days, was the property of the Norris family. What is now known as Beach Street was formerly called Hall Street, and Bachelors' Hall was situated on the square now bounded south by Poplar Street, north by Shackamaxon Street, east by Beach Street, and west by Allen Street.

they should have the right to indemnify themselves in case of hostile proceedings upon either of those instruments. Winchester, according to Mr. Thomas, preached most of the time until he went to England, in the fall of 1787. He remained there nearly seven years, during which time he published several books. He came back in 1794, and was preaching at Philadelphia in the autumn of 1795-96, but died at Hartford, Conn., in 1797, aged eighty-seven. While he was in England, Rev. Moses Winchester, a half-brother, supplied the congregation, but he died in 1793, and was buried in the Sparks' (or Seventh-Day Baptist) Cemetery, on Fifth Street, above Chestnut.

The doctrines of Murray and Winchester were sufficiently alike to be easily reconciled. This was accomplished by a preliminary conference in 1789, and by a convention which met at the Masons' lodge in Philadelphia, May 25, 1790. The ministers present were John Murray, Nicholas Cox, Artis Seagreave, William Worth, David Evans, Moses Winchester, and Duncan McClain. They adopted Articles of Faith recognizing "the inspiration of the Bible, a belief in one God, infinite in all His perfections, and one mediator between God and man, Christ Jesus, . . . who, by the merit of His death and the efficacy of His Spirit, will finally restore the whole human race to happiness." A belief in the Holy Ghost and in the obligations of the moral law were also agreed to. A plan of church government was adopted. Annual meetings of this Conference were held for some years. The records preserved go as far as 1807. By the Convention of May, 1790, the Universalist Baptist Society was dissolved, and a new society was formed by a union of the disciples of Murray and Winchester, which was called "the First Independent Church of Christ, commonly called Universalists." Mr. Murray was in the city for some time that year, and preached to them; but, his sermons attracting larger audiences than could be accommodated at the lodge, some were preached at the University.

Mrs. Mary Ellet, daughter of Israel Israel, an early member of the congregation, who attended the meetings in Lodge Alley somewhere about 1788-90, thus describes the place,—

"It was a rough, unsightly structure, the room large and unfinished. The only furniture was common wooden benches on each side of the aisle leading to the primitive pulpit, an *unsightly box* surrounded with benches, on which sat the elders of the church, who would commence service by reading a few chapters from the Bible, sing a hymn, after that prayer by several, then exhortations to the congregation,—the men occupying one side of the house and the women the other. A very poor and much-worn Bible was the only book, with the exception of Watts' Hymns, that I ever saw there. Sometimes traveling ministers would hold forth, to the great delight of the members,—one of whom, I think, was the celebrated Dr. Priestley."

How long the society remained at Masons' Hall after the union of 1790 is not certain. The Philadelphia Directory for 1793, published in the early part of that year, in the appendix gives the names of "all the buildings appropriated to the worship of Almighty God, and where situated, with the names of their respective pastors, and says, "Universalists perform Divine worship in the Anatomical Hall, Fifth Street, between Chestnut and Walnut, and under the care of Rev. Hugh White."

In the same Directory, in the alphabetical portion, is the following: "White, Rev. Hugh, of the Universalist Church, schoolmaster, No. 146 Spruce Street."

There is nothing else said about the Universal Church in this Directory, nor does the name of Winchester appear in it. Rev. Hugh White is represented to have died in the yellow fever visitation of 1793.

In 1793 it was determined to obtain better accommodations for the congregation. Subscriptions were therefore raised in the summer of that year. There were forty-nine subscribers, who gave about four hundred pounds Pennsylvania currency, being nearly eleven hundred dollars. A piece of ground was purchased on the south side of Lombard Street, beginning at the distance of one hundred feet west of Fourth Street, and being one hundred feet front on Lombard Street by seventy-eight feet in depth. The price was five hundred pounds, and the deed was made in trust to Thomas Francis, Israel Israel, Anthony Cuthbert, Thomas Fitzgerald, Elisha Gordon, James Moore, and John Vannest. Upon this ground they built a church building, eighty feet on Lombard Street by fifty feet in depth. The location was badly chosen, and they were much cramped for means.

Thomas, in his history, says, "The walls were without plastering, and the only seats plain benches. I was told that the first pulpit was a rough platform, made by a mast-maker and a shoemaker."

Elhanan Winchester preached in that building from 1794 to 1796. He was succeeded by Rev. Thomas Jones, who held the position of pastor in 1801. In 1796, Dr. Joseph Priestley, the English divine and philosopher, delivered a series of discourses on "Revealed Religion" in the Lombard Street Church. A political meeting was held there Nov. 6, 1798, Israel Israel in the chair.

Mr. Thomas numbers among the helpers of Universalism at different periods some who were not members of the congregation, among whom were Dr. Benjamin Franklin, Dr. Benjamin Rush, Dr. William Shippen, Thomas Say, Christopher Marshall (who wrote in favor of Universalist doctrines), and Thomas Dobson (bookseller and publisher, known in literature as the American publisher of the "Cyclopædia," a very famous work when reprinted by him). Mr. Thomas says that Dobson for some time ministered to a few individuals in Carpenters' Hall, south side of Chestnut, between Third and Fourth Streets.

Dr. Thomas D. Mitchell says, in his "Recollections,"—

"The only Universalist Church in the city, in the days of my youth, was that on the south side of Lombard, west of Fourth Street. Being near to the homestead of my early youth, I have vivid recollections of the place and its early history. For many years the house was not plastered, and there were no galleries in it. The entrance was by two

doors on the Lombard Street front, near to the west end, while the pulpit was on the south side. There was a cellar under the whole, which yielded a revenue as a place for the storage of liquor and groceries in general. Who began the Lombard Street enterprise I know not; but it is certain that the actors were men of small means, for it was a long while before the house could be called a finished edifice, even according to the most ordinary taste, for the occupants were obliged to rent it for the use of singing schools, lectures, etc., in order to meet current expenses. For a long series of years it was impossible to procure a settled pastor, and, the dependence being on casual supplies, there was no obvious increase of the congregation. As it was important to rally once in a while, and to make a great effort to draw out the people, the eccentric and shrewd John Murray was frequently brought from Boston to beat up for recruits to the popular standard."

In the foregoing account the Baptist sect are observed to have lost more than any other by this defection. Besides the two Winchesters, they lost Rev. Nicholas Cox, Rev. William Worth, of Pittsburgh Baptist Church, also Rev. Abel Sargent, and probably others. Cox was a Philadelphian, and had labored in Warren and Sussex Counties, N. J. In 1790 the Philadelphia Baptist Association adopted the following:

"This Association lament that they have occasion again to call the attention of that part of Zion we represent to another awful instance of departure from the faith once delivered to the saints. Nicholas Cox, late a brother in the ministry, having espoused, and artfully as well as strenuously endeavored to propagate, the fatal views of the universal restoration of bad men and devils from hell, as such we caution in churches those of our sister Associations and Christian brothers of every denomination to beware of him."

In the year 1800, Rev. Thomas Jones was pastor of the Universalist Church in Lombard Street. During his pastorate he was assisted by Timothy Banger, an accountant and layman preacher, and intimate with Dr. Benjamin Rush. His name first appears in the minutes of a Convention in 1805. Thomas says, "He never had a pastorate, but was eminently useful as a preacher, especially during the many unsettled eras of our cause in Philadelphia." In 1821, Rev. Abner Kneeland wrote of him as "an amiable and worthy brother, who has always rendered his services gratuitously, and who has supplied the desk, when otherwise it would have been vacant (excepting what time it was thought best that the doors of the church should be closed) for more than twenty years."

Rev. Thomas Jones only remained until 1804, when he removed to Massachusetts, and died in Gloucester, after a ministerial service of forty-three years. He was educated at the seminary established by the Countess of Huntingdon, at Treveca, Wales, and came to America in 1796. Until 1807 the church was only supplied at irregular intervals, but in that year Rev. Noah Murray, of Connecticut, took charge. He had been the first Universalist preacher in Bradford County, Pa., and a monument stands to his memory at the town of Athens, erected by the North Branch Association of Universalists.[1] In 1808 he retired from the Lombard Street Church, and for a year Elders Timothy Banger and John Rutters were lay preachers. The next settled pastor was Rev. George Richards, in July, 1809. He was a writer of considerable repute, a poet, and a lecturer, particularly on Masonry. The church grew apace under his care. His sermon on the "Burning of the Richmond Theatre, Dec. 26, 1811," was printed and widely circulated. In the same year he also took the editorship of the *Freemason's Magazine.*

Serious dissensions arose in the First Universalist Church in 1812, in consequence of the political and national antipathies that then existed. Among the members were three Englishmen and their families. These were Thomas Dallett, Elijah Dallett, the elder, and Thomas Lay. They were entitled to all the privileges of the church, and they had declared their intention to become citizens, but were compelled to await the legal interval. Upon some occasion of business in the church the votes of these three persons were objected to on the ground that they were not citizens, and the ballots were thrown out by the officers, who sympathized with the anti-English party. The result was that the Dalletts and Lay were refused, and they withdrew from the congregation. This secession was of disastrous consequence. All the persons who attended services and supported the church, but were not allowed a voice, went out, and stripped it almost entirely of the greater portion of its attendants. The two Dalletts and Lay united with them, and it was resolved by the seceders to establish a new church, which they called the Church of the Restitution. Mr. Thomas says that there were one hundred and fifteen persons in this movement. They met in the fall of 1812, at the court-house, at Sixth and Chestnut Streets, and afterward at the hall of the University, on Fourth Street, below Arch. Rev. Mr. Richards went out with them, but he could not stand the strain and excitement of controversy. The position in which he was placed, heightened perhaps by want (for the old congregation was indebted to him for services, and the new one was not able to promptly meet the requirements of his salary), together with domestic troubles, affected his mind. He was placed in the Pennsylvania Hospital, and died there, by suicide, about March 1, 1814. His remains lie buried in the rear of the Lombard Street Church. The fact of a minister committing suicide seemed to the people a terrible thing, and Mr. Richards' self-murder was a heavy blow to the Universalist persuasion. After the death of Mr. Richards the Church of the Restitution ceased altogether.

By an act of Feb. 4, 1808, the Legislature appointed Israel Israel, Elisha Gordon, Thomas Amies, Jacob Thomas, Thomas Tompkins, John Murray, Thomas Kingston, and Thomas F. Gordon, commissioners, to conduct a Universalist lottery to raise ten thousand dollars to buy a burial-ground, and to pay off the debts. Mrs. Ellet, in her "Recollections," says,—

[1] His death occurred May 11, 1811, in his seventy-fifth year.

"The experiment was a disastrous one; the tickets sold slowly; the drawing was commenced when only a small amount had been received, and the first turn of the wheel brought out the grand prize. As a result, the church was deeper in debt than before, and the struggle with poverty was a long and severe one."

The controversies and financial troubles, outlined in the preceding paragraphs, weakened the First Church so that for some years its doors seemed to be open to anybody who desired to preach within its walls; and there are occasional notices in the newspapers of the intention of wandering clergymen and religious persons to speak there. The eccentric apostle of itinerancy, Rev. Lorenzo Dow, preached a charity sermon in November, 1814, "for the re-establishment of the Philadelphia Female Hospitable Society, for the relief of indigent sick persons." In February, 1815, it was announced that Dorothy Ripley, "the female Whitefield, will preach for the benefit of the Female Hospitable Society." In the early part of September, 1816, Rev. Ebenezer Lester, of Connecticut, was announced in the newspapers as having accepted the call of the Universalist Church on Lombard Street, and that he would commence service the following Sunday. He remained in Philadelphia about a year, when he went back to Connecticut, and died shortly afterward. Rev. Edward Mitchell, of New York, preached on the 10th of November, 1816, and again in June, 1817. Rev. Mr. Van Vliet preached in the early part of February, 1818. In the same month there came, it may be supposed, as a candidate for the pastorship, Rev. David Gilsom, who had been previously preaching in Western New York, and attracted many, but, for some unexplained reason, was not employed.

In September, 1818, Rev. Abner Kneeland assumed the pastoral care of the church, and a new schism soon arose. His introduction caused an entire change in some of the principles which were held by the congregation. In 1803 the Universalist Convention, held at Winchester, N. H., had adopted unanimously the articles of religion since known as "the Winchester Confession of Faith,"—a platform upon which the General Conventions of Universalists were established. The chief tenet thus laid down was: "We believe that there is one God, whose nature is love, revealed in our Lord Jesus Christ by one Holy Spirit of Grace, who will finally restore the whole world of mankind to holiness and happiness." This was a somewhat Trinitarian plank, while Kneeland's opinions were purely Unitarian; and, "however Murray might distinguish between the wrath of God and the fear of the wrath of God, both he and Winchester held to protracted future misery; whereas, Kneeland denied that the Bible taught any retribution beyond the present life." In his letter of acceptance he referred to the articles of faith embodied in the church organization to which he had been invited to minister, and reserved the right to interpret those articles himself. A number of families then withdrew, also Timothy Banger, who became a member of the Dunker congregation under Rev. Peter Keyser; but a majority remained, and there were many accessions.

Mr. Kneeland commenced his labors at the Lombard Street Church by the delivery of eight lectures on "Universal Benevolence," which were afterward published. In 1822 he edited "The Deist" (12mo), and the New Testament, in Greek and English, in two volumes. He was editor of the *Philadelphia Universalist Magazine and Christian Messenger*, 1821–23, according to Griesbach, which was printed by William Fry and published by Abraham Small. In May, 1824, he published a "Specimen of a Pronouncing Spelling-Book of the English Language, the Sounds represented by Phonetic Signs."

His celebrated debate took place with Rev. W. L. McCalla, of the Eighth Presbyterian Church, upon the question, "Is the punishment of the wicked absolutely eternal? or is it only a temporary punishment in this world for the good, to be succeeded by eternal punishment after death?" Mr. McCalla was the challenger, and Mr. Kneeland took up the gauntlet. Each of these debaters was represented by a moderator,—Mr. Kneeland by Rev. William Moss, a Universalist; Mr. McCalla selected Nathaniel Kennedy, a Presbyterian elder. These moderators united in the choice of an umpire in the person of Rev. William Hogan, formerly of the Roman Catholic Church in the city of Philadelphia. The discussion commenced Tuesday morning, July 13th, at the Lombard Street Church, and continued for four days. Mr. Kennedy, the Presbyterian moderator, became greatly excited during this controversy, and was immoderate in his expressions to his associates, in consequence of which he was persuaded to retire, and Rev. Ezra Styles Ely was chosen in his stead. This debate, which ended July 17th, was taken in short-hand by R. L. Jennings, and published in a volume of three hundred and thirty-six pages. In the year 1825, Mr. Kneeland's pastorate was closed by his removal to New York, and Rev. Nehemiah Dodge supplied the pulpit from August to November. Mr. Kneeland's subsequent career was a strange one.[1] Rev. A. C. Thomas, in his history, says of him,—

[1] Abner Kneeland was born in 1774, and became a preacher in Vermont, where he edited a work entitled "Mrs. Johnson's Captivity." After he left Philadelphia he succeeded Rev. Nehemiah Dodge as pastor of the Second Society of United Christian Friends—commonly called "the Second Universalist Society"—in their new church at the corner of Prince and Orange Streets, New York. A controversy springing up in the congregation, he and his followers left in the spring of 1827, and occupied the New Jerusalem Chapel in Paul Street, where they organized the Second Universalist Society. He edited the *Olive Branch* in 1828, and published "A Review of the Evidences of Christianity" in 1829. He also appeared in the press as a controversialist in reference to a tract which had been promulgated under the auspices of Rev. Thomas H. Skinner, of the Fifth Presbyterian Church, Philadelphia, which city he evidently revisited in 1829. The journals of that year say that on the 29th of September, when Fanny Wright, of England, and Robert Dale Owen lectured in Arch Street Theatre, Philadelphia, Abner Kneeland, former pastor of the Lombard Street Church, was a prominent leader in the movement. The *Mechanics' Free Press* was its organ. Robert Dale Owen made an appeal for funds to enable the friends of free inquiry in

"He was certainly the most venerable man I ever saw in the pulpit. His commanding presence, slightly florid complexion, all-illuminating blue eye, his voice never boisterous, his temper never ruffled, not eloquent according to received standards, but wonderfully impressive in calmness and persuasive candor, remarkably self-possessed,—all these qualities have fastened him in my memory."

The First Universalist Church had a Sabbath-school under Rev. George Richards in June, 1812, when first organized containing sixteen children, but this effort probably came to grief when the Richards party left. On the 15th of October, 1816, while Rev. Ebenezer Lester was pastor, a female Sunday-school was opened, and a male Sunday-school was established in December of the same year. Societies were organized in the congregation to assist these schools, the members making contributions of two dollars each per annum. The number of members of each society was not more than eighty or ninety. Beside instruction, these schools were somewhat in the character of charities, as donations of shoes for the use of the children were frequently considered necessary. They were generally the children of poor parents, having no other opportunity for instruction, and were sought for in the lanes and alleys. Here there was published in 1819, for the use of the Sunday-schools, the "Philadelphia Hymn-Book; or, a Selection of Sacred Poetry, consisting of Psalms and Hymns, compiled by Abner Kneeland."

Among the members of the First Church during this period was Professor James P. Espy, scientist and teacher, who for more than twenty years was teacher in the classical school of the Franklin Institute. His work on the "Philosophy of Storms," published in 1841, attracted much attention throughout the United States and Europe. He was taken into the service of the National Observatory at Washington, and his observations have been published in several volumes. The reports which he obtained from all parts of the country were collated, and deductions made. Dr. D. Francis Condie was from the time of his admission to membership in the Lombard Street Church, September 13, 1819, until his death, an earnest and attentive worshiper. He was a frequent writer in Universalist periodicals.

The origin of the Second Universalist Church can be briefly stated. Residents of the Northern Liberties, in March, 1820, organized a society and opened their meetings in Commissioners' Hall, North Third Street. Rev. Mr. Kneeland officiated. In 1821 a society was formed for the discussion of Universalism, which was called the Berean Society. Meetings were held at Commissioners' Hall, Northern Liberties, and the debates were participated in by friends and opponents of Universalism, Mr. Kneeland taking a conspicuous part. In the latter part of December, 1821, Rev. Hosea Ballou visited Philadelphia, where he remained for three weeks and preached twelve sermons. He officiated in the pulpit of the Lombard Street Church, in Washington Hall, on Third Street, north of Spruce, and at Commissioners' Hall, Northern Liberties, strengthening the new Second Church. Large numbers of persons were attracted to his discourses, and it is said that the last of the series was preached to seven thousand hearers. About this time Charles Rogers, of Rogers & Brother, hardware merchants, advanced seven thousand and twenty-five dollars toward the purchase of a lot on the north side of Callowhill Street, between Fourth and Fifth. The amount was afterward increased to ten thousand dollars. A portion of the ground was laid out in burial-lots, the church being set back from the street some distance.

A building association was formed and was successfully managed. The church was built with a Doric front, supported by columns, and for a burial-place underneath the pillars, James Nice, a member of the congregation, paid one thousand dollars. The building was sixty by eighty feet. The ground was bought in March, 1822, and the corner-stone was laid in September of that year, and the church dedicated Oct. 17, 1823. During the remainder of that year, and for a portion of 1824, Mr. Kneeland officiated in the Second Church, assisted by others. Rev. William Moss was in the latter year selected by the congregation, and accepted the charge. He was ordained on the 10th of June, 1824, in the Callowhill Street Church. Rev. Edward Mitchell, of New York, preached the ordination sermon, and Rev. Richard Carrique and Rev. Abner Kneeland assisted. Mr. Moss remained in the service of the church less than a year, going to New England the following April. He was succeeded in June by Rev. Stephen R. Smith, who had preached first in Philadelphia in October, 1822, at Commissioners' Hall, Northern Liberties, and to the First Church, in Lombard Street. Thomas' "Universalism in Philadelphia" says of Mr. Smith,—

"He was a most earnest, impressive public speaker, with the single fault of pouring out the burning or melting words of his inspiration until it seemed that his lungs would collapse beyond recovery. As a writer he was very thorough, and I have often sorrowed that he left so few marks of his pen in Philadelphia. Beside editorial articles, chiefly of temporary interest, his printed record is comprised in four or five pamphlets."

Rev. John S. Thompson preached at Commissioners' Hall during the year 1823. He was a Scotchman, was educated at the University of Glasgow; was originally a Methodist, and afterward became a Uni-

Philadelphia to erect a public hall. Subscription-books were opened in the bar-rooms of Tobiason's tavern, next door to the Arch Street Theatre; at Mrs. Neal's Circulating Library; at Nathan B. Starr's, No. 6 Arcade; and at Joseph McClintock's, Morgan Street, near Tenth. John Butterworth, George D. Henk, John Yeager, John Thomason, Alva Mason, Francis Breisford, Joseph A. McClintock, Stephen Poultney, William J. Young, James Glasgow, Frederick Shriver, and Simon M. Furst were appointed a committee to collect the necessary funds for that purpose. Subscriptions amounting to several thousand dollars were received. Mr. Kneeland became a friend and admirer of Fanny Wright; finally went to Boston, where he published the *Investigator*; was charged with blasphemy; afterward went West, and settled at Saluber, on the Des Moines River, where he died Aug. 27, 1844. Among other eccentricities he became interested in a company to dig up the valuables buried by Capt. Kidd, the pirate, on the North River.

versalist. He was conspicuous in the history of that denomination in the central part of the State of New York. He afterward published his discourses in the Second Church,—"Universalism, the Religion of Jesus; or, Critical Lectures on the Unity of God and the Salvation of all Men."

The Messiah Church, at the northeast corner of Locust and Juniper Streets, is built of brick, rough cast in the Collegiate Gothic style. This congregation was formed in 1850, and met for worship for some time in the Assembly Building, situated at Tenth and Chestnut Streets. The session-room of the church was opened for worship in March, 1851, and dedicated November 19th of the same year, Rev. Henry Bacon, pastor. The present pastor is Rev. Edwin C. Sweetzer, D.D.

The Church of the Restoration, on the south side of Master Street, between Sixteenth and Seventeenth, is built of brownstone. It was dedicated April 3, 1872, and presents an attractive appearance. The pastor is Rev. Frank A. Bisbee, D.D.

THE MILLERITES.

The world has known innumerable excitements about the approaching end of all earthly things. When the close of the first one thousand years after Christ's birth approached, all Europe ran wild with terror and expectation that lasted, indeed, until the thousandth anniversary of the crucifixion had also come and gone. Since then, though many and strange millennial prophecies have been uttered, and many new sects founded on a belief in the speedy "Second Advent of Christ," none have equaled that contagious excitement which ushered in the century that witnessed Pope Hildebrand's lion-like pontificate. But America has never had another Second Advent excitement to equal that which occurred in Philadelphia in 1841–44. A period of ten years immediately following 1830–33 was marked, so religious writers of the time say, by great fanaticism, and many changes in sects. The probabilities of the Lord's coming and of the reign of the saints on earth were discussed by thousands, unused to any sound logic or just principles of interpretation of the Biblical prophecies. Pamphlets and books on the subject abounded, written by men and women who thought that the day and the hour were revealed to them by especial providence or miraculous interposition. It was reserved for a simple, ignorant, and zealous man, of New England birth, to begin the "Millerite excitement," which spread from the woods of Maine to the lead-mines of Galena and the cane-brakes of Arkansas. Illiterate persons, reading their Bibles with single-hearted ardor, accepted the doctrine that the end of the world was near, and that the prophet was in their midst. Fire was to destroy the earth in October, 1844. The excitement in Philadelphia had been growing for two or more years, and by the summer of 1842 it was indescribable. The Millerite Church was on Julianna Street, between Wood and Callowhill, and there his followers met, night and day, and watched the stars and sun, and prayed and warned the unrepentant that the "day of judgment was at hand."

Many of them began to sell their lands and their houses at prices which were merely nominal. Others gave away their personal effects, shut up their business, or vacated their houses. On a store on Fifth Street, above Chestnut, was a placard, which read thus:

"This shop is closed in honor of the King of kings, who will appear about the 20th of October. Get ready, friends, to crown Him Lord of all!"

On a Chester Street sign was an inscription,—"The Bridegroom is Coming!" It was at this time that Henry Clay was making his celebrated 1844 canvass against James J. Polk, but the Millerites, when asked how they would vote in November, pointed solemnly to the heavens, and declared it was no use. People laboring under the excitement went mad, and the grand jury was called upon to indict the fanatical preachers, and thus put an end to the horrible delusion. On one occasion all the windows of a meeting-house were surrounded at night by a crowd of young fellows, and at a given signal the darkness and gloom were made lurid by flaming torches, and the air resounded with the roar of fire-crackers. The saints inside were wild with terror, for they thought the fiery whirlwind was come. The Sunday before the final day was an eventful one. The Julianna Street chapel was crowded. A mod of unbelievers on the pavements stoned the windows and hooted at the worshipers. The police of the Northern Liberties and Spring Garden, and a sheriff's posse, headed by Morton McMichael, were on hand to quell the threatened disturbance. The members of the congregation repaired to their homes, and after, in many cases, leaving their doors and windows open, and giving away their furniture, set out for the suburban districts. A large number went over into New Jersey; but the chief party assembled in Isaac Yocomb's field, on the Darby road, three miles and a half from the Market Street bridge. While here a furious hurricane strengthened the faith of the Millerites, and struck awful terror to the souls of the timid. It swept over the city, destroying shipping and demolishing houses. The *Ledger* a few days before had said, "If, on the 22d or 23d of this month, there should be a storm, or the day be as black and inauspicious as days in the calendar can occasionally be, it will add to the delusion."

The crowd at Darby was gathered within two tents, but so great was it that the children for two days were obliged to run about the fields exposed to the peltings of a pitiless storm, and crying for their parents. The parents, clad in thin white "ascension-robes," were almost exhausted for want of food, slept on the cold, wet ground, and prayed and hymned

and groaned incessantly. At midnight of the 22d the "Bridegroom" was to come, and a rain of fire was to descend from the heavens, and the saints were to be gathered up in a whirlwind. There they stood, on that black and tempestuous October night, shivering with cold and with fear, their faces upturned, and every eye strained to catch a beam of the awful light piercing the clouds. The morning broke, and with it came the end of the delusion. The assemblage dispersed in despair, and slunk away silently and downcast to their homes. One man in his ascension-robes had sat all night on his wife's grave ready to catch her resurrected body, and in her embrace to be translated into heaven. When the woe-begone company arrived in the city, the first intelligence from their former associates was that one of their preachers had decamped out West with several thousand dollars. Many a happy family was broken up by the effects of the mania, and many a man was reduced to penury.

It is said that there was also an encampment by Camac's woods, outside of Philadelphia, where one party waited for the "transformation scene." A writer in one of the Philadelphia papers, about 1874, says, "I was a young man at that time, in a counting-house, near Arch Street wharf, and I well remember the Wartman brothers, who were draymen at Arch and Water Streets, and had their stand there. One of the brothers was so infatuated with Millerism as to offer his share in the business for sale, and he nearly went insane from his belief."

Miscellaneous Churches.—Besides the religious denominations already mentioned, there are in this city the following churches of other religious sects:

ADVENT CHRISTIAN CHURCH.

Edwin King, corresponding secretary.
Advent Christian Mission, corner of Twenty-fifth and Huntingdon Streets. No settled pastor.
Second Advent, Mount Vernon Street, below Broad. Rev. Mr. Graham, E. F. Sergisson.

LATTER-DAY SAINTS.

MORMON, JOSEPH SMITH, JR., BRANCH,—ANTI-POLYGAMOUS.

Church, northeast corner of Ninth and Callowhill Streets. Elder Joseph A. Stewart.

MORMON,—POLYGAMOUS.

Congregation, Caledonia Hall, Pine Street, above Second. Elder Joseph Mullett.

CHRISTADELPHIANS.

West Philadelphia Institute Hall, Fortieth and Sansom Streets.

CHURCH OF GOD.

First, corner of Germantown Avenue and Berks Street. Rev. George Sigler.
Mission, Richmond Street, below Shackamaxon.

DISCIPLES OR CHRISTIANS.

First, Twelfth Street, above Wallace. Rev. C. Q. Wright.
Second, Frankford. Rev. Carroll Ghent.
Third, Holly Street, above Forty-first. Rev. A. B. Chamberlain.
Fourth, Twenty-second Street, above Montgomery Avenue. Rev. O. A. Bartholomew.

EVANGELICAL ASSOCIATION.

Rev. J. Yeakel, presiding elder of Atlantic Conference.
Christ, Eighth Street, below Girard Avenue. Rev. J. D. Woodring.
Emanuel, Fourth Street, below Poplar. Rev. J. P. Schnatz. Services in German.
Southwark, Fifth Street, above Washington Avenue. Rev. C. B. Fliehr.
St. John, corner of Sixth and Dauphin Streets. Rev. George Knerr.
St. John Mission, Nicetown; and Zion Mission, Bridesburg. Rev. Joseph Steltzer.
Zion, Rittenhouse Street, near Green (Germantown). Rev. William A. Leopold, Morning services, German; evening, English.

SPIRITUAL ASSOCIATIONS.

First Association of Spiritualists, hall corner of Eighth and Spring Garden Streets.
Keystone Association of Spiritualists, northeast corner of Ninth and Spring Garden Streets. Joseph Wood, president.
Second Spiritualist Church, Thompson Street, below Front.

UNDENOMINATIONAL MISSIONS.

Clarence, near Municipal Hospital. Henry W. Koons, superintendent.
Free Gospel Tabernacle, Restein Hall, Seventh and Dickinson Streets. Rev. William B. Cullis.
Kensington Mission, Girard Avenue, east of Otis Street.
Meadow Chapel, Moyamensing Avenue, above Seventh. John A. Neff, superintendent.
Park Avenue Union Mission, Diamond Street, above Twentieth.
Salvation Army Post, Richmond Street, west of Shackamaxon. Capt. H. C. Brown.

UNITED BRETHREN IN CHRIST.

ENGLISH.

Jasper Street, Jasper Street, below Lehigh Avenue. Rev. J. W. Taylor.
Mount Pisgah, Kipp and Cambria Streets, east of Front. Rev. T. B. Miller.

GERMAN.

First, Fourth Street, above Norris. Rev. F. List.
St. Paul's, Edgemont and Westmoreland Streets. Rev. W. A. Bairer.

CHAPTER XXXVIII.

CHARITABLE AND BENEVOLENT AND RELIGIOUS ASSOCIATIONS.

Almshouses.—Although the original settlers of Philadelphia were persons of means and of industry, so that it was a boast about the time of the foundation of the province that "no one need ever starve or be in want in this fruitful country," the lapse of years brought idle persons to the town, or misfortune overwhelmed some of those who were already there, so that they were really in want of assistance.

An act for the better provision of the poor was passed in 1700, and repealed by the queen in council in 1705. The Assembly adopted a new law in the latter year, by which it was directed that justices of the peace should annually appoint two overseers of the poor for each township, and might for the support of the poor levy a rate of one penny per pound on real and personal estate of citizens, and four shillings per head on all citizens not otherwise rated "to be employed for the relief of poor, indigent, and impotent persons, inhabiting within the said townships." The system established for the overseers seems to have been by personal relief, as the names of the beneficiaries were entered in the poor-book. The Common Council in 1712 resolved, "the poor of this

City, Dayly Increasing, it is ye opinion of this Council that a Workhouse be immediately Hired to Imploy poor P'sons & Sufficient P'sons appointed to keep them at Work." The overseers of the poor were empowered to attend to this business, and in the course of the year were authorized to find a convenient building for a work-house. Whether they carried out this direction does not appear in the minutes of Councils, which contain no further reference to the subject.

The establishment in the succeeding year of the Friends' Almshouse may have had some influence in relief of the public. Yet that institution was strictly confined to the relief of poor members of the Society of Friends, and it was not available as a place of refuge to the general public. In 1717 it was directed that persons receiving relief from the overseers of the poor should wear upon the right shoulder of the upper garment a large Roman P, together with the initial of the county, city, or place of which the pauper was an inhabitant. The said letters to be cut either in red or blue cloth, as the overseers of the poor shall direct. Every poor person who should neglect or refuse to wear such a badge was liable to the suspension or withdrawal of the relief, and also to whipping and keeping at hard labor for twenty-one days.[1] The Assembly passed an act in 1717 authorizing the erection of work-houses in Philadelphia, Chester, and Bristol. The preamble of the act declared that for want of proper prisons or houses of correction evil-doers escaped unpunished, and servants who for their neglect and abuses should be kept at work in such houses have become incorrigible. In Philadelphia a work-house was directed to be established within three years. It was to be managed by a board of assistants of the poor, appointed by a justice of the peace of the city and county. But this direction does not seem to have been immediately obeyed. The outdoor system of relief was still maintained. In 1729 the overseers of the poor presented a memorial to the Legislature setting forth the difficulty under which they labored from the great number of poor from foreign ports and neighboring provinces, and likewise from the insolvent debtors and their wives and children. The city having recommended this application, the Assembly resolved to loan the mayor and commonalty one thousand pounds, to be applied to purchasing a piece of ground and building an almshouse for the use of the poor of the city. The Council received this money in 1720, and the mayor and alderman, Plumsted and James Steel, were appointed a committee to fix upon a proper place to build the almshouse, to draw a plan, and to make estimates.

In the succeeding year a square of ground was bought from Aldran Allen for two hundred pounds which had formerly belonged to John Knight, and was a square bounded by Third, Fourth, Spruce, and Pine Streets. The lot was then a green meadow. The building was of brick, and probably finished in 1731 or 1732. The main front faced Third Street, from which there was an entrance by a stile. The great gate was on Spruce Street. There was a piazza all around the building, and in general appearance the house resembled the Friends' Almshouse, upon Walnut Street, west of Third. Here, beside the asylum for paupers, was established an infirmary, or hospital, with accommodations for the sick and insane, which was the commencement of the institution which has always been conducted in connection with the almshouse, and has been known of late years as the Philadelphia Hospital. Although this building was erected by the city of Philadelphia, it must have been in use by the county as well. There would be no difficulty about the tax-rate, the county justices having full authority to make levies, and the State really having furnished the money by which the almshouse was built. As a consequence of the establishment of this almshouse, which was probably the first set up on public account in the province, the Assembly passed a new statute in relation to the relief of the poor March 29, 1735.

They regulated the manner in which persons who came into the city of Philadelphia or any township or county, except those who arrived from Europe, might obtain a legal settlement. Housekeepers or inhabitants who received into their dwellings persons not having legal settlement were bound to give prompt notice to the overseers of the poor, under penalty. There were particular directions as to how persons removing should secure or keep their settlements. The act said, "The almshouse built for the city of Philadelphia may, if well regulated, be of service and help to ease the inhabitants of the taxes yearly assessed on them for the maintenance of the poor." The mayor, recorder, and aldermen were given authority to appoint a superintendent of the almshouse. Even at this early day abuses in furnishing public supplies had been noticed, against which complaint and absolute legal provisions have been directed ever since. The preamble of one of the sections recites that "Complaints have been made against Overseers of the Poor who have supplied the Poor with Necessaries out of their own Stores and Shops at exorbitant Prices, and also against Overseers who have paid unreasonable Accounts to their Friends and Dependents for Services done the Poor." After thirteen years of occupation the almshouse became too small to accommodate the persons who sought relief.

In 1764 the overseers of the poor represented to the Assembly that they were very much restricted in accommodation of the paupers. Into rooms but ten or eleven feet square they had been obliged to crowd four or six men. The church was turned into a

[1] Under this law a pauper of the city was known by the badge-letters P. P.

PROMINENT CHARITABLE INSTITUTIONS.

Digitized by Google

lodging room with fifteen beds.[1] There were several persons needing accommodation for whom there was no proper lodging. The number of paupers requiring this care at that time was two hundred and twenty. In 1766 the overseers of the poor again made application to the Assembly upon account of the insufficiency of accommodation to the paupers. The support of the poor for 1765 had cost three thousand two hundred dollars. Beside the inmates of the house, there were one hundred and fifty out-pensioners. About this time the urgency of the duty to the poor attracted the attention of persons of benevolence and means, and it was proposed that if the Assembly would charter a corporation with power to establish and maintain an almshouse and house of employment, such a company should be formed. In compliance with this suggestion the Assembly passed, on the 8th of February, 1766, "an act for the better employment, relief, and support of the poor within the city of Philadelphia, District of Southwark, the townships of Moyamensing and Passyunk, and the Northern Liberties." By this law every person who contributed ten pounds toward the purposes of the almshouse became thereby a member of the corporation with power to elect twelve managers, a treasurer, etc. They were embodied as "Contributors to the Relief and Employment of the Poor within the city of Philadelphia." As soon as they raised a stock of fifteen hundred pounds the city corporation was authorized to borrow on mortgage of the almshouse premises at Third and Spruce Streets, two thousand pounds, and to pay that over to the managers of the almshouse corporation for the purchase of ground, the erection of buildings, etc. The contributors were authorized to construct a commodious building, one part of which was to be appropriated to the reception and maintenance of persons who were poor and helpless, and the other, called the house of employment or work-house, for the reception, lodging, and employment of poor persons who were able to work. The managers purchased for the accommodation of the establishment a lot of ground bounded by Spruce, Pine, Tenth, and Eleventh Streets. The price was eight hundred pounds.

The buildings were opened in October, 1767. The almshouse was laid out in the form of an L, one hundred and eighty feet by forty, two stories in height, joined by a turret thirty feet square, and four stories high. The house of employment was on the west side of the lot, running south from Spruce, fronting Eleventh Street, also in shape of an L, so that the entire range of buildings inclosed on three sides a quadrangular space. A large central building was erected on Spruce Street, which stood between the L's. The first story of the almshouse and house of employment on the interior was a cloister of open arches. The buildings on Tenth and Eleventh Streets occupied two stories and a garret. The main central building, when finished, was three stories in height, with a hip-roof, surmounted by a small cupola. A habit soon grew up among the people of calling this establishment "the Bettering-House," a title which in time became somewhat an epithet of contempt. Two hundred and eighty-four persons were admitted into the almshouse in October, 1767, and in three months afterward the number had increased to three hundred and sixty-eight. The inmates of the house of employment were soon put to work, and in it were made various kinds of goods, principally of wool, hemp, and flax. When, in years after, cotton began to be grown in the United States, the manufacture of that fibre became an important industry in the establishment.

The events of the Revolution, which resulted in the impoverishment of many of the contributors, gradually reduced the membership and the income of the institution so much that, in 1781, the Legislature passed a law to the effect that if the corporation could not be kept up, or should cease to act, the overseers of the poor should be vested with all the powers of the corporation, and be themselves a corporation, under the title of the "Guardians of the Poor of the City of Philadelphia." In 1803, by an act of Assembly, it was ordered that the guardians of the poor, who were to be "substantial housekeepers," should be elected annually, sixteen by the corporation of the city, six by Southwark corporation, and eight by the justices of the peace of the township of the Northern Liberties. Outside of the city, Northern Liberties, and Southwark, the poor were attended to by the overseers of their respective districts. By act passed March 5, 1828, commissioners of Kensington and of Southwark, guardians who acted for Penn township, were added to the number of guardians, which was reduced to twelve. By the same act authority was given for erecting buildings for the accommodation of the poor upon a suitable site, not exceeding two miles from Market and Broad Streets, and if they desired, they might separate these buildings and erect a hospital at some place within the limits of the city eastward of Schuylkill Eighth Street. A loan of two hundred and fifty thousand dollars was authorized to be negotiated for that purpose.

Some time afterward two hundred acres of land were purchased in Blockley township, on the west side of the Schuylkill River, and extending along the south and east side of the Baltimore turnpike from a point near Chestnut Street and Hall Street, and the present Thirty-fourth Street. Upon this lot were erected four distinct buildings, disposed at right angles with each other, and inclosing an interior space of seven hundred by five hundred feet. The men's almshouse fronted the southeast. The main building contained a portico ninety feet in front,

[1] This was the hall used as the assembly room for the use of the paupers for religious and moral instruction, and not a separate church building.

supported by eight columns, in the Tuscan order, built of brick and rough cast, and was flanked by two wings, each two hundred feet in length. The portico being elevated on a high flight of steps, rising beyond the basement story to those of the principal story, gave to this group of buildings a commanding appearance. The women's almshouse was directly opposite the department for males, on the northwest side of the quadrangle. Between these buildings, on the sides, was the hospital, five hundred feet front, and the house of employment, of the same dimensions, immediately opposite. Court-yards and yards of labor, gardens and walks, were allotted to each building, for the accommodation of the inmates, the departments being separated by walls. In time, however, the inclosure became filled up with buildings absolutely necessary for the use of the establishment. The group of buildings was considered sufficient to accommodate four thousand persons, and the cost was about nine hundred thousand dollars. They were first occupied about the year 1835.

TOWNSHIP ALMSHOUSES.—In consequence of the peculiar system which combined certain portions of the city and county of Philadelphia in arrangements for the maintenance of the almshouse, other townships or districts were compelled either to rely upon the overseer system of relief, or else to establish poor-houses of their own. Moyamensing, Passyunk, Kingsessing, Blockley, unincorporated Northern Liberties, Germantown, Roxborough, Oxford, Bristol, Lower Dublin, Byberry, and Moreland were not within the almshouse jurisdiction when the buildings were erected at Third and Spruce Streets or at Tenth and Spruce Streets. Some of them were not united with the city and other districts in the management of the main almshouse after the great establishment was built in Blockley. Under an act passed April 11, 1807, authority was given to establish a public corporation, styled "the Directors of the Poor and of the House of Employment for the Townships of Oxford and Lower Dublin of Philadelphia County." Under this law a farm was purchased of one hundred and forty-five acres, near the mill-dam of Samuel Comly and others. In 1823 the guardians of Bristol township were incorporated, with authority to erect a poor-house, purchase land, etc. In 1809, for Germantown, a corporation was created, entitled "The Managers for the Relief and Employment of the Poor of the Township of Germantown, in the County of Philadelphia." They bought a lot of ground, containing twenty acres, and established an almshouse upon a lane east of the main road, which thenceforth was called for many years "Poor-House Lane." The township of Roxborough was authorized to build a poor-house in the year 1837. The borough of Manayunk was united with the township, and the almshouse grounds contained twenty acres. The Moyamensing Almshouse was established in the early part of the century, on Irish Track Lane, now obliterated (below the present Fitzwater Street). It was of brick, with several outhouses, and the inclosure comprised several acres of ground.

THE FRIENDS' [OR QUAKER] ALMSHOUSE.—Charity and benevolence in a community founded by the Society of Friends might naturally be supposed to have been quite active from the foundation of the province of Pennsylvania. This expectation does not seem to be justified by facts. Want, suffering, and sickness went on for many years without attention being directed to relief and comfort. The first purely charitable institution known to have been established was strictly sectarian, and its benevolence was confined closely to the members of the religious denomination in the interests of which the so-called charity had arisen. The Quaker Almshouse was not a place for the support of the poor unless they should happen to be Quakers. The ground was a gift by the will of John Martin, who died in 1702, and devised the property on Walnut Street to Thomas Chalkley, Ralph Jackson, and John Michener, without reservation or expression of desire that they should hold it for any trust. The devisees, however, understood from conversations with Martin in his lifetime why he made this devise to them, and they represented to the Monthly Meeting of the Society of Friends that there was an understanding that Martin intended that "his estate should be disposed of for the use of poor Friends according to this meeting's direction." Small houses appear to have been erected upon this ground for almshouse purposes before 1714, and "a messuage and messuages" are spoken of in a declaration made by the executors of John Martin's will in that year. The front building, quaint in its appearance and character, which occupied the whole front of the lot, was not built until 1729. "The central portion rose above a simply ornamented doorway to an open-arched entrance which led from the street by steps to the garden and buildings in the rear. The ground was naturally higher than the level of the street. The central building rose above the wings two stories in height, one of them being of a basement character. The garrets were under a steep-pitched roof. The centre had a third story and garrets. Four chimneys were conspicuous from the street. The eaves were heavy and the roofs pitched sharp and high. The entire appearance of the structure was peculiar, and unlike anything else to be seen in the city. There was a fitting accompaniment to the oddity of the structure in a little one-story building with steep garret-room on the west, which in modern times was known as the Wigmore House, in which lived at one time Joseph A. Wigmore, a bottler, who was succeeded in the occupation by his widow, famous for many years among the young population as a fabricator of molasses candy.[1]

The Friends' Almshouse has no story of romance or

[1] Westcott, Historic Mansions, pages 99, 100.

interest connected with its history. The Quakers generally were thrifty, and were sufficiently economical in saving to be beyond the necessity of a resort to the almshouse to be supported at the expense of the society. There were in the yard three or four cottages, small square buildings, which were inhabited in the present century by old women, some of whom made a little money by the cultivation of roots and herbs in the garden. About 1830 there was a watchmaker who occupied the room in the first story adjoining the main entrance on the west. A few pinchbeck and silver watches hung on wires which crossed the front window gave some intimation of the work that might be done within.

The plan of the almshouse building on the inside merely showed what were, although apparently in one building, six separate and small houses in a row, the door of entrance of each being from the yard, and the block being divided on the first story by the central doorway and entrance from the street to the garden. The two dwellings on each side of either end may be described in appearance from the garden as a one-story house with a garret-room, or a garret divided into two rooms. The central building was sufficiently high to be divided into two two-story dwelling-houses with garrets. The cottages in the yard of the almshouse were small one-story brick buildings with an overhanging roof and loft, in which a garret was accommodated with a dormer-window. The chimneys were narrow and tall, almost too big in appearance for the houses. Although the Society of Friends had equitable title to this property in 1702, they did not get legal possession of it by deed for many years afterward. In the mean while they had occupied it, built upon it, and in all respects treated it as their own. In 1714 the executors of John Martin made a declaration that they held the lots on Walnut Street for the use of the Society of Friends, "for the habitation and succor of such and so many poor and unfortunate persons of the people called Quakers as the members of the Monthly Meeting at Philadelphia should nominate and appoint, and for want of such poor to inhabit such premises that the said messuage or messuages, or such part or parts thereof happening to be vacant, should be let and rented to others, and that the rent and profits thereof, as well as the surplusage of said estate, should be applied for the relief and maintenance of the poor of the said people called Quakers, in such manner as the said Monthly Meeting should order and direct." This declaration of trust was made to William Hudson, John Warder, and Anthony Morris, Jr., and they held it as trustees. The legal title seems to have been vested, in 1751, by Rebecca James, who was the surviving child and heir of Thomas Chalkley, who was at the time of his death surviving executor of John Martin. Abel James, her husband, joined with her in the deed which was made to Edward Cathrall, John Reynell, John Armit, Israel Pemberton, John Smith, John Emlen, and John Morris in trust for the use of the Society of Friends. From these trustees the title is traceable all the way down. In regard to the tenancy of this building, it could never have been very large. The little cottage houses would have been overcrowded by four persons each, and in modern times rarely contained more than two. The six tenements of the front building often could not have had more than from two to three occupants each.

This old almshouse, with its queer architecture, was a peculiar building among the grander edifices of the city for one hundred and twelve years. It was torn down in 1841, and upon the ground and some space adjoining in the almshouse yard was built a large, broad, three- or four-story brick building, suitable for offices for brokers and others, the rents of which were considerable. One or two cottage-houses remained in the yard, in which a few old women lingered long after business entrenched itself all round them. At length they had to go, and in 1876 the cottages were torn down, and right through the centre of the lot, with arched entrance from Walnut Street, was pushed a long court or alley extending to Willing's Alley, and built up on each side with a row of two-story brick buildings, intended to be used for offices, the passage being called Walnut Place. This disposition of the property was not to the injury of the poor people in whose welfare John Martin, the tailor, was interested one hundred and fifty years before. The revenues from this property must be very considerable, and it may be taken for granted that they are administered with prudence by members of the society for the benefit of their poor, not, however, by the stigma which residents in an almshouse may seem to authorize in vulgar minds. A better and less objectionable method has been adopted. The poor of the Society of Friends do not live in communities any more. They are placed in respectable families as boarders, and the poverty of their condition is not exposed. When John Martin originated the idea of the almshouse there was no such intention of charity as this; but the diversion of the fund in the method now adopted is worthy of the spirit of the age, and not beyond what it might be supposed the founder of the Friends' Almshouse intended, and would have directed, if he could have foreseen the vast changes that were to take place in manners and methods of living.

Magdalen Society.—After the establishment of the Quaker Almshouse many years rolled by before any step was taken toward the establishment of any private institution in the shape of an asylum or home. The first instance was the establishment of the Magdalen Society for the reformation of fallen women. It was founded in 1799, "to aid in restoring to the paths of virtue women who have been robbed of their innocence, and are desirous of returning to a life of rectitude." Bishop William White, of the Protestant Episcopal Church, was the first president of this so-

ciety. In 1802 the society was incorporated. President, Rt. Rev. William White; Vice-President, Robert Wharton; Secretary, Samuel Howell; Treasurer, John Evans; Standing Committee, Robert Ralston, Thomas Atmore, John Letchworth, Robert Wharton, Jesse Cluer, and William T. Donaldson. The society bought ground at the northeast corner of Schuylkill Second [Twenty-first] and Race Streets, extending down Race Street toward Schuylkill Third [Twentieth] a considerable distance, and northward half way to Vine Street. Here was erected a house of moderate dimensions, which, in 1810, could accommodate ten or twelve women. At a later period a broad and imposing four-story brick building was erected in front. High brick walls on all sides shut out the inmates from sight of the world, and if reformation is an effect of solitude the building and grounds are well suited to effect the purpose.

Officers for 1882.—President, William Purves; Vice-President, Henry D. Sherrerd; Secretary, Andrew H. Miller; Treasurer, Richard Cadbury; Managers, Henry D. Sherrerd, Thomas A. Robinson, Colson Hieskell, Richard Cadbury, S. Weir Lewis, Andrew H. Miller, Samuel B. Huey, Asa S. Wing; Physicians, Dr. James J. Levick, Dr. Edward W. Watson; Matron, Mrs. E. T. Freeberger.

The Rosine Association, a society for the same purposes as the Magdalen Society, was established about 1847, the object being "to rescue from vice and degradation that class of women who have forfeited their claims to the respect of the virtuous." The society was incorporated April 10, 1848, and established a house on Eighth Street, above Wood, and subsequently at No. 3216 Germantown Avenue, below the Rising Sun Lane.

Officers.—President, Mrs. I. Newton Peirce; Vice-President, Mrs. Harriet Gaw; Treasurer, Elizabeth Diament; Secretary, Violetta Warbasse; Corresponding Secretary, Harriet S. French, M.D.; Managers, Mary A. Kintzle, Sarah C. Walker, Sarah B. Brotherton, Rebecca Hampton, Joanna Hatten, Elizabeth C. M. Boyd, Mrs. Joseph G. Ditman, Mrs. George A. Smith, Mrs. C. S. Baker, Mrs. Hettie Savage; Physician, Anna M. Marshall; Solicitor, Harry C. Hawkins.

The Orphans' Society.—On the 20th of March, 1814, ladies connected with the Second Presbyterian Church, at Third and Arch Streets, resolved, at a meeting held by them, to establish an asylum for the care and education of orphan children. Their measures were so well taken that they were able to establish and open a home on the 3d of March, 1815. Application made to the Legislature was followed by a charter for "The Orphans' Society of Philadelphia." Women only were members. They were admitted on payment of two dollars per year, or thirty dollars for life membership. The First Directress was Sarah Ralston; Second Directress, Julia Rush; Secretary, Maria Dorsey; Treasurer, Mary Yorke.[1]

Upon the lot at the northeast corner of Cherry and Schuylkill Fifth [Eighteenth] Street, a broad two-story brick building, with a handsome doorway, was erected. The institution was conducted successfully, with benefit to the young and satisfaction to the ladies who were interested in the society. But, on the 24th of January, 1822, a terrible disaster occurred. A fire broke out at an early morning hour, at a time when the weather was intensely cold. Schuylkill Fifth and Cherry Streets were at that time far out of town, and a fire there was not certain of being immediately noticed, nor made the subject of an alarm. The engine and hose companies were slow in coming on the ground, and they were sparsely manned. Fire-plugs were few, and most of them frozen, and there was every facility for the spread of the flames. There were ninety orphan children in the asylum at the time; sixty-seven of them were rescued, but twenty-three were unable to escape, and were burned to death. Those who were saved were received in the Widows' Asylum adjoining. Before night of the day on which this occurred plentiful donations of bedding, covering, and clothes, with food, made the frightened little creatures comfortable. The cause of the fire was determined to be the catching of the woodwork of a floor by the defective manner in which a boiler was placed upon the masonry which supported it. The building was totally destroyed. The firemen could do but little to save it. Their hose burst from the effects of the cold. The chambers and valves of their engines were filled with ice, and those machines would not work. The best they could do was to try and save the lives of the children, several of whom were rescued by their undaunted courage. A few days after the fire a house on Market Street, west of Broad, was prepared for the reception of the orphans, and the family was removed there. Much sympathy was felt by citizens and the people of the country in consequence of this terrible calamity, and assistance came forward with alacrity. The State of Pennsylvania appropriated five thousand dollars to the Orphans' Society toward the expense of constructing a new building. Private contributions came forward liberally, and amounted to twenty-seven thousand nine hundred and seventy-eight dollars. Encouraged by this, preparations were made to rebuilt the asylum. William Strickland prepared a plan. The new building differed somewhat from that first erected, more particularly as to the style of the doorway and entrances. It was at the northeast corner of Schuylkill Fifth [Eighteenth] and Cherry Streets, and had a front to the west. The size was fifty-three by one hundred feet. There was a basement, principal and attic stories, substantially built, and of good materials. The basement was arched throughout, rendering the first and second floors completely fire-proof. The stairs were of stone from the foundation to the bed-room floor. All the rooms in the attic story had immediate communication with the large hall and stairs, thereby affording the utmost safety to the numerous tenants. The building was calculated to accommodate a family of two hundred persons. The cost, including stable, water-cistern, and the introduction

[1] See vol. i. pp. 584, 585.

of the Schuylkill water, was twenty-five thousand dollars. This institution continued in operation after the reconstruction for nearly fifty years. About 1871 it was found that the ground had become so valuable, and the invasion of the city buildings all round the institution was so pressing, that the situation of the asylum was no longer desirable. It was determined to sell the property. This was done in 1872, and a row of greenstone front dwelling-houses, extending from Cherry Street to Race, was erected on the site. The managers of the society bought a fine elevated piece of ground, on Sixty-fourth Street, near Haverford Avenue, in the western part of the city, where a large building was erected in a prominent position and commanding a handsome landscape view.

Officers.—First Directress, Mrs. Alexander Biddle; Second Directress, Miss E. Fisher; Treasurer, Mrs. William S. Blight; Secretary, Miss M. Tilghman: Admitting Committee, Miss M. Tilghman and Miss Otto; Binding Committee, Miss Otto and Miss E. Perot.

The Association for the Care of Colored Orphans was founded in 1822 by the Society of Friends. It occupied a building on the east side of Thirteenth Street, above Callowhill, which in later years was known as Brotherly Love Hall. In the year 1837, during the abolition riots following the opening of Pennsylvania Hall, the Shelter for Colored Orphans, as it was then called, was attacked by a mob, and only saved from destruction by the gallant efforts of firemen, who had been summoned to the scene. The institution was removed to a brick building at the corner of Forty-fourth Street and Haverford road. Children are admitted from eighteen months to eight years of age, and are chiefly indentured in the country.

The Home for Destitute Colored Children was founded about 1853, and incorporated April 11, 1856. It is situated on the Darby road, near Forty-sixth Street. The object of this institution is to afford a home for destitute colored children of our own and neighboring counties, giving them the rudiments of a simple education, and training them to habits of order and industry. At a suitable age they are indentured to respectable families, in the country, if possible. The children of those who are earning their living at domestic service are also sometimes admitted at a moderate weekly charge.

Officers.—Trustees, Dillwyn Parrish, Samuel Jeanes, Henry M. Laing, Calvin Taggart, Eli Dillin, Joseph Powell, Joseph Bacon, Passmore Williamson, Thomas Garrigues, Lewis D. Vail, Joseph C. Turnpenny, G. W. Montgomery, Nathan W. Ellis, William Still, Abram W. Haines; Treasurer, Henry M. Laing. President, Huldah Justice; Vice-Presidents, Martha Dodgson and Mary T. Ivins; Recording Secretary, Emily B. Smyth; Corresponding Secretary, Matilda Garrigues; Treasurer, Martha G. McIlvain; Managers, Huldah Justice, Martha Hodgson, Mary T. Evans, Emily B. Smyth, Matilda Garrigues, Martha G. McIlvain, Mary Jeanes, Lydia S. Johnson, Susan E. Dubois, Sarah K. Taggart, Martha B. Chambers, Abby A. Longstreth, Elizabeth B. Parrish, Asenath C. Moore, Anna E. Atkinson, Mary T. Gawthrop, Sarah L. Haines, Sarah A. Atkinson, Lydia T. Hallowell, Mary P. Chambers, Hannah H. Woodnut, Sarah M. Carver, Ruth A. Pierce, Mary F. Wise; Physician, Henry B. Rockwell, M.D.; Counselors, Charles Gibbons and Lewis D. Vail.

The Foster Home Association was chartered Jan. 14, 1839, "to extend aid to respectable widowed parents who from adversity are obliged to part with their children for a time, but desire to have them finally restored." This institution for several years occupied the Preston Retreat, at Twentieth and Hamilton Streets, built for another purpose. In 1866 the Preston estate, having recovered from the financial misfortunes which prevented the opening of the building for the purpose for which it was built, took possession of it for the object originally intended. The Foster Home Association erected a fine building at the southwest corner of Twenty-fourth and Poplar Streets, where it has since been established.

The Southern Home for Destitute Children, formerly the Union School and Children's Home, southeast corner of Twelfth and Fitzwater Streets, was the first of its kind in Philadelphia. It was organized in the lecture-room of the Chinese Museum building, June 21, 1841, and incorporated in 1851. Its object is to provide a home, food, clothing, and schooling for destitute orphan children, and for such other poor children as may be neglected or deserted by their parents.

Over three thousand children have been fed, clothed, and taught within its walls, while hundreds have been placed in comfortable homes, to be trained to habits of industry and usefulness. The institution depends entirely upon voluntary contributions for its support.

Officers.—President, Mr. Richard G. Stotesbury; Secretary, Mr. S. Weir Lewis; Treasurer, Mrs. John M. Maris; Board of Trustees, Dr. J. H. Hutchinson, Richard G. Stotesbury, Caleb J. Milne, I. V. Williamson, J. Sergeant Price, A. Boyd Cummings, S. Weir Lewis, Henry Petit, Charles P. Perot, Samuel A. Crozer. Board of Managers.—President, Mrs. W. M. Singerly; Vice-Presidents, Mrs. R. G. Stotesbury, Mrs. J. Lennig, Mrs. J. C. Milne; Recording Secretary, Mrs. S. A. Crozer; Corresponding Secretary, Mrs. C. P. Perot; Mrs. Beaton Smith, Mrs. H. S. Hopper, Mrs. E. M. Buehler, Mrs. S. Weir Lewis, Mrs. J. Maris, Miss M. D. Allen, Mrs. G. Knowles, Mrs. Randolph Wood, Miss Lizzie Esherick, Miss Ann Brooks, Mrs. William Hill, Mrs. Marie Symes, Miss Fannie Porter, Mrs. E. L. Linnard, Miss Anna Ellison, Mrs. O. H. Tiffany, Mrs. L. Gerhard, Mrs. J. William Lewis; Physicians, Dr. Samuel F. Hazlehurst, Dr. J. W. O'Neill, Dr. R. H. Wharton, Dr. J. B. Dever; Matron, Mrs. Garrett; Assistant Matron, Miss James; Teacher, Mrs. Zimmerling.

The Union Temporary Home for Children, No. 1525 Poplar Street, was organized in 1855. It was chartered in February, 1857, and opened in a large double house situate as above stated. There are accommodations for about fifty children. There are grounds on the west extending to Sixteenth Street, and along the latter northward to a small street.

The Industrial Home for Girls was incorporated in 1859, and at first occupied a house on Twelfth Street, below Pine, but in 1859 removed to Twelfth Street, below Spruce. The home is now situated at No. 726 South Tenth Street. The design of this institution is to afford a home, provide clothing, and furnish schooling and instruction in the arts of housewifery and sewing for poor orphan girls, or such girls as may be neglected or deserted by their parents, the said children having in all cases attained the age of twelve years before admission (unless where it may be desirable, in the discretion of the managers, to

receive girls at a younger age in order to avoid the separation of children of the same family). No servants are employed. The inmates do all the work, and thereby obtain a practical knowledge of housework. The institution depends entirely upon voluntary contributions for support.

Officers.—President, Samuel C. Perkins; Vice-President, H. Y. Evans, M.D.; Secretary, James T. Shinn; Treasurer, Robert N. Willson; Board of Trustees, Samuel C. Perkins, Elliston L. Perot, Robert England, Levi Knowles, H. Y. Evans, M.D, James T. Shinn, Robert N. Willson, Joseph K. Wheeler; and *ex officio* the following Board of Managers: President, Mrs. J. C. Pechin; Vice-President, Mrs. S. C. Perkins; Recording Secretary, Mrs. S. Dickson; Corresponding Secretary, Miss S. K. Neill; Sub-Treasurer, Mrs. James T. Shinn; Miss E. W. Lewis, Miss A. M. Stocker, Miss Elizabeth N. Brown, Mrs. George Whitney, Mrs. John E. Cope, Miss E. J. P. Shields, Mrs. Charles P. Turner, Mrs. John Wanamaker, Mrs. S. R. Shipley, Mrs. James Lesley, Mrs. Edward Waln, Jr., Miss A. E. Clarke, Mrs. R. N. Willson, Miss Mary Wm. Perot, Miss E. A. Bliss, Miss M. B. Irwin, Miss S. Carr; Physicians, Dr. Elliott Richardson and Dr. Houston Mifflin; Consulting Physician, Dr. H. Y. Evans; Matron, Miss Anna R. Stafford; Teacher, Mrs. Adeline D. West; Assistant Matron, Mrs. Sarah E. McDowell.

The Northern Home for Friendless Children was chartered Jan. 25, 1854. Mrs. E. E. Hutter and other ladies were prominent in originating this charity. They succeeded in obtaining a lot of ground extending from Twenty-second to Twenty-third Streets, and from Brown to Parrish Streets. The object was to receive and befriend "destitute and neglected children, ignorant or forsaken, little boys or girls under twelve years of age." It was not necessary that they should be orphans. Here, in 1855, was erected a very large and imposing building, sufficient to accommodate a considerable number of children. In later years, after the war of the Rebellion had commenced, a large adjoining building on Twenty-third and Parrish Streets was erected. Here was maintained the Soldiers' Orphans' Institute, the inmates being supported by the commonwealth of Pennsylvania.

Officers.—Board of Trustees, MacGregor J. Mitcheson (president), James J. Barclay, Charles E. Haven (vice-presidents), James L. Claghorn (treasurer), Smith Bowen (secretary), Theodore Earp (assistant secretary), Rev. William M. Baum, D.D., Samuel Baugh, C. Eugene Claghorn, Charles O. Baird, S. Weir Lewis, William Bucknell, A. V. Murphey, Charles H. Hutchinson, Andrew H. Miller; Solicitors, M. J. Mitcheson and J. J. Barclay; Physicians, H. Leaman, M.D., Jacob Roberts, M.D., Charles Baum, M.D., Charles M. Seltzer, M.D., George Y. McCracken, M.D.; Consulting Physicians, D. Hayes Agnew, M.D., R. J. Levis, M.D., S. D. Gloninger, M.D., W. W. Welsh, M.D.; Dentists, W. Gorgas, Joseph R. C. Ward. Officers of the Sunday-school, Hartman Baker, superintendent; Professor J. B. Umstead, assistant superintendent; William A. Johns, secretary and treasurer; Abner Davis and Walter Smack, librarians; Superintendents of Infant Department, Miss Maggie Walk, Miss Mary Ann Shay. Board of Managers, Mrs. E. E. Hutter (president), Mrs. J. Wiegand, Mrs. J. B. Heyl (vice-presidents), Mrs. W. J. Chaplain (recording secretary), Mrs. Caroline Yarrow (corresponding secretary), Miss Louise E. Claghorn (treasurer), Mrs. William M. Singerly, Mrs. A. Emerick, Mrs. T. Trewendt, Mrs. W. H. Kemble, Mrs. Walter Baird, Mrs. William Bucknell, Mrs. R. D. Harper, Mrs. J. Lewis, Mrs. Charles B. Baeder, Mrs. Hamilton Disston, Miss Sallie Horn, Miss Laura Merrick, Mrs. Alfred Cookman, Mrs. Henry Disston, Mrs. W. A. Johns, Mrs. Matthew Baird, Miss Anna M. Grove, Miss Louise E. Claghorn, Mrs. George I. Young, Mrs. J. R. Claghorn. Superintendents of Northern Home, A. G. Huber and Miss Maggie M. Walk; Matron, Martha Hood; Teachers of Northern Home, Miss Elizabeth Stagg and Miss Jennie Hartin. Superintendents of Soldiers' Orphans' Institute, A. G. Huber, Mrs. Jennie Harshberger; Matron, Miss Emma McFarland. Boys' Department, Professor P. J. Umstead (principal), Miss Mary Umstead, Miss Jennie Hartin; Secondary School, Miss Lizzie S. Ogden. Girl's Department, Miss Rachel La Rue (principal), Miss Mary Ann Shay, Miss Louisa Lee; Secondary School, Miss Edith Bogle. Kindergarten, Miss R. S. Walk (principal), Miss Mary Walton. Music Teacher, Miss Anna B. Kintzle; Band Teacher, Professor Henry Paul; Military Instructor, Maj. Harry F. Spicer. George G. Brownlee, baker; Louis H. Wolf, engineer; George W. Duffield, John Kissling, shoemakers; James Spillman, watchman.

Mrs. Elizabeth E. Hutter, the president of the Northern Home, is a native of Lebanon County, Pa., and is the granddaughter of Baron Peter Shindel, who for many years represented his district in the Pennsylvania Senate. Her father was the late Col. Jacob Shindel, a veteran of the war of 1812. Col. Shindel married Elizabeth Leisenring, of Sunbury, Northumberland Co., and Elizabeth Shindel was one of their children. She married the Rev. Dr. Edwin Hutter, of Allentown, Pa., the Rev. Dr. Jonathan Ruthrauff officiating at the ceremony. In 1845 the late President James Buchanan, then Secretary of State in Mr. Polk's cabinet, called Dr. Hutter into his service as private secretary, thus necessitating a residence in Washington. Her personal attractions made her a star in the society of the capital; but when her husband, in 1849, studied for the ministry, she relinquished social temptations, and in the next year removed with her husband to Philadelphia. Three years later Mrs. Hutter became interested in a philanthropic project, the result of which was the establishment of the Northern Home for Friendless Children. In April, 1853, she was chosen the first president of the board of managers, a position which she has held up to the present time. She is also the president and one of the founders of the Newsboys' Aid Association, which was established in 1879. During the civil war she more than once "went to the front" to help the sick and wounded soldiers. When the memorable "Sanitary Fair" was held, in 1864, Mrs. Hutter was placed at the head of the labor, income, and revenue department, in which capacity she raised two hundred and forty-seven thousand five hundred dollars, to be applied to the comfort of soldiers in the field and hospital. Mrs. Hutter and her husband were zealous and indefatigable in caring for the wounded men who passed through Philadelphia. It was a common thing that those approaching death would ask, "What will become of my children?" Mrs. Hutter asked herself the question, and it was not long before the answer was seen in the formation of the Soldiers' and Sailors' Orphan Institute in connection with the Northern Home. In 1867 she was appointed inspector and examiner of the State Department of Soldiers' and Sailors' Orphan Schools, and still enjoys the distinction of being the only woman in the history of Pennsylvania to whom a Governor's commission has been granted.

Mrs. Hutter has been prominent in other work. When the Confederate general, Jubal Early, burned Chambersburg, in 1863, and the refugees made their

Elizabeth E. Hutter

way to Philadelphia, she secured the rooms of the Board of Trade, and, gathering there every kind of provisions, fed the starved and homeless. After the great fire in Chicago she was most active in collecting and forwarding aid.

Mrs. Hutter was at the head of the executive committee that had charge of the State Educational Department of Pennsylvania in the Centennial Exhibition, and was presented with a massive gold medal as a token of her services. As president of the Northern Home she received from the Centennial Commission a diploma and medal in honor of the home, which was thus certified to be the first in the State in respect of its industrial and educational features. The kindergarten features of the home were very highly commended. On May 14, 1878, the twenty-fifth anniversary of the Northern Home for Friendless Children and of Mrs. Hutter's presidency was celebrated at the Academy of Music. On this occasion an elegant silver service was presented to Mrs. Hutter in recognition of her labors in the cause of humanity.

The Jewish Foster Home was established on the 4th of February, 1855, in the synagogue of the congregation Mikve Israel. Prominent among the corporators and early friends of the institution were Misses Rebecca and Louisa Gratz, Mrs. David Samuels, Mrs. Henry Cohen, Mrs. B. Lieber, Miss Bomeisler, and Abraham Hart. At the meeting Miss Rebecca Gratz presided, and John Samuels was secretary. The society was organized by the choice of the following board of managers: Mrs. Anna Allen, Mrs. M. Arnold, Mrs. J. M. Ash, Mrs. N. Becker, Mrs. Leon Berg, Mrs. I. Binswanger, Miss E. Bomeisler, Mrs. Henry Cohen, Mrs. E. J. Etting, Mrs. Judith Finzi, Mrs. J. L. Florance, Mrs. W. Florance, Mrs. S. Gans, Miss Louisa Gratz, Miss Rebecca Gratz, Mrs. A. Hart, Mrs. L. J. Levy, Mrs. B. Lieber, Mrs. D. Mayer, Mrs. J. L. Moss, Mrs. H. Newhouse, Miss Clara Phillips, Miss Emily Phillips, Mrs. G. D. Rosengarten, Mrs. C. Shoneman, Mrs. D. Samuels, Mrs. E. Simpson, and Mrs. J. Stern. The officers of the board then elected were Mrs. Anna Allen, president; Miss Louisa Gratz, treasurer; Miss E. Bomeisler, secretary; and Messrs. A. Hart, J. Newhouse, Hyman Gratz, Isaac J. Phillips, and Rev. S. Morais, the board of council. A small house was procured and opened on the 1st of May, 1855, with ten children, under charge of the society. A year later the home was removed to a more commodious house, at 1424 North Seventh Street. In 1857, Daniel Ganz presented to the board of trustees a lot of ground on which to erect a building, but, the site not being desirable, subsequently the executors of Mr. Ganz paid to the home fifteen hundred dollars, which was considered the value of the ground, and also a legacy of five thousand dollars. Several other donations and bequests were made to the institution, and about 1866 a large house was purchased at 1431 North Fifteenth Street, where the home was afterward located. Subsequently it was removed to Mill Street, Germantown.

Orphans' Home and Asylum for the Aged and Infirm of the Evangelical Lutheran Church (at Germantown) was established in 1859 to meet a pressing want that had long been felt, viz.: the care of the destitute orphan children and of the aged and infirm who were left comparatively friendless in their old age. The first orphan was received into the home on March 18, 1859, and the first inmate of the asylum or infirmary was admitted in May, 1860. Since that time four hundred and sixty-seven children, and seventy-five aged or infirm persons have enjoyed the benefits of the institution.

It is situated at No. 5580 Germantown Avenue, near Mount Airy. The present officers are Henry Lehman, president; Lewis L. Houpt, secretary; and John C. File, treasurer.

The Lincoln Institute (No. 324 South Eleventh Street) for boys, was founded for the reception and benefit of the orphans of soldiers who had fallen during the war for the Union, or died from the effect of diseases contracted in service. Miss Mary McHenry (now Mrs. J. Bellangee Cox) was its chief promoter, and for this, and several other church charities, she was instrumental in securing donations during a period of about ten years, amounting to several hundred thousand dollars. It was incorporated May 9, 1866, and opened at 308 South Eleventh Street for the reception of boys between the ages of twelve and twenty-one years. When first opened it was supplied with inmates to its full capacity, but as the boys grew up and went out to learn trades and occupations, the average number was being reduced, and it became apparent that in a few years the institution would outgrow its object. The plan had to be modified somewhat before 1876, so that children might be admitted to the Lincoln Home who were placed there by their parents or guardians.

Another institution, therefore, grew out of the Lincoln Home, but for the reception of children of a more tender age. In 1872, Mary Gibson gave six acres of ground for the purpose of an educational home in which white girls and boys of all creeds between the ages of thirteen and twenty-one years were to be admitted. The corner-stone of the building was laid June 3, 1872, and the house was opened in 1873. In 1882–83 a number of Indian children (little girls) were taken by the Lincoln Institute, and to their education it is now devoted.

Officers.—President, Rt. Rev. William Bacon Stevens, D.D.; Vice-President, J. B. Moorhead; Secretary, Samuel Bell; Treasurer, G. Theodore Roberts.

Officers of Board of Managers.—Directresses, Mrs. John Bellangee Cox, Mrs. George R. Justice, and Mrs. J. Dundas Lippincott; Secretary, Mrs. T. B. Tunis; Treasurer, Mrs. Manning Kennard.

The Pennsylvania Institution for Feeble-Minded Children was incorporated April 7, 1853, and opened at Germantown. Idiots are the object

of the care of this institution, and under the training given, the physical and mental condition of many of those unfortunates have been much improved. In some cases the pupils were so much benefited that they were able to enter public schools and learn simple mechanical employments, and they were thus rescued from the misery and ejection of hopeless idiocy. Some time after the foundation this institution was removed to Media, Delaware Co., where fine buildings were erected for its accommodation, with capacity of lodging and education of one hundred and fifty children.

The Bethesda Children's Christian Home was established about the year 1861, near Chestnut Hill. The institution received much aid from Henry J. Williams, who, in his lifetime, gave ground and paid the cost of buildings near Tedyuscung Station on the Chestnut Hill Railroad, and was an annual contributor to a liberal extent, and left a legacy toward the support of the institution at his death. Upon the grounds are a home for girls and a home for boys, the whole number of inmates in 1883 being one hundred and forty.

The Philadelphia Home for Infants (at 4618 Westminster Avenue) was incorporated Dec. 15, 1873. It was open for "the purpose of caring for infants who are too young to be admitted into other institutions." At three or four years of age these little ones are transferred to those who will take care of their proper training. Fathers of children who are motherless and able to pay for attention to them, can find here a comfortable boarding-home for their little ones. The president of the home is Mrs. Franklin Bacon; treasurer, Mrs. P. G. McCollin.

The Baptist Orphanage, an institution established about 1883, has its home (in 1884) at Forty-fifth Street and Silverton Avenue. The officers in 1884 were: President, Hon. William B. Hanna; Secretary, Charles L. Lockwood; Treasurer, Levi Knowles. Ladies manage the domestic affairs of the institution. The board of managers consists of Mrs. M. G. Kennedy, president; Mrs. S. M. Miller, vice-president; Mrs. M. K. Perpt, secretary; Mrs. J. J. Stadiger, secretary.

Officers.—Board of Trustees, Rev. H. L. Wayland, D.D., William Frederick Snyder, Levi B. Kaler, William M. Shoemaker, John S. Stevens, William Bucknell, Benjamin Githens, Theodore C. Search, J. Howard Genpell, James S. Moore, Horatio G. Jones, John T. Huber.

The Western Home for Poor Children (formerly the Western Provident Society and Children's Home) was incorporated April 8, 1857, for the care of "poor white children under the age of twelve years, who may be intrusted to their care by their fathers, mothers, or guardians; also such as may be committed to their management by any of the judges of the Supreme Court of Pennsylvania, the District Court of the city and county of Philadelphia, the Court of Common Pleas or Court of Quarter Sessions, or by the mayor of said city."

It occupies a building at the southeast corner of Forty-first and Baring Streets.

Officers.—Board of Trustees, Clarence H. Clark, Samuel Field, A. J. Drexel, John Sellers, W. Hasel, Wilson E. A. Rollins, W. G. Moorhead, Samuel B. Huey, H. M. Dechert, Franklin Bacon, Dr. S. S. Stryker, Charles B. Keen, Samuel A. Coyle, B. Andrews Knight, James C. Shedwick, Dr. Isaac Ray. Board of Managers, First Directress, Mrs. Joseph M. Wilson; Second Directress, Miss Sutherland; Treasurer, Mrs. Henry M. Dechert; Secretary, Mrs. William Burnham; Mrs. Samuel Field, Mrs. C. M. Finley, Mrs. Franklin Bacon, Mrs. James Trimble, Miss Kelly, Miss Wiltberger, Mrs. E. C. Geyelin, Mrs. J. G. Hardie, Mrs. L. R. Massey, Mrs. A. Blair, Mrs. E. A. Warne, Mrs. J. H. Butler, Mrs. A. C. Fergusson, Mrs. N. B. Browne, Mrs. W. R. Colladay, Mrs. G. J. McLeod, Mrs. Storm, Mrs. Charles Este.

The Methodist Episcopal Orphanage, for the maintenance and instruction of destitute orphan children, was incorporated May 12, 1879, and established at Monumental and Ford Avenues, near Belmont, a little outside of West Fairmount Park.

Officers.—President, Mrs. Bishop Simpson; Vice-Presidents, Mrs. James Hunter, Mrs. E. C. Bryson, Mrs. D. H. Bowen, Mrs. J. H. Wright, Mrs. James Armstrong; Recording Secretary, Mrs. J. E. Salter; Corresponding Secretary, Mrs. Dr. C. F. Bonsall; Treasurer, Mrs. Charles Hill.

The Presbyterian Orphanage of the State of Pennsylvania was established in 1878. Ground was procured on Kingsessing Avenue, near Fifty-eighth Street. Here four cottages were erected in 1881–82. Three of them were occupied as residences and the fourth as a school-house. A fifth building intended for school purposes, and erected as a memorial of Abraham Martin, a long-time worker for the interests of the young, was expected to be finished in 1883, so that the cottage formerly occupied for school purposes could be used for the accommodation of the family.

Officers.—Board of Advisers, Mr. Benedict D. Stewart, Rev. John W. Dulles, D.D., Mr. J. B. Stevenson, Mr. John Wanamaker, Mr. Samuel Field, Rev. Matthew Newkirk, D.D., Rev. Robert D. Harper, D.D., George F. Wiggan, Crawford Spear, George S. Graham. First Directress, Mrs. Daniel Haddock, Jr.; Second Directress, Mrs. Samuel Field; Third Directress, Mrs. Alexander Whilldin; Corresponding Secretary, Miss Sarah F. Cuyler; Recording Secretary, Miss Josephine Atmore; Treasurer, Miss E. L. Tenbrook.

The Friends' Home for Children, organized in 1881, was incorporated February, 1882. The object was "to afford protection to orphans and others, who in their tender years may not be blessed with proper care-takers, and when necessary to find suitable homes in private families where they will be properly trained to fill useful positions in life." This institution is located at No. 3401 Germantown road.

Officers.—President, Jesse Cleaver; Vice-President, Dr. Sarah T. Rogers; Secretary, Edwin L. Peirce; Corresponding Secretary, Mary F. L. Connard; Treasurer, Thomas J. Whitney. Managers, Joseph M. Truman, Jr., Robert Ambler, Clement A. Woodnutt, Henry C. Cooper, Edwin K. Burgess, Jonathan Jones, Henry M. Laing, Amos S. Jackson, Matilda J. Palmer, Elizabeth W. Whitney, Sarah M. Holcomb, Mary T. Burgess, Hannah I. Kirk, Elizabeth H. Webster, Eliza H. Smith, Lavinia J. Lawrence. Co-operative Committee, Martha D. Hough, Graceanna Lewis, Margery Hall, Mary W. Shoemaker, Sarah H. Dorsey, Elizabeth Hallowell.

The Emlen Institution for the Benefit of Children of African and Indian Descent is a society principally of Philadelphians, which receives clothes,

and instructs its wards in a manual-labor school on a farm on Street road, between Old York road and Doylestown pike, Warminster township, Bucks Co., Pa.

The Central Employment Association was incorporated by act of Oct. 13, 1840, principally under the charge of women connected with the Green Street Friends' Meeting. It is industrial, and gives employment to sewing women in the making of garments. The officers are Elizabeth F. Williams, president; Rachel C. Bunting, secretary; and Mary M. Scranton, treasurer.

The Indigent Widows' and Single Women's Society was established in 1819. A preface to the articles of incorporation says, "There seems to be in Christian charity a capacity to enlarge and diffuse itself so as to meet all the wants of suffering humanity. The heart that is alive to this generous principle will find its means to do good multiplied, and the hand that would be extended to wipe away the tear of the orphan could not pass by unheeded the bitter calamity of the widow." The charter declared that the members of the corporation should be "all such persons of the female sex as now are or may hereafter become subscribers," etc. Subscription sufficient to constitute membership was three dollars per year or thirty dollars for a life member. The regulations for the admission of beneficiaries were peculiar. If they were pensioners on any benevolent institution or society it was expected that their pensions would be continued to assist in their support, and that their funeral expenses would be defrayed.

"Those who have any property are required to secure the same to the institution before they are admitted. In case of their obtaining property after their admission, if they remain in the asylum, it will also be necessary to make it over to this institution.

"It will be required that any one admitted shall pay thirty dollars, and come provided with a good bedstead, bed, bedding, and furniture for a room. If they do not bring furniture with them, fifty dollars must be paid on their admission.

"Furniture and other articles brought into the asylum, are to remain for the benefit of the institution.

* * * * * * * *

"No person shall be admitted as a boarder unless satisfactory security be given for the regular payment of her board.

"The age of persons admitted at the asylum, whether as boarders or pensioners, must not be under sixty years."

This association became owner of a lot of ground on the north side of Cherry Street, between Schuylkill Fifth [Eighteenth] Street and Schuylkill Sixth [Seventeenth] Street, and a large building resembling in general appearance the Orphans' Asylum west of it, was finished about 1820. It has been in operation ever since, and has been prudently and quietly managed, and has been an excellent and kind charity.

The Penn Asylum for Indigent Widows and Single Women was incorporated Dec. 6, 1852, and the building on Belgrade Street, above Otis, was dedicated in October, 1857.

Officers.—President, Mrs. M. B. Stockham; Vice-Presidents, Mrs. Lydia A. Murphy, Mrs. A. M. Trinkle; Treasurer, Mrs. M. A. Freas; Secretary, Mrs. H. W. Eisen. Managers, Mrs. M. B. Stockham, Mrs. Lydia Megargee, Mrs. A. M. Trinkle, Mrs. Henry Disston, Mrs. M. A. Freas, Mrs. M. Seddinger, Mrs. E. A. Barrie, Mrs. Sarah Rambo, Mrs. Sarah Shubert, Mrs. L. A. Murphy, Mrs. M. Faunce, Mrs. George Sheppard, Mrs. Jackson Heiss, Mrs. Hannah Allen, Miss E. Delany, Mrs. H. Vaughan, Mrs. H. W. Eisen, Mrs. Kate G. Kisselbach, Mrs. Lavina M. Marks, Mrs. J. Barton, Miss M. E. Ross, Mrs. H. E. Bower, Mrs. Dr. Hulshizer, Mrs. Jane Knight.

The Presbyterian Home for Widows and Single Women, established by members of that denomination, is a fine building of stone, very commodious, and arranged to accommodate about one hundred and fifty persons. The site is at Fifty-eighth Street and Greenway Avenue, not far from the Darby road. The corner-stone was laid Oct. 15, 1872, and the edifice dedicated Oct. 9, 1874. The example of the Presbyterians stimulated other sects to imitation.

Officers.—President, Mrs. Samuel Field; Vice-Presidents, Mrs. D. Haddock, Jr., Mrs. Alfred Nevin, Mrs. E. F. Halloway, Mrs. W. S. Adair; Treasurer, Mrs. Enoch Taylor; Recording Secretary, Miss Clara A. Lindsay; Corresponding Secretary, Miss S. W. Dubois.

The Baptists' Home for Women is a striking building of stone, at the corner of Seventeenth and Norris Streets. It was commenced in 1873, and dedicated Nov. 6, 1874.

Officers.—Board of Trustees, George Nugent, Geor e Callaghan, William E. Garrett, Charles H. Banes, Levi Knowles, Joseph F. Page, Thomas Tolman, Daniel Weckerly, Horatio Gates Jones, George K. Crozer, James Allison, J. G. Huber. Officers of the Board, President, George Nugent; Secretary, H. G. Jones; Treasurer, Levi Knowles; Physicians, S. Hastings Brown, M.D., T. V. Crandall, M.D. Officers of the Board of Lady Managers, President, Mrs. L. Knowles; Vice-President, Mrs. John Mustin; Corresponding Secretary, Mrs. P. G. McCollin; Recording Secretary, Miss Anna E. Friend; Treasurer, Mrs. C. H. Banes.

The Temporary Home Association, in 1884, had its building at No. 505 North Sixth Street. The society was established for the benefit of "respectable women out of employment, where those with means can be accommodated for a moderate price, and those without, succored until situations can be procured for them; also where destitute children shall be taken care of until suitable homes are provided.

The Mapother Home for Women was opened in an old mansion on Harrowgate Lane, west of Kensington Avenue. There were fine grounds attached before 1876. Among the other institutions of this character were the Old Ladies' Home for Indigent Widows and Single Women, which, in 1876, was at Clearfield Street and Frankford road.

Old Man's Home.—Up to 1864 there was no institution in which aged men were especially provided for. The Old Man's Home of Philadelphia was chartered April 20th of that year, through the exertions of Mrs. Roberts Vaux, Mrs. Frederick W. Grayson, and other ladies. For some years they had their home in contracted quarters in West Philadelphia. In June, 1872, the corner-stone was laid of a fine stone building at Thirty-ninth Street and Powelton Avenue. It was dedicated June 13, 1873. No one is received under sixty years of age.

Officers.—First Directress, Mrs. B. P. Williams; Second Directress, Mrs. Henry D. Steever; Treasurer, Miss S. E. Peterson; Assistant

Treasurer, Mrs. A. T. Goodman; Secretary, Mrs. Frederick W. Grayson. Managers, Mrs. B. P. Williams, Mrs. H. D. Steever, Miss P. A. Attwood, Mrs. F. W. Grayson, Mrs. E. C. Prosser, Mrs. John Sibley, Mrs. J. C. Miller, Mrs. B. F. Huddy, Mrs. T. K. Peterson, Mrs. Israel Maule, Miss Mary Coates, Miss S. E. Peterson, Mrs. G. L. Buzby, Mrs. Jacob P. Jones, Mrs. C. K. Inglis, Mrs. Lemuel Peterson, Mrs. Charles Richardson, Mrs. A. T. Goodman, Mrs. Emily Small, Mrs. Andrew Zane, Jr., Mrs. William N. Ashman, Mrs. C. W. Stouffer. Advisory Board, I. V. Williamson, B. F. Huddy, R. M. Girvin, M.D., C. F. Keyser, Henry C. Gibson, George L. Buzby, John Sibley, Edwin H. Lehman, Jacob P. Jones, M. B. Musser, M.D., George S. Pepper, A. H. Franciscus, J. H. Morris, Charles Richardson; Physicians, Dr. M. B. Musser, Dr. R. M. Girvin.

The Odd-Fellows' Home was established for members of that order by an association of lodges and their members in 1874. Each member of a lodge or encampment supporting the home pays one cent per week, and the institution is open for indigent brothers. The original building occupied for the home was a fine mansion, on a lot at Sixty-fifth and Vine Streets, occupying nearly an entire square. It was dedicated on the 30th of November, 1876, and cost forty-two thousand dollars. This was an extensive building, and with accommodations for eighty persons, altogether too large for the means of the charity. In about a year a change was made. A house and grounds at Seventeenth and Tioga Streets was purchased, with about two acres of ground, for sixteen thousand five hundred dollars. The front of the lot is two hundred and twenty-five feet and the depth one hundred and seventy-five feet. No person is admitted who is not in good standing in the order and over fifty years of age. An admission-fee of one hundred dollars is required from any lodge or encampment which sends a member to the home, with a guarantee of four dollars per week thereafter. The lodges and encampments which do not belong to the Home Association pay two hundred dollars.

Home for Aged and Infirm Methodists.—The Methodists preceded the Baptists in this benevolence. Their home for aged and infirm members of the Methodist Episcopal Church, on Lehigh Avenue, between Thirteenth and Broad Streets, a plain, solid building, with accommodations for one hundred men and women, was founded in 1867, and dedicated June 15, 1871.

Officers.—President, Mrs. Bishop Simpson; Vice-Presidents, Mrs. James Hunter, Mrs. A. Winchester, Mrs. A. K. Paysont; Recording Secretary, Mrs. A. W. Rand; Corresponding Secretary, Mrs. M. V. Salter; Treasurer, Mrs. Mary E. Clark.

The Home for Aged and Infirm Colored Men and Women has been in operation for several years, principally under the management of the Society of Friends. It is a spacious building of stone located at Belmont and Girard Avenues.

Officers for 1882.—President, Dillwyn Parrish; Vice-President, William Still; Treasurer, Israel H. Johnson; Secretary, Thomas H. McCollin.

The Edwin Forrest Home.—One of the asylums which has attracted more attention than many others is the Edwin Forrest Home for Retired Actors. It was founded under the direction of Edwin Forrest, the famous tragedian, who died Dec. 10, 1872. By his will, dated April 5, 1866, Mr. Forrest bequeathed to his executors, James Oakes, of Boston, James Lawson, of New York, and Daniel Dougherty, of Philadelphia, all his property, with the exception of annuities to his sisters and some personal legacies, in trust for an institution "which they will call the Edwin Forrest Home," which was directed to be established at his country place called Spring Brook, below Holmesburg, in the city of Philadelphia, which he had purchased some years before. The purposes of this asylum were thus described by Mr. Forrest in his will:

"The said institution shall be for the support and maintenance of actors and actresses, decayed by age or disabled by infirmity, who, if natives of the United States, shall have served at least five years in the theatrical profession, and if of foreign birth, shall have served in that profession at least ten years, whereof three years next previous to the application shall have been in the United States. . . . The number of inmates in the home shall never exceed the annual rent and revenue of the institution; and after the number of inmates therein shall exceed twelve, others to be admitted shall be such only as shall receive the approval of the majority of the inmates, as well as of the managers. . . . The purposes of the said Edwin Forrest Home are intended to be partly educational and self-sustaining, as well as eleemosynary, and never to encourage idleness or thriftlessness in any who are capable of any useful exertion. My library shall be placed therein, in precise manner as it now exists in my house on Broad Street, Philadelphia. There shall be a neat and pleasant theatre for private exhibitions and histrionic culture. There shall be a picture gallery for the preservation and exhibition of my collection of engravings, pictures, statuary, and other works of art, to which additions shall be made from time to time if the revenues of the institution shall suffice. These objects are not only intended to improve the taste, but to promote the health and happiness of the inmates and such visitors as may be admitted.

"Also as a means of preserving health, and consequently the happiness, of the inmates, as well as to aid in sustaining the home, there shall be lectures and readings therein, upon oratory and the histrionic art, to which pupils shall be admitted, upon such terms and under such regulations as the managers may prescribe. The garden and grounds are to be made productive of profit, as well as of health and pleasure, and so far as capable, the inmates not otherwise profitably occupied shall assist in farming, agriculture, and the cultivation of flowers in the garden and conservatory.

"The Edwin Forrest Home may also, if the revenue shall suffice, embrace in its plan lectures on science, literature, and the arts, but preferably oratory and the histrionic art, in manner to prepare the American citizen for the more creditable and effective discharge of his public duties, and to raise the education and intellectual and moral tone and character of actors, that thereby they may elevate the drama, and to cause it to subserve its true and great mission to mankind as their profoundest teacher of virtue and morality.

"The Edwin Forrest Home shall also be made to promote the love of liberty, our country, and her institutions; to hold in honor the name of the great dramatic bard, as well as to cultivate a taste and afford opportunity for the enjoyment of social rural pleasures. Therefore there shall be read therein to the inmates and public by an inmate or pupil thereof the immortal Declaration of Independence as written by Thomas Jefferson, without expurgation, on every fourth day of July, to be followed by an oration under the folds of our national flag. There shall be prepared and read therein before the like assemblage on the birthday of Shakespeare, the 23d of April in every year, an eulogy upon his character and writings, and one of his plays, or scenes from his plays, shall on that day be represented in the theatre; and on the first Monday of every June and October the Edwin Forrest Home and grounds shall be opened for the admission of ladies and gentlemen of the theatrical profession and their friends, in the manner of social picnics, when all shall provide their own entertainment."

Mr. Forrest recommended that application should be made to the Legislature for a charter to trustees, with authority to conduct the affairs of the institu-

tion in accordance with his plans. Application was accordingly made, and on the 7th of April, 1873, James Oakes, of Boston; James Lawson, of New York; Daniel Dougherty, John W. Forney, James H. Castle, John H. Michener, and the mayor of Philadelphia for the time being, were made a body politic by the name of the Edwin Forrest Home, with authority to carry out the designs of the donor. The estate which Mr. Forrest left was largely in real property, land and houses, some of it unproductive and waiting for a market, so that there was no product from it. In addition there was a claim on behalf of his wife, who had been separated from him for years, which seemed to affect his property. She had been divorced in the State of New York. The court allowed her as alimony, under the laws of that State, three thousand dollars per year, and this claim it was thought was good against Mr. Forrest's estate during the entire period of her life. The executors were embarrassed in consequence, and restrained by the existence of the claim from advantageous sales of the real estate. Finally a compromise was arrived at by which a release was given by the lady, then calling herself Mrs. Catharine Sinclair, upon payment of a large sum of money, by which the aggregate fund for the support of the home was considerably diminished. The executors were not able to open the building until about 1876, when it commenced with four inmates, William Lomas, George G. Spear, Mrs. Rhoda Wood, and Mrs. Burroughs. To these old actors and actresses was shortly after added Jacob W. Thoman, who made his first appearance at the Chestnut Street Theatre, Philadelphia, in 1834. For several years there was little change among the beneficiaries, and the number of twelve, on the attainment of which Mr. Forrest directed that the inmates should have a vote on the admission of new companions, had not been obtained. There was much criticism after Mr. Forrest's death as to the propriety of the location of the home, and its comfort, in the estimation of the inmates. Actors and actresses who have spent the high day of their youth in the theatre, amidst the excitements of city life, would prefer to spend their old age in cities, near the theatres, which they might visit when desirable, and with opportunity to renew their acquaintance and friendship with old companions on the stage. Mr. Forrest's Home was placed far out in the country. It was a fine house, and capable of being made comfortable, but the direction that actors and actresses should cultivate the farm and garden, pursuits for which they might have no taste, was considered objectionable. Practically, it may be presumed, this direction is not strictly enforced.[1]

Relief for the Blind.—The condition of the blind did not seem to attract the attention of benevolent persons until other sufferers by personal misfortune had been attended to. James Wills, who died in 1825, was apparently the first Philadelphian who thought anything on the subject. The sum of money which he left to the city of Philadelphia in trust, in 1825, was intended to be "for the relief of the indigent blind and lame." The fund has never been put exactly to the use mentioned by the donor. Wills Hospital has paid no attention to the lame, and very little to the blind. The objects of the trust have been somewhat anticipated by an establishment under the management of the Wills Hospital for diseases of the eye, most of those which precede blindness.

The Pennsylvania Institution for the Blind owes its foundation to the exertions of Julius R. Treidlander, who had opened a school for the instruction of the blind before the institution was

[1] The following description of the Edwin Forrest Home was published about the time when the building was first opened for the reception of actors and actresses:

"The mansion is an old-style, exceedingly comfortable-looking structure, three stories high, skirted by broad, pillared porticoes, tastefully decorated with vases of flowers and evergreens. The first floor is divided by a wide hall-way. This is richly carpeted, and made to look a perfect gallery of art without having the appearance of being overcrowded. On either side are busts of Burns, Forrest, Milton, Napoleon I., and one exquisite life-size statue of the great actor, executed in marble, the work of Ball Hughes, considered to be the finest statue in the country. It is a representation of Mr. Forrest in the character of *Coriolanus*. Portraits and paintings line the walls at agreeable distances. At one end there is hung a full-size photograph of Forrest taken in sections, a portrait of him in 'Lear,' paintings of Frederick the Great, John Philip Kemble, George Frederick Cooke, and along the walls and niches which point the way of the staircase are portraits of James A. Caldwell, Forrest's first theatrical manager; paintings,—life-size of the Saviour, the Madonna, by a careful copyist of Angelo, and steel engravings of Forrest in 'The Broker of Bogota' and the 'The Gladiator' of Dr. Bird; also paintings of Forrest as he appeared in *Claude Melnotte*, *Damon*, and *Hamlet* twenty-five years ago. Here and there through the upper halls appear portraits of Forrest as *Metamora* and *Othello*, some interesting play-bills of his early performances, a portrait of David Graham, formerly the light of the New York bar, and always a warm friend of Forrest. Excellent pictures too of the elder Conway, Macready, Miss O'Neil, John Greene, the great Irish Comedian, 'Old Jim' Wallack, George Frederick Cooke in the character of *Iago*, are to be seen on the third floor, together with very handsome engravings (three in all) representing 'The Plains of Heaven,' 'The Last Day of Judgment,' and 'The Day of Wrath.' On these floors and in the bedrooms are several old trophies of the stage, among which are recalled the sword of the elder Kean, the original bowie-knife, and the sword of Talma, the once famous French tragedian. In the bedrooms, all of which are commodious and inviting, are high-post bedsteads, some a century old, and others older; ancient types of bureaus and dressing-cases, and all alone in the glory of its antiquity a settee, which was carved in 1620. The library and parlors are on the first floor, and here, as almost everywhere in the curious building, hang costly works of art. In the centre of the library stands the desk, a plain, oil-cloth covered affair, which Forrest used for many years. In the capacious book-case are intelligently arranged some eight thousand volumes, embracing the classics, treatises upon art, and interesting histories of the stage. In niches of the walls are busts of Jackson, Jefferson, Calhoun, Patrick Henry, and Napoleon. Over the mantel is a handsome painting of Forrest's mother, and wherever space could be impressed have been placed rich engravings of distinguished men. . . . In one position in the grand old parlors, where it can be examined with the greatest advantage, hangs the famous painting by Siengeneyer, 'The Christian Martyr,' a painting which is effectively designed to demonstrate the grandeur of religion and the weakness of unjust persecution. In another end of the parlor is a painting, entitled 'Children at the Brook,' the work of Meyer von Bremen. Before this picture Mr. Forrest was wont to sit when in his study for hours, in silent contemplation of its surpassing beauties."

The farm attached to the fine mansion contains one hundred and eleven acres. It was sold in 1858 by Caleb Cope to George H. Stuart, and purchased in 1865 by Edwin Forrest.

formed. The latter was founded in 1833, and liberally endowed under the will of William Young Birch, one of the managers. The society was incorporated by act of January 24th, under the title of the Pennsylvania Institution for the Instruction of the Blind, and the following officers were named in the charter: Patron, the Governor of the State; President, William White, D.D.; Vice-Presidents, Peter S. Du Ponceau, Roberts Vaux, William Y. Birch, and Edward Coleman; Treasurer, John Vaughan; Corresponding Secretary, Francis Fisher; Recording Secretary, Jacob Snider, Jr.; Consulting Physician, Philip S. Physic; Visiting Physicians, William Gibson and Caspar Morris; Managers, Nathan Dunn, Joshua Lippincott, John K. Mitchell, Richard Price, Alfred Elwyn, John A. Brown, Robert Maxwell, Alexander Dallas Bache, Charles D. Meigs, M.D., Benjamin W. Richards, John Miller, Jr., and John U. Fraley. Ten thousand dollars were appropriated toward the support of every indigent pupil of this commonwealth taught in said school. No one scholar to be taught at the expense of the State for more than six years, and no more than nine thousand dollars per year to be drawn for such tuition. To aid the institution it was provided that ten thousand dollars should be appropriated toward the expense of erecting a building, but the same not to be paid unless the managers should raise twenty thousand dollars within two years. They did so. A lot was purchased at the northwest corner of Schuylkill Third [Twentieth] and Race Streets, where lofty and extensive buildings with workshops, etc., were erected. The institution has been maintained with great success ever since. The pupils generally had a taste for music, and educated several excellent vocal and instrumental performers. The weekly concerts at the Blind Asylum were for many years very attractive.

Officers.—Patron, His Excellency Robert F. Pattison, Governor; President, Alfred L. Elwyn, M.D.; Vice-Presidents, Thomas S. Kirkbride, M.D., Caspar Morris, William R. Lejee, and Edward Townsend; Corresponding Secretary, John J. Lytle; Recording Secretary, J. Sergeant Price; Treasurer, Robert Patterson; Consulting Physician, J. F. Meigs, M.D.; Consulting Surgeon, Thomas J. Morton, M.D.; Managers, Edward S. Whelen, James H. Hutchinson, M.D., John Cadwalader, Edward Coles, Charles W. Wharton, George C. Morris, G. Harrison Fisher, A. C. Harrison, Oliver A. Judson, M.D., J. D. Lippincott, Henry Haines, Galloway C. Morris, S. F. Corlies, William M. Meigs; William Chapin, principal.

Alfred L. Elwyn, M.D., the president of this institution, was born in Canterbury, England, graduated at Oxford in 1794, and came in 1795 to America. He came of a family old and honorable in British history, and married in Portsmouth, N. H., July 16, 1797, Elizabeth Langdon, born Dec. 4, 1777. She was the daughter of Hon. John Langdon, born December, 1739, on the Piscataqua. She was a descendant of the famous Sherburne Wentworth families, which, with that of Langdon, dates far back into England's brightest annals. John Langdon's mother (Mary Hall) was a great-granddaughter of Ralph Hall, a signer of the Exeter "Combination" of 1639, and a daughter of Kinsley Hall, whose wife was Elizabeth Dudley, daughter of Rev. Samuel Dudley, the first minister who settled at Exeter, N. H., in 1643. John Langdon married, Feb. 3, 1777, Elizabeth, only daughter and second child of John, son of Henry and Dorothy (Wentworth) Sherburne, intermarried with a daughter of John Moffat, a wealthy merchant of Portsmouth, N. H. John Langdon, in 1775, was a delegate in the Continental Congress at Philadelphia, a Speaker of the House of Representatives of New Hampshire, a Governor of that State, a United States senator, and the first presiding officer of the United States Senate when Washington was first inaugurated President in April, 1789. He was a great man and distinguished patriot, and died Sept. 20, 1819, at Portsmouth, N. H., leaving but one child, Elizabeth, married to Thomas Elwyn. The latter died many years before his wife, who deceased at Philadelphia, Aug. 8, 1860, having had nine children,—Catharine Cecilia, Elinor Elizabeth, John Langdon, Emily Sophia, Alfred L. (subject of this sketch), Charles Henry, Emma Matilda, Thomas Octavius, and William Octavius.

Alfred L. was born July 9, 1804, in Portsmouth, N. H., where he went to school under the noted Deacon Tappan. In 1816 he went to Exeter Academy, and there remained three years. In 1819 he entered Harvard University, from which he was graduated in 1823. He read medicine in Boston with the celebrated Dr. Gorham. He went to England and to Edinburgh in October, 1826, and back to London in April, 1827. Then passed one year in Paris, and in summer of 1829 returned to America, having in the course of his sojourn abroad visited his father's relatives in England, and kept up a continuous course of study. In 1831 he graduated at the University of Pennsylvania, and received his diploma as M.D. He was married, Jan. 31, 1832, to Mary Middleton, daughter of Dr. James Mease and granddaughter of Hon. Pierce Butler, of South Carolina, by whom he has one living child,—Rev. Alfred Elwyn. His daughter, Mary Middleton Elwyn, married Dr. G. W. Mitchell, and died in 1861, leaving two sons, both living. In 1845, Dr. Elwyn, who has always resided in Philadelphia, but has never practiced medicine, purchased property in East Bradford township, Chester County, Pa., where he has had a summer residence ever since. He was one of the founders of the State Agricultural Society in 1850, and has been largely identified with its progress and Farmers' High School. He was connected with the establishment of the Institution for the Blind of Philadelphia, and was the originator of the training-school for feeble-minded children located at Elwyn, and fostered and built by the State of Pennsylvania. He has taken the greatest interest in philanthropic institutions, and aided in the creation of many of them. He is now the oldest living member of the American Association of Science. He belongs to the Academy of Natural Sciences, was a director for

Alfred Langdon Elwyn

many years in Girard College, long time an officer in the Historical Society, and a member of the American Philosophical Society. He served as president of the Society for the Prevention of Cruelty to Animals, and was president of the old Agricultural Society of Philadelphia. He was one of the Philadelphia board of three for licensing taverns under a special act of the Legislature, in which he acquitted himself with honor and to the credit of the city. His farm in East Bradford originally belonged to Philip Price. The first guano put on lands in Chester County was by Dr. Elwyn on his farm in 1846. He has given much attention to the natural sciences, philosophical inquiry, and political economy, and contributed largely to the press, reviews, and magazines with his able pen. His varied learning and versatile genius has made him one of the most pointed and incisive of our educated men. He still pursues his studies with the ardor of his youth unabated, and is a zealous worker in the cause of humanity.

The Pennsylvania Working Home for Blind Men.—After the establishment of the Pennsylvania Institution for the Blind, nothing more was done for the release of those unfortunates for years. The Pennsylvania Working Home for Blind Men was established in 1874, for "the organization of workshops and a home for homeless blind mechanics, teaching useful trades to blind men, giving employment also to those blind men who have homes, and the selling of the manufactures of the corporation for its benefit and advantage." The principal objects of care of this institution are "homeless blind mechanics," of whom seventy or eighty can be accommodated in the buildings erected by the society. These are situated on a lot of ground fronting on Lancaster Avenue below Thirty-sixth Street, one hundred and fifty feet front and extending back one hundred and ninety feet to Warren Street. An old mansion upon the ground is fitted up for the use of the homeless. On the Warren Street front is a long narrow building, running the whole front of the lot. It is intended for manufacture, and is on week-days the scene of busy industry. An additional four-story building is used for the same purposes. The articles manufactured are carpets and brushes, mattresses, and other articles at which the blind can work; the reseating of chairs, the sewing of harness, and other things. In 1877 there were eighty-nine inmates, eleven of whom were outside workmen.

Officers.—President, Caleb J. Milne; Vice-Presidents, William Chapin, A.M., E. P. Borden; Treasurer, Levi Knowles; Secretary, Charles D. Norton; Superintendent and Financial Agent, H. L. Hall. Managers, B. B. Comegys, Joseph K. Wheeler, Theodore H. Morris, George B. Collier, James T. Shinn, Alexander C. Fergusson, James Spear, James Hutchinson, M.D., Henry C. Townsend, I. Layton Register, George Burnham.

The Industrial Home for Blind Women was organized at a meeting of ladies held at the house of Miss O'Neill, 1408 South Penn Square, by the election of the following officers: President, Miss O'Neill; Treasurer, Miss Fanny N. Stevenson; Corresponding Secretary, Miss A. M. Smart; Treasurer, Miss F. Knowles; Surgeon, Dr. Caleb W. Hornor. The managers located the home at No. 1817 Lombard Street, which was formally opened on the 14th of June, 1869. It remained there scarcely two weeks. A better house was obtained on Locust Street below Fortieth, West Philadelphia, which was opened on the 1st of July. The work-room is used by women of various ages, making cane-seats for chairs, bead-work, knitting, making willow baskets, tidies, rag carpets, and other articles. At a later period the society erected a handsome building for the purposes of a home at the corner of Powelton and Saunders Avenues, West Philadelphia.

Officers.—Board of Council, President, James Pollock; Vice-President, William Chapin; Secretary, C. W. Hornor, M.D.; Treasurer, Levi Knowles. Board of Officers, President, Miss S. P. Lloyd; Vice-Presidents, Mrs. S. B. Rowley, Miss H. A. Dillaye, Mrs. A. F. Lex, Mrs. J. Harper; Corresponding Secretary, Mrs. H. G. Wilson; Treasurer, Miss E. E. O'Brien; Recording Secretary, Mrs. J. Ward Atwood.

The Pennsylvania Retreat for Blind Mutes and Aged Infirm Blind Persons was incorporated April 13, 1882, and is intended for a home "for such respectable blind persons as have, after a life of patient industry, failed to secure a support for their old age." In his address, Bishop Stevens, of the Protestant Episcopal Church, said, "It is not too much for them to ask that after sixty or seventy years of darkness passed in a continuous struggle with poverty, the last few years of their lives should be a time of rest." This institution had not yet got into practical operation by the establishment of a home building.

Pennsylvania Institution for the Deaf and Dumb.—In 1820, David G. Seixas, an Israelite, set up a private school for the education of the deaf and dumb in Market Street, the third brick house west of Schuylkill Seventh [Sixteenth] Street. There was a good deal of interest in the education of deaf mutes at this time, and Seixas' plan attracted much attention. Many citizens assisted him, and finally it was resolved that a society should be formed to support a public institution for the instruction of deaf and dumb persons. A meeting of citizens was held for the purpose at the hall of the American Philosophical Society, April 20, 1820. Seixas was present, with some of his pupils, and it was shown that he had instructed ten or twelve of them without remuneration. The conclusion arrived at was that an institution was necessary, and a society was formed, entitled "The Pennsylvania Asylum for the Deaf and Dumb." Seixas gave an exhibition with his pupils at Washington Hall on the 24th of May. The society was incorporated Feb. 8, 1821, as the Pennsylvania Institution for the Deaf and Dumb. The society occupied Seixas' house for some time, and afterward went to the building formerly the Mansion House Hotel, at the southeast corner of Eleventh and Market Streets. Under the charter the Legislature provided for the

payment of one hundred and sixty dollars per year for the support of every indigent mute child of suitable age in the commonwealth of Pennsylvania which shall be admitted to the institution, provided that the annual payment should not exceed eight thousand dollars. The system of education adopted was that of the Abbé de L'Epée and Sicard, which had been successfully practiced in Europe. When the society was ready to build an asylum, a lot was purchased on the west side of Broad Street, extending from Pine Street northward and toward Schuylkill Eighth [Fifteenth] Street. The corner-stone of the principal building was laid in May, 1824. The design was by Haviland. The centre building was fifty feet front by sixty-three feet deep. The walls were constructed of granite. A wing of two stories, each twenty-five feet wide, extended at right angles with the centre ninety-two feet, making the depth of each ninety-six feet six inches. In the basement were dining-rooms, workshops, baths, kitchens, and offices. On the second floor were parlors, offices, and a chapel, and in the upper story school-rooms and chambers. The intention was to teach the mutes trades and manufactures, in which instruction was given in the workshop. There was not much profit by this to be expected at first. In 1829 the managers congratulated themselves that by the labors of the seventy-five pupils the profits during the year were $285.63. This institution remains at the same place in 1884. It has been greatly enlarged by the addition of spacious buildings on the west, extending to Fifteenth Street, in which the manufacturing operations are principally carried on.

St. Andrew's Society.—Among the earliest charitable societies were those established by natives of foreign countries for the benefit of their countrymen who might emigrate to Pennsylvania. The report that America was a land flowing with milk and honey, that the soil was fertile and kind, the woods filled with game and the waters with fish, that living was cheap, and wealth and comfort sure to follow, spread over Europe and excited the adventurous, while it gave hope to the poor. Large numbers of the early emigrants had spent the greater portions of their years in the struggle for existence in the Old World, and when they came they brought scarcely anything with them but their health, strength, and the skill acquired in their occupations. With few clothes, with stores scarcely sufficient to last them during the voyage, and with little money, perhaps, they landed on these shores. Many had not even the means to pay their passage, and were brought in bond to the captains of the vessels or consignors with undertaking to serve at labor for periods of years in payment of their passage-money. Frequently sick and miserable, generally poor, and, with those from the Continent, unable to speak the English language, they were naturally objects of commiseration of their own countrymen who had gone through the same experience.

The earliest society for the assistance of emigrants in distress probably grew out of the experience of settlers who had gone through the hardships and privations of long sea-voyages. Naturally they would be interested in the new-comers of their own race, and soon learned how much they were in want of assistance. This thought led to the formation of the St. Andrew's Society in 1749. The constitution and rules provided for a social, as well as a charitable society. There were to be quarterly meetings, at which there was a repast, and in order to govern the character of the feast the following rule was adopted:

"In order to observe that frugality which becomes a charitable society, the four assistants shall take care at the quarterly meetings to provide a neat and plain supper, and shall call for and settle the bill at eleven o'clock at furthest every meeting, except St. Andrew's night, and at twelve o'clock at furthest on that night. Nor shall any liquor be brought into the company but what is ordered by the assistants, and if any member shall stay after the bill is settled, their expenses shall be paid wholly by themselves."

The committee of assistants had power to bestow out of the society's stock such relief as they might think proper to poor persons whom they should judge objects of the society's charity, "*provided, always*, that none but natives of Scotland, their widows or children, or the widows and children of those who have been members of this society be entitled to any part of the charity; and provided, also, that sums allowed do not exceed five pounds to any one person, and twenty pounds in the whole between one quarterly meeting and another." In the preface to the rules printed in 1769 it is said, "Every institution for the charitable relief of our fellow-creatures in distress must certainly claim the approbation and encouragement of benevolent minds. That such is the design of the St. Andrew's Society of Philadelphia will be acknowledged (it is hoped) by all who candidly peruse the subsequent rules, to which a stronger proof might be added, if necessary, namely, a list of many hundreds who have been relieved by the charity of this society during nearly twenty years it hath subsisted; in which list would be found many who must otherwise have suffered without friends in a place where they were strangers." This society met at the Tun Tavern in 1756, at Byrne's Tavern in 1765, and at the Indian Queen in 1774. In 1769 the officers were as follows: President, Dr. Thomas Graeme; Vice-President, Rev. Dr. William Smith; Treasurer, Samuel Inglis; Assistants, James Craig, John Wallace, Charles Stedman, George Bartram; Secretary, David Sproat. The seventy members included among them men of the highest position,—Hon. James Hamilton (afterward Lieutenant-Governor), John Ross (attorney-at-law), Archibald McCall, Rev. William Currie, John Ross (merchant), Alexander Barclay, Gilbert Barclay, Rev. Dr. John Witherspoon (afterward signer of the Declaration of Independence), the two famous privateersmen, Capt. John Sibbald and Capt. John McPherson, Capt. John Inglis (of the royal navy), and others in honorable position, beside

a large number of honorary members. During the Revolution the work of the St. Andrew's Society, although somewhat interrupted by the contest, was maintained with sufficient interest to keep up the organization. In 1792 the officers were James Wilson, LL.D., justice of the United States Supreme Court, president; Dr. William Smith and James Craig, vice-presidents; John Shields, treasurer; Rev. William Marshall, chaplain; William Moore Smith, secretary; Thomas Leiper, Alexander Anderson, Robert Smith, and Richard Lake, assistants. In 1804, Gen. William McPherson was president and Thomas Leiper vice-president. The association has been in existence ever since, doing a great deal of good.

The Scots Society was established in the early part of the nineteenth century, for mutual benefit and assistance of emigrants from Scotland in indigent circumstances and their widows and children. Talbot Hamilton was president from 1800 to 1809. The widows' fund, for the assistance of widows during their widowhood, was established in 1808. The society met quarterly, on St. Andrew's day (on November 30th), and on the 1st days of March, June, and September. The William Wallace Scots' Society, instituted November, 1824, was devoted to similar objects.

The German Society.—The example of the Scotchmen was followed by the Germans. They had experienced the inconvenience, misery, and horrors of transportation from Europe, packed closely in small vessels, subject to the brutality of sea-captains, and of enduring insults and privations. The voyage terminated and the immigrants landed, they found themselves in a strange country, thrown among people whose language they could not understand, and to whom they could not make themselves understood. Chance determined where they should go. Generally without means, they depended for their existence upon those who should "buy their time," and were subject to the commands of their masters. If the latter were kind and reasonable people, their lot was happy, but if they fell into the hands of harsh and brutal persons, they were subject to all the maltreatment and hard conditions of slavery. In time their terms of service would be ended and they were turned out to shift for themselves, with little money and nothing but the hope that by hard labor and economy they would be able to raise themselves from low estate. The wrongs which these poor foreigners suffered led to representations made to the Assembly and protests, and an act was passed in 1749–50, "for the prohibition of the importation of Germans or other passengers in too great numbers in one vessel." This law produced some amelioration in the condition of those persons, but was not sufficient to afford universal relief. There was still many wrongs practiced upon them, and these became so flagrant that in 1764 an association of citizens of Philadelphia of German birth was formed, to urge upon the Legislature such reforms as were necessary and to protect the Germans who were brought to this country. This association was called the German Society, to supply poor, sick, and distressed Germans brought to the city of Philadelphia with relief. The association applied to the Assembly of Pennsylvania for the passage of an act amending the act of 1749, to insure more comfort to passengers on board of ships coming from Europe, and to compel just treatment on the part of shipping-merchants and sea-captains who might bring them. They were successful and attentive, on the arrival of vessels with Germans, to ascertain if they had been kindly treated, and to enforce the provisions of the laws in cases where injustice had been done. The society met from 1764 to 1776 at the German Lutheran school-house, on the north side of Cherry Street, east of Fourth. In 1776 the society bought a lot of ground on the west side of Seventh Street, between Market and Chestnut, and made preparations for building. Contracts were awarded, and materials—brick, stone, and lumber—placed upon the lot. The events of the Revolution discouraged the commencement of the work. When the British came to Philadelphia they found this store of material very handy, and they used it in the building of stables for horses in use by the army. On Sept. 20, 1781, the Assembly incorporated the German Society, and it was recited that the society had obtained two lots, on which it was expected to erect a building to be used as a school for teaching German and English and the opening of a library. On Dec. 26, 1805, the society appointed a committee, with power to act, consisting of Peter Muhlenberg, president of the society, Conrad Weckerly, Christlieb Bartling, Peter Kraft, Daniel Trump, John Stock, and Michael Kitts. Under their care a brick building was erected on the Seventh Street lot, two stories high, and having a cellar with a board floor. It stood free from houses on all sides, and was well provided with windows and means of ventilation. The front of this building stood back twenty feet from the street line. It was plain, with a gable and pediment. The central doorway was approached by marble steps. On either side of the first story was an office, usually occupied by a lawyer. There was a room in the rear of the lower story, which was rented to Charles Keyser, who used it as a German and English school until 1822. The College of Pharmacy occupied this room for some years, and was succeeded by the Schuylkill Navigation Company, which occupied the building as an office. The hall was dedicated with ceremonies and addresses on April 9, 1807. The society only used the second story for meetings and a library, which was then established, and which has since grown to a considerable proportion, consisting of books in the German, English, and other languages. The total cost of the building, accessories, etc., was $6941.06. In 1841 two side-wings, of one story, were built and rented out for offices, thus in-

creasing the income of the institution. They were occupied by George Fox, James A. Donath, and Charles E. Lex, lawyers, and at a later period by A. W. Harrison and Augustus Mitchell for business purposes. In 1866, under contract with the Philadelphia Gas-Works, who were in need of a central office, the front part of the building was partly torn down and a new building erected in front, which occupied the whole width of the lot, and is (in 1884) still in use by the gas trustees in the lower story, whilst the society continues to occupy the second story for meetings and the purposes of the library. The latter probably numbers seventeen thousand volumes, principally in German and English. The books are in use by the members. This society, during the course of one hundred and twenty years, has faithfully fulfilled the object of its institution. It has relieved and protected thousands of emigrants, and still maintains that care, although the necessity of interference on their behalf has been greatly diminished in the latter part of the century.

The Hibernian Club was holding its meetings at Griffith's Tavern in 1759, and might have been merged into the association afterward called "the Friendly Sons of St. Patrick." The minutes of the latter, which have been rescued, and are the basis of an interesting memoir written by Samuel Hood, show that the latter was in full operation in September, 1771, and that the minutes referred to were those of an association before that time in existence. The society was composed of Irishmen and the descendants of Irish parents on either side, with right of admission to descendants of the members. This was a convivial society, and met quarterly on the 17th days of March, June, September, and December, for the enjoyment of a first-rate dinner. Each member was required to procure for himself, and wear at the meetings of the society, a gold medal of the value of three guineas, bearing the following devices: On the right, "Hibernia," a female figure with a harp; on the left, "America," represented as an Indian, with quiver on his back and bow strung; in the centre, "Liberty," with a pole, joining the hands of "America" and "Hibernia." Below was the motto, "Unite." On the reverse was the figure of St. Patrick, in full pontificals, a cross in his hand, trampling on a snake. Motto, "Hiar" ("west"). At the meeting held in 1771 the following persons were present: President, Stephen Moylan; Vice-President, John M. Nesbitt; Secretary and Treasurer, William Mitchell. The honorary members at this time and up to 1776 were James Searle, Henry Hill, John Dickinson, Robert Morris, William Hicks, Richard Penn, William Hamilton, John Cadwalader, Samuel Meredith, Richard Bache, and Lambert Cadwalader. The members of the society in the same period were William West, Thomas Barclay, John Mease, Randle Mitchell, John Mitchell, Turbutt Francis, John Nixon, Thomas Fitzsimons, George Meade, George Campbell, Tench Francis, James Mease, Andrew Caldwell, Matthew Mease, George Davis, John Shee, Ulysses Lynch, George Fullerton, John Boyle, Benjamin Fuller, Samuel Caldwell, Thomas Batt, Robert Boyd, D. H. Conyngham, Sharp Delany, Robert Glen, George Henry, James Logan, James Moylan, John Murray, John Patterson, Anthony Wayne, and William West, Jr. This list comprises the names of Catholics and Protestants, and religious differences were not allowed to enter into the composition of the society. Several of these names are those of distinguished patriots in the Revolution. The society was firm in the American cause. In March, 1776, it expelled Thomas Batt "for taking an active part against the liberties of America." The dinners of the club were held at some first-class tavern,—Byrne's, Smith's City Tavern, the Wigwam, or Duffy's. The members continued to meet until the British took possession of Philadelphia. Sessions were recommenced in 1779. Among the members after the Revolution were John Dickinson, William Bingham, Judge Richard Peters, Capt. John Barry, of the navy, Gen. Edward Hand, Maj.-Gen. William Irvine, Maj.-Gen. Knox, Gen. Walter Stuart, Gen. William Thompson, Col. John Patton, Col. Francis Nichols, and Col. Francis Johnston. In December, 1781, Gen. Washington (an exception to the rule) was invited to dine with the society. As he was not of Irish blood, this honor created some discussion as to its propriety. To get over the difficulty the society unanimously adopted him as a member. It was requisite that he should possess and wear the gold medal. This emblem had been prepared in England, and a new one could not be obtained. Dr. James Mease patriotically solved the difficulty by presenting his medal to Washington, trusting to opportunity after the war was over to obtain another. In fact, the law was tacitly suspended at this feast. There were invited to be present several gentlemen who were not Irish by birth or descent, among them the minister of France, M. Luzerne, M. Otto, Mr. Holker, French consul-general; Count De la Touche; and Count Dillon. There were also present Gen. Lincoln, Gen. Steuben, Gen. McIntosh, and Mr. Hanson, president of Congress. The guests were twenty-one in number. This association may have done somthing in the way of charity to emigrants, but the members finally went into the Hibernian Society.

The Hibernian Society received a charter April 27, 1792. The preamble stated, "It is highly proper to promote the designs of said society, inasmuch as they may greatly contribute to the prosperity of this State and of the United States by encouraging emigration from Ireland. The first officers were: Chief Justice Thomas McKean, president; Gen. Walter Stewart, vice-president; Edward Fox, secretary; Dr. John Carson and Dr. James Cunningham, physicians; Charles Heatly and Jasper Moylan, counselors; James McClure, John Maloney, James

Ash, Thomas Cuthbert, Redmond Byrne, Joseph McGuffen, John Read, David McCormick, John McElwee, Joseph Brown, Alexander Lawrence, Jr., and Andrew Kennedy, acting committee. This society took active means to assist emigrants. A committee of twelve members, divided into four classes, each class to serve three months, was required to visit all vessels arriving in port from Ireland, to inquire into the condition of the passengers, to give such relief and advice as was necessary, to inquire if the laws regulating the passenger trade had been obeyed, and to take measures to punish the masters of vessels who had been guilty of negligence, cruelty, or oppression of emigrants.

Society of the Sons of St. George.—The British Club, social in its objects, met at Griffith's Tavern in 1759. The example of the Scotch, Germans, and Irish incited the natives of England to the formation of a society in imitation of the objects already aimed at by the societies heretofore named. The Society of the Sons of St. George, established at Philadelphia for the advice and assistance of Englishmen in distress, was founded on St. George's day, April 23, 1772, at Byrne's Tavern ("Sign of the Cock"), in Front Street, below Walnut.[1]

The officers elected were: President, Rev. Richard Peters, D.D.; Vice-President, Robert Morris; Treasurer, Daniel Rundle; Stewards, William Parr, Esq., Dr. John Kearsley, Thomas Foxcroft, Richard Footman; Secretary, Richard Peters, Jr.; Messenger, John Airy. The St. George's Society was in session at the City Tavern on St. George's day, April 17, 1775, when Robert Morris, afterward the celebrated financier of the Revolution, announced the reception of the news of the battle of Lexington. The members were shocked at this intelligence, and the feast was one of sorrow and anxiety. Subsequent events, as was natural in a society composed of Englishmen by birth, created differences of feeling. Some of the members inclined to the mother-country. Others warmly espoused the cause of the colonies, and maintained their principles during the long struggle. The meetings were afterward suspended. No meeting was held until March 4, 1776, when Dr. John Kearsley, Jr., was expelled upon the public avowal of Tory sentiments. At the next meeting the operations of the society were suspended altogether, and the members did not come together again for eleven years. Governor Richard Penn was president in 1775–76, and he was re-elected on the reorganization April 23, 1787. In 1793 the meetings were suspended in consequence of the yellow fever, and they were not resumed for three years. The society was not incorporated until Jan. 16, 1813, when an act of Assembly was obtained through the services of a committee consisting of Thomas Ketland, Joseph Sims, John Vaughan, Dr. J. P. Glentworth, and Tristram B. Freeman. In 1821 the society returned answer to commissioners appointed by the General Assembly in relation to pauperism, that between Jan. 23, 1813, and Jan. 23, 1821, the society had expended $3754.87 for charitable purposes, and had assisted and relieved two hundred and seventy-six male adults, three hundred and sixty-two females, and five hundred and thirty-two children, exclusive of twenty-two cases, in each of which it was stated there was a large family of children. The resident contributing members were then about one hundred, and they paid their dues quarterly. The Rev. Dr. Joseph Pilmore, who died in 1826, left to the society his residuary estate, which amounted to $8162.52. The society voted that Dr. Pilmore was a benefactor, and ordered his portrait to be painted, which was done. It still hangs in the society's hall. For some years the members met in the third story of the Philadelphia Exchange, and during that time sent Thomas Sully to Europe to paint a portrait of Queen Victoria. In 1875 it was determined to secure a hall. The property of Matthew Newkirk, a handsome marble building at the southwest corner of Thirteenth and Arch Streets, was bought, greatly enlarged, an extra story having been added, and the interior altered, by which a large assembly-room in the second story was secured with accommodations for seating one thousand persons. An elegant equestrian group in bronze, representing St. George killing the dragon, was placed upon the pediment, and St. George's Hall became a public building, which was finer in appearance than any other occupied in the city by a national society.

The French Society.—Natives of France were not numerous in Philadelphia before the Revolution. After that time refugees from San Domingo came in considerable numbers, and also persons from France, driven out by the revolution there. At a meeting of Americans and Frenchmen celebrating a dinner, Jan. 1, 1793, at Oeller's Hotel, to commemorate the

[1] The following were the original members who signed the articles of association: Rev. Dr. Richard Peters, Robert Morris, Daniel Rundle, Richard Peters, Jr., Esq., William Parr, Dr. John Kearsley, Richard Footman, Thomas Foxcroft, Matthias Aspen, Charles Allen, William Adcock, Dr. Thomas Bond, Dr. Phineas Bond, John Baynton, John Baron, Joseph Bullock, Dr. Robert Bass, James Budden, Edward Barrett, Thomas Bowlsby, Richard Bache, Jonathan Brown, Capt. Joseph Blewer, Alfred Clifton, Rev. John Carter, John Coanes, Capt. Isaac Caton, Capt. James Caton, Edward Drewry, Dr. John Day, Manuel Eyres, John Eyres, Anthony Stocker, William Sitgreaves, Capt. James Spack, Joseph Stansbury, Robert Sherman, Thomas Savidge, Rev. William Stringer, Rev. Dr. William Smith, John Tyler, Godfrey Twells, John Foxcroft, Mark Freeman, John Glover, Thomas Goodwin, George Goodwin, Dr. George Glentworth, Isaac Hazlehurst, William Hevin, John Heaton, Amos Hayton, Rev. Robert Harding, Capt. William Heysham, Capt. John Hazlewood, Nathaniel Hyde, Francis Jeyes, John Jennings, William Haughton James, Samuel Jeffries, John Kidd, Lynford Lardner, Lieut. John Lennox, William London, Capt. John Mawbey, Thomas Murgatroyd, George Noarth, Dr. William Pemberton, John Phillips, William Pollard, Thomas Roaker, George Rundle, Richard Rundle, Charles Startong, William Snell, Peter Turner, Hon. Thomas Willing, Richard Willing, Drewry Wake, Thomas Charles Williams, John Williams, George Westcott, Thomas Yorke, and Thomas West. Among the other members added before 1776 were: Dr. Anthony Chovet, Joseph Fox, James Humphries, Asheton Humphries, Robert Hare, Richard Penn, and Rev. William White.

victories achieved by the Gallic arms in the war waging between France and other nations of Europe, it was determined to open subscriptions for the relief of distressed citizens of France then in the city. In the succeeding month they fully organized Le Société Française de bien Faisance. John Ternant, the minister of France to the United States, was elected president; John de la Forest, Vice-consul of France, vice-president; Peter le Maigre, treasurer; Peter S. Du Ponceau and John Armand, secretaries; Henry Elouis, Joseph Meisson, James Gardette, Joseph D. Hamelin, Benjamin Nones, Peter Legaux, Anthony Chardon, Edmund Bureau, Augustus Massole, John Peter Blanchard, Bernard, Francis, Robert, and Francis Dupont, acting committee. In the same year there were on the latter committee also James Vanuxem, Ferdinand Gourdon, Charles Homanel, Francis Serre, and Ambrose Vasse. This society was active until about 1798, when it ceased from its labors. A social association, Le Société des Grivois ("The Society of Merry Fellows), served for a time to keep the Frenchmen together at dinners and on other festive occasions, each member bearing a club name or nickname, by which he was always addressed. Prominent among the members were Messrs. Chardon, De la Grange, Tanguy, De la Boissiere, Dr. Monges, De St. Memin, De la Neuville, Dr. Gardette, and others.

In 1804 an attempt was made to revive Le Société Française de bien Faisance, but it was not successful. On the 7th of September, 1805, the work was accomplished at a meeting of French citizens.[1]

The society was incorporated on the 2d of October, 1805, and held its first meeting at the "Harp and Crown," on the 2d of October. The following officers were elected: President, Jean Laval; Vice-President, Augustine Bousquet; Treasurer, Patrice Gernon; Secretary, Lawrence Huron; Board of Directors, Jean du Barry, president; Dr. Jean Mathieu, Rene G. Gravelle, Louis Desauque, Richard Gernon, Fournier Rostaing, Louis Gachet, De Lisle, Amable Brasler, Dr. James Gardette, Simon Chaudron, Françoise Laquet, Joseph B. Galbade, William Foussette, Dr. Rousseau, Dr. Monges, Garrestie Tender, Louis D. C. Carpentier, and Peter le Barbiere Du Plessis. After some years the organization became inert. Jean Laval, the president, held the capital, four thousand two hundred and fifty dollars, in trust, and dispensed of the interest for many years to Frenchmen in distress, which trust was exercised with great judgment during his life. In 1830 the society was reorganized with a large number of members, and rechartered in 1835, and the fund held by Mr. Laval was handed over to it. Since that time the society has been in active operation, and is usually known as the French Benevolent Society. The funds have been used with much discretion for the benefit of Frenchmen in distress, and good advice and friendship has been shown toward them.

Officers.—President, H. A. Pintard; Vice-President, H. Perdriaux; Treasurer, S. Delbert; Secretary, G. G. Dussoulas; Directors, E. Borda, George W. Farr, Jr., J. E. Lafore, H. Lejambre, Paul Pohl, Jr., F. A. Seynave, William G. Delbert, F. G. Dussoulas, A. F. Bornot, E. A. Lejambre.

The Welsh Club met at Griffith's Tavern in 1759, and is supposed to have given origin to the St. David's Society, which existed before the Revolution. In 1798 a number of Welshmen associated themselves for the relief of Welsh emigrants in distress, and they were incorporated as the Welsh Society in 1802. In 1801 the Welsh Society resolved to give a piece of plate, worth one hundred and fifty dollars, to Dr. Thomas C. James, for his humane attention to unfortunate Welsh emigrants sick at the city hospital, at the wigwam on the banks of the Schuylkill, during the yellow fever of that year. In 1809 the officers of the Welsh Society were as follows: President, Samuel Meredith; Vice-President, Robert Wharton; Treasurer, Thomas Cumpston; Secretary, Joseph S. Lewis; Register, Jonathan Smith; Stewards, John Evans, Richard Price, Thomas Parke, Chandler Price, Reeve Lewis, Elihu Chauncey, and Matthew L. Bevan; Physicians, Dr. Thomas C. James and Dr. Joseph Strong; Councilors, Benjamin R. Morgan and Edward Tilghman.

Emigrant Society.—About the year 1793–94, there was established among citizens, mostly of foreign birth, The Philadelphia Society for the Information and Assistance of Emigrants and Persons Emigrating from Foreign Countries. A fund was established, which became of some importance through generous donations. The officers were: President, John Swanwick; Vice-President, Thomas Newnham; Treasurer, Napthali Phillips; Physician, Dr. A. Blaney; Register, Henry A. Heins; Councilors, Thomas W. Tallman and Walter Franklin. The Conference Committee consisted of those officers, with William Young Birch, Thomas Williams, William Oliver, Charles Kenny, James Fuze, Philip Jones, Jr., John Cumming, and Bartholomew Connoly. This society was in existence a few years, but ceased its functions before 1800.

The Philadelphia Irish Emigrant Society was formed about 1816. In the succeeding year the following officers were elected on the 22d of December: President, Gen. John Steel; Vice-President, William Taggert; Recording Secretary, M. Williamson; Corresponding Secretary, William J. Duane; Treasurer, Silas E. Weir; Managers, Robert Patterson, William Duane, Rev. George C. Potts, John Horner, W. Calhoun, Mathew Carey, James Stewart, Alexander Cook, and Edward Fox. The most of these probably all had been members of the Hibernian Society, and it is likely continued their membership therein.

In later years other societies for the assistance of

[1] The original members of this association at this time were Jean Laval, Augustine Bousquet, Richard Gernon, Peter Naire, L. Gashet Delisle, J. Tarascon, James S. Duval, Louis Clapier, J. L. Boujac, J. G. de la Roche, John A. Soullie, N. G. Dufeif, J. W. Fousset, L. Desauque, J. Gardette, Fournier Rostaing, Charles Burgier, and others.

emigrants were formed among foreigners, the latest of which were the Swiss Benevolent Society, founded in 1860, and chartered Dec. 4, 1865, and the Italian Society, instituted about 1875–76.

The Carpenters' Company.—Associations for the benefit of workers at particular trades have been innumerable. The oldest is the Carpenters' Company, established in 1724, which united in 1752 with another Carpenters' Company, and in 1763 resolved to erect a hall of its own. The project was delayed until 1768, when the company bought a lot on the south side of Chestnut Street, below Fourth, sixty-six feet front and one hundred and fifty-five feet deep, on the rear end of which the venerable building so connected in its uses with the history of the country was erected and finished, and occupied on the 21st of January, 1771. Its occupation as the first place of meeting of the Continental Congress, in 1774, is well known. It was used also by the Provincial Committee, July 18, 1774; and in 1775 by the Provincial Convention of Pennsylvania.

The Society for the Relief of Poor and Distressed Masters of Ships, their Widows and Children, was instituted July 4, 1765, as the "Captains of Ships' Charitable Club," and incorporated Feb. 4, 1770, by the title first mentioned. It was partly mutual, but had an established fund for charity. The charter was amended by the General Assembly, March 4, 1780.

The Stone-Cutters' Company was formed in 1790, somewhat on the plan of the Carpenters' Society. In a few years the objects were enlarged to embrace "the relief of poor stone-cutters, their widows and children."

The Mutual Assistance Society of Hair-Dressers, Surgeon Barbers, etc., was established in 1796. It was beneficial principally, but some provision was made for the relief of widows of members.

The Society for the Benefit of Decayed Pilots, their Widows and Children, was formed in 1788, and chartered in 1789.

The Bricklayers' Company, incorporated on the 11th of March, 1799, was a trade society which gave some attention to charity, to the widows and children of their members.

The Female Society for the Relief of the Distressed.—The first society for temporary assistance of the distressed was formed in 1793, after the cessation of the yellow fever, through the exertions of Ann Parrish, a member of the Society of Friends, and among women of that denomination only. They found room for their benevolence in the condition of many families which had been visited by the disease and lost parents or children, and particularly in the condition of the latter, many of whom were without friends. The first meeting was held at the house of Isaac Parrish, southeast corner of Second Street and Pewterplatter Alley. The following were the original members: Ann Parrish, Catharine W. Morris, Eliza Marshall, Mary Paul, Elizabeth Howell, Hannah Elliott, Rebecca Gray, Anne Pancoast, Patience Marshall, Jr., Sarah Parrish, Jr., Hannah Hopkins, Jr., Hannah Lewis, Jr., Sarah Bacon, Anna L. Fisher, Deborah Parrish, Susannah Shoemaker, Rachel Lewis, Elizabeth Bacon, Sarah Marshall, Jr., Mary Fields, Mary Wheeler, Jane Hough, and Anne Shoemaker. Ann Parrish was clerk, and Catharine W. Morris treasurer. The society met in a room at the house of Rose Lowry, in Pewterplatter Alley. It was formed in November, 1795, and was called "The Female Society for the Relief of the Distressed." Wood was distributed in the same winter to the poor and assistance given to the sick. In 1798 it was determined to establish a house of industry, at which work should be prepared for the employment of the poor and wages paid them for their labor. "The house designated for spinners" was situate on the west side of Mickle's Court, which ran south from the south side of Arch Street, west of Second, originally built, it is believed, by William Chancellor, sailmaker, for his shop; it was afterwards used as a coach-house by Samuel Mickle and his son-in-law, Joseph Fox. Here the house for spinners was in operation for some years. In 1816 the society, which was then incorporated as "The Female Society of Philadelphia for the Relief and Employment of the Poor," removed the house of industry to a building in Ranstead's Court, running west from Fourth Street, above Chestnut. Here the house of industry was maintained for thirty years. In 1846 the property at No. 112 North Seventh Street, above Arch, was purchased, and has been occupied in the quiet charity of the association ever since.

The Female Association.—In 1800 a number of benevolent ladies associated themselves for the purpose of relief of women and children in reduced circumstances. They prepared a room at No. 28 Chestnut Street, where they received and disposed of to poor people clothing, groceries, and supplies, commencing with a donation of five hundred dollars, a portion of the money collected for the relief of the sufferers by the yellow fever in Baltimore, but not used for that purpose. This society was called "The Female Association." It opened the first soup-house established in the city, in the year 1803, at the corner of Sixth and Cherry Streets. In 1810 the president of the society was Mrs. Stocker; Treasurer, Mrs. Hodge; Secretary, Miss Gratz.

The Female Hospitable Society was established in 1808. The object was to furnish employment for women. The workshop and wareroom was at No. 2 Appletree Alley. Spinning of flax was the first work done. Subsequently it was changed to the making up of garments. The women who were employed came to the workshop. Finally the plan was changed, and the work was given out to the women to be made up at their own homes. A store, in addition to the wareroom in Appletree Alley, was established at No. 54 North Fourth Street, where they sold sewing-thread

spun in the establishment, with sheets, towels, table-linen, etc., prepared by the beneficiaries. In 1818, Mrs. Snyder, who resided at 351 High Street, was president; Mrs. Van Pelt, treasurer; and Mrs. Eliza Norman, secretary.

The Society for the Relief of the Children of the Poor, by furnishing them Fresh Air, established about 1816, was the first association of that kind in the United States. The special purpose was to furnish in summer to infants the benefit of country air. The members were successful in obtaining the use of the City Hospital, on the south side of Coates Street, between Schuylkill Third and Fourth (Nineteenth and Twentieth). It was finely situated, with extensive gardens and grounds which ran southward nearly to Green Street. This institution was in operation some three or four years. It was the predecessor of the society which established summer excursions about 1870 and after, and of "The Country Week," a modern and most useful institution, the work of which has been well discharged; also of the Sanitarium at Point Airy, in the lower part of Windmill Island.

The Philadelphia Society for Relieving the Miseries of Indigent Persons was in existence in 1818, when John Brown was president; Nathan Fry, vice-president; George Willard, secretary; and Jacob Mayland, treasurer.

The Provident Society, established in February, 1824, was to enable persons in indigent circumstances to support themselves by their own industry. In the first year of its existence it gave employment to fourteen hundred persons, most of whom did the work at their own houses. "The House of Industry" was established on Market Street, west of Centre Square. One of the rooms was fitted up to teach the art of weaving straw hats and bonnets to children, they also being instructed in reading and writing. In 1825 the wareroom was removed to No. 3 South Alley (now Commerce Street), between Fifth and Sixth Streets. Work was given out here, and the society incidentally added to its duties a new benevolent object. This was the receiving and sheltering of lost children until their parents or friends could be apprised of their place of refuge and take them away. This was a most important and useful kindness. Before that time the only means of recovering lost children was by means of the public bell-man, who went through the streets ringing his bell and making proclamation at the corners of the name of the child lost, with his age, description of his clothing, the names and residence of his parents, and other particulars. After this, it being publicly known that the rooms of the Provident Society were open for the reception of lost children, they were frequently brought there by citizens who found them wandering in the streets. Parents and friends also went there to inquire for and recover the little strays. This establishment broke up substantially the business of the town-crier and bell-man, but he was frequently seen in districts remote from the rooms of the Provident Society, ringing his bell and making his proclamations, and sometimes leading to their parents the children who had been lost. This practice prevailed until the consolidation of the city and districts in 1854, when the establishment of police station-houses in the built-up portions of the town, with the convenience of the police and fire-alarm telegraph, by which there was communication between all the station-houses, rendered the old system unnecessary. After business invaded South Alley, the Provident Society sought other quarters. It was established in Prune Street, below Sixth, in 1859.

The Spring Garden Association, for charitable purposes, met in 1819 at the public school-house and town hall, at the northeast corner of Eighth and Buttonwood Streets. The president was William Alburger; Vice-President, William Warner; Secretary, David J. Sneathen.

The Western Charitable Society was in operation in 1818.

The Western Temporary Home was, as a shelter for grown persons too weak to go to work yet discharged from hospitals or otherwise, but unable to labor, at Market Street, below Fortieth, in 1875. On October 5th, of the same year, the home was removed to No. 47 North Thirty-eighth Street. On Jan. 3, 1876, a building was secured on Fortieth Street, above Market, which was opened as the Western Temporary Home. Under the rules, each inmate was allowed to spend only ten days in the home, and required in the mean time to make efforts to obtain work. In case of sickness, indulgence is allowed to relax the regulation.

The Howard Institution, under the care of an association of women Friends, incorporated Sept. 20, 1858, "for furnishing shelter, food, and clothing to poor outcast women," was in operation in 1876, at No. 1612 Poplar Street, and had at that time an average of more than forty inmates. Its peculiar object was to furnish discharged female prisoners released from the jail or penitentiary with a place to stop at upon their release from confinement until they can find some employment or return to their homes. The women Friends who were associated with this society had been in the habit of visiting the prisons since 1830, and gave as their testimony, "as of frequent occurrence, that female prisoners give satisfactory evidence of repentance, and of earnest desires to reform and regain their lost characters; yet when discharged from prison, for want of employment, they are often reduced to great distress and subjected to sore temptations.

The Midnight Mission (No. 919 Locust Street) was incorporated Feb. 15, 1871, and has for its object the rescue and salvation of fallen women through the agency of meetings, suitable homes, and industrial pursuits.

Officers.—President, Rev. Samuel E. Appleton, D.D.; Secretary, Rev.

B. H. Latrobe; Treasurer, John McCardle; Managers, Rev. George Bringhurst, Rev. Samuel E. Appleton, D.D., Rev. Bishop Simpson, D.D., Rev. B. H. Latrobe, Rev. T. L. Franklin, D.D., Howard Edwards, Mrs. Franklin Bacon, Mrs. S. M. Lyttle, Mrs. R. G. Stotesbury, Mrs. Mary Adams, William Bucknell, W. A. Farr, John McCardle, De F. Willard, M.D., R. G. Curtin, M.D., John T. M. Cardeza, M.D., W. Curtis Taylor, Mrs. B. H. Cardeza, Mrs. F. Hoskins, Mrs. L. O. Wilmarth, Mrs. McIlvaine, Mrs. John M. Maris.

The Northern Association of the city and county of Philadelphia, for the relief and employment of poor women, was organized in October, 1844, and incorporated June 2, 1856. This is an industrial society, by which the aged and infirm, without regard to religious persuasion, are furnished with sewing, and paid therefor. There is a work-room at No. 702 Green Street, or women may take out work and make it up at their own homes. The articles prepared are mostly of clothing, and these, when made up, are sold to charitable institutions at low rates, so that the institution is a double benefit.

The Union Benevolent Association was organized in October, 1831, and incorporated March 28, 1837. The main object is to assist the deserving poor to help themselves, and to reform as well as to alleviate by visiting, counseling, and affording such sympathy for body and mind as their cases require. The city is divided for the accomplishment of these ends into districts, and each district into sections. This machinery is managed by volunteer committees of from eight to one hundred females, who visit the poor, ascertain their wants, and give assistance whenever it can be judiciously offered. The society, about 1850, purchased a lot of ground at the northwest corner of Seventh and Sansom Streets, upon which a large building was erected for the purposes of the charity, considerable revenue being derived from stores and offices below, and apartments in the upper stories. Since its organization members of the association have visited 250,000 families in distress; furnished material relief to 350,000 persons in need; judiciously distributed $1,000,000 in money and materials; furnished to the worthy poor 50,000 tons of coal; administered to 40,000 sick; procured employment to many thousands unemployed; and given moral and religious instruction to 400,000 persons.

The ladies' branch of the association conducts a store at No. 202 South Eleventh Street, for the employment of *needy sewing women*, where needle-work of all kinds is done cheaply, both in men's and women's wear.

Officers.—President, Hon. William A. Porter; Vice-Presidents, J. Fisher Leaming, Thomas Latimer; Treasurer, Louis C. Madeira; Corresponding Secretary, James Laws, M.D.; Recording Secretary, John H. Atwood; Solicitor, John B. Gest; Managers, J. Fisher Leaming, Thomas Latimer, William Purves, John H. Atwood, Richard Wood, Charles S. Wurts, M.D., E. R. Wood, John E. Graeff, Henry D. Sherrerd, John B. Gest, Albert F. Damon, Caleb J. Milne, Hon. William A. Porter, S. Weir Lewis, Alexander P. Colesberry, Louis C. Madeira, Nathaniel Burt, James Laws, M.D., Henry Bettle, Henry T. Coates, J. Ralston Grant, Alfred L. Clay, Frederick W. Morris, Horace W. Pitkin.

The Moyamensing House of Industry.—About 1847 was founded the Philadelphia Society for the Employment and Instruction of the Poor, and it was incorporated the next year. Shortly afterward the association erected a large building on Catharine Street, above Seventh, which has since been known as the Moyamensing House of Industry. This institution fills a comprehensive object. It is a dispensary for medical advice, medical attendance, and the free distribution of medicines. It is an industrial school for white and colored persons, with an average winter attendance of nearly two hundred. It disposes of clothing for the thinly-clad, prepares meals for the hungry, has lodgings for one hundred and fifty persons daily, has large conveniences for free bathing and for washing clothing. Placed in the midst of a population poor, thriftless, degraded, and frequently vicious, the objects to which it is devoted are the best that could be devised to reduce temptation and incite to industry and honesty.

The Home Missionary Society was organized in 1835, and was incorporated in 1845, and in 1860 had its office at No. 841 East North Street. Its objects were the promotion of religion, temperance, industry, and the support of the poor, the latter being provided for by means of a poor-fund specially devoted to that use.

Officers.—President, Thomas L. Gillespie; Vice-Presidents, Samuel R. Shipley, Samuel G. Lewis; Recording Secretary, William M. Capp; Corresponding Secretary, Joseph H. Schenck, M.D.; Treasurer, William H. Lucas; Solicitor, William H. Sutton; George H. Stuart, Hon. William B. Hanna, William H. Sutton, Samuel R. Shipley, Joseph A. Schenck, M.D., Edmund A. Crenshaw, William M. Wilson, Henry E. Dwight, M.D., Henry M. Kimmey, Horatio G. Kern, Joseph Thompson, Samuel G. Lewis, Caleb J. Milne, William M. Holloway, M.D., William M. Shoemaker, Thomas L. Gillespie, Andrew H. Miller, William Gulager, William M. Capp, William H. Lucas, Solomon Smucker, Jr., John H. Watt, William Waterall, Eben C. Jayne, Levi D. Brown; General Agent and Collector, Emanuel H. Toland; Missionary, John Barry; Visitor, J. W. Field.

Soup Societies.—Following the example of the Female Society in the establishment of a soup-house, the Philadelphia Soup Society was in operation in 1818 at No. 30 Springett's Alley, running from Second to Third Street, south of Lombard Street, and the Northern Soup Society was in operation in the Northern Liberties. In 1876 there were ten soup societies in the city,—the Philadelphia, incorporated in 1841, and located at 338 Griscom Street; the Southwark, 1842, in Southerland Street, near Queen; Spring Garden, 1852, 1329 Buttonwood Street; Northern, established 1817, and incorporated 1839, at No. 817 North Fourth Street; Northeastern, 2052 North Front Street; Northwestern, corner of Nineteenth and Thompson Streets; Kensington, 1853, No. 1936 Crease Street; Central Soup- and Bath-House, 708 and 711 Cherry Street; Moyamensing, 1835, corner of Eighth and Marriott Streets; Western, No. 1615 South Street.

The Charitable School.—The first association which supported free schools was composed of the subscribers to the New Building erected in Fourth Street, below Arch, as a place where the Rev. John

Whitefield could preach. It stood back from the street, and was subseqnently known as the Academy, and was occupied by the College of Philadelphia and the University of Pennsylvania. From the beginning it was intended that this house should be occupied for public worship and the use of a charitable school. The ground was purchased from Jonathan Price and wife by deed Sept. 15, 1740, which was made to Edmund Woolley (carpenter), John Coates (brick-maker), John Howell (mariner), and William Price (carpenter), subject to a quit-rent and yearly ground-rent of fifteen dollars. In less than a month afterward the grantees conveyed the lot to George Whitefield, of the province of Georgia, clerk, William Seward, of London, in the kingdom of Great Britain, John Stephen Benezet, of the city of Philadelphia, merchant, Thomas Noval, of the city of New York, merchant, Samuel Hazard, of the city of New York, merchant, Robert Eastburn, of Philadelphia, blacksmith, James Read, of Philadelphia, gentleman, Edward Evans, of Philadelphia, cordwainer, and Charles Brockden, of Philadelphia, gentleman.[1]

The deed recited that a considerable number of persons of different denominations in religion had united their endeavors to erect a large building upon the lot in the deed described, intending that the same should be appointed to the use of a charity school for the instruction of poor children gratis in useful literature and in the Christian religion; and also that the same should be used as a house of public worship, and that it was agreed that the use of the said building should be under the direction of certain trustees, viz., the persons above named, Whitefield and others, with power to appoint new trustees, etc., also with power "to appoint fit and able schoolmasters and schoolmistresses for the service of the said school, and to introduce such Protestant ministers to preach the gospel in the said house as they should judge sound in their principles, zealous and faithful in the discharge of their duty, and acquainted with the religion of the heart and experimental piety, without any regard to those distinctions or different sentiments in lesser matters which have been to the scandal of religion, unhappily dividing real Christians." The building was one hundred feet long and seventy feet broad. The front, occupying the entire eastern side, was broken in the centre, where the door was placed, by a sort of porch supported by pillars to the second story, upon which there was a balustrade and gallery with plain pilasters in the rear supporting a pediment. This small gallery might have been intended as a place from which to preach or address persons assembled in the yard, which extended out to Fourth Street some forty or fifty feet. It is not known whether it was ever used for such purpose. The building was crowned by a small square cupola and spire on the south end. The south end showed four round-headed windows in the first and in the second story. There were three round-headed windows for each story of the northern portion. The building was rough-cast, and was quaint and peculiar in appearance. Here Whitefield preached in November, 1740, before there was a roof on the structure, sixteen times. He also preached there in 1745 and 1746. Meanwhile a religious congregation had been worshiping in the building. They were the New Lights, seceders from the First Presbyterian Church, under the leadership of Rev. Gilbert Tennent and William Tennent, who followed the style of Whitefield in their preaching. These persons withdrew from the Presbyterian congregation, and went to the New Building, worshiping under the ministrations of Rev. Samuel Finley and Rev. Gilbert Tennent. This congregation, in 1743, offered George Whitefield eight hundred pounds if he would remain with them six months and preach. He refused the offer. The congregation then became the Second Presbyterian Church, and not being in favor with the Presbytery of Philadelphia, they connected themselves with the Presbytery of Londonderry and New Brunswick. The Second Church remained in this building until the end of May, 1752, when they removed to their new meeting-house at the northwest corner of Third and Arch Streets.

Although the establishment of a charity school was the principal object in the erection of the new building, the trustees took no care to carry out that intention. The project rested for some years, until, in 1749, Benjamin Franklin wrote, printed, and distributed a pamphlet entitled, "Proposals Relating to the Education of Youth in Pennsylvania," and set about obtaining a subscription, the amounts to be paid in yearly quotas during five years. He was so successful that five thousand pounds were subscribed. This was independent of the charity school intended to be provided in the new building. A house was therefore obtained and hired, where the school was opened in 1749–50. The pupils soon became numerous, and a larger building was necessary. While looking round for a lot, Franklin was elected a trustee of the New Building, in the place of a Moravian trustee, who was dead. Franklin at once saw the opportunity for the academy which he had founded. The trustees of the New Building finally agreed to cede the property to the trustees of the academy, upon an undertaking that they would pay off the debt of the new building and retain a portion of it forever for occasional preachers, and also set up, according to the original intention, a free school for the instruction of poor children. The deed was made on the 1st of February, 1749, by Edmund Woolley and John Coates, surviving trustees, to James Logan, Thomas Lawrence, William Allen, John Inglis, Tench Francis, William Masters, Dr. Lloyd Zachary, Samuel McCall, Jr., Joseph Turner, Benjamin Franklin, Thomas Leech, Dr. William Shippen, Robert Strettell, Philip Syng,

[1] Westcott, Historic Mansions, p. 160.

Charles Willing, Dr. Phineas Bond, Richard Peters, Abraham Taylor, Dr. Thomas Bond, Thomas Hopkinson, William Plumsted, Joshua Maddox, Thomas White, and William Coleman. The consideration was the payment of debts due on the building, amounting to £775 18*s.* 11*d.* 3*f.* There was an agreement that there should be established and founded upon the ground a place for public worship, and also one free school for the instructing, teaching, and edution of poor children or scholars. Also that Logan and the other trustees would "supply the schoolmaster or masters, usher or ushers, mistress or mistresses, to teach and instruct the said children, gratis, in useful literature and knowledge of the Christian religion." Also that the said trustees "shall have full power to found, erect, establish, and continue in and upon the said house and premises such other school, academy, or other seminary of learning for instructing youth in the languages, arts, and sciences, and generally to improve the premises to such other use or uses for the benefit of mankind and the good of society as to them, etc., shall seem meet." This deed, although dated in 1749, was not acknowledged until Nov. 28, 1753, which may be accounted for by the supposition that the trustees had not raised the money to pay off the old debt until that time. The trustees must have gone into possession immediately, since the academy, which had first been opened in Allan's private house in Second Street, was removed to the New Building in 1751.

Some alterations were made in the structure. The great and lofty hall was divided into stories, with rooms above and below, for the use of the schools, and one in the second story for the use of preachers and congregations. The Rev. David Martin, D.D., was rector of the academy in 1751. He was succeeded on his death, in December of the same year, by Rev. Francis Allison, rector and teacher of the Latin school. In July, 1753, the trustees were incorporated under the name of "Trustees of the Academy and Charitable School in the Province of Pennsylvania." In the succeeding year the title of the corporation was altered and enlarged, and the institution was named the College, Academy, and Charitable School of Philadelphia. Rev. William Smith succeeded as provost of the College, Academy, and Charitable School, and the history of the institution thenceforth is principally connected with the progress of the College and University of Pennsylvania. The early history of the Charity School cannot now be traced. Whether it was established in 1753, when the academy removed to the new building, or was delayed for a time, cannot be determined. In 1762 the charitable school was certainly in operation, since we are told that a large three-story brick building was erected on the north side of the college, which was devoted in the lower stories to the charitable school, and in the upper stories was fitted up with dormitories for the use of students at the college and academy who had no residence in the city. In 1826 the northern building was occupied in two stories by two charity schools for boys, and were at that time under charge of Dr. Joseph Bullock and John McKinley. In the northeast corner of the college building there was at the same time a girl's charity school, kept by Mrs. Knowles. About 1839–40 the southern portion of the old college building, called the academy, was torn down by the Union Methodist Episcopal Church, which had bought that portion of the property years before. They put up a new brick church building. About the same time the northern end of the old academy, and the building used by the charitable schools, was torn down, and large stores for business purposes erected on the front part of the lot. In order to carry out the agreements and stipulations entered into in the year 1740, the University of Pennsylvania, which owned the property, erected on the back part of the lot a hall of good proportions, two stories in height, in which a room was set apart for worship, to be occupied by such ministers that might apply for it, and also by the charitable school. By this time the increase of the public schools, in which children were taught gratis, had rendered the ancient charity school comparatively useless. The boys' charity schools were discontinued. The girls' school was in operation much longer, and latterly under charge of Miss Bedlock as teacher. Some time after 1870 the trustees of the University determined to abolish the charity schools altogether, because they had become more expensive than useful. The funds and revenues devoted to the support of those schools were made the foundation of free scholarships in the University, so that under the *cy pres* doctrine there was only an alteration in the grade of education. The charity which had been devoted to primary instruction was changed to a richer field of culture, but it was still charity.

The Philadelphia Society for the Free Instruction of Indigent Boys.—The second effort toward the establishment of charity schools took shape and motion in the year 1799. About nine young men, apprentices and clerks, who had been in the habit of meeting together, of evenings, for the purposes of social conversation, agreed among themselves that their spare time might be judiciously spent in teaching poor children to read and write. They associated themselves as the Philadelphia Society for the Free Instruction of Indigent Boys. They opened a night-school themselves and officiated alternately as teachers. They soon had between twenty and thirty scholars. This was a very modest enterprise, and frugal also. The revenues for the first season derived from the contributions of the members were sixteen dollars and thirty-seven cents; the expenses, nine dollars and twenty-seven cents. They carried on their school for two seasons during the winter months, and had been so successful that they were arranging for a more

extensive organization and the procuring of a charter. An unexpected circumstance put them in the way through their energy and enterprise. Christopher Ludwick, of Philadelphia, called the "Baker General" of the Revolution, died in 1801, and left his residuary estate, estimated at eight thousand dollars in value, to the association which should be first incorporated for the purpose of teaching, gratis, poor children in the city and liberties of Philadelphia, without any exception to the country extraction or religion of their parents or friends. To this fund the members of the society turned their attention and determined to obtain a charter. The amount in expectance was very considerable. The trustees of the University of Pennsylvania were anxious to obtain it in furtherance of the interests of their charitable schools. Each institution applied for a charter. It could be granted by the Governor upon certificate of the judges of the Supreme Court and attorney-general of the commonwealth that the object sought by the corporators were not contrary to law and public interest. Governor McKean, with strict impartiality between the rivals, delivered to the agent of each a charter at the same moment of time. To perfect those instruments it was necessary that the charter should be enrolled at the seat of government at Lancaster. Therefore, there was to be a race to that town, conducted by the agents of the two societies. Everything seemed to be in favor of the University. The trustees of that institution with wise forethought had made arrangements for an express with relays of horses at certain distances on the route. The Society had not been as thoughtful, but trusted to the ordinary chances of the road. It was the fable of the the hare and the tortoise over again. The express of the University started first on horseback, going off in a grand gallop, leaving behind him Joseph Bennett Eaves, who had volunteered his services to go to Lancaster with the other charter. He had not geared up his horse and got into his sulky when the University agent went clattering off. It happened that the weather was exceedingly hot. The haste of the University express was unwise at the beginning. Before he reached the place where he might take his first relay, his horse broke down entirely. He had to abandon him, and was too far off the first stage to attempt to get there. Eaves in his sulky jogged along until his horse failed from the excessive heat. In a neighboring field there was a horse harnessed to a plow. A negotiation with the farmer procured the hiring of this animal to draw the sulky about four miles to the next town. At that place a fresh horse was purchased by Mr. Eaves from a traveler, and when he got to Lancaster, seven hours from Philadelphia, he had performed a remarkable journey as to speed, the distance being sixty-six miles over common country roads under a depressing heat. The society thus established was called the Philadelphia Society for the Support of Charity Schools. At the election held in 1801 the following persons were elected managers: Thomas L. Bristoll, Thomas Bradford, Jr., Caleb Cresson, Jr., William Paxon, Robert Coe, Jr., Edmund Darch, William Neckervise, Thomas M. Hall, Benjamin Williams, William Fry, Joseph Bennett Eave, Joseph D. Brown, Samuel Lippincott, Philip Garrett, Frederick Stellwagon, Thomas Smith, Robert McMinn, and Joseph Briggs. At the time of the incorporation the society had its school-room back of the Second Presbyterian Church, on Third Street, above Arch.[1]

Mr. Ludwick's legacy was not obtained by the Society until about the latter part of the year 1805 or beginning of 1806. There was added to it, after the death of Ludwick's widow, a house and lot at No. 176 (afterward No. 250) North Fifth Street, estimated to be worth two thousand seven hundred dollars. The whole amount received from the Ludwick legacy was about thirteen thousand dollars. While waiting for this bequest the society, by the certainty of getting it, was emboldened in an effort to anticipate its receipt. Subscriptions were sought among citizens. Two thousand eight hundred dollars were raised in that way, and with the sum a lot of ground was purchased on the north side of Walnut Street, above Sixth, on the north end of which was erected, at the end of the year 1804, a two-story brick school building.[2]

The first teacher employed by the society was Thomas Walter, chosen in 1802. This charge increased rapidly, and in 1809 there were two hundred and seventy-eight scholars, all boys. In 1811 the society determined to establish a school for girls, and in the next year there were one hundred and eighty-six female pupils. In 1816 the executors of Robert Montgomery paid over to the society four thousand dollars, under a bequest which directed that three-fourths of the amount should be used in the District of Southwark for the education of poor children. Two schools were accordingly set up in that district. In 1859 the property on Walnut Street becoming undesirable by changes in the city which brought business into neighborhoods which had once been entirely

[1] At this time the children of people of color were more liberally provided with free schools than the poor white children. In April, 1801, the following free schools were in operation for the use of black children: Willing's Alley, day school for males and females, and an evening school for males; Race Street, between Fourth and Fifth Streets, under the care of Episcopal Churches (Christ's and St. Peter's), for boys and girls; Fourth Street, between Market and Chestnut, evening school for females; Sixth Street, between Chestnut and Walnut, under the care of the Pennsylvania Abolition Society, day and night school for both sexes. There were Sunday-schools for colored children at Bethel Church, Fifth Street, near Lombard, and at Henry Atherton's school-house, Vine Street, near Fifth.

[2] This structure, called in its day the Ludwick School, is standing (in 1884) as part of the group of structures called the Ludwick Building. The old school-house has been changed and fitted up into two rows of offices in each story, with a central entry. The space of ground in front of the hall extending toward Walnut Street has also been built over and fitted up with offices. The revenue derived from these uses is considerable.

devoted to dwelling-houses, admonished the members of the society that a change of location was advisable. A large income was possible by devoting the whole building to office purposes. The school was discontinued. Meanwhile Paul Beck, Sr., had presented to the society a lot of ground on the north side of Catharine Street, west of Sixth. There a new school-house was erected and opened in May, 1859, under the title of the Beck School-house. This school has the right to send pupils to the Central High School.

The Society for the Free Instruction of Female Children was established in 1796 by three young women, members of the Society of Friends. Ann Parrish, founder of the Female Society for the Relief of the Distressed, established it. It was opened in a room of her own house at the southeast corner of Second Street and Pewter Platter [Jones] Alley. She instructed little girls in spelling, reading, writing, arithmetic, and plain sewing, and was soon joined by Mary Wheeler and Hannah Hopkins, the younger. Shortly after Catharine W. Morris and Hannah Y. Tompkins were added. In the latter part of 1797 the Society of Friends gave permission to the members of the society to use a room in the old school-house on Fourth Street, below Chestnut. The members of the society were teachers until 1799, when S. Roache was engaged as teacher, at a salary of sixty dollars per year, which within a twelvemonth was more than doubled to $133.33. In 1807 this school received the name of the Aimwell School, a title given it by Catharine W. Morris.[1]

The Philadelphia Union Society, for the education of poor female children, was formed, in 1804, by the union of two Presbyterian societies formed among members of the Second and Third Churches. The society was incorporated in 1808. The school was back of the Second Presbyterian Church in 1810, and during that year the following ladies were officers: President, Mrs. M. McMullin; Secretary, Miss H. Orr; Treasurer, Miss Eliza Hall.

The Association of Friends for the Instruction of Poor Children.—One of the largest free schools in the county during the early part of the nineteenth century was maintained by the Philadelphia Association of Friends for the Instruction of Poor Children. It was established some time in 1807, and on Jan. 11, 1808, opened as the Adelphi School on Pegg Street, Northern Liberties. It was built upon two lots of ground presented by William Sansom and Thomas Scattergood. The school-house was seventy feet front by about thirty-five feet deep. This was a Lancasterian school, in which the elder pupils were monitors and instructors of the younger. It was maintained by a payment of four dollars per year from each subscriber, or by fifty dollars for a life membership. The school when first built stood upon the sloping bank on the north side of Pegg's Run, in a vale from which it obtained its common name, —the Hollow School. It was well known to everybody in the city and districts, by reason of the Lancasterian plan adopted there, among which was the learning to write by tracing letters with sticks in sand, and other novelties. The society was incorporated in 1808, and at that time consisted of forty-five members. In 1810 the managers were John Paul, John C. Evans, David Jones, Clement Biddle, Jr., Isaac Donaldson, Samuel Haydock, James B. Parke, Roberts Vaux, Reuben Haines, Charles Allen, Robert Smith, Jr., and Benjamin Ferris; Treasurer, John Cooke; Clerk of the Association, Elihu Pickering.

The Union Adult Society, established about 1820, opened four schools in that year: No. 1, for white adults, back of the Presbyterian Church at Third and Arch Streets; No. 2, for colored adults, Cherry Street near Fifth; No. 3, for colored adults, at Clarkson school-house, north side of Cherry Street above Sixth; No. 4, for white adults, back of the Presbyterian Church at Second and Coates Streets.

The Institute for Colored Youth was chartered in 1842, the object being the education and improvement of colored youth of both sexes, to qualify them to act as teachers and instructors of their own people, either in the various branches of school learning or in the mechanic arts and agriculture. The funds have been principally derived from bequests and donations. The building for the use of the schools was established in 1851, on Lombard Street, between Seventh and Eighth Streets. There were four departments, beside one preparatory and one high school for each sex. There were six teachers, all colored persons. Admission was free for scholars, text-books were furnished gratuitously, and a library and reading-room were established in connection with the schools.

The Inoculating Society.—There were some societies instituted for purposes of peculiar benevolence which claim notice. The first of them was the Society for Inoculating the Poor for prevention of the smallpox, that process being the only one which at the time was considered the most certain method of checking the ravages of the dreaded scourge. Dr. Glentworth established a private smallpox hospital in 1773. In a published notice in the newspapers he said, "The great success attending inoculation hath been so effectually demonstrated that the most respectable personages in Europe have been the subjects and are now the avowed patrons of it. Gentlemen of eminenc[illegible] in the different cities in

[1] In 1812 the sewing-school was disconnected from the school proper, and established in Appletree Alley. The Aimwell School, with the exception of a short occupancy *ad interim* of a house on the north side of Chestnut Street, between Fourth and Fifth, was at the Friends' school-house until 1820. Afterward it was in the Carpenters' Company building, east side of Carpenters' Court, 1820–23; Eighth Street, near Market, 1823–24; Zane Street, near Eighth, 1824–25. In the latter year the association purchased a lot of ground for eleven hundred dollars on the north side of Cherry Street, between Ninth and Tenth.

America where inoculation is tolerated have provided houses for the reception of inoculated patients, and have met with great encouragement and success. For this salutary service to society Dr. Glentworth has also provided a convenient house in the city of Philadelphia, with a tender, skillful matron to superintend it. Those who choose to accommodate themselves with lodgings will be attended with as much assiduity as those in the house for inoculation." In the succeeding year the physicians of the city united in the formation of an association for inoculating the poor, which was generally called the Society for Inoculating the Poor Gratis. In their prospectus they stated that during the previous year, out of thirteen hundred and forty-four persons who had died in the city, three hundred had died of the smallpox. They said, "A number of gentlemen, having taken these things into consideration, have fallen upon a method of rendering the benefits of inoculation as extensive as possible in the city and suburbs. For this purpose they are providing themselves with a fund, and have concurred with eight physicians, who have agreed to perform the operation, and to administer to the patients such medicines and advice as may be necessary to prepare them, and also to attend them at their houses free of expense. They have engaged a room in the State-House, where a number of the physicians and managers will attend every Tuesday, between the hours of ten and twelve in the forenoon, to receive applications. They will begin their attendance there on the last Tuesday of this month" (February, 1774).

The managers were Thomas Wharton, Jacob Shoemaker, Benjamin Morgan, Reynold Keen, Joseph Fox, William Coates, Thomas Clifford, Arthur Donaldson, Sharp Delany, John Wharton, George Roberts, and David Deshla. The physicians were Drs. Charles Moore, Adam Kuhn, John Kearsley, Samuel Duffield, Gerardus Clarkson, Thomas Boud, William Shippen, Jr., and Benjamin Rush. Daniel Roberdeau was treasurer. In September, 1774, it was announced that the "physicians of Philadelphia have agreed to inoculate no patients for the smallpox during the sitting of Congress, as several of the Northern and Southern delegates have not had that disorder." The rising difficulties between Great Britain and America probably put an end to the functions of this society when the war of the Revolution had fairly set in.

The Society for Promoting Vaccination.—A quarter of a century had rolled by before anything more was done by associated effort for the prevention of the smallpox. In 1801, John Vaughan, having heard that vaccination for the smallpox had been successful in Virginia, wrote to Thomas Jefferson requesting his assistance in procuring vaccine matter, he having learned that vaccination had been successful in that State. Mr. Jefferson replied that he had vaccinated himself with vaccine matter received from Dr. Waterhouse, a portion of which had originally come from Dr. Jenner, of London. He sent a portion of this matter to Mr. Vaughan. The latter gave it to John Redman Coxe, who immediately vaccinated himself and two or three other persons. Dr. Coxe immediately published letters setting forth the value of the process as a substitute for inoculation. In 1803 fifty physicians in a public address declared that they thought "it a duty thus publicly to declare our opinion that inoculation for the kine- or cow-pox is a certain preventive of the smallpox, that it is attended with no danger, may be practiced at all ages and seasons of the year, and we do therefore recommend it to general use." Finally, on the 10th of March, 1809, was established "the Society for Promoting Vaccination,—a preventive of the smallpox,—especially among the poorer classes of society." The affairs of the association were managed by a committee of twelve members, a clerk, treasurer, and six physicians. Members were elected upon the payment of two dollars per year. The physicians visited the houses of poor people and vaccinated them. The association, sometimes called the Philadelphia Vaccine Society, and sometimes the Society for Vaccinating the Poor, was very successful at first, and on the 1st of January, 1813, it was reported that it had vaccinated in the preceding three years and nine months four thousand five hundred and eighty-nine persons. The necessity for the continuation of this association ceased about 1816, when City Councils passed an ordinance, May 31st, for the vaccination of persons in indigent circumstances. Under this regulation the city was divided into four districts. There were collectors of vaccine cases, whose duty it was to inquire for persons who had not been vaccinated or were liable to smallpox, and to report to the physicians whose duty it was to vaccinate the persons who had not been protected by that process. The society published a report of its work in 1818; shortly after that it may be supposed it ceased its operations.

Society for the Relief of Distressed Prisoners.—Before the Revolution the condition of the prisoners confined in the city was truly deplorable. They were badly clothed, scantily supplied with food, and, during the winter, exposed to the cold, there being no provision for warming the apartments in which they were confined, and they were generally without bedclothing. Several persons had died from actual starvation in prison, and means were taken by benevolent citizens to furnish them with food. But this relief was spasmodic, and only brought forth earnestly for a time after some shocking case of misery had been reported. Eventually, in 1776, a charity society was formed, which was called the Society for the Relief of Distressed Prisoners. They established closed wheelbarrows, on the top of which was painted, "Victuals for the prisoners." These were wheeled from house to house, and received such contributions of broken bread and cold victuals as the charitable might furnish. The barrows were taken to the prison daily, and from this bounty the prisoners were fed.

The society was in operation for about nineteen months, when its service was suspended by the capture of the city by the British. It was succeeded in May, 1787, by the Society for Alleviating the Miseries of Public Prisons, an institution which still exists, and which is spoken of at greater length in the chapter on Public Prisons.

The Society for Promoting the Abolition of Slavery was also established before the Revolution, being founded in 1774, and was practically dissolved by the events of that contest. It was re-established after the Revolution, on the 10th of February, 1784, and called the Pennsylvania Society for Promoting the Abolition of Slavery and for the Relief of Free Negroes Unlawfully held in Bondage, and for Improving the Condition of the African Race. It was a popular association, and before the year 1801 over seven hundred and seventy-five persons had joiued it. The members in 1775 were John Baldwin, president; Thomas Harrison, secretary; Samuel Davis, treasurer; members, Arthur Thomas, Seymour Hart, Thomas Wishart, John Browne, Joel Zane, Thomas Hood, and James Morgan. These were the founders. During the same year there were admitted Cadwallader Dickinson, William Lippincott, Amos Wickersham, James Starr, Joseph Shotwell, Jr., William Coats, Matthew Henderson, John Hamilton, John Davis, Joshua Comly, Thomas Morgan, and John Bull.

The presidents of the reorganized society, elected from members who had joined it before 1801, but were not all elected to office during that time, were John Baldwin, the president of the first established society, Samuel Richards, Benjamin Franklin, James Whitall, Thomas Meredith, Dr. Benjamin Rush, Jonathan Penrose, James Pemberton, Dr. Caspar Wistar, and William Rawle. This association had upon its rolls the names of the most distinguished persons in public life and prominent members of old families. The Quaker element was not in the majority at the beginning of the society, as might have been expected. Episcopalians, Presbyterians, and persons attached to other persuasions, controlled the association, the first object of which was to promote the abolition of slavery in Pennsylvania and to improve the condition of the free blacks in regard to their industries and conditions. Even in later times, when the abolition of slavery became a political question, the Pennsylvania Abolition Society stood aloof from the arguments and methods of the anti-slavery party. Slavery in Pennsylvania was over, and the society, instead of buckling on its armor to engage in the great controversy, stood idly by, scarcely showing sympathy, at best giving small assistance. In the stirring times last referred to there were several anti-slavery societies, which exercised great influence. One of these was the Philadelphia Female Anti-Slavery Society, established (1844) by Lucretia Mott and others. The Pennsylvania Anti-Slavery Society was a stronger and much more belligerent association.

The emancipation of the slaves having relieved the society from a portion of its labors, leaves it to the important work of the "improvement of the condition of the African race."

Officers.—President, Dillwyn Parrish; Vice-Presidents, Benjamin Coates, T. Elwood Chapman; Secretaries, Joseph M. Truman, Jr., William Heacock; Treasurer, Henry M. Laing; Librarian, Thomas H. McCollin; Counselors, Edward Hopper, George H. Earle, Joseph R. Rhoads, Alfred Moore, Joseph Parrish, Philadelphia; Acting Committee, Dillwyn Parrish, Henry M. Laing, Passmore Williamson, Alfred H. Love, William Still; Board of Education, Dillwyn Parrish, William Heacock, William Still, Henry M. Laing, Jacob C. White, Joseph M. Truman, Jr., Mordecai Busby, Marcellus Balderston, Lukens Webster, Nathaniel E. Janney, Alfred Moore, Robert M. Janney, Samuel J. Stevenson.

The Humane Society, for the recovery of drowned persons, was established in 1780. Its objects were enlarged by extending the efforts of the members to cases of asphyxia and other cases which might suspend animation in human beings for a time. Consequently the object of the society's care was extended to "those whose animation may be suspended from other causes, as breathing air contaminated by burning charcoal, hanging, exposure to choke-damp of wells, drinking cold water while warm in summer, strokes of the sun, lightning, swallowing laudanum, etc." The signs of the Humane Society were familiar objects to persons who loitered about the wharves as late as 1840 and 1850. They were placed near ferry-houses and prominent taverns and places of resort, and gave notice that the apparatus of the Humane Society was stored upon the premises, and could be had by application in cases of drowning. This consisted of drags, hooks, nets, together with medicines and other appliances for the resuscitation of persons taken from the water, where animation was suspended. There were also printed directions how to proceed in such cases. Every summer the society had printed startling hand-bills, cautioning the people against the dangers of drinking cold water when the body was heated. These were conspicuously posted upon the cold-water pumps, of which there were several highly popular in various parts of the city. The society also offered prizes for dissertations on suspended animation, and the best methods of restoring persons to life who were apparently drowned. These offers were repeated for several years. In 1802, Dr. Benjamin Say was president of this society, and in after-years, Joseph Cruikshank was president and Isaac Snowdon secretary.

The Merchants' Fund was incorporated in January, 1854, the object being "to furnish relief to indigent merchants of the city of Philadelphia, especially such as are aged and infirm." The extension of aid is through an executive committee, in the integrity of which the members of the society have confidence. Hence no report is ever made of the manner in which the bounty of the association is given or to whom it has been supplied. This association has been more

than usually successful in obtaining a large endowment, by means of which its benefactions to distressed merchants are more liberal than they can be made by the larger number of beneficial societies.

Officers.—President, John Welsh; Vice-Presidents, William C. Ludwig, James C. Hand; Treasurer, Richard Wood; Secretary, John H. Atwood; Managers, John Welsh, I. V. Williamson, Thomas C. Hand, John D. Taylor, John H. Atwood, Albert F. Damon, Daniel B. Cummins, William C. Ludwig, Charles S. Lewis, Charles D. Reed, James C. Hand, J. B. McFarland, Edward C. Knight, Richard Wood, Edward P. Borden, R. Dale Benson, William S. Grant, T. Charlton Henry, Thomas P. Stotesbury, Christian J. Hoffman.

The Newsboys' Aid Society was incorporated June 7, 1858, for the purpose of "providing lodging and education for homeless and indigent boys engaged in the occupation of vending newspapers and periodicals." This society was in operation for two or three years, but by the strictness of the rules established for the government of the inmates it became unpopular with them, so that they abandoned it.

Another newsboys' home was instituted about 1875–76, and opened a building or lodging-house and residence on the east side of Sixth Street, below Locust. This soon went out of existence, but in May, 1878, at the suggestion of George W. Childs, another effort was made to establish a Newsboys' Aid Society, under the management of a number of prominent ladies, whose efficiency in benevolent movements would be a guarantee of success. Accordingly an informal meeting of a number of ladies was held in June following at Association Hall. There were present at this meeting Mrs. E. E. Hutter, Mrs. John M. Maris, Miss L. E. Claghorn, Mrs. C. M. Baker, Mrs. C. C. Hancock, Mrs. Joseph Lennig, Mrs. Dr. Muhlenberg, Mrs. Benjamin I. Crew, Mrs. I. H. Jackson, and Miss McBride. On June 11th, following, the society was duly organized by the appointment of a board of managers, consisting of twenty-four ladies, and a board of counselors of twenty gentlemen. A house was rented at No. 228 South Ninth Street for the use of the society, and on the 11th of February, 1879, was formally dedicated. On the 13th of the same month nineteen boys, all of whom were without homes, were received as inmates of the institution. Mrs. E. E. Hutter was made president; J. S. Cummings, corresponding secretary; and Miss Louise E. Claghorn, treasurer. An adjunct to the home, and growing out of it, was the formation of a Newsboys' League, organized in May, 1879, composed of about two hundred members. At the same time a Dime Savings-Bank was organized. The society now occupy a building at No. 251 South Sixth Street, which was obtained mainly through the generous aid rendered by Mrs. John Gilbert, Mrs. J. Wright, Mr. and Mrs. William Singerly, and Mrs. Hamilton Disston. The formal opening of this building took place on Jan. 25, 1882. The exercises were of an exceedingly interesting character. The late mayor, William S. Stokley, presided. Prayer was offered by Rev. William Baum, D.D. The corresponding secretary, Mr. J. S. Cummings, presented a statement in detail of the progress of the institution. Addresses were made by Justice Trunkey, of the Supreme Court, Judge Pierce, Ex-Governor Pollock, and M. J. Mitcheson.

Officers.—President, Mrs. Elizabeth E. Hutter; Vice-Presidents, Mrs. G. B. Markle, Mrs. J. P. Steiner, Mrs. Dr. F. Muhlenberg, Mrs. J. Wood Wright, Mrs. William Singerly; Recording Secretary, Mrs. C. E. Boney; Corresponding Secretary, J. S. Cummings; Treasurer, Miss Louise E. Claghorn; Managers, Mrs. Elizabeth E. Hutter, Mrs. G. B. Markle, Mrs. Joseph Lennig, Mrs. Dr. F. Muhlenberg, Mrs. J. Hood Wright, Miss Louise E. Claghorn, Mrs. J. M. Maris, Mrs. C. E. Boney, Mrs. H. Shurtleff, Mrs. William M. Singerly, Mrs. Frederick Lovejoy, Mrs. Charles Godfrey, Miss Clara Gilbert, Miss Ida Markle, Mrs. William H. Maule, Mrs. John Lucas, Mrs. Henry Disston, Mrs. J. P. Steiner, Mrs. Horace Disston, Mrs. Walter Baird, Mrs. Matthew Baird, Mrs. Davis Pearson, Mrs. Edwin H. Fitler, Mrs. Moore; Board of Counselors, George W. Childs, J. S. Cummings, Alexander Whilldin, A. J. Drexel, James Neill, George H. Stuart, Alexander Brown, James L. Claghorn, Edwin Scull, Hon. James Pollock, Benjamin Crew, James Grant, C. C. Hancock, I. V. Williamson, William Bay, Charles M. Baker, William M. Shoemaker, Thomas P. Wattson, Henry C. Butcher, Samuel G. Scott, Daniel K. Grim, William M. Singerly, William Bucknall, Horace Disston, Frederick Lovejoy, Caleb J. Milne, Charles Godfrey, A. M. Spangler, Davis Pearson, William Disston, Edwin Fitler; Solicitor, James W. Paul; Assistant, Charles E. Lex; Physician, Frank Muhlenberg, M.D.; Dentist, Dr. Thomas.

The Pennsylvania Seamen's Friend Society was organized in 1845, and incorporated March 7, 1846. Its principal field of operations is the port of Philadelphia. Sailors, when in port, it is well known, are exposed to many temptations, and being without restraint when off ship, indulge too often in debauchery and vice. The Seamen's Friend Society furnishes to the mariner in port a sailor's home,—a large, comfortable, cheerful boarding-house. In 1860, this was at No. 422 South Front Street, and sought the confidence of the seafaring class by furnishing them with good clean lodgings, abundance of food, and space to indulge in such amusements as are innocent. There is a good library and other conveniences. A part of the duty of this society was to select and send out libraries for use of ships and vessels by which the monotony of long voyages could be beguiled, and instruction also afforded.

Officers.—President, Henry D. Sherrerd; Treasurer, John Laughlin; Corresponding and Recording Secretaries, Rev. S. Bonhomme and Rev. George W. MacLaughlin, A.M.; Managers, Dr. Charles A. Kingsbury, Alexander Whilldin, Henry N. Paul, E. O. Thompson, William Brockie, Thomas B. Wattson, Capt. John Laughlin, Robert W. Smith, S. Bonhomme, John H. Atwood, John A. Weir, L. Westergaard, John C. Darrah, William Buehler.

The Female Seamen's Friend Society, at Sailors' Home, No. 422 South Front Street, was established in 1832, and incorporated fifty years afterward. The objects go further than those of the principal society, which looked principally to the finding of a comfortable home for the sailor while in port. The Female Society is for the relief of the sick, disabled, shipwrecked, and indigent seamen and their families, looking after their moral and religious welfare, supplying them with food, fuel, and clothing when in distress, burying their dead, if found worthy and without means, and caring for their children and widows.

Officers.—First Directress, Miss Martha H. Gano; Second Directress, Miss Maggie T. Richards; Corresponding and Recording Secretary, Miss Teresa Epsy; Treasurer, Miss Caroline R. Epsy; Managers, Mrs. M. W. Baldwin, Miss Martha H. Gano, Mrs. Enoch Turley, Mrs. Alexander Hewitt, Mrs. William Proctor, Jr., Mrs. John C. Hunter, Mrs. E. D. Ledyard, Miss M. T. Richards, Miss Elizabeth T. Wright, Miss Lydia Baldwin, Miss Georgiana Baldwin, Miss Lydia D. Sherrerd, Miss Caroline R. Epsy, Miss Teresa Epsy.

The Seamen's and Landsmen's Aid Society in 1876 also had a snug harbor for sailors at the corner of Front and Union Streets.

The Grandom Institution, incorporated April 23, 1841, has charge of the funds bequeathed by Hart Grandom, for two objects: First, "to loan to young men of good character who have attained their majority, loans by which they may commence business in their various pursuits; and second, to distribute the income of a permanent fund to the aid of the deserving poor, but not the intemperate during the winter season."

The Fuel Saving Society, of the city and liberties of Philadelphia, was established in 1821, and incorporated in 1837. The object was "to encourage among the poorer classes the practice of economy and thriftiness so as to enable them from their summer earnings to provide for their winter fuel." "Receivers were appointed annually for the purposes of this society, and generally they were respectable apothecaries whose places of business were prominent in those portions of the city where poor people most abound. The receiver would take very small sums, and whatever was deposited stood to the credit of the depositor, and could be drawn upon in fall and winter, or whenever necessary for the purchase of fuel. Originally this was fire-wood always, but after the changes caused by the introduction of anthracite coal were well established, the supply of wood was given up, and coal furnished by the ton, half ton, and quarter ton. The advantage to the depositors is that the society is to them a saving-fund. They can lay away in summer small sums, the product of which will keep them warm in winter. They also purchase at wholesale prices, because the society lays in large quantities of coal when the price is cheapest, and charges no more than cost. Indeed, of late years fuel has been furnished to depositors at less than cost; the members of the society having the advantage of the revenue of an endowment fund, which assists them in taking a portion of the expense of the coal off of the shoulders of depositors.

The Friends' Charity Fuel Association was organized to supply the poor with fuel gratis on the 1st of August, 1835, among members of the Society of Friends, whose meeting-house was on Cherry Street (now on Race Street above Fifteenth). It was incorporated in 1869. It is broad in its views, and established for the benefit of all. It is said, on its behalf, "The Society of Friends, by its discipline, is expected to take care of its indigent members. The aim of this organization, therefore, is to aid such persons, irrespective of creed, color, or nationality, as cannot be otherwise provided for." Some investments made on account of this society promote its usefulness.

The Philadelphia Society for Organizing Charity, established in 1878, works upon the idea that true charity consists in giving only to the worthy. Hence it seeks to repress mendicancy, to reduce vagrancy and pauperism, to prevent imposture and indiscriminate giving. It has no building in which benevolence is administered, but there is an office for the central association and offices in all the wards.

The work of the society is conducted through a central executive board of twenty-one directors and by boards of directors in its several district associations. There is also an assembly, consisting of all the members of the society and of representatives of co-operating societies, which meets monthly for the consideration of subjects under the different branches of charitable and correctional work. The assembly has committees (1) on arrangements, (2) on visitation and women's work, (3) on employment, (4) on provident habits, (5) on medical charities, (6) on education and care of children, (7) on defective classes, (8) on hygiene, etc., (9) on penal and reformatory institutions, (10) on legal protection of the poor, (11) on pauperism, vagrancy, etc., (12) on charitable and correctional statistics. Monthly conferences by the women visitors of the society are held for the consideration of their work. It is estimated that the total number of visits among the poor made by the officers and workers of the society exceed one hundred and twenty-five thousand. A paper called *The Monthly Register* is published by the society, giving information of the work of charitable societies in this city and elsewhere. It is issued monthly.

Central office, 1602 Chestnut Street. Dr. James W. Walk, general secretary; Benjamin H. Shoemaker, treasurer.

Officers, 1883–84.—President, Hon. Samuel G. King, mayor of the city, *ex officio*; Vice-Presidents (being presidents of the district associations), First and Second Wards, David Wood; Third Ward, A. C. Deakyne, M.D.; Fourth Ward, William McAleer; Fifth Ward, William S. Price; Sixth Ward, Thomas M. Seeds; Seventh Ward, Richard C. McMurtrie; Eighth Ward, Alexander Brown; Ninth Ward, P. Pemberton Morris; Tenth Ward, John F. Keen; Eleventh Ward, J. Christian Miller; Twelfth Ward, William J. Miller; Thirteenth and Fourteenth Wards, A. M. Spangler; Fifteenth Ward, William Wood; Sixteenth and Seventeenth Wards, Isaac A. Sheppard; Eighteenth and Nineteenth Wards, A. H. Overholt; Twentieth Ward, William R. Thomas; Twenty-second Ward, Jabez Gates; Twenty-third Ward, Samuel Bolton; Twenty-fourth and Twenty-seventh Wards, Rev. D. R. Goodwin, D.D.; Twenty-fifth Ward, John Blood; Twenty-sixth and Thirtieth Wards, A. A. Catanach; Twenty-eighth Ward, Enoch Fulleway; Twenty-ninth Ward, Rev. William H. Hodge: Thirty-first Ward, William McIntire. Board of Directors: President, Joshua L. Baily; Vice-President, James S. Whitney; Joshua L. Baily, Rudolph Blankenburg, Henry T. Child, M.D., Nelson F. Evans, Ambrose Smith, Robert Ellis Thompson, Ph.D., term expires in November, 1884; Rev. Charles G. Ames, Charles E. Cadwalader, M.D., Philip C. Garrett, John F. Keen, Joseph K. Wheeler, Rev. H. L. Wayland, D.D., Joseph P. Mumford, term expires in November, 1885; A. C. Deakyne, M.D., Josiah R. Sypher, James S. Whitney, Albert B. Williams, Robert N. Willson, William J. Gillingham, David Wood, term expires in November, 1886; Treasurer, Benjamin H. Shoemaker; General Secretary, James W. Walk, M.D.

The Day Nursery for Children.—A peculiar form of kindness is shown by the day nurseries for children and kindergarten schools, which are mostly associated with them. These take charge of children of poor, industrious working women, and take care of them during working hours. The nursery day is usually from half-past six in the morning to seven o'clock in the evening, by which latter time the little ones must be called for. "The Day Nursery for Children," established in 1863 and incorporated in 1873, is the oldest of these. It was formerly established at 410 Blight Street, below Pine, but in later years has been at No. 2218 Lombard Street. The Lombard Street Day Nursery, at No. 430, occupies the same field, as does the Northern Day Nursery, at 923 North Seventh Street.

Officers.—Board of Managers: Directress, Mrs. W. A. Ingham; Treasurer, Miss H. S. Biddle; Secretary, Mrs. W. W. Frazier, Jr.; Visitors, Miss Clyde, Mrs. F. H. Wyeth, Mrs. H. G. Batterson, Mrs. A. Monges, Mrs. J. Shipley Newlin, Miss M. Newlin, Mrs. Blight, Mrs. O. Buckley, Mrs. W. W. Frazier, Jr., Mrs. M. L. Sewart, Mrs. Rudolph Ellis, Miss Eugenia Smith; Visiting Physician, Dr. T. H. Bradford.

Kindergarten Instruction has been established in seventeen free schools, established by the Sub-Primary School Association. Some of these are, by leave of the school directors and controllers, held in public-school buildings; others at various places. The annual expenses in 1883 were five thousand dollars; the number of pupils, four hundred and thirty.

Indian Aid Associations.—At a very early period in the history of Pennsylvania the members of the Society of Friends adopted a humane course toward the North American Indians,—an inheritance, it might seem, from the policy of William Penn. The Friendly Associations for regaining and preserving peace with the Indians was established in 1756, in defiance of the Proprietary government, which had declared war against the Indians and offered rewards for Indian scalps. In later times Friends maintained a constant testimony of kindness in relation to the original inhabitants of North America. The Indian Aid Association connected with the Race Street Meeting and the Indian Hope Association are societies of this character.

The Pennsylvania Society for the Prevention of Cruelty to Animals was established in 1868, and incorporated April 4th of that year. Its object is sufficiently told in its name. It seeks to protect the brute creation from the cruelty of mankind, and its care is given to prevent the maltreatment and suffering of horses, mules, cattle, and every creature that moves and has being. Its aims have been greatly assisted by the institution of a "women's branch" of the same society. The management is effective, and there are officers whose duty is to examine every report of cruelty and procure the arrest and punishment of the offenders.

The Pennsylvania Society to Protect Children from Cruelty might be said to be an outgrowth from the former, because the vigor with which wrongs against dumb beasts were prosecuted frequently led to expressions of regret that there was not some association to follow up and bring to justice brutal parents, guardians, relations, and others who subjected children to barbarous treatment. The children's society since its institution has been vigilant in interfering for the protection of children, and its officers have brought many of their oppressors to punishment.

Officers.—President, Hon. Daniel M. Fox; Vice-Presidents, Clarence H. Clark, Charles J. Harrah, Henry C. McCook, D.D., Charles Willing, M.D., T. Morris Perot, Samuel P. Godwin, Richard P. White, Thomas H. Montgomery, George W. Childs, Joel J. Bailey, Joseph K. Wheeler; Treasurer, Peter A. Keller; Secretary, Benjamin J. Crew; Managers, Hon. Daniel M. Fox, William Eisenbrey, Gen. L. H. Warren, J. Lewis Crew, Samuel J. Levick, James Constable, Dr. Charles P. Turner, William F. Jones, Dr. Thomas G. Morton, Frederic Collins, Mrs. R. H. Hare, Mrs. Charles Willing, Mrs. Ernest Turner, Mrs. E. M. Norris, Mrs. Alfred Cromelien, Mrs. Daniel Dougherty, Mrs. G. M. Jones, Mrs. Dr. George W. Ellis, Miss Isabella Tatham, Mrs. Ed. H. Ogden, Mrs. E. H. Miles, Mrs. H. W. Wilson, Miss Rebecca Wetherill, Miss Anna Hallowell, Mrs. Henry J. Biddle, Miss Georgiana Harrah; Counselors, Richard P. White, N. Dubois Miller; Medical and Surgical Advisers, Dr. Charles P. Turner, Dr. Thomas G. Morton.

Protestant Episcopal Church Reliefs.—The Corporation for the Relief of Widows and Children of Deceased Episcopal Clergymen.—This venerable corporation, the object of which is indicated in its title, was originated by a number of the clergy at a meeting held in Elizabethtown, N. J., in 1767. The Rev. Mr. Auchmuty, rector of Trinity Church, New York, Rev. Dr. Miles Cooper, president of King's College, New York, Rev. Mr. Cooke, missionary of the London Society at Shrewsbury, N. J., and the Rev. Dr. William Smith, of Philadelphia, were appointed a committee to draw up and recommend a plan, and in 1769 they organized the "Corporation for the Relief of Widows and Children of Clergymen of the Communion of the Church of England." This society was practically a company for insurance on the lives of the clergy in the three provinces of New York, New Jersey, and Pennsylvania. Separate charters were obtained in each province, the one in Pennsylvania being granted by John Penn, on Feb. 7, 1769. It may be noticed that the meetings of this corporation called a number of the clergy together at intervals during the period prior to the Revolutionary war, and gave them an opportunity for consultation about the general affairs of the church. In October, 1784, a meeting was held in New York, efforts were made to resuscitate the corporation, which had held no meetings during the war, and which in 1784 received a legacy of four thousand dollars from the estate of Andrew Doz. The one corporation was divided into three in 1796, —one for Pennsylvania, one for New York, and one for New Jersey. The accumulated funds were not divided until 1806, when Pennsylvania received as its share $10,390; New York, $11,806; and New Jersey, $4289.

The affairs of the corporation in Pennsylvania

have been so judiciously managed, and its resources so carefully husbanded, that it has now an accumulated fund of about three hundred thousand dollars. It insures the lives of church clergymen in the diocese, receives deposits from them, and sells annuities for their widows and children. It has been generous in its aid to those who came properly within the range of its benefactions, which have always been confined to the families of deceased clergymen who during their lives paid at least some small amount into its treasury. J. Somers Smith, No. 212 South Fourth Street, was treasurer in 1883.

The Christmas Fund for Disabled Clergymen.—A collection is made for this fund every year, in the churches, on Christmas-day. The trustees are elected by the Diocesan Convention. The beneficiaries are disabled clergymen and widows and children of clergymen. The names of the beneficiaries of this and of the similar diocesan charities are not published. The receipts are about five thousand dollars each year, and there is an invested fund of about eighteen thousand dollars.

The Protestant Episcopal Board of Missions.—All the missionary work of the Episcopal Church in the diocese is under the control of the Board of Missions, organized in 1859, and made up of the bishop and twenty-four clergymen and laymen, elected annually by the Convention.

The Philadelphia Protestant Episcopal City Mission.—The Rev. Thomas G. Allen, Rev. Edward C. Jones, Rev. John G. Furey, and perhaps others, at various periods between 1830 and 1870, were engaged in general missionary work in Philadelphia; but their labors were personal, and there was no organization to sustain or direct them. Several meetings of the city clergy were held in 1869–70 to consider the subject. The bishop's first plan was to have four churches selected, in different neighborhoods, to be used as centres of missionary work, to be supported by the other parishes. As this was not favorably received, and no other plan being agreed upon to meet a great and recognized want, Bishop Stevens began the Philadelphia Protestant Episcopal City Mission, on May 1, 1870. He appointed as superintendent the Rev. Samuel Durborow, an indefatigable and earnest worker, and one having had a large experience in church missionary work. Missionaries were set to work, a house was taken, halls and rooms were rented, services were commenced at various places and in many of the public institutions, money was collected, and systematic plans for the relief of the poor put in operation.

After the first year's experience had demonstrated its success, the bishop handed over the control of the City Mission to a Board of Council, of eight clergymen and eight laymen, to be appointed by the bishop. In 1872 the Diocesan Convention committed the whole work of city missions to the supervision of the Diocesan Board of Missions. This board adopted a plan providing for the continuation of a Board of Council for City Missions, who should carry forward all beneficent enterprises in the city, unconnected with parochial organizations, and report to the Board of Missions. This plan remains unchanged. In April, 1877, the City Mission was incorporated, with the title "Trustees of the Real and Personal Property of the Philadelphia Protestant Episcopal City Mission." There are five trustees, appointed by the Convention.

The City Mission first occupied a rented house, No. 225 South Ninth Street, which was fitted for its office, and for a German mission service held in its chapel. In 1876, Mr. and Mrs. Harry Ingersoll gave to the City Mission, for its uses, the large house No. 411 Spruce Street, which the generous donors enlarged and placed in perfect order. This is now the House of Mercy, being occupied as the central office of the City Mission, and also as the Central Sick-Diet Kitchen, the upper floors being used for hospital purposes, and occupied by female patients, as the Home for Poor Consumptives. In 1882 the City Mission received as a legacy the one-sixth part of the estate of Miss Mary Shields, amounting to about one hundred and eighty thousand dollars, and this has been invested and the income used in supporting the department for the relief of poor consumptives.

The City Mission is really a group of missions and missionary agencies, which it has set in motion, directs, and maintains. Some of them we notice under separate headings. The Rev. Mr. Durborow is still the general superintendent. There is a staff of three or four clergy, who minister statedly in the prisons, almshouse, and other public and charitable institutions. It has given most valuable aid in establishing a number of missions and churches, some of which have become self-supporting parishes. The French Church, St. Barnabas' Church, Haddington, the Church of our Merciful Saviour, now the Church of the Annunciation, Christ Church, Franklinville, and others were all aided by it when they began. It has made provision for not only the spiritual wants, but also for the temporal relief of many classes of the deserving poor, without distinction. The consumptives are relieved in many cases in their own homes. Provision is made for a number of poor aged persons, and sick-diet kitchens have been established at various points.

In the thirteen years, 1870–83, the total expenditures of the City Mission for all purposes have been $184,717.96; baptisms, 2417; burials, 1549; visits, 214,237; Bible readings, 8693; grocery orders, coal orders, garments, and shoes distributed, 54,466, etc.

Officers.—President, Rt. Rev. William Bacon Stevens, D.D., LL.D.; Board of Council, Rev. B. Watson, D.D., Rev. D. S. Miller, D.D., Rev. Joseph D. Newlin, Rev. W. N. McVickar, Rev. William H. Graff, Rev. S. D. McConnell, Rev. J. F. Powers, W. W. Frazier, Jr., Edward B. Bowen, Effingham Perot, W. P. Cresson, H. H. Houston, George R. Kellogg, William M. Runk, W. S. Lane.

The House of Mercy.—This house, No. 411 Spruce Street, is the central office of the City Mission, where all applications for relief can be made and information received. It was formally opened on April 2, 1877, by the Right Reverend Bishop of the diocese, and dedicated to the various works of mercy which have been, from time to time, established by the Philadelphia Protestant Episcopal City Mission. On the first floor of the main building are located the offices of the City Mission. The Central Sick-Diet Kitchen is accommodated in the spacious and well-appointed room in the rear building. The Home for Consumptives is located on the upper floors, wards being provided for female patients destitute of an abiding-place. Rev. Samuel Durborow is superintendent.

The Central Sick-Diet Kitchen was opened by the Protestant Episcopal City Mission in November, 1875. The object of the Sick-Diet Kitchen is to provide for the sick poor properly-prepared food, and such delicacies as they need but cannot procure. The rations are given out daily, except Sunday, to all who are sick and poor. This kitchen is maintained by the City Mission at No. 411 Spruce Street.

The Northeastern Sick-Diet Kitchen, maintained by the City Mission, location No. 1233 Leopard Street, was established in 1879.

The Southern Sick-Diet Kitchen, maintained by the City Mission, location No. 1719 South Ninth Street, was established in February, 1880.

The Southwestern Sick-Diet Kitchen, maintained by the City Mission, location No. 768 South Nineteenth Street.

The Home for Aged and Infirm Persons.—The City Mission has a special department for the relief of aged and infirm persons, and has cared for a number of them at No. 618 South Tenth Street. Efforts are now being made by the City Mission to secure an additional building for this and other charitable purposes.

The Church Home for Children.—This highly useful and beautiful home was organized in 1856, Miss Meredith being one of its most active promoters. It was first located at the northeast corner of Twenty-second and Pine Streets, but on May 15, 1873, the present home, which has also a neat chapel on its grounds, was opened at Baltimore Avenue and Gray's Lane, West Philadelphia, near Angora Station.

Officers, Board of Council.—President *ex officio,* Rt. Rev. William Bacon Stevens, D.D.; Secretary, Lewis H. Redner; Treasurer, George T. Lewis; Board of Managers, Directresses, Mrs. George T. Lewis, Mrs. Charles Stillé, Mrs. James W. Robins; Secretary, Mrs. Algernon Morton; Treasurer, Mrs. John Harrison.

The Burd Orphan Asylum of St. Stephen's Church.—This home was founded in 1848, by Mrs. Eliza Howard Burd, a member of St. Stephen's Protestant Episcopal Church. For some years the home occupied several small buildings on Sansom Street, near Tenth. After her death it was removed to the present buildings, built in 1861-63, on Market Street, near Sixty-third, West Philadelphia. The grounds are extensive, and the buildings very fine. It educates orphan girls, and the results have been of the most satisfactory character. The institution is liberally endowed, St. Stephen's Church being the trustee.

The Home for the Homeless.—This home provides a temporary refuge for homeless females. It also maintains a sick-diet kitchen. The home is at No. 708 Lombard Street.

Officers.—President, Mrs. A. F. Lex; Vice-President, Mrs. Joseph R. Moore; Secretary, Miss Emily Wells; Treasurer, Miss Anne DeHaven.

The Clinton Street Boarding-Home for Young Women.—This institution provides a comfortable home for respectable young women at moderate charges. It was founded by Miss Mary Coles, who is still a directress of it. It occupies two large dwellings, Nos. 913 and 915 Clinton Street, and has been quite successful.

Boarding-Home for Young Women.—This is a home with similar objects as the preceding one, and is located at No. 1433 Lombard Street.

St. James' Church Industrial School.—This is a parochial mission, at Twenty-fourth and Walnut Streets, maintained by St. James' Church. Very poor and ragged little girls are received and carefully trained.

Officers.—President, Rev. Henry J. Morton, D.D.; First Directress, Miss Rebecca Coxe; Second Directress, Miss Helen Hunter; Treasurer, Miss Rebecca Yarnall; Secretary, Miss Margaretta Hutchinson; Visitor, Mrs. McConnell.

St. Luke's Church Home.—This is a parochial charity maintained by St. Luke's Church. It is located at No. 1317 Pine Street, near the church, and provides a comfortable home for some aged women, members of the parish.

Faith Home for Crippled Children.—This institution was begun in 1882, and is located at the northwest corner of Forty-fifth Street and Osage Avenue, West Philadelphia. It is designed to receive and care for children who are incurable cripples. Mrs. Innes, wife of the assistant minister of St. Mary's Church, was active in the organization of the home. Its corporate title has, we believe, been somewhat altered.

St. Peter's House.—This is a parochial mission of St. Peter's Church. It occupies a large building, erected about ten years ago, at the southwest corner of Front and Pine Streets, devoted to the use of various parochial missionary organizations. The site was the gift of Mr. Coleman, and the old mansion which stood on it was the house in which Bishop White lived at the time he was first called to be an assistant minister in the "United Churches," Christ Church and St. Peter's Church.

The Deaf-Mute Mission.—The Rev. Francis J. Clerc, D.D., some time warden of the Burd Orphan Asylum, about twenty years ago held occasional

church services in the sign language for deaf mutes. St. Stephen's Church very kindly gave the use of the Sunday-school building in the rear of the church, and has since fostered this mission until it has become extensively useful. The Rev. H. W. Syle, himself a deaf mute, was ordained by Bishop Stevens some years ago, and is in charge of the services. An effort is now being made to erect a church, to be called All Souls', to be the headquarters of this interesting and peculiar mission.

The Ellen Butler Memorial.—This home was founded in 1882 by Edgar H. Butler, Esq., as a memorial to his deceased wife. It is located at Nos. 28 and 30 Haines Street, Germantown. It is in charge of a board of directors, and informally connected with St. Luke's Church, Germantown. Its object is to "provide a home for gentlewomen who, from sickness, reduced circumstances, or want of employment, shall be in need of such a home, either temporarily or permanently."

The Sheltering Arms.—Several abortive efforts were made to establish a foundling asylum which should be under the control of the Protestant Episcopal Church in Philadelphia, without satisfactory results. Such an agency was so much needed that in 1881 the Sheltering Arms was organized, and is now firmly established. The building is at the southeast corner of Franklin and Brown Streets. It receives infants, and in certain cases, the mothers also, and this charity has already won the approval and confidence of the general public.

Officers.—Board of Council, William Bacon Stevens, D.D., LL.D., president; Rev. W. H. Graff, Thomas F. Davies; Francis Wells, Orlando Crease, Rev. W. F. C. Morsell, A. H. Miller, Justice Cox, Jr., George D. McCreary, Daniel Baugh, J. N. Newlin, John B. Love; Board of Managers, Mrs. Charlotte L. Peirce, Mrs. George L. Harrison, Mrs. E. B. Wood, Miss Margaret Bache, Miss Georgie Harrah, Miss Emily Ashhurst, Mrs. S. C. F. Hallowell, Mrs. Wayne MacVeagh, Mrs. Robert Adams, Mrs. Hannah P. Baker, Mrs. Orlando Crease, Mrs. Daniel Baugh, Mrs. H. O. DuBois, Mrs. S. P. Wolfe, Mrs. George D. McCreary, Miss M. A. Bonnell, Mrs. Abel Reed, Miss Gertrude K. Peirce, Mrs. T. K. Conrad; Medical Board, J. Cheston Morris, M.D., Albert H. Smith, M.D., John Ashhurst, Jr., M.D., Louis Starr, M.D.

Miscellaneous Charities, Protestant Episcopal Church.—In addition to the organizations noticed in this list, there are numerous other charitable and benevolent agencies connected with the Protestant Episcopal Church in Philadelphia. Nearly all the parishes have something in the way of guilds, workingmen's clubs, Dorcas Societies, beneficial clubs, temperance societies, and the like connected with them. We have noticed the oldest and most prominent of them, and the list shows what a wide and varied field of charitable and benevolent ministrations is traversed and cultivated in this city by the members of this communion.

Catholic Relief Associations.—St. Joseph's Female Orphan Asylum is located at the southwest corner of Seventh and Spruce Streets. It is in charge of the Sisters of Charity. It owes its origin to Rev. Leonard Neale, who in 1797 organized an association to care for the destitute orphans of those Catholics who died during the year from yellow fever. A number of children were kept in a home on Sixth Street, near Holy Trinity Church, and were supported by voluntary offerings. In 1806 an association to maintain the orphan by an annual subscription was formed. An act of incorporation was obtained on Dec. 18, 1807. In 1814 the institution was placed in charge of the Sisters of Charity. Up to about 1830 the asylum occupied a building on the east side of Sixth Street, north of Spruce.

St. John's Orphan Asylum owes its origin and foundation to a voluntary association formed in 1829, at the house of Nicholas Donnelly, Lombard Street, above Third, to care for the four children of one James Andrews, who died in June, his widow dying in October. When the association numbered one hundred and sixty-three members, application was made to Rev. John Hughes, at St. Joseph's Church, to draft constitution and by-laws for the government of the society. He did so, and subsequently applied to Rev. John Hickey, at Emmittsburg, Md., for four Sisters of Charity. They came, and a house on Prune now [Locust] Street, above Fourth, was secured and occupied. In 1832 the asylum was removed to Broad Street, north of Chestnut. The next year it was changed to the Gothic mansion, Chestnut Street, below Thirteenth, on the site of Concert Hall. The property cost the asylum $21,333.33. It was sold for $33,000, when, in 1852, thirteen acres adjoining the Cathedral Cemetery was purchased, and the asylum erected, at a cost of $43,000, having accommodations for four hundred children.

Since 1847 the asylum has been in charge of Sisters of St. Joseph.

St. Vincent's Orphan Asylum, at Tacony, is for the care of Catholic German orphans.

St. Mary Magdalen di Pazzi Asylum, for Italian orphan children, is at No. 913 South Seventh Street, founded 1876, by Rev. A. G. Isolero.

St. Ann's Widows' Asylum is on Moyamensing Avenue below Christian Street. It was founded in 1848, by Bishop Kenrick, who in that year purchased the property and donated it to the object. The gift was accepted at a meeting at St. John's, on Oct. 8, 1848. In 1849 a charter of incorporation was obtained. On May 24, 1849, the Sisters of the Good Shepherd took possession, and on the 26th Bishop Kenrick said the first mass in the asylum. Widows over fifty years of age are admitted.

Home for Aged Poor, under the care of the Little Sisters of the Poor, is on Eighteenth Street, above Jefferson, and was dedicated Oct. 29, 1871. On May 24, 1874, the corner-stone of a new chapel for the accommodation of the inmates was laid, and on November 1st it was dedicated.

The home receives all aged poor without respect to creed or nationality. The number of inmates is about three hundred.

The Catholic Home for Destitute Orphan Girls, No. 1720 Race Street, owes its origin to the Particular Council of the St. Vincent de Paul Society. In 1863 the necessity of providing for such children, many of whom were orphans of deceased soldiers, procured a charter from the Legislature and founded a temporary home, and finally secured the present location. In 1865 the management of the institution was assumed by Bishop Wood. Since its foundation over twelve hundred children have been cared for.

St. Vincent's Home, corner of Eighteenth and Wood Streets, cares for children who are under five years of age.

St. Vincent de Paul Society.—Conferences of the Society of St. Vincent de Paul exist at nearly all the Catholic Churches. Their object is the relief of destitution, irrespective of the religion, color, or nationality of the needy. The first conference was organized at St. Joseph's Church, by Rev. John Lynch, S.J., in 1851; William A. Steel, president; L. Kirkpatrick, treasurer; and Charles McKeone, secretary. In 1858 the following conferences were organized: St. John's, M. A. Frenaye, president; SS. Peter and Paul's, John G. Ford, president; St. Patrick's, Michael McEvoy, president; St. James', John B. Colahan, president; St. Malachi's, Patrick McIntee, president. In 1859 they were aggregated to the organization in Rome. Later, the Assumption, Joel Zane, president; St. Augustine's, William J. Turner, president; St. Francis', John Nailis, president, were organized, and aggregated to the Particular Council in November, 1860, April, 1862, and November, 1872, respectively. In March, 1860, the Particular Council, or union of the city conferences, was formed. John G. Ford was the first president. John B. Colahan succeeded until 1863, when William J. Turner was elected. He resigned in 1864, when Hon. Joseph R. Chandler was elected. He continued president until his death in July, 1881. His successor and the present incumbent is Charles Philips.

The following conferences, in addition to those named above, have been organized. The date of their affiliation with the Particular Council and name of the first president is given:

Our Mother of Sorrows, February, 1865, John I. Murray.
St. Michael's, November, 1865, Michael McEvoy.
St. Paul's, September, 1866, Bernard Owens.
St. Joachim's, June, 1871, William M. O'Reilly.
St. Teresa's, June, 1871, Peter O'Reilly.
Immaculate Conception, February, 1872, J. W. Kearney.
St. Agatha's, February, 1872, Owen Brady.
St. Ann's, February, 1872, Hugh Smith.
Gesù, June, 1878, J. W. McDermott.
St. Vincent de Paul, March, 1879, Charles Philips.
St. Mary's, June, 1879, J. Hammill.
St. Cecilia's, November, 1879, Michael Ward.
St. Charles Borromeo, April, 1880, Charles Lafferty.
Annunciation, April, 1880, John T. Murray.
St. John the Baptist, November, 1881, Patrick Dillon.
St. Elizabeth's, November, 1881, Charles E. Baker.

In order to protect destitute children the Council, in 1863, procured a charter for a temporary home. The Catholic Home continued under the management of the society until 1865, when it was assumed by Bishop Wood. Over twelve hundred children have been cared for by the home. In 1876 the General Assembly of the society met in this city, by direction of the president-general at Paris, as a mark of honor to the United States. In 1877 the annual spiritual retreat of the society was instituted, and has since been maintained.

House of the Good Shepherd.—The Sisters of the Good Shepherd were founded in 1651, at Caen, France, by Rev. Eudes de Mezerai. The order was introduced into Philadelphia in 1849. On May 3, 1850, an auxiliary society was organized to assist the order. Mrs. Robert Walsh, president; Mrs. Edward Frith, vice-president; Mrs. James Slevin, secretary.

On March 21, 1852, the corner-stone of the convent, or Home of the Good Shepherd, northeast corner Twenty-second and Walnut Streets, was laid. Prior to its completion the Sisters were in charge of St. Ann's Widows' Asylum, on Second Street, below Christian. The institution remained at Twenty-second and Walnut Streets until Nov. 3, 1880, when the present magnificent house at Thirty-fifth Street and Silverton Avenue, West Philadelphia, was first occupied. The object of this noble order is the reclamation of wayward females.

The Catholic Philopatrian Literary Institute is situated on Twelfth Street, below Walnut. It was organized at St. Mary's school hall, on Dec. 22, 1850. Rev. E. J. Sourin was elected president. After leaving St. Mary's, the society subsequently met at Sixth and Walnut, corner Eighth and Arch, southeast corner Sixth and Prune [now Locust], northeast corner Tenth and Chestnut, southeast corner Eighth and Walnut, No. 923 Sansom Street. On April 9, 1871, the society bought the property of the Schuylkill Hose Company, Locust, below Thirteenth, where it remained until 1879, when it purchased the property it now occupies. E. J. Molineaux is president.

The Irish Catholic Benevolent Union of the United States, a national organization of Catholic societies, engaged in the work of mutual assistance in case of sickness and death, number forty-seven, aggregating six thousand seven hundred members.

The officers of the national body are Hon. A. M. Keiley, Richmond, Va., president; John L. Lindsay, Providence, R. I., and Maurice F. Wilhere, Manayunk, Philadelphia, vice-presidents; Martin I. J. Griffin, Philadelphia, secretary; Rev. James Henry, St. Louis, treasurer.

The societies of the Irish Catholic Benevolent Union in Philadelphia are:

The Shamrock, St. Gertrude, and Hon. Dennis Dwyer Societies have lately been organized.

These societies pay weekly benefits to members when sick, and a funeral benefit to the family when a member dies.

There are also a number of Catholic beneficial societies, male and female, unattached to the Union. There are many societies, almost wholly composed of Catholics, to which no religious qualification is required for membership.

Catholic Total Abstinence Societies.—In 1871 the wave of agitation against the evils of intemperance, which had led to the formation of numerous Catholic total abstinence societies in the United States, reached Philadelphia, and a young man named James D. Howley took up the work in the southwestern part of the city, and organized St. Charles Borromeo T. A. B. Society. The necessity for some such organization being apparent, the new society attracted attention, and other societies were shortly afterward founded in adjoining parishes.

On March 17, 1872, St. Charles' and a cadet society formed a union, of which Mr. Howley was the founder and first president. The movement was of limited extent until the formation of a society in the Cathedral parish gave prominence to the subject, and the brilliant lead which that society at once took and has since maintained caused the agitation to become universal, and at this date the Catholic Total Abstinence Union of Philadelphia, commenced by Mr. Howley, and perfected and put into shape by John H. Campbell, the president of the Cathedral T. A. B. Society, numbers seventy-seven societies and eight thousand two hundred and fifteen members, and stands unrivaled at the head of the whole Catholic total abstinence movement in America. Mr. Howley died early in March, 1873, beloved by all his associates, and the Union some years afterward erected a neat monument, with appropriate inscriptions, over his grave in the Cathedral Cemetery, West Philadelphia.

In January, 1875, at the suggestion of Mr. Campbell, who had just been elected president, the Union established an emigration committee to look after the interests of destitute emigrants landing at this port. This committee has faithfully attended to its work ever since. Its agents are at the wharf upon the arrival of every European steamer. Young girls are protected from strangers, friendly advice is given to all, situations obtained for emigrants desiring to settle in Philadelphia, and pecuniary aid extended to needy persons. For years every case of distress has been attended to, and nowhere in the United States is such excellent care taken of the newly-arrived emigrants from other lands. Much of the success of the committee's work is due to Owen Kelly, the chairman of the committee, and Bartholomew Gillin, the wharf agent, the latter of whom speaks Irish fluently.

Early in 1873, Dr. Michael O'Hara, John H. Campbell, and some other active Irish-Americans connected with the movement conceived the idea of having the Union take a prominent part in the United States Centennial Exhibition, and the project of erecting a magnificent fountain in Fairmount Park was inaugurated. It was thought that a fountain of water, surrounded by statues of prominent Revolutionary heroes of Irish birth or descent, and of the Catholic faith, would be a lasting memorial of the principles of the organization and of the patriotism of the Irish element in America during the Revolutionary war. Accordingly plans were prepared, and a young Philadelphia sculptor of great ability, Herman Kirn, was selected to carve the five beautiful marble statues which now form a part of the group comprising the fountain. The central figure is Moses, the lawgiver, who redeemed his people from the bondage of slavery, as the Union would redeem its members from the bondage of drink, and who brought forth the living waters from the rock in the wilderness, just as the Union would supply the same beverage to the weary and famishing drunkard. First of the four remaining statues is that of Father Mathew, "the apostle of temperance," and upon the base are recorded the high honors paid to him by the United States Senate and House of Representatives. The second is Charles Carroll of Carrollton, the patriot signer of the Declaration, and next to him stands Rev. John Carroll, the first Catholic bishop in the United States, who was selected by the Continental Congress as one of the commissioners to the Canadas. Last, but not least, is Commodore John Barry, the "father of the United States navy," whose gallantry during the Revolutionary war is one of the bright pages of that glorious struggle. Each of these four statues is nine feet high, and that of Moses fifteen

and one-half feet high, carved—every one of them—out of a single block of Tyrolese marble. Moses is the largest single-piece marble statue in America. As works of art they are beautiful, and help greatly to adorn our beautiful park. Around the basin of the fountain there are carved medallion portraits of Lafayette, Kosciusko, De Grasse, Stephen Moylan, George Meade, Orono (the Catholic chief of the Penobscot Indians), and Pulaski, all of them Catholic patriots of the Revolution.

The fountain cost fifty-four thousand dollars, and was erected under the auspices of the Catholic Total Abstinence Union of America, the societies of that body outside of Philadelphia contributing about ten thousand dollars of the cost, the Philadelphia societies contributing the remainder. Ground for the monument was broken July 4, 1875, Hon. Joseph R. Chandler delivering the address on that occasion. Upon July 4, 1876, it was dedicated to American liberty, the oration being delivered by Governor John Lee Carroll, of Maryland, a grandson of Charles Carroll of Carrollton. Upon July 4, 1877, it was delivered to the city of Philadelphia, in trust for the free use of the American people, in the presence of what was claimed to be the largest public gathering ever held within the limits of the city. The number of people present was variously estimated to be from forty-five thousand to sixty thousand. Addresses were made by Governor John Lee Carroll, of Maryland; Governor John F. Hartranft, of Pennsylvania; David W. Sellers, representing the Park Commission; and John H. Campbell, representing the Catholic Total Abstinence Union of America. A poem was read by Philip A. Nolan, now general secretary of the latter body.

The Union of Philadelphia has at various times, principally upon March 17th (St. Patrick's Day), July 4th, and October 10th (Father Mathew's birthday), paraded its societies through the streets of the city, attracting much favorable attention, and in the Bi-Centennial celebration of the city it figured quite prominently, being second only to the division of fire companies in numbers.

The Union has accomplished and is doing much for the cause of good morals and sobriety in the city. Its societies have enlisted thousands of boys into its cadet organizations, teaching them to grow up without knowing the taste of intoxicating liquors, and have in use many halls and buildings fitted up to furnish amusement and instruction to the members, and especially designed to keep the young men from the temptations of idleness and drink. Circulating libraries, lyceums, dramatic and debating clubs, savings societies, night schools, etc., are among the prominent features of the movement in this city.

The present officers are: President, John H. Campbell; Vice-President, James Jordan; Treasurer, John A. Smith; Recording Secretary, William J. Power; Corresponding Secretary, Philip A. Nolan; Editor, John O'Callahan; Marshal, P. J. Hayes; Sergeant-at-Arms, John Stimmler. All of them are veterans in the cause of temperance, and upon their shoulders has rested for many years the structure which is known so prominently as the Catholic Total Abstinence Beneficial Archdiocesan Union of Philadelphia.

The following are the names of the societies attached to the Catholic Total Abstinence Archdiocesan Union, with date of admission to Archdiocesan Union.

No.		Date of admission.
1.	St. Charles Borromeo	March 17, 1872.
2.	St. Teresa's	Aug. 16, "
3.	St. Teresa's Cadets	Aug. 16, "

77.	St. James Cadets	

The Old Ladies' Home (Frankford Avenue and Clearfield Street) receives applicants over sixty-five years of age.

Officers.—President, Mrs. Emeline Claridge; Vice-President, Mrs. Elizabeth Burton; Secretary, Mrs. E. B. Lacey; Treasurer, Mrs. Charles E. Kelley.

Union Home for Old Ladies (corner of Lancaster and Girard Avenues, West Philadelphia) is an incorporated institution, where old women of all denominations may find a comfortable home.

Officers.—Board of Managers, President, Mrs. I. S. Hinkson; Vice-Presidents, Mrs. R. T. Tumbleston, Mrs. H. A. Teal; Treasurer, Mrs. M. M. Pauling; Recording Secretary, Miss H. Zarina Teal; Corresponding Secretary, Miss Annie Myers; Mrs. T. M. Newbold, Miss M. J. Levy, Mrs. Dr. A. A. Willits, Mrs. R. W. Piers, Mrs. H. Belfield, Miss E. Chambers, Mrs. M. A. Restein, Mrs. A. B. Walters, Mrs. M. J. Porter, Mrs. J. H. Cofrode, Mrs. R. Babb, Mrs. J. M. Gessler, Mrs. L. H. Alloway, Mrs. Joseph Sheppard, Miss S. Maxwell, Mrs. W. M. Smith, Miss M. J. Clift, Mrs. Thomas W. Barlow, Mrs. C. P. Snesserott, Mrs. M. Moore, Miss L. Y. Miller. Board of Trustees, President, Archibald C. Levy; Secretary, Thomas M. Newbold; Alfred L. Carey, Cornelius Herwig, M.D., E. M. Bruce, William J. Mackey, Henry Belfield, James Spear, A. B. Walters, John M. Gessler, Thomas W. Barlow.

The Home for Aged Couples (No. 1723 Francis Street, corner of Perkiomen) was founded Feb. 12, 1876. The object of this institution is the support of a non-sectarian home for old and indigent couples, man and wife, of good moral character.

Officers for 1883.—President, Mrs. H. P. Taylor; First Vice-President, Mrs. Walter H. Tilden; Second Vice-President, Mrs. H. G. Batterson; Treasurer, Mrs. William Hobart Brown; Secretary, Miss Lucy E. Wadleigh; Assistant Secretary, Miss L. Gorton; Solicitors, Hon. M. Arnold, W. Albert Nichols; Physicians, E. A. Farrington, M.D., T. H. Fenton, M.D.; Managers, Mrs. H. P. Taylor, Mrs. W. H. Tilden, Mrs. W. H. Batterson, Mrs. W. Hobart Brown, Miss L. E. Wadleigh, Miss L. Gorton, Mrs. H. J. Smith, Mrs. F. W. Stokes, Mrs. Joseph Allen, Mrs. M. Arnold, Mrs. J. C. Allen, Mrs. E. B. Taylor, Mrs. E. E. Girard, Miss Kirkbride, Mrs. J. K. Wallace, Mrs. O. Crease, Mrs. G. W. Terry, Miss G. Harrah; Board of Council, Rev. A. A. Rickert, Mr. J. C. Allen, Mr. W. H. Tilden, Hon. M. Arnold, Mr. G. Boyd, Mr. R. D. Jones, Mr. H. J. Smith, Mr. H. P. Taylor, W. A. Nichols, Esq., Rev. H. G. Batterson, D.D., Mr. W. H. Brown, Mr. Joseph Allen.

The Soldiers' Home was incorporated in 1864, and confined its benefits to the care of disabled soldiers, until the United States government made ample provision for them in the national homes, since which it has (in accordance with its charter) contributed to the relief, support, and education of the children of disabled soldiers.

Officers.—President, William H. Rhawn; Secretary, Edward S. Hall; Treasurer, Andrew Blair. Executive Committee, Walter Allison (chairman), James G. Hardie, Joel J. Bailey, Andrew Blair, Edward P. Kelly, Maurice H. Matsinger, Edward S. Hall (secretary). Board of Lady Visitors, President, Mrs. J. Bellangee Cox; Secretary, Miss E. W. Key.

Home for Incurables.—In 1877 a form of charity that had not been considered by persons of benevolent minds and feelings before that period, was brought into operation. Persons connected with the administration of the hospitals were aware of many cases of peculiar hardship connected with their management, and affecting patients who, after certain time of treatment in the hospitals upon charitable foundation, were determined to be incurable, and were of necessity discharged, because those institutions being established for the restoration to health of persons who were sick, there was necessity for the admission of the latter, and the incurable being beyond hope, their retention only excluded persons who might have been restored to conditions of health. On the other hand, many of the patients who were thus thrust forth had been respectable, industrious, and, in some instances, of commanding position, but reduced by misfortune to poverty. Their unfortunate condition had at length an influence upon the thoughtful, inducing the belief that a charitable institution of a new kind was necessary. This led to the establishment of the Philadelphia Home for Incurables in 1877. It was opened November 8th of that year, at No. 4800 Darby road, the object being stated to be "to provide a home for sufferers whose diseases are pronounced incurable." The home was originally opened in a fair-sized villa building, which has since been considerably enlarged by additions. In this form of relief the society was anticipated as to one form of disease by the Home for Consumptives, established by the Protestant Episcopal City Mission in March, 1876, and having its shelter at No. 411 Spruce Street, in the House of Mercy.

The Educational Home (Forty-ninth and Greenway Avenue), was incorporated November, 1871, to act in connection with the Lincoln Institution and for the care and education of orphan and destitute white children from two years old and upward. The building was opened December 1, 1873. When the boys arrive at twelve or thirteen years of age they are put at trades or other work.

Officers.—Board of Council, President, William Lippincott; Secretary, Franklin A. Dick; Treasurer, George T. Roberts. Officers of Board of Managers, Directresses, Mrs. J. Bellangee Cox, Mrs. Franklin A. Dick, Mrs. William Lippincott; Secretary, Miss Julia Rush Biddle; Treasurer, Miss Foster.

The Bedford Street Mission (No. 619 Alaska Street) was organized in 1853. It has under its management a day-school, Sunday-school, industrial school for girls, night's lodgings, free baths, distribution of food, etc. The objects of this mission are to thoroughly discriminate between the deserving poor and impostors and professional beggars; to prevent pestilence, and the spread of epidemics, by furnishing the means of cleanliness for persons and premises, and enjoining the use of the same; to educate the young in habits of industry, morality, and religion; and thus, by increased labor and contributions, not only to alleviate suffering and poverty, but to lessen the evils of pauperism.

Officers.—President, Charles Spencer; Vice-Presidents, William M. Coates, William L. Boswell; Recording Secretary, Edmund A. Souder; Corresponding Secretary, George Cuthbert Gillespie; Treasurer, Theodore Stan; Missionary, Rev. George W. Lybrand; Solicitors, W. W. Montgomery, Jerome Carty.

The Women's Bible Readers' Society.—This institution combines Christian missionary work with that of charitable relief. It divides the densely peopled parts of the city into eighteen districts, giving to each a reader and a superintendent, the latter being always a manager. The readers give their lives to

their work among the poor and suffering; the superintendents aiding them by counsel when it is needed, and by the supply of money, clothing, food, etc., necessary for the efficiency of their mission.

Officers.—President, Miss Anable; Vice-Presidents, Mrs. J. B. Dales, Mrs. M. Adams, Mrs. T. W. J. Wylie, Mrs. S. F. Ashton, Mrs. Charles Gibbons, Mrs. J. F. Page, Mrs. W. M. Elliott, Mrs. Alexander Whilldin, Miss S. G. Shipley; Recording Secretary, Miss M. A. Williamson; Corresponding Secretary, Miss B. L. Kennard; Assistant Corresponding Secretary, Miss S. E. Allen; Treasurer, Mrs. Henry Morrison; with a board of fifty directors.

The Moyamensing Soup Society (No. 926 South Eighth Street) furnishes to the deserving poor of the district during the inclement winter season a daily supply of nutritious bread and soup. The house was opened Jan. 9, 1882.

The American Sunday-School Union (No. 1122 Chestnut Street) was established in 1824, and incorporated in 1845. In the past fifty-eight years (1824–82) 71,775 schools have been organized by the American Sunday-School Union, with 456,120 teachers, and 3,038,605 scholars.

In addition to the Sunday-schools actually organized, the records show that by visits and words of counsel and encouragement, and gifts of books, papers, etc., assistance has been extended in 111,945 cases, representing a membership of 812,026 teachers, and 6,089,340 scholars. Amount expended in missionary operations (1824–82), $2,725,890, of which about $593,488 were for books, papers, etc., granted to needy Sunday-schools. Value of books, papers, etc., circulated by sales and grants (1824–82), over $7,000,000.

The Young Men's Christian Association (southeast corner of Fifteenth and Chestnut Streets) occupies a fine structure, four stories high, of sandstone, seventy-two feet front, with a depth of two hundred and thirty feet, and a tower one hundred and fifty-three feet high. The interior is fitted up with rooms for devotional meetings, lectures, and reading-rooms, lyceum, library for reference and circulation and other purposes. This association was instituted June, 1854, and incorporated June, 1854. It is composed of members of various Protestant denominations who are associated for the improvement of the social, spiritual, and mental development of young men.

YOUNG MEN'S CHRISTIAN ASSOCIATION BUILDING.

Officers.—President, Robert England; Vice-President, James M. Gibson; Treasurer, John S. Thackray; Secretary, Joseph C. Curry; Managers, Andrew M. Strang, Walter Scott, George Battise, John F. Rush, Henry Cummings, Benjamin S. Bown, Alfred Taylor, Samuel Tudor.

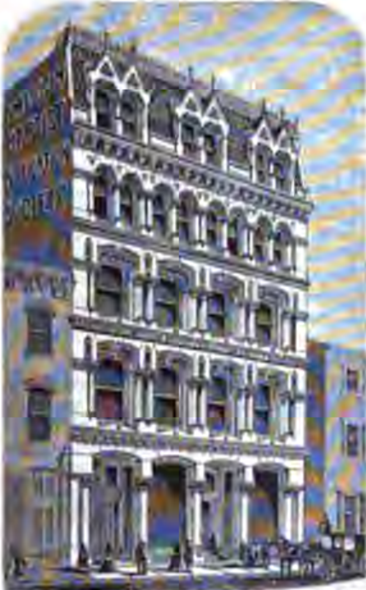
Officers.—President, John Wanamaker; Vice-Presidents, John E. Graeff, James Neill; Treasurer, Francis W. Kennedy; Financial Secretary, Thomas Marshall.

Digitized by Google

The Young Women's Christian Association was incorporated in 1871.

The Presbyterian Board of Publication was incorporated Feb. 14, 1837, and went into operation in 1838, on Sansom Street. A few years afterward it purchased a house on Chestnut Street, above Eighth, which was destroyed by fire, but rebuilt it of sandstone. The Presbyterian publication committee (New-School) was organized in 1852, and had its publication house on a portion of the present site. Upon the reunion of the Old and New Schools, in 1870, it was resolved to unite the two boards, and provide a larger house. The result was the construction of the present large edifice, Nos. 1334 and 1336 Chestnut Street, near Broad, of New Hampshire granite, with columns of colored and polished Aberdeen granite. It was finished in 1873, and is four stories in height, forty-four feet front, and two hundred and thirty-five feet in depth to Sansom Street. The house cost one hundred and thirty thousand dollars exclusive of furniture.

Officers.—Rev. W. P. Breed, D.D., president; Hon. Joseph Allison, LL.D., Rev. James M. Crowell, D.D., Rev. Thomas J. Shepherd, D.D., vice-presidents; Rev. William E. Schenck, D.D., corresponding secretary; Rev. John W. Dulles, D.D., editorial secretary; Rev. James A. Worden, secretary of Sunday-school work; John A. Black, business superintendent; Rev. W. M. Rice, D.D., recording clerk; and S. D. Powel, treasurer.



AMERICAN BAPTIST PUBLICATION SOCIETY.

The American Baptist Publication Society (No. 1420 Chestnut Street, between Broad and Fifteenth Streets) occupies a building of white marble, forty-six feet front, with a depth of two hundred and thirty feet to Sansom Street. It is four stories high, surmounted by a mansard roof.

The Evangelical Educational Society of the Protestant Episcopal Church (No. 1224 Chestnut Street) gives aid to theological students, and gives books, tracts, etc., to clergymen.

Officers.—Board of Managers, President, Hon. Felix R. Brunot; Secretary, Rev. Robert C. Matlack, D.D.; Treasurer, William C. Houston, Esq.; Rev. Thomas F. Fales, Mass.; William R. Lawrence, M.D., Mass.; Rev. William F. Watkins, D.D., N. Y.; James M. Brown, Esq., N. Y.; Rev. W. S. Langford, Elizabeth, N. J.; Rev. J. H. Eccleston, D.D., Newark, N. J.; Rev. J. E. Grammer, D.D., Baltimore; Rev. A. M. Randolph, D.D., Baltimore; Rev. Charles E. Murray, Del.; Edward Olmsted, Esq., Phila.; William P. Cresson, Esq., Phila.; Rev. Benjamin Watson, D.D., Phila.; Rev. D. S. Miller, D.D., Phila.; Rev. Richard Newton, D.D., Phila.; Rev. W. F. Paddock, D.D., Phila.; Rev. E. W. Appleton, D.D., Phila.; Rev. William N. McVickar, Phila.; Rev. W. W. Farr, D.D., Phila.; Rev. Augustus A. Marple, Phila.; Rev. J. Blake Falkner, D.D., Phila.

The Pennsylvania Bible Society was organized in 1808, and incorporated Jan. 10, 1810, as the "Bible Society of Philadelphia." By supplementary act, March 7, 1840, the title was changed to the Pennsylvania Bible Society. This is the first association founded in the United States for the purpose of publishing and circulating "the Holy Scriptures without note or comment." The society circulates gratuitously and by sale from seventy-five thousand to one hundred thousand copies yearly. At present the society occupies a brick building at the northwest corner of Seventh and Walnut Streets, which is also occupied by the Philadelphia Bible Society and the Female Bible Society.

Officers.—President, Rev. Bishop M. Simpson, D.D.; Vice-Presidents, Rev. Charles A. Hay, D.D., Rt. Rev. William Bacon Stevens, D.D., Hon. William Strong, LL.D., Rev. David R. Kerr, D.D., A. Updegraff, Esq., Rev. J. H. A. Bomberger, D.D., Robert E. Sellers, Esq., Rev. William P. Breed, D.D., Rev. Richard Newton, D.D., Samuel Small, Esq.; Corresponding Secretary, Rev. John W. Dulles, D.D.; Recording Secretary, Gustavus Benson; Treasurer, Benjamin C. Godfrey; Secretary, Rev. Irwin H. Torrence; Depositary, John P. Rhoads.

We have in the preceding pages of this chapter attempted to give a fair idea of the number and character of the charitable, benevolent, and religious institutions of Philadelphia. This city has always been justly famed for its public and private philanthrophy, and is distinguished among many other good things by a multitude of class or religious organizations, having for their sole object the relief of the needy, the destitute, and the suffering. The system of philanthropy that is now being carried out by the city in its official capacity, and by religious denominations, associations, and private individuals, is of the most disinterested and broadest character. Whenever the city was found to be in need of more extensive or general work, the citizens by spontaneous action and liberal charity have, at all times, and under all circumstances, fully met the requirements.

During the last fifty years immense progress has been made, not only in this city, but throughout the world, in the treatment of the unfortunate classes. A considerable number of the insane are cured and restored to society; the idiotic are much advanced in self-control and the use of their faculties; the blind, if not taught to see, are at least so instructed that they join steadily in labors for production, and obtain

Digitized by Google

much enjoyment from life; the deaf and dumb are taught to articulate so as apparently to be able to join in the business of the community, or they are so highly instructed in sign-language that they can form a social community of their own of culture, and capable of much social enjoyment.

The greatest practical advance in human methods, however, has undoubtedly been in the care of the neglected, exposed, and abandoned male and female children, as seen in the foundation of so many humanitarian institutions throughout the country, in the opening of innumerable mission-schools for poor and ignorant children, and in such extended original and successful labors for the prevention of childish misery and crime as exist in this city. Nothing is more characteristic of the barbarous period of society than its utter neglect of children; while, on the other hand, the highest attainment of social wisdom and the realization of Christianity are shown in the most watchful care for the young, and especially for the children of the unfortunate and the criminal. The culture of the young guards the future of society, and the prevention of misery and crime among children is a duty at once of economy and humanity. In no way can society save the vast losses it now sustains through pauperism and criminal offenses so well as by the care and education of the children of the most destitute classes. The extent and wisdom of this care are the measures of the civilization of a people. In this respect nothing can surpass the efforts of the charitable and benevolent associations of Philadelphia, in their spirit, their organization, and their success, and they compare favorably with any other humanitarian agencies that can be found in the United States.

Besides those mentioned, Philadelphia also contains the following charitable, benevolent, social, and religious institutions and associations:

Hestonville Relief Society, George Institute, 5100 Lancaster Avenue.

Sunday Breakfast Association, Eleventh and Wood Streets.

Female Episcopal Benevolent Society (Protestant Episcopal).

Female Hebrew Benevolent Society, 1411 Arch Street.

Female Association for Relief of Sick and Infirm Poor (Friends'), 152 North Fifteenth Street.

Presbyterian Board of Relief for Disabled Ministers, and the Widows and Orphans of Deceased Ministers. Office, 1334 Chestnut Street.

Ladies' United Aid Society of the Methodist Church, Thirteenth Street and Lehigh Avenue.

Musical Fund Society. Hall, Locust Street, above Eighth.

Nonpareil Typographical Society, 803 Locust Street.

Philadelphia Typographical Society, northwest corner Sixth and Walnut Streets.

Volunteer Firemen's Funeral Relief Association. Secretary's office, 511 South Fourth Street.

Society of the United Hebrew Charities, 325 North Fifth Street.

Preachers' Aid Society of the Philadelphia Conference of the Methodist Episcopal Church, No. 1018 Arch Street.

Society for the Relief of Ministers and their Widows of the German Reformed Church of the United States.

Passenger Railway Relief Association of Philadelphia.

Friends' Association for Relief of Sick and Infirm Poor, 152 North Fifteenth Street.

Fund for the Education of the Sons of the Clergy (Protestant Episcopal).

Ladies Depository Association, 1024 Walnut Street.

Western Association of Ladies of Philadelphia for the Relief and Employment of the Poor, 19 South Seventeenth Street.

Albion Society.

Cambrian Society and Welsh Benevolent Institute, southwest corner Twelfth and Filbert Streets.

Hildise Bund, 111 North Fifth Street.

Italian Society, Columbus Hall, Eighth Street, below Fitzwater.

Kosciusko Association.

Scandinavian Society, 347 North Third Street,

Scots' Thistle Society, 216 Pine Street.

Vlastimal Society, 347 North Third Street.

Children's Asylum, Philadelphia Almshouse, Thirty-fourth and South Streets.

Children's Week in the Country, No. 1112 Girard Street.

Girard College, Ridge Avenue, above Nineteenth Street.

Orphans' Home of the Shepherd of the Lambs, Bridesburg.

Home for the Moral Reform of Destitute Colored Children.

Children's Aid Society, 1602 Chestnut Street.

The Pauline Home for Pauper Children, No. 106 Penn Street, Germantown.

Preachers' Aid Society of the Philadelphia Conference of the Methodist Episcopal Church. Office, 1018 Arch Street.

The Education Society of the Philadelphia Conference of the Methodist Episcopal Church. Office, 1018 Arch Street.

The Philadelphia Conference Missionary Society of the Methodist Episcopal Church. Colson Hieskell, president.

The Ladies' United Aid Society of the Methodist Episcopal Church. Mrs. Bishop Simpson, president, 1334 Arch Street.

Penn Industrial Reform School.

Pennsylvania Society for the Prevention of Vice and Crime, 209 South Sixth Street.

Board of Public Charities of the State of Pennsylvania. Office 1224 Chestnut Street.

Germantown Poor-House, Rittenhouse Street.

Roxborough Poor-House, Yellow School Lane.

BENEFICIAL SOCIETIES.

Bank Clerks' Beneficial Association, southwest corner of Twelfth and Filbert Streets.

Book-Keepers' Beneficial Association, Twelfth and Filbert Streets.

Hunt Female Beneficial Association, 1137 Ogden Street.

Mercantile Beneficial Association, Mercantile Library Building, Tenth Street, above Chestnut.

Mutual Aid Association of Friends, Race Street, above Fifteenth.

National Beneficial Association, 462 North Fourth Street.

St. John's Young Men's Beneficial Society, Queen Street, near Sixth.

Young Men's Hebrew Association, Thirteenth and Arch Streets.

Free Sons of Israel, Magnolia Street, above Fifth.

Asbury Beneficial Society of the City and County of Philadelphia.

Expressmen's Beneficial Society of Philadelphia.

Female Hope Beneficial Society of the City and Liberties of Philadelphia.

Philadelphia Union Beneficial Society.

St. Mary's Beneficial Society of the City of Philadelphia.

St. Paul's Beneficial Society of Young Men of the City and County of Philadelphia.

Samaritan Beneficial Society of the City and County of Philadelphia.

Southwark Beneficial Society.

United Hebrew Beneficial Society of Philadelphia.

Hebrew Society for the Visitation of the Sick and Mutual Assistance.

Jefferson Assistance Society of Germantown.

Ladies' United Aid Society of the Methodist Episcopal Church in Philadelphia.

Keystone Mutual Beneficial Society, corner of Sixth and Vine Streets.

Independent Female Beneficial Association, Mechanics' Hall.

Rising Sun Beneficial Association, Mechanics' Hall.

Mayflower Beneficial Association, Mechanics' Hall.

St. Matthew's Beneficial Association, Eighteenth Street and Girard Avenue.

Unity Yearly Beneficial Association, northwest corner of Ridge Avenue and Wallace Street.

The Teachers' Beneficial Association of Philadelphia, Board of Education Building, Filbert Street, above Seventh.

WORKINGMEN'S CLUBS.

Epiphany Workingmen's Club, Market Street, below Seventeenth.

Franklin Workingmen's Club, 104 East Huntingdon Street.

Germantown Workingmen's Club, 4504 Germantown Avenue.

St. Mark's Workingmen's Club, southwest corner of Seventeenth and Kater Streets.

St. Timothy's Workingmen's Club and Institute, Wissahickon Station, Norristown Branch of Philadelphia and Reading Railroad.

Workingmen's Club and Reading-Room (Church of the Mediator), South Nineteenth Street, above Lombard.

Workingmen's Club and Beneficial Society of St. Peter's Church, 100 Pine Street.

Workingman's Club of Holy Trinity Parish, 2322 Market Street.

Progressive Workingmen's Club, 424 South Eleventh Street.

Workingmen's Club and Reading-Rooms of St. Luke's Church, 342 Dugan Street.

St. Clement's Workingmen's Club, 254 North Twentieth Street.

Blue Bell Hill Workingmen's Club, Old Township Line and Walnut Lane.

Mount Vernon Workingmen's Club, 1125 Mount Vernon Street.

Trinity Church Workingmen's Club, Forty-second and Woodland Avenue.

St. Mark's Guild, Frankford.

Friends' Association for the Free Instruction of Poor Children, Winslow Street, near Jacoby.

Friends' Association for the Aid and Elevation of the Freedmen.

Friends' Association for the Relief of Colored Freedmen.

Pennsylvania Society for Improving the Condition of the African Race.

Association of Friends for the Free Instruction of Adult Colored Persons, 304 Arch Street.

Orphan Education Society, under care of the Congregation Keneseth Israel, Sixth Street, above Brown.

Penn Sewing School (Friends'), Race Street, above Fifteenth.

West Philadelphia Industrial School (Roman Catholic), Pine and Thirty-ninth Streets.

FREE INSTITUTES AND LIBRARIES.

West Philadelphia Institute, northwest corner of Fortieth and Ludlow Streets.

Young Men's Institute, 232 Walnut Street, having charge of the following, viz.:

1. Mechanics' Institute, South Fifth Street, below Washington Avenue.
2. Moyamensing Literary Institute, corner of Catharine and Eleventh Streets
3. Philadelphia City Institute, northeast corner of Chestnut and Eighteenth Streets.
4. Spring Garden Institute, corner of Broad and Spring Garden Streets.
5. Kensington Literary Institute, corner of Girard Avenue and Day Street.

Sub-Primary School Society.

The Society for Providing Evangelical Literature for the Blind, 3518 Lancaster Avenue.

Bishop White Parish Library Association, 325 South Twelfth Street.

Churchmen's Missionary Association for Seamen of the Port of Philadelphia (Protestant Episcopal), northwest corner of Front and Queen Streets.

Indians' Hope Association (Protestant Episcopal) of Pennsylvania, 411 Spruce Street.

Indian Aid Association (Friends'), Race Street, above Fifteenth.

Locust Street Mission Association (Friends'), southeast corner of Locust and Raspberry Streets.

Board of City Missions of the Evangelical Lutheran Church of Philadelphia, 726 North Seventh Street.

Board of Trustees of the Howard Building, Bainbridge Street, east of Fourth.

Bishop White Prayer-Book Society (Protestant Episcopal).

Bible Association of Friends in America, 116 North Fourth Street.

Episcopal Female Tract Society Depository, 1226 Chestnut Street.

Female Prayer-Book Society, 719 Pine Street.

First-Day School Union.

Philadelphia Conference Tract Society, 1018 Arch Street.

Philadelphia Tract and Mission Society, 1224 Chestnut Street.

Society for the Increase of the Ministry. Under the auspices of the Protestant Episcopal Church.

Tract Association of Friends, 304 Arch Street.

Young Men's Christian Association of Germantown, Main Street.

Philadelphia First-Day School Association, Fifteenth and Race Streets.

Mutual Aid Association of Friends, Fifteenth and Race Streets.

Protestant Episcopal Sunday-School Association, 1102 Walnut Street.

Women's Auxiliary to the Board of Missions (Protestant Episcopal).

Society for the Promoting Christianity among the Jews (Protestant Episcopal).

Society for the Advancement of Christianity in Pennsylvania (Protestant Episcopal).

Flower Mission.

Germantown Flower Mission.

Beneficent Building Association, 619 Walnut Street.

Pennsylvania Colonization Society, 609 Walnut Street.

Pennsylvania Peace Society, 813 Arch Street.

Philadelphia Fountain Society. Office, 1512 Walnut Street.

Universal Peace Union, 813 Arch Street.

Church Temperance Society (Protestant Episcopal).

Home Teaching for Adult Blind.

CHAPTER XXXIX.

THE BENCH AND BAR.

We know not how old may be the expression that, ever since our childhood, we have often heard, even among uneducated persons, when reference was made to uncommonly subtle and difficult questions,—"That would puzzle a Philadelphia lawyer." But whoever has carefully studied the history of the bench and bar of this city has found why that expression originated; for during a period of very many years, not only since, but before the Declaration of Independence (in the year 1776), the bench and the bar of Philadelphia were above those of any other city in North America. For a long time the most populous in the country, near the centre of its population, the chief gathering-place for the councils of the several colonies, afterward the seat of the Federal government for a quarter of a century, Philadelphia became the cynosure that attracted far more than its proportional share of talent, learning, and enterprise.

The lawyer was not an object of solicitude to the founder of Pennsylvania. The people who came with him were opposed to litigation and to lawyers who were servants of litigation. The earliest legislation of the province was such as tended to discourage, and even prevent, the rise of the legal profession, as if it were hostile or at least hindering to civil and social progress. William Penn and Friends who came with him were influenced by this prejudice. In some respects a man of marvelous sagacity, a statesman, considering the examples of his times, of uncommon sense of justice and liberality, yet he dreaded the influence upon his proprietary rights and the fortunes of his family by the too early growth into importance of a class above a safe level of intelligence in the concerns of government. A judicature of some sort he could not fail to know

to be necessary for society, however peaceful and pious in its foundation. Yet he thought it prudent to organize it by placing at its head such men as Cousins Markham and Crispin, not too learned in the lore of courts, and especially men who would be faithful to himself, who was the chief fountain of all law in the province.

William Penn was a man who deeply, sincerely loved peace. It was his earnest desire that all disputes among his followers should be settled among themselves, either by private reference or at "meeting." Knowing this to be impracticable upon other than a very limited scale, he provided for the appointment of "peacemakers," who were to be arbitrators with the powers of judges and jurors to settle disputes. These means failing, he organized courts which were to be held in terror over those who had failed to "agree with their adversaries while in the way with them." It is interesting to contemplate the curious blending of the functions of government in these courts instituted by a man of great virtues and sagacity, yet not learned in judicial science, and jealous, perhaps unconsciously to much extent, of those who might be.

There was the Provincial Council, presided over by Penn himself, proprietary and Governor. This, also, exercised in some matters the functions of a High Court of Errors and Appeals. The following is a decree rendered in this court in an early case: The Court "advised them [the parties] to shake hands and forgive one another, and ordered that they should enter into bonds for fifty pounds a piece for their good abearance, which accordingly they did." The final order in the decree seems strange, considering how fair was the proprietary in his usual dealings. "It was also ordered that the records of the court concerning that business should be burnt." This action was prophetic of what was to be afterward when the press should make its first efforts to become free. The proprietary was desirous that whatever was discordant or unhappy in his government should be known as little as possible to the public, abroad or at home; that his administration, if not entirely peaceful, should at least appear so, except among the discordant and litigant themselves. His opposition to lawyers was owing as much, perhaps, as any other reason, to his apprehension of their fomenting litigation, and the publicity that would be given by their extravagant assaults and defenses of parties in judicial suits.

With the exception of this unreasonable prejudice, the earliest system of provincial jurisdiction was singularly good, consisting of that above mentioned, and those subordinate. Peter McCall, in his address before the Law Academy of Philadelphia, in 1838, thus speaks of that system: "The first organization of the courts was admirable for its simplicity and convenience. The County Court, in the days of Alfred and Egbert, a tribunal of great dignity and splendor, was drawn from the obscurity into which it had sunk after the Norman invasion, and was made the ground-work of the edifice. It was composed of the justices of the peace of the several counties, with an appeal to the Provincial or Supreme Court. The Provincial Court originally consisted of five judges. The members afterward varied from five to three, who went their circuits every fall and spring in each county. To it belonged the cognizance of the higher criminal offenses, and all appeals from the County Courts, both in law and equity. To complete the structure there were added the Quarter Sessions and Orphans' Court, and the Admiralty. Such was the plan of the judicial system established at the settlement of the colony; so simple, yet convenient in its arrangements, that though frequent alterations were made in its details by subsequent legislation, the general outline remains to the present day a standing proof of its enduring excellence."

As early as 1685 the county courts, which had theretofore been courts of law only, were made those of equity also, the same justices holding them, but when sitting in equity causes called commissioners. The proprietary and his Council held Admiralty jurisdiction until the year 1693, after which the judges of the Vice-Admiralty were appointed by the commissioners of the Admiralty in England, with commissions by the crown under the great seal of the High Court of Admiralty. In 1789 the Admiralty jurisdiction was vested by the Constitution of the United States in the United States District Courts.

Penn made whatever efforts that seemed possible of success to make the evil of lawyers, whom he could not but foresee would arise in time, as harmless as possible. In the year 1686 a law was made "for the avoiding of too frequent clamors and manifest inconveniences which usually attend mercenary pleadings in civil causes." By this law it was enacted that "noe person shall plead in any civill causes of another in any court whatsoever within this province and territories before he be solemnly attested in open court that he neither directly nor indirectly hath in anywise taken, or will take or receive to his use or benefit any reward whatsoever for his soe pleading, under penalty of £5, if the contrary be made appear." Before this, besides the right of all persons to "plead in their own cases," had been allowed that whenever not able so to do, "by their friends." A lawyer, therefore, might plead for the love but not the money of his friend, a rule that did not seem likely to produce very soon a very able bar. To prevent further litigation that might make necessary the employment of persons learned in the law, the arbitration law was passed in 1705, providing that parties having accounts to produce one against another may consent to a rule of court for referring the adjustment thereof to certain persons mutually chosen by them in open court, whose award, when approved of by the court and entered upon the record, should have the effect of a verdict given by a jury. This law was extremely popular

and was adhered to for many years subsequent to the war of independence.

Of the county courts there were three: the Common Pleas, Quarter Sessions of the Peace, and the Orphans' Court. Special Courts of Oyer and Terminer were held by judges specially appointed for that service from time to time, including almost always at least one of those on the Supreme Bench. Besides these was the City Court, consisting of the mayor, recorder, and aldermen, presided over by the recorder. As to the locality of what is known as *equity* jurisdiction apart from that of *common law*, it maintained during many years conflicts for independent separate existence.

In Pennsylvania there were courts before Penn. Forty years anterior to his proprietorship (1642) they had been established by John Printz, the Swedish Governor, at New Gottenburg, now Tinicum. This lawgiver had instructed his judges to decide all controversies according to the laws, customs, and usages of Sweden. The seat of justice was removed to Upland (since Chester) about twenty years afterward, the Dutch on taking possession of the country (in 1664) and the English (1672) having allowed, until Penn's accession, the magistrates to continue in office. In fact, for several years Upland Court was the superior tribunal which ruled in legal matters over all the territory upon the upper Delaware from Chester up to the falls.

Penn came to his office with his share of the notions of his countrymen who were unlearned in the law, about both the necessity of its being and of restraint upon the action of its officials. It is curious to contemplate how soon an able bar arose in Philadelphia, when we remember not only rules were made against their practicing in the courts for fees or rewards, but that for a long period none of them were placed upon the bench; and, further, that these courts, thus instituted, were partly judicial, partly executive, partly legislative; and, further, that their judicial functions were partly according to common law and partly to equity. To add to what now, at least, appears to have been confusing, some of the officials in one court had co-ordinate jurisdiction with those in another; for instance, the aldermen of the city sat in the City Court as associate judges, the recorder at the head, and such of those as were justices of the peace and of the courts assisted the other justices or judges in the Common Pleas, Quarter Sessions, and Orphans' Courts. *They were justices of the peace* who were commissioned as justices of the courts that held the county courts (Common Pleas, Quarter Sessions, and Orphans' Court) from the beginning as far as the Revolution; and before that time, certainly at least in the Court of Common Pleas, scarcely a single lawyer had ever been raised to the bench. As for the confusion concerning the exercise of equity jurisdiction, this arose, in spite of the fact that it was assigned by law to the Court of Common Pleas, from the lack of learning of all sorts among the early judges. We are informed that out of the act of 1701 that invested the judges of the Common Pleas with equity powers, arose speedily a dispute whether the Governor should or should not be chancellor.

Yet it is scarcely to be denied that this very confusion regarding the province of equity was a benefit to judicial legislation not only in Pennsylvania, but in other States which looked to Philadelphia when it possessed the most gifted examples, both upon the bench and at the bar. Except for a period of fifteen years (from 1720 to 1735) there never has been in the State a distinct Court of Chancery. Such a court was established during the administration of Governor Keith; but it was abolished after the brief period above mentioned. Under his influence the law had been enacted in the hope of settling forever the question of where was located the proper home of that jurisdiction that was intended to baffle the chicanery of lawyers, and mitigate the rigors of the common law. The Governor's proclamation regarding that court runs thus:

"A PROCLAMATION.—Whereas, complaints have been made that Courts of Chancery or Equity are absolutely necessary in the administration of Justice for mitigating in many cases ye Rigor of ye Laws, whose Judgments are tied down to fixed and unalterable Rules, and for Opening a way to the Right and Equity of a Cause, for which the Law cannot in all cases make a Sufficient Provision, Have, notwithstanding, been but too seldom regularly held in this Province in such a manner as ye Aggrieved Subject might obtain ye Relief which by such Courts ought to be Granted. And, Whereas, the Representatives of ye Freemen of this Province, taking the same into Consideration, did at their last meeting in Assembly request me that I would with ye Assistance of ye Council Open and hold such a Court of Equity for this Province. To ye end, therefore, that his Majesties' good subjects may no longer labor under those inconveniences which are now Complained of, I have thought fitt by, &c., with ye advice of ye Council, hereby to Publish and Declare, That with their assistance I Purpose (God Willing) to open and hold a Court of Chancery or Equity for this Province of Pennsylvania at ye Court-House of Philadelphia, on Thursday, ye twenty-fifth day of this instant (August), From which date the said Court will be and remain always open for ye Relief of ye subject, to hear and Determine all such matters arising within the Province afores[d] as are regularly cognizable before any Court of Chancery, According to ye Laws and Constitution of that part of Great Britain called England and his Majesties' Judges of his Supreme Court, as well as ye Justices of ye Superior Courts, and all others whom it may concern are required to take notice hereof and govern themselves accordingly.

"Given at Philadelphia ye tenth day of August, in the Seventh year of ye Reign of Our Sovereign Lord GEORGE, King of Great Britain, France, and Ireland, Defender of the Faith, &c., Annoq. Domini, 1720.

"God Save the King.

"WILLIAM KEITH."

The law enacting the establishing of this court was repealed, as we have seen, and since that time (1735) there has not been another. The sentiments of a large majority of the people of Pennsylvania, both as a province and a State, have been averse to a separate court of equity. Indeed, there is no need of such a court anywhere when equitable jurisdiction is imparted to common law judges with the caution which has been observed in the courts of this State. The time has long passed when decrees in equity can be rendered according to the individual notions of right and wrong entertained by presiding magistrates.

They are safe only when rendered, not in opposition to, but in analogy with the law, and in all possible harmony with it. The safest equity judge (judicial temper and integrity being not in question) is he who is at the same time the ablest, or would make the ablest, judge of a common law court. It is such as he who is the quickest to see wherein the common law is inadequate for all its behests, and is ready to employ those exceptional peculiar powers that are meant to supply what the common law lacks in the complete ascertainment of rights.

These preliminary observations seemed proper to be made before beginning with the long list of those eminent men for whom the bench and bar of Philadelphia soon became distinguished.

In a new community, settled and controlled by bold and thoughtful, though not learned men, what judicature is needed may afford to be simple in its inception. Very different were the variety, the subtlety, and the importance of civil suits in a city like London or Manchester, and in a town like Philadelphia two centuries ago. Here judges, if not learned in the law, were as learned as any, except an occasional lawyer, whose stock of learning could not be well increased without fees, with which to purchase law-books as well as bread. Such judges, in spite of their ignorance of legal principles and formularies, might sit upon cases that arose in a simple state of society, and give judgments that in the main would be satisfactory. As wealth and population increased, and labor and enterprise became diversified, there would arise those who were competent to conduct litigation multiplied according to the subtleties and necessities that would of necessity follow. There was sometimes one lawyer among the judges in the person of the recorder, who presided in the City Court. To this court belonged almost exclusively the trial of crimes committed within the limits of the city, so that the Quarter Sessions was relieved of the most disagreeable and difficult business that afterward befell that tribunal. The Common Pleas and Orphans' Court, and the Quarter Sessions, all served by the same judge, were occupied chiefly with executive, rather than judicial, concerns, such as laying out and working upon public roads, granting licenses, appointment of guardians, and other trusts, such as require not great learning in those who are chosen to discharge them. Then we should not forget the salutary influence of the "peace-makers." In a peaceful society the control that a few men, known to be upright, just, and benevolent, can exert is always very great, especially when the prevailing religious tone is one that inculcates quiet and friendship with peculiar stress. Some idea may be had of the amount of business transacted in courts when we are informed that the proceedings of every kind, during twelve years of the Orphans' Court, from 1719 to 1731, would fill not more than twenty or twenty-five pages of an ordinary 12mo printed volume. Then much of the business in criminal causes was the trial of petty offenses, as the utterance of oaths in the market-places and appearing upon the streets, whether in innocent mischief or not, of men and boys in women's apparel, the latter being pronounced in one instance by the good magistrate, who was horrified by the necessity of trying it, as an offense "against the law of God, the law of this province, and the law of nature, to the straining of holy profession and incoridging of wickedness in this place."

Notwithstanding such simplicity, it is surprising in what brief time came forward men who gave that rapid impulsion to bench and bar which made them easily take rank quite above those in any other American province. Most commendable is the pride with which the lawyers of Philadelphia, conscious of their value, have rescued from oblivion the names of those who have illustrated the history of their profession. The bar of Philadelphia rose into distinction so early after the settlement of the town, it was composed of men, some of them so gifted, both in genius and character, that it soon became a sort of guild, with a code of manners and deportment that was the more binding because unwritten, and its records were things too valuable for its members, living at any period of its existence, to suffer to be destroyed. If ever there was in this country an aristocracy of talent, the only aristocracy that ought to exist in any country, and that can exist in a country like ours, it was that of the bench and bar of Philadelphia for a hundred years, beginning in the first half of the last century.

The bench of Philadelphia began upon a basis of integrity and respectability. The men in the settlement who were most known for good character and good sense were appointed to the magistracy, and, except for the first prejudices against lawyers as a class, the early conduct of judicial administration might be regarded as nearly faultless as in its peculiar circumstances it was possible to be made. Even these prejudices were temporary, as they must necessarily have been when the increasing importance of the affairs of the province must demonstrate the indispensability of legal science in the ascertainment of disputes concerning individual rights and wrongs. Integrity and respectability, these were the first essential qualifications for a Philadelphia judge. But that such a fact has been often observed, it might not be believed how soon a man of good sense and probity may become a reasonably good judge of a court, even one of high jurisdiction. Law being, or aiming to be, at least, "the perfection of human reason," a man of good sense and probity, or such a man along with several others of his kind, by careful attention to his official duties, may himself be surprised to notice how soon he will become familiar, not only with the principles but the formulæ of judicial transactions. On the death or retirement of these early judges it became a habit of making records, in one form and another, at least in cases of special prominence, of

their peculiar points of excellence, a habit which, persisted in, has given to us that familiarity with the judicial history of Philadelphia that we value so much. For instance, Isaac Norris presided for a long time in the Quarter Sessions and Common Pleas, and was a member of Council for more than thirty years. Notice was taken of this judge, at the same time merchant, after his death, that took place in 1735, a part of which reads thus, "His great abilities in the discharge of his duty in each of these stations (judge and councilor) made him the justly esteemed, one of the most considerable, men in the government. His courteous deportment and affability gained him the love and respect of many. His quickness of apprehension, liveliness of expression, and soundness of judgment met and were remarkably conspicuous in this good man, nor did it appear that the age of sixty-four had impaired any of these valuable qualities. None were more frequently applied to for composing differences than Mr. Norris, and few succeeded better in good offices of this kind, his reputation for sense and integrity being so well established that both parties willingly submitted themselves to the determination of his superior understanding." Therein nothing is said of him as one familiar with legal decisions and principles. Yet such praise is wanting in nothing that would add to the reputation of a judge who was thus plainly shown to be sufficient for all the behests of the judicial offices that he had held during his life that was now passed.

We give here a copy of the *Precept* for the first court which was held in the city:[1]

"*To ye high Sherif of ye County of Philadelphia:*

"Nicholas More, Esq., &c., President of ye Free Socyety and Court of Justices.

"Thomas Ferman, Esq., and one of ye Justices of ye Peace.

"Lawrence Cock, Esq., and one of ye Justices of ye Peace.

"Three Justices of ye King shall keep ye Peace in ye County of Philadelphia, and they that are appointed shall hear and terminate divers ffelonies, transgressions, and other wicked deeds being committed in ye County aforesaid, vizt. We do command through all ye parts of ye same County aforesaid, and in ye authority of ye King, that thou mayest go thorow it and Cause to come before us or our Companions, ye Justices of ye Peace in Philadelphia ye Eleventh day of ye Eleventh month alias January att ye Blew Anchor, att 10 of the clock, such twenty ffoure honest and lawfull men of ye County and twenty-ffoure *Milites et al. provos et legaces homines de Corpore Com.* and other honest and lawfull men of ye body of ye County, whosoever they be, and that have possessions and be ffree Indwellers to Enquire in and in ye place concerning these things wch shall be Commended you of ye King aforesaid: also yee must cause all Crowners of ye County Marshalls, Constables, and other officers of ye County, to Know it that they are then, att that time to know and to fill up those things wch they must do by reason of their offices. Moreover, thou must cause to be proclaimed in all ye County and privilege, and in fitt places, that ye sessions of ye Peace shall be held att ye day and place beforesaid, and that thyselfe must be there to know and perform those things wch belong to thy office: and thou must have so many names of witnesses, Crowners, Marshalls, Constables, &c., as is required by precept.

"Dated under our seales ye 2d January, 1682–83.

"N. MORE [SEAL]
"THO. ffarman [SEAL]
"LASSE COCK. [SEAL]"

Each of these seals has impression of the coat of arms of the signer. On that of Nicholas More is a shield of four quarterings, the first and fourth, four bars (barry), second and third a lion rampant, crowned, crest, a ducal coronet: the shield surrounded by olive branches. That of Thomas Fairman (ffarman, he writes himself) has a shield having a chevron with two squirrels above and below it. That of Lasse Cock has a pelican on her nest in a circle, feeding her young with blood from her breast.

We should have a very large amount of these records of judicial proceedings, but for the carelessness of the janitors of the court-house buildings, to whose custody in the early part of this century they were assigned by the county commissioners without strict instructions as to their safe keeping. Some of these persons, it was afterward ascertained by a member of the bar, were in the habit of kindling the fires of the court-rooms with them. Some of the most curious and interesting that remained were rescued, and afterward bound in a volume by the Historical Society of Pennsylvania.

Here follow copies of some presentments:

"PHILADELPHIA, *ss.* We, the Jurors for this City, doe present Philip Kilbeck, of Chester County; for that on the twenty-third Day of this instant, at night, at the house of Margaret Garret, in the front Street, in Philadelphia, aforesd, did then and theire mennace and threaten herman Debick, by drawing his bayonet and making a pop at him, the said herman; and at the same time and place abovesaid did other three curses to the terrifiding of the said herman and other the Queen's Leige people, contrary to the laws in that case made and provided. Signed in behalf of the Rest of the Jurors this 28th day of the 7th mo., 1702, pr.

"JOHN PSONS, *Foreman.*

"Appears and submits, and puts himself in mercy of the Court.

"Kilbeck for breach of the peace and three curses, xxx s."

Another reads thus:

"PHILADELPHIA, the 3d day of the 9th Mon., 1702.

"Wee, the Grand Inquest for the body of this city, do present Thomas Mattocks, of Philadelphia, Butcher, for drunkennes, & particularly upon the twenty-fourth day of the Eighth month, he, the said Thomas Mattocks, was drunk in the market-place of this city. Sined in behalf of the said inquest by JNO. PSONS, *forman.*

"Wee also present George Robinson, of Philadelphia, butcher, for uttering a grevious oth on the thirtieth day of the seventh month last, another oth the tenth day of the eighth month last past in Philadelphia, aforesaid. Sined in behalf of the said inquest by JNO. PSONS, *forman.*

"Submitts. Whereupon the Court fines him XII S. for the sd oaths, it being the 2nd offence, & orders him to be discharged, the Court paying his fees."

The third is,—

"The 4 of ye 12 month, 1702.

"We, ye Grand Jury of ye City of Philadelphia, present Sarah Stivee, wife of John Stivee, of this city, for being dressed in men's cloathes, contrary to the nature of her sects, and in such disguises walked through the streets of this city and from house to house on or about the 26th of tenth month to the grate disturbance of well-minded persons and incoridging of vice in this place; for this and other like enormities, we pray this honorable Bench to supress. Sined in behalf of the rest, ABRAHAM HOOPER, *forman.*"

[1] This precept illustrates plainly one of the most confusing peculiarities of the early period, viz.: the carelessness which prevailed as to the proper spelling of Christian names and surnames. It seemed to be a privilege to spell a name in any style, and to vary it with each repetition. Thus Thomas Fairman is called in this writ *Ferman* and signs it *ffarman.* *Lawrence* Cock signs his name *Lasse*, and we may add that it was frequently spelled *Lars.* This will account for different methods of spelling names to be found in this work, which could not be avoided sometimes by reason of contemporary errors and differences.

Yet another of the same date,—

"We, of the Grand Jury for the Citty of philadelphia, Do psent John Joyse for having of to wifes at ouce, which is boath against the law of God & man."

It is usual in the lists of appointments of attorney-general of the province of Pennsylvania to place the names in order of appointments, thus: "1683, 8th month [October] 6th, John White; 1686, Jan. 16 [new style], Samuel Hersent; 1686, 2nd mo. [April], David Lloyd." It is doubtful whether these assignments are correct. John White was appointed, according to the minutes of the Provincial Council, "Attorney-General to plead the cause between Our Propr & Govr and Char: Pickering & Samuel Buckley." The appointment was for a special object, and related to a prosecution in Philadelphia only.

Samuel Hersent, "appointed 16th of 11th Mo. (Jany), 1685–86," might or might not have been a lawyer. He was sheriff of Philadelphia at the time, and his authority was somewhat special in character,—"To prosecute all offenders against Ye penall Laws of this Province & to search for those Yt are on Record Convicted, & prosecute them if Yt have not satisfied Ye Law." At the next meeting it is said,—"Samll Hersent, Atturney for Ye *County of Philadelphia* was attested in Yt Office." In the minutes of 1st of second month (April), 1686, the commission of Hersent was called for and was found to be "Impowering him to be Atturney for Ye County of Philadelphia to prosecute all offenders that break Ye penall statutes of this Province." . . . "It was put to Ye Vote whether a Sheriff should be an Atturney in the same Court he is Sheriff: Was carried in Ye negative, *nemine contra dicente*, with an Order thereon to be made." From this it is doubtful whether Hersent ever was attorney-general of the province. His duties seem to have been as prosecutor for the city and county of Philadelphia.

At a meeting of the Council on the 5th of the Sixth month (October), 1686, "David Lloyd Presented his Commission, given him by Ye Govr, bearing date Ye 24 of Ye 2nd Mo., Apll, 1686, Constituting him Atturney Genll for this Province and Territorys, To wch he was Attested, Declaring his Allegiance to Ye King, Fidelity to the Govr & Governmt, and faithful performance of his Office." This commission came from Penn himself, who was generally called the "Govr." Lloyd seems to have been the first attorney-general appointed for the province, and was therefore independent of Council. He held other offices at the same time. Lloyd arrived in Philadelphia in the ship "Amity" on the 15th of the Fifth month, 1686, and must have received his appointment from Penn in England. In 1789, Lloyd was clerk of the County Court of Philadelphia, of the Provincial Court, and deputy clerk to Thomas Lloyd, master of the rolls. In that year he came under censure of the Council for having refused to produce the records of court before that body. The Council voted that he was "unfit to be a public clerk or public officer of record before any court in this government," and that he stand discharged therefrom till upon acknowledgment of his offense and giving the Council satisfaction the Governor shall think fit to commission him again. James Claypole was appointed in his stead, but David Lloyd refused to give up the records to him, and immediately afterward Thomas Lloyd, who was master of the rolls, appointed David Lloyd deputy clerk of the County Court, a proceeding which caused great dissatisfaction in the Councils, the members of which looked upon the transaction as a contempt of the Governor's authority.

On the 19th of May, 1698, John Moore was appointed attorney-general. He was at the time attorney-general for the king and prosecutor in the Admiralty. At first he refused to accept the office under the province, but afterward accepted that appointment (first Logan Papers, p. 60). After David Lloyd ceased to be attorney-general he became quite conspicuous in the political affairs of the province. He was elected member of the Assembly for Philadelphia County in 1701, and was Speaker at the session of 1703, and continued to be re-elected and hold that office until and including the sessions of 1709–10. He was also a member for the county at the session of 1711–12. He removed to Chester, it is supposed by Dr. Smith, in 1710, but it is doubtful whether he was a permanent resident before 1712. During his term in the Assembly Lloyd was at the head of the anti-proprietary party, particularly in the disputes with the Assembly. He drew and signed the address to the proprietary in 1704, which was so offensive to Penn that he sent over from England directions that Lloyd as a signer of the address should be prosecuted for high crimes and indicted. This was not done, probably through the exercise of discretion by James Logan, who had the direction of Penn's affairs, and was already in hot water in consequence of previous disputes. In 1718, Lloyd was appointed chief justice of the Supreme Court, and was reappointed in 1726. On the 4th of February, 1731, the Council declared that he was "unfit to act." He died on the 5th of April, aged seventy-eight years. Lloyd was born in the year 1656, in the parish of Manavan, in the county of Montgomery, North Wales. His first wife, Sarah, was born at Cirensister, Gloucestershire, England. She came with him to America, but died some time after her arrival. Lloyd married for his second wife Grace Growden, who survived him.[1]

Edward Shippen was a native (born 1639) of Yorkshire, where his family, having removed anciently from Cheshire, had for a long period their ancestral hall,—Hellham. He emigrated, in 1668, to Boston,

[1] Lloyd erected at Chester the fine old mansion "Green Bank" in 1721. In after-times it was the residence of Commodore David Porter, of the United States navy, and is still called Green Bank. Grace Lloyd, his second wife, died in 1760 at an advanced age, probably ninety years.—*Martin's History of Chester*, p. 80.

where in mercantile pursuits he in a few years accumulated a fortune of ten thousand pounds. A member of the Church of England, he married Elizabeth Sybrand, a Quakeress, and adopted her faith; and during several years bore courageously his part of the persecutions inflicted on that sect by the Puritans. On the appearance, in 1693, of a meteor in the heavens, over Boston, the authorities there, supposing that they were threatened with the vengeance of heaven for their mildness in the punishment of Quakers and Baptists, turned upon them such vials of wrath that Mr. Shippen was driven to seek a home in the city of Penn. But before he left Boston he erected a monument, which he in vain endeavored and hoped to make enduring, near what he styled "a pair of gallows, where several of our friends had suffered death for the truth, and were thrown into a hole." He soon acquired by his wealth and character so high a position in his new home that he was elected (1695) Speaker of the Assembly, and made by popular vote, the next year, one of the Provincial Council, and returned to the same office at several successive elections. In 1700 he was nominated to the same board by Penn, and became one of the justices of Philadelphia County, and afterward the first mayor of the city. For a while he was at the head of the government, and was made one of the judges of the Provincial Supreme Court. His marriage (for the third time) led to his separation from the Quakers. He died in 1712. He was distinguished proverbially (says Keith, Provincial Council) for three great things: "the biggest person, the biggest house, and the biggest coach." His country-house stood at what is now the southwest corner of South and Broad Streets.

James Logan was a descendant of the Baron Logan, of Restalrig, Scotland, whose property was confiscated for connection with the Gowrie conspiracy in the reign of King James VI. His father, Rev. Patrick Logan, became a Quaker, and afterward removed to Bristol, England. His son James was born at Lurgan, County Armagh, Oct. 20, 1674. He had begun a successful mercantile career, when he accepted the invitation of William Penn to accompany him, as secretary, to Pennsylvania. An amusing anecdote is told by Keith about this voyage. "On the way over the ship was attacked by pirates, and Logan took part in the defense of it, while Penn, the stancher Quaker, perhaps a Quaker by conversion, while Logan was only a Quaker by birth, retired down below. The pirates were beaten off, after which Penn expostulated with Logan for engaging in battle. Logan replied that if Penn had disapproved, Penn being Logan's master, should have ordered him down."

On their arrival in Philadelphia, Penn appointed him secretary of the Council, and two years afterward, on his departure for England, made him one of the commissioners of property and also receiver general to collect quit-rents, look after fines and perquisites, discharge debts, and pay officers for whose salary provisions had not yet been made by the Assembly. Henceforward Logan became the general business agent of Penn during his lifetime, and of his family after his death, being appointed to the last position by will. He was elevated to a seat in the Council in 1704. Disputes had arisen during the proprietary's first sojourn in his province, on the one side with the officers of the crown on several subjects, and with the poorer sort of Quakers, on the other, about quit-rents. Of the three Deputy Governors who administered the government after his departure, Evans, Gookin, and Keith, not one was competent for the embarrassments of the province. Logan, honestly and ardently devoted to the interests of his employer, was yet haughty and aristocratic in tone and bearing. The lapse of Evans while Deputy Governor into licentiousness, and his continual disputes with the Assembly, were employed by David Lloyd to incite the Quakers generally against him and the government. So fierce was the resentment against Logan, who was secretary, that the Assembly presented articles of impeachment against him. The defiant attitude of Logan, united with the Governor's decision that he had no right to try impeachments, exasperated the Assembly to that degree that they ordered the sheriff of Philadelphia to arrest him while on the eve of his departure for England, and hold him in prison until he should recant some of the invectives which he had thrown upon several of its members. But the sheriff dared not obey a mandate so evidently unlawful, especially when directed against one in whom he knew the proprietor had such confidence, and the secretary was allowed to go away without molestation.

He remained abroad about a year, and upon return was made one of the proprietary's attorneys for the sale of lands in order to pay the debts in which the province had been involved. At the accession of King George I., Deputy Governor Gookin having charged Logan and the Quakers with being not faithfully disposed toward the new government, he was removed by Logan's solicitation, and Keith substituted in his stead. An accomplished, able man was Keith, but of a will too ardent for the safe guidance of such a government. It was during his administration that the first paper currency was started in the province, and it was through his influence that a militia law was passed, as well as one for the establishment of a separate Court of Chancery, which we have seen had an existence of only fifteen years, destined after its abolishment never to be revived. Keith was ever disposed to question the authority of the Provincial Council, as it was not recognized, he contended, in the charter of 1701. Logan and the Council were indignant that their views were so little consulted, and on one occasion, with a majority of the members present, left the meeting, whereupon the Governor, with the few that were left, passed the bills, and Logan was shortly afterward removed from the office

of secretary. Penn died in 1718, having appointed by his will Logan as trustee of all his possessions in America, and Hannah Penn constituted him one of her attorneys. He became mayor of Philadelphia in 1723. After this he made a visit to England for the purpose of laying before Hannah Penn his complaints for the treatment he had received from Keith, and returned with a letter from her to the Governor ordering him not only to restore Logan to the secretaryship, but to be controlled by him in the general management of his office. A fierce conflict arose. The Governor was defiant, and the Assembly was in accord with him until it was rumored that the wishes of Logan and the widow had prevailed at court, when the Assembly were not slow to leave the Governor to fight the battle alone. In 1726, Patrick Gordon arrived with a commission from the Penns that had been confirmed by the crown. Logan was not only restored to the office of secretary, but made one of the justices. In 1731 he became chief justice of the Supreme Court. Lieutenant-Governor Gordon having died in 1736, the office of president of the Council devolved upon Logan as senior member. This created him chief magistrate of the province until the arrival of the new Lieutenant-Governor, George Thomas. Logan had refused the offer of Lieutenant-Governorship on account of the troubles he had had with the question of the boundary lines between Pennsylvania and Maryland, and his having been ordered by the government in England to cease to meddle in that dispute until having received further and definite instructions from thence. After the coming of Thomas he retired from politics, and spent the remainder of his life on his estate, "Stenton," near Germantown, dying in 1751.

The government of Pennsylvania and the society of Philadelphia had never had an officer more vigorously active in the various services in which he acted during all the years from his first arrival to his retirement. He found time amidst his public duties and devotion to his mercantile and other private interests to pursue studies both in science and literature. He contributed papers to the Philosophical Transactions on Lightning. Several of his written productions were published in Europe, as "Canonum pro Inveniendis Refractionum," "Epistola ad Joannem Albertum Fabricium," "Demonstrationes de Radiorum Lucis." He established for the benefit of the people of Philadelphia a free library, and gave a lot and one thousand pounds' value of books. He also erected a library building that he designed to add to this gift, but died before the deed was executed. This was the beginning of the Loganian Library. He, while chief justice, translated the "De Senectute" of Cicero, and the "Disticha" of Cato. He was one of the trustees named in the deed by which the meeting-house of Whitefield was given for an academy, destined in time to become the University of Pennsylvania.

As early as 1690 young Isaac Norris, the first representative of this family in American history, was sent by his father, a Friend, who had recently settled at Port Royal, in Jamaica, to Penn's new colony, in search of a fresh resting-place for his family, but upon his return to that island to report his views of this unfamiliar province, he was saddened by the tragic news that his father and all his family had perished, with their possessions, in a frightful earthquake, which had devastated Jamaica while Isaac was on his journey.

Returning to Philadelphia in the year 1693 he soon rose to power and fortune, one of his first steps in the direction of those goals being his marriage, in 1694, with Mary Lloyd, whose influential and well-known father, Thomas Lloyd, was president of the Provincial Council and a man of mark in the new-founded town.

Isaac Norris adopted mercantile pursuits as his business, and in them he seems to have attained large financial success at a time when he was still young in years. About 1706 he made the then unusual journey to England, where he became well acquainted with William Penn, whom he helped to release from the jail, where his creditors had placed him. While there he was hospitably received by his wife's family, the Lloyds of Dolobran, but whether this visit abroad was one of business or of mere pleasure is not now apparent.

In the investment of the moneys which he amassed in his business Mr. Norris showed sagacity. Evidently believing that there was a great future for the young colony, he bought largely of real estate, beginning such acquisitions in 1704, and continuously adding to them hereafter. At one time he owned about eight thousand acres on the east bank of the Schuylkill, situated in and about the present borough of Norristown, for which he seems to have paid some nine hundred and twenty-five pounds Pennsylvania money, or about two thousand five hundred dollars. His town residence was what was well known as the "Slate-Roof House," on Second Street, below Chestnut, but the purchase which is most nearly connected with his name was that of "Fair Hill," an estate of some six or seven hundred acres in the old township of Northern Liberties, but now in the well-settled limits of the city. This, in the latter years of his life, he used as a quiet country home, remote from the noise and bustle of the steadily-growing capital, where he could free himself from the cares of business and of politics.

With the latter, far more simple and unpretending then than now, Isaac Norris became early connected. He was many times elected to the Provincial Assembly, noted above those of its sister provinces then and at all times for its fearlessness and independence. More than once he presided over it as Speaker. In 1709 he was appointed a member of the Governor's Council, and at various times he held other impor-

tant and responsible public offices, both elective and appointive, which facts certainly testify to the high esteem in which he was held, not by the Governors only but by the governed.

In June, 1735, while attending the Friends' Meeting at Germantown, he died suddenly, aged about sixty-six years, having had many children, most of whom survived him. Among them was a daughter, Hannah, married to Richard Harrison, of Maryland, whose daughter, also named Hannah, afterward married Charles Thomson, celebrated in Revolutionary times as the upright secretary of the Continental Congress.

Isaac Norris, son of the former and second of that name, was very prominent during a long life in our provincial politics. Born in 1701, he early became a merchant, continuing in business until about 1742, but always devoting a portion of his time to public affairs. He was much looked up to as an authority upon all points of trade and finance, and his opinion on such matters seems to have been often sought by those in authority. In 1739 he became the recognized leader of what was known as the "Quaker party," who opposed the proprietaries in more ways than one, antagonizing them especially by the curious and memorable opposition to all acts of war, even defensive, on the part of the colony.

Party feeling often ran high in those days, and the disputes between the Governor's party and Norris and his friends spread from the Assembly chamber to the streets, and if the Quaker drab covered meek hearts, it none the less clothed gallant ones, which brooked no wanton injury, so that when, in 1742, an attempt was made to defraud Mr. Norris of his election as a member of the Legislature, actions spoke louder than principles with his Quaker supporters, and so serious a riot resulted that it was always thereafter known as the "bloody election."

It was this Isaac Norris who, appointed by the Governor in 1745 a commissioner to represent his province at a conference held with certain Indian tribes at Albany, undertook the long and tedious journey to that place, and has left an interesting diary of the incidents of his trip. So changed are all the methods of life in the one hundred and thirty-nine years since Isaac Norris wrote this that it seems difficult to comprehend the fact that, though he did not tarry by the wayside, it took him six days to accomplish what the modern traveler can complete in about the same number of hours. Nor was his return speedier, though it, too, was as direct as the ordinary means of travel could make it.

The result of the conference was inconsequential, but it was an interesting incident, and one which at that early day would in itself suffice as a foundation for a whole lifetime of anecdote. Ten years later he was again appointed commissioner for the same purpose, but of this trip there remains no personal record.

Mr. Norris was in 1751 elected Speaker of the Assembly, the same office which his father had held before him, and which he himself filled for many years. He was always a sturdy opponent of the Penns and of the policy which they sought to force upon their colony. He died in 1766. In 1739 he had married Sarah, daughter of James Logan, and their daughter Mary subsequently married John Dickinson, well known in after-days as a patriot and a statesman. He left no surviving sons.

His brother Charles, son of the first Isaac, was born in Philadelphia in 1712, and became a prominent and wealthy merchant, residing on the then outskirts of the city, where the United States Custom-House now stands. His plans in life seem to have led him into quieter paths than those trodden by his father and his elder brother, for he is but little heard of in politics or public affairs, though he was at one time a trustee of the general loan office, and was always much interested in promoting the welfare of the Pennsylvania Hospital from its earliest foundation. He was twice married, and by his second wife, Mary, daughter of Joseph Parker, of Chester County, he left four children to survive him when he died, in 1765.

Of these children the third, Joseph Parker Norris, was born May 5, 1763. He was educated at the school of Robert Proud, the historian, with whom he subsequently had very friendly relations. In 1790 he married Elizabeth Hill Fox, daughter of Joseph Fox, who had succeeded his uncle, Isaac, as Speaker of the Assembly. For quite a number of years Mr. Norris was president of the Bank of Pennsylvania, and was at all times much considered and respected. He died in June, 1841, leaving many children, to whom he left his large landed estates, devising "Fair Hill" in trust for his sons and "Sepviva" for his daughters.

The fifth of those sons is the present Isaac Norris, the fourth of that name. Born in his father's house, on Chestnut Street, below Fifth, on the 21st day of February, 1802, when that part of the city had still rather a rural look, he was liberally educated at private schools and at the University of Pennsylvania, from which latter institution he was graduated bachelor of arts in the year 1821.

Choosing the law as his profession, Mr. Norris studied in the office of Joseph R. Ingersoll, and was admitted to practice Jan. 15, 1825. At present (January, 1884) he stands third on the list of living Philadelphia lawyers, James J. Barclay, admitted in September, 1815, and Eli K. Price, in May, 1822, alone outranking him in seniority, after his fifty-nine years' experience.

Until the death of his father, in 1841, he devoted himself with much success to the regular practice of his profession, achieving position and standing by his assiduity. Since that time his intimate connection with the "Fair Hill" property, at first as counsel and later as trustee, has compelled him to relinquish the ordinary pursuits of a lawyer, and to devote himself almost exclusively to the large landed interests

which were intrusted to his care. How thoroughly he has done this, and how admirable his management has been, those best know who have benefited by his industry and prudence, but the difficulties of handling so vast a piece of property can only be fully appreciated by the practical real-estate man, who has had similar charges on his hands.

When Joseph Parker Norris died, a little over forty years ago, this "Fair Hill Estate," which had descended to him from the founder of the family, was still what it had always been, a suburban residence. The old house, built in 1718, and in its day a very grand edifice with its front of sixty feet, had been burned by the British during the Revolution, but it had been restored, and though the city was fast circling about it, there it still stood surrounded by magnificent forest and evergreen trees. The entrance to the place was from the Germantown road, and the drive led through an extensive lawn, past pleasure grounds, green-houses, gardens, fish ponds, and walks, all celebrated in their time as models of grace and beauty.

The house in its day saw many distinguished guests. John Dickinson lived there at the time the Continental Congress met at Carpenters' Hall, in 1774, and doubtless invited many of the distinguished men who formed that body to share his hospitality. John Adams, the future President of a then unborn republic, records in his diary that he dined there in that year.

It was at "Fair Hill," too, tradition has it, that the first willow-trees ever seen in the province were grown. The story runs that Benjamin Franklin observed a twig sprouting in a basket newly landed from the hold of a ship, and presented it to Miss Debby Norris, a daughter of the elder Isaac, who carefully nursed the unknown growth.

This family estate Joseph Parker Norris devised in trust for the use of his sons, having provided for his daughters by leaving them other lands in the same neighborhood. It consisted of some six hundred and fifty or seven hundred acres in all, each of which had cost, when purchased, the equivalent of some eight or ten dollars. The city was rapidly encroaching upon it, and it was almost the last, if not the very last, pre-revolutionary country home which had warded off the assaults made upon it by the needs of an advancing, growing, and manufacturing quarter of the city.

It had been the desire of the devisor that none of this land should be disposed of until his youngest grandchild (then unborn) should reach legal age, but it was found impossible to comply with this. Streets were pushed through the quiet fields, paved and cobbled in approved Philadelphia fashion, and the demand for the land upon which to build homes for the workingmen of the neighborhood soon became so imperative that it was necessary to yield.

The eminently judicious plan of selling upon ground-rent was finally adopted on the advice of Horace Binney, as a preferable way of disposing of the estate, and has since been followed. While much of the land still remains in the possession of the family, very much more has been sold, and that which was the retired plantation of the first Norris, has now become the home of thousands of the well-to-do mechanics and tradesmen of the Nineteenth and Twenty-fifth Wards, and through the once quiet fields and woods of the estate there now run more than forty miles of busy city streets.

In all ways a public-spirited citizen, Mr. Norris has especially shown himself to be so in connection with "Fair Hill," having always been foremost in there promoting improvements of a beneficial public nature, and the city itself has vastly benefited by the increased population (with consequent enormously increased values) drawn to "Fair Hill" by the liberal policy of its owners.

Mr. Norris' skill and large grasp of business affairs have been appreciated by others than his family, and he has not always been allowed to devote his knowledge solely to his own relations. When the whole financial world was startled, ten years ago, by the unforeseen failure of Jay Cooke & Company, and when that great firm was forced into bankruptcy, Mr. Norris was called upon, as representing one of the creditors, to help take charge of the broken estate and to lend his knowledge to assist in extricating those who had gone down with the ruins of the house. How well the trustees did their work is now a matter of history, and it is sufficient to note Mr. Norris' connection with that event.

Through his long life Mr. Norris has always taken an interest in the various public institutions, charitable and otherwise, scattered through the city. He has never sought nor held political office. Since its formation he has been an active and interested member of the Republican party, always supporting its worthy nominees by his vote and influence, and upon more occasions than one he has done that highest (and to some most unusual) duty of the voter, attended primary elections with a view to secure proper and fitting candidates.

In May, 1830, Mr. Norris was married to Mary, daughter of George Pepper, Esq., a well-known citizen. Mrs. Norris died in 1862. He has had seven children, three of whom are dead; the others, three sons and one daughter, are all married and have children in their turn.

In person Mr. Norris is tall and well proportioned, and his figure, little bent by his more than fourscore years, is a familiar sight to many, and one always greeted with respect and esteem as he daily goes to his office, still devoted to his life-long task with its large and responsible transactions.

Prudent, firm, and decided in character, he has always been affable, kind, and dignified, and, like his ancestors, he has ever been esteemed and honored by all with whom he has been brought in contact.

Isaac Norris

Andrew Hamilton is one of the most illustrious names in the provincial history of Pennsylvania. There was a mystery concerning his origin and early antecedents that has never been cleared. Only conjectures could be indulged about the confusion of the name *Hamilton* with that of *Trent*, which he sometimes bore, and which, was often said, was the one to which he was really entitled. His eminent abilities, the dignity of his carriage, the courage with which he maintained his convictions upon the subjects of right and liberty, given to public exhibition not very long after his first appearance in humble guise, have led some to suspect that for some political or other reason he had fled from his native country, Scotland, and, while yet calling himself occasionally by his paternal name, had adopted the other, or been heard to say that it was his real name, in order to avoid identification and pursuit. Some, indeed, went so far as to connect him with the duke of the same name, who had fought a duel with Lord Mohun. Many inquiries, after his death, were made about his family, but none were ever satisfactory, except that he was known to have been born about the year 1676, and when about of age came to the county of Accomac, on the eastern shore of Virginia. In one of his addresses before the Assembly of Pennsylvania, after he had become famous, he made that celebrated eulogy in which, among other things, he spoke of "Liberty, the love of which, as it first drew to, so it constantly prevailed on me to reside in this province, though to the manifest prejudice of my fortune."

A. Hamilton

When he arrived at Accomac County he gave his name as Trent. Shortly after his arrival he opened a classical school, and was afterward employed as steward upon a plantation. On the death of the owner he married his widow, and, removing to Chestertown, in Kent County, Md., began the practice of the law. How it was that he went to England not long afterward it has not been told, but it appeared that he was admitted to the bar of Gray's Inn, London, and in the winter of 1712–13 he acted as counsel for William Penn in a case of replevin, brought by one Berkeley Codd. The defense by the proprietary was that the quit-rent due from Codd's land, being a rent service, distress was incident thereto as of common right. The account given by James Logan of this suit shows the astuteness of the counsel, both in assault and timely retreat. "He baffled them, though he thought not fit to suffer it to proceed to a trial for want of better tackle on our side." What the counselor meant by "tackle" we cannot precisely say. It was perhaps the sufficiency of good witnesses, or full assurance of the value of the defense. It is believed that he removed to Philadelphia about the year 1715. His bold temper brought him the following year into collision with Charles Gookin, who was then Lieutenant-Governor of the province, against whom he was reported to have sworn an oath, and uttered other "wicked, opprobrious, and reproachful words." The bond fixed for his appearance at court to answer the charge was one thousand pounds, showing either the importance of the injury that the high official had received or that of the assault made by the eminent lawyer. The case did not come to a hearing during the term of Gookin, and it was discontinued by his successor. The following year Hamilton became attorney-general of the province, and in 1720 was invited to the Council. He accepted the invitation on condition that his services there should not interfere with his profession.

A letter from James Logan, in 1723, contains expressions that enable us to form an idea of the singular greatness of spirit that belonged to Hamilton. "He has for three or four years past appeared very hearty in the Proprietor's interest, notwithstanding it is not his natural disposition to be on the side of those who are accounted great, or one in power; but of late he has somewhat recoiled, and given more way to nature. He is very true when he professes friendship, unless he thinks himself slighted, which he cannot easily brook. He is a very able lawyer, very faithful to his client, and has generally refused to be concerned for any plaintiff who appeared not to have justice on his side. He has done many considerable services for our Governor (Sir William Keith), but

of late they have openly been at variance, for which reason I am of opinion that he will not appear against the Governor, for he is singularly generous that way. I have been much obliged to him, both on my own account and the Proprietor's, and I heartily wish he may be treated there by the family in such a manner as may engage him, of which I am somewhat apprehensive." This letter was written to Gouldney, one of the friends of the Penn family in England, on the occasion of a prospective voyage of Hamilton thither. Among other subjects of dispute with Governor Keith was doubtless Hamilton's opposition to the Court of Chancery that the latter had established in 1720, and which afterward Hamilton bore the leading part in abolishing.

He sailed for Europe in 1724, having before then resigned as attorney-general, and appeared as solicitor in the Court of Chancery in London for proving the will of William Penn. For his services to the Penn family he received as reward one hundred and fifty-three acres of land, lying north of the city and west of what is now Ridge Avenue, whereon he built his country-seat,—"Bush Hill." In 1727, Hamilton became prothonotary of the Common Pleas and recorder of the city. The same year he was elected to the Assembly, of which, in 1729, he became Speaker. For ten years consecutively, with one exception, he was returned to the Assembly. The exception occurred during the administration of Governor Gordon, and was owing to a social quarrel between the Governor's daughters and Miss Margaret Hamilton. The particulars we do not know, but this much is certain, that the young ladies at the Executive Mansion induced their father to employ all his influence, official and personal, against the father of their rival, and he was defeated at the polls.

Contemporaneously with the bill of the Assembly providing for the issue of paper money, rather an appendix to the same, was the provision for a legislative hall, the sittings heretofore having been held in a private house. This was in 1729. For this purpose two thousand pounds was appropriated. Hamilton, Thomas Lawrence, and Dr. John Kearsley were appointed a committee to oversee its construction. The location that had been proposed was Third and Market Streets, but Hamilton, in conjunction with William Allen, who afterward became his son-in-law, took the liberty of purchasing the square on Chestnut Street, between Fifth and Sixth Streets, afterward known as "Independence Square," and succeeded in having it adopted. Hamilton also succeeded in obtaining the adoption of his plan for the construction of the building, and superintended the work, which was finished in the fall of 1736, nearly enough for the first sitting therein of the Assembly.

The coming forward so early of such a lawyer as Andrew Hamilton is the more remarkable when we call to mind the prejudice against lawyers, which was at one time so strong as to lead to an attempt at a prohibition against their practice for fees and rewards. Against this prejudice, rather in spite of it, a profession so indispensable to all civilized society must necessarily continue to grow in strength and importance and be recognized by the community. In 1722 some departure was made from the spirit of suspicion that had obtained theretofore. It seems to have been made with reluctance and prudent—at least intended as prudent—conservatism. It was ordained by the Assembly that "there may be a competent number of persons, of an honest disposition, and learned in the law, admitted by the justices of the said respective courts, to practice as attorneys there."

From an early day, however, there had at all times been in the province one or more lawyers trained in the English inns of court, and with a competent acquaintance with the forms of legal procedure. The obligations of their successors to David Lloyd and the two Asshetons, in this regard, has already been mentioned.

In this connection we should say that the law was not the only profession against which there was a prejudice in the minds of these sturdy settlers of Pennsylvania; but medicine, at least that branch which is founded upon preliminary studies in works upon science, had its share also. In 1698 a volume was printed in London entitled "A Historical and Geographical Account of the Province and the Country of Pennsylvania, and of West New Jersey in America, etc., with a map of both countries. By Gabriel Thomas, who resided there about fifteen years." Regarding these two professions, the author thus writes: "Of lawyers and physicians I shall say nothing, because the country is very peaceable and healthy; long may it continue so and never have occasion for the tongue of the one and the pen of the other, both equally destructive to men's estates and lives; besides, forsooth, they, hangman-like, have a license to murder and make mischief."

It can scarcely be doubted that the early policy of the framers of the provincial government of Pennsylvania exerted a benign influence in introducing that simpler model of conducting business which has since obtained throughout the whole country to the exclusion of the complications of the English courts. It was, in fact, but a few years when such court papers as we cannot but smile at when reading, were followed by those which stand the test of criticism from those most noted in the science of pleading. "We perceive," says David Paul Brown in his "Forum," "by the legislative enactments of the early part of our provincial history,—especially many acts passed in 1705,—as the act for taking lands in execution, etc., the act about arbitrations and defaulting, the act concerning the probates of written and nuncupative wills, and for confirming devices of lands, and several others, some of which were repealed by the Queen in council; some of which remain at this day in force

as original enactments, and others of which have been incorporated, almost verbatim, into one revised code, that there was no want in the legislative council, at an early date, of good legal mind and good legal education. But whoever the lawyers were, they seemed to have been inclined to make a Pennsylvania system of jurisprudence rather than to introduce the English; and everything relating to the jurisprudence of the earlier years of the century has a very plain and practical form."

That, however, for which Hamilton is best known by the greatest number of persons is his conduct in one celebrated law case which he conducted for a defendant in another colony. The motives that led to his undertaking this case were not only nor mainly the defense of the individual client who had been prosecuted, but the establishment of a most important principle that before his day had been assaulted and dangerously hurt in his own province. This was in the case of William Bradford, the first printer in Philadelphia, whose prosecution by David Lloyd is mentioned in the chapter on the literature and literary men of Pennsylvania.

The case in which Hamilton appeared in New York was that of John Peter Zenger, indicted in 1735 for a libel against the Governor of New York before Judge De Lancey, chief justice of the province, Frederick Phillipse, second judge. Zenger was defended by James Alexander and William Smith; but these counsel having made bold to question the jurisdiction of the court for the trial of the cause, the following order was passed in quick indignation: "James Alexander, Esq., and William Smith, attorneys in this court, having presumed (notwithstanding they were forewarned by the court of their displeasure if they should do it) to sign, and having actually signed, and put into court exceptions in the name of John Peter Zenger, thereby denying the legality of the judges their commissions, though in the usual form, and the decree of this Supreme Court, it is therefore ordered that for the said contempt the said James Alexander and William Smith be excluded from any further practice in this court, and that their names be struck out of the roll of attorneys of this court. *Per cur.* JAMES LYLE, *Cl.*"

Being the duty of the court to appoint for the defendant counsel, as he was now without, they named one whose servility was such as to promise a speedy conviction. It was at this conjuncture that the friends of Zenger applied to Andrew Hamilton, whose fame, especially as a courageous defender of the innocent and oppressed, had spread throughout the whole country. He accepted the call and repaired to New York. Whatever were his opinions concerning the exceptions taken by his predecessors, Alexander and Smith, he was too astute to wage a warfare at a point shown to be impregnable, and, with a boldness amounting to audacity, assumed the position taken by William Bradford nearly half a century before, admitted the truth of the facts alleged to have been committed, and then proposed to adduce testimony to their existence. This proposition was of course refused by the court. But Hamilton entered upon an argument, wherein he gave a history of the trial by jury, how it had been instituted by our ancestors in order to take from kings and their minions the absolute power they claimed over the lives, property, and security of the people. In this connection he spoke with most splendid eloquence of that other provision that in criminal trials the jury, however unlearned they might be, when they were brought within the court-room were invested with powers equal to the judges who sat upon the bench above them in deciding what were the laws in such cases, with the added power of saying whether or not they had been violated. Without derogating from the powers of the court, he enlarged upon the equality of the jurors, and then he appealed to them to say if it was possible for them to find that their fellow-citizen, free as they were, and as upright, was deserving of punishment for what he had done, and what the bravest and best citizen of New York would feel that he had the right to do, not only without punishment, but without the fear of it. Most masterly was his praise of truth, and the argument that nobody, high or low, had cause to complain when it was spoken of his actions. His peroration was spoken of as the very highest height of majestic eloquence. He called to mind many of the brave of all ages who had suffered for the truth, and compared their memories with those of the tyrants, great and small, that had inflicted them. Even the court could not withstand the power of his appeals. The charge of the chief justice was such as to appear that, in his terror of being numbered among the oppressors of the innocent, he was quite willing to throw the responsibility of deciding this case upon the jury. These, after a brief conference, brought in a verdict of *not guilty*. The defense made a profound impression, not only throughout this country but in England, where a leading statesman is reported to have said of it, "If it is not law, it is better than law, it ought to be law, and will always be law wherever justice prevails;" and it was further reported that "the greatest men at the bar have openly declared that the subject of libel was never so well treated in Westminster Hall as at New York."

The defense of Zenger did not hurt Hamilton in England so as to hinder his receiving a commission, two years afterward, as judge of the Vice-Admiralty Court. We say this because appointments to that court seem to have been made by commission directly from the crown. But the reputation of the appointee was well known to the home government, and that was, that, zealous as he was in the defense of every right of his clients, he was faithful to the demands of every office he had held or might hold. He resigned all other offices except this, and retired from it only a short time before his death, which occurred in 1741.

The argument given in favor of the appointment by the crown to the Vice-Admiralty is thus stated by David Paul Brown in his "Forum": "We may infer this, both from the nature of the jurisdiction and from the fact that even in early times they appear to have belonged to the Church of England; for the only two whom we *know* to have been judges were wardens of Christ Church in this city" (Philadelphia). One of the earliest of these was William Assheton, who died in September, 1723, at the early age of thirty-three, being at that time the rector's warden.[1]

Joshua Maddox was an English gentleman of studious and contemplative tastes, liberally, but not, we believe, professionally, educated in England,—a man of dignity and fortune. Though a scholar unquestionably, he had pursued commerce, as we know, and pursued it with skill, reputation, and success. Yet he sat, as the records of the Orphans' Court show, from March, 1741, till his death in April, 1759, a term of eighteen years, upon the seat of judgment, constantly partaking in its exercises and attending to its adjudications; and when he died, at the age of seventy-four, had almost become personified in this province with the administration of its local justice. Mr. Maddox, like his associate justice, Lawrence, was a warden of Christ Church, in the burial-ground of which, at the corner of Fifth and Arch Streets, close by the grave of his other associate, Franklin, his monument may yet be seen.

We mention a case in one of the courts to illustrate the tone of the community regarding prosecutions for challenging to the duel. One Peter Evans having taken offense at certain conduct of one Francis Phillips, who is described in the papers as a "clerk," sent him a letter in the following words:

"SIR—You have lately scandalized a gentle-woman that I have a profound respect for; and for my part, I shall give you a fair opportunity to defend yourself to-morrow morning, on the west side of Jos. Carpenter's garden, betwixt seven and eight, where I shall expect to meet you *gladio cinctus*. In failure whereof, depend upon the usage you deserve, from Yours, etc.,

"Jan. 21, 1714. "PET. EVANS.

"I am at the Pewter Platter."

Mr. Phillips declined to meet the sender of the letter so early in the morning, and, whether in apprehension of the "usage" which had been threatened, or willing to make an example of such wickedness, indicted Evans. On the trial of the case the jury found their verdict thus,—

"We, the jury, do find that Peter Evans, in the indictment mentioned, did send a letter in writing to Francis Phillips containing these words" (quoting the letter in full). "If upon the whole the court do judge the words contained in the said letter to be a challenge, then we do find the said Peter Evans guilty; but if the court do judge the words contained in the said letter are no regular challenge, then we do find the said Peter Evans not guilty." This finding seemed to have been a poser to the learned judges. They reserved their decision for another time, and that time seems never to have come, as there was no further entry upon the records. This plainly shows that in that society—controlled, however, by peaceful Quakers—either dueling was held in not so great abhorrence as we would have supposed, or that in this instance disgust for the meanness of a man who had scandalized a gentlewoman was too great to let punishment fall only upon the man who had undertaken, though in an unlawful manner, to defend her. It is amusing to speculate upon the attempt of the jury to cast upon the court the responsibility of so ugly a case, and the conclusion of the judges not to assume it. This was certainly one issue at least wherein the court would heartily have consented for the jury to decide upon the law, independent of all interference from the bench. Whether this Evans was the officer of the court we cannot say. The same name is found among those containing a list of the registers of wills, and it is probable that he was the same person.

There is a curious document, being an entry, without signature, upon the continuance docket of the Court of Common Pleas of Philadelphia in 1775. It runs thus: "Departed Saints of the Law whom I have known." Upon this list the first is Andrew Hamilton and the second Peter Evans. The gallant defendant in the case at the instance of Phillips may have been he.

William Allen was a native of Philadelphia, born in 1704. His family were from Dungannon, Ireland, and were Presbyterians. His father, being a man of large wealth, sent him to England to pursue his studies, which were carried on at the Temple. On his return, instead of going to the practice of his profession, he became a merchant, and in 1727, when only twenty-three years of age, became one of the Common Council of the city. We saw, in the notice of Andrew Hamilton, that Allen had joined with him in the preference for the State-House upon the present Independence Square over the other site that had been agreed upon. From 1731 to 1739 he was a member of the Assembly. In 1733 he married Margaret Hamilton, the same whose feud with the Misses Gordon brought out the Deputy Governor's successful opposition to her father's return to the Assembly. Two years after his marriage he became mayor. He retired from the Assembly in 1739. When the war with Spain came on he again came to the front, and, in opposition to the conservative policy of Isaac Norris, became the head of the Anti-Quaker party. Defeated at the polls in 1742, he yet held his position as recorder, to which he was chosen the year before, and he boldly held the city government to the side of the

[1] The appointments to the vice-admiralty may, in a customary looseness of language, be said to have been made by "the crown," but this does not mean that they were made by the king, or even that he had been consulted in relation to them. They were made by the commissioners of admiralty in England. See "Bench and Bar," by John Hill Martin. Being appointed in England by churchmen, the judges of vice-admiralty could scarcely be expected to have been Quakers.

Governor, against the policy of the Assembly, then controlled by Norris and his friends. This position he held, together with those (alternately) of judge of the Common Pleas and Orphans' Courts, until the year 1750, when he resigned the first to accept the chief justiceship of the province. This office he continued to hold for nearly a quarter of a century. His career in this exalted position has ever been regarded as comparing favorably with those of the greatest judges of Pennsylvania. His learning, his wealth, his courage, his conservatism, his social standing, all combined to give to his administration an *eclat* equal, or nearly equal, to the best even of those who succeeded him. His mercantile business, however, was never suspended, and he acquired a wealth which was said to be greater than that possessed by any other citizen of the province in his time. He was most munificent in his donations in behalf of public institutions, and contributed largely to the expedition made in search of the Northwest Passage. While upon another visit to England, in 1763, he rendered most important service to the colonies in the matter of the taxation bills in Parliament. Through his influence with many of the leaders in both Houses, the passage of the Stamp Act was delayed for that session. During the disputes of the colonies with Great Britain he sided with the former, yet was opposed to the plan of independence. His last years were embittered by the contemplation of a struggle that seemed to him unnecessary and unjustifiable. He died in 1780. He was the founder of Allentown. One of his daughters married John Penn, son of the proprietor.

Clement Plumsted was intimately connected with the Hamiltons and Allens, and even before the coming to Philadelphia of Andrew had been concerned with him in real estate transactions that were eminently successful. The family (the earliest known of them) were resident of the county of Norfolk. The father of Clement was a merchant of London. The son immigrated to America just before or shortly after his attaining his majority. He became a common councilman in 1712, when thirty-two years of age, and in 1723 succeeded James Logan as mayor. He was a member of the Assembly during several sessions, and was given, in 1717, along with others, commission for holding the Courts of Common Pleas, Quarter Sessions, and Orphans' Court of the county. In 1727 he was appointed to the Governor's Council, and in 1730 became a master in chancery. He died in 1745.

William Plumsted, the son of Clement, born in 1708, was somewhat conspicuous, though less so than his father. He became common councilman in 1739. In 1745 he became register-general of wills for the province, which office he held until his death, though serving as mayor three terms,—1750, 1754, and 1755. Clement Plumsted was a Quaker of the moderate class in that sect. This moderation descending to his son culminated in his renouncement of that faith altogether and becoming an Episcopalian, even becoming a subscriber to the Dancing Assembly in 1748, the original of that institution in the city. He afterward became one of the founders of Christ Church, was its first warden, and one of its first vestrymen. He died in 1765.

Joseph Growdon, father of Lawrence, of a family among the gentry of Cornwall, emigrated to Pennsylvania not long after the purchase (together with his father, Lawrence Growdon) of a large body of land from William Penn. He was a member of the Assembly from Bucks County during several sessions, and several times elected Speaker. The Provincial Council at one time was an elective body, and he was made a member by the votes of the people. After the change in the Constitution whereby the Council ceased to be elective, he was appointed to that body by Penn, though he did not habitually attend the meetings thereafter. For some time he was justice of the Supreme Court. His son Lawrence, now being considered, was born in 1693. Having received a comfortable estate under the will of his grandfather of the same name, he went to England, and for some time was a merchant in the city of Bristol. His residence, during the greater part of his life after returning to America, was on his estate, called Trevose, in the county of Bucks, wherein he became a justice of the County Court, and from 1734 to 1737 represented that county in the Assembly. He was commissioned, along with Rev. Richard Peters, to run the boundary line, with commissioners from Maryland, between that State and Pennsylvania, a matter which cost a great deal of money, time, and anger until, long after this attempt, it was definitely settled. Growdon was raised to the Governor's Council in 1737. He was the second in rank on the Supreme Court bench, where he sat for twelve years. He left a very large estate when he died, in 1770. David Lloyd, the great leader of the party among Quakers hostile to Penn, was his brother-in-law, having married his sister Grace.

The most distinguished of the family of Hopkinson was Francis, who will be mentioned when we come to a later period. Thomas was born in London in 1709, and, having studied law, came to America in 1731. He became first clerk of the Orphans' Court, afterward prothonotary of the county, and in 1741 common councilman and judge of the Admiralty. He was raised to the Provincial Council in 1747. Thomas Hopkinson devoted much of his time to investigations in science, to some of which Franklin acknowledged himself indebted for much of his own success in discoveries, particularly affecting electricity. His early death put an end to what most probably would have been a very eminent career. He died in 1751.

Like many others of the founders of the bench and bar of Philadelphia, the Asshetons were of distinguished family. These it is easy to trace to the

Lords of Ashton-under-Lyne, in Salford Hundred, Lancashire. Robert Assheton was a kinsman of William Penn. He had been educated to the law in his native county, and came over to Philadelphia about 1699, at Penn's invitation, and was placed in office, straightway becoming clerk and prothonotary of the city and county of Philadelphia. He was town clerk of the city in 1701, at the time of its being chartered, and in 1708 became recorder, an officer who, as we have seen, was generally a lawyer, and presided, along with the mayor and aldermen, over a court which had concurrent jurisdiction in some cases with the other courts. After the coming of Robert Assheton the proceedings of the courts began to be conducted in a style far superior to what had preceded. "After 1704," says the "Forum," "the indictments, which are drawn by one of the Asshetons, are entirely scientific, and indeed all the proceedings of the *officers*, or the court proceedings,—I mean only clerical,—appear in general to be good. The indictments after this year, however, present, equally with those before them, a curious record of the times, though less than the earlier ones such records of the law. There are great numbers of them for forestalling the markets and negotiating, although the extent of the purchases do not, from the specification of the indictments, seem to be alarming."

The mention of Robert Assheton calls to our minds again the name of the Francis Phillips who, instead of accepting the challenge of Peter Evans for the insult offered to a lady, indicted him before the grand jury. David Paul Brown seems to have supposed that this man, from being styled "clerk," was a clergyman. He, at all events, was one who brought no honor to the cloth he wore, of whatever kind it was, for thus says the "Forum:" "We find this same 'Francis Phillips, clerk,'—who, if he was a clergyman, must have been one of the few disreputable clergymen who were here before the Revolution,—very soon afterward" (the prosecution of Evans) "the subject himself of an indictment for having 'as much as in him lied,' attempted to deprive, annihilate, and contemn the authority of the recorder, mayor, and justices of the peace by saying, 'Tell the mayor, Richard Hill, and Robert Assheton, the recorder, that I say they are no better than rogues, villains, and scoundrels.'"

Robert Assheton was prothonotary of the Supreme Court from 1722 to 1726. In the former year he was also a master in chancery. He was one of those who favored the establishment of a separate High Court of Chancery, and having been prominent in the Councils concerning the former establishment of courts, it was he who originated the bill for the Court of Chancery that was endeavored to be set up prior to that of Governor Keith in 1720, of which the Lieutenant-Governor was made chancellor, and a portion of his Council masters. He was a member of the Council as early as 1711, and probably was more influential than any other one man in his day in shaping the legal forms as well as the legislation of the province. In the disputes that arose between Governor Keith and the Penns during the Lieutenant-Governorship of the former, Assheton took the part of the Penns, and in resentment therefor he was dropped from the Council in 1719, but recalled in 1722, and continued in the position until his death, in 1727.

William Assheton, his son, who had been educated for the law at Gray's Inn, was called to the Council in the same year, 1722, wherein his father had been recalled by Governor Keith. The reconciliation of the Governor appears to have been most hearty when two of a family were simultaneously invited to a position so exalted. William was also one of the masters in chancery. It was, however, as judge of the Admiralty Court that William Assheton was most distinguished, though he held the place only a few years, dying in 1723, at the early age of thirty-three.

Appointments to the Admiralty were made directly under the crown, and in the appointment of William Assheton the crown had a magistrate who was disposed to render all due service, and inflict the rigors of his court upon those who did not. We quote portions of the comments of David Paul Brown ("Forum") on a case adjudicated by him in 1723: "Two persons brought before the judge, adherents of the cause of Charles Stuart, and Scotsmen, most probably, had ventured to call George Guelph 'the Pretender,' and one of them, it appeared, had not only spoken ill of the king, but had been guilty of that which might naturally impress the court as a still greater offense,—disobeying and publicly affronting magistrates." One of the men had confessed his guilt and submitted, but the other was contumacious, and it had to be proved upon him. Judge Assheton goes into the whole general subject of contempt, explaining exactly what they are, "in order that the people may know when they incur guilt, and though they are fully predetermined in their own opinions against clear conviction, they may at least be so discreet as to reform their manners." He does not tell either the prisoners or us how exactly contempts against the king fell within the Admiralty jurisdiction. He may, perhaps, have felt secure in the fact that the subject of contempt is not one for revision by any one except the courts which commit, and have usurped a power. After telling them what is contempt against the king, he tells them "that it is greatly impudent and presumptuous for private persons to intermeddle with matters of so high a nature, and it will be impossible to preserve the peace unless subjects will quietly submit themselves to those whom Providence has placed over them." "Though it be," he says, "the duty of a magistrate, and an excellent qualification in him to temper justice with prudence, and severity with gentleness and forbearance, yet it must be confessed, much more for the common ad-

vantage to have such magistrates as incline to the excess of sharpness and rigor than those who are disposed to mildness and easiness and compassion. . . . The strict and harsh magistrate is the better restraint, the stronger curb. The mild and merciful one exposes the laws to contempt, makes magistracy cheap, and lessens the prince, who makes both the law and the magistrate." After giving a somewhat milder sentence to the prisoner who confessed his guilt and submitted to sentence, namely, that he "shall stand under this court-house for the space of one hour on two market days, with one paper fixed on his breast, and another on his back, with these words written upon them in fair characters, 'I stand here for speaking contemptuously against my sovereign, Lord King George,' pay twenty marks sterling, and the charges of prosecution," the judge goes on to the other one, who had been contumacious, and "heartily wishing that the sentence might have a good effect upon him," pronouncing his doom thus, "I do adjudicate and decree that you shall stand in the pillory, in this market-place, for the space of two hours, on two market days; that afterward, on the said days, you shall be tied to the tail of a cart, and be drawn round two of this city squares, and then you shall be whipped on your bare back with forty-one lashes, and be imprisoned till you have paid the charges of prosecution."

Ralph Assheton, a younger son of Robert, was only four years of age when the family came to Philadelphia. At the age of eighteen he was made deputy to the clerk of the Provincial Council. This early appointment came necessarily and easily from the family connection with the Penns, who were ever intent to provide for their kinsfolk. In 1708, having arrived at age, he was made town clerk, succeeding to his father, who had held the office until that time, and then resigned in behalf of his son. In 1724 he was made a common councilman of Philadelphia, and in 1728 raised to the Provincial Council. He also sat as judge in both the Common Pleas and Orphans' Courts, and was one of the masters in the Court of Chancery at the time of its abolishment in 1735. In addition to holding these offices he was also a lawyer, practicing here and there in the various courts wherein, for the time being, he was not a judge. He died in 1746.

Benjamin Chew was the great-great-grandson of John Chew, who as early as 1624 was a citizen of Jamestown, Va. His son, Samuel Chew, was, in 1648, a judge of the High Provincial Court and Court of Chancery in Maryland. The father of Benjamin, a physician near Annapolis, after becoming a convert to Quakerism, removed to Delaware, where he was appointed by Governor Thomas chief justice of the lower counties, in which position he continued until his death, in 1743. Although a Quaker, he was not conscientiously opposed to war, when entered into for obtaining rights that otherwise could not be had, and it was this that made him a favorite with the Governor and the home government. Benjamin was the son of the preceding by his wife Mary Galloway, and was born in 1722, at the home of the family, then on West River, Md. Brought up a Quaker, though not after the straitest sect, he lived to abandon that faith entirely, and return to that of his ancestors. Being intended for the bar, he was sent to the office of Andrew Hamilton, who died when his student was nineteen years old. After this event he was sent to England, and entered the Middle Temple. Returning in 1743, he began the practice of his profession at Dover. In 1754, after having discharged the duties of several offices under commission of the Legislature of Delaware, he removed to Philadelphia. He was made attorney-general in the following year, and held that office until 1769. In the same year he was made recorder of the city, and so continued until 1774. He was also in the same year (1755) called to the Provincial Council. As Speaker of the Assembly of the lower counties, he vigorously and successfully exerted himself in obtaining from them supplies during the embarrassing times succeeding the defeat of Gen. Braddock. In addition to the duties of the offices aforementioned, he was register-general of the province in 1765. When he resigned the office of attorney-general, in 1769, he devoted himself more zealously to his private practice. By this time the bar of Philadelphia had become already, perhaps, the ablest in the country. In its circle, consisting of such as Dickinson, Tilghman, Galloway, Waln, and Francis, he competed with an ability recognized as among the very greatest. In 1761 he was appointed by the Legislature one of the commissioners to finally settle the long-disputed boundary between the two States of Pennsylvania and Maryland, which settlement was made by the adoption of the Mason and Dixon's line.

In 1774, on the resignation of William Allen, he became chief justice of the Supreme Court of the State. During the struggle for independence he took part neither with nor against it, and for some time had to remain upon his parole to avoid transportation beyond lines where he might be able, if he should so choose, to render services to the British cause. Yet, after the war was over, such was his reputation for integrity and ability that it was easy to continue the successful practice of his profession, and in 1791 was appointed judge and president of the High Court of Errors and Appeals, in which he continued to sit until 1808, when it was abolished. He died in Philadelphia in 1810.

The period to which James Wilson belongs includes that before and during, as well as that after, the Revolution. He was a native of Scotland, having been born near St. Andrews, about 1742. He studied at Glasgow, St. Andrews, and Edinburgh, and came to Philadelphia about 1766. His first employment was as a tutor in the college and academy. He studied

law under John Dickinson, and was admitted to the bar (according to John Hill Martin) in November, 1767. He sought practice in different localities, appearing during the next ten years in the courts at Reading, Carlisle, and Annapolis, Md. He came back to Philadelphia in 1778, and there settled permanently. He was a man of brilliant talents, and soon became prominent in public affairs. He was a member of the Provincial Conventions of 1774–75, and of the Continental Congress, 1775–76, and voted for the resolution of independence on the 2d, and to adopt the Declaration on the 4th of July in the latter year. He was again member of Congress in 1782–83 and 1785–87. He was a member of the Convention to frame the Constitution of the United States, of the State Convention which adopted it, and subsequently member of the Convention to amend the Constitution of the State of Pennsylvania. President Washington appointed him one of the justices of the Supreme Court of the United States in September, 1789. He was the first law professor of the University of Pennsylvania, appointed in 1790, and delivered lectures in that institution. In connection with Chief Justice Thomas McKean, he wrote "Commentaries on the United States Constitution," published in London in 1792. He died on the 28th of August, 1798, at Edenton, North Carolina.

George Ross, the first judge of the Court of Admiralty of Pennsylvania, was commissioned to that office on the 6th of April, 1776, under recommendation of the Continental Congress. He was a native of New Castle, Del., where his father was a clergyman of the Church of England, at the time of his birth in 1730. He came to Philadelphia at eighteen years of age, and commenced the study of the law, and was admitted to the bar about 1750. He went to Lancaster and established himself in practice there in 1751. He was a member of the Assembly for Lancaster County, 1768–70, and a member of the first Congress of 1774. He was also a signer of the Declaration of Independence, but resigned from Congress in January, 1777. Appointed a judge of the Admiralty Court, he served in that office until his death, July 14, 1779, when he was succeeded in his judgeship by Francis Hopkinson.

The Tilghmans are another family of very high social position, dating back to a remote period in English history. Long before the coming of the Tudors to the throne the Tilghmans were of high rank among the gentry in the county of Kent, their seat, Holoway Court, being at Snodland. A descendant of this family, Richard, who had been a surgeon in the British navy, purchased an estate called the Manor of Canterbury, on the Choptank River, in Maryland, and removed to it in the year 1661. He built his residence on the Chester River, and named it "The Hermitage." He died in 1675. His son Richard having intermarried with the Lloyds, became a leading member of the Assembly and Council of Maryland. He was the father of James, the councilor, who was born on the Hermitage. Choosing the law for his profession, he practiced at Annapolis until 1760, when he removed to Philadelphia. Already had he risen to high eminence when this change was made, whose object, doubtless, was the desire of a greater field for the employment of powers that he knew to be of the highest. Philadelphia was already the largest town in the country, and the career of Hamilton in that large sphere probably had its influence in attracting him there. Five years after his arrival he was invited by John Penn, then the principal member of the proprietor's family, to become secretary of the land office. The judiciousness of the appointment soon was proven by the splendid executive ability of the appointee. The year before (1764) he had been made common councilman. In 1767 he was raised to the Provincial Council. While acting in this office he became one of the commission that was sent to Virginia in order to treat concerning the boundaries of the two States, the chief purpose of which deputation was an appeal to the Virginia Governor, then Lord Dunmore, to petition the crown to settle the dispute. Indignant as he was at the injustice of British legislation upon the colonies, yet he was opposed to the efforts at independence, though he did not take a very active part against it. When the war of the Revolution began, he, with other leading men who were known to be opposed to the movement, was arrested at the motion of the Continental Congress, and placed on parole. He was allowed, in 1777, to visit his family in Maryland, where he remained for some time, on account of the occupation of Philadelphia. Like Chew, Shippen, and the rest of his colleagues in office, he was never suspected of being capable of actions inconsistent with what his public character had warranted all to expect, and he was relieved from his parole the following year. It was doubtless intensely painful to eminent men of the class we have lately been considering, who had grown prosperous and renowned in the existing condition of things, to contemplate a revolution that, even if successful, seemed likely to lead to the overthrow of whatever was good and conservative that had required so many years to establish. But in colonial governments, unless they are extremely oppressive, officials in the enjoyment of safe salaries, and others grown to mature age and prosperity must be more than human to be expected to join in revolutionary endeavors. Several of the sons and other descendants of the councilor became eminent. They will be noticed hereafter.

John Moland, a barrister of the Inner Temple, born in London about 1700, came out to Pennsylvania with a commission of king's attorney. In 1745 he purchased an estate near Philadelphia, afterward known as "Rose Hill." He soon became one of the leading members of the bar, was admitted to the Council in 1759, and died two years afterward.

Edward Shippen, son of the councilor of the same name, was also one of that body during a part of the last years of its existence. He was born in 1729, in Philadelphia. After having studied for a while in the office of Tench Francis, then the most distinguished lawyer in the city, he went to London and was a student at the Middle Temple. On his return he soon went into good practice. In 1752 he became judge of the Admiralty Court. The place where this court was held was over the market-house on Third Street. In 1765 he became prothonotary of the Supreme Court. It is curious to consider how many offices could be held in those times concontemporaneously that would now seem to be, many of them, inconsistent among themselves, and yet the holders be occupied in other business besides, with little detriment to the latter's satisfactory progress. Edward Shippen, we see, at the same time, to be judge and prothonotary, and yet he was in very remunerative practice as an attorney. The income to the judges of the Admiralty was not derived from salaries, as ought to be the case in all judicial, and, indeed, other officers appointed by law, but depended upon the costs that were levied upon the parties litigant therein. It was, therefore, quite a pecuniary loss to the present incumbent that another office was created, occupied by a commissioner of appeals in Admiralty that divided the fees accruing in cases wherein the Court of Admiralty had jurisdiction. We have seen that that jurisdiction was not limited to cases strictly concerning Admiralty, but had much to do with the trial of contempts and other cases of that kind. In 1770, Edward Shippen was made one of the Provincial Council.

Edw. Shippen

Like the most of the leading officials in Pennsylvania, while he felt, along with the rest of his fellow-citizens, the sense of wrong at the unjust legislation of the British government, yet he was averse to the project of independence. On the breaking out of the war of the Revolution he retired from public life, and remained quietly at his home on the Schuylkill, near its falls, and was required to give his parole, as were the rest of officials and other prominent citizens who were known to be not in accord with the movement. During the whole struggle he was never suspected of any conduct not consistent with his parole, and such was his exalted reputation for integrity and talent that, by universal desire of the community, he was made, in 1784, presiding judge of the Court of Common Pleas for the county of Philadelphia, and in the same year made one of the judges of the High Court of Errors and Appeals, in which position he remained until 1791, when it was abolished. In 1785 he was elected a justice of the Dock Ward, and soon afterward made president of the Quarter Sessions and General Jail Delivery. On the abolition of the High Court of Errors and Appeals and the institution of the Supreme Court, he was appointed one of the associate judges of that tribunal. On the election of Chief Justice McKean Governor, in 1799, Mr. Shippen was raised to the position just made vacant, and held it until 1805, when he resigned it, and died the following year. His wife was Margaret, daughter of Tench Francis, Esq., attorney-general, and at one time the leader of the Philadelphia bar.

Having begun with the members of the Great Council of the Province of Pennsylvania, we thought proper to continue through the list, notwithstanding that some of the latter survived for many years the

Digitized by Google

abolition of that body. We have omitted the names of John and Richard Penn, because, though members, their connection was by virtue of their proprietary rights, and neither of them can properly be said to have been much connected with the bench. The notices of them, therefore, more properly belong to other departments of this work.[1]

The simplicity in William Penn's first institution of his government grew out of a mind that sincerely desired that all its affairs might be conducted with reference to bringing his people to the performance of all their duties, not so much by compulsion as by regard for the dictates of truth, justice, and peace. The following extract, taken from his frame of government and laws in 1682, affords evidence of a spirit that most seriously contemplated the behests of the important mission upon which he believed himself to have been divinely sent. After referring to several passages in the sacred Scriptures relating to the duties of magistrates and people, he says,—

"This settles the divine right of government beyond exception, and that for two ends,—first, to terrify evil-doers; secondly, to cherish those that do well,—which gives government a life beyond corruption, and makes it as durable in the world as good men shall be. So that government seems to me a part of religion itself,—a thing sacred in its institution and end. For, if it does not directly remove the causes, it crushes the effects of evil, and is, as such, a lower, yet an *emanation of the same divine power* that is both author and object of pure religion, the difference lying here: that the one is more free and mental, the other more corporal and compulsive in its operation; but that is only to evil-doers, government itself being otherwise as capable of kindness, goodness, and charity as a more private society. They weakly err that think there is no other use of government than *correction*, which is the coarsest part of it; daily experience tells us that the care and regulation of many other affairs more soft and daily necessary make up much the greater part of government, and which must have followed the peopling of the world had *Adam* never have fallen, and will continue among men on earth, under the highest attainments they may arrive at, by the coming of the blessed second *Adam*, the *Lord* from Heaven."

Going to work with these benignant intentions, upon his arrival he called his Assembly, and proceeded, as we have seen, with the establishment of his courts and issuing commissions for the judges. It was a body compliant and prompt. Its first session lasted twenty-two days, the last work being (for Philadelphia) the establishment of a seal (an anchor) and the appointment of John Test as sheriff. A grand jury was summoned in a few weeks afterward, specially for Pickering's case of issuing counterfeit money. The courts were to sit every two months, and the presiding judges were commissioned for two years. Of these judges (Nicholas More, William Welch, William Wood, Robert Turner, and John Eckley, the earliest appointees) it is somewhat singular that the first-named should have been impeached. He was a person, however, of obstinate courage, and refused to appear to the summons of the Assembly, who, in resentment against his contumacy, ordered his suspension until the impeachment could be fully heard. The proprietor, then in England, interfered in the prosecution, believing it to have had insufficient foundation, and More afterward rose to get higher employments in the government.

In spite of the prejudices against lawyers, not only among the people, but the government officials, these must come on quickly, in a community whose progress in every direction was so rapid. Already (in 1722) had the profession advanced far when the Assembly enacted the law regulating their appointment and conduct. Distinguished as was Andrew Hamilton, there was one who equaled him in professional acquirements, whose abilities and whose personal character were doubtless among the causes that led to the removal of the prejudice of which we have spoken. This was John Kinsey. In Proud's "History of Pennsylvania" is given a list of the members of the Assembly elected in 1740. Among them John Kinsey appears as Speaker. He is there recorded as from Philadelphia *County*, while those for Philadelphia City were Israel Pemberton and John Kearsley. Three years after this date he was made chief justice of the State, and so continued until his death, in 1750. The following is a note from Proud's "History":

"In May, 1750, died at Burlington, in West Jersey, of an apoplectic fit, John Kinsey, of Philadelphia. He was an eminent lawyer, and during the last seven years of his life chief justice of Pennsylvania, which station he held with an unblemished integrity, and with so much reputation that even the chief part of the lower courts followed him there. He had been many years a member and Speaker of the Assembly of New Jersey, where he distinguished himself with so much zeal and true patriotism as greatly endeared him to the people of that province. On his removal to Philadelphia, in 1730, he was chosen into the Assembly there, of which he was Speaker during the last ten years of his life successively, except a month or two, when he being on an embassy to an Indian treaty held at Albany, John Wright . . . officiated in his stead. He had very much practice and success in the law, and was for some time attorney-general, his long experience and great ability in the management of public affairs, his skill in the laws, and readiness for communicating his knowledge therein, often without fee or reward, and his tenderness to his friends (the people called Quakers), by whom he was deservedly esteemed a valuable member in their religious society, with the exercise of

[1] In this connection we must again express as well our indebtedness as our thanks to Charles P. Keith, for his most complete work, "The Provincial Councilors of Pennsylvania," published in 1883. To it we owe the greatest number of facts which have been related in the foregoing part of this chapter, and it will serve other purposes hereafter when we come to speak of others, who, although not members of the Council, yet were connected with them by either marriage or descent. This is not quite yet the place to speak fully of the extraordinary standard that was raised at a very early period by the bench of Philadelphia in the social being of that city. It is interesting, and it is wonderful to follow, in Mr. Keith's book, the preservation of that standard among so many generations of families that yet, or more than a century and a half ago, are fully equal to the best in wealth, culture, talent, manners, and social importance in the many States wherein they reside.

many civil and social virtues, are said to have rendered his life very useful and valuable, and his death much lamented as a great and universal loss to these provinces."

Of the many names that were connected with the courts in one way or other, few beside those already mentioned, occurring in the first period of fifty years after the proprietary government of Penn was established, would have been known to posterity but for their appearance upon the court records that have been preserved. Of many of those who presided in the lower courts, and even on the Supreme bench, we get our principal information from the entries upon the judicial or other records stating the facts of their deaths. Of these we may say, as David Paul Brown says of Andrew Robinson and Jeremiah Langhorne, both chief justices, "Except that we know that they both died, we should not know that either of them lived."

Of the judges under the presidency of Allen, the one best known is William Coleman, who was on the bench in 1754. He was a merchant. That he was a man of considerable note we must infer from the praise of him by Benjamin Franklin, who thus refers to their relations with each other of some years anterior to this: "William Coleman, about my age, then a merchant's clerk, had the coolest, clearest head, the best heart, and exactest morals of almost any man I ever met with. He afterwards became a merchant of great note and one of our provincial judges. Our friendship continued without interruption to his death, upwards of forty years, and the club continued almost as long, and was the best school of philosophy, morality, and politics that then existed in the province." Coleman, like many others of the judges and lawyers, was a hearty coworker in the establishment of useful public institutions, as the Library Company of Philadelphia, etc., and was one of the founders and original trustees of the College of Philadelphia. He was also the first treasurer of the Pennsylvania Hospital.

Of many of the other judges, such as Lawrence Growdon, Caleb Cowpland, Alexander Stedman, John Lawrence, and John Morton, it is not known whether any of them had ever been lawyers prior to their elevation to the bench, though the "Forum" says that such has been the impression regarding Growdon and Lawrence. Of these, John Morton lived to acquire distinction for at least one service, whatever may have been his qualifications as a judge,—that of having been not only an ardent patriot, but manifesting both his patriotism and his courage by being a signer of the Declaration of Independence.

It is greatly to be admired, notwithstanding the want of previous studies of legal science by the far greater portion of the provincial judges of Pennsylvania, in how short time they brought the courts up to a standard ever since justly celebrated. The "Forum" pays this fine tribute to them: "In looking at the character of some of the persons who exercised the judicial office in the days of the province, one cannot help observing how much higher, too, in that day must have been the character of 'the merchant.' Nearly all the justices, both of the Common Pleas and the Supreme Court, Franklin excepted, were merchants, yet they were men not only of much intelligence and education, but were also of a very high character as gentlemen, and bearing those characteristics of independence and retirement which Mr. Burke admired in the judicial character, and which, while fit to mark especially that character, belong to the best expressions of society everywhere; but belong not at all to the driving, eager, gambling class which too often in this day assumes to represent 'the merchant,' whose honest and honorable commerce was the commerce of our fathers."

Before the middle of the eighteenth century the tone of the bench and bar had become much exalted, and it is plain to observe the ease and dignity with which the trial of causes had gradually come to be conducted. There appears less of unscientific procedure, sprung from a better acquaintance with the history of court trials in former terms, as they were read by judges and lawyers in the studies of individual cases. There was much of the learning in the reports of English decisions that men of the kind that presided in the provincial courts, however unscientifically educated, but possessed of good judgment and mercantile and other business experience, would soon perceive the value of, and appropriate it to themselves. They would understand in time that this learning was founded, at least the greater part of it, upon reason, at the perfection of which the law has always aimed to attain, and that many of the forms of procedure were not only as simple, but more so than those variously used theretofore by those who, in their ignorance of others, had been accustomed to make them for themselves. The very "fictions" of the law against which Logan was used to declaim were found, upon acquaintance, neither so wicked nor so meaningless. It is interesting, therefore, to notice about this time the rise upon a higher plane, upon which there afterward walked an array of eminent men, a larger number of whom were illustrious than were to be found at any other bar in the whole country.

The character of the members of the bench through those fifty years was such, however, as to impart to their bearing, official and personal, a dignity far beyond what would have been expected of their limited knowledge of laws. There was a decorum in their courts the like of which, though it continued for many years, has long since passed away, not only from Pennsylvania, but the other States, among some of which it formerly obtained, to the great honor of the bench during its continuance. David Paul Brown, in that excellent work we have referred and

shall refer to often hereafter ("The Forum"), in speaking of the Common Pleas, says, "We know little of the formalities which belonged to the court-room, nor indeed—unless it was in Market Street, at the crossing of Second Street—do we know exactly where the court-room was. We have reason to believe, however, that those ceremonies of respect which the wisdom of past times thought so much connected with respect itself were observed with becoming attention. An escutcheon which has descended to our time shows that the crown and royal arms were placed behind the bench, as the emblem of its authority. An ancient portrait of Justice Maddox, painted by Hessellius in 1751, represented the venerable and benignant-looking man costumed with care and dignity in the fashion of the day, short-clothes, ruffled wrist-sleeves, and a wig,—not in any sort of a robe, however,—with a velvet cap laid upon the judicial table, the top of which is covered with a dark cloth, the sides being hung with crimson velvet; himself seated in a crimson velvet-covered and cushioned chair of office, the cushion and arm-rests of which are tasseled with cords and golden fringe. Undoubtedly it looks like a seat which its incumbent, when ordering it, considered that he would have the right to use for the residue of his life." In this connection, the same author refers to a portrait of Andrew Hamilton, which he supposes to have been painted when Hamilton was in England. "He is dressed in a long flowing wig, a scarlet coat, frilled bosom, and bands precisely like those worn by some denominations of the clergy in our time. It is manifest that if this, or anything like this, was the ordinary costume of the bar, it must have generated an observance of propriety in manner which belongs to a different and a better school than that of the sack-coat and 'squash' hat. Indeed, the beauty and bright intelligence of his cleanly-shaven face would present a contrast with many countenances now to be seen of a Saturday morning in our court-rooms which would not argue much in favor of the improved personal appearance of the men of this generation." Mr. Brown also tells of a portrait by Benjamin West of Chief Justice Allen, which was then (in 1856) in possession of one of his descendants in Philadelphia, which is "of three-quarters length, and taken standing; he has a curled wig and ruffled sleeves, but is otherwise dressed as plainly as possible."

Before proceeding to the notice of the leading members of the bench and bar who succeeded those already mentioned, we notice some changes made in the organization of the courts. The Assembly of 1759 passed an act entitled "A supplement to an act for establishing courts of judicature in that province." Martin ("Bench and Bar") says (in his notice of the Court of Common Pleas for the city and county of Philadelphia), this act provides "that five persons, of the best discretion, capacity, judgment, and integrity, may be, and no more, appointed and commissioned to hold the county court of record, styled and called 'the Court of Common Pleas,' in each county, and there to hold a court; and by the second session they are authorized to hold the Orphans' Court. Justices of the Quarter Sessions not to be judges of the Common Pleas. The judges of the Court of Common Pleas and Orphans' Court in Philadelphia appointed under this act were Thomas Yorke, Rowland Evans, John Potts, Samuel Wharton, and John Hughes. The act was repealed by the Privy Council, Sept. 2, 1760, and on Feb. 28, 1761, . . . writs of supersedeas were issued to the above-named judges, forbidding them exercising the powers granted under their commissions from Governor Denny."

The same author thus continues, giving account of the establishment of the District Court:

"By the repeal of the act of Sept. 29, 1759, the justices of the peace, commissioned as justices of the county courts, held the Common Pleas, Quarter Sessions, and Orphans' Court until Sept. 1, 1791. The act does not mention the presiding justices, and I have not been able to find any law conferring that dignity previous to the passage of the act of Jan. 28, 1777; but, as I have before stated in this work, I believe there has always been a presiding justice, being the prior justice on each commission."[1]

By the act of April 13, 1791, in order to render effectual the provisions of the Constitution of 1790, establishing Courts of Common Pleas, the State was divided into five districts, the city and county of Philadelphia, Bucks, Montgomery, and Delaware constituting the First District, and a president judge learned in the law was to be appointed for each district, and not fewer than three nor more than four other persons appointed in each county as judges, which said president and judges were empowered to execute the powers, jurisdictions, and authorities of judges of the Court of Common Pleas, justices of the Courts of Oyer and Terminer and General Gaol Delivery, judges of the Orphans' Courts and of the Register's Court, and justices of the Courts of Quarter Sessions of the Peace, agreeably to the laws and Constitution. We have attempted in vain to obtain an account and description of the forms and ceremonies observed previous to the Revolution in opening the

[1] The statement here referred to is on page 37. After referring to the establishment of the Supreme Court, with a chief justice and two (increased to three in 1767) associates, in 1722, with power to hear appeals from the then existing courts, and a Supreme Court of General Sessions of Oyer and Terminer, etc., he proceeds thus:

"On Jan. 28, 1777, an act was passed directing that one justice in each county should be appointed to preside in the respective Courts of Common Pleas, General Quarter Sessions, and Orphans' Court. But this office had existed from the foundation of Penn's government, for we find in 1 C. R., page 18, that an attested copy of the laws 'Should be transmitted to ye Presidt or Clerk of each county Court,' and on the 24th of the Sixth month, 1684, a Council 'ordered that the next Justice in Commission to be Presdt of the Court of New Castle, doe officiate in the same till further order.' The cause of that order was, without doubt, the death of William Welch, who was, I have no hesitation in stating, the president of the court of New Castle, and at Philadelphia also; for in 1 C. R., page 67 (1st edition), on ye 11th of ye Seventh month, 1684, 'It being proposed by a member in Council that a new commission of the peace be granted for the countys of Philadelphia and New Castle, by reason of ye removeall and Decease of ye sayd Presdt, it was unanimously agreed that new Commissioners should be Issued out.'"

terms of our courts, which was done in the most formal manner, and with forms and ceremonies unknown to the present race of lawyers. The portraits of Chief Justice Logan represent him in wig, band, and gown. No doubt that before 1776 the courts observed all the forms then in force in England, and the judges wore the costume prescribed therein.

The overthrow of the royal government could scarcely avoid being followed by the discarding even of many of the forms in the administration of public officers which were not only harmless but contributory to the decent conduct of business therein. Our ancestors, tired out with paying adulation to kings and others high in authority, seemed to wish that what authority it might appear necessary to preserve or establish under different *régime* should have as little resemblance as possible to that which had been destroyed; that judges, even if as authoritative as before, should not seem by their dress and the other appointments of office to be any greater than the people, who instead of a king were now their masters. Natural as was this revulsion, it has ever been regarded by the most thoughtful minds as hurtful to the bench, in diminishing the respect that is due from the rest of the community to the office, to which, and not to any incumbent, it is becoming and important that the highest honor and reverence should be paid. A judge in Pennsylvania is as exalted an officer as a judge in England, and the judges in England have been those who, in spite of exceptional cases of servility, have been instrumental both in the establishment of the rights of the English people, and the sure ascertainment of them when infringed by the crown and its favorites. To this day is to be seen the superior dignity over others of those courts in this country wherein is observed the decorous and dignified etiquette of those of former times.

WILLIAM TILGHMAN, LL.D.

We now pass to the review of those men who made up the second generation of the bench and bar.

William Tilghman, whose reputation is probably not surpassed by that of any other lawyer and judge whom this whole country has produced, was the son of the counselor James Tilghman and Anne, daughter of Tench Francis, who was long leader of the bar in his time, and who was the first of his profession to lead the way to the practice in the provincial courts upon a plane comparable with those in the mother country. Tench Francis, then a citizen of Maryland, resided in Talbot County, his estate being named Fansley. Thereon William Tilghman was born Aug. 12, 1756. Distinguished while in college especially for his love and progress in classic literature, he left before graduation, and when sixteen years old began the study of law in the office of Benjamin Chew. The family had been residing in Philadelphia since an early period in his infancy. After remaining in the office of Mr. Chew four years, he removed to his native State. During the war of independence he remained in retirement, pursuing the while his law studies, and not until it was well over did he apply for admission to the bar. This took place in 1783, when he was then twenty-seven years old. For several years he was a member of the Maryland Legislature, either the Senate or the House of Delegates, and bore a conspicuous part in the adoption by that State of the Federal Constitution. In 1793 he was married to Margaret Elizabeth, daughter of James Allen, son of William Allen, chief justice of Pennsylvania, who, as we have seen, was son-in-law to Andrew Hamilton, and the wealthiest man in the State. Shortly before this marriage he returned to Philadelphia. Besides the lawyers of the city, he was thrown into frequent competition with eminent lawyers from other States, as Ames, Hamilton, Hooper, Pringle, etc., for Philadelphia was then not only the most populous city in the United States, but its bench and bar far outranked those in any other city. Among his contemporaries Mr. Tilghman was noticeable for modesty and distrust of his own ability, which attended him throughout his high career. These, as Cicero (De Oratore) argues, are valuable helps in the formation of an orator when not prevailing to excess. In the study of classic literature, acquaintance with the best examples in Greek and Roman eloquence, he held before himself a standard that he knew was difficult to attain, and his persistent endeavors resulted in a splendid success, which, however unsatisfactory to himself, was the admiration and wonder of his compeers.

The first judicial office to which he was raised was in

Google

the United States Circuit Court, of which he became, by appointment of John Adams, in 1801, one of what were called "The Midnight Judges."[1] The opposition of Mr. Jefferson to this act caused its repeal in 1802. In the year 1805 Tilghman was made president of the Court of Common Pleas of Philadelphia County, and on the resignation of Judge Coxe, in 1805, he was appointed by Governor McKean president of the First Judicial Circuit of Pennsylvania, and in the following year to be chief justice of the Supreme Court of the State. This was done after the resignation of that position by Judge Shippen. Here Justice Tilghman remained until his death, on the 30th of April, 1827. Mr. Binney, in his eulogium, says,—

"An intimate friend of the chief justice has said that in all his intercourse he never knew him allude to the circumstance of having been a judge of the Federal Court. There was doubtless a painful recollection connected with it. It is known that his opinion was against the validity of the repealing law. 'A nickname, intended as one of reproach, intimating collusion in underhand practices, is often the more painful to sensitive minds the greater the consciousness of innocence.'"

The administration of Chief Justice Tilghman has always been spoken of with unqualified praise. Coming to the bench during the period when was being settled what portions of English law were yet in force in Pennsylvania and what changes should be made in them, his services were of inestimable value. In the eulogium by Horace Binney, already referred to, it is said,—

"It was reserved for Judge Tilghman, with the aid of able and enlightened colleagues, to carry into effect the plan which the genius of his great predecessor (Judge Shippen) had conceived. His philosophical mind perceived at once how equity could be combined with law; how two systems, apparently discordant, could be amalgamated into one homogeneous whole. He found in the common law itself principles analogous to those which courts of equity enforce, principles too long obscured by the unmeaning distinctions and frivolous niceties of scholastic men; he wiped off the dust from the diamond and restored it to its primitive splendor. And though he did not entirely complete that immense work, which still wants the aid of wise legislators and liberal judges, he brought it to that degree of perfection which defies all attempts to destroy it in future, and Pennsylvania boasts of a code of laws which her ordinary courts may safely administer, without the fear of doing injustice and without needing to be checked by an extraordinary tribunal professing a different system of jurisprudence.

"With the same enlightened and philosophical spirit, Judge Tilghman always gave a fair and liberal construction to the statutes which the Legislature made from time to time for the amendment of the law and simplifying the forms of proceeding, which, however they might be suited to the meridian of England, were not well calculated for this country. If those statutes were not always drawn with the requisite skill, he would supply it by their spirit, and would, as much as, indeed, he could, carry into effect the intentions of the legislator. Thus, by his interpretation of the statutes called of *Jeofail*, our practice is now free from those technical entanglements by which justice was too often caught, as it were, in a net, and the merits of a cause made to yield to formal niceties, while chicane rejoiced at the triumph of iniquity.

"Chief Justice Tilghman could have done as much with this bar by the force of his authority as any judge that ever sat in his seat. His investigations were known to be so faithful, his reasonings so just, and his convictions so impartial, that there would have been a ready acceptance of his conclusions, without a knowledge of the steps that led to them. He asked, however, for submission to no authority so rarely as to his own. You may search his opinions in vain for anything like personal assertion. He never threw the weight of his office into the scale which the weight of his argument did not turn He spoke and wrote as the minister of reason, claiming obedience to her, and selecting with scrupulous modesty such language as, while it sustained the dignity of his office, kept down from the relief, in which he might well have appeared, the individual who filled it. Look over the judgments of more than twenty years, many of them rendered by this excellent magistrate after his title to unlimited deference was established by a right more divine than kings. There is not to be found one arrogant, one supercilious expression, turned against the opinions of other judges, one vainglorious regard toward himself. He does not write as if it occurred to him that his writings would be examined to fix his measure, when compared with his standard of great men, but as if their exclusive use was to assist in fixing a standard of the law."

The praise which is given of Chief Justice Tilghman's compassion for those tried for criminal offenses is one of the noblest panegyrics to be found:

"He could not but pronounce the sentence of the law upon such as were condemned to hear it, but the calmness, the dignity, the impartiality with which he ordered their trials, the deep attention which he gave to such as involved life, and the touching manner of his last office to the convicted, demonstrated his sense of the peculiar responsibility which belonged to this part of his functions. In civil controversies, such excepted as by some feature of injustice demanded a notice of the parties, he reduced the issue freely much to an abstract form, and solved it as if it had been an algebraic problem. But in criminal cases there was a constant reference to the wretched persons whose fate was suspended before him, and in the very celerity with which he endeavored to dispose of the accusation he evinced his sympathy. It was his invariable effort, without regard to his own health, to finish a capital case at one sitting, if any portion of the night would suffice for the object, and one of his declared notions was to terminate, as soon as possible, that harrowing solicitude, worse even than the worst certainty, which a protracted trial brings to the unhappy prisoner. He never pronounced the sentence of death without severe pain: in the first instance it was the occasion of anguish. In this, as in many other points, he bore a strong resemblance to Sir Matthew Hale. His awful reverence of the Great Judge of all mankind, and the humility with which he habitually walked in that presence, made him uplift the sword of justice as if it scarcely belonged to man, himself a suppliant, to let it fall on the neck of his fellow-man."

Chief Justice Tilghman, though a man of decided political convictions, abstained as far as possible, consistently with personal freedom in their expressions,

[1] Thompson Westcott, author of the "History of Philadelphia," is quoted by John Hill Martin, in a note to the latter's "Bench and Bar," as having (in the *Sunday Dispatch*, Oct. 8, 1876) this following account of the "Midnight Judges:" "John Adams, while President, toward the end of his term, seriously urged a reorganization of the Federal judiciary. The Circuit Courts were held by the judges of the Supreme Court, but the business was increased so much that the appointment of additional judges was considered necessary. On the 13th of February, 1801, an act was passed reducing the number of the judges of the Supreme Court to five,—whenever a vacancy occurred,—and released those judges from all circuit duty. The number of United States District Courts was increased to twenty-three, and the districts were arranged in six circuits, each circuit with three judges. The result was to create sixteen new judges, besides attorneys, clerks, marshals, and other officers. As it was near the end of Adams' term, and as Jefferson was elected four days after the act was passed, it was supposed that the President would allow his successor to make the appointments; but he did nothing of the sort. He sent to the Senate, on the 18th, the names of Charles Lee, of the District of Columbia; Jared Ingersoll, of Pennsylvania; Richard Bassett, of Delaware; William Griffith, of New Jersey; Egbert Benson, of New York; Oliver Wolcott, of Connecticut; Samuel Hitchcock, of Vermont; Philip Barton Key, of Maryland; John Davis, of Massachusetts; Jacob Read, of South Carolina; Elijah Paine, of Vermont; Ray Greene, of Rhode Island; John Sitgreaves, of North Carolina; Joseph Clay, of Georgia; William McClurg, of Kentucky; and William H. Hill, of North Carolina."

Jared Ingersoll having declined the appointment, Mr. Tilghman was afterwards nominated in his place. The term "Midnight Judges" arose from a story that the names of some of them were confirmed just before midnight, 1801, when Mr. Adams' term expired. This act was repealed the following year.

from prominent connection with politics. It is written by Mr. Binney, "He once refused to take part in a meeting on the Missouri question, because, often obliged to decide in matters relating to slavery, he would do nothing to bring his impartiality into doubt. Yet he expressed a 'fervent wish to see the evils of this institution mitigated, and, if possible, extinguished,' and he freed his own slaves by a plan of gradual emancipation."

He became president of the American Philosophical Society in 1824, was a trustee of the University of Pennsylvania, the first president of the Athenæum, and a warden of the United Churches.

On the last anniversary that he was to see he wrote the following:

"This day completes my seventieth year, the period which is said to bound the life of man. My constitution is impaired, but I cannot sufficiently thank God that my intellects are sound, that I am afflicted with no painful disease, and that sufficient health remains to make life comfortable. I pray for the grace of the Almighty to enable me to walk, during the short remainder of life, in His ways. Without His aid, I am sensible that my efforts are unavailing. May I submit with gratitude to all His dispensations, never forget that He is the witness of my actions, and even of my thoughts, and endeavor to honor, love, and obey Him with all my heart, soul, and strength."

John Ross is described by Graydon as one "who loved ease and Madeira much better than liberty and strife." During the troubles of the Revolution he "declared for neutrality," saying "let who would be king, he well knew that he would be subject." Ross was in excellent practice before 1759, and in that year was consulted by the Governor and Council, together with Mr. Moland, Benjamin Chew, Justice Coleman, and Justice Stedman, in relation to a bill for recording of warrants and surveys, and for rendering real estate and property more secure. In the year 1761, Ross lived in the Carpenter (afterward Tilghman) mansion, on the north side of Chestnut Street, between Sixth and Seventh. He agreed to sell the premises for three thousand pounds to John Smith, because, as he said, his "wife deems it too remote for his family to live in. . . . He must then look out another airy place to build on, and how to succeed therein he knows not." Subsequently he built a new house farther in town, on the north side of Chestnut Street, between Fourth and Fifth. The house was afterward used for many years by the Farmers' and Mechanics' Bank, and the present bank building occupies the same site.

Thomas McKean was born at Londonderry, Chester Co., Pa., March 19, 1734. His father (William) and his mother (Lætitia, *née* Finny) were natives of Ireland. After finishing his preparatory course of education, he went to the study of the law in the office of a kinsman,—David Finny,—at New Castle, Del. Shortly after entering this office he was made deputy prothonotary and register for the probate of wills, and some short time thereafter prothonotary of the Common Pleas. These offices led to speedy acquaintance with the clerical part of the profession, which, with the rapid advance he had made in the study of its principles, led to his admission to the bar before he was of age. When he was twenty-two, he was appointed deputy attorney-general for Sussex County. The next year he was admitted to practice in the Supreme Court of Pennsylvania, and in the same year became clerk of the Assembly. Five years afterward, when only twenty-eight years of age, he was appointed, together with Cæsar Rodney, to codify the laws of Delaware that had been passed from the beginning to the year 1751. In the same year (1762) he was elected to the General Assembly from New Castle, which position he held for seventeen years consecutively. In 1773 he removed to Philadelphia. This change of residence, however, did not affect the confidence of his constituents nor their desire for him to continue as their representative. In spite of his continued proposal to be relieved, they continuously elected him for the remaining six years of his service in that body. When at last, in 1779, he peremptorily declined to serve another term, his old constituents asked him to make out a list of those whom he thought they would do best to choose. In vain he endeavored to decline a request imparting so delicate responsibility. He was prevailed upon to comply, and the names he rendered were elected almost with unanimity. In 1764 he was appointed by the Legislature one of the trustees of the loan office for the county of New Castle, an appointment that was many times renewed. This was a most benignant measure on the part of the Legislature, designed, as it was, to advance money, on reasonable security, and very indulgent terms, to those persons who were embarrassed with debts, yet were industrious and needed only such accommodation in order to eventually become extricated.

It is to Thomas McKean that we are indebted for having made the first, at least the most public and effectual, move toward the establishment of that principle in our Federal government which resulted in placing the smaller States in the United States Senate on a level with the larger. He was representative in the Colonial Congress of 1765 from Delaware. This has generally been styled "the Stamp Act" Congress. Early in its sittings Mr. McKean contended that on the votings upon the important subject for which the body was mainly assembled, Delaware, though the smallest in territory and population, should count evenly with all the rest. His opinions prevailed. It was a great question, destined, after the attainment of independence, to become one of the most exciting of those to be discussed before the final settlement upon the basis of a Federal Union, which was compromised by allowing the disparity in population to be counted only in the House of Representatives. Young as he was, he was one of the most prominent figures in this Convention, and among other appointments to which he was assigned [illegible] eing one of the committee to draw [illegible] of the colonies to the

Parliament of Great Britain. An interesting incident is told in Armor's "Lives of the Governors of Pennsylvania" (Philadelphia: James K. Simon, 1872):

"One circumstance which occurred near the close of the session so well illustrates the open, manly boldness with which he met every question that it merits recital. It is given by the author of the sketch of Mr. McKean published in 'The Signers of the Declaration.' 'When the business was concluded,' he says, 'and on the last day of the session, the president and some timid members refused to sign the proceedings. Mr. McKean then rose, and, addressing himself personally to the president, remarked that as he had not made a solitary objection to any of the measures which had been finally adopted, nor a single observation indicative of disapprobation, he requested that he would now assign his reasons for refusing to sign the petition. To this demand the president replied that he did not conceive himself bound to state the cause of his objections. Mr. McKean rejoined that the gentlemen present had met together to obtain the repeal of an unconstitutional and oppressive act of the British Parliament and a redress of other grievances; that as unanimity and harmony had hitherto prevailed among them, it appeared very extraordinary that any member should refuse to affix his name to what he had at least apparently approved, without any excuse or observation on the occasion; and that if there was anything treasonable, offensive, or indecent in the proceedings, he thought it would be an act of comity, nay, of duty, to advise his brethren of it. Other delegates spoke briefly to the same purport. Thus pressed to an explanation, the president, after a long pause, observed that it was against his conscience. Mr. McKean now rung the changes on the word conscience so long and loud that a plain challenge was given and accepted in the presence of the whole Congress; but the president departed from New York the next morning before the dawn of day.'"

The course of their representative was approved by the people of Delaware even enthusiastically. On his return he was appointed notary public and tabellion for the lower counties on the Delaware and justice of the peace and of the Quarter Sessions for New Castle County. When the period arrived for the Stamp Act to go into operation, Justice McKean promptly issued an order that the officers of the court should not delay in the performance of their duties, but continue them with the use of unstamped paper. This action has generally been considered the first of its kind in that momentous era.

In 1774, Mr. McKean finally removed to Philadelphia, and took up his residence as a citizen. But the people of Delaware, for a long time indeed a part of Pennsylvania, insisted upon at least having him continue their representative in all matters pertaining to the public coalition of the colonies. He never had the heart to decline their urgent solicitations, and from this time forth to the end of the Revolutionary war and the settlement of the Federal Union, he, though a resident and citizen of Philadelphia, continued to represent Delaware. As her representative he went to the First Continental Congress in New York, and is noted as being the only man who from this date to the final settlement, a period of more than eight years, was continuously a member.

A very singular error occurred in the matter of the Declaration of Independence by which by very many persons afterward Mr. McKean was believed not to have signed that paper, although known to have been one of the most ardent and eloquent among those who effected its adoption. The error is accounted for in this manner (in Armor's "Lives of the Governors of Pennsylvania"):

"It appears that on the 19th of July, two weeks after its passage, Congress directed that a copy of the Declaration should be engrossed on parchment and signed by every member. This engrossed copy was finished, and on the 2d of August was produced and signed. But previous to this day McKean had obtained leave of absence, being then an officer of militia, and for several weeks succeeding he was not in his place, he being absent on the 2d of August and before his signature was affixed. But his presence was too notorious to occasion any question as to the fact, even without his own testimony. When the preliminary vote was taken on the 2d of July all the States declared in favor of it, except Pennsylvania and Delaware. Of these McKean voted for it, Read against it, and Rodney, the third, was absent. Seeing that the vote of his State was likely to be lost, McKean sent a messenger, at his own expense, posthaste, to summon the absent member. He arrived in time to vote for the measure, thus carrying the State in its favor, and some of the opposing members of the Pennsylvania delegation absenting themselves, the vote was finally made unanimous."[1]

Immediately after the adoption of the Declaration by Congress the State of Pennsylvania appointed Mr. McKean to the command of the regiments hastily formed to be sent to Perth Amboy to the support of Washington, who, with inadequate forces, was en-

[1] The following shows what important consequences may sometimes follow an omission that at the time of its occurrence is scarcely regarded. Mr. Alexander James Dallas called the attention of McKean to the circumstance afterward, and received an answer, part of which is as follows: "My name is not in the printed journals of Congress as a party to the Declaration of Independence, and this, like an error in the first Convention, has vitiated most of the subsequent publications; and yet the fact is, that I was then a member for the State of Delaware, was personally present in Congress, voted in favor of independence on the 4th of July, 1776, and signed the Declaration after it had been engrossed on parchment, where my name, in my own handwriting, still appears."

deavoring to protect New Jersey from the British. As soon as relieved from this duty he returned to Philadelphia, where he ascertained that the people of Delaware had chosen him as a member of their convention, now assembled for the purpose of forming a Constitution. He set off without delay for Dover, and during the night of his arrival wrote out that document which, on the very next day, was unanimously adopted. In 1777 he was appointed chief justice of Pennsylvania, and accepted the office not without much reluctance. The prodigious powers for business that he possessed are known from the fact that he was yet a member of Congress, and that his little native State, unable to part from the service of her favorite son, elected him her president. It is interesting to consider this long, even affectionate, attachment between Mr. McKean and the State of Delaware. As he had done while its representative in the Assembly, he remonstrated with it in 1780, begging them to allow him, on account of the pressure of his other duties, to resign the presidency. But the people could not be brought to comply with his request, and it is another evidence of the greatness of his spirit that he was receiving no salary for his services. On the 10th of July he was elected president of Congress, which position he continued to hold until November, when he resigned it, preparatory to proceeding to take his seat upon the Supreme bench. In this capacity he served until 1799, when he was elected Governor of Pennsylvania.

In the first establishment of hostile parties, led as these were by Adams and Jefferson, McKean, with all the ardor common to his spirit, aligned himself with the latter, and it was as a Republican of the Jeffersonian school that he was elected. The hostility between these parties was most acrimonious, and men of great parts and great courage, who were placed in public positions, must personally have known what it was to attack and defend in long-continued and bitter warfare. In that period many questions that were new must have constantly arisen, in the study and discussion of which it is not to be wondered that many men became illustrious. The office of Governor at that day had a hundredfold more numerous and weighty responsibilities than have ever attached to it since. Thus Governor McKean writes, not long after he had been settled in office,—

> "Though my situation in life is changed my cares remain. I have never had greater employment for body and mind than for the last six months, unless when I was president of Congress. I have waded through a sea of troubles and surmounted my principal difficulties. I have been obliged (though no Hercules) to cleanse the Augean stable[1] with little or no aid, for I am my own minister and amanuensis. A Governor of Pennsylvania has more duty to perform than the President of the United States or any other Governor in the Union."

For three consecutive terms McKean was elected Governor. In his last term he was impeached, to such a degree had political animosities risen. But the trial of the impeachment was never had. A paper that he submitted to the Legislature defining the relative powers and duties of the three branches of government was so exhaustive and convincing that the prosecution was allowed to drop, from the conviction of his enemies that it could not succeed and ought not. This is considered one of the ablest State papers that the country has produced. At the end of his third term he retired from office. In a letter to John Adams (with whom, in spite of his adhesion to the school of Jefferson, he had ever had very friendly relations), written after his retirement, he says, "Three years ago I shook hands with the world, and we said farewell to each other; the toys and rattles of childhood would, in a few years more, be probably as suited to me as office, honor, or wealth; but, thank God! the faculties of my mind are as yet little, if anything, impaired, and my affections and friendships remain unshaken. Since my exemption from professional and official duties I have enjoyed a tranquility never (during a long, protracted life) before experienced, and my wealth and comforts are sufficient for a moderate man." He died on the 24th of June, 1817, and was buried in the yard of the Presbyterian Church, in Market Street, Philadelphia.

Judge McKean was the first to preside upon the bench of the Supreme Court after the Declaration of Independence. In spite of the deliverance from royal government, yet it was too soon to throw away all forms which had prevailed in the tribunals of justice, and there was a dignity in the conduct of business very different from what afterward came to prevail there, as in courts elsewhere, except that of the United States. "The judges, it is true, had thrown off their wigs, but they nevertheless retained the robes and such appliances as probably, in their opinion, contributed to make 'ambition virtue.' In taking their seats at the opening of the court in the city, as well as in the counties, with all their professed republican principles, they followed and imitated at no great distance the examples of the judges of the English court of king's bench. The sheriff in all his pomp, together with the tipstaves and attendants, assembled at the commencement of the term, and swelled the retinue of the chief justice and his asso-

[1] The allusion to this one of the "labors of Hercules" was suggested by the habit lately adopted by the followers of Mr. Jefferson of putting into practice the motto, ascribed to him, "to the victors belong the spoils." A man of the temper of McKean might be expected, if he ran this schedule at all, to run it through regardless of all opposition. That he approved it was early evinced both by his actions and his words. Thus, in three months after Mr. Jefferson's inauguration, he writes (July 10, 1801) to him: "It appears that the anti-Republicans even those in office, are as hostile as ever, as insolent. To overcome them they must be shaven, for in their offices (like Samson's hair-locks) their great strength lieth. Their disposition for mischief may remain, but their power of doing it will be gone. It is out of the common order of nature to prefer enemies to friends; the despisers of the people should not be their rulers, nor men be vested with authority in a government which they wish to destroy. A dagger ought not to be put into the hands of an assassin. Sayings of this import are in the mouths of everybody, and self-preservation seems to demand some attention to them."

ciates as they proceeded to assume their respective places upon the judicial seat."[1]

It is not uncommon for a man who has been most restive under authority that he considers oppression, when once invested with it himself, to employ it after the arbitrary manner of which it had been his wont to complain in others. This was the principal fault that the bar of that time had to complain in the administration of Judge McKean. David Paul Brown says that, but for the courage of those who were leaders in the profession, his rule would have been a very hard one. In spite of the inflexibility of his integrity, his imperious temper sometimes rendered it most unpleasant to practice in his court. Before such a judge coolness and courage are often very available. The author just alluded to gives an instance in the case of Gouverneur Morris. "While Gouverneur Morris was addressing him some remark that he made gave offense to his Honor, who, turning to the counsel somewhat roughly, commanded him to take his seat. Mr. Morris, who was a man of lofty spirit, replied, 'If, sir, you do not wish to hear me, I will cease speaking; but whether I shall *sit* or *stand* depends upon my own convenience, and I prefer *standing*.'" Ardent as was his temper, arbitrary as was his rule, he was never a man to exert his authority strenuously, except where, in his opinion, it seemed becoming. On one occasion, when his warrant for the arrest of a quartermaster who was then serving under Gen. Greene, at the encampment at Valley Forge, and when that general had written to him that he could not spare his subaltern from the service just at that time, and asking that he might be allowed to put in his recognizance for his appearance at court hereafter, the judge, in firing indignation at the interference with his authority, wrote to the general a letter, in which, among others like, occurs the following: "I do not think, sir, that the absence, sickness, or even *death* of Mr. Hooper could be attended with such a consequence that no person could be found who could give the necessary aid upon this occasion; but what attracts my attention the most is your observation that *you* cannot, without great necessity, consent to his being absent. As to that, sir, I shall not *ask* your consent, nor that of any other person in or out of the army, whether *my precept* shall be obeyed or not in Pennsylvania."

When a man who is suspected of wishing to be despotic is himself of intrepid courage, ready to employ it on occasions of whatever emergency, and especially in the cause of right, he cannot but obtain great respect, even among those who suffer most under his rule. The "Forum" gives the following account of his action on one of such occasions: "It happened upon one occasion, while the Supreme Court was holding an important session, during a period of great political and public excitement, a large assemblage of persons and a consequent tumult occurred in the immediate vicinity of the court-room, and interfered materially with the transaction of business. The chief justice sent for the sheriff, and directed him immediately to suppress the riot. The sheriff soon afterward returned, and declared his inability to do so. 'Why, sir,' said the chief justice, 'do you not summon your posse to your aid?' 'I *have* summoned them,' was the reply, 'but they are totally inefficient, and the mob disregard them.' 'Why do you not summon ME?' said the chief justice.' The sheriff, looking somewhat confused for a time at this direct appeal, at length said, 'Well, sir, I DO summon you.' Whereupon the chief justice immediately left the bench, proceeded to the scene of disorder, and seizing two of the ring-leaders, placed them in custody, which, together with the influence of his standing and authority, at once restored matters to peace."

[1] Brown's Forum.

The appointment of William Tilghman as chief justice of the State was very distasteful to the Democratic party, especially the leaders. A man so modest and so reserved, who had kept himself to his profession, and taken no prominent part in politics, could not be expected to receive the warm support of those who had already begun to know how to make politics something of a trade. Then the aristocratic bearing of Mr. Tilghman was against him. A town-meeting had been held in Philadelphia, wherein resolutions were adopted by the Democrats of that city expressing their objections to him, and a committee was appointed to wait upon the Governor, now in the second term of office, present the resolutions, and beg him to withhold the nomination of one thus shown to be obnoxious to so large a number of the party that had elected him Governor. He received the committee, listened to the address of the chairman, and then answered, "Indeed! Inform your constituents that I bow with submission to the will of the great Democracy of Philadelphia, but, by G—d! William Tilghman *shall* be chief justice of Pennsylvania!" He was a man of noble presence, tall, erect, usually wearing a cocked hat, and carrying a gold-headed cane.

Bushrod Washington must be noticed among the occupants of the bench and bar of Philadelphia, as much of his career was spent in the city from his appointment under John Adams as associate justice of the Supreme Court of the United States (1798) until his death, in 1829. This appointment was of scarcely less importance than that, shortly afterward, of Marshall to be chief justice. The career of no man who ever sat upon the bench in any of the courts of the United States has been the subject of higher praise than that of Bushrod Washington. A man of small stature, delicate, gentle, almost feminine in appearance and manners, yet he united the qualities that these might be expected to exhibit, with a strength of purpose and will that altogether made him as

nearly perfect a judge as ever lived. It has ever been remarked how more impressive are the fully-determined mandates of those who utter them without passion, yet with the appearance of inflexible purpose to have them executed, than those intemperate, hasty, and irate, that come from the passionate and fretful. Before Justice Washington, while those disposed to be overbearing to the juniors at the bar might be quietly and easily restrained, the young and the modest found in him a most valuable ally in supplying them, as far as was consistent with his judicial position, with confidence and courage. Even to the lower officers of his court he was wont to speak with the respect which a good man, however exalted in position, always feels for every other who is acting in his sphere, however lowly, with fidelity. The very hardest expression recorded of him in his relation with these inferior officers is that when, upon an occasion, when on account of the crowded state of the court-room, hindering somewhat the usual transaction of its business, a bailiff, disposed, as it appeared, more to exhibit his own importance than to suppress the confusion, had ordered silence several times in a very loud tone to little purpose. The judge said to him, "Mr. ——, it seems to me that you make much more noise than you suppress, and if I should have occasion to speak again upon the subject, it will be to your successor." Two men could scarcely have been more unlike than Judge McKean and Judge Washington. Yet the authority of the latter was fully as complete in his court as that of the former. Patient, courteous, but firm and inflexible, he was just the sort of judge that was most suited to every class of practitioners. He early established that rule whereby a lawyer is made to testify in a case, if so asked, against his client in matters that come to his knowledge outside and independent of the communications of his client. It was in a trial where counsel had been asked by the opposing lawyer to testify merely in regard to the situation of the property, the right to the possession of which was being tried, and he had refused to take the stand, urging his privilege in that behalf. But the judge, without waiting to hear argument from the counsel who had made the motion, disposed of it summarily, thus, "You are not asked to state anything confided in you by your client; but the relation of client and counsel does not impart to the counsel any exemption from the obligation to testify to what he independently knows; if you know, therefore, you must state who was in possession of the land. Were it otherwise, when a member of the bar has knowledge of a fact important for the case of one party, it would only be requisite for the other party to employ him, and thereby defeat the purposes of justice." With all his reticence and gentleness of manner, he was sometimes, not often, driven to words that showed that he had within a spirit that, however he habitually restrained it, was strong enough for any purpose for which it might be thought necessary to employ it. A lawyer he was, complete as a man can become, in all the knowledge of his profession. He understood thoroughly the common law, and he therefore understood the relation borne to it by equity, when it was proper for its interposition, and what were its purposes, and its limits in such interposition.

David Paul Brown relates an anecdote of part of a conversation that occurred once between Judge Washington and Richard Stockton, then one of the leading lawyers of the bar of New Jersey. It was in relation to the embarrassed position in which Governor Desha, of Kentucky, had been placed by a flagrant crime of his own son:

"Mr. Stockton inquired, 'Have you seen the melancholy position in which Governor Desha, of Kentucky, has been placed by the crime of his son?' 'It is a sad affair,' said the judge. 'But,' rejoined Stockton, 'the worst of it is that the son, having been convicted, the Governor, his father, must now decide between signing the death-warrant or a pardon.' 'And that you consider a difficulty?' said the judge. 'Certainly,' replied the interlocutor. 'Why, I would like to know what you, an upright, impartial, and inflexible judge, would do in such a case?' 'Do?' was the reply; 'do?' his eye sparkling, and his little figure expanding by the side of his gigantic friend, 'why, sir, I would *pardon him at once;* the time has long gone by when it was deemed either natural or honorable to play the Roman father.' "

Such expressions coming from such a man at a time when mankind had not yet ceased to praise the horrible action of the elder Brutus, and other unnatural fathers who followed his example, were of inestimable value to a better ascertainment of the duties of those who, while in public positions, are sometimes called upon to decide upon questions on which it is only strange that the world should ever have entertained a doubt. It is, perhaps, a fact that that is the highest kind of courage that holds itself habitually in reserve for great occasion wherever its exhibition may be found necessary. The thoroughly brave man is apt to be mild, quiet, unaggressive, modest, cool. If entirely upright, he must have a consciousness of integrity that not only does not fear to be led far astray from just action, but is indifferent to whatever others may think of its possibilities. It is not easy to say what Judge Washington would probably have done in a case like that when Judge McKean ordered himself to be summoned upon the posse to aid the sheriff in suppressing a riot, but it is probable that had Washington been upon the bench at the time, and his presence there were known to the crowd, the riot would not have occurred, or if it had, then out of the hearing of the court. It may well be said to be a happy thing both for the State of Pennsylvania and the Federal government that such a man as Judge Washington was upon the bench during the contest between these two powers in the great case of Gideon

Olmstead, wherein he was called upon to decide upon the issue clearly made by Pennsylvania with the Federal government, the Legislature of the former having solemnly ordered the Governor of the State to resist the execution of a judgment of the court of the latter. Nothing could exceed the cool courage with which the judge bore himself throughout this trial, that lasted for several weeks. Outside pressure upon the court was constant, and conducted in such a manner as to be dreaded by almost any man, however solemnly convinced of his rights and duties. Threats had been made abundantly against the judge personally if he should dare to decide adversely to the defendants, whose cause the State had espoused. We believe that the records of courts may be sought in vain for a more consummate act of courage, prudence, and sagacity than that of the presiding judge upon the close of the arguments of counsel. The court was sitting at its usual place, in a house, the room on the ground floor of which was much more capacious than the court-room. A large and anxious crowd, that more than filled the latter, were on hand eager to hear the judgment of the court. Determined to have in view as many as possible of those who had threatened his judicial authority when it became necessary to assert it, with as much mildness of manner as he had ever employed in the issuance of the most trifling orders, he said to the crier, "Adjourn the court, to meet to-morrow morning in the room of the ground-floor of this building. This is an important case; the citizens manifest a deep interest in the result, and it is but right that they should be allowed, without too much inconvenience, to witness the administration of the justice of the county, to which all men, great and small, are alike bound to submit."

We close this notice by the following, taken from the discourse of Judge Hopkinson, delivered after the death of this illustrious man:

"Few, very few men, who have been distinguished on the judgment-seat of the law have possessed higher qualifications, natural and acquired, for the station than Judge Washington. And this is equally true, whether we look to the illustrious individuals who have graced the courts of the United States, or extend the view to the country from which so much of our judicial knowledge has been derived. He was wise, as well as learned, sagacious and searching in the pursuit and discovery of truth, and faithful to it beyond the touch of corruption, or the diffidence of fear; he was courteous, considerate, and slow in forming a judgment, and steady, but not obstinate, in his adherence to it. No man was more willing to listen to an argument against his opinion, to receive it with candor, or to yield to it with more manliness if it convinced him of an error. He was too honest and too proud to surrender himself to the undue influence of any man, the menaces of any power, or the seductions of any interest, but he was tractable as humility to the force of truth, as obedient as filial duty to the voice of reason. When he gave up an opinion he did it not grudgingly, or with reluctant qualifications and saving explanations; it was abandoned at once, and he rejoiced more than any one at his escape from it. It is only a mind conscious of its strength, and governed by the highest principles of integrity, that can make such sacrifices, not only without any feeling of humiliation, but with unaffected satisfaction."[1]

A leading character in the politics of the times before and some time after the Revolution of 1776, was John Dickinson. Like many others whose careers were spent mainly in Philadelphia, John Dickinson was a native of Maryland. Dr. Thomas Cadwalader, the councilor, whom we have sketched heretofore, had a sister who had married a rich Quaker, Samuel Dickinson, who had been the presiding justice in Kent County, on the Delaware. The country-seat of this gentleman was named "Crosia," and located in Talbot County, Md., on the Choptank River. Here was born his son John on 2d of November, 1732. After finishing his course at schools, he spent some time in the office of Lawyer Moland, in Philadelphia, and then went to London, where he spent three years in the further prosecution of his law studies at the Temple. Showing an early liking for politics, he engaged ardently in them, particularly in the Lower Counties, where Benjamin Chew was his ablest opponent. In 1762 he was elected from Philadelphia County to the Assembly, and in the following year, being re-elected, was placed upon the Committee of Correspondence.

The family of Penn, with far less sagacity, as well as sense of justice, than their illustrious progenitor, had made and insisted upon so many unreasonable exactions, that a party arose which had for its object the annihilation of the proprietary government altogether, and the relegation of authority to the crown. The ablest man in this movement was Benjamin Franklin. Dickinson was as much opposed as any to these exactions of the Penns, but was intensely hostile to the movement of Franklin. He argued that the main cause of the daring of that family proceeded from the sense of security which they had had in the approval of the British government in all their exactions, and that the removal of these petty oppressors would be followed by exactions the more oppressive, because made by a higher power, that was already resentful on account of what it deemed inadequate service rendered by Pennsylvania in the late war with France. But, through the management of Benjamin Franklin and Joseph Galloway, the measure was carried.

Dickinson continued his hostility after the adjournment. Through his exertions both Franklin and Galloway were defeated for the next Assembly, and himself returned. He could not prevail, however, in his efforts to have the petition recalled, and Franklin, notwithstanding his defeat at the polls,

[1] David Paul Brown, in the "Forum," makes a comparison between Judge Washington and Judge Tilghman. In his sketch of the latter he writes, "Yet with all his merits, and certainly he had no superior in those respects, his judicial manner was not equal to Judge Washington's, though superior to any other man that ever held his seat upon a Pennsylvania bench. They were equally learned in the law, or perhaps Tilghman's reading was the more comprehensive of the two. They were equally confided in by the public, but the advantage of Washington over Tilghman consisted in his imperturbable composure, 'his masterly inactivity,' until the hour of action arrived, when he struck an unerring and final blow. Whether he had less timidity than his great rival it is difficult to say, but he showed less, perhaps, than any man that ever held a similar post."

was elected to the commission to go with the paper to England.

The career of this remarkable man belongs to other fields rather than to this which relates the history of the bench and bar. His ardent nature led him to take active part in politics rather than pursue a profession in which, doubtless, he would have attained eminence corresponding to that which he won elsewhere. Notwithstanding his opposition to the Declaration of Independence, such was the confidence in his talents, integrity, and patriotism exhibited after its adoption, that about the year 1780 he was placed on the Supreme Executive Council, that had been created by the Constitution of 1776. This Council had been formed mainly upon the model of Penn's Provincial Council, established in 1683. This, as we have seen, was a judicial as well as political post, the members being also members of the High Court of Errors and Appeals. The office of president of this Council was elective by its members. In 1782, Dickinson was chosen to it. During his administration as such president Dickinson College was founded, to which he had contributed largely of his abundant means. His wife was Mary Norris, granddaughter of the councilor of "Fair Hill." Dickinson died Feb. 14, 1808.

F Hopkinson

In connection with him, it is perhaps most proper to mention here Joseph Galloway, who was, with Franklin, his leading rival in the political discussions of their times. Galloway was another of the many Marylanders the chief part of whose life in their most eventful periods was spent in Philadelphia. He was born near West River, on the Western Shore of Maryland, about the year 1729, the son of Peter Galloway and Mary, daughter of John Rigbee. He began the practice of law at a very early age, for at that of twenty-one we find his name appearing upon the docket of the Supreme Court of Pennsylvania. Finding politics more inviting to his temper than law, he devoted himself to the former. His attitude toward independence when that great question came along was such as to drive him to expatriation. We shall see elsewhere the parts he enacted on this theatre and in that of letters. He t the town of Watford, in Herts, England, the place of his residence. His residence while in Philadelphia was at the southeast corner of Sixth and High Streets. Attainted of high treason in 1789, among other things done with his estate, this house was appropriated by the Legislature as a residence of the Supreme Executive Council. It was afterward bought by Robert Morris. Galloway's mother was Grace Growdon, daughter of Lawrence Growdon, the councilor, before mentioned.

Francis Hopkinson, one of the most eminent men of his times, was the son of the Councilor Thomas Hopkinson, by his wife Mary (*née* Johnson), of New Castle. This lady was of a distinguished English family, her grandfather, William Johnson, of Laycock Mills, having been granted in 1677, by Charles II., the reversion of the office of master of the rolls to succeed Sir Harbottle Grimston. Francis was born in 1737 in Philadelphia. He was the first pupil to come forth from the College and Academy of Philadelphia, studied law under the Councilor Benjamin Chew, and was admitted to practice in 1761. Without having accomplished anything considerable by 1765, he then embarked for Europe, partly for the purpose of visiting his mother's relations there, among whom some, as the Bishop of Worcester, were in high positions. His principal object, however, was to obtain office of some sort from the Penns or the government. The office he sought mainly was that of one of the commissioners of the customs for North America. He maintained with leading persons relations pleasant in all respects, except in obtaining the office he desired. Upon his return he resumed the practice of his profession, and at the same time engaged in merchandising on Race Street, above Third. In 1772 he obtained the office of collector of New Castle. Having intermarried with Ann, daughter of Joseph Borden, of Bordentown, N. J., he had the business at New Castle attended to by deputy, and for a while residing at Bordentown, was a member of the Provincial Council of New Jersey. In 1776 he was chosen one of the State's delegates to the Continental Congress. Here he was one of the committee for drafting the Articles of Confederation, and favoring

Digitized by Google

independence, became one of the signers. He was placed afterward at the head of the Navy Department of the newly-formed government, and was treasurer of the Continental Loan Office.

Mr. Hopkinson had great powers of ridicule, and no production of greater literary merit, it is probable, ever had more successful influence in the production of what was intended than his "Battle of the Kegs," written in relation to the attempt upon the British in Philadelphia, in 1778, by sending floating torpedoes down the Delaware. In the following year the Supreme Executive Council of Pennsylvania appointed him judge of the Admiralty at Philadelphia. After the convention that formed the Federal Constitution, he wrote another humorous piece for another serious purpose. This was "The New Roof," and, like its predecessor in the same vein, contributed wonderfully to making that document acceptable among the people. The establishment of the District Court of the United States for the District of Pennsylvania drew to it the jurisdiction in Admiralty, and of this court President Washington appointed him judge. The name of Francis Hopkinson stands among the very highest upon that long list of distinguished Philadelphians who made the bench and bar of their city the most illustrious in the country during many years, and his numerous posterity may recall with much pride the history of his actions. One of these, his son Judge Joseph Hopkinson, was perhaps fully his equal as a lawyer and judge, and his superior in literary culture.

Joseph Reed was one of the most distinguished men of his time. He was of a family that, many years before his birth, in 1741, had emigrated from Carrickfergus, Ireland, and settled near the town of Trenton, N. J. His father, Andrew Reed, married Theodosia Bowes, and was for most of his life a merchant at Trenton. Shortly after the birth of Joseph he removed to Philadelphia, but in the course of about ten years went back to Trenton. Joseph's college education was at Princeton, where he took the first academic degree when he was only sixteen years old. After graduation he began the study of law under Richard Stockton, a leading lawyer of the province, and was admitted to the bar in 1763. Not satisfied with the advantages he had had in his legal studies thus far, he went to London after his admission, and studied at the Middle Temple for two years, returning in 1765. Young as he was during this sojourn, he made himself thoroughly acquainted with the progress of the relation between the British government and the American colonies, and became an ardent opposer to the increasing oppressiveness of the former. Many of his letters written during this time have been preserved and printed in the work published by his grandson, William B. Reed, in 1847, entitled "Life and Correspondence of Joseph Reed." On his return from London he began the practice of his profession. His services, destined to become so valuable in the trying times that were hastening their approach, were for some time in danger of being lost to his native country on account of an attachment he had formed for the daughter of Mr. De Berdt, a prominent merchant in London, who had refused Mr. Reed's request to be allowed to marry her unless he would settle there. Some time after the latter's return, and while matters were discussed with great anxiety on both sides, Mr. De Berdt, who was a Dissenter, concluded to accept the appointment of agent for Massachusetts "to solicit and pursue the petitions of the General Congress." This appointment seemed favorable to a degree to the hopes of the young lover, as it identified the family of the woman he loved more closely with his native country. The five years following he devoted himself assiduously to his profession, and though he had rapid, abundant success, yet he was ever debating the question of whether or not he must comply with the terms on which he could obtain the object of his affections. Finally, at the death of his own father in 1769, he embarked for London, yet uncertain of his destination. Arriving there he found that Mr. De Berdt had died shortly before. Reed soon thereafter married, and in the latter part of the year 1770 returned to Trenton, and immediately removed his residence to Philadelphia.

Like Dickinson, Mr. Reed became so prominently engaged in politics that the greater part of his ablest endeavors were spent in public affairs. His connection by marriage with some of the best London society led to his intimate acquaintance with some of the leading statesmen of Great Britain, among them Lord Dartmouth, who, on the resignation of Lord Hillsborough, in 1772, became Secretary of State for the Colonies. In the work of William B. Reed, before referred to, is given some very interesting correspondence between Mr. Reed and this nobleman upon the exciting topics of the day. Along with this correspondence is that with Mr. De Berdt, Mr. Reed's brother-in-law, Arthur Lee, and others. The conclusion of his last letter to the earl we must insert here, although it has no reference to the subject we have immediately in hand in this chapter. It was written Feb. 10, 1775, in Philadelphia. Mr. Reed had never disguised from his lordship his own views concerning the matters in dispute between the colonies and the mother-country. At this period matters had become so exacerbated that Mr. Reed felt himself bound to intimate that if the correspondence he had had with the secretary was becoming embarrassing to him, he would cease to write. "If so," he writes, "a word to Mr. De Berdt will be sufficient, and I shall forbear to trouble your lordship further, though I shall ever retain sentiments of the most sincere and respectful devotion and gratitude for your condescension to myself, and the regard your lordship has often expressed for this unhappy country." After giving an account of the Provincial Convention that had met in Philadelphia, the reception the king's speech on colonial affairs had met with, and other things pertaining to the situation, he con-

cludes thus: "I am very sensible that the disposition I have mentioned may by some be imputed to timidity and apprehension of division among ourselves. That there are some in this province, and more in New York, who do not think with the Congress in all things is very true; but, on the best inquiry, the majority of a different opinion is too great, and the number of the dissenting too small, to make it a circumstance of material weight in any plan which may be formed. By what I have said your lordship will see that it is my opinion, if it can be reconciled with the dignity of the mother-country to express a desire of accommodation, and the present severities against Boston could be suspended on making satisfaction for the damage done the tea, the Americans may think it their interest to recede in some degree from the line of jurisdiction drawn in Congress. But this country will be deluged with blood before it will submit to any other taxation than by their own Legislature."

On the 15th of June, 1775, George Washington, then a member of Congress, was made commander-in-chief of the forces that had been raised when, after the battle of Lexington, the war of the Revolution had fairly begun. Shortly afterward Mr. Reed was made his military secretary. This action was surprising to his friends, who remembered how conservative he had been during all the preliminary public transactions concerning the difficulties with the mother-country. To one who warned him of the dangers to which he was subjecting himself by his present prominent connection with the rebellion he coolly answered, "I have no intention to be hanged for half-treason. When a subject draws his sword against his prince, he must cut his way through if he means afterward to sit down in safety. I have taken too active a part in what may be called the civil part of opposition to renounce without disgrace the public cause when it seems to lead to danger, and have a most sovereign contempt for the man who can plan measures he has not spirit to execute." In June, 1776, Mr. Reed was appointed adjutant-general, an office which had just been made vacant by the promotion of Gen. Gates. The correspondence of Mr. Reed ever after his joining the army, especially with Gen. Washington and Mrs. Reed, is deeply interesting.[1]

In June, 1777, Reed was offered the post of brigadier-general, but declined the appointment. So he did with that of chief justice of the State of Pennsylvania. The latter declination he made, giving among others as his reasons the some not yet fulfilled engagements he had with the commander-in-chief, which he could not relinquish. He was elected president of the State of Pennsylvania the following year, having resigned the seat which he had held in Congress for some time. The history of the succeeding three years of his life is the general history of Pennsylvania during that most important period. His connection with the judiciary was his being, by virtue of his office as president of the State, the president of the High Court of Errors and Appeals. "Thus," says his descendant, with honorable pride, "was the chief magistrate of the State, in these times of varied responsibility, directing legislation, administering an active executive trust, presiding in the highest court of justice, superintending the recruiting service and the discipline of militia troops, occasionally, as will be seen, taking the command in person and leading them to the field, and all this amidst the fury of party conflict, and in the agony of a civil and Indian war."

Mr. Reed had been elected chief magistrate of the State for three successive terms, the last of which expired just after the surrender of Cornwallis and the attainment of independence. The Constitution under which he had been elected had established ineligibility for a longer period than three terms. So, in 1781, in the month of December, he retired, and the office devolved by election upon William Moore, who had been lately Vice-President. He at once went back to his profession of law, and with all the zeal possible to one whose health had been permanently injured by the enormous work he had done, and the exposures to every form of hardship that had befallen him. Much notoriety was attached to his employment by the State as one of the counsel in the important controversy between Pennsylvania concerning the right to certain lands in the Wyoming settlement. This exciting controversy had at last to be referred to Congress, which appointed a committee to sit at Trenton, and after hearing decide the case. Mr. Reed's associates in the case were William Bradford, James Wilson, and Jonathan Dickinson Sergeant. His speech in the trial was represented to be one of masterly ability.

In spite of so much of his time having been given to matters outside of his profession, he yet, in the intervals when he could attend to it, had a large practice, and had his health not been broken down by his arduous labors in other fields, he was yet young enough to have won a yet higher distinction than he had already achieved. For he was now only just past forty years of age, a period when most of those who have won great professional renown were fairly established in the road leading to it. But his health d been injured beyond all hope of recovery. After ain effort to recruit it by a voyage to England, in

[1] In his letter from New York, Sept. 2, 1776, he writes confidentially to his wife concerning the unexpected attitude of various persons of their acquaintance toward the dangerous questions of the day. We insert the following from this letter as containing a compliment to the Tilghmans: "When I look round, and see how few of the numbers who talked so largely of death and honor are around me, and that those who are here are those from it was least suspected (as the Tilghmans, etc.), I am lost in wonder and surprise." This is a very high compliment to a family who had been so opposed to open rupture, but who, when it must come, devoted themselves to their country's cause with the same faithfulness that had characterised them in all other co
fore. Of Tench Tilghman especially, brother of the chiel
ington was extremely fond.

1784, he returned, and died March 5, 1785, at his residence, Chestnut Street, below Fourth. He died at the age of forty-four years.

Not very long after the beginning of Joseph Reed's professional life, upon his settlement in Philadelphia, a young man, a native of Connecticut, came to his office, and began the study of the law. He was less than ten years younger than his preceptor, and was the first of a name that was destined to become eminently distinguished in the legal profession. This was Jared Ingersoll. After admission to the bar of Philadelphia he made a voyage to Europe, where he spent several years, partly in studies and partly in journeying for the purposes of learning manners, customs, and institutions of various nations. He returned when about the age of twenty-nine years and began the practice. The culture that he had gained by extended travel, the freedom from haste with which he had gone to his profession, were of invaluable service to him in his subsequent career. The lessons he had gotten at the Inner Temple, the study he had made of whatever was peculiar and striking in the public transactions of foreign peoples, the ease, the deliberation, the polish that had become his own, came speedily to be remarked when he came to the bar, and it was but a short time before he was regarded as one of the most prominent of the young men at the bar that for fifty years had been the ablest and most distinguished in the United States. The man who is uncommonly accomplished in the various gifts which adorn a gentleman, whether in professional or social life, if he has delicacy and modesty along with these, carries with him a charm that it is beautiful to contemplate. Cultivated as Ingersoll had become, by his studies while abroad, of other things besides those pertaining to his profession, yet when he at length settled down to it, he seemed to have no other ambition than the rewards which single devotion to it would obtain for one competent for all of its behests. So he abstained from politics and everything else that would interfere with this devotion. Not in the office of Joseph Reed, not in his chambers at the Inner Temple had he been a closer student of law than during the whole course of his long professional life. It is curious to see, as we sometimes do, what power there is often in a man who either has not uncommon ardor, or who has schooled himself into the knowledge of how to suppress it. We have seen something of this in the life of Judge Washington. Jared Ingersoll was like that illustrious judge in this respect. He was a man whose forte was persuasion. No advocate of his time was his superior, if any was his equal, in this power of persuasion, a power which the old rhetoricians defined eloquence to be. Without exalting to an undue degree the conduct of his own clients, he was as far from derogating from that of his adversary, except on occasions where it seemed flagrantly wrong. He argued for his client with calm, sincere appeals to known principles for the guidance of transactions among men, and the knowledge that all men—judges and juries—had of his candor, his integrity, his learning, and ability, made him pre-eminently successful. In his relations with the bar, he was a model of that sort of deportment which, among lawyers who are gentlemen, is one of the chief glories of the profession. Never was there at the Philadelphia bar a lawyer who better understood the amenities of professional life, or practiced them with more constancy and ease. Yet he was very powerful as an advocate. He studied the case of his adversaries with the same care as he studied his own. He saw with extraordinary quickness whatever points in his adversaries' cases were weak, and when he saw them, he attacked them with just the force that was necessary, and no more, to overcome them. It has been said of him that in this respect, and in that of defending weak points in his own cases, he was the first man of his time at the bar. He had a very large practice in the Circuit Court of the United States, in which he was pre-eminently successful in winning cases.

The case in which Mr. Ingersoll was, perhaps, most successful in the display of his extraordinary powers was that in which, along with Mr. A. J. Dallas, he appeared in the Senate of the United States in defense of William Blount, a senator of the United States from Tennessee, who was impeached for conduct alleged to have been committed by him for the purpose of alienating the various tribes of Indians from the treaties entered into between them and the government. Mr. Adams, then President (1797), gave the impulsion to the impeachment by an alarming message to both Houses, wherein he offered his opinion that the country was in peril from various internal schemes, at the same time accompanying his message with documents, among which was a letter written by Senator Blount on the 21st of April of that year. The letter, if not obviously designed for the purposes of which it was suspected, was eminently imprudent and unbecoming a senator of the United States. The speech of Mr. Ingersoll on the trial of the impeachment has been considered one of the very best specimens of forensic eloquence that the whole country has given.

A man of a temper like Mr. Ingersoll, if unusual accidents do not hinder, lasts a long time. The periods of revolution and war bear with especial heaviness upon the bar, which needs peace for its continuous successful progress. Men that, in 1776, were rich, or living in the promise of riches, met great changes during the seven years of war that followed, and those others which were spent in endeavors to recover from the effects of war, and besides in organizing a new *régime* under which to live after the attainment of independence. When these were over the most, however prosperous they had been before, were now to begin life over again, and at middle age renew, or try to renew, the strength as the struggle of young man-

hood. It is notable of the bar of the country how successful were these efforts among them. It was a noble sight to see men of forty and upwards going back to their professions and taking them up where they had left them nearly ten years before and prosecuting them with the cheerful energy of men of twenty-five and thirty. But men of the class that led the bar in the latter part of the last century were such as had not gone into the profession merely or mainly for the sake of pecuniary rewards. Such men, therefore, when the period of peace came, could afford to be cheerful, and content themselves with what rewards were to follow industry and genius in the time that was left wherein to employ them.

It has been remarkable in the history of Pennsylvania that party politics, purely *as* party politics, have had less to do with nominations to offices connected with the judicial administration of the law than in any other State of the Union. A remarkable example of this sort was the case of the appointment, in 1811, by Governor Snyder to the post of attorney-general of that State. Governor Snyder was at the head of the Democratic party in the State, and it behooved him to nominate to that office a man known to be competent for its duties. He would gladly have appointed Mr. Dallas, but that gentleman had already the United States district attorneyship, which he would not have exchanged for the other. It so happened that among the others of the bar belonging to that party there was not one who could be acknowledged generally to be fully fit for the position. Mr. Ingersoll, therefore, was entirely taken by surprise when one day he received a commission to that office from the Governor. The surprise was none the less, because he had been sounded, without his own knowledge of such intentions, on the part of those whom the Governor sent for this purpose, and who had found, upon his own frank, unsuspicious admission, that it was an office that he would be willing to accept, if tendered. Immediately upon his admission, the blank in the commission, which was in the hands of the Governor's friends in Philadelphia, signed by him, was filled with Ingersoll's name, and put into his hands. This position he held from 1811 to 1816, when he resigned. In 1820 he was appointed judge of the District Court for the city and county of Philadelphia. This position he held until 1822, when, on the 31st of October, he died, being then seventy-three years old. He was among the last of those that wore such dress as was common to the profession then, consisting usually of a drab body-coat and small-clothes, with silk stockings, and shoes with buckles. It was getting to be the end of professional dressing, a habit of long antiquity, that the older members of the bar had not the heart to depart from, notwithstanding the changes that new times had brought, and the occasional smile that would be bestowed upon remaining fondness for old manners. It would have been well if in casting

aside these harmless memorials of former times, subsequent generations had not left with them so much of that dignity of deportment that was contemporary with them.

Mr. Binney, in his sketches of the "Leaders of the Old Bar," speaks with great earnestness in relation to the power of Jared Ingersoll before a jury. He says,—

"His professional character, fairly and not partially described, is that of a very sound and well-read lawyer, and a most consummate advocate. Though he was strong as a lawyer in learning, and in the accomplishments which assist the application of it, his great forte was at the bar, in the face of an intelligent jury, and, indeed, of any jury, and second only to that was his power with the court. In his full vigor, which continued for nearly twenty years after the year 1797, I regard him as having been, without comparison, the most efficient manager of an important jury trial among all the able men who were then at the bar of Philadelphia."

Like the Ingersolls, the family of Dallas have become illustrious on the theatre of the law. Alexander James Dallas, who in his double *rôle* of lawyer and statesman combined as much talent as perhaps any man of his day, was a native of the island of Jamaica, where he was born in 1759. His father, Robert Charles Dallas, had emigrated from Scotland. His first studies were carried on at Kensington, near London, where his father had gone mainly for the purpose of obtaining for his children opportunities superior to what could be obtained at home. His father having died, leaving his estates in Jamaica somewhat embarrassed, and his mother having married again (with Capt. Sutherland, of the British navy), Alexander, thrown upon his own resources, even at the early age of fifteen, determined to adopt the profession of a lawyer, and entered his name at the Temple. But further reflection led him to enter the counting-room of an uncle by marriage, a merchant in London. At the end of two years, this relative having ceased business, the youth quitted London, and sojourning with his family, who then resided in Devonshire, he devoted himself to such readings as in his opinion would be best suited to qualify him for the career he had chosen. At the age of twenty-one he married Arabella Marice, daughter of Maj. George Smith, of the British army. After a brief sojourn in the West Indies, whither he had emigrated after his marriage, he finally set sail for the United States. Here he arrived in the year 1783. As soon as he had passed the time (two years) which, unreasonably enough, had been prescribed by the courts, of the residence in the State of applicants for admission to the bar, he entered upon the practice. In this interval, besides what business employment he could obtain, he devoted some of his time to the assistance of Lewis Hallam in his efforts to lift the drama from the low standing it had hitherto occupied, and contributed liberally with his pen in the way of addresses, prologues, epilogues, and detached dramatic pieces. The time requisite to sojourn having elapsed, he was admitted to the Supreme Court in 1785. Yet he did not forsake the field of letters, as

will be seen by referring to the chapter on literature, especially in connection with Francis Hopkinson in the management of the *Columbian Magazine* and other literary periodicals.

Mr. Dallas, with all the ardor of his Scottish blood, soon became identified with the interests of the country he had adopted, its literature, its general concerns, especially its politics. His uncommonly versatile genius, the rapidity with which he worked, the self-disputed, laborious pursuits of his boyhood and youth, his tall, stalwart, vigorous, healthy body, his goodly manners, his ardent temper, his intrepid courage, all combined to fit him for important distinguished work in a country great in resources and full of great possibilities. The new form of government for Pennsylvania went into operation in 1790, when he had been a resident five years, time enough for such a man to fully comprehend its elements, and its needs. This same year, the first volume of his "Reports of Pennsylvania Cases" was published, destined to be followed by three others, and to become and to continue one of the most valuable contributions ever made to the law library. Henceforth, the name of no man in Pennsylvania was more conspicuous. The following contains a brief summary of his public actions hereafter, taken from a contribution to the *Sunday Dispatch* of January, 1875, by Thompson Westcott. After mentioning some of the events in the life of Mr. Dallas preceding the publication of these Reports, he says,—

"These cases not only contained the judgments and arguments before the Supreme Court, but many cases disposed of before the Revolution. They carried the Reports from 1790—when the first volume was published—to 1807. They contained decisions of the Supreme Court, High Court of Errors and Appeals, and of the Courts of Common Pleas and of the United States in Pennsylvania. Mr. Dallas soon became prominent in politics. He was appointed Secretary of the Commonwealth of Pennsylvania Jan. 19, 1791, and held that office until April 28, 1801. At this time he was appointed by Mr. Jefferson attorney of the United States for the Eastern District of Pennsylvania, and was appointed in July, of the same year, by Governor McKean, recorder of the city of Philadelphia. He resigned the latter office in 1802; but he held the office of district attorney until 1813, when he was succeeded by Richard Peters, Jr. In October, 1814, he was appointed Secretary of the Treasury of the United States, and, on the 13th of March, 1815, also assumed the duties of the Secretary of War, which, together with those of Secretary of the Treasury, he discharged until he resigned in November, 1816, and returned to the practice of his profession."

A. J. Dallas

All cabinet offices he had declined when first offered to him. On the relinquishment of the secretaryship of the treasury, in 1813, by Mr. Gallatin, who, with Mr. Bayard, had gone to St. Petersburg to join John Quincy Adams in the embassy to the emperor of Russia, who had proposed to exert his good offices in behalf of peace with Great Britain, this position was offered to Mr. Dallas, and at the same time that of attorney-general that had lately been made vacant by the resignation of William Pinckney, with permission to Mr. Dallas to choose for himself which of the two he would accept. Both these he declined in a letter to Hon. W. Jones, Secretary of the Navy (then acting also in Mr. Gallatin's place), 3d February, 1814. But he was afterward prevailed on to forego his aversion to a "permanent residence in Washington."

There is much that is touching in the cheerfulness with which Mr. Dallas in approaching old age submitted to the necessity of retiring from all business except professional, and devoting himself to the recruiting of his fortune, which had been much impaired by his long service in public life, where salaries are, as they always have been in our country, so inadequate to the service required. In the fair, affectionate, most tasteful memoir of Mr. Dallas, by his son George Mifflin Dallas, in the work entitled, "Life and Writings of A. J. Dallas" (J. B. Lippincott & Co., 1871), is recorded this brief account of his illness and death. After referring to his having been subject for many years to sudden attacks, conceived to have arisen from internal injuries received when he once had come near being drowned in the river Thames, he says, "While occupied in arguing an important suit at Trenton, before the then Governor and *ex officio* Chancellor of New Jersey, Mahlon Dickerson, he became conscious of the approach of his old and implacable enemy; asked a short delay, but was obliged to proceed; and concluding his address, hurriedly drove to his home in Philadelphia, and on the night of his arrival, the 16th January, 1817, died tranquilly, while his two sons watched, unaware of the crisis, at his bedside."

David Paul Brown, always so fond of bestowing

Digitized by Google

generous praise upon those of his profession who were deserving, says of him among many other things, "Mr. Dallas was a man of the most fascinating and courtly manners, and of the most impressive and dignified personal appearance. He dressed with great taste, ordinarily in a suit of olive-brown, with small clothes and top-boots. He had an abundance of hair, which he always wore powdered and gathered into a bag-cue. In everything he did, he was the embodiment of gracefulness. He never lost sight of what was due to himself or others." . . . "As nearly all the leading lawyers of the bar were Federalists, his position was at times rendered uncomfortable, if not disagreeable, and the very refinement of his sensibilities increased the penalties to which he was subjected. But even this could not deprive him of his self-reliance or of the force required in the conscientious and inflexible discharge of his duty.

"In his diversified and more attractive pursuits, it could not be expected that he should devote his attention at any time exclusively to the bar. Nevertheless he enjoyed a large practice, and always maintained his post in the first rank of the profession. His multifarious avocations did not afford him time to condense his arguments; and his style therefore was often diffuse, and somewhat redundant. He was undoubtedly less of a jurist than some of his contemporaries, but perhaps of a more general accomplishment than any of them. If he had not been a lawyer, he would have been a great statesman; and if he had not been a statesman, he would have been one of the greatest lawyers of the age."

A singular career in the history of the bar was that of Nicholas Waln, who, during the period of which we are now treating, began the practice under uncommonly good auspices. After his preliminary education, received in Philadelphia (he was born at Fairhill, Philadelphia County), he was admitted to the bar in 1768, and soon afterward went to London, where he spent some time in further study at the Temple. He had been at the bar several years, when a case occurred that ended in his separation altogether from his profession. That he was a lawyer of ability, with good promise of success, appears from the fact that for several years he was the partner of William Lewis, who in some respects was the first lawyer of his time. Whether Mr. Waln was a man of uncommonly acute sensibilities, or had not fully understood the merits of the cause that led to the action, to be mentioned presently, or felt that in his too eager pursuit he had been derelict in the duty that binds all lawyers never to overstep the limits of just discussion when pleading the cause of clients, cannot now be determined. At all events, he made a resolution and adhered to it for the rest of his life.

It was after he had been at the bar for some years, that having been struck with contrition, in consequence of his assistance in a case in which he thought his client had unjustly won the cause, he withdrew from the practice of the law, and subsequently devoted his life and energies to the service of religion as a preacher of the Society of Friends.

William Lewis was one of the rare exceptions to what seemed almost the rule in ante-Revolutionary times, that law students and lawyers should come of good families. He was of humble birth, born upon a farm in Chester County, in 1751, and having once gone into a court-house and seen and heard the distinguished men who were there, felt and immediately resolved to follow the instant impulse to become like them. Such a spirit will in time compass its purposes. He studied law with Nicholas Waln, above mentioned, and became his partner after admission to

the bar. He is a signal example of what genius and energy may do in spite of the want of preliminary advantages. Mr. Lewis had never had the facilities for cultivating the arts of forensic speaking, nor did he ever rise entirely above the roughness of voice and gesticulation that came to him in the farm-life he had led. And yet with all that roughness and sonorousness that attended the efforts of his stalwart lungs and brain, he has been accorded the very highest place among his contemporaries and rivals in the matter of forensic eloquence. He was one who seemed to have studied what were his possibilities, and what not, to have let these go without pain or reluctance, and make everything out of those. Wit and humor and sarcasm were with him, always abundant, and always fresh. These qualities he employed when they suited his purposes, but he employed them with the air of one who valued them little except for their temporary uses.

It seems impossible for those who have risen to eminence without those facilities enjoyed by most

Google

others who are no higher than themselves, to fail to overrate their own unaided endeavors, and imagine that, had they enjoyed greater facilities, they would have risen unquestionably above the rest of mankind. This inferiority doubtless appears more distinctly in such men, because they have never learned the art, like those risen in all stages of life amid the best society, to concede what others perhaps feel as keenly as themselves. An instance of what with such men as Tilghman and Ingersoll could never have occurred, is told in the "Forum." "He was a proficient in commercial law, and he was particularly disposed to exhibit his knowledge before those who professed to be most familiar with its principles, usages, and customs. The late Robert Morris, a thoroughbred merchant, on hearing Lewis discuss the commercial relations between this country and Europe, at a dinner at which they were both guests, observed to the party assembled, 'that Mr. Lewis seemed as familiar with commercial affairs as if he had been head of a counting-house all his life.' 'Let me tell you, sir,' said Lewis, 'that a competent lawyer knows *everything* that a merchant does, *and a great deal more.*'"

Perhaps, at least, such condition of mind may be necessary to a man risen far above the expectations of his youth, in order to make him feel secure against those smiles which, if he does not see, he suspects to often lurk upon the faces of his associates.

The rudeness of which we speak was of manner and voice, not of language. For he had made himself well acquainted with classical authors, and his style was often to be compared favorably with those lawyers who had ever had the best opportunities for culture in that respect. It was simply a wonder to hear him when thoroughly aroused, when, with his one gesture, a perpetual sawing the air with his outstretched arm, his stentorian voice sounding to a pitch not to be reached by one in a thousand, he poured forth continuously for hours an unbroken stream of eloquence, sometimes in language classic as was employed by the best men of Greece.

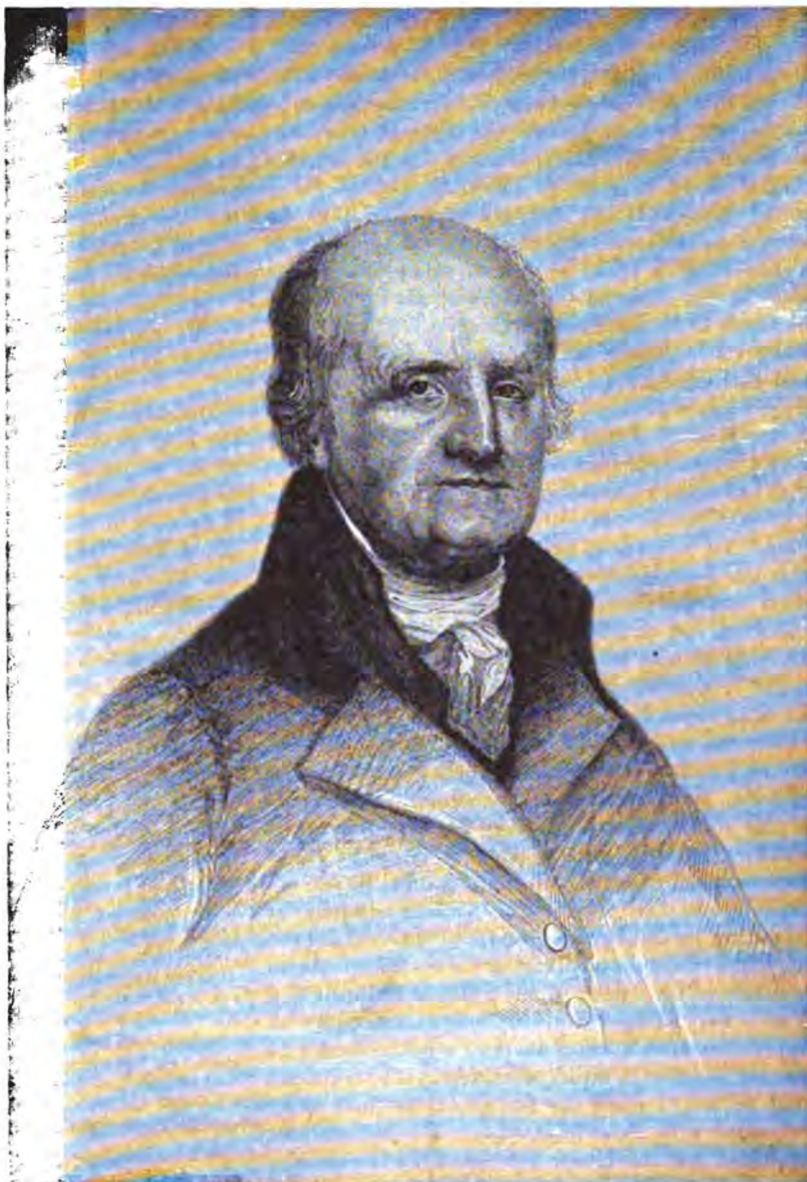
Withal, he was a man of exemplary sincerity and honor. An instance of the first is given by himself in an account of a case of great importance that he was engaged in at New York. He had courteously given a brief statement of his case and his authorities to Alexander Hamilton, who had been called into the case suddenly by Chancellor Kent, Mr. Lewis' opponent, who had been taken sick. Mr. Lewis says, Hamilton "thanked me, left me, and in an hour afterward we met again in court, and the argument at once proceeded. I spoke for several hours. The judges seemed to be convinced, and I was perfectly satisfied with the cause and myself. During the argument Mr. Hamilton took no notes, sometimes fixed his penetrating eye upon me, and sometimes walked the chamber, apparently deeply interested, but exhibiting no anxiety. When I had finished, he immediately took the floor and commenced his reply. What was my amazement when, in his first sentence, he acknowledged all my points, and denied none of my authorities, but assumed a position which had never entered my mind; to the support of which, directing all his great powers, in one-fourth the time employed by me, he not only satisfied the court, but convinced me that I was utterly wrong. In short, after all my toil and time and confidence, I was beaten, shamefully beaten." The instance given of his high sense of professional honor is given in the "Forum." Having been engaged by an influential citizen to defend him in a case of considerable magnitude, in the course of the trial it became apparent that the client had grossly misrepresented the case, and had been, in fact, guilty of a gross fraud; whereupon Lewis threw up his brief, and when called upon to speak for the defendant, he promptly declined. "Will you not speak?" said the client. "No, sir," said the counsel. "What then," said the suitor, "have I paid you for?" "You have paid me," replied the indignant advocate, "that you might have justice done, and justice will now be done, without my further interference."

Mr. Lewis confined himself more strictly to the law and paid less attention to politics than most of his contemporaries of equal professional rank, but he merits notice and remembrance in politics as the draftsman of the famous act of 1780, abolishing slavery,—the first act of the kind passed in any country.

Mr. Lewis was the most notable man of his time for his carelessness in the placing and preservation of his papers, and otherwise slovenly in the appointments and keeping of his office. This was the more notable because at that period the leaders of the bar were more distinguished than at any other time since for the neatness and order, and even luxuriance, with which their offices were kept. But a man seldom gets entirely over the habits and manners formed in childhood. His country-seat was near the Falls of the Schuylkill. Here he lived in almost entire exclusion the few years previous to his death, in his seventieth year. In religious faith he was a Quaker. He was buried in the graveyard of the Friends' Society.

Richard Peters was born in Blockley in 1744. He received his education at the Academy of Philadelphia, and afterward studied law, and was admitted to the bar in the year 1763. Eminently precocious, as eminently gifted in wit and humor, he rose with celerity into notoriety, yet he was not one to give to his profession the devotion that is necessary, even with the very greatest natural endowments, to enable one to rise to the very highest and necessary place. Probably there has never been on the bench of Philadelphia one of whom the memory that has been cherished is more hearty and even affectionate. Appointed a justice of the United States District Court for the Eastern District of Pennsylvania

in 1792, where he sat for thirty-six years, he began a career which for punctuality, painstaking investigation, anxious concern for the dispensation of justice to all, the humble and the exalted, has perhaps never been surpassed. An elegant classical scholar, to a great degree familiar with the literature of Europe, and with the language of two of them, France and Germany, he was withal the most incomparable humorist of his day, and it was charming how the dry and often painful work of his court was enlivened by sallies, never out of place, nor inconsistent with the speedy dignified progress of judicial proceedings. Then he was of an integrity so unspotted that no man, counsel or client, ever doubted that, so far as the bench was concerned, justice would not be hindered in its rendition by anything that was repugnant to it. Inferior to such as Washington and Tilghman in professional learning, he yet has ranked justly high among those who have occupied that exalted station since its first organization. In some respects he made himself particularly distinguished. Especially was this the case in the matter of admiralty rulings. When he died (in 1828), at the meeting of the bar of Philadelphia, Charles J. Ingersoll made an address, in which he paid to the deceased a compliment so deserved and so fitly spoken that we insert it here:



Richard Peters.

"To have been thirty-seven years a judge without ever failing to be punctual, patient, and painstaking, is more than but few can boast of. But Judge Peters, moreover, was a man whose purity was never doubted, and whose judicial faithfulness altogether was of a high desert. With the land laws, so important in this State, he was remarkably conversant. In the sea-laws, so important to the United States, he was almost the founder or reviver of a code which has not only been sanctioned throughout America, but received the remarkable acknowledgment of its unconscious adoption, about the same time, by the most profound judge of the greatest marine empire,—Lord Stowell, in Great Britain.

"It is a distinct merit in this system of [illegible] most advantage to navigation, besides being in itself a most honorable characteristic, that he uniformly vindicated and protected that humble, helpless, but useful class of mankind, the common sailors, from the oppression and extortion of their superiors, whether master, merchant, or proctor. Judge Peters was a man of considerable quickness of perception and of great sagacity. His judgments have been mostly supported, even when he differed occasionally with the eminent person who for thirty years has presided on this circuit, and displayed all the qualities of a great judge,—Judge Washington. Let me add, that in thirty years these gentlemen never differed but in conscientious judgment, the most cordial harmony marking and strengthening their administration. The constant cheerfulness which never forsook Judge Washington to the last, we all remember."

Digitized by Google

In the resolution adopted by the bar at this time it was said of Judge Peters,—

"His purity and integrity were never questioned. His industry, vigilance, fidelity, and punctuality never failed. No suitor was denied or delayed justice. The poor and humble were protected in their rights, and wrong-doers, of whatever class, were restrained and punished."

Hugh Henry Brackenridge occupied a place among the men of that period, remarkable in various ways. Born in Scotland in 1748, his family emigrated when he was five years old to America. By some means he had worked himself up into the place of teacher in an humble school in Maryland, and with the earnings therein saved he went to Princeton College (then called Nassau Hall), and, graduating in 1774, he studied for the sacred ministry, and was appointed to a chaplaincy in 1777. Giving up this profession, he went to the study of law, and was admitted to the Supreme Court of Pennsylvania in 1780. In 1799, when Chief Justice McKean was elected Governor and Edward Shippen made chief justice, Brackenridge became associate judge of that court along with Judge Yeates. Judge Brackenridge was the first to give a decided start towards overturning the decorum that had always seemed so becoming to the administration of justice especially in the courts of Philadelphia. To this there, perhaps, never lived a judge that was more indifferent. The accounts given of his dress and general physical deportment are almost shocking, and nothing but his well-known integrity and faithfulness to his duties would seem to have made it possible to tolerate them. It was often amusing to see the continued mutual repugnance between the two associate justices, a repugnance that not only almost never allowed them to harmonize in opinion, but sometimes in the absence of the chief justice to sit without speaking to each other, or if speaking, in words usually, however, begun by Judge Brackenridge, of petty fault-finding. Yet he was not capable either of perpetrating deliberate wrong or tolerating its perpetration if he could prevent it, even upon one whom he disliked or his associate. As an instance of the latter, when Justices Shippen and Yeates were charged (in 1805) before the Senate with oppression upon a suitor in their court, although he was not included in the impeachment, yet he requested that he might share the fate of his brothers as he coincided with them in opinion. The justices were acquitted, but the House petitioned the Governor to remove Justice Brackenridge for what they considered defiant conduct. This the Governor peremptorily refused to do. The rank of Justice Brackenridge is quite below many of those whom we have noticed in previous pages in this chapter, but his eccentricities were such as to make him one of the most frequently mentioned among his contemporaries.

The colleague of Justice Brackenridge, Justice Jasper Yeates, was a man his opposite in manners and breeding and superior professional attainments. He had studied in one of the Inns of Court in London. He was fond of society, but for its pleasures never neglected his official duties. Justice Yeates died at Lancaster March 14, 1817. The commission of Thomas Duncan, who was appointed an associate justice in his stead, bears date the same day, March 14, 1817.

Judge Duncan was a native of Carlisle, Cumberland Co., and son of a Scotch emigrant. He was educated at Dickinson College, and studied law at Lancaster under Judge Jasper Yeates, who was then on the bench of the Supreme Court. After admission to the bar he returned to Carlisle, where he was in practice for many years, and until his appointment to the Supreme Bench. After his appointment he removed his residence to Philadelphia, and resided in the city until the time of his death. Nevin says,—

"At the bar Mr. Duncan was distinguished by quickness and acuteness and discernment, accurate knowledge of men and things, with a ready use of the legal knowledge he so largely possessed. He was also remarkably ready in repartee."

Modesty seems to have been a family trait among the Tilghmans. Not very far below the great judge whom we have noted was his first cousin, Edward Tilghman, born at Nye, on the Eastern Shore of Maryland, in 1750. He was educated for the bar at the Middle Temple. During the war of the Revolution he remained abroad. On his return, and after his admission to the bar, he rose easily into practice, and was so eminent a man that the chief justiceship of the State was offered to him by Governor McKean upon the death of Chief Justice Shippen; but he declined it, and gave his influence in favor of his cousin. Edward Tilghman was a deep-read lawyer, particularly well versed in the abstruse doctrines of devises and contingent remainders. Judge Duncan said of him, "With one glance he took in all the beauties of the most abstruse and difficult limitations. With him it was intuition."

Mr. Binney says of him ("Leaders of the Old Bar"),—

"It was this quick and accurate glance that distinguished him in his arguments at the bar. The difference between cases, which to some men seemed contradictory or discordant,—the little more or less in circumstance,—he knew, and could touch as quickly as the musician touches the flats and sharps of a key-board. And he did it without the least affectation of learning, passing along them from one key to another with the purest modulation, and bringing them into harmony with the key of his own argument."

William Bradford, Jr., son of Col. William Bradford, the printer, was admitted to the bar in March, 1778. He was born in Philadelphia Sept. 14, 1755, studied at the College of New Jersey, and received the degree of Bachelor of Arts in 1772. He studied law with Edward Shippen, commencing in 1775. In 1776 he entered the American army as a volunteer, was appointed captain, and became deputy muster-master, with the rank of colonel. He resigned in April, 1779. According to the records, he was admitted to the bar a year before that time. He resided for a short time at York, Pa., but shortly afterward

came to Philadelphia. In August, 1780, the Supreme Executive Council of the State appointed him attorney-general, as successor of Jonathan Dickinson Sergeant. He held this office until Aug. 22, 1791, when he was appointed one of the justices of the Supreme Court of the State. He resigned that office in 1794, when he was commissioned, on the 28th of January, by President Washington, Attorney-General of the United States, succeeding Edmund Randolph. He died Aug. 23, 1795, from the consequences of exposure. Mr. Rawle says,—

"His course was as lofty as his mind was pure. His eloquence was of the best kind. His language was uniformly classical. His fancy frequently interwove some of those graceful ornaments which delight when they are not too frequent, and which do not interrupt the chain of argument. Yet his manner was not free from objection. I have witnessed in him what I have occasionally noticed in the public speeches of Charles James Fox,—a momentary hesitation for want of a particular word, and stopping and recalling part of a sentence for the purpose of amending it. Nor was his voice powerful, nor always varied by those modulations of which an experienced orator knows the utility."

David Paul Brown ("Forum") says that "within his comparatively limited space of life (he died before attaining the age of forty years) he exhibited more talents and achieved more honors than any other man of his.day."

Very high on the list of the distinguished men of that generation stands the name of William Rawle. He was born in 1759. After studying for some time under Councilor Kemp, of New York, he attended at the Temple. The most loving of all those admirable sketches in the "Forum" of David Paul Brown is that devoted to his preceptor. It is delightful to read a tribute so felicitous in expression and so just, springing from recollections of what were ascertained by the most familiar intercourse with one of the greatest lawyers and one of the best men of his day. In 1791, Mr. Rawle was appointed by President Washington district attorney of the United States, which position he resigned after the election of Mr. Adams. He had declined more than once the office of the Attorney-Generalship of the United States. Mr. Rawle devoted much of his leisure time to studies in literature, science, and art. His contributions to literature will be noticed in their proper place. He early conceived an earnest hostility to slavery of every kind, especially to that which obtained in the United States, and was one of that trio of eminent counsel (himself, Jared Ingersoll, and William Lewis), who, in 1805, argued before the High Court of Errors and Appeals of Pennsylvania the constitutionality of the existence of that institution in the State.

It is sad to contemplate a life so eminently felicitous from its beginning to past middle age, and then declining by the loss of so many dear objects. One after another of his grown-up children,—two daughters and one son,—all of much promise, and not long afterward his wife, were removed by death. To add to this, his immense fortune was lost, and old age found him poor and to a great degree desolate. But whoever can receive misfortune without complaint is superior to it, and such a man was William Rawle. The sketch in the "Forum" concludes thus: "For upward of a year before his translation to more kinder and congenial climes, while chiefly confined to that bed, which proved to be the bed of death, it was my privilege to have frequent opportunities of seeing and conversing with him. What a solemn and sublime sight! His whole soul had become concentrated and fixed on things above, and growing purer, as it looked toward heaven, was fashioned to its journey. He passed from works to reward on the 12th day of April, 1836.

'Night dews fall not more softly on the ground,
No weary, worn-out winds expire so soft.'"

In 1800, John D. Coxe was president judge of the Court of Common Pleas for the city and county of Philadelphia, and president judge of the First Circuit. Jacob Rush was appointed president judge in 1806, and remained in that position over fourteen years. In 1806, by an act of February 24th, it was established that the First District should be Philadelphia City and County only, and President Judge Rush was relieved of the labor of traveling the circuit. Samuel Badger was appointed associate judge April 15, 1814. He was a lawyer, and the first associate judge skilled in the law who had been appointed. He did not remain long upon the bench. Thomas Armstrong dated his commission from April 8, 1817. He was also a lawyer, and about this time the policy of the appointment of lawyers as associates seemed to have considerable strength at Harrisburg. George Morton, a lawyer, was commissioned Jan. 11, 1819. Edward D. Ingraham, also a lawyer, was appointed March 3, 1819. It is doubtful whether Ingraham ever took his seat upon the bench. He was succeeded, on March 29th, of the same year, by Hugh Ferguson, who was not a lawyer. He had been an active politician, and for many years colonel of the militia. Judge Ferguson remained on the bench for a long time. On the 19th of June, 1820, John Hallowell was appointed president judge, to succeed Judge Rush. In 1825, Judge Hallowell was transferred to the District Court. Edward King was appointed president judge of the Common Pleas April 22, 1825. He was a young lawyer, quite active as a politician, and held, at the time of his appointment to the bench, the office of clerk of the Orphans' Court. President Judge Coxe is said by Brown—"Forum"—to have held "a highly respectable position as a lawyer and a judge." He was admitted to the bar in 1780.

Judge Jacob Rush was admitted to the bar in September, 1777, and was one of the judges of the Supreme Court, and also of the High Court of Errors and Appeals, before the adoption of the Constitution of 1790. He was a brother of Dr. Benjamin Rush, and was born in 1746. He graduated at Princeton College in 1765. He died Jan. 5, 1820. Brown says of him,—

"He was a man of great ability and great firmness and decision of character. He was also an eloquent man. Perhaps there are few specimens of judicial eloquence more impressive than those charges which he delivered during his occupation of the bench. An accurate idea of his style may readily be formed from an extract of his charge to a grand jury in 1808, and his sentence pronounced upon Richard Smith for the murder of Carson in 1816. We refer as much to the moral tone of his productions as to their literary and intellectual power. . . . Some of his early literary essays were ascribed to Dr. Franklin, and for their terseness and clearness were worthy of him. . . . Judge Rush's charges to the jury generally, and his legal decisions, were marked by soundness of principle and closeness of reasoning. Having been a judge of the Supreme Court and of the High Court of Errors and Appeals, he never appeared to be satisfied in his position in the Common Pleas, yet his uprightness of conduct and unquestionable abilities always secured to him the respect and confidence, if not the attachment, of his associates, the members of the bar, and the entire community. He was one of the gentlemen of the old school, plain in his attire, and unobtrusive in his deportment; but while observant of his duties toward others, he was never forgetful of the respect to which he was himself justly entitled."

The fame achieved by Jared Ingersoll was well sustained by his two sons. Charles J. and Joseph R. Ingersoll were both eminent at the bar and in politics, though in the latter field, which is not often the case with brothers, they widely differed, the elder being a stanch Democrat, and the younger a Whig, though less prominent in political action.

Charles Jared Ingersoll was admitted to the bar on the same day as Thomas Sergeant. He became conspicuous in politics and as an author. He was a member of Congress in 1813–15, United States district attorney for Pennsylvania from 1815 to 1829, member of the Legislature from the county in 1830–31, and a member of Congress from the Third District in 1841–49. He was a member of the Pennsylvania Constitutional Convention of 1837–38. In his later years he was a frequent candidate for Congress, without success, and he was well known politically. He died May 14, 1862.

Joseph R. Ingersoll was admitted June 2, 1807, and for many years held a high position. He kept out of political life until the time of the excitement caused by the repeal of the charter of the United States Bank. He was a Whig, and held political opinions in opposition to the policy of Gen. Jackson. He was a member of Congress from 1835 to 1837, and from 1841 to 1849. He was minister from the United States to England from 1850 to 1853. He died Feb. 20, 1868. He was president of Select Council from 1832 to 1834. Both these are noticed in the chapter on literature.

John Bannister Gibson was born at Cumberland, Pa., in November, 1780. He was the son of Col. George Gibson, of the Revolutionary army, who was killed at the defeat of St. Clair, in 1791. The subject of our sketch was then eleven years old. His mother, who was of the family of West, one of the most gentle in Ireland, though sorely pinched for many years after her husband's death, stimulated and helped her son continuously. "My poor mother," he said once, in answer to inquiries concerning his maternal ancestry, "struggled with poverty during the nineteen years she lived after my father's death, and having borne up till she had placed me at the bar died." His collegiate studies were pursued at Dickinson College, and on their completion he began the study of the law under Judge Duncan, who was his kinsman, and was admitted to the bar in 1803. It is interesting to read of his continued struggles for support, and the compass of his ambitious hopes, after he came to the bar,—first, his going to Beaver County, in a remote part of the State, thence to Hagerstown, Md., thence again to Carlisle. A curious anecdote is told of him that, on one occasion, when he was informed that another lawyer had slandered him, on his meeting with the latter he gave him a flogging. The assailed challenged him to a duel. Meanwhile he had ascertained that his informant was mistaken in the person who had offended. Gibson, however, promptly accepted the challenge, and then, seeking out the real offender, flogged him. When the matter was explained to the challenger he was satisfied with the apology extended by Gibson, and through the interference of Judge Duncan the matter was amicably settled. In 1812 he received the appointment of president judge of the Court of Common Pleas for Tioga County, and on the death of Judge Brackenridge, in 1816, was appointed by Governor Snyder associate justice of the Supreme Court of Pennsylvania.

Judge Gibson's rank is among the very highest of Pennsylvania judges. In the matter of personal character his reputation was on a level with the best. Higher praise than that is not possible, when it is remembered how character has ever been cultivated and appreciated by the bench of that State. The assurance of his incorruptible integrity, an agreeable judgment that was unsusceptible, either of bias or prejudice, a mind of uncommon quickness and width of comprehension qualified him eminently for judicial service, and made him be regarded with profound respect by all classes. On the death of Tilghman, in 1827, he was appointed chief justice, and presided over the court for the long period of twenty-three years, until the judges were made elective by the amendment to the Constitution in 1850, when he was one of the five judges elected by the people, but on drawing lots for the terms, the shortest term, carrying with it the chief justiceship, was drawn by Judge Black. He remained, however, a member of the court until his death, in 1853. Judge Black, in the conclusion of a very able panegyric pronounced after his death, said, "Abroad, he has for very many years been thought the great glory of his native State. Doubtless the whole commonwealth will mourn his death. We all have good reason to do so. The profession of the law has lost the ablest of its teachers, this court the brightest of its ornaments, and the people the steadfast defender of their rights, so far as they were capable of being protected by judicial authority."

Peter Stephen Du Ponceau was one of the most

eminent of the men who came on after the Revolution, and he is specially to be commended for the services he rendered in the matter of putting the standard of law studies and law literature upon a high eminence; many are the anecdotes preserved of this Frenchman, justly eminent, as well for professional attainments as in other departments of mental culture. He was a native of the Isle of Rhé, on the west coast of France; came to America, when seventeen years of age, as secretary and aide-de-camp of Baron Steuben. In February, 1778, he was appointed brevet captain, and assisted Steuben in his efforts to introduce discipline in the American army. He left the army in 1780, became secretary of Robert M. Livingstone, head of the Department of Foreign Affairs, in October, 1781, and left that post in May, 1783. He then studied law, and was admitted to the bar June 24, 1785. He became eminent in the profession, particularly in the branches of civil law and foreign law, as well as in constitutional law, under the States and United States. As a linguist and philologist he was profound. In literature, science, and philosophy he was equally learned. He died April 2, 1844.

Jos. Hopkinson

Joseph Hopkinson, admitted May 4, 1791, was a son of Judge Francis Hopkinson. Joseph was born Nov. 12, 1778. He studied law, and was admitted to the bar. After his admission he practiced a short time at Easton, but soon returned to Philadelphia. He was counsel for Dr. Rush in the suit against Cobbett in 1799, and appeared for the Northampton insurgents before Judge Chase in 1800. He was a member of Congress from 1816 till 1820. He resided in New Jersey, 1820–23; then returned to Philadelphia, resumed practice, and was appointed judge of the United States District Court in 1828, and held that position until his death, in 1842. He was a leading member of the Convention to revise the Constitution of Pennsylvania in 1837. As the author of the song, "Hail, Columbia!" his name is known throughout the country.

Richard Rush, a man of excellent parts, would have become a great lawyer but for his fondness for politics, in which the greater part of his life was spent. His defense of Duane when the latter was tried for libel on Governor McKean was regarded as showing uncommon abilities. In the year 1811 he was appointed attorney-general of Pennsylvania, but held the office for only one year, preferring the appointment of controller of the United States Treasury. In 1814 he became Attorney-General of the United States, which position he also held for three years. He was temporary Secretary of State in 1817, and was minister from the United States to England from 1817 to 1825. In the latter year he was recalled by President Adams, who made him Secretary of the Treasury. He was candidate for Vice-President of the United States in 1828, upon the same ticket with President John Quincy Adams. Both were defeated. He was sent to England in 1836, by President Jackson, to obtain the Smithsonian legacy of over a half-million dollars. His last public service was as minister to France, from 1847 to 1851. He died at Sydenham, his country-seat, near Philadelphia, July 30, 1859.

Thomas Cadwalader, admitted in December, 1801, attained a very respectable practice, particularly valuable in the management of the estates of the Penn family. He was well known through his connection with the military, having been captain of cavalry, afterward lieutenant-colonel of a regiment of cavalry, brigadier general during the war with Great Britain, and subsequently was major-general of the First Division. He died Oct. 26, 1841. He was the son of Gen. John Cadwalader of the Revolution, and the father of John and George Cadwalader, the first of whom was for many years judge of the United States District Court, while the second was brigadier-general and major-general in the army of the United States during the war with Mexico and with the Southern States during the war of the Rebellion.

Among that body of lawyers was one who contributed, perhaps, as much as any other to the enjoyments of lawyers and judges, who are all gentlemen, and who have, more perhaps than any other profession, a keen sense of the humorous. This was a Hebrew.

Sampson Levy was born in 1761. A mind quite limited in its grasp, compared with those of the

Google

great men with whom he associated upon terms of equality, deficient in the knowledge of legal principles, never having been a student of any sort, yet by activity, wit and humor, and a certain sort of audacity that was offensive to nobody, he was enabled to rise into comparatively fine practice, and hold his own in some sort of fashion, with the best, and become one of the favorites among the bar. The absurdities that he often committed did him, it appears, more service than harm, and his unlimited volume of speech made him seem to many juries and outside listeners one of the most eloquent men of his day. There is no man of the Philadelphia bar of whom the anecdotes that have been preserved are so abundant with raciness. He frequently succeeded in his causes by means which could perhaps have occurred to none other than himself, the peculiarity of which contributed to make him the most interesting man of the time. Judge Washington once said of him that "he was the most troublesome speaker at the bar, as in beating every bush, in sporting phrase, he sometimes started game which he almost immediately left for the judge to hunt down." He died in 1831.

Sergeant is another of the names destined to be made and continued illustrious in the bar of Philadelphia. Jonathan Dickinson Sergeant, who was admitted to the bar in September, 1777, was born at Princeton, N. J., in 1746. He was educated at Princeton College, studied law with Richard Stockton, and was admitted to the bar of New Jersey, where he practiced for some years. He was a delegate from New Jersey in Congress during a portion of 1776–77. In July of the latter year he was appointed attorney-general for the State of Pennsylvania. He was selected, together with Mr. Patterson, attorney-general of New Jersey, as law counselor, to assist the judge advocate upon the court-martial of Gen. St. Clair, on account of the evacuation of Ticonderoga in 1778. He was counsel for the State of Pennsylvania in the controversy with the State of Connecticut, concerning the Wyoming lands, in 1782. He resigned the attorney-generalship in 1780, and was in practice until 1793, when, being upon the committee of health during the yellow fever visitation, he took the infection, and died in the month of October of that year.

Thomas Sergeant, born in Philadelphia, Jan. 14, 1782, was admitted to the bar on June 8, 1802. He was clerk of the Mayor's Court of the city from April 22, 1806, to May 10, 1809. After he left the bench of the District Court he was appointed secretary of the commonwealth, Dec. 16, 1817, and resigned on the 6th of July, 1819. In the same year he became attorney-general of Pennsylvania, and held the office for one year, being succeeded by Thomas Elder. He was postmaster of the city from 1828 to 1833, appointed justice of the Supreme Court of Pennsylvania Feb. 3, 1834, and held that office until 1846, when he resigned. He died May 8, 1860. Judge Mitchell says of Thomas Sergeant: "In person he was singularly unlike his distinguished brother John, but though not possessing the same brilliant forensic qualities, he was fully equal to his brother in soundness of judgment and depth of learning." It may be added that the brothers were unlike in appearance as well as in stature. John Sergeant was a small, dapper man, who was very particular as to his dress and appearance, while Thomas Sergeant was careless and slouchy, wearing awkwardly-cut clothes, and being sometimes seen in the public streets with a colored bandanna handkerchief tied around his neck.

The most distinguished member of the family, however, was John Sergeant, who was born in this city in 1779. He was the son of Jonathan Dickinson Sergeant, and was educated in the schools of the University until the spring of 1794, when he went to Princeton College and graduated in September, 1795. After leaving college he entered the counting-house of Messrs. Ellison and John Perot, but afterward changed his intentions and entered in March, 1797, the office of Jared Ingersoll, and commenced the study of the law. In July, 1799, before reaching the age of twenty, he was admitted to the bar. His advance in the profession was rapid, and in 1800 he was appointed to prosecute for the commonwealth in Chester County, and during that and subsequent years prosecuted also in Philadelphia. In 1802 he was appointed by Mr. Jefferson, commissioner of bankruptcy, and in 1805, he was elected a member of the House of Representatives.

Having declined a re-election in 1806, he was again elected in 1807 to the Legislature. During 1807 and 1808 he was chairman of the Committee on Roads and Inland Navigation, and in that capacity reported the first act giving the direct aid of the State to internal improvements, a cause which he had deeply at heart, and to which he never refused his assistance. The amount appropriated was nearly two hundred thousand dollars, which was applied to the construction of turnpike roads. At the same session he introduced a bill, which was passed, prohibiting masquerades, which he considered dangerous to public morals, the care of which he never lost sight of.

In 1815 he was elected to Congress by the district composed of the city and county of Philadelphia and county of Delaware, and was elected from the same district to the three following Congresses, the last time in 1820, without opposition, and at the end of the term he declined a re-election and devoted himself again exclusively to his profession.

Mr. Sergeant took his seat in Congress at an interesting period. It was the first session after the close of the war of 1812. He gave from the beginning his earnest, active, and efficient support to the bill framed by the Secretary of the Treasury, Mr. Dallas, and recommended by Mr. Madison, for the relief of the finances of the country. Another topic of vast importance during his early career in Congress, in rela-

tion to which he rendered distinguished service, was what has since been known as the Missouri question. On the 9th of February, 1820, he delivered one of the best reasoned and most able speeches that had ever been heard in the hall of either House of Congress. His efforts were also directed to promote the establishment of a bankrupt law which he had deeply at heart.

Mr. Sergeant, by the faithful discharge of his duties and the conscientious adherence to his principles, earned that distinction which gave him a national reputation; and the influence which he acquired in Congress may be illustrated by the fact that on one occasion, when a bill for the establishment of a lottery had been introduced, he, by a few words, not only defeated the bill itself, but so effectually awakened the feelings of the House that they ordered a committee to bring in a bill to prohibit the sale of lottery tickets in the District of Columbia.

Active as he was on the higher and more general questions which were presented, he never neglected those which were locally important to his constituents. The bills for constructing the Breakwater, for the erection of a new mint, and the Chesapeake and Delaware Canal, afford a few of many instances he served the districts he represented.

In 1826 he was appointed by the President minister from the United States to what was commonly called the Congress of Panama. In 1832 he was taken up as the Whig candidate for Vice-President.

John Sergeant.

In 1836 he was elected a member of the Constitutional Convention, and on its assembling, in 1837, was chosen president. In 1840 he was again elected to Congress, from which he retired in 1841.

On Gen. Harrison's election, he was tendered a place in the cabinet, and shortly afterward declined the appointment of minister to Great Britain.

His last public official function was discharged in 1847, when he was selected on the part of the United States as an arbitrator to determine the controversy then existing between the United States and Delaware as to the title of the Peapatch Island, and which was definitely settled by his award.

He was appointed one of the Board of Canal Commissioners under the act of 1825, and was the president of that board until the period of his departure to Mexico.

He acted as president of the House of Refuge from the date of its establishment; was also president of the Apprentices' Library, and for many years there was in the city no meeting of importance to which he did not attend. During this period he was engaged in a laborious profession.
