Sons Of Confederate Veterans

ARMY OF TENNESSEE • ALABAMA DIVISION

Descendants of Confederate Soldiers

Recent scholarship on the War Between the States has taken many paths in recent years, but none have proved as vital to the understanding of the Confederate military effort as the role the Southern racial, religious, and ethnic minorities played in the Second American Revolution. For too many years the Confederate soldier was portrayed only as white, predominately Scotch-Irish, and Protestant. New studies are not so much changing a myth as they are adding the color and diversity which has always existed in the South to its proper place in our history.

This new study by John O'Donnell-Rosales, a member of the Admiral Raphael Semmes Camp No.11 of the Sons of Confederate Veterans, opens a new chapter on the ethnic diversity of the Confederate soldier. This study will introduce the student to the sizeable contribution of the Hispanic community to the Confederate military. Compatriot Rosales helps us see again that our beloved Southland has never been monolithic in its people or physical regions. It is hoped that others will gain from this work the understanding that our Confederate heritage belongs not to one race, religion, or ethnic group, but is a shared experience of the whole people of the South.

David L. Toifel
Commander
Alabama Division
Sons of Confederate Veterans
Mobile, Alabama

Preface

My name is John O'Donnell-Rosales. I am a Cuban exile. The history of my family did not begin in the United States when, fleeing the Communist regime of Cuba, we arrived here in 1971. You see, we and others had been here before as conquerors, explorers, colonists, missionaries, and soldiers in war. The proximity of Cuba and Mexico to the United States and before that to the French, then Spanish, settlements in the Gulf Coast and the Atlantic coast of Florida made commerce, immigration, and inter-marriage commonplace. Whole regiments of militia were stationed in what became the Gulf states. When Spain ceded Florida to the young United States in 1819, an era came to an end though Hispanic influence continued first as Spanish, then Mexican, influence in the Southwest and Texas up until the Mexican War of 1846-1848. The majority of the settlers stayed on to become, with the descendants of the French, the famous Creoles of today.

The links with Spain and her former colonies were not broken off. Ships from the Spanish colonies of Cuba, Puerto Rico, and the new Central and South American states did brisk and steady business with New Orleans, Mobile, and Pensacola. This business across the border between the United States and Mexico led a large number of these people to settle in the area, thus strengthening the retention of the Spanish language and Christian faith.

The War for Southern Independence saw thousands of these men and their descendants flock to the Confederate cause. Whole companies were raised of Spanish/Hispanic men. This history has been largely forgotten in this era of political correctness. The vogue term for us lately has been Latinos. I do not speak Latin or come from Latium. I am Hispanic, of Spain by descendancy, and speak Spanish proudly. I am brown and proud of the racial admixture that runs in my veins. I know the history of our people and can talk down a real racist (Yes, there are some in the United States) because I know who I am as a man. Hispanics can be of any race or religion. We run the spectrum from white to red, from yellow to black, or an admixture of these. We have fought in every war here in the United States but seem to have been forgotten by the history publishing companies when it comes to the War of Southern Independence. The time has come to speak of these silent men who, like the Black Confederates, have been almost forgotten. History is the study of facts, regardless of whom they bother or annoy. We can only learn from the past if it is studied.

I have heard it said by real racists that we cannot assimilate, that we aren't part of Western civilization (remember, Spain is in Europe), and other stupidities. The purveyors of hate and disunity on all spectrums of the color line are the real enemies of this country. I must honestly admit that, although I love the United States, I have never felt American, but instead I feel Southern. I love the swamps of Louisiana, the Blue Ridge of Virginia, and the red soil of Alabama. The South will only rise again when white, black, red, yellow, and brown realize that we have to live here together. This land is our sacred birthright, each group having earned it by their blood and toil. When my Confederate ancestor, Pvt. Kelvin (Carlin) Rosales of Louisiana, heard the call to arms, he went. He was wounded many times and surrendered with the last Confederate units still active in June of 1865. You see, my friends, my entry in 1971 into the United States was paid a long time ago with his blood. The bravest sons of the South, of every color and tongue, went bravely to their duty. Their memories and sacrifices will be remembered as long as honest and truthful men walk the Southern soil.

Their spirits linger here; thus let the battle flags fly. Let them once again catch the wind. It is the least we can do for our valiant dead. Deo Vindice.

John O'Donnell-Rosales, M.A.

May, 1997

Introduction

The South Central Gulf States of Louisiana, Mississippi, and Alabama are famous for their French heritage and are not usually considered to be a part of the Hispanic world culturally or linguistically. The three states all fell under Spanish rule in segments from 1762 through 1813. It was during this period that Spanish-speaking immigrants were brought into the area, principally from the Canary Islands but also from other parts of Spain. These settlers inhabited the coastal plain and two pockets of settlements inland. The coastal settlements were New Orleans and St. Bernard Parish, Louisiana; St. Louis, Missouri; Biloxi, Mississippi; and Mobile, Alabama. The interior settlements were Natchitoches, Louisiana; Natchez, Mississippi; and the Bruli settlements of Ascension, Assumption, and Iberville Parishes, all in Louisiana. These settlers, with notable exceptions, were generally illiterate in Spanish during the Spanish Colonial Period with the situation worsening after the young United States took over the areas. The linguistic similarities between the Spanish and French and the Roman Catholic faith led to intermarriage and linguistic borrowing from the Louisiana French and later English into the Spanish language. This borrowing has led to the almost complete extinction of Colonial era Spanish as a viable language with only three small enclaves, all in Louisiana, where it may be heard among those fifty years of age and over as of 1997.

The Spanish Colonial "Provinces" of Florida and Texas, plus the Territory of Arizona (Confederate Territory of Arizona) that encompasses modern-day Arizona/New Mexico, saw Spanish exploration early. Florida was the first state to have a permanent European settlement, with the city of St. Augustine being founded in 1565. This was followed by settlement at Saint Elena, South Carolina, in 1566. There was continuous exploration and settlement up until the Mexican revolt against Spanish imperial rule.

The War for Southern Independence caught these settlers and many other businessmen, traders, and sailors in a decisive situation. Should they support their respective states and the newly founded Confederate Government or (as many foreigners did exempt themselves from military obligations due to foreign nationality) sit out the war? The answer was to fight for their new-found homes. One then gets into the question of slavery. The answer is simple: less than ten percent of Southerners owned slaves. The Spanish immigrants generally did not own slaves due to poverty and social position. The few who did were the businessmen of Mobile and New Orleans. The concept of slavery was abhorrent to many Hispanics in Central and South America where it had been outlawed in all of those nations by the outbreak of war. It was still practiced in the Spanish overseas colonies of Cuba and Puerto Rico, but only until 1878. The Hispanic Confederate was not fighting for the right to keep ten percent of Southern whites as slave owners. The question, then, is why fight? The answer, I believe, is that they fought to maintain their way of life and, afterwards, when the South was invaded, to protect their families and homes. The concept of community and familial obligations runs deep in the Spanish tradition. That one of the reasons so many of these men joined the Confederate military was due to perceived sociological responsibility is also a possibility that should be further researched. The last reason returns us to the subject of social class. The best way to move upward socially is during a general war. A war meant that an absolute nobody could become a hero, earn money, and rest on military laurels permitting access to upper echelon social contacts that were undreamt of prior to the outbreak of hostilities. Combined with the educational opportunities (such as having to learn English out of dire necessity), the war gave these men a new outlook on the world and their perceived place in it. It is true that many soldiers returned to their original areas after the war, where their descendants still live, but these were not the same men who left home in 1861. They had new skills and had seen (literally by foot) parts of the United States that they would have never visited unless the war had occurred.

I have taken the liberty to include men of the Jewish faith whose ancestors were expelled from Spain in 1492. I do this because even to this day large numbers of these valiant people continue to speak a dialect of Spanish written in Hebrew letters known as Ladino. They are also Hispanic. The ones who immigrated to the South concentrated in New Orleans, Louisiana; Savannah, Georgia; Charleston, South Carolina; and parts of Virginia. I wish scholars and historians would research the rich Jewish heritage of many Confederate veterans, not just the Hispanic aspect but their total contribution to the war effort.

This preliminary study of the Hispanic contribution to the Confederate military effort will, I hope, open the way for researchers, historians, and anthropologists to one day truly present the forgotten history of the Hispanic Confederates of the South. There is a wealth of information contained in the following pages. I hope it adds to the rich history of our nation.

Interpreting the Listings

Readers should take note, before beginning the listing of soldiers, of a problem most researchers encounter when dealing with the French and Spanish colonial records and subsequent nineteenth century records from Louisiana. This is the language dilemma. French and Spanish are freely employed in both dialectical and standardized forms. This means that names were generally spelled as they sounded by using archaic letter forms. This problem was compounded by the general illiteracy of the majority of the populace and, after the United States took power, by the anglicization of Romance language names. Thus one finds the letter *B* instead of *V*, as in *Albarez* (*Alvarez*), and the superimposition of *S* where *Z* should be, as in *Fernades* (*Fernandez*) or *Deas* (*Diaz*). The dialectical forms of Spanish spoken in the South Central Gulf states have been studied by myself prior to this manuscript's publication. This dialect can be divided into three surviving forms that can now be found only in Louisiana. They are Adeseno, Bruli, and Isleno; the two former are virtually extinct with the third having about 500 speakers. There was in all of these forms a tendency to omit consonant sounds when the name ended with a vowel. This is a common practice in many languages but led to some fantastic spellings when the Spanish names were written in French or English. We thus find *Rosale* for *Rosales* and *Soisre* for *Suarez*. Readers should try to find many variations of the name they are looking for if the twentieth century equivalent is not immediately found.

The names appear as faithful to the original records as possible. I have taken the liberty to "fix" the given names when it was an obvious misspelling such as *Menuel* (*Manuel*). Readers should note that the letter *J* was often written as *X*, thus *Jimenez* becomes *Ximenes*. Please check as many variations of the name as possible.

It is possible that a few mistakes and omissions may be found in this listing. I had a very difficult time compiling this work; regardless, any omissions or mistakes are mine. If any readers desire to receive further information on any of the listed men or if they have any questions and/or comments, they may contact the author at the following address:
