By Cable to THE NEW YORK TIMES.

HAVANA, March 15—The body of Dr. Eugenio Llanillo, a close friend of former President Fulgenzio Batista, was found in Punta Brava road near Havana tonight. He had been shot three times.

Dr. Llanillo, a one-time revolutionist, took a prominent part in political affairs during the Batista administration. He once was in charge of the publicity office in the Presidential Palace. Authorities attribute his death to a political quarrel.
