

de LIBERACION NACIONAL PUERTORRIQUEÑA
Armed Forces Of National Liberation

April 9th, 1977

Today's actions marks our determined efforts to free our homeland from the control of Yanki Imperialists, and the attempted exploitation of our natural resources. At no time will we let any corporation or the colonial government of Puerto Rico attempt to mine our natural resources. This also includes any off-shore drilling for petroleum. These natural resources belong to the Puerto Rican People and nobody else.

Since last year the Yanki government has been using grand jury process to stop the growth of the Puerto Rican Independance movement. These efforts by the government will prove futile because historically it is time for our government to progress no matter what the consequences are to anybody. We have learned that the Yanki government has taken our warning about the release of the Five Nationalist as an empty threat. These are not empty threats and our actions prove that. any one of the Five Nationalist dies in jail, there are going to be serious repercussions. Until this moment the Yanki government knows that do not issue empty threats. Andres Figueroa Cordero has to be released immediately or his death in jail will bring a serious blow upon the head of the imperialists.
