

**PORTO RICO JOINING IN THE FRAY.**—We are glad to learn that the revolutionary fire of Cuba has extended to and spread over the neighboring Spanish island of Porto Rico, because it gives more employment to Spain and is so far a contribution to the cause in Cuba. Porto Rico is a fertile island. It has a population of some six hundred thousand, and in importance is the fourth of the isles of the West Indies—Cuba being first, St. Domingo or Hayti second, and Jamaica third, though Jamaica is but little larger than Porto Rico. We expect the annexation before long, by the consent of all concerned, of St. Domingo, which lies between Cuba and Porto Rico, and so, with the annexation of these two, when the war therein is over, we shall have the three islands all in a row.
