

WORSE THAN THE FERMENT IN SPAIN—The ferment in the Spanish organ of this city over Cuba. This terrible organ threatens nothing less than the blockade of New York harbor and Delaware Bay by Spanish iron-clads, and the destruction of everything afloat bearing the American flag. This, too, by Spain in defence of Cuba. Don Quixote in his tilt against the windmills was not a fleabite to this ferocious fellow of the Spanish organ in New York. The worst of it all is he threatens a revival of the Southern confederacy. This fellow will bear watching.
