## NATIVITIES OF THE POPULATION OF THE UNITED STATES.

The following table, giving specifically the places of birth of the inhabitants of all of the States, was published in the Abstract Report of the Census ordered to be printed by the last Congress. It seems proper to include it among the aggregate tables of the present volume, although time has not admitted of its examination, and although in many particulars it does not agree with the other published results; and in some cases, as in regard to the number of natives of California residing in Connecticut, and in regard to the number of native-born residents of the Territories, objections have been raised, etc.

The annexed tables have been prepared in the Census Office from the annual reports of the State Department, and with no little pains and labor. A few years have been selected, in order to enable the reader to form an average calculation of the proportions of the sexes and of ages, and of occupations, the place of birth, and the place of arrival, of the persons who annually reach our country from abroad. By the place of arrival is only meant the shipping ports, and not the place of ultimate destination. Those who are stated as born in the United States are citizens returning from foreign travel, etc. Those who died upon the passage are included in the State reports, and therefore, to preserve the aggregates, are retained in the table. These statistics ought to be completed in this shape for all of the years, and should hereafter be aggregated annually in the State Department in the same manner, instead of in the form now adopted, which is far from being clear or condensed. They have an important bearing upon the tables of nativities obtained from the schedules, and published in another part of this volume.

TABLE LXXI.—NATIVITIES OF PASSENGERS ARRIVING IN THE UNITED STATES.
