WASHINGTON:
GOVERNMENT PRINTING OFFICE.
1872.

Occupations, by Nationality, and by Color. The reason for undertaking this additional work has been that the relations of occupation, of nationality, and of race (so far as the same is indicated by color) to life and health are believed to be quite as important as those of the seasons of the year. The publications of the Seventh Census (1850) presented the Statistics of Mortality tabulated with respect to occupations; but the work does not seem to have been undertaken at the Eighth Census.

The results of such tabulations are shown by the specimen tables following. These tables are only extended vertically and horizontally far enough to indicate the scope of the additional statistics secured.
